(4) Annual fiscal year cost reports for state facilities must be submitted to DSHS by December 31 following the end of the fiscal year.

(5) If a contract is terminated, the provider must submit a final cost report and any other reports due under subsection (2) within one hundred twenty days after the effective date of termination or the expiration of the final extension granted by DSHS (see WAC 388-835-0340). For these reports, the reporting period is January 1 of the year of termination to the effective date of termination.

(6) A new provider must submit a cost report to DSHS by March 31 of the year following the effective date of their contract or the expiration of the final extension granted by DSHS (see WAC 388-835-0340). The period to be reported is the period extending from the contract's effective date through December 31 of that year.

NEW SECTION

WAC 388-835-0240 Does DSHS grant extensions for cost reporting deadlines? (1) DSHS, after receiving a written request stating why an extension is necessary, may grant a maximum of two thirty-day extensions for filing any

required reports. However, the written request must be received at least ten days before the due date of the reports.

(2) DSHS grants extensions only when it is clear why the due date cannot be met and the circumstances requiring the extension were not foreseeable by the provider.

NEW SECTION

WAC 388-835-0245 What if a provider fails to submit a final report? (1) If a provider does not submit a final report, all payments received by the provider for the unreported period become a debt owed to DSHS. After receiving DSHS's written demand for repayment, the provider has thirty days to repay this debt.

(2) Interest, at the rate of one percent per month on any unpaid balance, will begin to accrue thirty days after the provider receives DSHS's written demand for repayment.

NEW SECTION

WAC 388-835-0250 What if a provider submits improperly completed or late reports? (1) All providers must submit an annual report, including their proposed settlement by cost center, that is prepared according to this chapter's requirements and DSHS instructions. If an annual cost report is not properly prepared, DSHS may return it, in whole or in part, to the provider for correction and/or completion.

(2) If DSHS does not receive a properly completed report, including any approved extensions, on or before its due date, all or part of any payments due under the contract may be withheld until the report is properly completed and received by DSHS.

NEW SECTION

WAC 388-835-0255 What if a provider files a report containing false information? (1) Knowingly filing a report with false information (or with reason to know) is cause for termination of a provider's contract with DSHS.

(2) Any required adjustments to reimbursement rates because a false report was filed will be made according to WAC 388-835-0900.

(3) DSHS may refer for prosecution under applicable statutes, any provider who files a false report.

NEW SECTION

WAC 388-835-0260 Can providers amend annual cost reports filed with DSHS? DSHS must consider amendments to annual reports only when:

(1) Determining allowable costs affecting a final settlement computation, and

(2) Filed before the provider receives notification that a DSHS field audit has been scheduled.

NEW SECTION

WAC 388-835-0265 Can providers file amendments if a DSHS field audit has been scheduled? (1) A provider may file amendments after receiving a notice of a field audit

only when reimbursement rates need to be adjusted because significant errors or omissions were made when they were calculated.

(2) Errors of omissions are considered "significant" if they result in a net difference of two cents or more per resident day or one thousand dollars or more in reported costs, whichever is higher, in any cost area.

(3) Only the pages requiring changes and the certification required by WAC 388-835-0332 must be filed with the amendment.

(4) Any adjustments to reimbursement rates resulting from an amended report will be made according to WAC-388-385-0885.

NEW SECTION

WAC 388-835-0270 Can providers file amendments if DSHS does not conduct a field audit? If DSHS does not conduct a field audit and the preliminary settlement report becomes the final report, DSHS must consider amendments only when filed within thirty days after the provider receives the final settlement report.

NEW SECTION

WAC 388-835-0275 What requirements apply when amendments are filed? (1) When amendments are filed, a provider must report:

- (a) The circumstances surrounding the amendments;
- (b) The reasons why the amendments are needed; and
- (c) All relevant supporting documentation.

(2) DSHS may refuse to consider any amendment that gives a provider a more favorable settlement or rate if the amendment is the result of:

- (a) Circumstances over which the provider has control; or
- (b) Good-faith error using the system of cost allocation and accounting in effect during the reporting period in question.

(3) Acceptance or use by DSHS of an amendment to a cost report does not release a provider from civil or criminal liability.

MAINTAINING COST REPORT RECORDS

NEW SECTION

WAC 388-835-0280 Do ICF/MR providers have to maintain records related to their contracts? (1) A provider must, according to the terms of their contract, maintain adequate records so DSHS can audit reported data to verify provider compliance with generally accepted accounting principles and DSHS reimbursement principles and reporting instructions.

(2) If a provider maintains records based upon a chart of accounts other than the one established by DSHS, they must give DSHS a written schedule clearly illustrating how their individual account numbers correspond to those used by DSHS.

(3) After filing a report with DSHS, a provider must keep for five years, at a location in Washington state specified by the provider, all records supporting the report.

(4) If at the end of five years there are unresolved audit issues related to the report, the records supporting the report must be kept until the issues are resolved.

(5) Providers, according to the terms of their contract, must make records available for review upon demand by authorized personnel from DSHS and the United States Department of Health and Human Services during normal business hours at a location in Washington state specified by the provider.

(6) When a contract is terminated, final settlement must not be made until accessibility to and preservation of the provider's records within Washington state is assured.

NEW SECTION

WAC 388-835-0285 What if a provider fails to maintain records or refuses to let them be reviewed? (1) If a provider fails to maintain adequate records or fails to allow their inspection by authorized personnel, DSHS may suspend all or part of subsequent reimbursement payments due under the contract.

(2) Once the provider complies with the recording keeping and inspection provisions of their contract, DSHS must resume current contract payments and must release payments suspended while the provider was out of compliance.

NEW SECTION

WAC 388-835-0290 Does DSHS have a responsibility to retain provider reports? (1) DSHS must retain required reports for five years following their filing date.

(2) If at the end of five years there are unresolved audit issues surrounding a report, the report must be retained until those issues are resolved.

NEW SECTION

WAC 388-835-0295 Are the reports submitted to DSHS by providers available to the public? According to chapter 388-01 WAC, all required financial and statistical reports submitted by ICF/MR facilities to DSHS are public documents and available to the public upon request.

FIELD AUDITS

NEW SECTION

WAC 388-835-0300 What is an ICF/MR field audit? A field audit consists of an on-site audit of the provider's financial records to verify that information provided on the cost report for the period being audited is accurate and represents allowable cost.

NEW SECTION

WAC 388-835-0305 When does DSHS schedule a field audit? (1) DSHS may schedule cost report field audits

PROPOSED

using auditors employed by or under contract with DSHS. DSHS must notify a facility selected for an audit within one hundred twenty days after the facility submits a completed and correct cost report.

(2) DSHS must give priority to field audits of final annual reports and, whenever possible, must begin these audits within ninety days after a properly completed final annual report is received.

(3) DSHS normally notifies a provider at least ten working days before the field audit begins.

NEW SECTION

WAC 388-835-0310 When does DSHS complete a field audit? (1) If auditors are given timely access to a ICF/MR facility and to all records necessary to conducting their audit, DSHS must complete an audit within one year:

(a) Of receiving a properly completed annual cost report; or

(b) After the facility is notified it has been selected for an audit.

(2) For a state ICF/MR, DSHS must complete a field audit within three years after a properly completed cost report is received if auditors are given timely access to the facility and all records necessary to conducting their audit.

NEW SECTION

WAC 388-835-0315 How should a provider prepare for a field audit? (1) A provider must allow auditors access to the ICF/MR facility and all financial and statistical records. These records must be available at a location in the state of Washington specified by the provider. They must include:

(a) All income tax returns relating to the audited cost report and work papers supporting the report's data; or

(b) Work papers related to resident trust funds.
(2) The provider must reconcile reported cost data with:

(a) Applicable federal income and payroll tax returns; and

(b) The financial statements for the period covered by the report.

(c) The reconciliation must be in a form that facilitates verification by the auditors.

(3) The provider must designate and make available to the auditors at least one individual familiar with the internal operations of the facility being audited. The designated individual(s) must have sufficient knowledge and access to records to effectively respond to auditor questions and requests for information and documentation.

NEW SECTION

WAC 388-835-0320 What is the scope of a field audit? (1) Auditors must review a provider's record keeping and accounting practices and, where appropriate, make written recommendations for improvements.

(2) Auditors must examine a provider's financial and statistical records to verify that:

(a) Supporting records are in agreement with reported data; and

(b) Only assets, liabilities, and revenue and expense items that DSHS has specified as allowable costs have been included by the provider when computing the cost of services provided under the contract;

(c) Allowable costs have been accurately determined and are necessary, ordinary, and related to resident care;

(d) Related organizations and beneficial ownership interests have been correctly disclosed; and

(e) Resident trust funds have been properly maintained.

(3) Auditors must give the provider a draft of their audit narrative and summaries for review and comment before the final narratives and summaries are prepared.

(4) When an audit discloses material discrepancies, undocumented costs, or mishandling of patient trust funds, DSHS auditors, in order to determine if similar problem exist and take corrective action, may:

(a) Re-open a maximum of two prior unaudited cost reporting or trust fund periods; and/or

(b) Select future periods for audit.

(c) DSHS auditors may select reported costs and trust fund accounts for audit on a random or other basis.

NEW SECTION

WAC 388-835-0325 What if an auditor discovers that provider reports are inadequately documented? (1) An auditor must disallow any assets, liabilities, revenues, or expenses reported as allowable that are not supported by adequate documentation in the provider's financial records.

(2) Adequate documentation must show that reported costs were:

(a) Incurred during the period covered by the report;

(b) Related to resident care and training; and

(c) Necessary, ordinary and prudent.

(3) Adequate documentation must also show that reported assets were used to provide resident care and training.

NEW SECTION

WAC 388-835-0330 Are final audit narratives and summaries available to the public? The auditor's final audit narrative and summaries are considered public documents and will be available to the public through the public disclosure process in chapter 388-01 WAC.

RESIDENT TRUST ACCOUNTS

NEW SECTION

WAC 388-835-0335 What general requirements apply to accounting for resident trust accounts? (1) A provider must establish and maintain a bookkeeping system for all resident money received by the facility on behalf of the resident.

(2) This system must be incorporated into the facility's business records and be capable of being audited.

PROPOSED

(3) The bookkeeping system must apply to residents that are:

(a) Incapable of handling their money and whose guardian, relative, DDD regional service office administrator, or physician requests in writing that the facility accept this responsibility. (If the Social Security Form SSA-780, "Certificate of Applicant for Benefits on Behalf of Another," is used as documentation, it must be signed by one of the persons designated in this subsection.)

(b) Capable of handling their own money, but they ask the facility, in writing, to accept this responsibility for them.

(4) It is the facility's responsibility to maintain written authorization requests in a resident's file.

(5) A resident must be given at least a quarterly reporting of all financial transactions affecting their account. The resident's representative payee, guardian and/or other designated agents must be sent a copy of this quarterly report or any other reports related to the resident's account.

(6) Facilities must purchase surety bonds, or otherwise provide assurances or security satisfactory to DSHS, that assures the security of all resident personal funds deposited with them.

(7) Facilities may not require residents to deposit personal funds with them. A facility may hold a resident's personal funds only if the resident or resident's guardian gives written authorization to do so.

NEW SECTION

WAC 388-835-0340 What specific accounting procedures apply to resident trust accounts? (1) A provider must maintain a subsidiary ledger with an account for each resident for whom the provider holds money in trust.

(2) Each account and related supporting information must be:

(a) Maintained at the facility;

(b) Kept current;

(c) Balanced each month; and

(d) Detailed, with supporting verification, showing all money received on behalf of the individual resident and how that money was used.

(3) A provider must make each resident trust account available to DSHS representatives for inspection and audit.

(4) A provider must maintain each resident trust accounts for a minimum of five years.

(5) A provider must notify the DDD regional service office when an individual's account balance is within one hundred dollars of the amount listed on their award letter.

(6) A resident can accumulate funds by:

(a) Not spending their entire clothing and personal incidentals allowance; and

(b) Saving other income DSHS specifically designates as exempt.

NEW SECTION

WAC 388-835-0345 Can residents overdraw their trust account? (1) A resident may not overdraw their account (show a debit balance).

(2) If residents want to spend an amount greater than the balance in their trust account, the facility may loan the residents money from facility funds.

(3) The facility can collect loans to residents by installments from the portion of the resident's allowance remaining at the end of each month.

(4) The facility cannot charge residents interest on these loans.

NEW SECTION

WAC 388-835-0350 Can a resident trust account be charged for Title XIX services? Resident trust accounts cannot be charged for services provided under Title XIX.

NEW SECTION

WAC 388-835-0355 Can a resident trust account be charged for medical services, drugs, therapy and equipment? (1) Any properly made charge to a resident's trust account for medical services must be supported by a written denial from DSHS.

(2) Any request for additional equipment such as a walker, wheelchair or crutches must have a written denial from DSHS before a resident's trust account can be charged.

(3) A request for physical therapy, certain drugs or other medical services must have a written denial from DSHS before a resident's trust account can be charged.

(4) A written denial from DSHS is not required when the pharmacist verifies a drug is not covered by the program (e.g., items on the FDA list of ineffective or possible effective drugs, nonformulary over-the-counter (OTC) medications such as vitamins, nose drops, etc.) The pharmacist's notation that the program does not cover the drugs is sufficient.

NEW SECTION

WAC 388-835-0360 Can providers create petty cash funds for residents? (1) Providers may maintain petty cash funds for residents.

(2) The fund must be an imprest type fund.

(3) The cash for the fund must come from trust money.

(4) The amount of the fund must be reasonable and necessary for the size of the facility and the needs of the residents, but must not exceed five hundred dollars.

NEW SECTION

WAC 388-835-0365 Can providers create checking accounts for residents? (1) A provider must deposit all money, over and above the trust fund petty cash amount, intact into a trust fund checking account that is separate and apart from any other bank account(s) of the facility or other facilities.

(2) Deposits of resident allowances must be made intact into the trust checking account within one week from the time payment is received from DSHS, social security administration, or any other payor.

(3) A provider must make any related bankbooks, bank statements, check book, check register, all voided and all canceled checks available to DSHS representatives for audit and inspection. The provider must retain these supporting records and documents for at least five years.

(4) Resident trust money cannot be used to pay checking account service charges.

(5) Each bank's trust account must be reconciled each month to the trust account ledger for each resident.

NEW SECTION

WAC 388-835-0370 What controls must a provider use to ensure the safety of trust fund money? (1) A provider must not release trust fund money to anyone other than the:

- (a) Resident or, with their written consent, their guardian;
- (b) Resident's designated agent as appointed by power of attorney; or
- (c) Appropriate DSHS personnel designated by the DDD regional services administrator.

(2) A provider must complete a receipt, in duplicate, when money is received. One copy must be given to the person making the payment or deposit and the other copy must remain in the receipt book for easy reference.

(3) All residents must endorse, with their own signature, any checks or state warrants they receive. Only when a resident is incapable of signing their own name may the provider use the resident's "X" mark followed by their printed name and the signature of two witnesses.

(4) When both a general fund account and a trust fund account are kept at the same bank, the trust account portion of any deposit can be deposited directly to the trust account.

(5) A provider must credit a resident's trust account ledger sheet when the resident's allowance is received. This entry must be referenced with the receipt number and must be supported by a copy of the deposit slip (one copy for all deposits made).

NEW SECTION

WAC 388-835-0375 Can a resident withdraw trust money? Any money held in trust for a resident must be available to them for their personal and incidental needs upon their request or the request of one of the individuals designated in WAC 388-835-0335.

NEW SECTION

WAC 388-835-0380 What happens to resident funds when a change of ownership occurs? (1) When a facility is sold or some other transfer of ownership takes place, the former provider must provide the new provider with a written accounting, based upon generally accepted auditing standards, of all resident funds being transferred. The former provider must also obtain a written receipt for the funds from the new provider.

(2) Before any transfer of ownership occurs, the facility must give each resident, or their representative, a written accounting of any personal funds held by the facility.

(3) If there is disagreement regarding the accounting offered by the former provider, the resident retains all rights and remedies provided under state law.

NEW SECTION

WAC 388-835-0385 How are trust fund monies refunded? When a resident is discharged and/or transferred, the balance of their trust account, along with a receipt, will be returned to the individual designated in WAC 388-835-0335 within thirty days of the resident's transfer or discharge.

NEW SECTION

WAC 388-835-0390 How are trust funds liquidated?

(1) In the case of deceased resident, the provider must obtain a receipt from the next-of-kin, guardian, or duly qualified agent when the balance of the trust fund is released. If the next-of-kin, guardian or duly qualified agent cannot be identified, the DDD regional service office must be contacted, in writing within seven days of the resident's death, to assist in the release of the resident's trust fund money. A check or other document showing payment to the next-of-kin, guardian, or duly qualified agent will serve as a receipt.

(2) In situations where the resident leaves the ICF/MR facility without authorization and their whereabouts is unknown, the facility:

(a) Will make a reasonable attempt to locate the missing resident. A "reasonable attempt" includes, but is not limited to, contacting friends, relatives, police, the guardian, and the DDD regional office in the area; and

(b) If the resident cannot be located after ninety days, the facility must notify the department of revenue regarding the existence of "abandoned property" (see chapter 63.29 RCW Uniform Unclaimed Property Act). The facility must deliver to the department of revenue the balance of the resident's trust fund account within twenty days following their notification.

NEW SECTION

WAC 388-835-0395 How must a facility maintain resident property records? (1) A facility must maintain a current, written record for each resident that includes written receipts for all personal property entrusted to the facility by the resident.

(2) All property records must be available to the resident or designated resident representative (see WAC 388-835-0645).

(3) A facility must issue or obtain written receipts when taking possession or disposing of a resident's personal property. The facility must retain copies and/or originals of these receipts.

(4) A facility must maintain all resident property records so they are available to auditors and in a manner that facilitates the audit process.

ALLOWABLE AND UNALLOWABLE COSTS

NEW SECTION

WAC 388-835-0400 What are allowable costs? (1) Allowable costs are documented costs that are necessary, ordinary, related to providing ICF/MR services to ICF/MR residents, and not expressly declared nonallowable by applicable statutes or regulations. Costs are ordinary if they are of the nature and magnitude that a prudent and cost conscious management would pay.

(2) Allowable costs do not include increased costs resulting from transactions or the application of accounting methods which circumvent the principles of the prospective cost-related reimbursement system.

(3) DSHS does not allow increased costs resulting from a series of transactions between the same parties and involving the same assets (e.g., sale and leaseback, successive sales or leases of a single facility or piece of equipment).

(4) When a provider requests a rate adjustment according to WAC 388-835-0900 or 388-835-0905, any cost audited previously and not disallowed is subject to DSHS review and reconsideration according to the criteria in this section.

NEW SECTION

WAC 388-835-0405 What are unallowable costs? (1) Costs are unallowable if they are not documented, necessary, or ordinary and do not relate to providing services to ICF/MR residents.

(2) Examples of unallowable costs include, but are not limited to, the following:

(a) Costs of items or services not covered by the Medicaid program. Costs of nonprogram items or services will not be allowed even if indirectly reimbursed by DSHS as a result of an authorized reduction in resident contribution.

(b) Costs of services and items provided to ICF/MR residents covered by DSHS's medical care program but not included in ICF/MR services.

(c) Costs associated with a capital expenditure subject to Section 1122 approval (part 100, Title 42 CFR) if DSHS found the expenditure was not consistent with applicable standards, criteria, or plans. If DSHS was not given timely notice of a proposed capital expenditure, all associated costs will not be allowed as of the date the costs were determined to be nonreimbursable under applicable federal regulations.

(d) Costs associated with a construction or acquisition project that requires certificate of need approval according to chapter 70.38 RCW and that approval was not obtained.

(e) Costs associated with outside activities (e.g., costs allocable to the use of a vehicle for personal purposes, or related to the part of a facility leased out for office space).

(f) All salaries or other compensation of officers, directors, stockholders, and others associated with the provider or home office, except compensation paid for services related to resident care and training.

(g) Costs in excess of limits set in this chapter or costs violating principles contained in this chapter.

(h) Costs resulting from transactions or the application of accounting methods used to circumvent the principles of the prospective cost-related reimbursement system.

(i) Costs applicable to services, facilities, and supplies furnished by a related organization in excess of the lower of cost to the related organization or market meaning the price paid for comparable services, facilities or supplies when purchased in an arms length transaction.

(j) Balances of accounts that cannot be collected (bad debts or uncollectable accounts).

(k) Charity and courtesy allowances.

(l) Cash, assessments, or other contributions to political parties, and cost incurred to improve community or public relations. Dues to charitable organizations, professional organizations and trade associations are allowable costs.

(m) Any portion of trade association dues for legal and consultant fees and costs related to lawsuits or other legal action against DSHS.

(n) Travel expenses for trade association boards of directors in excess of the twelve allowable meetings per calendar year.

(o) Vending machine expenses.

(p) Expenses for barber or beautician services not included in routine care.

(q) Funeral and burial expenses.

(r) Costs of gift shop operations and inventory.

(s) Personal items such as cosmetics, smoking materials, newspapers and magazines, and clothing, except items used in resident activity programs or in ICF/MR programs where clothing is a part of routine care.

(t) Fund-raising expenses except those directly related to the resident activity program.

(u) Penalties and fines.

(v) Expenses related to telephones, televisions, radios, and similar appliances in a resident's private accommodations.

(w) Federal, state, and other income taxes.

(x) Costs of special care services, except where authorized by DSHS.

(y) Expenses for "key-person" insurance and other insurance or retirement plans not available to all employees.

(z) Expenses of profit-sharing plans.

(aa) Expenses related to the purchase and/or use of private or commercial aircraft that exceed what a prudent provider would spend for ordinary and economical transportation when conducting resident care business.

(bb) Personal expenses and allowances of owners or relatives.

(cc) All expenses of maintaining professional licenses or membership in professional organizations.

(dd) Costs related to agreements not to compete.

(ee) Goodwill and the amortization of goodwill.

(ff) Expenses related to vehicles in excess of what a prudent provider would expend for the ordinary and economic provision of transportation needs related to resident care.

(gg) Legal and consultant fees related to a fair hearing against DSHS. Including but not limited to, fees for accounting services used to prepare for an administrative judicial review resulting in a final administrative decision favorable to DSHS or where DSHS's decision is allowed to stand.

(hh) Legal and consultant fees related to a lawsuit against DSHS, including suits appealing administrative decisions.

(ii) Lease acquisition costs and other intangibles not related to resident care and training.

(jj) Interest charges assessed by the state of Washington for failure to make timely refund of overpayments and interest expenses incurred for loans obtained to make such refunds.

(kk) Travel expenses outside the states of Idaho, Oregon, and Washington and the Province of British Columbia except travel to and from the home and central office of a chain organization operation outside those areas if the travel is necessary, ordinary, and related to resident care and training.

(ll) Moving expenses of employees when a demonstrated, good-faith effort has not been made to recruit employees within the states of Idaho, Oregon, and Washington and Province of British Columbia.

NEW SECTION

WAC 388-835-0410 Can a provider offset miscellaneous revenues against allowable costs? (1) A provider must reduce allowable costs whenever the item, service, or activity covered by the costs generate revenue or financial benefits (e.g., purchase discounts or rebates) other than through the provider's normal billing for ICF/MR services.

(2) A provider must not deduct unrestricted grants, gifts, endowments, and interest earned from them from the allowable costs of a nonprofit facility.

(3) When goods or services are sold, the reduction in allowable costs must be the actual cost of the item, service, or activity. If actual cost cannot be accurately determined, the reduction must be the full amount of the revenue received. When financial benefits such as purchase discounts or rebates are received, the reduction must be the amount of the discount or rebate.

NEW SECTION

WAC 388-835-0415 Are the costs of meeting required standards allowable costs? (1) All necessary and ordinary expenses incurred by a provider to meet required standards associated with providing ICF/MR services are allowable costs.

(2) Examples are the cost of:

(a) Meeting licensing and certification standards;

(b) Fulfilling accounting and reporting requirements imposed by this chapter; and

(c) Performing any resident assessment activity required by DSHS.

NEW SECTION

WAC 388-835-0420 Are costs associated with related organizations allowable costs? (1) DSHS allows costs applicable to services, facilities, and supplies furnished to a provider by a related organization only to the following extent:

(a) The costs do not exceed the lower of the cost to the related organization; or

(b) Market, meaning the price paid for comparable services, facilities, or supplies when purchased in an arm's length transaction.

(2) Private facilities must make all cost documentation regarding related organizations available to the auditors at the time and place the entity's financial records are audited. State facilities must make all cost documentation regarding related organizations available to the auditors at DSHS's offices of accounting services, financial recovery, or budget when the facility is audited.

(3) DSHS disallows all payments to or for the benefit of a related organization where the cost to the related organization cannot be documented.

NEW SECTION

WAC 388-835-0425 Are start-up costs allowable costs? DSHS allows all necessary and ordinary start-up costs in the administration and operations rate component. Start-up costs must be amortized over at least sixty consecutive months beginning with the month the first resident is admitted for care.

NEW SECTION

WAC 388-835-0430 Are organizational costs allowable costs? (1) DSHS allows necessary and ordinary costs directly related to the creation of a provider's corporation or other form of business that are incurred before the admission of the first resident.

(2) DSHS allows these costs in the administration and operation cost area if they are amortized over at least sixty consecutive months beginning with the month in which the first resident is admitted for care.

(3) Examples of allowable organization costs include, but are not limited to, legal fees incurred in establishing the corporation or other organization and fees paid to states for incorporation.

(4) Organization costs do not include costs relating to the issuance and sale of shares of stock or other securities.

NEW SECTION

WAC 388-835-0435 Are education and training costs allowable costs? (1) DSHS allows ordinary expenses associated with on-the-job and in-service training required for employee orientation and certification when those expenses directly relate to performing an employee's assigned duties.

(2) Ordinary expenses for staff training are allowable costs.

(3) Necessary and ordinary expenses for recreational and social activity training conducted by a provider for volunteers are allowable costs.

(4) Training program expenses for other nonemployees are not allowable costs, except the costs associated with training county-contracted training program employees by an ICF/MR as a condition of the ICF/MR's agreement with the county-contracted training program.

(5) DSHS must allow expenses for travel in the states of Idaho, Oregon, and Washington and Province of British Columbia associated with education and training if the expenses meet the requirements of this chapter.

NEW SECTION

WAC 388-835-0440 Are operating lease costs allowable costs? Facility and/or equipment rental or lease costs associated with an arm's length operating lease are allowable costs.

NEW SECTION

WAC 388-835-0445 Are rental expenses paid to related organizations allowable costs? The expense of renting facilities or equipment from a related organization are allowable to the extent that the rent paid does not exceed the related organization's costs of owning (e.g., depreciation, interest on a mortgage) or leasing the assets. Computing the related organization's cost of owning or leasing the asset must be according to the requirements of this chapter.

NEW SECTION

WAC 388-835-0450 What is allowable interest? (1) DSHS allows a provider's necessary and ordinary interest costs incurred for working capital loans and capital indebtedness.

(a) "Necessary" means the interest expense must be incurred in connection with a loan satisfying a financial need of the provider and for a purpose related to resident care and training. Interest expense related to a business opportunity or goodwill is unallowable.

(b) "Ordinary" means the interest rate for the loan must not exceed the rate a prudent borrower would pay, in an arm's length transaction, for a comparable loan in the money market at that time.

(c) Interest expense must include amortization of bond discounts and expenses related to the bond issue. The amortization period must be the period from the date the bonds are sold to their maturity date or their date of extinguishment if they are retired before they mature.

(d) Interest expense for assets acquired in a change of ownership after September 30, 1984, is disallowed on any loan principal in excess of the former owner's depreciation base on July 18, 1984.

(2) Interest that is paid to or for the benefit of a related organization is allowed but only to the extent that the actual interest does not exceed the related organization's cost of using the funds.

(3) For construction loans, a provider must capitalize interest expense and loan origination fees incurred during the period of construction. Such costs must be amortized over the life of the constructed asset beginning with the date the first resident is admitted or the date the asset is put into service, whichever occurs first.

NEW SECTION

WAC 388-835-0455 Can a provider offset interest income against allowable costs? Except for nonprofit facilities, a provider must deduct from allowable interest expense all interest income earned from either investing or lending nonrestricted and restricted funds.

NEW SECTION

WAC 388-835-0460 How does DSHS calculate total compensation for owners and relatives? (1) Total compensation means the compensation provided in the employment contract, including benefits. The employment contract can be written, verbal, or inferred from the acts of the parties.

(2) In the absence of a contract, total compensation includes gross salary or wages and fringe benefits (e.g., health insurance) available to all employees.

(3) Total compensation does not include payroll taxes paid by the provider.

NEW SECTION

WAC 388-835-0465 How does DSHS define owner or relative compensation? (1) DSHS limits the total compensation of an owner or an owner's relative to the ordinary compensation for necessary services actually performed.

(a) Compensation is ordinary if it is the amount usually paid for comparable services in a comparable facility to an unrelated employee, and does not exceed limits established in this chapter.

(b) A service is necessary if it is related to resident care and training and would have to be performed by another person if the owner or relative did not perform it.

(2) A provider, in maintaining customary time records adequate for audit, must include time records for owners and relatives receiving compensation. These records must document how compensated time was spent performing necessary services.

(3) For purposes of this section, if the provider is a corporation, "owner" includes all corporate officers and directors.

CAPITALIZED COSTS AND DEPRECIATION

NEW SECTION

WAC 388-835-0470 What requirements apply to capitalizing equipment, including furniture and furnishings? A provider must capitalize equipment, including furniture and furnishings according to the following table:

Equipment, including furniture and furnishings	Historical cost	Useful life
For settlement purposes beginning January 1, 1981 and for rate setting purposes beginning July 1, 1982	At least \$500 per item	At least one year from date asset is put into service

PROPOSED

Equipment, including furniture and furnishings	Historical cost	Useful life
For settlement purposes beginning January 1, 1990 and for rate setting purposes beginning July 1, 1990	At least \$1,000 per item	At least one year from date asset is put into service
For settlement purposes beginning January 1, 1996 and for rate setting purposes beginning July 1, 1996	At least \$500 per item	At least one year

NEW SECTION

WAC 388-835-0475 What requirements apply to capitalizing buildings, other real property items, components, improvements and leasehold improvements? Buildings and other real property items, components, improvements and leasehold improvements must be capitalized if they are:

- (1) Required or authorized by the lease agreement;
- (2) Cost more than five hundred dollars; and
- (3) Involve at least one of the following:
 - (a) Increase the interior floor space of the structure;
 - (b) Increase or renew paved areas outside the structure that are either adjacent to the structure or provide access to it;
 - (c) Modification to the exterior or interior walls of the structure;
 - (d) Installation of additional heating, cooling, electrical, water-related, or similar fixed equipment;
 - (e) Landscaping or redecorating; or
 - (f) Increasing the structure's useful life by at least two years.

NEW SECTION

WAC 388-835-0480 How are the useful lives of leasehold improvements determined? The useful lives for all leasehold improvements are based upon the American Hospital Association (AHA) guidelines for the applicable asset.

NEW SECTION

WAC 388-835-0485 What are depreciable assets? Depreciable assets are tangible assets that are subject to depreciation and in which a provider has an ownership interest.

NEW SECTION

WAC 388-835-0490 What are some examples of depreciable assets? Some examples of depreciable assets are:

- (1) Buildings, meaning the basic structure or shell and additions to it.
- (2) Equipment such as elevators, heating system, and air conditioning system that are attached to a building and characterized by:

- (a) An economic useful life of at least three years but shorter than the life of the building to which it is attached;
 - (b) Incapable of being removed from the building to which it is attached;
 - (c) A unit cost sufficiently large enough to justify ledger control; and
 - (d) A physical size and identity that makes control by identification tags possible.
- (3) Equipment not attached to buildings.
- (4) Land improvements such as paving, tunnels, underpasses, on-site sewer and water lines, parking lots, shrubbery, fences, wall, etc., where replacement is the responsibility of the provider.
- (5) Leasehold improvements and additions made by the lessee belong to the lessor after the lease expires.

NEW SECTION

WAC 388-835-0495 What is "minor equipment"? (1) Minor equipment includes items such as wastebaskets, bedpans, syringes, catheters, silverware, mops, and buckets.

- (2) Minor equipment is generally characterized as:
- (a) Not occupying a fixed location and is used by a variety of departments;
 - (b) Small in size and unit cost;
 - (c) Subject to inventory control;
 - (d) A fairly large number of items are in use; and
 - (e) Possessing a useful life of one to three years.
- (3) If properly capitalized (see WAC 388-835-0230), minor equipment is depreciated. If not properly capitalized, minor equipment is expensed when acquired.

NEW SECTION

WAC 388-835-0500 Is land a depreciable asset? Because the economic useful life of land is considered to be unlimited, land is not a depreciable asset.

NEW SECTION

WAC 388-835-0505 What costs are included in the capitalized cost of land? Examples of costs that are capitalized as land costs include the cost of:

- (1) Off-site sewer and water lines;
- (2) Public utility charges necessary to service the land;
- (3) Government assessments for street paving and sewers;
- (4) Permanent roadways and grading of a nondepreciable nature; and
- (5) Curbs and sidewalks, the replacement of which is not the responsibility of the provider.

NEW SECTION

WAC 388-835-0510 What is the depreciation base of a tangible asset? (1) The depreciation base of a tangible asset is the asset's historical cost at the time it is acquired by the provider in an arm's length transaction:

- (a) Plus the cost of preparing the asset for use;

(b) Less the asset's estimated salvage value, if any, where the straight-line or sum-of-the-years digits methods of depreciation is used;

(c) Less any goodwill; and

(d) Less any accumulated depreciation incurred during periods the asset was used by the provider personally or in another business.

