

WAC 434-663-200 Electronic document imaging system. An electronic document imaging system is a computer-based configuration of equipment and software that stores machine-readable document images and their associated character-coded index data for on-demand retrieval. Electronic images can be computer generated, or created through document scanning.

[Statutory Authority: Chapter 40.14 RCW. WSR 94-04-102, § 434-663-200, filed 2/1/94, effective 3/7/94.]