(2) When depreciable assets are acquired from a related organization, the provider's depreciation base cannot exceed the base the related organization had or would have had under a contract with DSHS.

NEW SECTION

WAC 388-835-0515 Can an appraisal be used to establish historical cost? (1) If DSHS challenges the historical cost of an asset or if a provider is unable to adequately document the historical cost of an asset, the department may use an appraisal process to establish the asset's fair market value at the time of purchase.

(2) If an appraisal process is used to establish the fair market value of equipment, vendors dealing in that particular type of equipment must perform the appraisals.

NEW SECTION

WAC 388-835-0520 What is the depreciation base of a donated or inherited asset? (1) The depreciation base of donated and/or inherited assets is the lesser of:

(a) Fair market value at the date of donation or death, less goodwill. (Any estimated salvage value must be deducted from fair market value when either the straight-line or sum-of-the-years digits method of depreciation is used); or

(b) The historical cost of the last owner to contract with DSHS, if any.

(2) If the donation or distribution is between related organization, the base must be the lesser of:

(a) Fair market value, less goodwill and; where appropriate, salvage value, or

(b) The depreciation base the related organization used or would have used when contracting with DSHS.

NEW SECTION

WAC 388-835-0525 How is the useful life of a depreciable asset determined? (1) Except for buildings, a provider must not adopt useful lives shorter than the guideline lives contained in the Internal Revenue Service class life ADR system or published by the American Hospital Association. Thirty years is the shortest useful life a provider can adopt for buildings.

(2) Useful life is measured from the date of the most recent arm's length acquisition of the asset.

(3) Building improvements to owned or leased buildings must be depreciated over the remaining useful life of the building or fifteen years, whichever is greater, except for improvements to licensed boarding home facilities required by the Fire Safety Evaluation System (FSES) of the 1984 Life Safety Code. Improvements to these licensed boarding home facilities must be depreciated for at least five years. A pro-

vider must receive DSHS approval before following this exception.

(4) Improvements to leased property that are, according to the lease agreement, the responsibility of the provider must be depreciated over the useful life of the improvement, except for improvements to licensed boarding home facilities required by the Fire safety Evaluation System (FSES) of the 1984 Life Safety Code. Improvements to these licensed boarding home facilities must be depreciated for at least five years. A provider must receive DSHS approval before following this exception.

(5) A provider may change the estimated useful life of an asset to a longer period if necessary.

NEW SECTION

WAC 388-835-0530 What depreciation methods are approved by DSHS? (1) Buildings, building improvements, land improvements, leasehold improvements, and fixed equipment must be depreciated using the straight-line method.

(2) Equipment must be depreciated using the straight-line method, the sum-of-the-years digits method, or the declining balance method at a rate not to exceed one hundred fifty percent of the straight-line rate. Providers electing to use either the sum-of-the-years digits method or the declining balance method may change to the straight-line method without permission of the department.

NEW SECTION

WAC 388-835-0535 What is depreciation expense? (1) Depreciation expense on tangible assets used to provide ICF/MR services is an allowable cost.

(2) Depreciation expense must be:

(a) Identifiable and recorded in the provider's accounting records; and

(b) Computed using the depreciation base, useful lives and methods specified in this chapter.

(3) If a provider reports annual depreciation expense that includes depreciation on assets unrelated to resident care and training, the annual reported expense must be reduced accordingly.

(4) Once a tangible asset is fully depreciated, no additional depreciation can be claimed unless a new depreciation base is established according to the rules of this chapter.

NEW SECTION

WAC 388-835-0540 Can providers claim depreciation on assets that are abandoned, retired or disposed in some other way? (1) Depreciation cannot be claimed on tangible assets that are sold, traded, scrapped, exchanged, stolen, wrecked or destroyed by fire or some other casualty.

(2) Depreciation cannot be claimed on permanently abandoned assets.

(3) If an asset has been retired from active use but is being held for stand-by or emergency service and DSHS has determined that the asset is needed and can be effectively

used in the future, depreciation may be claimed by the provider.

GAINS AND LOSSES ON RETIRED ASSETS

NEW SECTION

WAC 388-835-0545 How must providers account for gains and losses on the retirement of tangible assets? For settlement purposes beginning with January 1 1981 and for rate setting purposes beginning with the July 1, 1982 rate period, the rules in WAC 388-835-0265 through WAC 388-835-0275 apply.

NEW SECTION

WAC 388-835-0550 How are gains and losses calculated when a tangible asset is retired? When a tangible asset is retired, the difference between the assets undepreciated base and any proceeds received from its retirement is considered a gain or loss on retirement.

NEW SECTION

WAC 388-835-0555 How must providers account for gains and losses on retired assets that are replaced? If a provider replaces a retired asset, any gain or loss on retirement must be deducted from or added to the cost of the replacement asset, respectively. However, a loss on retirement can only be added to the replacement asset's cost if the provider makes a reasonable effort to recover at least the outstanding book value of the retired asset.

NEW SECTION

WAC 388-835-0560 How must providers account for gains and losses on retired assets that are not replaced?

(1) If a retired asset is not replaced the gain or loss on retirement must be spread over the actual life of the asset up to the date of retirement. However, a loss can only be spread if the provider has made a reasonable effort to recover at least the outstanding book value of the retired asset.

(2) DSHS will calculate any difference between the actual reimbursements paid and the amount of reimbursement that should be paid after the gain or loss is spread. If the difference results from a gain DSHS must recover the difference from the provider. If the difference results from a loss the difference will be added to allowable costs when determining the settlement.

NEW SECTION

WAC 388-835-0565 How must providers account for gains and losses on retired assets if they terminate their contract with DSHS? If a retired asset is not replaced and the provider is terminating their contract with DSHS, the gain or loss on retirement must be accounted for according to the requirements in WAC 388-835-0280.

NEW SECTION

WAC 388-835-0570 Can DSHS recover reimbursements for depreciation expense? If a provider terminates their contract without selling or otherwise retiring equipment that was depreciated using an accelerated method, depreciation schedules for this equipment for those periods when the provider participated in the ICF/MR program must be adjusted. DSHS will recover any difference between reimbursement actually paid for depreciation and the reimbursement that would have been paid if the straight-line method had been used.

REIMBURSEMENT RATES

NEW SECTION

WAC 388-835-0575 What requirements apply to calculating ICF/MR reimbursement rates? (1) Medicaid program reimbursement rates established according to this chapter apply only to facilities holding appropriate state licenses and certified to provide ICF/MR services according to state and federal laws and regulations.

(2) All rates must be reasonable and adequate to meet the costs incurred by economically and efficiently operated facilities providing ICF/MR services according to state and federal laws and regulations.

(3) For private facilities:

(a) Final payments must be the lower of the facility's prospective rate or allowable costs.

(b) Prospective rates must be determined according to WAC 388-835-0845, 388-835-0850, 388-835-0860, 388-835-865, 388-835-0870, 388-835-0875, and 388-835-0880.

(c) Final payments must be determined according to WAC 388-835-0880.

(4) For state facilities:

(a) Final payments must be the facility's allowable costs.

(b) Interim rates must be calculated using the most recent annual reported costs (see WAC 388-835-0845) divided by the total resident days during the reporting period. These costs may be adjusted to incorporate federal, state, or department changes in program standards or services.

(c) Final payments must be determined according to WAC 388-835-0880.

NEW SECTION

WAC 388-835-0580 What program services are not covered by DSHS prospective reimbursement rates?

Medical services that are part of DSHS's medical care program but not included in ICF/MR services are not covered by prospective reimbursement rates. Payments are made directly to the service provider according to WAC 388-835-0835 requirements.

NEW SECTION

WAC 388-835-0585 What requirements apply to prospective reimbursement rates for new providers? (1) A prospective reimbursement rate for a new provider must be

established within sixty days after DSHS receives a properly completed projected budget from the provider. The effective date of the reimbursement rate must be the same as the effective date of the contract.

(2) The prospective reimbursement rate must be based on the:

- (a) Provider's projected cost of operation;
- (b) Costs and payment rates of the prior provider, if any; and/or
- (c) Costs and payment rates, taking into account applicable lids or maximums, of other providers in comparable circumstances.

(3) If DSHS does not receive a properly completed projected budget at least sixty days before the contract's effective date, a preliminary rate, based on information from former and/or comparable providers, will be prepared by DSHS. This preliminary rate must remain in effect until an initial prospective rate can be set.

(4) If a change of ownership takes place that does not result from an arm's length transaction, the new provider's prospective rates for administration, operations and property costs cannot exceed the former provider's rates. The former provider's rates can be adjusted, if necessary, to reflect changes in economic trends.

NEW SECTION

WAC 388-835-0590 How are reimbursement rates calculated? (1) Each provider's reimbursement rate must be recalculated once each calendar year. The recalculated rate will be implemented prospectively. The recalculated rate will be effective on July 1 of the calendar year in which it was computed. Rates may be recalculated to reflect legislative inflation adjustments or to comply with the requirements of WAC 388-835-0900.

(2) If a provider participated in the ICF/MR program for at least six months during the previous calendar year, their rates must be based on the prior period's allowable costs. If the provider participated in the program for less than six months in the previous calendar year, their rates must be calculated according to WAC 388-835-0840 requirements.

(3) Unless circumstances beyond DSHS's control interfere, all providers submitting correct and complete cost reports by March 31 must receive notification of their new rates by July 1.

(4) When calculating a provider's rate, DSHS must use data from the most recent and complete cost report submitted by the provider and reviewed by DSHS as described in WAC 388-835-0700.

(5) Inflation factor adjustments are based on the Implicit Price Deflator for Personal Consumption from the state of Washington, Economic and Revenue Forecast prepared by the Office of the Forecast Council.

NEW SECTION

WAC 388-835-0595 When does DSHS review a provider's annual cost report? DSHS must review and analyze each annual cost report within six months after it is properly completed and filed with the department.

NEW SECTION

WAC 388-835-0600 What is the purpose of reviewing a provider's annual cost report? DSHS reviews and analyzes annual cost reports to determine if the information contained in them is correct, complete, and reported according to generally accepted accounting principles, the requirements of this chapter and any other applicable rules and instructions issued by the department.

NEW SECTION

WAC 388-835-0605 What is the scope of an annual cost report review? (1) DSHS' review and analysis may include, but is not limited to:

- (a) An examination of prior years reported costs;
- (b) An examination of any cost report review adjustments made in prior years and their final disposition;
- (c) An examination of findings, if any, from prior year cost report field audits; and
- (d) Findings, if any, from the field audit of the cost report currently being reviewed.

(2) If it appears that a provider incorrectly calculated or reported their costs, DSHS may:

- (a) Request additional information from the provider;
- (b) Schedule a special field audit of the provider; or
- (c) Make adjustments to the reported information. If adjustments are made, DSHS must give the provider a schedule of the adjustments including an explanation for each one and the dollar amount associated with each one.

(3) If the provider believes that DSHS adjustments are incorrect, the adjustments must be reviewed according to WAC 388-835-0900. If this review does not satisfactorily resolve the dispute, the adjustment must be further reviewed according to WAC 388-835-0910.

NEW SECTION

WAC 388-835-0610 Can DSHS accumulate cost report information and use it for department purposes? DSHS may accumulate data from properly completed cost reports for:

- (1) Use in exception profiling and establishing rates; and
- (2) Analytical, statistical, or informational purposes that the department considers important.

NEW SECTION

WAC 388-835-0615 What are component rates and cost centers? (1) A provider's overall ICF/MR resident reimbursement rate consists of five component rates within three cost centers.

- (2) The five component rates are:
 - (a) Resident care and habilitative services;
 - (b) Food;
 - (c) Administration and operations;
 - (d) Property; and
 - (e) Return on equity.
- (3) The three cost centers are:
 - (a) Resident care and habilitation;

- (b) Administration, operations, and property; and
- (c) Return on equity.

NEW SECTION

WAC 388-835-0620 What reimbursement requirements apply to resident care and habilitation cost centers? (1) Resident care and habilitation cost centers at facilities with at least sixteen residents and licensed as a nursing facility, must, according to applicable federal and state regulations, reimburse for resident living services, habilitative and training services, recreation services, and nursing services.

(2) Resident care and habilitation cost centers at facilities with less than sixteen residents and licensed as a boarding home, must, according to applicable federal and state regulations, reimburse for resident living services, habilitative and training services, recreation services, and nursing services. These cost centers must also reimburse for resident care and training staff who perform any of the administration and operations functions specified in WAC 388-835-0870.

(3) A facility's resident care and habilitation cost center rate must be its most recent reported costs per resident day adjusted for inflation.

NEW SECTION

WAC 388-835-0625 What requirements apply to administration, operations and property cost center rates? Administration, operations, and property cost center rates are the sum of three separate rate components:

- (1) The food rate component established by WAC 388-835-0865;
- (2) The administration and operations rate component established by WAC 388-835-0870; and
- (3) The property rate component established by WAC 388-835-0875.

NEW SECTION

WAC 388-835-0630 What is the food rate component? The food rate component reimburses for the necessary and ordinary costs of a resident's bulk and raw food, dietary supplements, beverages with meals and nourishment between meals.

NEW SECTION

WAC 388-835-0635 Is there a limit to the allowable cost for administrative personnel? Compensation for administrative personnel is an allowable cost within the limits contained in this section:

- (1) For purposes of this section "compensation" means gross salaries, wages, and the applicable cost of fringe benefits made available to all employees. Compensation does not include payroll taxes paid by the provider.
- (2) A licensed administrator's total compensation for actual services rendered to an ICF/MR facility on a full-time

basis (at least forty hours per week, including reasonable vacation, holiday, and sick time) is allowable at the lower of:

- (a) Actual compensation received; or
- (b) For calendar year 2000, the amount specified in the following table that corresponds to the number of set-up beds in the facility.

Number of set-up beds	Maximum compensation
15 or less	\$42,886
16 to 79	\$47,739
80 to 159	\$52,832
160 and up	\$56,163

(c) The maximum compensation amounts will be adjusted annually for inflation. Inflation factor adjustments are based on the Implicit Price Deflator for Personal Consumption from the state of Washington, Economic and Revenue Forecast prepared by the Office of the Forecast Council.

(d) A licensed administrator's compensation will be allowed only if DSHS is notified in writing within ten days following the start of their employment.

(3) Total compensation of not more than one full-time licensed assistant administrator will be allowed if there are at least eighty set-up beds in the ICF/MR facility. Compensation is allowable at the lower of:

- (a) Actual compensation received; or
- (b) Seventy-five percent of the amount specified in the above table.

(4) Total compensation of not more than one full-time registered administrator-in-training is allowed at the lower of:

- (a) Actual compensation received; or
- (b) Sixty percent of the amount specified by DDD in the above table.

(5) The cost of a licensed administrator, assistant administrator, or administrator-in-training is not an allowable expense in ICF/MR facilities with fifteen beds or less. The facility's qualified mental retardation professional (QMRP) will provide administrative services.

(6) A QMRP's total compensation of wages and/or salary is allowable at the lower of:

- (a) Actual compensation received; or
- (b) The amount specified in DDD in the above table.

(7) If a licensed administrator, licensed assistant administrator, registered administrator-in-training, or QMRP are employed on a less than full-time basis, allowable compensation must be the lower of:

- (a) Actual compensation received; or
- (b) The maximum amount allowed multiplied by the percentage derived from dividing actual hours worked plus reasonable vacation, holiday and sick time, by two thousand and eighty hours.

(8) A provider must maintain time records for any licensed administrators, assistant administrators, administrators-in-training, or QMRPs they employ.

NEW SECTION

WAC 388-835-0640 Can a provider hire an individual or firm to manage their ICF/MR facility? (1) A pro-

PROPOSED

vider can enter into an agreement with an individual or firm to manage their ICF/MR facility as the provider's agent, however, the provider must submit a copy of the agreement to DSHS at least sixty days before it becomes effective.

(2) Copies of any amendments to a management agreement must be received by DSHS at least thirty days before the amendment become effective.

(3) Management fees for periods before DSHS receives a copy of the agreement are not allowable costs.

(4) The department may waive the sixty-day notice requirement to protect the health and safety of facility residents. Any waiver of the sixty-day notice requirement by DSHS must be in writing.

NEW SECTION

WAC 388-835-0645 Are management fees allowable costs? Management fees are allowable costs only when there is:

- (1) A written management agreement that:
 - (a) Creates a principal and/or agent relationship between the provider and the manager; and
 - (b) Identifies the items, services, and activities that the manager will provide.
- (2) Documentation that verifies the management service was performed.
- (3) Assurance that the service performed was necessary and did not duplicate any service provided by the provider.

NEW SECTION

WAC 388-835-0650 Are all management fee's allowable? Providers must limit the amount of allowable fees for general management services (including corporate management fees, business entity management fees, board of director fees and overhead and indirect costs associated with providing general management services) to:

- (1) The maximum allowable compensation for a licensed administrator and, if the facility has at least eighty set-up beds, an assistant administrator even if one is not employed minus the actual compensation received by the licensed administrator and assistant administrator.
- (2) The maximum allowable compensation for a QMRP at a ICF/MR facilities with fifteen beds or fewer, minus the actual compensation received by the QMRP.

NEW SECTION

WAC 388-835-0655 Are management fees involving a related organization allowable costs? (1) A management fee paid to or for the benefit of a related organization is allowable if it does not exceed the lesser of:

- (a) The limits set out in WAC 388-835-0400; or
 - (b) The lower of the related organization's actual cost of providing necessary resident care and training services under the management agreement or the cost of comparable services purchased in an arm's length transaction elsewhere.
- (2) If related organization costs are joint facility costs, their measurement must comply with the requirements of WAC 388-835-0400.

NEW SECTION

WAC 388-835-0660 How do overhead and indirect costs relate to allowable costs? (1) For general administrative and management services, costs such as central office costs, owner compensation, and other fees or compensation, including joint facility costs, must include the overhead and indirect costs associated with providing general management services that are not allocated to specific services.

(2) General administrative and management service costs as described in subsection (1) of this section are subject to the management fee limits established in WAC 388-835-0405.

NEW SECTION

WAC 388-835-0665 Are travel and housing expenses of nonresident staff working at a provider's ICF/MR facility allowable costs? (1) All necessary travel and housing expenses of nonresident staff working at a provider's ICF/MR facility are allowable costs if their visit does not exceed three weeks.

(2) If the nonresident staff visit extends beyond three weeks, any travel and housing expenses are subject to the management fee limits established in WAC 388-835-0405.

NEW SECTION

WAC 388-835-0670 Are bonuses paid to a provider's employees allowable costs? (1) Bonuses paid to employees at a provider's ICF/MR facility are compensation.

(2) Bonuses paid to central office employees are management costs that are subject to the management fee limits established in WAC 388-835-0405.

(3) Bonuses paid to other employees not located at an ICF/MR facility and performing managerial services are management costs that are subject to the management fee limits established in WAC 388-835-0405.

NEW SECTION

WAC 388-835-0675 Are fees paid to members of the board of directors or corporations allowable costs? Fees paid to board of director members or corporations operating ICF/MR facilities are management costs subject to the management fee limits established in WAC 388-835-0405.

NEW SECTION

WAC 388-835-0680 How is the administration and operations rate component computed? (1) The administration and operations rate component includes reimbursement for the necessary and ordinary costs of:

- (a) Overall administration and management of the facility;
- (b) Operations and maintenance of the physical plant;
- (c) Resident transportation;
- (d) Dietary service (other than the cost of food and beverages);
- (e) Laundry service;

(f) Medical and habilitative supplies;

(g) Taxes; and

(h) Insurance.

(2) An ICF/MR facility's administration and operations rate component is the lesser of:

(a) Its most recent reported cost per resident day adjusted for inflation; or

(b) The calculated rate that is at or above eighty-five percent of state and private facilities' most recent reported cost per resident day adjusted for inflation. This ranking must be based on cost reports used to determine rates for facilities with an occupancy level of at least eighty-five percent during the cost report period.

NEW SECTION

WAC 388-835-0685 How is the property rate component computed? (1) The property rate component reimburses an ICF/MR facility for the necessary and ordinary costs of leases, depreciation, and interest.

(2) It is the facility's most recent desk-reviewed cost per resident day.

NEW SECTION

WAC 388-835-0690 Does DSHS pay a return on equity to providers? DSHS pays a return on equity to proprietary providers.

NEW SECTION

WAC 388-835-0695 How is a return on equity calculated? Calculating return on equity is a three-step process.

(1) First, a provider's net equity is calculated using appropriate items from the provider's most recent cost report and relevant Medicare rules and regulations. Note: Goodwill is not included in the calculation of net equity. Also, monthly equity calculations will not be used.

(2) Second, the Medicare rate of return for the twelve-month period ending on the provider's cost report-closing date is multiplied by the provider's net equity.

(3) Finally, the amount calculated in subsection (2) is divided by the provider's annual resident days for the cost report period to determine a return on equity rate per resident day.

NEW SECTION

WAC 388-835-0700 What if a provider's cost report covers a period shorter than twelve months? If a provider's cost report covers less than a twelve-month period, annual resident days are estimated by using the actual resident days reported by the provider. The provider will then be paid a prospective rate per resident day. The prospective rate will either be the rate per resident day calculated in WAC 388-835-0010 or two dollars per resident day whichever is less.

NEW SECTION

WAC 388-835-0705 Are return on equity calculations subject to field audits? (1) All information used to calculate return on equity is subject to field audit.

(2) A field audit can be used to determine whether the providers reported equity exceeds the equity calculated according to Medicare and the rules of this chapter.

NEW SECTION

WAC 388-835-0710 How does DSHS use field audit results? DSHS can use the field audit results to recalculate the provider's return on equity rate for the reported rate period. Any payments received by the provider in excess of the return on equity rate must be refunded to DSHS as part of the settlement procedure established in WAC 388-835-0720.

NEW SECTION

WAC 388-835-0715 Does DSHS place upper limits on the reimbursement rates it pays providers? DSHS limits its reimbursement rates to the following:

(1) Reimbursement rates for providers cannot exceed the provider's customary charge to the general public for the type of service covered by the rate.

(2) Public facilities rendering services for free or for a nominal charge will be reimbursed according to the methods and standards established in this chapter.

SETTLEMENTS

NEW SECTION

WAC 388-835-0720 What general requirements apply to settlements between DSHS and providers? (1) Except as otherwise provided in this chapter, settlements must be calculated at the lower of a provider's prospective reimbursement rate or audited allowable costs.

(2) Each provider must complete a proposed preliminary settlement as part of their annual cost report. The due date for the proposed preliminary settlement is the same as the due date for the annual cost report. After reviewing the proposed preliminary settlement, DSHS must issue a preliminary settlement report to the provider.

(3) If a field audit is conducted, DSHS must evaluate the audit findings and issue a final settlement that incorporates the auditor's findings and DSHS's evaluation.

(4) If according to a preliminary or final settlement and the procedures in this chapter, a provider received overpayments from DSHS, they must refund those overpayments to the department. Conversely, DSHS must pay provider for any underpayments for which the department is responsible.

(5) Following a preliminary or final settlement, payment for services must be at the most recent available settlement rate.

PROPOSED

NEW SECTION

WAC 388-835-0725 What requirements apply to paying overpayments and underpayments? (1) Within thirty days after submitting a preliminary or final settlement report to the provider, DSHS must pay any underpayments it owes.

(2) If a provider received overpayments or payments in error from DSHS, they must refund those payments within thirty days after receiving the preliminary or final settlement report.

(3) If a provider fails to comply with subsection (2) and the contract has not been terminated, DSHS must deduct the amount the provider owes, plus interest, from the department's current monthly payment due to the provider. The interest rate charged by DSHS on any unpaid balance is one percent per month.

(4) If a provider fails to comply with subsection (2) and the contract has been terminated, DSHS may:

(a) Deduct the amount owed by the provider, plus interest, from any amounts due to the provider from the department. (The interest rate on any unpaid balance is of one percent per month); or

(b) Use whatever legal means is available to recover the overpayment or erroneous payment plus interest on the unpaid balance at the rate of one percent per month.

NEW SECTION

WAC 388-835-0730 What if the amount of overpayment or underpayment is being disputed? (1) A provider does not have to refund any disputed amounts if they, in good faith, disagree with a settlement report and file a timely request for an administrative or judicial hearing.

(2) DSHS cannot withhold any amount owed by a provider, plus interest, from current payments due to the provider if the provider's debt is being administratively reviewed or judicially appealed.

(3) DSHS may recover portions of refunds and assess interest on amounts not specifically disputed by a provider in an administrative hearing or judicial appeal.

(4) If the administrative or judicial remedy sought by the provider is not granted or is partially granted after all appeals are exhausted or terminated by mutual agreement, the provider must refund all amounts owed to DSHS. These amounts, plus interest, must be paid within sixty days following the date of an administrative or judicial decision or the date the dispute process was mutually terminated. Interest accrues on the amount owed from the date a review was requested to the date the debt is repaid.

NEW SECTION

WAC 388-835-0735 What requirements apply to a provider's proposed preliminary settlement? (1) Proposed preliminary settlements submitted by providers must use the prospective rate for the resident care and habilitation cost center at which the provider was paid during the report period, including any resident specific payment adjustments. Resident specific payments must be weighted by the number

of paid resident days each rate was in effect and compared to the provider's allowable costs for the cost center divided by total resident days.

(2) A provider's administration, operations, and property cost center settlement rate must be the prospective rate for the report period, including any payment adjustments, weighted by the number of paid resident days each rate was in effect.

(3) A provider's return on equity settlement rate must be the prospective rate for the report period weighted by the number of paid resident days the rate was in effect.

NEW SECTION

WAC 388-835-0740 How must DSHS respond to a provider's proposed preliminary settlement? (1) DSHS has one hundred twenty days after receiving a proposed preliminary settlement to review it for accuracy and either accept or reject it.

(2) If accepted, the proposed preliminary settlement becomes the preliminary settlement report.

(3) If rejected, DSHS must issue a preliminary settlement report by cost center that fully substantiates disallowed costs, refunds, or underpayments due and adjustments to the proposed preliminary settlement.

NEW SECTION

WAC 388-835-0745 What recourse does a provider have if DSHS rejects their proposed preliminary settlement? A provider has thirty days after receiving a preliminary settlement report to contest it (see WAC 388-835-0950 and 388-835-0960). After thirty days, if the preliminary settlement report has not been contested, it cannot be reviewed.

NEW SECTION

WAC 388-835-0750 What requirements apply to final settlements? (1) A final settlement must be by cost center and must fully substantiate all:

(a) Disallowed costs;

(b) Refunds;

(c) Underpayments; or

(d) Adjustments to cost reports, financial statements, other reports, and schedules submitted by the provider.

(2) A final settlement report must use the prospective rate at which the provider was paid during the report period, including any resident specific payment adjustments made for resident care and training cost center. Resident specific payments must be weighted by the number of paid resident days reported for the period each rate was in effect. DSHS must compare these payments to the provider's audited allowable costs for the period.

(3) A provider's administration operations and property cost center settlement rate is the prospective rate for the period weighted by the number of paid resident days each rate was in effect.

(4) A provider's return of equity rate is the prospective rate for the report period weighted by the number of paid resident days the rate was in effect.

PROPOSED

NEW SECTION

WAC 388-835-0755 Can a provider disagree with a final settlement report? A provider has thirty days after receiving a final settlement report to contest it (see WAC 388-835-0950 and 388-835-0960). After thirty days, if the final settlement report has not been contested, it cannot be reviewed.

NEW SECTION

WAC 388-835-0760 What if DSHS conducts an audit during the final settlement process? (1) If DSHS conducts an audit, it must issue a final settlement report to the provider after the audit process is completed. Completing the audit process includes exhausting or mutual terminating the reviews and/or appeals of audit findings or determinations.

(2) If a provider, in good faith, is disputing audit findings or determinations through the administrative review or judicial appeal process, DSHS may issue a partial final settlement report to recover overpayments based on audit findings or determinations not being disputed.

NEW SECTION

WAC 388-835-0765 Why is a state facility settlement important? The state facility settlement is determined to establish a state facility's final payment.

NEW SECTION

WAC 388-835-0770 How is a state facility settlement calculated? The settlement must be calculated as follows:

(1) If the state facility's allowable costs for the report period are greater than their interim payment, the amount owed to the facility is the allowable cost amount minus the interim payment.

(2) If the state facility's allowable costs for the report period are less than their interim payment, the amount owed by the department is the interim payment minus the allowable cost amount.

NEW SECTION

WAC 388-835-0775 How is a state facility settlement implemented? (1) The settlement is implemented in a two-step process consisting of the facility first submitting a proposed preliminary settlement to DSHS and DSHS responding with a final settlement report that it submits to the state facility.

(2) The proposed preliminary settlement must be:

(a) Submitted to DSHS when the state facility submits their cost report.

(b) Responded to by DSHS within one hundred twenty days after they receive it from the state facility. DSHS must verify the accuracy of the facility's proposal and issue a preliminary settlement substantiating the settlement amount.

(3) The final settlement is the preliminary settlement issued by DSHS if an audit is not conducted.

(4) If an audit is conducted, DSHS must submit a final settlement report to the state facility after the audit process is completed. This report must substantiate all disallowed costs, refunds, underpayments, or adjustments to the provider's financial statements, cost report, and final settlement.

NEW SECTION

WAC 388-835-0780 Does DSHS have a responsibility to notify each provider regarding prospective reimbursement rates? (1) DSHS must give written notification to each provider regarding DSHS's prospective reimbursement rate.

(2) Unless specified at the time the reimbursement rate is issued, the rate will be effective from the first day of the month the rate is issued until a new rate becomes effective.

(3) If a rate is changed because of a successful provider appeal, the effective date of the new rate is the same as the effective date of the old rate.

NEW SECTION

WAC 388-835-0785 Can DSHS increase prospective reimbursement rates? (1) Except for the situations described in subsection (3) and (4) of this section, DSHS prospective reimbursement rates are the maximum provider payment rates for those periods to which they apply.

(2) DSHS does not grant rate adjustments for cost increases that are or were subject to management control or negotiations. Examples include, but are not limited to, all lease cost increases or any cost increases not expressly authorized in subsection (3) and (4).

(3) DSHS does adjust rates for any capitalized additions or replacements made as a condition for licensure or certification.

(4) DSHS does adjust rates for cost increases that must be incurred and cannot be met through the provider's prospective rate. Examples of such cost increases are:

(a) Program changes required by DSHS;

(b) Changes in staffing levels or consultants at a facility required by DSHS;

(c) Changes required by a survey; and

(d) Changes in revenue assessments required by the state legislature.

NEW SECTION

WAC 388-835-0790 How does a provider request a rate increase? (1) Any provider requesting a rate adjustment must submit a:

(a) Financial analysis showing the increased cost and an estimate of the rate increase needed to cover the increased cost. The estimated rate increase must be computed according to allowable methods;

(b) Written justification for granting the rate increase; and

(c) Certification and documentation that show the staffing changes and/or other improvements started or completed.

(2) Provider's requesting adjustments under WAC 388-835-0900 must submit a written plan identifying the staff

they are going to add and the resident needs they have not met because of insufficient staffing.

(3) When reviewing provider requests made under WAC 388-835-0900, DSHS considers:

- (a) If the additional staff requested by a provider is appropriate for meeting resident needs;
- (b) Staffing level comparisons with facilities having similar characteristics;
- (c) The facility's physical layout;
- (d) Supervision and management of current staff;
- (e) Historical trends regarding the facility's under-spending for resident care and habilitation;
- (f) Number and position of existing staff; and
- (g) Other resources available to the provider.

NEW SECTION

WAC 388-835-0795 What requirements apply to providers who receive rate increases? (1) Providers that receive prospective rate increases may be required to submit quarterly reports showing how the additional funds were spent. If required, a quarterly report would begin on the first day of the month following the date the rate increase is granted.

(2) If the additional funds resulting from the rate increase are not spent on DSHS approved changes or improvements approved, DSHS may ask that they be returned immediately.

(3) If a facility gives written notice to DSHS that it intends to close by a specific date and that returning the funds would jeopardize its ability to provide for the health, safety, and welfare of its residents, it may not have to return the additional funds.

ERRORS AND OMISSIONS

NEW SECTION

WAC 388-835-0800 What if DSHS discovers that a prospective rate calculation was affected by an error or omission? (1) DSHS may adjust prospective rates resulting from cost report errors, computational errors or omissions by either DSHS or the provider.

(2) In addition to adjusting the rate, DSHS must notify the provider in writing:

- (a) Regarding the nature and substance of each adjustment;
- (b) That the effective date of each adjustment is the same as the effective date of the original rate; and
- (c) Of any amount due to either DSHS or the provider as a result of an adjustment.

NEW SECTION

WAC 388-835-0805 What if a provider discovers an error or omission that affected their cost report? (1) If a provider discovers an error or omission that caused their cost report to be incorrect, the provider must submit amended cost report pages.

(2) Amended cost report pages must be certified and accompanied by a written explanation why the amendment is necessary. Amendments are not accepted by DSHS unless they comply with the requirements in WAC 388-835-0815.

(3) If DSHS concludes that the amendment changes are material, the amended pages must be audited by a field audit.

(4) If DSHS concludes that the amendments are incorrect or unacceptable as a result of the field audit or other information it receives, any rate adjustment based on the amendments is null and void. Any scheduled future rate payment increases resulting from the amendments must be canceled immediately.

(5) Any rate adjustment payments must be made according to the repayment provisions in WAC 388-835-0905.

NEW SECTION

WAC 388-835-0810 What other requirements apply to rate adjustments resulting from errors or omissions?

(1) No adjustment can be made to a rate more than:

- (a) One hundred twenty days after the field audit narrative and summary is sent to the provider; or
- (b) One hundred twenty days after a preliminary settlement becomes a final settlement.

(2) A final settlement that is concluded within the one hundred twenty-day time limits could only be reopened to adjust prospective rates that are based upon errors or omissions.

(3) Only adjustments to prospective rates (and the related computations) resulting from errors or omissions can be reviewed if a timely request is filed according to the provisions of WAC 388-835-0950.

NEW SECTION

WAC 388-835-0815 What requirements apply to repayment of amounts owed due to errors or omissions?

(1) Repayment (or starting repayment) of any amount owed to DSHS by a provider as a result of an error or omission rate adjustment must occur:

- (a) Within sixty days after the provider receives a rate adjustment notification from DSHS; or
- (b) According to a repayment schedule developed by DSHS.

(2) If a provider does not repay its debt to DSHS when it is due, DSHS may deduct the amount owed from the providers current DSHS payment.

(3) If a provider unsuccessfully contests the rate adjustment (see WAC 388-835-0950, they must repay DSHS (or start repayment) within sixty days after the administrative or judicial proceedings are completed.

(4) If DSHS owes a provider as a result of a rate adjustment, DSHS must pay the provider within thirty days after notifying the provider of the adjustment.

PUBLIC REVIEW—PUBLIC DISCLOSURENEW SECTION

WAC 388-835-0820 What role does the public play in setting prospective reimbursement rates? Each year before prospective reimbursement rates are set, DSHS will give all interested members of the public an opportunity to review and comment on the department's proposed rate setting methods and standards.

NEW SECTION

WAC 388-835-0825 What is DSHS' public disclosure responsibility regarding rate setting methodology? Without identifying individual ICF/MR facilities and in compliance with public disclosure statute and rule requirements, DSHS will provide the public with full and complete information regarding its rate setting methodology.

BILLING PROCEDURES AND PAYMENTSNEW SECTION

WAC 388-835-0830 How does a provider bill DSHS for services provided? (1) A provider must bill DSHS each month, from the first through the last day, for care provided to medical care recipients by completing and returning an IMR statement filed according to department instructions.

(2) A provider cannot bill DSHS for services provided to a resident until they receive a DSHS resident award letter. When the provider receives the award letter, they can bill for services provided since the resident's admission or eligibility date.

(3) A provider cannot bill DSHS for the day of a resident's death, discharge, or transfer from the ICF/MR facility.

NEW SECTION

WAC 388-835-0835 How does DSHS pay a provider? (1) DSHS will reimburse a provider for billed service rendered under the ICF/MR contract according to the appropriate rate assigned to the provider.

(2) For each resident, DSHS will pay an amount equal to the appropriate rates multiplied by the number of resident days each rate was in effect, less any amount a resident is required to pay (see WAC 388-835-0940).

(3) A provider must accept DSHS's reimbursement rates as full compensation for all services the provider is obligated to provide under their contract. The provider must not seek or accept additional compensation any contracted services from or on behalf of a resident.

NEW SECTION

WAC 388-835-0840 Can DSHS withhold provider payments? DSHS cannot withhold a provider payment until the provider is given written notification explaining why the payment is being withheld.

NEW SECTION

WAC 388-835-0845 Can DSHS terminate Medicaid Title XIX payments to providers? DSHS must terminate all Medicaid Title XIX payments to a provider no later than sixty days after a:

- (1) Contract expires, is terminated or is not renewed;
- (2) Facility license is revoked; or
- (3) Facility is decertified as a Title XIX facility.

NEW SECTION

WAC 388-835-0850 Who is responsible for collecting from residents any amounts they may own for their care?

(1) DSHS will notify a provider of the amount each resident is required to pay for care provided under the contract and the date the payment is due.

(2) The provider is responsible for:

(a) Collecting from the resident; and

(b) Accounting for, according to procedures established by DSHS, any authorized reduction in the resident's contribution.

NEW SECTION

WAC 388-835-0855 What if a resident's circumstances change causing a provider to contribute more to the resident's care? (1) If a provider receives documentation verifying a change in a resident's income or resources that will reduce the resident's ability to contribute to the cost of their care, the provider must report this information in writing to the DDD regional services office within seventy-two hours.

(2) Any necessary corrections should be made in the next ICF/MR statement and a copy of the supporting documentation should be attached.

(3) If a provider receives increased funds for a resident, the normal amount must be allowed for clothing, personal, and incidental expenses and the balance must be applied to the cost of care.

RECEIVERSHIPNEW SECTION

WAC 388-835-0860 What is the role of a receiver when an ICF/MR facility is placed in receivership? If an ICF/MR facility is providing care to state medical assistance recipients and is placed under receivership, the receiver:

(1) Becomes the Medicaid provider during the receivership period;

(2) Assumes all new provider reporting responsibilities;

(3) Assumes all other new provider responsibilities established in this chapter; and

(4) Is responsible, during the receivership period, for refunding any Medicaid rate payments received that exceed cost of services provided.

PROPOSED

NEW SECTION

WAC 388-835-0865 How does DSHS determine prospective reimbursement rates during receivership? When establishing prospective reimbursement rates during receivership, DSHS must consider:

(1) Court ordered compensation, if any, for the receiver. Receiver compensation may already be available through the:

- (a) Return on equity cost center rate, or
- (b) Facility administrator salary where the receiver is also the facility's administrator.

(c) In order to satisfy the court order when existing sources of compensation are less than the compensation ordered by the court, DSHS could consider the difference as an additional allowable cost when establishing prospective reimbursement rates.

(2) Start-up costs and costs of repairs, replacements, and additional staff needed for resident health, training, security, and welfare. No additional money will be added to the rate if these costs can be covered through the return on equity cost center rate; and

(3) Any other allowable costs contained in this chapter.

NEW SECTION

WAC 388-835-0870 What if the court asks DSHS to recommend a receiver's compensation? If ask for a recommendation regarding receiver compensation by the court, DSHS must consider the:

(1) Range of compensation for private ICF/MR facility managers;

(2) Experience and training of the receiver;

(3) Size, location, and current condition of the facility; and

(4) Additional factors considered appropriate.

NEW SECTION

WAC 388-835-0875 Can DSHS give emergency or transitional financial assistance to a receiver? (1) In response to a court order, DSHS must give up to thirty thousand dollars of emergency or transitional financial assistance to a receiver.

(2) DSHS must recover any emergency or transitional assistance given to a receiver from facility generated revenue that is not obligated for facility operations.

(3) If DSHS has not fully recovered the emergency or transitional assistance when the receivership ends, DSHS may file:

(a) An action against the former licensee or owner to recover what is owed; or

(b) A lien against the facility or the proceeds from the sale of the facility.

NEW SECTION

WAC 388-835-0880 What happens when a receivership ends? When a receivership ends, DSHS may revise the facility's Medicaid reimbursement as follows:

(1) The Medicaid reimbursement rate for the former owner or licensee must be what it was before receivership unless the former owner or licensee requests prospective rate revisions according to the requirements of this chapter.

(2) The Medicaid reimbursement rate for licensed replacement operators must be established according to the rules in this chapter governing prospective reimbursement rates for new providers.

DISPUTE RESOLUTIONNEW SECTION

WAC 388-835-0885 What disputes between providers and DSHS can be resolved through the administrative review process? A provider can use the administrative review process to contest:

(1) An "errors or omissions" reimbursement rate adjustment issued to the provider (see WAC 388-835-0845) or DSHS's refusal to adjust a rate the provider believes is incorrect due to errors or omissions. The provider must request an administrative review twenty-eight days of receiving notification that a rate has been adjusted or that DSHS refuses to adjust the rate.

(2) The way in which a DSHS rule, contract provision, or policy statement was applied when calculating the provider's prospective cost related reimbursement system's rate.

(3) An audit finding, other audit determination, a rate review or other settlement determination.

NEW SECTION

WAC 388-835-0890 What disputes cannot be resolved through the administrative review and fair hearing processes? DSHS' administrative review and fair hearing processes cannot be used to challenge:

(1) The adequacy of any prospective or settlement reimbursement rate or rate component, either individually or collectively;

(2) Audit actions or adjustment conducted under the federal Boren Amendment payment standard contained in federal regulations at 42 USC 1396a (a)(13)(A); or

(3) DSHS's efforts to comply with the Boren standard.

NEW SECTION

WAC 388-835-0900 How does a provider request an administrative review? (1) A provider challenging an audit or settlement determination has a maximum of twenty-eight days after receiving the finding or decision to file a written request for an administrative review.

(2) Written requests must be filed with the:

(a) Office of Financial Recovery services when the provider challenges an audit finding (adjusting journal entries or AJEs) or other audit determination; or

(b) DDD Director when the provider challenges a rate, desk review, or other settlement determination.

(3) The written request must:

(a) Be signed by the provider or facility administrator;

(b) Identify the specific determination being challenged and the date it was issued;

(c) State, as specifically as possible, the issues and regulations involved and why the provider claims the determination was erroneous; and

(d) Be accompanied by any documentation that will be used to support the provider's position.

NEW SECTION

WAC 388-835-0905 What happens after a provider requests an administrative review? (1) After receiving a provider's request, DSHS must schedule a conference between the provider and appropriate department representatives.

(2) Unless both parties agree, in writing, to a specific later date, the conference must be scheduled at least fourteen days after DSHS notifies the provider that a conference will be held and no later than ninety days after DSHS receives the provider's review request.

(3) The conference may be conducted by telephone unless DSHS or the provider requests, in writing, that it be held in person.

(4) The provider and DSHS representatives must participate in the conference.

(5) Either at the conference or before, the provider must give DSHS any documentation:

(a) Requested by DSHS that the provider is required to maintain for audit purposes under WAC 388-835-0270; and

(b) The provider intends to use to support their position.

(6) At the conference DSHS and the provider must clarify the issues and attempt to resolve them.

(7) If additional documentation is necessary to resolve the issues, a second conference meeting must be scheduled. Unless both parties agree, in writing, to a specific later date, this second conference meeting must be scheduled not later than thirty days after the first session.

(8) Regardless of whether an agreement is reached, DSHS must give the provider a written decision within sixty days after the conference ends.

NEW SECTION

WAC 388-835-0910 What if a provider disagrees with the administrative review decision? (1) If they disagree with the administrative review decision, a provider has a right to request an adjudicative proceeding within twenty-eight days of receiving the decision.

(2) To request an adjudicative proceeding, a provider must:

(a) File a written request with the office of administrative hearings (OAH);

(b) Sign the request or have it signed by the facility administrator;

(c) State as specifically as possible the issues and regulations involved;

(d) State the reasons for disagreeing with the administrative review decision; and

(e) Attach a copy of the contested decision and any documentation the provider will use to support their position.

(3) The adjudicative proceeding must be governed by the Administrative Procedure Act (chapter 34.05 RCW), this chapter, and chapter 388-02 WAC. If any part of this chapter conflict with chapter 388-02 WAC, this chapter prevails.

NEW SECTION

WAC 388-835-0915 Can DSHS withhold an undisputed overpayment amount from a current ICF/MR payment? DSHS is authorized to withhold from an ICF/MR's current payment all amounts found by a preliminary or final settlement to be overpayments if they are not identified by the ICF/MR as overpayments and challenged in an administrative or judicial review.

NEW SECTION

WAC 388-835-0920 Can DSHS withhold a disputed overpayment amount from a current ICF/MR payment? Once administrative and judicial review processes are complete, contested overpayments retained by an ICF/MR may be withheld from the ICF/MR's current payment but only to the extent DSHS's position or claims are upheld.

COST OF CARE OF MENTALLY DEFICIENT PERSONS RESIDING IN STATE INSTITUTIONS

NEW SECTION

WAC 388-835-0925 What is the purpose of this section? The purpose of this chapter is to regulate the costs of care of mentally/physically deficient persons.

NEW SECTION

WAC 388-835-0930 How is the payment for residential facilities set? The department sets the payment for residential facilities by the methodology noted in chapter 388-835 WAC.

NEW SECTION

WAC 388-835-0935 How much of a resident's income is exempt from paying their care? Residents whose total resources are insufficient to pay the actual cost of care must be entitled to a monthly exemption from income in the amount of twenty-five dollars.

NEW SECTION

WAC 388-835-0940 What if the estate of a resident is able to pay all or a portion of their monthly cost? (1) If DSHS finds that the estate of a resident is able to pay all or a portion of their monthly costs for care, support, and treatment, they must serve a written notice of finding of responsibility (NFR) on the:

(a) Guardian of the resident's estate; or

PROPOSED

(b) If a guardian has not been appointed, resident's spouse or parent or other person acting in a representative capacity and in possession of the resident's property; and

(c) The superintendent of the state school.

(2) If a resident is an adult and is not under a legal disability, the department must personally serve the NFR on the resident.

NEW SECTION

WAC 388-835-0945 If a resident or guardian is served by DSHS with a NFR when is payment due? If a resident or guardian is served by DSHS with an NFR, payment is due twenty-eight days after receiving the notice.

NEW SECTION

WAC 388-835-0950 May a resident or guardian request a hearing if they disagree with the NFR? If a resident or guardian disagrees with the NFR, they have the right to ask for a hearing under chapter 34.05 RCW. They must file a written hearing request within twenty-eight days of receipt with the secretary of DSHS, ATTN: Determination Officer, P.O. Box 9768, Olympia, WA 98504.

NEW SECTION

WAC 388-835-0955 What information must be included in the request for a hearing? The request for hearing must include:

- (1) A specific statement of the issues and law involved;
 - (2) The grounds for contesting the department decision;
- and
- (3) A copy of the NFR being contested.

REPEALER

The following sections of the Washington Administrative Code are repealed:

- WAC 388-835-010 Terms—Definitions.
- WAC 388-835-015 Exemptions.
- WAC 388-835-020 ICF/MR care.
- WAC 388-835-025 Name of IMR.
- WAC 388-835-030 Closure of an IMR facility.
- WAC 388-835-035 Adequate IMR care.
- WAC 388-835-040 Continuity of resident care.
- WAC 388-835-045 IMR contract—Noncompliance.
- WAC 388-835-050 Minimum staff requirements.
- WAC 388-835-055 Placement of client.
- WAC 388-835-060 Transfer of client—Relocation.

- WAC 388-835-065 Resident rights—Relocation redetermination of eligibility.
- WAC 388-835-070 Transfer or discharge planning.
- WAC 388-835-075 Discharge, readmission, and incident reporting.
- WAC 388-835-080 Social leave for IMR residents.
- WAC 388-835-085 Superintendent's limited authority to hold.
- WAC 388-835-090 Prospective cost-related reimbursement.
- WAC 388-835-095 Conditions of participation.
- WAC 388-835-100 Projected budget for new contractors.
- WAC 388-835-105 Change of ownership.
- WAC 388-835-110 Termination of contract.
- WAC 388-835-115 Due dates for reports.
- WAC 388-835-120 Requests for extensions.
- WAC 388-835-125 Reports.
- WAC 388-835-130 Failure to submit final reports.
- WAC 388-835-135 Improperly completed or late reports.
- WAC 388-835-140 Completing reports and maintaining records.
- WAC 388-835-145 Certification requirement.
- WAC 388-835-150 Reports—False information.
- WAC 388-835-155 Amendments to reports.
- WAC 388-835-160 Requirement for retention of reports by the department.
- WAC 388-835-165 Requirements for retention of records by the contractor.
- WAC 388-835-170 Disclosure of IMR facility reports.
- WAC 388-835-175 Desk review.
- WAC 388-835-180 Field audits.
- WAC 388-835-185 Preparation for audit by the contractor.
- WAC 388-835-190 Scope of field audits.
- WAC 388-835-195 Inadequate documentation.
- WAC 388-835-200 Deadline for completion of audits.
- WAC 388-835-205 Disclosure of audit narratives and summaries.

PROPOSED

WAC 388-835-210	Resident trust accounts.	WAC 388-835-360	Retirement of depreciable assets.
WAC 388-835-215	Accounting procedures for resident trust accounts.	WAC 388-835-365	Handling of gains and losses upon retirement of depreciable assets.
WAC 388-835-220	Trust moneys—Imprest fund.		
WAC 388-835-225	Trust moneys control or disbursement.	WAC 388-835-370	Handling of gains and losses upon retirement of depreciable assets—Other periods.
WAC 388-835-230	Trust moneys availability.		
WAC 388-835-235	Accounting upon change of ownership.	WAC 388-835-375	Handling of gains and losses upon retirement of depreciable assets.
WAC 388-835-240	Procedure for refunding trust money.	WAC 388-835-380	Recovery of excess over straight-line depreciation.
WAC 388-835-245	Liquidation of trust fund.	WAC 388-835-385	Unallowable costs.
WAC 388-835-250	Resident property records.	WAC 388-835-390	Reimbursement principles.
WAC 388-835-255	Allowable costs.	WAC 388-835-395	Program services not covered by the reimbursement rate.
WAC 388-835-260	Substance prevails over form.		
WAC 388-835-265	Offset of miscellaneous revenues.	WAC 388-835-400	Prospective reimbursement rate for new contractors.
WAC 388-835-270	Costs of meeting standards.	WAC 388-835-405	Rate determination.
WAC 388-835-275	Limit on costs to related organizations.	WAC 388-835-410	Desk review for rate determination.
WAC 388-835-280	Start-up costs.	WAC 388-835-415	Cost centers.
WAC 388-835-285	Organization costs.	WAC 388-835-420	Resident care and habilitation cost center rate.
WAC 388-835-290	Education and training.	WAC 388-835-425	Administration, operations, and property cost center rate.
WAC 388-835-295	Total compensation—Owners, relatives, and certain administrative personnel.	WAC 388-835-430	Food rate component.
WAC 388-835-300	Owner or relative—Compensation.	WAC 388-835-435	Maximum allowable compensation of certain administrative personnel.
WAC 388-835-305	Allowable interest.	WAC 388-835-440	Management agreements, management fees, central office services, and board of directors.
WAC 388-835-310	Offset of interest income.		
WAC 388-835-315	Operating leases of facilities and equipment.	WAC 388-835-445	Administration and operations rate component.
WAC 388-835-320	Rental expense paid to related organizations.	WAC 388-835-450	Property rate component.
WAC 388-835-325	Capitalization.	WAC 388-835-455	Return on equity.
WAC 388-835-330	Depreciation expense.	WAC 388-835-460	Upper limits to reimbursement rate.
WAC 388-835-335	Depreciable assets.	WAC 388-835-465	Principles of settlement.
WAC 388-835-340	Depreciation base.	WAC 388-835-470	Procedures for overpayments and underpayments.
WAC 388-835-345	Depreciation base—Donated or inherited assets.	WAC 388-835-475	Preliminary settlement.
WAC 388-835-350	Lives.	WAC 388-835-480	Final settlement.
WAC 388-835-355	Methods of depreciation.	WAC 388-835-485	Interim rate.

WAC 388-835-490	Final payment.
WAC 388-835-495	Notification of rates.
WAC 388-835-500	Adjustments required due to errors or omissions.
WAC 388-835-505	Receivership.
WAC 388-835-510	Adjustments to prospective rates.
WAC 388-835-515	Public review of rate-setting methods and standards.
WAC 388-835-520	Public disclosure of rate-setting methodology.
WAC 388-835-525	Billing period.
WAC 388-835-530	Billing procedures.
WAC 388-835-535	Charges to residents.
WAC 388-835-540	Payment.
WAC 388-835-545	Suspension of payment.
WAC 388-835-550	Termination of payments.
WAC 388-835-555	Disputes.
WAC 388-835-560	Recoupment of undisputed overpayments.
WAC 388-835-565	Administrative review— Adjudicative proceeding.

**WSR 00-24-082
PROPOSED RULES
SOUTHWEST**

CLEAN AIR AGENCY

[Filed December 5, 2000, 10:49 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 00-17-022.

Title of Rule: SWCAA 400 General Regulations for Air Pollution Sources.

Purpose: The purpose of this rule making is to revise sections to reflect the name change for the agency, adopt the most current federal NESHAP and MACT standards and update the definition of volatile organic compounds.

Statutory Authority for Adoption: RCW 70.94.141.

Statute Being Implemented: RCW 70.94.141.

Summary: The changes proposed in this rule are administrative in nature. The rule is being revised to reflect a name change for the agency, to update adoption of federal NESHAP and MACT standards and update definition.

Reasons Supporting Proposal: The name of the agency was changed July 6, 2000, from the Southwest Air Pollution Control Authority (SWAPCA) to the Southwest Clean Air Agency (SWCAA). Federal delegation agreements with EPA requires that SWCAA periodically update adoption of federal standards.

Name of Agency Personnel Responsible for Drafting and Implementation: Paul Mairose, 1308 N.E. 134th Street, Vancouver, WA, (360) 574-3058; and Enforcement: Robert D. Elliott, 1308 N.E. 134th Street, Vancouver, WA, (360) 574-3058.

Name of Proponent: Southwest Clean Air Agency, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: This is an existing rule. Only administrative type changes are being proposed. There will be no effect on the public or regulated businesses as a result of these changes.

Proposal Changes the Following Existing Rules: Titles and rule numbers that include the agency name are being changed to reflect the name of the agency.

No small business economic impact statement has been prepared under chapter 19.85 RCW. Changes proposed by SWCAA are consistent with federal and state rules already in effect. This agency is not subject to the small business economic impact provisions of chapter 19.85 RCW.

RCW 34.05.328 does not apply to this rule adoption. Pursuant to RCW 70.94.141(1), section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. SWCAA is not voluntarily invoking section 201, chapter 403, Laws of 1995.

Hearing Location: Office of SWCAA, 1308 N.E. 134th Street, Vancouver, WA 98685, on February 1, 2001, at 3:00 p.m.

Assistance for Persons with Disabilities: Contact Mary Allen by January 26, 2001, TDD (360) 574-3058.

Submit Written Comments to: Paul Mairose, 1308 N.E. 134th Street, Vancouver, WA 98685, fax (360) 574-3058, by January 19, 2001.

Date of Intended Adoption: February 1, 2001.

December 4, 2000

Robert D. Elliott

Executive Director

((SWAPCA)) SWCAA 400

**General Regulations
For Air Pollution Sources**

AMENDATORY SECTION (Amending WSR 95-17-084, filed 8/21/95, effective 9/21/95)

((SWAPCA)) SWCAA 400-010 Policy and Purpose

[Statutory Authority: Chapter 70.94.057 RCW, and 70.94.141 RCW. Original adoption by Board 12/17/68; Board amended 10/29/69 (Sec. 1.01 and 1.02); 93-21-003 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95]

(1) It is the policy of the Southwest Clean Air ((~~Pollution Control Authority~~) **Agency** (herein after referred to as the ((~~Authority~~) **Agency** or ((SWAPCA)) **SWCAA**) to maintain such a reasonable degree of purity of the air as will protect human health and safety and to the greatest degree practicable, prevent injury to plant and animal life or to property and

be consistent with the economic and industrial well being of the jurisdiction of the ((Authority)) Agency.

(2) Pursuant to the U.S. Clean Air Act (42 U.S.C. 7401 et seq.) and the Washington Clean Air Act (RCW 70.94), the ((Authority)) Agency has adopted regulations for the control of air contaminant emissions, including toxic air contaminants, substances for which primary and secondary National Ambient Air Quality Standards (NAAQS) have been established and volatile organic compounds, to prevent air pollution. In conformance with these laws, the policy of ((SWAPCA)) SWCAA is to control and regulate the emission of air contaminants from sources within the jurisdiction of ((SWAPCA)) SWCAA, to prevent violations of federal, state and local air pollution regulations, to provide uniform administration and enforcement of the aforementioned regulations, and to effectuate the requirements and purpose of Chapter 70.94 Revised Code of Washington (RCW).

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 95-17-084, filed 8/21/95, effective 9/21/95)

((SWAPCA)) SWCAA 400-020 Applicability

[Statutory Authority: Chapter 70.94.141 RCW, and 70.94.422 RCW. Original adoption by Board 12/17/68 (Regulation 1); Board amended 10/29/69 (Regulation 2); 93-21-003 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95]

(1) The provisions of this regulation shall apply within Clark, Cowlitz, Lewis, Skamania and Wahkiakum Counties of Washington State.

(2) The ((Authority)) Agency is authorized to enforce this regulation and may also adopt standards or requirements. These standards or requirements may not be less stringent than the current state air quality rules and may be more stringent than the current regulations. Unless properly delegated by Ecology, the ((Authority)) Agency does not have jurisdiction over the following sources:

(a) Specific source categories over which the State, by separate regulation, has assumed or hereafter assumes jurisdiction.

(b) Automobiles, trucks, aircraft, chemical pulp mills and primary aluminum reduction facilities.

(c) Those sources under the jurisdiction of the Energy Facility Site Evaluation Council (EFSEC) as provided in Washington Administrative Code (WAC) 463.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-027, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-030 Definitions

[Statutory Authority: Chapter 70.94.030 RCW, and 70.94.141 RCW. Original adoption by Board 12/17/68 (Regulation 1); Amended by Board 10/29/69 (Regulation 2); Amended by Board 3/20/84; Amended by Board 12/16/86; 93-21-003 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-027 filed 3/10/99, effective 4/11/99]

Except as provided elsewhere in this regulation the following definitions apply throughout the regulation:

(1) "Actual emissions" means the actual rate of emissions of a pollutant from an emission unit, as determined in accordance with (a) through (c) of this subsection.

(a) In general, actual emissions as of a particular date shall equal the average rate, in tons per year, at which the emissions unit actually emitted the pollutant during a two-year period which precedes the particular date and which is representative of normal source operation. The ((Authority)) Agency shall allow the use of a different time period upon a determination that it is more representative of normal source operation. Actual emissions shall be calculated using the emissions unit's actual operating hours, production rates, and types of materials processed, stored, or combusted during the selected time period.

(b) The ((Authority)) Agency may presume that source specific allowable emissions for the unit are equivalent to the actual emissions of the emissions unit.

(c) For any emissions unit ((which)) that has not begun normal operations on the particular date, actual emissions shall equal the potential to emit of the emissions unit on that date.

(2) "Adverse impact on visibility" means visibility impairment ((which)) that interferes with the management, protection, preservation, or enjoyment of the visitor's visual experience of a Federal Class I area. This determination must be made on a case-by-case basis taking into account the geographic extent, intensity, duration, frequency, and time of visibility impairment, and how these factors correlate with (a) times of visitor use of the Federal Class I area and (b) the frequency and timing of natural conditions that reduce visibility. This term does not include effects on integral vistas.

(3) "Air contaminant" means dust, fumes, mist, smoke, other particulate matter, vapor, gas, odorous substance, or any combination thereof. This includes any substance regulated as an air pollutant under WAC 173-460, NESHAPS, Section 112 of the Federal Clean Air Act Amendments or substance for which a primary or secondary National Ambient Air Quality Standard has been established, and volatile organic compounds. "Air pollutant" means the same as "air contaminant". A criteria pollutant is an air pollutant for which a criteria document has been prepared by EPA and has a primary or secondary ambient air quality standard. These pollutants are identified at 40 CFR Part 50 and include sulfur oxides (measured as sulfur dioxide), particulate matter, carbon monoxide, ozone, nitrogen dioxide, and lead. Volatile organic compounds as a category are no longer identified as a criteria pollutant.

(4) "Air pollution" means the presence in the outdoor atmosphere of one or more air contaminants in sufficient quantities, and of such characteristics and duration as is, or is likely to be, injurious to human health, plant or animal life, or property, or which unreasonably interferes with enjoyment of life and property. For the purposes of this regulation air pollution shall not include air contaminants emitted in compliance with Chapter 17.21 RCW, the Washington Pesticide Application Act, which regulates the application and control of various pesticides.

(5) "Allowable emissions" means the emission rate of a stationary source calculated using the maximum rated capacity of the source (unless the source is subject to federally

enforceable limits which restrict the operating rate, or hours of operation, or both) and the most stringent of the following:

(a) The applicable standards as set forth in 40 CFR Part 60, 61, or 63;

(b) Any applicable State Implementation Plan emission limitation including those with a future compliance date;

(c) The emissions rate specified as a federally enforceable permit condition, including those with a future compliance date; or

(d) The emission rate specified by an applicable regulatory order.

(6) "Ambient air" means the surrounding outside air.

(7) "Ambient air quality standard" (AAQS) means an established concentration, exposure time, and frequency of occurrence of an air contaminant or multiple air contaminants in the ambient air which shall not be exceeded.

(8) "~~((Authority))~~ Agency" means the Southwest Clean Air ~~((Pollution Control Authority))~~ Agency ~~((SWAPCA))~~ SWCAA.

(9) "Best available control technology, (BACT)" means an emission limitation (including a visible emission standard) based on the maximum degree of reduction for each air pollutant subject to regulation under Chapter 70.94 RCW which would be emitted from or which results from any new or modified stationary source, which the ~~((Authority))~~ Agency, on a case-by-case basis, taking into account energy, environmental, and economic impacts and other costs, determines is achievable for such source or modification through application of production processes and available methods, systems, and techniques, including fuel cleaning or treatment, clean fuels, or innovative fuel combustion techniques for control of each such pollutant. In no event shall application of the "best available control technology" result in emissions of any air pollutants which will exceed the emissions allowed by any applicable standard under 40 CFR Part 60, Part 61, and Part 63 as they exist on ~~((August))~~ July 1, ((1998)) 2000, or their later enactments as adopted by reference by the ~~((Authority))~~ Agency by rule. Emissions from any source utilizing clean fuels, or any other means, to comply with this paragraph shall not be allowed to increase above levels that would have been required under the definition of BACT in the Federal Clean Air Act as it existed prior to enactment of the Clean Air Act Amendments of 1990.

(10) "Best available retrofit technology (BART)" means an emission limitation based on the degree of reduction achievable through the application of the best system of continuous emission reduction for each pollutant ~~((which))~~ that is emitted by an existing stationary facility. The emission limitation must be established, on a case-by-case basis, taking into consideration the technology available, the costs of compliance, the energy and non-air quality environmental impacts of compliance, any pollution control equipment in use or in existence at the source, the remaining useful life of the source, and the degree of improvement in visibility which may reasonably be anticipated to result from the use of such technology.

(11) "Board" means the Board of Directors of the Southwest Clean Air ~~((Pollution Control Authority))~~ Agency.

(12) "Bubble" means a set of emission limits which allows an increase in emissions from a given emissions

unit(s) in exchange for a decrease in emissions from another emissions unit(s), pursuant to RCW 70.94.155, and ~~((SWAPCA))~~ SWCAA 400-120.

(13) "Capacity factor" means the ratio of the average load on a machine or equipment for the period of time considered, to the manufacturer's capacity rating of the machine or equipment.

(14) "Class I area" means any area designated pursuant to §§ 162 or 164 of the Federal Clean Air Act as a Class I area. The following areas are the Class I areas potentially affected by emissions from sources within ~~((SWAPCA))~~ SWCAA jurisdiction:

Alpine Lakes Wilderness;

Glacier Peak Wilderness;

Goat Rocks Wilderness;

Mount Adams Wilderness;

Mount Rainier National Park;

Mt. Hood Wilderness Area;

Mt. Jefferson Wilderness Area.

(15) "Closure" means permanently stopping or terminating all processes at a facility. Such termination of processes shall result in no emissions of pollutants to the ambient air. Closure does not mean temporary shutdown of operations. A facility shall be considered "permanently closed" if operations have ceased and registration fees are not paid as set forth in ~~((SWAPCA))~~ SWCAA 400-100 (2)(e). Process and pollution control equipment may remain in place and on site but shall be configured such that the equipment or processes are incapable of generating emissions to the atmosphere (e.g. disconnection of power to equipment, mechanical positioning that inhibits processing; placing of padlocks on equipment to prevent operation). Closure of a facility requires notification to ~~((SWAPCA))~~ SWCAA in accordance with ~~((SWAPCA))~~ SWCAA 400-100 (2)(d). New Source Review and applicable emission control technology requirements in accordance with current requirements for similar facilities will be required of the facility prior to restart if the annual registration fee is not paid.

(16) "Combustion and incineration sources" means emissions units using combustion for waste disposal, steam production, chemical recovery or other process requirements, but excludes open burning.

(17) "Commenced construction" means that an owner or operator has all the necessary preconstruction approvals or permits and either has:

(a) Begun, or caused to begin, a continuous program of actual on-site construction of the source, to be completed within a reasonable time; or

(b) Entered into binding agreements or contractual obligations, which cannot be cancelled or modified without substantial loss to the owner or operator, to undertake a program of actual construction of the source to be completed within a reasonable time. (ref. 40 CFR 52.21)

(18) "Concealment" means any action taken to reduce the observed or measured concentrations of a pollutant in a gaseous effluent while, in fact, not reducing the total amount of pollutant discharged.

(19) "Construction" means any physical change or change in the method of operation (including fabrication, erection, installation, demolition, or modification of an emis-

sions unit) which would result in a change in actual emissions. (ref. 40 CFR 52.21)

(20) "Control Officer" means the Executive Director of the Southwest Clean Air (~~(Pollution Control Authority)) Agency.~~

(21) "Director" means the director of the Washington State Department of Ecology (WDOE) or duly authorized representative.

(22) "Dispersion technique" means a method (~~(which)) that~~ attempts to affect the concentration of a pollutant in the ambient air other than by the use of pollution abatement equipment or integral process pollution controls.

(23) "Ecology" means the Washington State Department of Ecology (WDOE).

(24) "Emission" means a release of air contaminants into the ambient air.

(25) "Emission control technology" means emission control equipment integral or in addition to the emission unit or other technology, device, component or control parameter that is integral to the design of an emission unit or the basic design to the emission unit; i.e., low NOx burner for a boiler or turbine.

(26) "Emission reduction credit (ERC)" means a credit granted pursuant to (~~(SWAPCA)) SWCAA~~ 400-131. This is a voluntary reduction in emissions beyond required levels of control. ERCs may be sold, leased, banked for future use or traded in accordance with applicable regulations. Emission reduction credits shall provide an incentive for reducing emissions below the required levels and to establish a framework to promote a market based approach to air pollution control.

(27) "Emission standard" and "emission limitation" mean a requirement established under the FCAA or Chapter 70.94 RCW or local regulation which limits the quantity, rate, or concentration of emissions of air contaminants on a continuous basis, including any requirement relating to the operation or maintenance of a source to assure continuous emission reduction and any design, equipment, work practice, or operational standard promulgated under the FCAA or Chapter 70.94 RCW.

(28) "Emissions unit" means any part of a stationary source (~~(which)) that~~ emits or would have the potential to emit any pollutant subject to regulation under the FCAA, Chapter 70.94 RCW or Chapter 70.98 RCW.

(29) "Excess emissions" means emissions of an air pollutant in excess of any applicable emission standard.

(30) "Excess stack height" means that portion of a stack which exceeds the greater of sixty-five meters (213.25 feet) or the calculated stack height described in (~~(SWAPCA)) SWCAA~~ 400-200(2).

(31) "Executive Director" means the Control Officer of the Southwest Clean Air (~~(Pollution Control Authority)) Agency.~~

(32) "Existing stationary facility" means a stationary source of air pollutants (~~(which)) that~~ has the potential to emit two hundred fifty tons per year or more of any air pollutant. In determining potential to emit, fugitive emissions, to the extent quantifiable, must be counted. For purposes of determining whether a stationary source is an existing stationary facility the term "building, structure, facility, or installation"

means all of the pollutant-emitting activities which belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control of the same person (or persons under common control). Pollutant emitting activities shall be considered as part of the same major group (i.e., which have the same two digit code) as described in the *Standard Industrial Classification Manual*, 1987.

(33) "Federal Clean Air Act (FCAA)" means the Federal Clean Air Act, also known as Public Law 88-206, Stat. 392, December 17, 1963, 42 U.S.C. 7401 et seq., as last amended by the Clean Air Act Amendments of 1990, P.L. 101-549, November 15, 1990.

(34) "Federal land manager" means, with respect to any lands in the United States, the Secretary of the department with authority over such lands.

(35) "Fossil fuel-fired steam generator" means a device, furnace, or boiler used in the process of burning fossil fuel for the primary purpose of producing steam by heat transfer.

(36) "Fugitive dust" means a type of particulate emission made airborne by forces of wind, human activity, or both. Unpaved roads, construction sites, and tilled land are examples of areas that originate fugitive dust. Fugitive dust is a type of fugitive emission.

(37) "Fugitive emissions" means emissions which do not pass and which could not reasonably be collected to pass through a stack, chimney, vent, or other functionally equivalent opening.

(38) "General process unit" means an emissions unit using a procedure or a combination of procedures for the purpose of causing a change in material by either chemical or physical means, excluding combustion.

(39) "Good agricultural practices" means economically feasible practices (~~(which)) that~~ are customary among or appropriate to farms and ranches of a similar nature in the local area.

(40) "Good engineering practice (GEP)" refers to a calculated stack height based on the equation specified in (~~(SWAPCA)) SWCAA~~ 400-200 (2)(a)(ii).

(41) "Incinerator" means a furnace used primarily for the thermal destruction of waste.

(42) "In operation" means engaged in activity related to the primary design function of the source.

(43) "Integral vista" means a view perceived from within a mandatory Class I federal area of a specific landmark or panorama located outside the boundary of the mandatory Class I federal area.

(44) "Lowest achievable emission rate (LAER)" means for any source that rate of emissions which reflects the more stringent of:

(a) The most stringent emission limitation which is contained in the implementation plan of any state for such class or category of source, unless the owner or operator of the proposed new or modified source demonstrates that such limitations are not achievable; or

(b) The most stringent emission limitation which is achieved in practice by such class or category of source In no event shall the application of this term permit a proposed new or modified source to emit any pollutant in excess of the

amount allowable under applicable new source performance standards.

(45) "Maintenance Area" or "Maintenance Plan Area" means a geographical area of the jurisdiction of ((SWAPCA)) SWCAA which was formerly designated as a nonattainment area and which has been redesignated as an attainment area as provided under 40 CFR 52. The maintenance area designation shall be in effect as long as there is a federal or state requirement to have a maintenance plan in effect.

(46) "Maintenance Pollutant" means a pollutant for which a maintenance plan area was formerly designated a nonattainment area.

(47) "Major modification" means any physical change in or change in the method of operation of a major stationary source that would result in a significant net emissions increase of any pollutant subject to regulation under the Federal Clean Air Act. Any net emissions increase that is considered significant for volatile organic compounds or oxides of nitrogen shall be considered significant for ozone. A physical change or change in the method of operation shall not include:

(a) Routine maintenance, repair, and replacement;
 (b) Use of an alternative fuel or raw material by reason of an order under sections 2 (a) and (b) of the Energy Supply and Environmental Supply Coordination Act of 1974 (or any superseding legislation) or by reason of a natural gas curtailment plan pursuant to the Federal Power Act;

(c) Use of an alternative fuel by reason of an order or rule under section 125 of the FCAA, 42 U.S.C. 7425;

(d) Use of an alternative fuel at a steam-generating unit to the extent that the fuel is generated from municipal solid waste;

(e) Use of an alternative fuel or raw material by a stationary source which:

(i) The source was capable of accommodating before December 21, 1976, unless such change would be prohibited under any federally enforceable permit condition which was established after December 12, 1976, in a Prevention of Significant Deterioration permit or an Order of Approval for a Notice of Construction application; or

(ii) The source is approved to use under any federally enforceable notice of construction approval or a PSD permit issued by the Environmental Protection Agency;

(f) An increase in the hours of operation or in the production rate, unless such change is prohibited under any federally enforceable permit condition ((which)) that was established after December 21, 1976, in a Prevention of Significant Deterioration permit or an Order of Approval for a Notice of Construction application;

(g) Any change in ownership at a stationary source.

(48) "Major stationary source" means:

(a) Any stationary source which:

(i) Emits or has the potential to emit one hundred tons per year or more of any air contaminant regulated by the Washington State or Federal Clean Air Acts;

(ii) Is located in a "marginal" or "moderate" ozone nonattainment area and which emits or has the potential to emit one hundred tons per year or more of volatile organic compounds or oxides of nitrogen;

(iii) Is located in a "serious" carbon monoxide nonattainment area where stationary sources contribute significantly to carbon monoxide levels and which emits or has the potential to emit fifty tons per year or more of carbon monoxide; or

(iv) Is located in a "serious" particulate matter (PM₁₀) nonattainment area and which emits or has the potential to emit seventy tons per year or more of PM₁₀ emissions.

(b) Any physical change that would occur at a stationary source not qualifying under (a) of this subsection as a major stationary source, if the change would constitute a major stationary source by itself;

(c) A major stationary source that is major for VOCs or NO_x shall be considered major for ozone;

(d) The fugitive emissions of a stationary source shall not be included in determining whether it is a major stationary source, unless the stationary source belongs to one of the following categories of stationary sources or the source is a major stationary source due to (a)(iii) or (iv) of this subsection:

- (i) Coal cleaning plants (with thermal dryers);
- (ii) Kraft pulp mills;
- (iii) Portland cements plants;
- (iv) Primary zinc smelters;
- (v) Iron and steel mills;
- (vi) Primary aluminum ore reduction plants;
- (vii) Primary copper smelters;
- (viii) Municipal incinerators capable of charging more than two hundred fifty tons of refuse per day;
- (ix) Hydrofluoric, sulfuric, or nitric acid plants;
- (x) Petroleum refineries;
- (xi) Lime plants;
- (xii) Phosphate rock processing plants;
- (xiii) Coke oven batteries;
- (xiv) Sulfur recovery plants;
- (xv) Carbon black plants (furnace process);
- (xvi) Primary lead smelters;
- (xvii) Fuel conversion plants;
- (xviii) Sintering plants;
- (xix) Secondary metal production plants;
- (xx) Chemical process plants;
- (xxi) Fossil-fuel boilers (or combination thereof) totaling more than two hundred fifty million British thermal units per hour heat input;
- (xxii) Petroleum storage and transfer units with a total storage capacity exceeding three hundred thousand barrels (12,600,000 gallons);
- (xxiii) Taconite ore processing plants;
- (xxiv) Glass fiber processing plants;
- (xxv) Charcoal production plants;
- (xxvi) Fossil fuel-fired steam electric plants of more than two hundred fifty million British thermal units per hour heat input; and
- (xxvii) Any other stationary source category which, as of August 7, 1980, was being regulated under sections 111 or 112 of the Federal Clean Air Act.

(e) For purposes of determining whether a stationary source is a major stationary source, the term "building, structure, facility, or installation" means all the pollutant-emitting activities which belong to the same industrial grouping, are

located on one or more contiguous or adjacent properties, and are under the control of the same person (or persons under common control). Pollutant-emitting activities shall be considered as part of the same industrial grouping if they belong to the same major group (i.e., which have the same two digit code) as described in the *Standard Industrial Classification Manual*, 1987.

(49) "Mandatory Class I federal area" means any area defined in Section 162(a) of the FCAA. The mandatory Class I federal areas potentially affected by emissions from sources within ((SWAPCA)) SWCAA jurisdiction are as follows:

Alpine Lakes Wilderness;
Glacier Peak Wilderness;
Goat Rocks Wilderness;
Mount Adams Wilderness;
Mount Rainier National Park;
Mt. Hood Wilderness Area;
Mt. Jefferson Wilderness Area.

(50) "Masking" means the mixing of a chemically nonreactive control agent with a malodorous gaseous effluent to change the perceived odor, usually to a less offensive odor.

(51) "Materials handling" means the handling, transporting, loading, unloading, storage, and transfer of materials with no significant alteration of the chemical or physical properties of the material.

(52) "Modification" means any physical change in, or change in the method of operation of, a stationary source that increases the amount of any air contaminant emitted by such source or that results in the emissions of any air contaminant not previously emitted. The term modification shall be construed consistent with the definitions of modification in Section 7411, Title 42, United States Code, and with rules implementing that section.

(53) "National Emission Standards for Hazardous Air Pollutants (NESHAPS)" means the federal regulations set forth in 40 CFR Part 61 or Part 63.

(54) "Natural conditions" means naturally occurring phenomena that reduce visibility as measured in terms of visual range, contrast, or coloration.

(55) "Net emissions increase" means:

(a) The amount by which the sum of the following exceeds zero:

(i) Any increase in actual emissions from a particular change or change in method of operation at a source; and

(ii) Any other increases and decreases in actual emissions at the source that are contemporaneous with the particular change and are otherwise creditable.

(b) An increase or decrease in actual emissions is contemporaneous with the increase from the particular change only if the changes in actual emissions occur between the date ten years before construction on the particular change commences and the date that the increase from the particular change occurs.

(c) An increase or decrease in actual emissions is creditable only if:

(i) It occurred no more than one year prior to the date of submittal of a complete Notice of Construction application for the particular change, or it has been documented by an

emission reduction credit, in which case the credit shall expire ten years after the date of original issue of the ERC. Any emissions increases occurring between the date of issuance of the ERC and the date when a particular change becomes operational shall be counted against the ERC.

(ii) The ((Authority)) Agency or Ecology has not relied on it in issuing any permit or Order of Approval for the source under regulations approved pursuant to 40 CFR 51 Subpart I or the EPA has not relied on it in issuing a PSD permit pursuant to 40 CFR 52.21, which order or permit is in effect when the increase in emissions from the particular change occurs.

(d) An increase in actual emissions is creditable only to the extent that the new level of actual emissions exceeds the old level.

(e) A decrease in actual emissions is creditable only to the extent that:

(i) The old level of actual emissions or the old level of allowable emissions, whichever is lower, exceeds the new level of actual emissions;

(ii) It is federally enforceable at and after the time that actual construction on the particular change begins;

(iii) It has approximately the same qualitative significance for public health and welfare as that attributed to the increase from the particular change; and

(iv) The ((Authority)) Agency has not relied on it in issuing any permit, regulatory order or Order of Approval under regulations approved pursuant to 40 CFR 51 Subpart I, the EPA has not relied on it in issuing a PSD permit pursuant to 40 CFR 52.21 or Ecology or the ((Authority)) Agency has not relied on it in demonstrating attainment or reasonable further progress.

(f) An increase that results from a physical change at a source occurs when the emission unit on which construction occurred becomes operational and begins to emit a particular pollutant. Any replacement unit that requires shakedown becomes operational only after a reasonable shakedown period, not to exceed one hundred eighty days.

(56) "New source" means one or more of the following:

(a) The construction or modification of a stationary source that increases the amount of any air contaminant emitted by such source or that results in the emission of any air contaminant not previously emitted;

(b) Any other project that constitutes a new source under the Federal Clean Air Act;

(c) Restart after a lapse in one year or more in payment of registration fees or operating permit fees;

(d) Restart after a period of five years of non-operation where registration or operating permit fees have been paid.

(e) Relocation of an existing business to a new location.

(57) "New Source Performance Standards (NSPS)" means the federal regulations set forth in 40 CFR Part 60 and adopted by the ((Authority)) Agency in ((SWAPCA)) SWCAA 400-115.

(58) "Nonattainment area" means a clearly delineated geographic area ((which)) that has been designated by EPA promulgation as exceeding a National Ambient Air Quality Standard or standards.

(59) "Notice of Construction application (NOC)" means a written application from the source by which the ((Author-

PROPOSED

ity)) Agency records and tracks requests from registered and nonregistered sources for the purpose of obtaining information regarding proposed changes or activities at a source. Types of changes may include modifications, alterations, changes to process or control equipment, establishment of emission limits, installation of new sources, control technology determinations, PSD determinations and other items specified by the ((Authority)) Agency. A Notice of Construction application shall be submitted to the ((Authority)) Agency for review and approval prior to construction of a new source, modification of an existing stationary source or replacement or substantial alteration of control technology at an existing stationary source or portable source. A Notice of Construction application may be submitted to the ((Authority)) Agency for activities not requiring New Source Review and shall not automatically impose New Source Review requirements. (For more information refer to ((SWAPCA)) SWCAA 400-109.)

(60) "Opacity" means the degree to which an object seen through a plume is obscured, stated as a percentage.

(61) "Open or outdoor burning" means the combustion of material in an open fire or in an outdoor container, without providing for the control of combustion or the control of the emissions from the combustion. Open burning includes all forms of outdoor burning except those listed as exempt in ((SWAPCA)) SWCAA 425-020. Wood waste disposal in wigwam burners is not considered open or outdoor burning.

(62) "Order" or Regulatory Order means any order issued by the ((Authority)) Agency pursuant to Chapter 70.94 RCW, including, but not limited to RCW 70.94.332, 70.94.152, 70.94.153 and 70.94.141(3), and includes, where used in the generic sense, the terms order, corrective action order, order of approval, compliance schedule order, consent order, order of denial, order of violation, order of prevention, order of discontinuance, administrative order, and regulatory order.

(63) "Order of Approval" and "Approval Order" mean a regulatory order issued by the ((Authority)) Agency to approve a Notice of Construction application for a proposed new source or modification, or the replacement or substantial alteration of control technology at an existing stationary source or portable source. Note: For more information refer to ((SWAPCA)) SWCAA 400-230 (1)(a).

(64) "Particulate matter" or "particulates" means any airborne finely divided solid or liquid material with an aerodynamic diameter smaller than 100 micrometers.

(65) "Particulate matter emissions" means all finely divided solid or liquid material, other than uncombined water, emitted to the ambient air as measured by applicable reference methods, or an equivalent or alternative method specified in 40 CFR Part 60 or by a test method specified in the Washington State Implementation Plan.

(66) "Parts per million (ppm)" means parts of a contaminant per million parts of gas or carrier medium, by volume. When calculating or measuring the ppm of a given gas or carrier stream, such measurement or calculation shall be exclusive of water and particulate matter.

(67) "Person" means an individual, firm, public or private corporation, owner, owner's agent, operator, contractor,

association, partnership, political subdivision, municipality, or government agency.

(68) "PM₁₀" means particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers as measured by a reference method based on 40 CFR Part 50 Appendix J and designated in accordance with 40 CFR Part 53 or by an equivalent method designated in accordance with 40 CFR Part 53.

(69) "PM₁₀ emissions" means finely divided solid or liquid material, including condensable particulate matter, with an aerodynamic diameter less than or equal to a nominal 10 micrometers emitted to the ambient air as measured by an applicable reference method, or an equivalent or alternate method, specified in Appendix M of 40 CFR Part 51 or by a test method specified in the Washington State Implementation Plan.

(70) "PM_{2.5}" means finely divided solid or liquid material, including condensable particulate matter, with an aerodynamic diameter less than or equal to a nominal 2.5 micrometers emitted to the ambient air as measured by an applicable reference method, or an equivalent or alternate method, specified in 40 CFR Part 50 or by a test method specified in the Washington State Implementation Plan.

(71) "Pollutant" means the same as air contaminant, air pollutant and air pollution. (Refer to definitions 3, 4 and 78)

(72) "Potential to emit" means the maximum capacity (i.e., design capacity) of a stationary source to emit a pollutant under its physical and operational design. Any physical or operational limitation on the capacity of the source to emit a pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, shall be treated as part of its design only if the limitation or the effect it would have on emissions is federally enforceable. Secondary emissions do not count in determining the potential to emit of a stationary source.

(73) "Prevention of Significant Deterioration (PSD)" means the program set forth in ((SWAPCA)) SWCAA 400-141 and WAC 173-400-141.

(74) "Projected width" means that dimension of a structure determined from the frontal area of the structure, projected onto a plane perpendicular to a line between the center of the stack and the center of the building.

(75) "Reasonably attributable" means attributable by visual observation or any other technique the ((Authority)) Agency deems appropriate.

(76) "Reasonably available control technology (RACT)" means the lowest emission limit that a particular source or source category is capable of meeting by the application of control technology that is reasonably available considering technological and economic feasibility. RACT is determined on a case-by-case basis for an individual source or source category taking into account the impact of the source upon air quality, the availability of additional controls, the emission reduction to be achieved by additional controls, the impact of additional controls on air quality, and the capital and operating costs of the additional controls. RACT requirements for any source or source category shall be adopted only after

public notice and opportunity for comment are afforded. RACT shall apply to existing sources.

(77) "Regulatory order" means an order issued by the ~~((Authority))~~ Agency to an air contaminant source which applies to that source, any applicable provision of Chapter 70.94 RCW, or the rules adopted thereunder, or, the regulations of the ~~((Authority))~~ Agency. Note: For further clarification refer also to the definition of Order and Order of Approval and ~~((SWAPCA))~~ SWCAA 400-230.

(78) "Significant" or "significant emission rate" means, in reference to a net emissions increase or the potential of a source to emit any of the following pollutants, a rate of emission equal to or greater than any one of the following rates:

<u>Pollutant</u>	<u>Tons/Year</u>
Carbon monoxide	100
Nitrogen oxides	40
Sulfur dioxide	40
Particulate matter (PM)	25
Fine particulate matter (PM ₁₀)	15
Volatile organic compounds (VOC)	40
Lead	0.6
Fluorides	3
Sulfuric acid mist	7
Hydrogen sulfide (H ₂ S)	10
Total reduced sulfur (including H ₂ S)	10
Municipal waste combustor organics (measured as total tetra- through octa-chlorinated dibenzo-p-dioxins and dibenzofurans)	0.0000035
Municipal waste combustor metals (measured as PM)	15
Municipal waste combustor acid gases (measured as SO ₂ and hydrogen chloride)	40

(79) "Significant visibility impairment" means visibility impairment which interferes with the management, protection, preservation, or enjoyment of visitor visual experience of a Class I area as defined in Section 162(a) of the FCAA. The determination must be made on a case-by-case basis, taking into account the geographic extent, intensity, duration, frequency, and time of the visibility impairment, and how these factors correlate with the time of visitor use of the Class I area and frequency and timing of natural conditions that reduce visibility.

(80) "Source" means all of the emissions unit(s) including quantifiable fugitive emissions, that are located on one or more contiguous and adjacent properties, and are under the control of the same person (or persons under common control), whose activities are ancillary to the production of a single product or functionally related groups of products. Activities shall be considered ancillary to the production of a single product or functionally related group of products if they belong to the same major group (i.e., which have the same

two digit code) as described in the *Standard Industrial Classification Manual*, 1987.

(81) "Source category" means all sources of the same type or classification as described in the *Standard Industrial Classification Manual*, 1987.

(82) "Southwest Clean Air ~~((Pollution Control Authority))~~ Agency (~~((SWAPCA))~~ SWCAA" or "~~((Authority))~~ Agency" means the local air pollution agency empowered to enforce and implement the Federal Clean Air Act (42 U.S.C. 7401, et seq.) and the Clean Air Washington Act (RCW 70.94) in Clark, Cowlitz, Lewis, Skamania and Wahkiakum Counties of Washington State.

(83) "Stack" means any emission point in a source designed to emit solids, liquids, or gases into the air, including a pipe or duct.

(84) "Stack height" means the height of an emission point measured from the ground-level elevation at the base of the stack.

(85) "Standard conditions" means a temperature of 20 degrees C (68 degrees F) and a pressure of 29.92 inches (760 mm) of mercury except as otherwise specified.

(86) "State Implementation Plan, (SIP)" means a comprehensive plan developed/prepared by the Washington State Department of Ecology with assistance from the Southwest Clean Air ~~((Pollution Control Authority))~~ Agency, other regional air pollution control authorities and other interested planning and governing entities, and submitted to EPA for approval, which provides for implementation, maintenance and enforcement of the primary and secondary National Ambient Air Quality Standards.

(87) "Stationary source" means any building, structure, facility, or installation (~~(which))~~ that emits or may emit any contaminant. This term does not include emissions resulting directly from an internal combustion engine for transportation purposes or from a non-road engine or non-road vehicle as defined in Section 216 of the FCAA.

(88) "Sulfuric acid plant" means any facility producing sulfuric acid by the contact process by burning elemental sulfur, alkylation acid, hydrogen sulfide, or acid sludge.

(89) "Total reduced sulfur, (TRS)" means the sum of the sulfur compounds hydrogen sulfide, mercaptans, dimethyl sulfide, dimethyl disulfide, and any other organic sulfides emitted and measured by EPA Method 16 or an approved equivalent method and expressed as hydrogen sulfide.

(90) "Total suspended particulate" means particulate matter as measured by the method described in 40 CFR Part 50 Appendix B as in effect on July 1, ~~((1998))~~ 2000.

(91) "United States Environmental Protection Agency, (USEPA)" shall be referred to as EPA.

(92) "Upgraded" is defined only for gasoline dispensing facilities and means the modification of a gasoline storage tank or piping to add cathodic protection, tank lining or spill and overfill protection that involved removal of ground or ground cover above a portion of the product piping. "Modification" of a gasoline dispensing facility means the same as "upgraded".

(93) "Visibility impairment" means any perceptible degradation in visibility (visual range, contrast, coloration) not caused by natural conditions.

PROPOSED

(94) "Visibility impairment of Class I areas" means visibility impairment within the area and visibility impairment of any formally designated integral vista associated with the area.

(95) "Volatile organic compound (VOC)" means:

(a) Any compound of carbon, excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate, which participates in atmospheric photochemical reactions. This includes any organic compound other than the following, which have negligible photochemical activity: acetone; ethane; methane; methyl acetate; t-butyl acetate (TBAC), methylene chloride (dichloromethane); 1,1,1-trichloroethane (methyl chloroform); 1,1,2-trichloro 1,2,2-trifluoroethane (CFC-113); trichlorofluoromethane (CFC-11); dichlorodifluoromethane (CFC-12); chlorodifluoromethane (HCFC-22); trifluoromethane (HFC-23); 1,2-dichloro 1,1,2,2 tetrafluoroethane (CFC-114); chloropentafluoroethane (CFC-115); 1,1,1-trifluoro 2,2-dichloroethane (HCFC-123); 1,1,1,2-tetrafluoroethane (HFC-134a); 1,1,-dichloro 1-fluoroethane (HCFC-141b); 1-chloro 1,1-difluoroethane (HCFC-142b); 2-chloro 1,1,1,2-tetrafluoroethane (HCFC-124); pentafluoroethane (HFC-125); 1,1,2,2-tetrafluoroethane (HFC-134); 1,1,1-trifluoroethane (HFC-143a); 1,1-difluoroethane (HFC-152a); perchlorobenzotrifluoride (PCBTF); cyclic, branched, or linear completely methylated siloxanes; perchloroethylene (tetrachloroethylene); 3,3-dichloro-1,1,1,2,2-pentafluoropropane (HCFC-225ca); 1,3-dichloro-1,1,2,2,3-pentafluoropropane (HCFC-225cb); 1,1,1,2,3,4,4,5,5,5-decafluoropentane (HFC-43-10mee); difluoromethane (HFC-32); ethylfluoride (HFC-161); 1,1,1,3,3,3-hexafluoropropane (HFC-236fa); 1,1,2,2,3-pentafluoropropane (HFC-245ca); 1,1,2,3,3-pentafluoropropane (HFC-245ea); 1,1,1,2,3-pentafluoropropane (HFC-245eb); 1,1,1,3,3-pentafluoropropane (HFC-245fa); 1,1,1,2,3,3-hexafluoropropane (HFC-236ea); 1,1,1,3,3-pentafluorobutane (HFC-365mfc); chlorofluoromethane (HCFC-31); 1-chloro-1-fluoroethane (HCFC-151a); 1,2-dichloro-1,1,2-trifluoroethane (HCFC-123a); 1,1,1,2,2,3,3,4,4-nonafluoro-4-methoxy-butane (C4F9OCH3); 2-(difluoromethoxymethyl)-1,1,1,2,3,3,3-heptafluoropropane ((CF3)2CFCF2OCH3); 1-ethoxy-1,1,2,2,3,3,4,4-nonafluorobutane (C4F9OC2H5); 2-(ethoxydifluoromethyl)-1,1,1,2,3,3,3-heptafluoropropane ((CF3)2CFCF2OC2H5); and perfluorocarbon compounds which fall into these classes:

(i) Cyclic, branched, or linear, completely fluorinated alkanes;

(ii) Cyclic, branched, or linear, completely fluorinated ethers with no unsaturations;

(iii) Cyclic, branched, or linear, completely fluorinated tertiary amines with no unsaturations; and

(iv) Sulfur containing perfluorocarbons with no unsaturations and with sulfur bonds only to carbon and fluorine.

(b) For the purpose of determining compliance with emission limits, VOCs will be measured by the appropriate methods in 40 CFR Part 60 Appendix A. Where such a method also measures compounds with negligible photochemical reactivity, these negligibly-reactive compounds may be excluded as VOC.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The typographical errors in the above material occurred in the copy filed by the Southwest Clean Air Agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION

~~((SWAPCA)) SWCAA 400-035 Open Fires (Deleted)~~

[Original adoption by Board 12/17/68 (Regulation 1); Amended by Board 10/29/69 (Regulation 2); Amended by Board 12/18/79 deleted-now covered by ~~((SWAPCA)) SWCAA 425 (WAC 173-425))~~

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-027, filed 3/10/99, effective 4/11/99)

~~((SWAPCA)) SWCAA 400-040 General Standards for Maximum Emissions~~

[Statutory Authority: Chapter 70.94.040 RCW, 70.94.141 RCW, and 70.94.154 RCW. Original adoption by Board 12/17/68 (Regulation 1); Amended by Board 10/29/69 (Regulation 2); Amended by Board 12/18/79; Amended by Board 3/20/84; 93-21-003 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-027 filed 3/10/99, effective 4/11/99]

All sources and emissions units are required to meet the emission standards of this section. Where an emission standard listed in another section is applicable to a specific emissions unit, such standard shall take precedent over a general emission standard listed in this section. When two or more emissions units are connected to a common stack and the operator elects not to provide the means or facilities to sample emissions from the individual emissions units, and the relative contributions of the individual emissions units to the common discharge are not readily distinguishable, then the emissions of the common stack must meet the most restrictive standard of any of the connected emissions units. Further, all emissions units are required to use reasonably available control technology (RACT) ~~((which))~~ that may be determined for some sources or source categories to be more stringent than the applicable emission limitations of this regulation or any chapter of Title 173 WAC. Where current controls are determined to be less than RACT, the ~~((Authority))~~ Agency shall, as provided in RCW 70.94.154, define RACT for each source or source category and issue a rule or regulatory order requiring the installation of RACT.

(1) **Visible emissions.** No person shall cause or permit the emission for more than three minutes, in any one hour, of an air contaminant from any emissions unit which at the emission point, or within a reasonable distance of the emission point, exceeds twenty percent opacity as determined in accordance with Appendix A by a Certified Observer certified in accordance with EPA Method 9 "Visual Determination of the Opacity of Emissions from Stationary Sources" as specified in 40 CFR 60 Appendix A except:

(a) When the emissions occur due to soot blowing/grate cleaning and the operator can demonstrate that the emissions will not exceed twenty percent opacity for more than fifteen minutes in any eight consecutive hours. The intent of this

provision is to permit the soot blowing and grate cleaning necessary to the operation of boiler facilities. This practice, except for testing and trouble shooting, is to be scheduled for the same approximate times each day and the ((Authority)) Agency shall be advised of the schedule.

(b) When the owner or operator of a source supplies valid data to show that the presence of uncombined water is the only reason for the opacity to exceed twenty percent.

(c) When two or more sources are connected to a common stack, the ((Authority)) Agency may allow or require the use of an alternate time period if it is more representative of normal operations.

(d) When an alternate opacity limit has been established per RCW 70.94.331 (2)(c).

(2) **Fallout.** No person shall cause or permit the emission of particulate matter from any source to be deposited beyond the property under direct control of the owner(s) or operator(s) of the source in sufficient quantity to interfere unreasonably with the use and enjoyment of the property upon which the material is deposited.

(3) **Fugitive emissions.** The owner or operator of any emissions unit engaging in materials handling, construction, demolition or any other operation ((which)) that is a source of fugitive emission:

(a) If located in an attainment area and not impacting any nonattainment area, shall take reasonable precautions to prevent the release of air contaminants from the operation.

(b) If the emissions unit has been identified as a significant contributor to the nonattainment status of a designated nonattainment area, shall be required to use reasonable and available control methods, which shall include any necessary changes in technology, process, or other control strategies to control emissions of the contaminants for which nonattainment has been designated.

(4) **Odors.**

(a) Any person who shall cause or allow the generation of any odor from any source, which may unreasonably interfere with any other property owner's use and enjoyment of his property must use recognized good practice and procedures to reduce these odors to a reasonable minimum.

(b) A scentometer No. 1 odor strength or equivalent dilution in residential and commercial areas shall not be exceeded.

(c) A scentometer No. 3 odor strength or equivalent dilution in all other land use areas shall not be exceeded.

Scentometer Readings

Scentometer No.	Concentration Range No. of Thresholds
0	1 to 2
1	2 to 8
2	8 to 32
3	32 to 128
4	128

(d) A violation of this section shall have occurred when two measurements made within a period of one (1) hour, separated by at least fifteen (15) minutes, off the property sur-

rounding the air contaminant source exceeds the scentometer limitations set hereunder.

(e) When the source is a manufacturing process, no violation of this section shall have occurred provided that Best Available Control Technology (BACT), Maximum Available Control Technology (MACT), or Lowest Achievable Emission Rate (LAER), as applicable for odor control and abatement, is provided and is operating in compliance with other applicable regulations and emission limits.

(f) When the source is using "good agricultural practices", as provided in RCW 70.94.640, no violation of this section shall have occurred.

(5) **Emissions detrimental to persons or property.** No person shall cause or permit the emission of any air contaminant from any source if it is detrimental to the health, safety, or welfare of any person, or causes damage to property or business.

(6) **Sulfur dioxide.**

No person shall cause or permit the emission of a gas containing sulfur dioxide from any emissions unit in excess of one thousand ppm of sulfur dioxide on a dry basis, corrected to seven percent oxygen or twelve percent CO₂ as required by the applicable emission standard for combustion sources, and based on the average of any period of sixty consecutive minutes.

(7) **Concealment and masking.** No person shall cause or permit the installation or use of any means ((which)) that conceals or masks an emission of an air contaminant which would otherwise violate any provisions of this section.

(8) **Fugitive dust sources.**

(a) The owner or operator of a source of fugitive dust shall take reasonable precautions to prevent fugitive dust from becoming airborne and shall maintain and operate the source to minimize emissions.

(b) The owner(s) or operator(s) of any existing source(s) of fugitive dust that has been identified as a significant contributor to a PM₁₀ nonattainment area shall be required to use reasonably available control technology (RACT) to control emissions. Significance will be determined by the criteria found in ((SWAPCA)) SWCAA 400-113(3).

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 95-17-084, filed 8/21/95, effective 9/21/95)

((SWAPCA)) **SWCAA 400-050 Emission Standards for Combustion and Incineration Units**

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption by board 12/18/79; 93-21-003 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95]

(1) Combustion and incineration emissions units shall meet all requirements of ((SWAPCA)) SWCAA 400-040 and, in addition, no person shall cause or permit emissions of particulate matter in excess of 0.23 gram per dry cubic meter at standard conditions (0.1 grain/dscf), except, for an emissions unit combusting wood derived fuels for the production of steam. No person shall allow or permit the emission of particulate matter from an emissions unit combusting wood

PROPOSED

derived fuels in excess of 0.46 gram per dry cubic meter at standard conditions (0.2 grain/dscf), as measured by EPA Method 5 or other acceptable sampling methods approved in advance by the ((Authority)) Agency.

(2) For any incinerator, no person shall cause or permit emissions in excess of one hundred (100) ppm of total carbonyls as measured by applicable sampling methods or other acceptable procedures approved in advance by the ((Authority)) Agency including but not limited to those methods contained in "Source Test Manual - Procedures for Compliance Testing", State of Washington, Department of Ecology. Incinerators shall be operated only during daylight hours unless written permission to operate at other times is received from the ((Authority)) Agency.

(3) Measured concentrations for combustion and incineration sources shall be adjusted in accordance with the following listing. Source categories not identified shall have measured concentrations for volumes corrected to seven percent oxygen, except when the ((Authority)) Agency determines that an alternate oxygen correction factor is more representative of normal operations. Concentrations for the following sources shall normally be adjusted to the following oxygen concentrations: gas, diesel, & oil fired boilers: 3%; medical/hospital waste incinerators: 12%; natural gas turbines: 15%.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-027, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-052 Stack Sampling of Major Combustion Sources

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption 93-21-003 filed 10/7/93, effective 11/8/93; 99-07-027 filed 3/10/99, effective 4/11/99]

(1) **General Requirements.** No owner or operator of a major source which is also a combustion or incineration source shall operate the source except in compliance with the requirements of this section.

(2) **Applicability.** All sources that are designated as major as a result of the operation of a combustion or incineration unit (or units) where the combined emissions of a single pollutant from the combustion or incineration unit (or units) are 100 tons per year or more of oxides of nitrogen, carbon monoxide, particulate matter, sulfur dioxide or volatile organic compounds.

(3) **Emissions Sampling Requirements.** The owner or operator of a major combustion or incineration source identified in (2) shall cause or conduct emissions tests at least once every two calendar years to quantify emissions of the pollutants for which the source has been designated major. In the event that the combined emissions of a single pollutant from several emissions units establishes the source as major, emissions tests shall be conducted at least once every two calendar years for all emissions units which emit 30 percent or more of the emissions of the pollutant for which the source has been designated major. Emissions testing shall be performed in accordance with ((SWAPCA)) SWCAA 400-106.

(4) **Sampling Methods.** All emissions tests shall be conducted in accordance with the specific test methods approved in advance by the ((Authority)) Agency.

(5) **Additional Requirements.** Nothing in this section shall be construed as to limit the ability of the ((Authority)) Agency to impose additional or supplemental emissions testing requirements for any emissions unit within the ((Authority)) Agency's jurisdiction in accordance with ((SWAPCA)) SWCAA 400-105(4).

(6) **Alternative Sampling Schedules.** The ((Authority)) Agency may on a case-by-case basis, accept or require an alternative emissions sampling schedule provided sufficient source-specific sampling data exists to adequately demonstrate that the source is capable of continuous compliance with any emission standards that are applicable to the source. Alternative sampling schedules shall be based upon measured emissions relative to the applicable emissions limitation. The ((Authority)) Agency may reduce the frequency of the required emissions testing.

(7) **Continuous Emissions Monitors.** The use of continuous emissions monitors shall be acceptable as an alternative emissions sampling schedule.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-027, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-060 Emission Standards for General Process Units

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption by Board 12/18/79; 93-21-003 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-027 filed 3/10/99, effective 4/11/99]

General process units shall meet all applicable provisions of ((SWAPCA)) SWCAA 400-040 and, no person shall cause or permit the emission of particulate material from any general process operation in excess of 0.23 grams per dry cubic meter at standard conditions (0.1 grain/dscf) of exhaust gas. EPA test methods from 40 CFR 60 Appendix A which are adopted by reference as in effect July 1, ((1998)) 2000 and any other appropriate test procedures approved in advance by the ((Authority)) Agency shall be used to determine compliance.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-027, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-070 Emission Standards for Certain Source Categories

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption 93-21-003 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-027 filed 3/10/99, effective 4/11/99]

The ((Authority)) Agency finds that the reasonable regulation of sources within certain categories requires separate standards applicable to such categories. The standards set forth in this section shall be the maximum allowable standards for emissions units within the categories listed.

(1) Wigwam burners.

The use of wigwam ("tee-pee", "conical", or equivalent type) burners is prohibited effective January 1, 1994.

(2) Hog fuel boilers.

(a) Hog fuel boilers shall meet all provisions of ((SWAPCA)) SWCAA 400-040 and ((SWAPCA)) SWCAA 400-050(1), except that emissions may exceed twenty percent opacity for up to fifteen consecutive minutes once in any eight hours. The intent of this provision is to permit the soot blowing and grate cleaning necessary for efficient operation of these units. This practice is to be scheduled for the same specific times each day and the ((Authority)) Agency shall be notified of the schedule or any changes.

(b) All hog fuel boilers shall utilize RACT and shall be operated and maintained to minimize emissions.

(3) Orchard heating.

(a) Burning of rubber materials, asphaltic products, crankcase oil or petroleum wastes, plastic, or garbage is prohibited.

(b) It is unlawful to burn any material or operate any orchard-heating device that causes a visible emission exceeding twenty percent opacity, except during the first thirty minutes after such device or material is ignited.

(4) Catalytic cracking units.

(a) All existing catalytic cracking units shall meet all provisions of ((SWAPCA)) SWCAA 400-040:

(i) No person shall cause or permit the emission for more than three minutes, in any one hour, of an air contaminant from any catalytic cracking unit which at the emission point, or within a reasonable distance of the emission point, exceeds twenty percent opacity.

(ii) No person shall cause or permit the emission of particulate material in excess of 0.46 grams per dry cubic meter at standard conditions (0.20 grains/dscf) of exhaust gas.

(b) All new catalytic cracking units shall install BACT ((which)) that may be more stringent than the provisions of ((SWAPCA)) SWCAA 400-115.

(5) **Sulfuric acid plants.** No person shall cause to be discharged into the atmosphere from a sulfuric acid plant, any gases which contain acid mist, expressed as H₂SO₄, in excess of 0.15 pounds per ton of acid produced. Sulfuric acid production shall be expressed as one hundred percent H₂SO₄.

(6) **Gasoline dispensing facilities.** All gasoline dispensing facilities shall meet all the provisions of ((SWAPCA)) SWCAA 491 "Emission Standards and Controls for Sources Emitting Gasoline Vapors".

(7) **Dry cleaning facilities.** All dry cleaning facilities shall meet all the provisions of ((SWAPCA)) SWCAA 494 "Dry Cleaning Operations".

(8) Abrasive blasting.

(a) Abrasive blasting shall be performed inside a booth or structure designed to capture the blast grit, overspray, and removed material except that outdoor blasting of structures or items too large to be reasonably handled indoors or in an enclosure shall employ control measures such as curtailment during windy periods, wet blasting, and/or enclosure of the area being blasted with tarps.

(b) Outdoor blasting shall be performed with either steel shot or an abrasive material containing less than one percent (by mass) which would pass through a No. 200 sieve.

(c) All abrasive blasting with sand shall be performed inside a blasting booth, enclosure or structure designed to capture fugitive particulate matter.

(d) All abrasive blasting of materials that have a coating or that may contain a substance that is identified as a toxic air pollutant in WAC 173-460 or a hazardous substance shall be analyzed prior to blast operations. If a toxic or hazardous material is present in the blast media or removed media, all material shall be handled and disposed of in accordance with applicable regulations.

(9) Sewage sludge incinerators. Standards for the incineration of sewage sludge found in 40 CFR Part 503 Subparts A (General Provisions) and E (Incineration) in effect on July 1, 2000, are adopted by reference.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 95-17-084, filed 8/21/95, effective 9/21/95)

((SWAPCA)) SWCAA 400-074 Gasoline Transport Tankers

[Statutory Authority: Chapter 70.94.141 RCW; refer to WAC 173-491-040. Original adoption 95-17-084 filed 8/21/95, effective 9/21/95]

(1) Each owner(s) and/or operator(s) of a gasoline transport tank doing business within the designated ozone non-attainment area or ozone maintenance plan area of ((SWAPCA)) SWCAA jurisdiction shall register the transport tank with ((SWAPCA)) SWCAA prior to being placed into service. Such registration shall be made annually with ((SWAPCA)) SWCAA.

(2) Each registered gasoline transport tanker shall pay an annual registration fee in accordance with the schedule provided in ((SWAPCA)) SWCAA 400-100 (3)(a)(i). Each transport tanker shall have its own registration sticker, certification test and shall be assessed a separate registration fee.

(3) Prior to registration, ((SWAPCA)) SWCAA shall review the leak test certification documentation from the testing company required under ((SWAPCA)) SWCAA 490-202(3). Upon demonstration of a successful leak test and payment of registration fees, ((SWAPCA)) SWCAA shall issue a registration sticker that shall be applied to the tanker.

(4) The owner(s) and/or operator(s) of a gasoline loading or unloading facility shall only allow the transfer of gasoline between the facility and a transport tank when a current leak test certification for the transport tank is on file with the facility or a valid ((SWAPCA)) SWCAA registration sticker is displayed on the tank(s).

(5) Each owner(s) and/or operator(s) of a petroleum product transport tank doing business within ((SWAPCA)) SWCAA jurisdiction shall notify ((SWAPCA)) SWCAA of a change in status of a tanker. Change in status shall include sale, operating only out of ((SWAPCA)) SWCAA jurisdiction, out of service, or other similar change. Such notification shall be made in writing to ((SWAPCA)) SWCAA within 10 days of the change of status.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-027, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-075 Emission Standards for Sources Emitting Hazardous Air Pollutants

[Statutory Authority: Chapter 70.94.141 RCW. Original Board adoption 12/18/79; Amended by Board 12/16/86; 93-21-003 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-027 filed 3/10/99, effective 4/11/99]

(1) The emission standards for hazardous air pollutants promulgated by the United States Environmental Protection Agency (USEPA) as in effect ((~~August~~) July 1, ((1998)) 2000, as contained in Title 40, Code of Federal Regulations, Part 61 and Part 63, are adopted by reference. The term "Administrator" in 40 CFR Part 61 shall mean the Administrator of EPA, the Director of Ecology and the Control Officer of the ((~~Authority~~) Agency.

(2) The ((~~Authority~~) Agency) may require that source tests be conducted and require access to records, books, files, and other information specific to the control, recovery or release of those pollutants regulated under 40 CFR Part 61 and/or Part 63 in order to determine the status of compliance of sources of these contaminants and to carry out its enforcement responsibilities.

(3) Source testing, monitoring, and analytical methods for sources of hazardous air pollutants shall conform with the requirements of Title 40, Code of Federal Regulations, Part 61 and/or Part 63, as in effect ((~~August~~) July 1, ((1998)) 2000.

(4) This section shall not apply to any source operating pursuant to a waiver granted by EPA or an exemption granted by the President of the United States during the effective life of such waiver or exemption.

(5) Specific standards of performance referred to as Maximum Achievable Control Technology (MACT) have been promulgated by the USEPA. As of ((~~August~~) July 1, ((1998)) 2000 the following standards of performance as set forth in 40 CFR 63 are hereby adopted by reference:

- Subpart A National Emission Standards for Hazardous Air Pollutants for Source Categories: General Provisions (40 CFR 63.1 et seq.)
- Subpart B National Emission Standards for Hazardous Air Pollutants for Source Categories: Equivalent Emission Limitation By Permit (ref. 40 CFR 63.50 et seq.)
- Subpart D National Emission Standards for Hazardous Air Pollutants for Source Categories: Early Reduction Program (ref. 40 CFR 63.70 et seq.)
- Subpart F National Emission Standards for Hazardous Air Pollutants from the Synthetic Organic Chemical Manufacturing Industry (ref. 40 CFR 63.100 et seq.)
- Subpart G National Emission Standards for Organic Hazardous Air Pollutants from the Synthetic Organic Chemical Manu-

facturing Industry for Process Vents, Storage Vessels, Transfer Operations, and Wastewater (ref. 40 CFR 63.110 et seq.)

- Subpart H National Emission Standards for Organic Hazardous Air Pollutants for Equipment Leaks (ref. 40 CFR 63.160 et seq.)
- Subpart I National Emission Standards for Organic Hazardous Air Pollutants for Certain Processes Subject to the Negotiated Regulation for Equipment Leaks (ref. 40 CFR 60.190 et seq.)
- Subpart L National Emission Standards for Hazardous Air Pollutants for Coke Oven Operations (ref. 40 CFR 63.300 et seq.)
- Subpart M National Perchloroethylene Air Emission Standards for Dry Cleaning Facilities (ref. 40 CFR 63.320 et seq.)
- Subpart N National Emission Standards for Hazardous Air Pollutants from Hard and Decorative Electroplating and Anodizing Operations (ref. 40 CFR 63.340 et seq.)
- Subpart O National Ethylene Oxide Air Emission Standards for Commercial Sterilizers (ref. 40 CFR 63.360 et seq.)
- Subpart Q National Emission Standards for Hazardous Air Pollutants for Industrial Process Cooling Towers (ref. 40 CFR 63.400 et seq.)
- Subpart R National Emission Standards for Hazardous Air Pollutants for Gasoline Distribution Operations (Stage I) (ref. 40 CFR 63.420 et seq.)
- Subpart S National Emission Standards for Hazardous Air Pollutants from the Pulp and Paper Industry (ref. 40 CFR 63.440 et seq.)
- Subpart T National Emission Standards for Hazardous Air Pollutants for Halogenated Solvents Cleaning Operations (ref. 40 CFR 63.460 et seq.)
- Subpart U National Emission Standards for Hazardous Air Pollutant Emissions: Group I Polymers and Resins and Group IV Polymers and Resins (ref. 40 CFR 63.480 et seq.)
- Subpart W National Emission Standards for Hazardous Air Pollutants for Epoxy Resins Production and Non-Nylon Polyamides Production (ref. 40 CFR 63.520 et seq.)
- Subpart X National Emission Standards for Hazardous Air Pollutants for Secondary Lead Smelting Manufacturing Operations (ref. 40 CFR 63.541 et seq.)
- Subpart Y National Emission Standards for Hazardous Air Pollutants for Marine Vessel Loading Operations (ref. 40 CFR 63.560 et seq.)

PROPOSED

Subpart CC	National Emission Standards for Hazardous Air Pollutants from Petroleum Refineries (ref. 40 CFR 63.640 et seq.)
Subpart DD	National Emission Standards for Hazardous Air Pollutants from Off-Site Waste and Recovery Operations (ref. 40 CFR 63.680 et seq.)
Subpart EE	National Emission Standards for Hazardous Air Pollutants for Magnetic Tape Manufacturing Operations (ref. 40 CFR 63.710 et seq.)
Subpart GG	National Emission Standards for Hazardous Air Pollutants for Aerospace Manufacturing Operations (ref. 40 CFR 63.740 et seq.)
Subpart II	National Emission Standards for Hazardous Air Pollutants for Shipbuilding and Ship Repair (Surface Coating) (ref. 40 CFR 63.780 et seq.)
Subpart JJ	National Emission Standards for Hazardous Air Pollutants for Wood Furniture Manufacturing Operations (ref. 40 CFR 63.800 et seq.)
Subpart KK	National Emission Standards for Hazardous Air Pollutants for the Printing and Publishing Industry (ref. 40 CFR 63.820 et seq.)
Subpart LL	National Emission Standards for Hazardous Air Pollutants for Primary Aluminum Reduction Plants (ref. 40 CFR 63.840 et seq.)
<u>Subpart OO</u>	<u>National Emission Standards for Tanks – Level 1 (ref. 40 CFR 63.900 et seq.)</u>
<u>Subpart PP</u>	<u>National Emission Standards for Containers (ref. 40 CFR 63.920 et seq.)</u>
<u>Subpart QQ</u>	<u>National Emission Standards for Surface Impoundments (ref. 40 CFR 63.940 et seq.)</u>
<u>Subpart RR</u>	<u>National Emission Standards for Individual Drain Systems (ref. 40 CFR 63.960 et seq.)</u>
<u>Subpart VV</u>	<u>National Emission Standards for Oil-Water Separators and Organic-Water Separators (ref. 40 CFR 63.1040 et seq.)</u>
<u>Subpart EEE</u>	<u>National Emission Standards for hazardous Air Pollutants from Hazardous Waste Combustors (ref. 40 CFR 63.1211 et seq.)</u>
<u>Subpart III</u>	<u>National Emission Standards for Hazardous Air Pollutants for Flexible Polyurethane Foam Production (ref. 40 CFR 63.1290 et seq.)</u>
Subpart JJJ	National Emission Standards for Hazardous Air Pollutants Emissions: Group IV Polymers and Resins (ref. 40 CFR 63.1310 et seq.)

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-027, filed 3/10/99, effective 4/11/99)

~~((SWAPCA))~~ **SWCAA 400-076 Emission Standards for Sources Emitting Toxic Air Pollutants**

[Statutory Authority: Chapter 70.94.141 RCW. Original Board adoption 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-027 filed 3/10/99, effective 4/11/99]

(1) The term toxic air pollutants (TAP) or toxic air contaminant means any air pollutant listed in WAC 173-460-150 or 460-160. The term toxic air pollutant may include particulate matter and volatile organic compounds if an individual substance or a group of substances within either of these classes is listed in WAC 173-460-150 or 460-160. The Chemical Abstract Service (CAS) number shall be the primary means used to specifically identify a substance. The term toxic air pollutant does not include particulate matter and volatile organic compounds as generic classes of compounds.

(2) All sources subject to the requirements of ~~((SWAPCA))~~ SWCAA 400-110, 400-111, 400-112, 400-113 or 400-114 shall be subject to the requirements of WAC 173-460. All sources subject to review under ~~((SWAPCA))~~ SWCAA 400 shall also be reviewed for applicability and/or compliance under WAC 173-460.

(3) The New Source Review fee schedule provided in ~~((SWAPCA))~~ SWCAA 400-110 shall be applicable to all sources subject to WAC 173-460. The fees identified in ~~((SWAPCA))~~ SWCAA 400-110 shall not be duplicate to any fees collected under WAC 173-460. Only a single fee shall apply to sources that are subject to ~~((SWAPCA))~~ SWCAA 400 and WAC 173-460.

(4) A Notice of Construction is a written application to request approval for construction or modification of an air contaminant source. If a Notice of Construction application is required under both ~~((SWAPCA))~~ SWCAA 400 and WAC 173-460, then the applications shall be combined. All sources subject to WAC 173-460 shall file a Notice of Construction application in accordance with ~~((SWAPCA))~~ SWCAA 400-109 "Notice of Construction Application" and ~~((SWAPCA))~~ SWCAA 400-110 "New Source Review".

(5) ~~((Authority))~~ Agency actions including issuance of regulatory orders and enforcement actions for sources subject to WAC 173-460 shall be the same as those actions for sources subject to and identified in ~~((SWAPCA))~~ SWCAA 400.

(6) Sources subject to WAC 173-460 shall be subject to the registration requirements of ~~((SWAPCA))~~ SWCAA 400-100. Where a source is subject to both ~~((SWAPCA))~~ SWCAA 400 and WAC 173-460, only one registration shall be provided and only one fee shall be collected in accordance with the schedule outlined in ~~((SWAPCA))~~ SWCAA 400-100.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION

~~((SWAPCA))~~ **SWCAA 400-080 Compliance Schedules** (deleted 3/20/84)

PROPOSED

[Original adoption by Board 12/17/68 (Regulation 1); Amended by Board 10/29/69 (Regulation 2); Amended by Board 3/20/84 deleted-now covered by SWCAA 400-161]

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 95-17-084, filed 8/21/95, effective 9/21/95)

((SWAPCA)) SWCAA 400-081 Startup and Shutdown

[Statutory Authority: Chapter 70.94.141 RCW. 93-21-003 filed 10/7/93, effective 11/8/93; Original adoption 95-17-084 filed 8/21/95, effective 9/21/95]

(1) In promulgating technology-based emission standards and making control technology determinations (e.g., BACT, RACT, LAER, BART) the ((Authority)) Agency shall consider any physical and operational constraints on the ability of a source to comply with the applicable standard during startup or shutdown.

(2) Where the ((Authority)) Agency determines that the source or source category, operated and maintained in accordance with good air pollution control practice, is not capable of achieving continuous compliance with an emission standard during startup or shutdown, the ((Authority)) Agency shall include in regulatory orders or the Operating Permit, appropriate emission limitations, operating parameters, or other criteria to regulate the performance of the source during startup or shutdown conditions.

(3) In modeling the emissions of a source for purposes of demonstrating attainment or maintenance of national ambient air quality standards, the ((Authority)) Agency shall take into account any incremental increase in allowable emissions under startup or shutdown conditions authorized by an emission limitation or other operating parameter adopted under this section.

(4) Any emission limitation or other parameter adopted under this section which increases allowable emissions during startup or shutdown conditions over levels authorized in the Washington State Implementation Plan shall not take effect until approved by EPA as a SIP amendment.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 95-17-084, filed 8/21/95, effective 9/21/95)

((SWAPCA)) SWCAA 400-090 Voluntary Limits on Emissions (renumbered to 400-091 9/21/95)

[Statutory Authority: Chapter 70.94.141 RCW. Section originally numbered SWCAA 400-090 - 93-21-003 filed 10/7/93, effective 11/8/93; renumbered to SWCAA 400-091 - 95-17-084 filed 8/21/95, effective 9/21/95]

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-027, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-091 Voluntary Limits on Emissions

[Statutory Authority: Chapter 70.94.141 RCW. Section previously numbered SWCAA 400-090 - 93-21-003 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-027 filed 3/10/99, effective 4/11/99]

(1) Voluntary limits on emissions and limitations on potential to emit or process parameters or throughputs may be requested by a source by submittal of a complete Notice of Construction application to the ((Authority)) Agency as provided in ((SWAPCA)) SWCAA 400-109. Confidential information shall be identified as set forth in ((SWAPCA)) SWCAA 400-270. Upon request by the owner or operator of a source, and completion of review of the application by the ((Authority)) Agency, the ((Authority)) Agency shall issue a regulatory order which reduces that source's potential to emit to an amount agreed to by the owner or operator and the ((Authority)) Agency.

(2) A condition contained in an order issued under this section shall be less than the source's otherwise allowable annual emissions of that air contaminant, process parameter or throughputs, under all applicable requirements of Chapter 70.94 RCW and the FCAA, including any standard or other requirement provided for in the Washington State Implementation Plan (SIP).

(3) Any order issued under this section shall include monitoring, recordkeeping and reporting requirements sufficient to ensure that the source complies with any emission limit, process parameter or throughput, established under this section. Monitoring requirements shall use terms, test methods, units, averaging periods, and other statistical conventions consistent with the requirements of ((SWAPCA)) SWCAA 400-105.

(4) Any order issued under this section shall be subject to the public notice and comment procedures under ((SWAPCA)) SWCAA 400-171.

(5) The terms and conditions of a regulatory order issued under this section shall be federally enforceable, upon approval, of this section as an element of the Washington State Implementation Plan. Any proposed increase in emissions above limits contained in an order issued under this section shall require revision or revocation of the order.

(6) Noncompliance with any emission limit, test requirement, reporting requirement or other requirement identified in a regulatory order issued pursuant to this section shall be considered a violation of this section.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-030, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-099 Per Capita Fees

[Statutory Authority: Chapter 70.94.093 RCW. Original Board adoption - 99-07-030 filed 3/10/99, effective 4/11/99]

Each component city or town and county shall pay such proportion of the supplemental income to the ((Authority))

Agency as determined by either one of two methods as provided under RCW 70.94.093. The first method is based on the assessed valuation of property within such city or town and county limits bears to the total assessed valuation of taxable property within the jurisdiction of ((SWAPCA)) SWCAA. The second method is based on the total population of such city or town and county bears to the total population of the jurisdiction of ((SWAPCA)) SWCAA. In addition, a combination of the two methods is allowable provided that such combination is shared at 50 percent each. The ((SWAPCA)) SWCAA Board of Directors has elected to use the second method based on population (per capita). The "per capita" assessment has been established at 30 cents per person. The population shall be determined by the most recent census, estimate or survey by the federal bureau of census or any state board or commission authorized to make such a census, estimate or survey.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-032, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-100 Registration Requirements and Operating Permit Fees

[Statutory Authority: Chapter 70.94.141 RCW, 70.94.151 RCW, 70.94.162 RCW, 70.94.200 RCW, and 70.94.395 RCW. Original Board adoption 10/29/69 (Regulation 2 Sec 3); Amended by Board 12/18/79; Amended by Board 8/18/81; Amended by Board 3/20/84; 92-04-030 filed 1/28/92, effective 2/28/92; 93-21-004 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-032 filed 3/10/99, effective 4/11/99]

(1) **Applicability.** All sources or emission units that emit contaminants to the ambient air shall be registered with the ((Authority)) Agency in accordance with this section as set forth in RCW 70.94.151 except those sources or emission units specifically exempted by ((SWAPCA)) SWCAA 400-100(3) and ((SWAPCA)) SWCAA 400-101.

(2) **General requirements.**

(a) A unique registration number shall be assigned to all sources required to be registered with ((SWAPCA)) SWCAA and a separate registration fee shall be provided for each air contaminant emission unit; provided that, an owner has the option to register a process with a detailed inventory of air contaminant sources and emissions related to the process. A registration fee shall not be collected for exempt emission units identified at ((SWAPCA)) SWCAA 400-101.

(b) Registration information shall be provided to the source on forms supplied by the ((Authority)) Agency. The forms shall be verified by the source and returned to the ((Authority)) Agency with payment in full within the time specified by the ((Authority)) Agency.

(c) Annual registration fees that are unpaid after June 30 for the effective year shall be considered to be in default and the source shall be considered to be out of business and/or in violation of item (d) below for failure to report closure. At the discretion of the Control Officer, all Orders of Approval for existing equipment shall become invalid for this source and the source shall be required to submit a Notice of Construction and applicable fees in accordance with ((SWAPCA)) SWCAA 400-110 prior to resuming opera-

tions. Prior to taking actions to 'un-register' a source, the source must be notified by certified letter. The registration program covers the period of July 1 through June 30. Sources or emission units operating less than six months in the current registration period that are terminated, shall not be liable for registration fees. This does not apply to temporary or portable stationary sources.

(d) A report of closure or discontinuance shall be filed with the ((Authority)) Agency within ninety days after operations producing emissions permanently cease at any source. (Refer to ((SWAPCA)) SWCAA 400-230 for issuance of an Order of Discontinuance.)

(3) **Registration Fees.** Before the Control Officer may register any emission unit, the use of which may emit contaminants to the atmosphere, an annual registration fee of \$75.00 for each emission unit, plus \$25 per ton of each criteria air pollutant and VOC (combined) for fiscal year 1998/1999, plus \$10 per ton of total toxic air pollutants greater than 1.0 tons, shall be paid. The \$25 per ton of each criteria air pollutant and VOC shall be adjusted in fiscal year 1999/2000, and beyond, to \$39 per ton.

(a) **Exceptions:**

(i) An annual registration fee of \$50.00 shall be charged to each gasoline transport tank.

(ii) The registration fee for a small operation may be waived or reduced by the Control Officer provided sufficient demonstration of circumstances is presented, subject to the discretion of the Control Officer.

(iii) Emissions units and activities specifically exempted under ((SWAPCA)) SWCAA 400-101 are not required to comply with the requirements of this section.

(iv) Operating Permit Program sources, as defined in RCW 70.94.030(17) shall pay an operating permit fee in accordance with ((SWAPCA)) SWCAA 400-100(4). Operating Permit Program sources, as defined in RCW 70.94.030(17) are not required to comply with the registration requirements of this section after EPA grants interim or final approval of the ((SWAPCA)) SWCAA Operating Permit Program pursuant to 40 CFR Part 70.

(4) **Operating Permit Fees.** Fee determination and certification for sources subject to 70.94.161 RCW requirements.

(a) **Applicability.** The owner or operator of all sources subject to the requirement to obtain an Operating Permit under 40 CFR 70 or 70.94.161 RCW, shall pay an annual fee, or the equivalent over some other period as approved, subject to the discretion of the Control Officer, sufficient to cover all reasonable (direct and indirect) costs required to develop and administer the Operating Permit Program requirements as specified in this section.

(b) **Pollutants for which fees will be assessed.**

(1) A volatile organic compound.

(2) Each pollutant regulated under Section 7411 or 7412 of the 1990 Federal Clean Air Act Amendments.

(3) Each pollutant for which a national primary ambient air quality standard has been promulgated except that carbon monoxide shall be excluded from this reference. PM₁₀ emissions will be utilized for purposes of calculating particulate matter emissions when such data is provided by the 40 CFR

PROPOSED

Part 70 source. Source test data is required to demonstrate the PM₁₀ portion of total particulate matter emissions.

(4) Emissions of each regulated pollutant emitted in excess of 7500 tons from a source shall be excluded from fee assessment.

(c) **Program cost projections.** The ((Authority)) Agency shall prepare an Operating Permit Program budget each year based on a projected workload evaluation. Only fee eligible activities as specified in ((SWAPCA)) SWCAA 400-100(f) and Ecology's development and oversight costs, as provided in RCW 70.94.162 shall be considered in the workload analysis. The projected budget shall be submitted to the ((Authority)) Agency's Technical Advisory Council, as described in ((SWAPCA)) SWCAA 400-172, for comments. The Technical Advisory Council shall be given an opportunity to provide input regarding the projected budget. The Control Officer shall evaluate all comments and revise the projected budget where deemed appropriate. After consideration of the comments, the Control Officer shall submit the proposed budget to the Board of Directors for approval. The approved budget shall be used in the equations below to determine the Operating Permit Program fees. The ((Authority)) Agency shall publish the proposed and approved budgets and workload analysis in the Permit Register.

(d) **Three part fee assessment methodology.** Operating Permit Program fees shall be determined using a three-part fee assessment methodology as described below:

(1) **Participation Fee.** Fees sufficient to cover one-third of the Board approved Operating Permit Program budget shall be assessed such that each source shall pay an equal share. The total Operating Permit Program budget shall be divided by three. This amount shall be further divided by the number of 40 CFR Part 70 sources within the ((Authority)) Agency's jurisdiction. Participation fees shall be equal in amount for each 40 CFR Part 70 source. The participation portion of the fee shall be assessed according to the following formula:

PF = B÷3+n, where;

- PF = Participation fee portion of total fee;
- B = The total ((Authority)) Agency budget for the Operating Permit Program;
- n = The number of 40 CFR Part 70 sources.

(2) **Emissions Fee.** Fees sufficient to cover one-third of the budget shall be assessed such that each source shall pay an amount equal to that source's portion of the total annual emissions of the fee applicable pollutants from all 40 CFR Part 70 sources within the ((Authority)) Agency's jurisdiction. The total Operating Permit Program budget shall be divided by three. The ratio of each source's annual emissions (in tons) to the total annual emissions of fee applicable pollutants emitted by all 40 CFR Part 70 sources within the ((Authority)) Agency's jurisdiction shall be paid by the owner or operator of each source. The emissions portion of the fee shall be assessed according to the following formula:

EF = B÷3*SE+TE, where:

- EF = Emissions fee portion of total fee;

- B = The total ((Authority)) Agency budget for the Operating Permit Program;
- SE = The sum of annual emissions of fee applicable pollutants in tons per year from the individual 40 CFR Part 70 source;
- TE = The sum of annual emissions of fee applicable pollutants in tons per year from all 40 CFR Part 70 sources.

(3) **Complexity Fee.** Fees sufficient to cover one-third of the budget shall be assessed such that each 40 CFR Part 70 source shall pay an amount equal to that source's portion of the total emissions units at all 40 CFR Part 70 sources within the ((Authority)) Agency's jurisdiction. The total Operating Permit Program budget shall be divided by three. The ratio of each source's emissions units to the total number of emissions units located at all 40 CFR Part 70 sources within the ((Authority)) Agency's jurisdiction shall be paid by the owner or operator of each source. The complexity portion of the fee shall be assessed according to the following formula:

CF = B÷3*SU+TU, where:

- CF = Complexity fee portion of total fee;
- B = The total ((Authority)) Agency budget for the Operating Permit Program;
- SU = The number of emission units at a source;
- TU = The number of emissions units at all 40 CFR Part 70 sources.

(4) **Total Fee.** The amount of the annual assessed fees for each 40 CFR Part 70 source shall be the sum of the participation, emissions and complexity fee portions (PF+EF+CF= Total Fee). The sum of the total fees for all 40 CFR Part 70 sources within the ((Authority)) Agency's jurisdiction shall be equal in amount to the Board adopted budget for the Operating Permit Program.

(e) **Accountability.**

(1) The sum of the fees assessed by the ((Authority)) Agency to all sources required to obtain Operating Permits within the ((Authority)) Agency's jurisdiction shall not exceed the cost of developing and administering the program. All fees collected from permit program sources as provided in RCW 70.94.162, shall be deposited in a dedicated air operating permit account. Such fees shall be used exclusively to support and administer the operating permit program.

(2) The ((Authority)) Agency shall keep a record of all reasonable (direct and indirect) costs to develop and administer the Operating Permit Program as specified in 40 CFR Part 70. This information shall be used by the ((Authority)) Agency to develop the Operating Permit Program budget specified in section (3) above. The information obtained from tracking revenues, time and expenditures shall not provide a basis for challenge to the amount of an individual source's fee.

(3) In the event that the assessed fees exceed the cost of developing and administering the Operating Permit Program, such excess fees shall be used to develop and administer the Operating Permit Program in the next subsequent year. The

amount of the excess fees shall be deducted from the projected budget of the next subsequent year prior to fee assessment for the subsequent year.

(f) Fee eligible activities.

(1) Preapplication assistance and review of an application and proposed compliance plan for a permit, permit revision or permit renewal;

(2) Source inspections, testing and other data gathering activities necessary for development of a permit, permit revision or renewal;

(3) Acting on an application for a permit, permit revision or renewal, including the costs of developing an applicable requirement as part of the processing of a permit, permit revision or renewal, preparing a draft permit and fact sheet and preparing a final permit, but excluding the costs of developing BACT, LAER, BART or RACT requirements for criteria and toxic air pollutants;

(4) Notifying and soliciting, reviewing and responding to comment from the public and contiguous states and tribes, conducting public hearings regarding the issuance of a draft permit and other costs of providing information to the public regarding operating permits and the permit issuance process;

(5) Modeling necessary to establish permit limits or to determine compliance with permit limits;

(6) Reviewing compliance certifications and emission reports, conducting related compilation and reporting activities;

(7) Conducting compliance inspections, complaint investigations and other activities necessary to ensure that a source is complying with permit conditions;

(8) Administrative enforcement activities and penalty assessment, excluding the costs of proceedings before the Pollution Control Hearings Board (PCHB) and all costs of judicial enforcement;

(9) The share attributable to permitted sources to the development and maintenance of emissions inventories;

(10) The share attributable to permitted sources of ambient air quality monitoring and associated recording and reporting activities;

(11) Training for permit administration and enforcement;

(12) Fee determination, assessment and collection, including the costs of necessary administrative dispute resolution and enforcement;

(13) Required fiscal audits, periodic performance audits and reporting activities;

(14) Tracking of time, revenues and expenditures and accounting activities;

(15) Administering the permit program including costs of clerical support, supervision and management;

(16) Provision of assistance to small business under jurisdiction of ((SWAPCA)) SWCAA as required under Section 507 of the Federal Clean Air Act; and

(17) Other activities required by operating permit regulations issued by EPA under the Federal Clean Air Act.

(g) Late Fee Payments. Fees shall be paid in accordance with the schedule of payment agreed upon in advance by the Control Officer and each operating permit source. Delinquent fees are subject to a late fee equal to three times

the operating permit fee. The penalties authorized by this subsection are additional to and in no way prejudice ((SWAPCA)) SWCAA's ability to exercise other civil and criminal remedies, including authority to revoke a source's operating permit for failure to pay all or part of its permit fee.

(h) Schedules of Payment. A source shall be allowed to pay its annual operating permit fees in one, two or four installments. Each schedule of payment shall specify the terms and dates of payments.

(i) Transfer of Ownership. Transfer of ownership of a source shall not affect that source's obligation to pay operating permit fees. Any liability for fee payment, including payment of delinquent fees and other penalties shall survive any transfer of ownership of a source.

(5) Inspections.

(a) Periodic onsite inspections of emission units and sources shall be allowed to verify compliance with applicable requirements, regulations, orders or rules governing the processes, equipment, or emissions from a source as set forth in RCW 70.94.200.

(b) ((Authority)) Agency personnel or representatives shall have the authority to enter at reasonable times upon any private or public property excepting non-multiple unit private dwellings housing two families or less for the purpose of investigating conditions specific to the control, recovery, or release of air contaminants to the atmosphere.

(c) No person shall refuse entry or access to ((Authority)) Agency personnel who request entry for the purpose of inspection, who present appropriate credentials.

(d) No person shall obstruct, hamper or interfere with any such inspection.

Reviser's note: The typographical error in the above material occurred in the copy filed by the Southwest Clean Air Agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

WSR 00-24-083

PROPOSED RULES

SOUTHWEST

CLEAN AIR AGENCY

[Filed December 5, 2000, 10:52 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 00-17-022.

Title of Rule: SWCAA 400 General Regulations for Air Pollution Sources.

Purpose: This rule provides for registration of sources, establishment of fees, and new source review requirements.

Statutory Authority for Adoption: RCW 70.94.141.

Statute Being Implemented: RCW 70.94.141.

Summary: The changes proposed in this rule are administrative in nature. The rule is being revised to reflect a name change for the agency, provides additional detail for new source review fees and administrative clarification.

Reasons Supporting Proposal: The name of the agency was changed July 6, 2000, from the Southwest Air Pollution Control Authority (SWAPCA) to the Southwest Clean Air Agency (SWCAA).

Name of Agency Personnel Responsible for Drafting and Implementation: Paul Mairose, 1308 N.E. 134th Street, Vancouver, WA, (360) 574-3058; and Enforcement: Robert D. Elliott, 1308 N.E. 134th Street, Vancouver, WA, (360) 574-3058.

Name of Proponent: Southwest Clean Air Agency, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: This is an existing rule. Only administrative type changes are being proposed. There will be no effect on the public or regulated businesses as a result of these changes.

Proposal Changes the Following Existing Rules: Titles and rule numbers that include the agency name are being changed to reflect the name of the agency. Additional fee categories are added to provide more clarification of the applicable fees for certain activities. The fees for these categories are consistent with current activities and do not represent an increase or decrease in fees.

No small business economic impact statement has been prepared under chapter 19.85 RCW. Changes proposed by SWCAA are consistent with federal and state rules already in effect. This agency is not subject to the small business economic impact provisions of chapter 19.85 RCW.

RCW 34.05.328 does not apply to this rule adoption. Pursuant to RCW 70.94.141(1), section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. SWCAA is not voluntarily invoking section 201, chapter 403, Laws of 1995.

Hearing Location: Office of SWCAA, 1308 N.E. 134th Street, Vancouver, WA 98685, on February 1, 2001, at 3:00 p.m.

Assistance for Persons with Disabilities: Contact Mary Allen by January 26, 2001, TDD (360) 574-3058.

Submit Written Comments to: Paul Mairose, 1308 N.E. 134th Street, Vancouver, WA 98685, fax (360) 574-3058, by January 19, 2001.

Date of Intended Adoption: February 1, 2001.

December 4, 2000

Robert D. Elliott

Executive Director

AMENDATORY SECTION (Amending WSR 99-07-028, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-101 Sources Exempt from Registration Requirements

[Statutory Authority: Chapter 70.94.141 RCW, and 70.94.163 RCW. Original Board adoption 12/17/68 (Regulation 1 Sec 4.08); Amended by Board 10/29/69 (Regulation 2 Sec 3.03); Amended by Board 12/18/79 (400-100(3)); Amended by Board 12/18/79; Amended by Board 4/17/84; 93-21-004 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-028 filed 3/10/99, effective 4/11/99]

All air contaminant emissions units shall be registered with the ((Authority)) Agency except for the emissions units listed in this section. In the event that a registered source has

any of these emissions units at a location that is otherwise required to be registered or obtain an operating permit, the ((Authority)) Agency may require that these emissions units be included on the permit or registration. However, registration fees shall not be assessed for any of the exempt emissions units. Any source exempted from registration under this section shall maintain sufficient documentation acceptable to the ((Authority)) Agency that the source is entitled to exemption under this section. Any source exempted from registration under this section shall also be considered exempt from the requirements of ((SWAPCA)) SWCAA 400-110, 400-111, 400-112, 400-113, and 400-114. For the purpose of identifying sources or emission units exempt from registration, the source's or emission unit's potential to emit shall be used as the basis for emissions and shall consider emissions before application of any control equipment. All exempt emission units shall be identified on an ~~Order of Authorization to Operate~~ inspection report for an otherwise registered source (refer to ((SWAPCA)) SWCAA 400-109). An exemption for an entire facility or source shall be valid only if the combined emissions from all emission units at that site or facility are less than 1.0 ton per year for criteria pollutants and VOCs and less than the Small Quantity Emission Rate for each toxic air pollutant identified in WAC 173-460. If any exemption threshold is exceeded for an emission unit or units, either individually or combined, the source or emission unit(s) shall not be considered to be exempt.

List of Exempt Emission Units or Sources as a Single Source or Emission Unit:

(1) Air conditioning or ventilating systems designed for space heating and cooling, combined or separate, that are less than 2.0 million Btu per hour which do not exhaust to the atmosphere contaminants generated by or released from process equipment.

(2) Any commercial or industrial manufacturing operation or business or process(es) associated with such operation or business which emits less than one ton per year combined of nitrogen oxides, carbon monoxide, PM₁₀, sulfur dioxide and volatile organic compounds from all emissions units combined. The one ton exemption does not apply to emissions of toxic air pollutants. Sources or emission units with emissions of toxic air pollutants to the ambient air may be exempted only if the annual emissions quantity for each toxic air pollutant is below the Small Quantity Emission Rate (annual rate) for each toxic air pollutant emitted as identified in WAC 173-460.

(3) Any commercial or industrial manufacturing operation or business or process(es) associated with such operation or business which is of insufficient stature to trigger a new source review fee assessment, from all emission units combined, as specified in Table A under ((SWAPCA)) SWCAA 400-110.

(4) Asphalt roofing and application equipment (not manufacturing or storage equipment).

(5) Fuel burning equipment unless waste-derived fuel is burned, which:

(a) is used solely for a private dwelling serving less than five families; or

- (b) has an energy input of less than 2 million Btu per hour.
- (6) Fuel burning equipment used exclusively for office space heating other than boilers.
- (7) Insecticide, pesticide or fertilizer spray equipment.
- (8) Laundering devices, dryers, extractors or tumblers for fabrics using water solutions of bleach and/or detergents.
- (9) Portable, manually operated welding, brazing or soldering equipment when used at other than the owner's principal place of business.
- (10) Welding stations involved solely in the repair and maintenance of a facility. This exemption does not extend to manufacturing operations where welding is an integral part of the manufacturing process.
- (11) Food preparation facilities, establishments or equipment.
- (12) Retail paint sales establishments (not including manufacturing).
- (13) Sampling connections used exclusively to withdraw materials for laboratory analyses and testing.
- (14) Sewing equipment.
- (15) Sources which due to the amount and nature of air contaminants produced and their potential to contribute to air pollution, are determined through review by the ((Authority)) Agency to not warrant registration; provided that, for new sources, such determination shall be based upon review of a Notice of Construction application.
- (16) Spray painting or blasting equipment used at a temporary location to clean or paint bridges, water towers, buildings or other structures.
- (17) Chemical and physical laboratory operations or equipment, including fume hoods and vacuum producing devices provided the emissions do not exceed those listed in ((SWAPCA)) SWCAA 400-101(2). This exemption applies to incidental fume hoods or laboratory equipment used by a source to perform in-house analyses that do not exceed the small quantity exemption of (2) above. This exemption does not apply to sources whose primary activity is chemical or physical laboratory operations.
- (18) Residential wood heaters.
- (19) Office equipment, operations and supplies.
- (20) Internal combustion including diesel engines used for standby emergency power generation ((which)) that are used less than 100 hours per year and are rated at less than 500 horsepower.
- (21) Steam cleaning equipment used exclusively for that purpose.
- (22) Refrigeration systems ((which)) that are not in air pollution control service.
- (23) Housekeeping activities and equipment.
- (24) Natural draft hoods, natural draft stacks, or natural draft ventilators for sanitary and storm drains, safety valves and storage tanks.
- (25) Natural and forced air vents and stacks for bathroom/toilet facilities.
- (26) Personal care activities.
- (27) Lawn and landscaping activities.
- (28) Flares used to indicate danger to the public.
- (29) Fire fighting and similar safety equipment and equipment used to train fire fighters.

(30) Materials and equipment used by, and activities related to operation of an infirmary provided that operation of an infirmary is not the primary business activity at the source in question.

Reviser's note: The typographical error in the above material occurred in the copy filed by the Southwest Clean Air Agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-028, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-105 Records, Monitoring and Reporting

[Statutory Authority: Chapter 70.94.141 RCW. Original Board adoption 12/18/79; Amended by Board 4/17/84 - renumbered to 400-170; Amended by Board (400-170) 12/16/86; 93-21-004 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-028 filed 3/10/99, effective 4/11/99]

The owner or operator of each registered source or emission unit shall maintain records of the type and quantity of emissions from the source and other information deemed necessary to determine whether the source is in compliance with applicable emission limitations, operating limitations, and control measures. Sources that are not subject to the registration requirements of ((SWAPCA)) SWCAA 400-100 because they are exempt under ((SWAPCA)) SWCAA 400-101 shall maintain records and other information necessary and sufficient to substantiate that their small quantity emissions are less than the applicable thresholds.

(1) **Emission inventory.**

(a) ~~When requested, t~~ Smaller sources. The owner(s) or operator(s) of ~~any all~~ any all air contaminant sources shall submit an inventory of emissions from the source each year to the ((Authority)) Agency. The inventory shall include stack and fugitive emissions of particulate matter, PM₁₀, sulfur dioxide, oxides of nitrogen, carbon monoxide, total reduced sulfur compounds (TRS), fluorides, lead, VOCs, and toxic air pollutants identified in WAC 173-460. The owner(s) or operator(s) shall maintain records of information necessary to substantiate any reported emissions, consistent with the averaging times for the applicable standards. Emission reports shall be submitted to the Agency no later than March 15 of each year for the previous calendar year.

(b) Larger sources. At a minimum, the sources satisfying the criteria of 40 CFR 51.320 et seq. (Subpart Q) will be submitted to EPA for inclusion in the national emission database. The emission inventory form supplied by the ((Authority)) Agency shall be completed and returned to the ((Authority)) Agency by ~~April~~ March 15th for the following sources:

(i) Sources with the potential to emit over 100 tons of criteria pollutants, 10 tons of a single hazardous air pollutant or 25 tons of combined hazardous air pollutants, sources subject to NSPS, except Subpart AAA, and sources subject to NES-HAPS, except Subpart M, sources are required to submit an emissions inventory. Only the hazardous air pollutants listed in Section 112 of the FCAA are considered for inclusion as hazardous air pollutant emissions for the purpose of deter-

mining those sources required to submit an emissions inventory.

(ii) In ozone nonattainment or maintenance plan areas, those sources that emit over 10.0 tons of VOCs per year or over 25.0 tons per year of NO_x are also required to submit emission inventories. Sources subject to this section are also required to submit average daily emissions or process throughput data for NO_x and VOCs for ozone season in preparation for the SIP update.

(iii) Sources with actual emissions or potential to emit greater than 50% of the Title V permit thresholds as identified in (i) above.

(iv) Synthetic minor or Title V opt out sources.

(2) **Monitoring.** The ((Authority)) Agency shall conduct a continuous surveillance program to monitor the quality of the ambient atmosphere as to concentrations and movements of air contaminants. As a part of this program, the Control Officer or an authorized representative may require any source under the jurisdiction of the ((Authority)) Agency to conduct stack and/or ambient air monitoring and to report the results to the ((Authority)) Agency.

(3) **Investigation of conditions.** Upon presentation of appropriate credentials, for the purpose of investigating conditions specific to the control, recovery, or release of air contaminants into the atmosphere, personnel from the ((Authority)) Agency shall have the power to enter at reasonable times upon any private or public property, excepting non-multiple unit private dwellings housing one or two families.

(4) **Continuous monitoring and recording.** Owners and operators of the following categories of sources shall install, calibrate, maintain and operate equipment for continuously monitoring and recording those emissions specified.

(a) Fossil fuel-fired steam generators.

(i) Opacity, except where:

(A) Steam generator capacity is less than two hundred fifty million Btu per hour heat input; or

(B) Only gaseous fuel is burned.

(ii) Sulfur dioxide, except where steam generator capacity is less than two hundred fifty million Btu per hour heat input or if sulfur dioxide control equipment is not required.

(iii) Percent oxygen or carbon dioxide where such measurements are necessary for the conversion of sulfur dioxide continuous emission monitoring data.

(iv) General exception. These requirements do not apply to a fossil fuel-fired steam generator with an annual average capacity factor of less than thirty percent, as reported to the Federal Power Commission for calendar year 1974, or as otherwise demonstrated to the ((Authority)) Agency by the owner(s) or operator(s).

(b) Sulfuric acid plants. Sulfur dioxide where production capacity is more than three hundred tons per day, expressed as one hundred percent acid, except for those facilities where conversion to sulfuric acid is utilized primarily as a means of preventing emissions to the atmosphere of sulfur dioxide or other sulfur compounds.

(c) Fluidized bed catalytic cracking units catalyst regenerators at petroleum refineries. Opacity where fresh feed capacity is more than twenty thousand barrels per day.

(d) Wood residue fuel-fired steam generators.

(i) Opacity, except where steam generator capacity is less than one hundred million Btu per hour heat input.

(ii) Continuous monitoring equipment. The requirements of ((SWAPCA)) SWCAA 400-105(54)(e) do not apply to wood residue fuel-fired steam generators, but continuous monitoring equipment required by ((SWAPCA)) SWCAA 400-105 (54)(d) shall be subject to approval by the ((Authority)) Agency.

(e) Owners and operators of those sources required to install continuous monitoring equipment under this section shall demonstrate to the ((Authority)) Agency, compliance with the equipment and performance specifications and observe the reporting requirements contained in 40 CFR Part 51, Appendix P, Sections 3, 4 and 5, and 40 CFR 60 Appendices B through F, as appropriate, as in effect ((August)) July 1, ((1998)) 2000 which is adopted by reference.

(f) Special considerations. If for reason of physical plant limitations or extreme economic situations, the ((Authority)) Agency determines that continuous monitoring is not a reasonable requirement, alternative monitoring and reporting procedures shall be established on an individual basis. Alternative monitoring and reporting procedures may include continuous monitoring of process/operational parameters as a surrogate to continuous emissions monitoring and/or stack tests conducted at a frequency sufficient to determine compliance with applicable regulations and permit requirements as well as to quantify emissions.

(g) Exemptions. This subsection (5) does not apply to any source which is:

(i) Subject to a new source performance standard. NSPS sources shall be governed by ((SWAPCA)) SWCAA 400-115.

(ii) Not subject to an applicable emission standard.

(h) Monitoring system malfunctions. A source may be temporarily exempted from the monitoring and reporting requirements of this section during periods of monitoring system malfunctions provided that the source owner(s) or operator(s) shows to the satisfaction of the ((Authority)) Agency that the malfunction was unavoidable and is being repaired as expeditiously as practicable.

(5) **Change in raw materials or fuels for sources not subject to requirements of the Operating Permit Program.** Any change or series of changes in raw material or fuel which will result in a cumulative increase in emissions of sulfur dioxide of forty tons per year or more over that stated in the initial inventory required by ((SWAPCA)) SWCAA 400-105(1) shall require the submittal of sufficient information to the ((Authority)) Agency to determine the effect of the increase upon ambient concentrations of sulfur dioxide. The ((Authority)) Agency may issue regulatory orders requiring controls to reduce the effect of such increases. Cumulative changes in raw material or fuel of less than 0.5 percent increase or decrease in average annual sulfur content over the initial inventory shall not require such notice.

(6) **Misrepresentation.** No person shall make any false material statement, representation or certification in any form, notice, or report required under Chapter 70.94 or 70.120 RCW, or any ordinance, resolution, regulation, permit or order in force pursuant thereto.

(7) **Tampering.** No person shall render inaccurate any monitoring device or method required under Chapter 70.94 or 70.120 RCW, or any ordinance, resolution, regulation, permit, or order in force pursuant thereto.

Reviser's note: The typographical errors in the above material occurred in the copy filed by the Southwest Clean Air Agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-028, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-106 Emission Testing at Sources

[Statutory Authority: Chapter 70.94.141 RCW. Original Board adoption - 99-07-028 filed 3/10/99, effective 4/11/99]

(1) **Requirement to Test.** The ((Authority)) Agency may conduct or require that emission testing be conducted of the source or any emissions unit within the jurisdiction of the ((Authority)) Agency to determine compliance, evaluate control equipment performance, evaluate RACT or quantify emissions.

(2) **Test Methods.** Any required source emission testing shall be performed using appropriate sampling and analytical methods as approved in advance by the ((Authority)) Agency including, but not limited to, approved EPA methods from 40 CFR 51, 60, ((Appendix A)) 61, and 63 which are hereby adopted by reference, Opacity Determination Method ((SWAPCA)) SWCAA Method 9 - Appendix A to ((SWAPCA)) SWCAA 400), Oregon Department of Environmental Quality (DEQ) Method 8 "Sampling Particulate Emissions from Stationary Sources (High Volume Method)" hereby adopted by reference, or alternate procedures approved in writing by the ((Authority)) Agency.

(3) **Accommodations for Sampling.** The operator of a source shall provide the necessary platform and sampling ports for ((Authority)) Agency personnel or others to perform a test of an emissions unit. The ((Authority)) Agency shall be allowed to obtain a sample from any emissions unit. The operator of the source shall be given an opportunity to observe the sampling and to obtain a sample at the same time.

(4) **Notification.** The owner or operator of a source shall notify the ((Authority)) Agency in writing at least 2 weeks (10 business days) prior to any required emissions test and provide the ((Authority)) Agency an opportunity to review the test plan. ((Authority)) Agency personnel shall be informed at least three days prior to testing so that they have an opportunity to be present during testing.

(5) **Test Duration.** A minimum of three test runs one hour in length shall be performed at normal operating conditions unless otherwise approved in advance to establish that collected data is representative of normal operations. The source shall be operated at or near its maximum rated capacity during testing. Compliance shall be determined by averaging the results of the individual test runs.

(6) **Records.** A complete record of production related parameters including startups, shutdowns, and adjustments

shall be kept during emissions testing to correlate operations with emissions and shall be recorded in the final test report.

(7) **Reports.** Results of all required source or emissions testing shall be submitted to the ((Authority)) Agency within 45 days of test completion. Measured concentrations for combustion and incineration sources shall be corrected as provided in ((SWAPCA)) SWCAA 400-050(3). The report shall include:

(a) A description of the source including manufacturer, model number and design capacity of the equipment, and the location of the sample ports or test locations.

(b) Time and date of the test and identification and qualifications of the personnel involved.

(c) A summary of results, reported in units and averaging periods consistent with the applicable emission standard or limit.

(d) A summary of control system or equipment operating conditions.

(e) A summary of production related parameters.

(f) A description of the test methods or procedures used including all field data, quality assurance/quality control procedures and documentation.

(g) A description of the analytical procedures used including all laboratory data, quality assurance/quality control procedures and documentation.

(h) Copies of field data and example calculations.

(i) Chain of custody information.

(j) Calibration documentation.

(k) Discussion of any abnormalities associated with the results.

(l) A statement signed by the senior management official of the testing firm certifying the validity of the source test report.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 95-17-084, filed 8/21/95, effective 9/21/95)

((SWAPCA)) SWCAA 400-107 Excess Emissions

[Statutory Authority: Chapter 70.94.141 RCW. Original Board adoption 12/17/68 (Regulation 1 Sec 4.07 & 4.08); Amended by Board 10/29/69 (Regulation 2 Sec 5.07); 93-21-004 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95]

(1) The owner or operator of a source shall have the burden of proving to the ((Authority)) Agency or the decision-making entity (e.g., Pollution Control Hearings Board) in an enforcement action that excess emissions were unavoidable. This demonstration shall be a condition to obtaining relief under subsections (4), (5) and (6) of this section.

(2) Excess emissions determined by the ((Authority)) Agency to be unavoidable under the procedures and criteria in this section shall be excused and not subject to penalty.

(3) Excess emissions shall be reported to the ((Authority)) Agency as soon as possible. Upon request by the ((Authority)) Agency, the owner(s) or operator(s) of the source(s) shall submit a full written report including the known causes, the corrective actions taken, and the preven-

tive measures to be taken to minimize or eliminate the chance of recurrence.

(4) Excess emissions due to startup or shutdown conditions shall be considered unavoidable provided the source reports as required under subsection (3) of this section and adequately demonstrates that the excess emissions could not have been prevented through careful planning and design and if a bypass of control equipment occurs, that such bypass is necessary to prevent loss of life, personal injury, or severe property damage.

(5) Excess emissions due to scheduled maintenance shall be considered unavoidable if the source reports as required under subsection (3) of this section and adequately demonstrates that the excess emissions could not have been avoided through reasonable design, better scheduling for maintenance or through better operation and maintenance practices.

(6) Excess emissions due to upsets shall be considered unavoidable provided the source reports as required under subsection (3) of this section and adequately demonstrates that:

(a) The event was not caused by poor or inadequate design, operation, maintenance, or any other reasonably preventable condition;

(b) The event was not of a recurring pattern indicative of inadequate design, operation, or maintenance; and

(c) The operator took immediate and appropriate corrective action in a manner consistent with good air pollution control practice for minimizing emissions during the event, taking into account the total emissions impact of the corrective action, including slowing or shutting down the emission unit as necessary to minimize emissions, when the operator knew or should have known that an emission standard or permit condition was being exceeded; and

(d) The owner or operator(s) actions in response to the excess emissions were documented by properly signed, contemporaneous operating logs, or other relevant evidence.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The typographical errors in the above material occurred in the copy filed by the Southwest Clean Air Agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-027, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-109 Notice of Construction Application

[Statutory Authority: Chapter 70.94.141 RCW. Original Board adoption 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-027 filed 3/10/99, effective 4/11/99]

(1) **Purpose.** A Notice of Construction (NOC) application is the document or form used by the ((Authority)) Agency to record and track requests from individual sources, registered and non-registered, for the purpose of obtaining information regarding proposed changes or activities at a source. Confidential information shall be identified as set forth in ((SWAPCA)) SWCAA 400-270. Changes may include modifications, alterations, changes to process or con-

trol equipment, establishment of emission limits, and installation of new sources.

(2) **Applicability.**

(a) A Notice of Construction application consistent with ((SWAPCA)) SWCAA 400-110 shall be submitted for all new installations, modifications, changes, and alterations to process and emission control equipment consistent with the definition of new source.

(b) Submittal of a Notice of Construction application shall not automatically impose New Source Review requirements for meeting emissions standards (including, but not limited to: NSPS, NESHAPs, any ambient air quality standard, etc.).

(3) **Types of Applications.** A Notice of Construction application may be submitted for, but not be limited to, the following activities:

(a) New construction or installation.

(b) Change of existing approved emission limits (including Title V opt-out requests - ((SWAPCA)) SWCAA 400-091).

(c) Review of existing or installed equipment operating without prior approval.

(d) Modification, alteration or replacement of existing process or control equipment.

(e) Change of registered owner (purchase or sale of source, facility or equipment).

(f) Change of location of operations of existing portable and stationary equipment.

(g) Review of existing equipment with an expired or lapsed approval or registration.

(h) Review of a case-by-case RACT, BACT, MACT or other similar determination.

(i) Other activities as identified by the ((Authority)) Agency.

(4) **Fees.** A fee consistent with the fee schedule (Tables A and B) provided in ((SWAPCA)) SWCAA 400-110 shall be paid by the owner or operator to the ((Authority)) Agency prior to review of the Notice of Construction application by the ((Authority)) Agency.

(5) ((Authority)) Agency Actions. Each acceptable and complete Notice of Construction application shall have an Order of Approval or other applicable order issued by the ((Authority)) Agency. A Notice of Construction for a gasoline dispensing station shall be submitted and approved as provided in ((SWAPCA)) SWCAA 400-110(8). The requirements of SEPA (State Environmental Policy Act) shall be complied with for each Notice of Construction. Demonstration of completion of an environmental checklist as provided in WAC 197-11 shall be submitted with each Notice of Construction. Issuance of regulatory orders for all Notice of Construction applications shall be consistent with the requirements of ((SWAPCA)) SWCAA 400-110. Requirements for New Source Review are provided in ((SWAPCA)) SWCAA 400-110, 400-111, 400-112, 400-113 & 400-114. A Notice of Construction application may be withdrawn prior to issuance of a final regulatory order by the ((Authority)) Agency as provided in (6) below; or an application may be determined by the ((Authority)) Agency to be exempt as provided under 400-100, 400-101, or 400-110. An application deter-

mined to be exempt will be processed as identified in (6) below.

(6) Withdrawal or Exempt.

(a) A Notice of Construction application may be withdrawn by the applicant at any time prior to issuance of a regulatory order. The applicant must provide a written and signed request to the ((Authority)) Agency indicating their desire to withdraw a Notice of Construction application, and certification that the proposed equipment or modification will not be installed, constructed, or operated without prior review and approval from the ((Authority)) Agency. The ((Authority)) Agency shall provide written response to acknowledge withdrawal of the application.

(b) After review by the ((Authority)) Agency, an application may be determined to be exempt from the registration requirements of ((SWAPCA)) SWCAA 400-100 and New Source Review requirements of ((SWAPCA)) SWCAA 400-110. Written notification shall be provided by the ((Authority)) Agency to the applicant for all applications that are determined to be exempt. For withdrawn or exempt applications, filing fees will not be refunded to the applicant. Review fees, if provided with the application, may be refunded, upon request, provided that substantial time has not been expended by the ((Authority)) Agency for review of the Notice of Construction application.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-030, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-110 New Source Review

[Statutory Authority: Chapter 70.94.141 RCW, and 70.94.152 RCW. Original Board adoption 12/17/68 (Regulation 1 Sec 3); Amended by Board 12/18/79; Amended by Board 8/18/81; Amended by Board 3/20/84; 92-06-015 filed 2/25/92, effective 3/25/92; 93-21-004 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-030 filed 3/10/99, effective 4/11/99]

(1) Applicability.

(a) New Source Review (NSR) means that if the new source, modification or substantial alteration or replacement, meets the definition of "new source" then that new source or modification must demonstrate that all applicable emission standards have been or will be met by the proposed modification or new source. A complete Notice of Construction application shall be submitted for each source required to submit an application under the requirements of this section. Confidential information shall be identified as set forth in ((SWAPCA)) SWCAA 400-270.

Before the ((Authority)) Agency may review a Notice of Construction application, a filing fee of \$300.00 and a review fee, as shown in Table A shall be submitted by the applicant. If offsetting emission reductions or other types of review identified in Table B are required to be performed by the ((Authority)) Agency as a result of the proposed installation, alteration, or modification, an additional review fee shall be paid. (Total Fee = Filing Fee + Review Fee [Table A] + Additional Review Fee [Table B]).

Notice of Construction application review fees based on emissions are to utilize actual or approved emissions, after

controls, as supported by test data or emission factors, not potential to emit. Other review fees as noted in the fee tables are based on design capacities of the source equipment. Where a source may fall under multiple categories, only one fee per application shall apply; Table A fees are not considered additive as they apply to an application. In general, the fee determination shall be based on the primary emission unit or activity of the new, modified or altered source.

TABLE A
Notice of Construction Application Review Fees

i. Fuel Burning Equipment (Million Btu/hr heat input @ design capacity):			
	((2-or-more-but)) ((4)) Less than 5	\$	300.00
	5 or more but less than 10		400.00
	10 or more but less than 30		550.00
	30 or more but less than 50		700.00
	50 or more but less than 100		1200.00
	100 or more but less than 250		2,500.00
	250 or more but less than 500		4,000.00
	500 or more		6,000.00
ii. Discharge from control equipment or from uncontrolled process equipment (Actual Cubic Feet per Minute - ACFM):			
	Less than 50	\$	300.00
	50 or more but less than 5,000		400.00
	5,000 or more but less than 20,000		500.00
	20,000 or more but less than 50,000		600.00
	50,000 or more but less than 100,000		700.00
	100,000 or more but less than 250,000		1,000.00
	250,000 or more but less than 500,000		2,000.00
	500,000 or more		4,000.00
iii. Refuse Burning Equipment (Incinerators)(Tons/day):			
	0.5 or more but less than 5	\$	500.00
	5 or more but less than 12		1,000.00
	12 or more but less than 250		3,000.00
	250 or more		4,000.00
iv. Storage Tanks, Reservoirs, or Containers (Gallons-total capacity): (Other than gasoline or diesel fuel dispensing facilities)			
	250 or more but less than 10,000	\$	300.00
	10,000 or more but less than 40,000		700.00
	40,000 or more but less than 100,000		1,000.00
	100,000 or more		2,000.00
v. Gasoline Dispensing Facilities			
	Stage I	\$	300.00
	Stage II		400.00
	Stages I & II, combined		500.00
	Toxics review for gasoline facility		1500.00
	Stage II removal		300.00

PROPOSED

vi.	Other (Not classified in Subsection i., ii., iii., or iv. above)	\$ 200.00/ton of emission
vii.	Toxic Air Contaminants	\$200.00 up to one ton and \$100.00 for each additional ton
viii.	Major Source or Major Modification	\$ 5,000.00
ix.	Synthetic minor application (including, but not limited to: Title V, HAP)	Not to exceed \$5,000.00
x.	Particulate Matter and Fugitive Emissions from Rock Crushing, Material Transfer and Ship Loading (Emissions - tons per year)	
	((+0 or more but)) less than or equal to 10	\$ 300.00
	More than 10 but less than or equal to 50	700.00
	More than 50 but less than or equal to 100	1,000.00
	More than 100 but less than 250	2,500.00
	250 or greater	5,000.00
xi.	Modifications to an Existing Order	\$ 300.00
xii.	Installation or Operation of a Temporary, Substitute or Emergency Source	\$ 500.00
<u>xiii.</u>	<u>Dry cleaner</u>	<u>\$ 300.00</u>
<u>xiv.</u>	<u>Standby diesel generators</u>	<u>\$ 400.00</u>
<u>xv.</u>	<u>Crematory/Small Incinerators/Small Flares</u>	<u>\$ 400.00</u>
<u>xvi.</u>	<u>Gluing/flow coating operations without active ventilation</u>	<u>\$ 500.00</u>
<u>xvii.</u>	<u>Soil remediation</u>	<u>\$ 500.00</u>

**TABLE B
Other Review Fees**

The following fees are considered additive to the filing and review fees assessed for Notice of Construction applications (Table A). These fees apply to activities that may be requested of and performed by the ((Authority)) Agency with or without submittal of a Notice of Construction application and are not part of the activities normally performed by the ((Authority)) Agency as part of the Notice of Construction application review.

((xiii)) <u>xviii.</u>	Emission Offset Analysis or Bubble	\$ 400.00
((xiv)) <u>xix.</u>	Emission Reduction Credit (ERC) Application (Deposit or withdrawal)	\$ 400.00
((xv)) <u>xx.</u>	State Environmental Policy Act (SEPA) - Lead Agency	\$ 1000.00
((xvi)) <u>xxi.</u>	Environmental Impact Statement (EIS) Review	\$ 500.00
((xvii)) <u>xxii.</u>	RACT/BACT/MACT/BART/LAER Determination	\$ 50.00/hr
((xviii)) <u>xxiii.</u>	Variance request	\$ 500.00

(b) A Notice of Construction application that meets the minimum requirements for New Source Review must be filed by the owner or operator and an Order of Approval issued by the ((Authority)) Agency prior to the establishment of any new source or emission unit or modification which is listed in ((SWAPCA)) SWCAA 400-100 or required to obtain an Operating Permit under RCW 70.94.161.

(c) The ((Authority)) Agency may require that:

(i) a Notice of Construction application be filed by the owner or operator of a proposed new source or modification,

(ii) the source meets all New Source Review requirements, and

(iii) an Order of Approval be issued by the ((Authority)) Agency prior to the establishment of any new source or emission unit or modification, other than a single family or a duplex dwelling.

(d) New Source Review of a modification shall be limited to the emission unit or units proposed to be added to an existing source or modified and the air contaminants whose emissions would increase as a result of the modification.

(e) New Source Review is not required for those sources whose facility wide combined emissions (potential to emit) do not exceed the limits specified in ((SWAPCA)) SWCAA 400-101 or whose emission unit capacities are less than the minimum quantities specified in Table A of ((SWAPCA)) SWCAA 400-110 (1)(a). The owner or operator of an exempt facility shall maintain sufficient documentation acceptable to the ((Authority)) Agency to substantiate that the source is entitled to exemption under this section. An emission unit exempt from registration under ((SWAPCA)) SWCAA 400-100 or 400-101 may be exempt from New Source Review requirements.

(f) New Source Review is not required when the following conditions are met:

(i) Performance of routine maintenance or repair that involves the replacement of like-in-kind air pollution control equipment or controls. This includes upgrades of parts or components where due to wear or breakage, parts or components must be replaced and exact replacement parts or components are no longer available from the original equipment manufacturer or after market vendors. In no case shall the replacement parts result in an increase in actual emissions above allowable emissions;

(ii) A process change is made that does not result in an emission of a different type not previously approved or an increase in capacity and total air pollutant emissions;

(iii) A process change is made that does not result in an emission of a different type of toxic air pollutant, as provided in WAC 173-460, not previously approved and individual toxic air pollutant emissions do not exceed the Small Quantity Emission Rates specified in the Small Quantity Emission Rate tables in WAC 173-460-080 (annual rate);

(iv) A raw material composition change that does not result in individual toxic air pollutant emissions that exceed the Small Quantity Emission Rates specified in the Small Quantity Emission Rate tables in WAC 173-460-080 (annual rate);

(g) Any source required to submit a Notice of Construction application for New Source Review is required to demonstrate that all applicable emission standards have been or

PROPOSED

will be met by the proposed modification or new source. Examples of applicable emissions standards may include, but not be limited to: RACT, BACT, LAER, BART, MACT, NSPS, NESHAPS, and any ambient air quality standards as

identified in Table C below. Requirements for new and modified sources and replacement or alteration of control equipment are further addressed in ((SWAPGA)) SWCAA 400-111, 400-112, 400-113, 400-114, and 400-151.

TABLE C

Emission Concentration Regulatory Standards and Significance Levels

Pollutant	Averaging Period	Class II Significant Impact Criteria $\mu\text{g}/\text{m}^3$ (ppm)	Class I PSD Increments $\mu\text{g}/\text{m}^3$ (ppm)	Class II PSD Increments $\mu\text{g}/\text{m}^3$ (ppm)	NAAQS		Washington
					Primary Ambient Standards $\mu\text{g}/\text{m}^3$ (ppm)	Secondary Ambient Standards $\mu\text{g}/\text{m}^3$ (ppm)	Ambient Standards $\mu\text{g}/\text{m}^3$ (ppm)

	24-Hour ⁱ	5	—	30	150 ^b	150 ^b	150 ^b
Particulate Matter less than 2.5 μm (40 CFR Part 50) (62 FR 38652)	Annual ^g	—	—	—	15	15	—
	24-Hour ^h	—	—	—	65	65	—
Lead	Quarterly Average	—	—	—	1.5	1.5	1.5

$\mu\text{g}/\text{m}^3$ = micrograms per cubic meter; ppm = parts per million

^a Never to be exceeded.

^b Not to be exceeded more than once per year.

^c This is not a standard, rather it is to be used as a guide in assessing whether implementation plans will achieve the 24-hour standard.

^d Also, 0.25 ppm not to be exceeded more than twice in seven days.

^e Not to be exceeded on more than 1 day per calendar year as provided in WAC 173-475

^f Based on the three year average of the annual fourth-highest daily maximum 8-hour average ozone concentration at each monitor.

^g Based on the 3-year average of annual arithmetic mean PM_{2.5} concentrations.

^h Based on the 3-year average of the 98th percentile of 24-hour PM_{2.5} concentrations at each monitor within an area.

ⁱ Based on the 99th percentile of 24-hour PM₁₀ concentrations at each monitor.

Annual standards never to be exceeded; short term standards not to be exceeded more than once per year unless otherwise noted.

Sources include the EPA New Source Review Workshop Manual, 40 CFR 52.21 and individual WAC Chapters.

The significant impact criteria are used to determine if a proposed project or modification will cause a significant deterioration in ambient air quality for Class II areas. If a

proposed project impacts (i.e., changes in ambient concentrations resulting from the proposed project or modification alone) are predicted to be less than the significant impact cri-

PROPOSED

teria, then the air quality analysis is complete at that point. If the ambient impact of a proposed project or modification exceeds these levels, compliance with available PSD increments and AAQS must then be demonstrated. If a proposed project or modification exceeds the significant ambient concentrations for Class II areas, monitoring of existing ambient air quality may be required if data sufficient to characterize background air quality are not available.

(2) **Completeness determination.** Within thirty (30) calendar days of receipt of a Notice of Construction application, the ((Authority)) Agency shall either notify the applicant in writing that the application is complete or notify the applicant in writing of all additional information necessary, based upon review of information already supplied, to complete the application as provided under RCW 70.94.152. For a project subject to PSD review under ((SWAPCA)) SWCAA 400-141 a completeness determination includes a determination that the application provides all information required to conduct PSD review. The ((Authority)) Agency may request additional clarification of information submitted from the source after a completeness determination has been made for a Notice of Construction application.

(3) **Final determination/Regulatory Orders.**

(a) Within sixty (60) calendar days of receipt of a complete application, the ((Authority)) Agency shall either issue a final decision on the application or, for those projects subject to public notice, issue a preliminary determination and initiate notice and comment procedures under ((SWAPCA)) SWCAA 400-171 on a proposed decision, followed as promptly as possible by a final decision. An owner or operator seeking to construct or modify a source that requires an operating permit may elect to integrate review of the operating permit application or amendment required under RCW 70.94.161 and the Notice of Construction application required by this section. A Notice of Construction application designated for integrated review shall be processed in accordance with WAC 173-401 procedures and deadlines.

(b) Every final determination on a Notice of Construction application that results in the issuance of an Order of Approval by the ((Authority)) Agency shall be reviewed and signed prior to issuance by a professional engineer or staff under the direct supervision of a professional engineer in the employ of the ((Authority)) Agency.

(c) If the new source is a major stationary source or the change is a major modification, the ((Authority)) Agency shall submit any control technology determination(s) included in a final Order of Approval to the RACT/BACT/LAER clearinghouse maintained by EPA.

(4) **Appeals.** An Order of Approval, any conditions contained in an Order of Approval, the denial of a Notice of Construction application, or any other regulatory order issued by the ((Authority)) Agency, may be appealed to the Board of Directors as specified in ((SWAPCA)) SWCAA 400-220 of this regulation or appealed directly to the Pollution Control Hearings Board within 30 calendar days of receipt as provided in Chapter 43.21B RCW. The ((Authority)) Agency shall promptly mail copies of each order approving or denying a Notice of Construction application to the applicant and to any other party who submitted timely comments on the

application, along with a notice advising the parties of their rights of appeal to the Pollution Control Hearings Board and, where applicable, to the EPA Environmental Appeals Board.

(5) **Portable sources.** For portable sources which locate temporarily at particular sites, the owner(s) or operator(s) shall be allowed to operate at the temporary location without filing a Notice of Construction application for each location provided that:

(a) The source/emissions units are registered with the ((Authority)) Agency.

(b) The source/emissions units have an Order of Approval as a portable source.

(c) The owner(s) or operator(s) notifies the ((Authority)) Agency of intent to operate at the new location at least ten business days prior to starting the operation.

(d) The owner(s) or operator(s) supplies sufficient information including production quantities and hours of operation, to enable the ((Authority)) Agency to determine that the operation will comply with the emission standards for a new source, and will not cause a violation of applicable ambient air quality standards and, if in a nonattainment area, will not interfere with scheduled attainment of ambient standards.

(e) The owner(s) and/or resident(s) of immediately adjacent properties shall be notified by the owner(s) or operator(s) of the portable source in writing at least 10 business days prior to commencement of operations at the proposed location with copies mailed to the ((Authority)) Agency. Written notification to the adjacent landowners/residents shall be by certified mail with return receipt requested. Such written notification shall include a complete description of the proposed operation, the associated emissions control provisions and equipment, the total estimated project emissions, the name, address and phone number of the person in charge of the operation, and the address and phone number for ((SWAPCA)) SWCAA. Written notification shall indicate that all comments shall be directed to the ((Authority)) Agency.

Sources that do not operate within the jurisdiction of the Agency for a period of more than 5 years shall be considered to be nonoperational and will be removed from active registration. Any such source shall be required to go through new source review prior to operating again within the jurisdiction of the Agency consistent with the definition of new source.

(6) **Compliance.** Noncompliance with any emission limit, test requirement, reporting requirement or other requirement identified in a regulatory order issued pursuant to this section shall be considered a violation of this section.

(7) **Expiration.** Approval to construct or modify a stationary source shall become invalid if construction is not commenced within eighteen months after the date of issuance of an Order of Approval, if construction is discontinued for a period of eighteen months or more, or if construction is not completed within a reasonable time. The ((Authority)) Agency may extend the eighteen-month period upon a satisfactory demonstration that an extension is justified. This provision does not apply to the time period between construction of the approved phases of a phased construction project; each phase must commence construction within eighteen months of the projected and approved commencement date. The

((Authority)) Agency may specify an earlier date for commencement of construction in an Order of Approval.

(8) Temporary, Emergency, or Substitution Sources.

(a) A temporary source shall be considered to be a new source. The ((Authority)) Agency may require that a Notice of Construction application and applicable review fees be submitted before reviewing a request for a temporary, emergency or substitution source. The ((Authority)) Agency may provide approval for special situations for a source without meeting the requirements for New Source Review when one or more of the following conditions are met:

(i) The temporary source is needed to replace a previously approved similar source where the approved source is non-functional due to breakdown or other similar circumstances beyond the control of the owner or operator. This may include replacement steam or power supply units where facilities have an immediate need to continue production or service to public or private industries, or have a need for an extended or unscheduled shutdown of equipment that is of a duration not otherwise planned for. The ((Authority)) Agency may provide written approval for a temporary source that may include but not be limited to emission limits, operational or maintenance requirements or limitations, monitoring and reporting requirements, and testing requirements. Installation of a temporary source due to poor or improper maintenance or operations is required to submit a Notice of Construction application for permanent replacement within 30 days of installation.

(ii) The temporary source is necessary to support public or private needs in the event of a local or regional disaster when proper planning could not be accommodated. In no event shall the temporary source be authorized for operations for durations greater than three months. Written approval shall be provided by the ((Authority)) Agency that may contain, but not be limited to: emission limits, operation and maintenance requirements and limitations, monitoring and reporting requirements, and testing requirements. For operations greater than three months the owner or operator shall submit a Notice of Construction application under New Source Review requirements ((SWAPCA)) SWCAA 400-110) for approval from the ((Authority)) Agency.

(iii) The temporary source is a one time special need, urgent application, that can not otherwise be accommodated through the New Source Review process due to the critical nature of the source and time constraints. As a condition of approval under this expedited approval process, a new source of this type could not request to be allowed or expected to operate within the jurisdiction of the ((Authority)) Agency for the following three years. Written approval shall be provided by the ((Authority)) Agency that may contain but not be limited to: emission limits, operation and maintenance requirements and limitations, monitoring and reporting requirements and testing requirements. In no case shall approval be provided for operation greater than three months. For operations greater than three months, the owner or operator shall submit a Notice of Construction application under the New Source Review requirements of ((SWAPCA)) SWCAA 400-110.

(b) An emergency source is the result of an emergency situation that could not otherwise be planned for. The ((Authority)) Agency shall provide written approval for an emergency source provided that the owner or operator has provided sufficient documentation or demonstration of the need for the source to the satisfaction of the Control Officer. The written approval may include but not be limited to: emission limits, operation and maintenance requirements and limitations, monitoring and reporting requirements, and testing requirements. In no case shall approval be provided for operations greater than three months.

(c) A substitute source is the same as a temporary source as in (a) above. A substitute source may be of a different manufacturer and model number and size and may result in increased emissions from installation from previously approved equipment on a short-term basis. The ((Authority)) Agency shall provide written approval for a substitute source that may include but not be limited to: emission limits, operational or maintenance requirements or limitations, monitoring and reporting requirements, and testing requirements. In no event shall the substitute source be authorized for operations for durations greater than three months. For operations greater than three months, the owner or operator shall submit a Notice of Construction application under the New Source Review requirements of ((SWAPCA)) SWCAA 400-110.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-028, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-111 Requirements for Sources in a Maintenance Plan Area

[Statutory Authority: Chapter 70.94.141 RCW. Original Board adoption 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-028 filed 3/10/99, effective 4/11/99]

Any person proposing to install, construct or operate a new source or emission unit or make a modification to an existing source or emission unit shall file a Notice of Construction application with the ((Authority)) Agency in accordance with ((SWAPCA)) SWCAA 400-109 and shall be subject to the New Source Review provisions of ((SWAPCA)) SWCAA 400-110. Confidential information shall be identified as set forth in ((SWAPCA)) SWCAA 400-270. A Notice of Construction application to establish a new source or make a modification to a source in an area that is covered by a maintenance plan, shall result in the issuance of an Order of Approval or other regulatory order. Such order shall contain such conditions as are reasonably necessary to assure the maintenance of compliance with this section, if it is determined that the proposed project satisfies all of the requirements of this section. New sources or modifications within a designated maintenance plan area, including sources of VOC or NO_x in a designated ozone maintenance plan area, shall meet the requirements listed below.

(1) **Emission Standards.** The proposed new source or modification shall:

(a) comply with all applicable New Source Performance Standards, National Emission Standards for Hazardous Air

PROPOSED

Pollutants, emission standards adopted under Chapter 70.94 RCW and, the applicable emission standards of the ((Authority)) Agency; and

(b) not cause any ambient air quality standard as provided in ((SWAPCA)) SWCAA 400-113(3) to be exceeded; and

(c) not violate the requirements for reasonable further progress established by the Washington State Implementation Plan; and

(d) minimize emissions to the extent that the new source or modification will not delay the attainment date for a non-attainment area, exceed emission levels or other requirements provided in a maintenance plan for an area that was previously identified as a nonattainment area, nor cause or contribute to a violation of any ambient air quality standard.

(2) **BACT.** Except as provided in Section (7) of this section, the owner or operator of the proposed new source or modification shall apply BACT for each pollutant. In the case of a modification, the requirement for BACT shall apply to each new or modified emission unit which increases emissions. For phased construction projects, the determination of BACT shall be reviewed at the latest reasonable time prior to commencement of construction of each independent phase.

(3) **Source Compliance.** The owner or operator of the proposed new source or modification shall certify that all sources owned or operated by such person (or by an entity controlling, controlled by, or under common control with such person) in Washington are in compliance or on a schedule for compliance, with all applicable emission limitations and standards under the Washington Clean Air Act (RCW 70.94).

(4) **Offsets or Growth Allowance.** The owner or operator of a proposed new major source or major modification shall provide offsets as specified in Section (8) of this section. Except as provided in Section (7) of this section, the requirements of this Section may be met in whole or in part in an ozone maintenance plan area with an allocation by ((SWAPCA)) SWCAA from a growth allowance, if available, in accordance with Section (8) of this section and the applicable maintenance plan in the SIP adopted by the Board and approved by EPA.

(5) **Net Air Quality Benefit.** For cases in which emission reduction or offsets are required in accordance with Section (4) above, the applicant shall demonstrate that a net air quality benefit will be achieved in the maintenance plan area. If the proposed new source or the proposed modification is major for the contaminant for which the area has a maintenance plan, allowable emissions of the maintenance pollutant from the proposed new source or modification shall be offset by reductions in actual emissions of the maintenance pollutant. All offsetting emission reductions must satisfy the following requirements of Section (8).

(6) **Alternative Analysis.**

(a) Except as provided in Subsection (c) of this section, the owner or operator of a proposed major source or major modification shall conduct an alternatives analysis;

(b) This analysis shall include an evaluation of alternative sites, sizes, production processes, and environmental control techniques for such proposed source or modification

((which)) that demonstrates that benefits of the proposed source or modification significantly outweigh the environmental and social costs imposed as a result of its location, construction or modification;

(c) This analysis shall not be required for a major source or major modification that is subject to this rule due to emissions of particulate matter in a designated TSP maintenance area.

(7) **Contingency Plan Requirements.** If the contingency plan in an applicable maintenance plan (CO or ozone) has been triggered due to a violation of an ozone ambient air quality standard or a second violation of the CO ambient air quality standard, this Section shall apply in addition to other requirements of this rule and the applicable approved maintenance plan adopted by the Board and approved by EPA as a revision to the SIP.

(a) The requirements for BACT in Section (2) of this Section shall be replaced by a requirement for LAER. If the new source is a major stationary source or the proposed modification is a major modification, it must achieve LAER for the maintenance pollutant and for which the proposed new source or modification is major.

(b) An allocation from a growth allowance shall not be used to meet the requirement for offsets in Section (4) of this Section. The growth allowance emissions shall be unavailable until such time as sufficient demonstration is made to reinstate the growth allowance emissions.

(8) **Industrial Growth Allowance and Offset Allocation.**

(a) Industrial growth allowances for sources in a maintenance plan area are identified in and governed by the Washington State Implementation Plan and the applicable maintenance plan for the applicable maintenance plan area.

(b) The growth allowance emissions may be increased or decreased as provided in a revision to the maintenance plan submitted to and approved by EPA. In the event of a confirmed ozone violation, the growth allowance for VOC and NO_x emissions shall be eliminated and new sources shall be required to implement LAER and offsets. Growth allowance emissions may be reinstated as provided in the EPA approved maintenance plan.

(c) The owner or operator of a proposed new major source or major modification emitting VOCs or NO_x, may obtain a portion of any remaining emissions in the respective growth allowance in accordance with the following process:

(i) Access is on a first-come-first-served basis, based on the date of a complete notice of construction and allowance allocation request;

(ii) No single source may receive an emissions allocation of more than 50% of any remaining growth allowance, or up to 10.0 tons per year, which ever is greater. On a case-by-case basis, the ((SWAPCA)) SWCAA Board of Directors may approve an emissions allocation of greater than 50% upon consideration of the following:

(A) Information submitted by the source to ((SWAPCA)) SWCAA justifying its request for exceeding the 50% emissions allocation, based on significant economic, employment, or other benefits to the maintenance plan area

that will result from the proposed new major source or major modification;

(B) Information provided by ((SWAPCA)) SWCAA on other known new major sources or major modifications seeking an emissions allocation from the same growth allowance; and

(C) Other relevant information submitted by the source or ((SWAPCA)) SWCAA.

(iii) To avoid jeopardizing maintenance of the ozone standard during the interim years of the ozone maintenance plan, ((SWAPCA)) SWCAA shall allocate only a portion of the VOC and NO_x growth allowances each year. ((SWAPCA)) SWCAA will track use of VOC and NO_x emissions from the growth allowances. The amount of the growth allowance that can be allocated each year is identified in the applicable ozone maintenance plan.

(iv) The amount of the CO growth allowance that can be allocated is identified in the applicable CO Maintenance Plan, if any.

(d) If no emissions remain in the respective growth allowance or the contingency plan has been triggered which effectively zeros the growth allowance, the owner or operator of the proposed major source or major modification shall provide offsets. Applicants in a maintenance area shall demonstrate the following:

(i) A demonstration shall be provided showing that the proposed offsets will improve air quality in the same geographical area affected by the new source or modification. This demonstration may require that air quality modeling be conducted according to the procedures specified in 40 CFR Part 51, Appendix W, Guideline on Air Quality Models (Revised).

(ii) Offsets for VOCs or nitrogen oxides shall be within the same maintenance plan area as the proposed source. Offsets for particulate matter, PM₁₀, sulfur dioxide, carbon monoxide, nitrogen dioxide, lead, and other pollutants shall be less than the level of significant air quality impact. (Refer to ((SWAPCA)) SWCAA 400-110 (1)(g) for significance levels).

(iii) New sources or modifications shall meet the following offset requirements:

(A) Within a designated maintenance plan area, the offsets shall provide reductions ((which)) that are equivalent or greater than the proposed increases. The offsets shall be appropriate in terms of short term, seasonal, and yearly time periods to mitigate the impacts of the proposed emissions;

(B) Outside a designated maintenance plan area, owners or operators of new sources or modifications which have a significant air quality impact on the maintenance plan area as provided in ((SWAPCA)) SWCAA 400-113(3) shall provide emission offsets which are sufficient to reduce impacts to levels below the significant air quality impact level with the maintenance plan area; and

(C) The emission reductions must provide for a net air quality benefit.

(I) New major sources within an ozone maintenance plan area shall:

(a) Offset the new VOC emissions at a ratio of 1.1 to 1, if the VOC emissions exceed either 100 tons per year or 700 pounds per day.

(b) Offset the new NO_x emissions at a ratio of 1.1 to 1, if the NO_x emissions exceed either 100 tons per year or 700 pounds per day.

(II) Sources within an ozone maintenance plan area undergoing major modifications shall:

(a) Offset the entire VOC emissions increase at a ratio of 1.1 to 1, if such increase exceeds either 40 tons per year or 290 pounds per day.

(b) Offset the entire NO_x emissions increase at a ratio of 1.1 to 1, if such increase exceeds either 40 tons per year or 290 pounds per day.

(III) New major sources within a carbon monoxide maintenance plan area shall:

(a) Offset the new carbon monoxide emissions at a ratio of 1 to 1, if the carbon monoxide emissions exceed either 100 tons per year or 700 pounds per day.

(IV) Sources within a carbon monoxide maintenance plan area undergoing major modifications shall:

(a) Offset the entire carbon monoxide emissions increase at a ratio of 1 to 1, if such increase exceeds either 100 tons per year or 700 pounds per day.

(D) New major sources or major modifications with CO emissions greater than 250 tpy are required to obtain offsets and comply with the PSD requirements of ((SWAPCA)) SWCAA 400-141.

(iv) The emission reduction shall be of the same type of pollutant as the emissions from the new source or modification. Sources of PM₁₀ shall be offset with particulate in the same size range.

(v) The emission reductions shall be contemporaneous, that is, the reductions shall take effect prior to the time of startup but not more than two years prior to the submittal of a complete notice of construction application for the new source or modification. This time limitation may be extended through banking, as provided in ((SWAPCA)) SWCAA 400-130, 400-131 and 400-136 for banking activities approved after the effective date of this regulation. In the case of replacement facilities, ((SWAPCA)) SWCAA may allow simultaneous operation of the old and new facilities during the startup period of the new facility provided that emissions do not exceed the new emission limits.

(vi) New major sources or major modifications in a maintenance plan area shall:

(A) The proposed new level of allowable emissions of the source or emissions units providing the reduction must be less than the current level of actual emissions of that source or emission unit(s). No emission reduction can be credited for actual emissions ((which)) that exceed the current allowable emissions of the source or emissions unit(s) providing the reduction. Emission reductions imposed by local, state, or federal regulations, regulatory orders or permits cannot be credited.

(B) If the offsets are provided by another source, the reductions in emissions from that source must be federally enforceable by the time the new or modified source commences operation. The new source may not commence oper-

ation before the date such reductions are actually achieved. ((SWAPCA)) SWCAA may allow simultaneous operation of the old and new facilities during the startup period of the new facility provided that the facility wide emissions do not exceed the new emission limit.

(9) **PSD Applicability.** If the proposed new source is a major stationary source or the proposed modification is a major modification for the purposes of the PSD program as described in ((SWAPCA)) SWCAA 400-141, the new source or modification shall meet the requirements of that program for all pollutants. For maintenance plan pollutants, the source shall meet all PSD requirements in addition to the additional requirements of this Section.

(10) **Toxics.** If the proposed new source or modification will emit any toxic air pollutants regulated under WAC 173-460, the source shall meet all applicable requirements of that regulation.

(11) **Visibility.** If the proposed new source is a major stationary source or the proposed modification is a major modification, the source shall meet all the visibility protection requirements of 40 CFR 52.27 as in effect on July 1, ((+998)) 2000.

(12) **Noncompliance.** Noncompliance with any emission limit, test requirement, reporting requirement or other requirement identified in a regulatory order issued pursuant to this section shall be considered a violation of this section.

Reviser's note: The typographical error in the above material occurred in the copy filed by the Southwest Clean Air Agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-028, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-112 Requirements for New Sources in Nonattainment Areas

[Statutory Authority: Chapter 70.94.141 RCW. Original Board adoption 12/17/68 (Regulation 1 Sec 3); Amended by Board 12/18/79; Amended by Board 8/18/81; Amended by Board 3/20/84; Renumbered from 400-110 93-21-004 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-028 filed 3/10/99, effective 4/11/99]

A Notice of Construction application to establish a new source or make a modification to a source in a nonattainment area, shall result in the issuance of an Order of Approval or other regulatory order, which contains such conditions as are reasonably necessary to assure the maintenance of compliance with this section, if the ((Authority)) Agency determines that the proposed project satisfies each of the following requirements:

(1) The proposed new source or modification will comply with all applicable New Source Performance Standards, National Emission Standards for Hazardous Air Pollutants, emission standards adopted under Chapter 70.94 RCW and, the applicable emission standards of the ((Authority)) Agency.

(2) The proposed new source will employ BACT for all air contaminants, except that if the new source is a major stationary source or the proposed modification is a major modification it must achieve LAER for the contaminants for

which the area has been designated nonattainment and for which the proposed new source or modification is major.

(3) The proposed new source will not cause any ambient air quality standard to be exceeded, will not violate the requirements for reasonable further progress established by the Washington State Implementation Plan and will comply with ((SWAPCA)) SWCAA 400-113(3) for all contaminants for which the area has not been designated nonattainment.

(4) If the proposed new source is a major stationary source or the proposed modification is a major modification, and the ((Authority)) Agency has determined, based on review of an analysis performed by the source of alternative sites, sizes, production processes, and environmental control techniques, that the benefits of the project significantly outweigh the environmental and social costs imposed as a result of its location, construction, or modification.

(5) If the proposed new source or the proposed modification is major for the contaminant for which the area is designated nonattainment, allowable emissions of the pollutant for which the area has been designated nonattainment from the proposed new source or modification are offset by reductions in actual emissions of the pollutant for which the area has been designated nonattainment from existing sources in the nonattainment area so as to represent (when considered together with the nonattainment provisions of section 172 of the FCAA) reasonable further progress. All offsetting emission reductions must satisfy the following requirements:

(a) The proposed new level of allowable emissions of the source or emissions units providing the reduction must be less than the current level of actual emissions of that source or emission unit(s). No emission reduction can be credited for actual emissions ((which)) that exceed the current allowable emissions of the source or emissions unit(s) providing the reduction. Emission reductions imposed by local, state, or federal regulations, regulatory orders or permits cannot be credited.

(b) The emission reductions must provide for a net air quality benefit.

(i) New major sources within a marginal ozone nonattainment area shall:

(A) Offset the new VOC emissions at a ratio of 1.1 to 1, if the VOC emissions exceed either 100 tons per year or 700 pounds per day.

(B) Offset the new NO_x emissions at a ratio of 1.1 to 1, if the NO_x emissions exceed either 100 tons per year or 700 pounds per day.

(ii) Sources within a marginal ozone nonattainment area undergoing major modifications shall:

(A) Offset the entire VOC emissions increase at a ratio of 1.1 to 1, if such increase exceeds either 40 tons per year or 290 pounds per day.

(B) Offset the entire NO_x emissions increase at a ratio of 1.1 to 1, if such increase exceeds either 40 tons per year or 290 pounds per day.

(iii) New major sources within a moderate carbon monoxide nonattainment area shall:

(A) Offset the new carbon monoxide emissions at a ratio of 1 to 1, if the carbon monoxide emissions exceed either 100 tons per year or 700 pounds per day.

(iv) Sources within a moderate carbon monoxide nonattainment area undergoing major modifications shall:

(A) Offset the entire carbon monoxide emissions increase at a ratio of 1 to 1, if such increase exceeds either 100 tons per year or 700 pounds per day.

(c) If the offsets are provided by another source, the reductions in emissions from that source must be federally enforceable by the time the new or modified source commences operation. The new source may not commence operation before the date such reductions are actually achieved. An emission reduction credit issued under SWAPCA 400-131 may be used to satisfy some or all of the offset requirements of this subsection.

(6) Noncompliance with any emission limit, test requirement, reporting requirement or other requirement identified in a regulatory order issued pursuant to this section shall be considered a violation of this section.

(7) If the proposed new source is a major stationary source or the proposed modification is a major modification, the owner or operator has demonstrated that all major stationary sources owned or operated by such person (or by any entity controlling, controlled by, or under common control with such person) in Washington are subject to emission limitations and are in compliance, or on a schedule for compliance, with all applicable emission limitations and standards under the Federal Clean Air Act, including all rules contained in the EPA-approved Washington State Implementation Plan.

(8) If the proposed new source is a major stationary source or the proposed modification is a major modification for the purposes of the PSD program described in ((SWAPCA)) SWCAA 400-141 it meets the requirements of that program for all contaminants for which the area has not been designated nonattainment.

(9) If the proposed new source or modification will emit any toxic air pollutants regulated under WAC 173-460, the source meets all applicable requirements of that Chapter.

(10) If the proposed new source is a major stationary source or the proposed modification is a major modification, the ((Authority)) Agency has complied with the visibility protection review requirements of 40 CFR 52.28 (c) through (h), as in effect on ((August)) July 1, ((1998)) 2000, and determined that the project meets the criteria set forth in 40 CFR 52.28(g). For purposes of this subsection definitions referenced in 40 CFR 52.28(b) are incorporated by reference, except that the term "visibility protection area" means any Class I area, and terms defined in ((SWAPCA)) SWCAA 400-030 shall have the meanings defined in that section. References in 40 CFR 52.28 to "the Administrator" shall mean the agency (either Ecology or the ((Authority)) Agency) processing the Notice of Construction application.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-028, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-113 Requirements for New Sources in Attainment or Nonclassifiable Areas

[Statutory Authority: Chapter 70.94.141 RCW. Original Board adoption 12/17/68 (Regulation 1 Sec 3); Amended by Board 12/18/79; Amended by Board 8/18/81; Amended by Board 3/20/84; Renumbered from 400-110 93-21-004 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-028 filed 3/10/99, effective 4/11/99]

Any person proposing to install, construct or operate a new source or emission unit or modification to an existing source or emission unit shall file a Notice of Construction application with the ((Authority)) Agency and shall be subject to the New Source Review provisions of ((SWAPCA)) SWCAA 400-110. Confidential information shall be identified as set forth in ((SWAPCA)) SWCAA 400-270. A Notice of Construction application to establish a new source or make a modification to a source in an area that is in attainment or unclassifiable for any air contaminant the proposed new source would emit and that is in attainment or unclassifiable for ozone if the proposed new or modified source would emit VOCs or NO_x, shall result in the issuance of an Order of Approval or other regulatory order. Such order shall contain such conditions as are reasonably necessary to assure the maintenance of compliance with this section, if it is determined that the proposed project satisfies all of the following requirements:

(1) The proposed new source or modification will comply with all applicable New Source Performance Standards, National Emission Standards for Hazardous Air Pollutants, emission standards adopted under Chapter 70.94 RCW and the applicable emission standards of the ((Authority)) Agency.

(2) The proposed new source or modification will employ BACT for all pollutants not previously emitted or whose emissions would increase as a result of the new source or modification.

(3) Allowable emissions from the proposed new source or modification will not delay the attainment date for an area not in attainment or unclassifiable nor cause or contribute to a violation of any ambient air quality standard. This requirement will be considered to be met if the projected impact of the allowable emissions from the proposed new source or the projected impact of the increase in allowable emissions from the proposed modification at any location within a nonattainment or maintenance plan area does not exceed the following levels for the pollutant(s) for which the area has been designated nonattainment:

<u>Pollutant</u>	<u>Annual Average</u>	<u>24-Hour Average</u>	<u>8-Hour Average</u>	<u>3-Hour Average</u>	<u>1-Hour Average</u>
CO	-	-	0.5 mg/m ³	-	2 mg/m ³
SO ₂	1.0 µg/m ³	5 µg/m ³	-	25 µg/m ³	30 µg/m ³
PM ₁₀	1.0 µg/m ³	5 µg/m ³	-	-	-
NO ₂	1.0 µg/m ³	-	-	-	-

PROPOSED

An offsetting emission reduction may be used to satisfy some or all of the requirements of this subsection.

(4) If the proposed new source is a major stationary source or the proposed modification is a major modification for purposes of the PSD program described in ((SWAPCA)) SWCAA 400-141, it meets all applicable requirements of that section.

(5) If the proposed new source or the proposed modification will emit any toxic air pollutants regulated under WAC 173-460, the source meets all applicable requirements of that Chapter.

(6) Noncompliance with any emission limit, test requirement, reporting requirement or other requirement identified in a regulatory order issued pursuant to this section shall be considered a violation of this section.

(7) If, within the meaning of the PSD program described in ((SWAPCA)) SWCAA 400-141, the proposed new source is a major stationary source or the proposed modification is a major modification, the source would not cause an adverse impact upon visibility.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 95-17-084, filed 8/21/95, effective 9/21/95)

((SWAPCA)) SWCAA 400-114 Requirements for Replacement or Substantial Alteration of Emission Control Technology at an Existing Stationary Source

[Statutory Authority: Chapter 70.94.141 RCW, and 70.94.153 RCW. Original Board adoption 12/17/68 (Regulation 1 Sec 3); Amended by Board 12/18/79; Amended by Board 8/18/81; Amended by Board 3/20/84; Renumbered from 400-110 93-21-004 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95]

(1) Any person proposing to replace or substantially alter the emission control technology installed on an existing stationary source or emission unit shall file a Notice of Construction application with the ((Authority)) Agency and shall be subject to the New Source Review process of ((SWAPCA)) SWCAA 400-110. If the replacement or substantial alteration meets the definition of "new source" or "modification" then the new source emissions standards of ((SWAPCA)) SWCAA 400-111, 400-112 or ((SWAPCA)) SWCAA 400-113 shall apply. If the replacement or substantial alteration does not meet the definition of "new source" or "modification" then RACT or other requirements shall apply. Replacement or substantial alteration of control technology does not include routine maintenance, repair or parts replacement.

(2) For projects not otherwise reviewable under ((SWAPCA)) SWCAA 400-110, the ((Authority)) Agency may:

(a) Require that the owner or operator employ RACT for the affected emission unit;

(b) Prescribe reasonable operation and maintenance conditions for the control equipment; and

(c) Prescribe other requirements authorized by Chapter 70.94 RCW.

(3) Within thirty calendar days of receipt of a Notice of Construction application under this section the ((Authority))

Agency shall either notify the applicant in writing that the application is complete or notify the applicant in writing of all additional information necessary to complete the application. Within thirty calendar days of receipt of a complete Notice of Construction application under this section the ((Authority)) Agency shall either issue an Order of Approval or a proposed RACT determination for the proposed project.

(4) Construction shall not commence, as defined in ((SWAPCA)) SWCAA 400-030(16), on a project subject to review under this section until the ((Authority)) Agency issues a final Order of Approval. However, any Notice of Construction application filed under this section shall be deemed to be approved without conditions if the ((Authority)) Agency takes no action within thirty days of receipt of a complete Notice of Construction application. The ((Authority)) Agency may request clarification of information submitted in support of the application after the application has been determined to be complete.

(5) An Order of Approval to replace or substantially alter emission control technology shall become invalid if construction is not commenced within eighteen months from the date of issuance of an Order of Approval, if construction is discontinued for a period of eighteen months or more, or if construction is not completed within a reasonable time. The ((Authority)) Agency may extend the eighteen month period upon a satisfactory demonstration that an extension is justified. This provision does not apply to the time period between construction of the approved phases of a phased construction project; each phase must commence construction within eighteen months of the projected and approved commencement date. The ((Authority)) Agency may specify an earlier date for commencement of construction in an Order of Approval.

(6) Noncompliance with any emission limit, test requirement, reporting requirement or other requirement identified in a regulatory order issued pursuant to this section shall be considered a violation of this section.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

WSR 00-24-084

PROPOSED RULES

SOUTHWEST

CLEAN AIR AGENCY

[Filed December 5, 2000, 10:54 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 00-17-022.

Title of Rule: SWCAA 400 General Regulations for Air Pollution Sources.

Purpose: These rules provide for adoption of federal new source performance standards, establishment of an emission reduction bank and program, PSD, visibility protection, administrative activities of the agency and Visual Opacity Determination Method.

Statutory Authority for Adoption: RCW 70.94.141.

PROPOSED

Statute Being Implemented: RCW 70.94.141.

Summary: The changes proposed in this rule are administrative in nature. The rule is being revised to reflect a name change for the agency. SWCAA is updating adoption of existing new source performance standards and providing administrative clarifications.

Reasons Supporting Proposal: The name of the agency was changed July 6, 2000, from the Southwest Air Pollution Control Authority (SWAPCA) to the Southwest Clean Air Agency (SWCAA).

Name of Agency Personnel Responsible for Drafting and Implementation: Paul Mairose, 1308 N.E. 134th Street, Vancouver, WA, (360) 574-3058; and Enforcement: Robert D. Elliott, 1308 N.E. 134th Street, Vancouver, WA, (360) 574-3058.

Name of Proponent: Southwest Clean Air Agency, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: This is an existing rule. Only administrative type changes are being proposed. There will be no effect on the public or regulated businesses as a result of these changes.

Proposal Changes the Following Existing Rules: Titles and rule numbers that include the agency name are being changed to reflect the name of the agency.

No small business economic impact statement has been prepared under chapter 19.85 RCW. Changes proposed by SWCAA are consistent with federal and state rules already in effect. This agency is not subject to the small business economic impact provisions of chapter 19.85 RCW.

RCW 34.05.328 does not apply to this rule adoption. Pursuant to RCW 70.94.141(1), section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. SWCAA is not voluntarily invoking section 201, chapter 403, Laws of 1995.

Hearing Location: Office of SWCAA, 1308 N.E. 134th Street, Vancouver, WA 98685, on February 1, 2001, at 3:00 p.m.

Assistance for Persons with Disabilities: Contact Mary Allen by January 26, 2001, TDD (360) 574-3058.

Submit Written Comments to: Paul Mairose, 1308 N.E. 134th Street, Vancouver, WA 98685, fax (360) 574-3058, by January 19, 2001.

Date of Intended Adoption: February 1, 2001.

December 4, 2000
Robert D. Elliott
Executive Director

AMENDATORY SECTION (Amending WSR 99-07-028, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-115 Standards of Performance for New Sources

[Statutory Authority: Chapter 70.94.141 RCW. Originally adopted by Board 12/18/79; Amended by Board 4/17/84 (renumbered to 400-135); Amended by Board 12/16/86; 93-16-007 filed 7/22/93, effective 8/22/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-028 filed 3/10/99, effective 4/11/99]

Title 40, Code of Federal Regulations, Part 60 (Standards of Performance for New Sources), as in effect on

((August)) July 1, ((1998)) 2000, is adopted by reference except for sections 60.5 (Determination of Construction or Modification) and 60.6 (Review of Plans). The term "Administrator" in 40 CFR Part 60 shall mean the Administrator of EPA, the Director of Ecology and the Control Officer of the ((Authority)) Agency.

As of ((August)) July 1, ((1998)) 2000, the federal regulations adopted by reference hereby set standards of performance affecting facilities for the following described subparts of 40 CFR Part 60:

- Subpart D Fossil fuel-fired steam generators for which construction commenced after August 17, 1971, and prior to September 19, 1978, which have a heat input greater than 73 megawatts but not greater than 250 megawatts (ref. 40 CFR 60.40 et seq.)
- Subpart Da Electric utility steam generating units for which construction commenced after September 18, 1978, which have a heat input greater than 73 megawatts but not greater than 250 megawatts (ref. 40 CFR 60.40a et seq.)
- Subpart Db Industrial-commercial-institutional steam generating units for which construction commenced after June 19, 1984, and prior to June 19, 1986, which have a heat input greater than 29 megawatts but less than 73 megawatts (ref. 40 CFR 60.40b et seq.)
- Subpart Dc Small industrial-commercial-institutional steam generating units (ref. 40 CFR 60.40c et seq.)
- Subpart E Incinerators (ref. 40 CFR 60.50 et seq.)
- Subpart Ea Municipal waste combustors for which construction commenced after December 20, 1989 and on or before September 20, 1994 (ref. 40 CFR 60.50a et seq.)
- Subpart Eb Large Municipal waste combustors for which construction is commenced after September 20, 1994 or for which Modification of reconstruction is commenced after June 19, 1996 (ref. 40 CFR 60.50b et seq.)
- Subpart Ec Hospital/medical/infectious waste incinerators for which construction is commenced after June 20, 1996 (ref. 40 CFR 60.50c et seq.)
- Subpart F Portland cement plants (ref. 40 CFR 60.60 et seq.)
- Subpart G Nitric acid plants (ref. 40 CFR 60.70 et seq.)
- Subpart H Sulfuric acid plants (ref. 40 CFR 60.80 et seq.)
- Subpart I Hotmix asphalt facilities ((concrete plants)) (ref. 40 CFR 60.90 et seq.)
- Subpart J Petroleum refineries which produce less than 25,000 barrels per day of

PROPOSED

PROPOSED

	refined products (ref. 40 CFR 60.100 et seq.)	Subpart CC	Glass manufacturing plants (ref. 40 CFR 60.290 et seq.)
Subpart K	Storage vessels for petroleum liquid constructed after June 11, 1973, and prior to May 19, 1978, which have a capacity greater than 40,000 gallons (ref. 40 CFR 60.110 et seq.)	Subpart DD	Grain elevators (ref. 40 CFR 60.300 et seq.)
Subpart Ka	Storage vessels for petroleum liquids <u>for which construction, reconstruction or modification commenced after May 18, 1978, and prior to July 23, 1984 ((which)) have a capacity greater than 40,000 gallons</u> (ref. 40 CFR 60.110a et seq.)	Subpart EE	Industrial surface coating: metal furniture (ref. 40 CFR 60.310 et seq.)
Subpart Kb	Volatile organic liquid storage vessels (including petroleum liquid storage vessels) constructed, reconstructed, or modified after July 23, 1984 (ref. 40 CFR 60.110b et seq.)	Subpart GG	Stationary gas turbines (ref. 40 CFR 60.330 et seq.)
Subpart L	Secondary lead smelters (ref. 40 CFR 60.120 et seq.)	Subpart HH	Lime manufacturing plants (ref. 40 CFR 60.340 et seq.)
Subpart M	Brass and bronze ingot production plants (ref. 40 CFR 60.130 et seq.)	Subpart KK	Lead-acid battery plants (ref. 40 CFR 60.370 et seq.)
Subpart N	Iron and steel plants (ref. 40 CFR 60.140 et seq.)	Subpart LL	Metallic mineral processing plants (ref. 40 CFR 60.380 et seq.)
Subpart O	Sewage treatment plants (ref. 40 CFR 60.150 et seq.)	Subpart MM	Automobile and light duty truck surface coating operations (ref. 40 CFR 60.390 et seq.)
Subpart P	Primary copper smelters (ref. 40 CFR 60.160 et seq.)	Subpart NN	Phosphate rock plants (ref. 40 CFR 60.400 et seq.)
Subpart Q	Primary zinc smelters (ref. 40 CFR 60.170 et seq.)	Subpart PP	Ammonium sulfate manufacture (ref. 40 CFR 60.420 et seq.)
Subpart R	Primary lead smelters (ref. 40 CFR 60.180 et seq.)	Subpart QQ	Publication rotogravure printing (ref. 40 CFR 60.430 et seq.)
Subpart S	Primary aluminum reduction plants (ref. 40 CFR 60.190 et seq.)	Subpart RR	Pressure sensitive tape and label surface coating operations (ref. 40 CFR 60.440 et seq.)
Subpart T	Phosphate fertilizer industry: Wet process phosphoric acid plants (ref. 40 CFR 60.200 et seq.)	Subpart SS	Industrial surface coating: Large appliances (ref. 40 CFR 60.450 et seq.)
Subpart U	Phosphate fertilizer industry: Superphosphoric acid plants (ref. 40 CFR 60.210 et seq.)	Subpart TT	Industrial surface coating: Metal coils (ref. 40 CFR 60.460 et seq.)
Subpart V	Phosphate fertilizer industry: Diammonium phosphate plants (ref. 40 CFR 60.220 et seq.)	Subpart UU	Asphalt processing and asphalt roofing manufacture (ref. 40 CFR 60.470 et seq.)
Subpart W	Phosphate fertilizer industry: Triple superphosphate plants (ref. 40 CFR 60.230 et seq.)	Subpart VV	Synthetic Organic Chemical Manufacturing Industry equipment leaks (VOC) (ref. 40 CFR 60.480 et seq.)
Subpart X	Phosphate fertilizer industry: Granular triple superphosphate storage facilities (ref. 40 CFR 60.240 et seq.)	Subpart WW	Beverage can surface coating operations (ref. 40 CFR 60.490 et seq.)
Subpart Y	Coal preparation plants (ref. 40 CFR 60.250 et seq.)	Subpart XX	Bulk gasoline terminals (ref. 40 CFR 60.500 et seq.)
Subpart Z	Ferroalloy production facilities (ref. 40 CFR 60.260 et seq.)	Subpart AAA	New residential wood heaters (ref. 40 CFR 60.530 et seq.)
Subpart AA	Steel plants: Electric arc furnaces (ref. 40 CFR 60.270 et seq.)	Subpart BBB	Rubber tire manufacturing industry (ref. 40 CFR 60.540 et seq.)
Subpart AAa	Steel plants: Electric arc furnaces and argon-oxygen decarburization vessels (ref. 40 CFR 60.270a et seq.)	Subpart DDD	VOC emissions from the polymer manufacturing industry (ref. 40 CFR 60.560 et seq.)
Subpart BB	Kraft pulp mills (ref. 40 CFR 60.280 et seq.)	Subpart FFF	Flexible vinyl and urethane coating and printing (ref. 40 CFR 60.580 et seq.)
		Subpart GGG	Petroleum refineries - compressors and fugitive emission sources (ref. 40 CFR 60.590 et seq.)
		Subpart HHH	Synthetic fiber production facilities (ref. 40 CFR 60.600 et seq.)
		Subpart III	VOC emissions from Synthetic Organic Chemical Manufacturing Industry air oxidation unit processes (ref. 40 CFR 60.610 et seq.)
		Subpart JJJ	Petroleum dry cleaners (ref. 40 CFR 60.620 et seq.)

Subpart KKK	Equipment leaks of VOC from onshore natural gas processing plants (ref. 40 CFR 60.630 et seq.)
Subpart LLL	Onshore natural gas processing; SO ₂ emissions (ref. 40 CFR 60.640 et seq.)
Subpart NNN	VOC emissions from Synthetic Organic Chemical Manufacturing Industry distillation operations (ref. 40 CFR 60.660 et seq.)
Subpart OOO	Nonmetallic mineral processing plants (ref. 40 CFR 60.670 et seq.)
Subpart PPP	Wool fiberglass insulation manufacturing plants (ref. 40 CFR 60.680 et seq.)
Subpart QQQ	VOC emissions from petroleum refinery waste water emissions (ref. 40 CFR 60.690 et seq.)
Subpart RRR	Volatile organic compound emissions from synthetic organic chemical manufacturing industry (SOCMI) reactor processes (ref. 40 CFR 60.700 et seq.)
Subpart SSS	Magnetic tape coating facilities (ref. 40 CFR 60.710 et seq.)
Subpart TTT	Industrial surface coating: Surface coating of plastic parts for business machines (ref. 40 CFR 60.720 et seq.)
<u>Subpart UUU</u>	<u>Calciners and dryers in mineral industries (ref. 40 CFR 60.730 et seq.)</u>
Subpart VVV	Polymeric coating of supporting substrates facilities (ref. 40 CFR 60.740 et seq.)
Subpart WWW	Municipal solid waste landfills (ref. 40 CFR 60.750 et seq.)

Note: For fossil fuel fired steam generators referenced by Subpart D and Da above, units greater than 250 megawatts are governed by the Energy Facility Site Evaluation Council (EFSEC) in Title 463 WAC.

Reviser's note: The typographical errors in the above material occurred in the copy filed by the Southwest Clean Air Authority and appear in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 95-17-084, filed 8/21/95, effective 9/21/95)

((SWAPCA)) SWCAA 400-116 Maintenance of Equipment

[Statutory Authority: Chapter 70.94.152(7) RCW, and 70.94.155 RCW. Original Board adoption 95-17-084 filed 8/21/95, effective 9/21/95]

(1) Any equipment, including features, machines, and devices constituting parts of or called for by plans, specifications, or other information submitted for approval or required as part of an approval shall be maintained and operate in good working order. Defective or malfunctioning equipment that emit air pollutants shall be repaired immediately or shall be taken out of service.

(2) Any equipment that serves as air contaminant control or capture equipment shall be maintained and operate in good working order at all times in accordance with good operations and maintenance practices and in accordance with

((Authority)) **Agency** approval conditions. Defective or malfunctioning equipment shall be repaired immediately or shall be taken out of service.

(3) ((SWAPCA)) **SWCAA** shall have the authority to require that an Operations and Maintenance (O&M) plan be developed and implemented for each emission unit or piece of control or capture equipment in order to assure continuous compliance with approval conditions. A copy of the plan shall be available for site inspections. The plan shall reflect good industrial practice and shall include periodic inspection of all equipment and control apparatus, monitoring and recording of equipment and control apparatus performance, prompt repair of any defective equipment or control apparatus, procedures for start up, shut down and normal operation, and a record of all actions required by the plan. The plan shall be reviewed by the source or owner at least annually and updated to reflect any changes in good industrial practices. The O&M plan shall be available at or near the equipment it applies to so as to assist operations and maintenance personnel in assuring good operations and maintenance practices as well as the ability to log and record equipment performance parameters. As a minimum, the O&M plan shall contain each of the parameters required to be monitored, logged or recorded as provided in an Order of Approval.

(4) Noncompliance with any emission limit, test requirement, reporting or record keeping requirement or other requirement identified in a regulatory order issued pursuant to this section shall be considered a violation of this section.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The typographical errors in the above material occurred in the copy filed by the Southwest Clean Air Authority and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 95-17-084, filed 8/21/95, effective 9/21/95)

((SWAPCA)) SWCAA 400-120 Bubble Rules

[Statutory Authority: Chapter 70.94.141 RCW, and 70.94.155 RCW. Original adoption by Board 4/17/84 under 400-115; 93-21-005 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95]

(1) **Applicability.** The owner(s) or operator(s) of any source(s) may apply for a bubble for any contaminant regulated by state or federal law or regulations established to implement such laws for which the emission requirement may be stated as an allowable limit in weight of air contaminant per unit time for the emissions units involved.

(2) **Conditions.** A bubble may be authorized provided the following conditions have been demonstrated to the satisfaction of the ((Authority)) **Agency**.

(a) The contaminants exchanged must be of the same type, that is, PM₁₀ for PM₁₀, sulfur dioxide for sulfur dioxide, etc.

(b) The bubble will not interfere with the attainment and maintenance of ambient air quality standards.

(c) The bubble will not result in a delay in compliance by any source, nor a delay in any existing enforcement action.

(d) The bubble will not supersede NSPS, NESHAPS, BACT, or LAER. The emissions of hazardous air contaminants shall not be increased.

(e) The bubble will not result in an increase in the sum of actual emission rates of the contaminant involved from the emissions units involved.

(f) A bubble may not be authorized solely for opacity limits. However, if the emission limit for particulates for a given emissions unit is increased as part of a bubble, the opacity limit for the given emissions unit may be increased subject to the following limitations:

(i) The new opacity limit shall be specific for the given emissions unit;

(ii) The new opacity limit shall be consistent with the new particulate matter emission limit(s) and/or PM₁₀ emission limit(s);

(iii) An opacity greater than twenty percent shall never be authorized;

(iv) If the given emissions unit emits or has the potential to emit 100 tons per year or more of particulate matter, the opacity shall be monitored continuously.

(g) The emission limits of the bubble are equivalent to existing limits in enforceability.

(h) Concurrent with or prior to the authorization of a bubble, each emission unit involved in a bubble shall receive or have received a regulatory order or permit that establishes total allowable emissions from the source of the contaminant being bubbled, expressed as weight of the contaminant per unit time.

(i) There will be no net adverse impact upon air quality from the establishment of new emission requirements for a specific source or emissions unit. Determination of net adverse impact shall include but not be limited to public perception of opacity and public perception of odorous contaminants.

(j) Specific situations may require additional demonstration as requested by the ((Authority)) Agency.

(3) **Jurisdiction.** Whenever a bubble application involves emissions units, some of which are under the jurisdiction of Ecology and some of which are under the jurisdiction of the ((Authority)) Agency, approval will require concurrence by both authorities. The new emission limits for each emissions unit will be enforced by the agency of original jurisdiction.

(4) **Additional information.** Within thirty calendar days, after the receipt of a bubble application and all supporting data and documentation, the ((Authority)) Agency may require the submission of additional information needed to review the application.

(5) **Approval.** Within thirty calendar days after all the required information has been received, the ((Authority)) Agency shall approve or deny the application, based on a finding that conditions in subsection (2)(a) through (j) of this section have been satisfied or not. If the application is approved, a regulatory order or equivalent document shall be issued which includes new allowable emissions limits expressed in weight of pollutant per unit time for each emissions unit affected by the bubble. The regulatory order or equivalent document shall include any conditions required to

assure that subsection (2)(a) through (j) of this section will be satisfied. If the bubble depends in whole or in part upon the shutdown of equipment, the regulatory order or equivalent document shall prohibit operation of the affected equipment.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-029, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-130 Use of Emission Reduction Credits

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption by Board 12/16/86; Amended by Board 9/21/93; 93-21-005 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-029 filed 3/10/99, effective 4/11/99]

(1) **Applicability.** The owner(s) of any emission reduction credits (ERCs) shall maintain its ability to use said ERCs through approval and registration with the ((Authority)) Agency. An ERC shall be considered an emission unit and subject to registration. If the owner of said ERCs fails to maintain or renew its annual registration 6 months beyond the due date or fails to pay its operating permit fee 6 months beyond the due date or has not applied for emission reduction credits, then said amount of emission reductions credit shall revert back to the ((Authority)) Agency. The ((Authority)) Agency may keep said credits in a credit bank to be used by the ((Authority)) Agency in the best interest of the area or credits may be dissolved by the ((Authority)) Agency.

(2) **Permissible use.** An ERC may be used to satisfy the requirements for authorization of a bubble under ((SWAPCA)) SWCAA 400-120, as a part of a determination of "net emissions increase," as an offsetting reduction to satisfy the requirements for new source review per ((SWAPCA)) SWCAA 400-111, 400-112, ((SWAPCA)) SWCAA 400-113(3) or ((SWAPCA)) SWCAA 400-113(6), or to satisfy requirements for PSD review per ((SWAPCA)) SWCAA 400-113(4). The use of any ERC shall be consistent with all other federal, state, and local requirements of the program in which it is used.

(3) **Conditions of use.** An ERC may be used only for the contaminant(s) for which it was issued and in the area for which it was issued except in the case of transportable pollutants which will be determined on a case by case basis and per interagency agreement for interstate transfers. The ((Authority)) Agency may impose additional conditions of use of ERCs to account for temporal and spatial differences between the emissions unit(s) that generated the ERC and the emissions unit(s) that use the ERC. An ERC may not be used in place of a growth allowance as required under ((SWAPCA)) SWCAA 400-111.

(4) **Procedures to use ERC.**

(a) **Individual use.** When an ERC is used under subsection (2) of this section, an application must be submitted to the ((Authority)) Agency and the ((Authority)) Agency must issue a Regulatory Order for use of the ERC(s).

(b) **Sale or transfer of an ERC.** An ERC may be sold or otherwise transferred to a person other than the person to whom it was originally issued. An application for the sale or

transfer must be submitted by the original ERC owner to the ((Authority)) Agency. After receiving an application, the ((Authority)) Agency shall reissue a Regulatory Order to the new owner. The ((Authority)) Agency shall update the ERC bank to reflect the availability or ownership of ERCs. No discounting shall happen as part of this type of transaction.

(5) **Expiration of ERC.** An unused ERC and any unused portion thereof shall expire five years after the date the emission reduction was accomplished and not the date of the Regulatory Order.

(6) **Maintenance of ERCs.** The ((Authority)) Agency has established its policy and procedure for maintenance of said credits in SWCAA 400-136 Maintenance of Emission Reduction Credits in Bank.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-029, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-131 Deposit of Emission Reduction Credits Into Bank

[Statutory Authority: Chapter 70.94.141 RCW, and 70.94.850 RCW. Originally adopted by Board as 400-120 on 3/20/84; renumbered to 400-131 in 93-21-005 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-029 filed 3/10/99, effective 4/11/99]

(1) **Applicability.** The owner(s) or operator(s) of any source(s) may apply to the ((Authority)) Agency for an emission reduction credit (ERC) if the source proposes to reduce its actual emissions rate for any contaminant regulated by state or federal law or regulations established to implement such law(s) for which the emission requirement may be stated as an allowable limit in weight of contaminant per unit time for the emissions unit(s) involved.

(2) **Time of application.** The application for an ERC must be made prior to or within one hundred eighty days after the emission reduction has been accomplished.

(3) **Conditions.** An ERC may be authorized provided the following conditions have been demonstrated to the satisfaction of the ((Authority)) Agency.

(a) No part of the emission reductions claimed for credit shall have been required pursuant to an adopted rule.

(b) The quantity of emissions reductions claimed for credit shall be less than or equal to the old allowable emissions rate or the old actual emissions rate, whichever is the lesser, minus the new allowable emissions rate.

(c) The ERC application must include a description of all the changes that are required to accomplish the claimed emissions reduction, such as, new control equipment, process modifications, limitation of hours of operation, permanent shutdown of equipment, specified control practices and any other pertinent supporting information.

(d) The quantity of emission reductions claimed must be greater than 1 ton/year and be readily quantifiable for the emissions unit(s) involved.

(e) No part of the emission reductions claimed for credit shall have been used as part of a determination of net emission increase, nor as part of an offsetting transaction under ((SWAPCA)) SWCAA 400-112(5) nor as part of a bubble

transaction under ((SWAPCA)) SWCAA 400-120 nor to satisfy NSPS, NESHAPS, BACT, MACT, RACT, LAER or other applicable emission standard.

(f) Concurrent with or prior to the authorization of an ERC, the applicant shall have received a regulatory order or permit that establishes total allowable emissions from the source or emissions unit of the contaminant for which the ERC is requested, expressed as weight of contaminant per unit time.

(g) The use of any ERC shall be consistent with all other federal, state, and local requirements of the program in which it is used.

(4) **Additional information.** Within thirty days after the receipt of an ERC application, supporting data and documentation, the ((Authority)) Agency may require the submission of additional information needed to review the application.

(5) **Approval.** Within thirty days after all required information has been received, the ((Authority)) Agency shall approve or deny the application, based on a finding that conditions in subsection (3)(a) through (f) of this section have been satisfied or not. If the application is approved, the ((Authority)) Agency shall:

(a) Issue a regulatory order or equivalent document to assure that the emissions from the source will not exceed the allowable emission rates claimed in the ERC application, expressed in weight of pollutant per unit time for each emission unit involved. The regulatory order or equivalent document shall include any conditions required to assure that subsection (3)(a) through (f) of this section will be satisfied. If the ERC depends in whole or in part upon the shutdown of equipment, the regulatory order or equivalent document must prohibit operation of the affected equipment; and,

(b) Issue a Regulatory Order with emission reduction credit. The Regulatory Order shall specify the issue date, the contaminant(s) involved, the emission decrease expressed as weight of pollutant per unit time, the nonattainment area involved, if applicable, and the person to whom the Regulatory Order is issued.

(6) **Maintenance and use of ERCs.** The ((Authority)) Agency has established its policy and procedure for maintenance of said ERCs in ((SWAPCA)) SWCAA 400-136. The ((Authority)) Agency has established its policy and procedure for use of ERCs in ((SWAPCA)) SWCAA 400-130.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 95-17-084, filed 8/21/95, effective 9/21/95)

((SWAPCA)) SWCAA 400-135 Criminal Penalties (renumbered 4/17/84 to 400-210)

[Originally adopted by Board 12/18/79; Amended by Board 4/17/84 renumbered to 400-210; 93-21-005 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95]

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

PROPOSED

AMENDATORY SECTION (Amending WSR 99-07-029, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-136 Maintenance of Emission Reduction Credits in Bank

[Statutory Authority: Chapter 70.94.141 RCW, and 70.94.850 RCW. Original Board adoption as 400-125 4/17/84; renumbered to 400-136 in 93-21-005 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-029 filed 3/10/99, effective 4/11/99]

(1) **Applicability.** The ((Authority)) Agency shall maintain a bank for the purpose of administering emission reduction credits (ERCs) pursuant to the provisions of RCW 70.94.850.

(2) **Conditions for ERC Bank.**

(a) ERCs established under ((SWAPCA)) SWCAA 400-131 or used under ((SWAPCA)) SWCAA 400-130 shall be available for said credit bank.

(b) ERCs shall not have been used, sold or transferred to another entity for use; e.g. ERCs cannot be banked or used by two sources at one time.

(c) ERCs established under ((SWAPCA)) SWCAA 400-131 or used under ((SWAPCA)) SWCAA 400-130 for a specific source shall be allocated privately and not be included in the bank for public allocation unless 1) specifically requested by the owner(s) of the ERCs or 2) if the owner of the ERCs fails to maintain registration with the ((Authority)) Agency.

(3) **Maintenance of the Bank.**

(a) The ((Authority)) Agency shall maintain an emission inventory of all allowed and actual emissions (including any growth allowances identified in a Maintenance Plan) in each of the nonattainment or maintenance areas by pollutant or in the case of ozone, it shall be volatile organic compounds and oxides of nitrogen.

(b) The ERCs contained in the bank shall be discounted by 10% to allow for minor emissions increases in nonattainment areas by minor sources each of which would emit less than one ton per year. Minor emitting sources shall be ineligible to receive or expend an emission reduction credit as identified in ((SWAPCA)) SWCAA 400-131 or 400-130. ERCs shall be discounted at the applicable ratio on a one-time basis at the time of deposit into the bank. ERCs shall not be discounted each time a transaction is completed. If reductions in emission beyond those identified in the Washington State Implementation Plan are required to meet an ambient air quality standard, if the standard cannot be met through controls on operating sources, and if the plan must be revised, ERCs may be discounted by the ((Authority)) Agency over and above the initial 10% without compensation to the holder after public involvement per ((SWAPCA)) SWCAA 400-171. Any such discount shall not exceed the percentage of additional emission reduction needed to reach or maintain attainment status.

(c) The Control Officer shall not provide greater than 25% of the available emission credit in the bank to a single applicant. Any exceptions shall be considered on a case-by-case basis by the Board of Directors after a public notice at the next regularly scheduled meeting.

(d) When the Control Officer issues credits for a new or modified source, the amount of emission credits shall be removed from the bank and a Regulatory Order allocating the

emission credits shall be issued. The applicant shall start a continuous program of construction or process modification within 18 months. If the applicant does not exercise the approval, the emission credit shall expire and revert to the bank. If there is a six month delay in construction after the start of a continuous program to construct or modify a source or emissions unit the remaining amount of the emission reduction credit shall be reviewed by the Control Officer and if it is determined that the unused portion of the credit will not, in all likelihood be used in the next year, the Control Officer shall notify the applicant that the credit has expired and shall revert to the bank. The applicant shall reapply, as needed, for use of the emission reduction credits when a continuous program of construction or modification begins.

(4) **Annual Review.** The ((Authority)) Agency shall review the content and administration of this section annually to ensure regulatory consistency and equity of impact as a portion of the Washington State Implementation Plan review. The results of the review shall be reported to the Board with recommendations for correction if the Control Officer deems that such corrections are necessary to properly administer the emission credit bank.

(5) **Issuance and use of ERCs.** The ((Authority)) Agency has established its policy and procedure for deposit of ERCs in ((SWAPCA)) SWCAA 400-131. The ((Authority)) Agency has established its policy and procedure for use of ERCs in ((SWAPCA)) SWCAA 400-130.

(6) **Expiration of Public Credits.**

(a) Emissions reduction credits deposited in the bank for public allocation (public bank) as the result of the shutdown of the Carborundum facility expired on July 8, 1996 as provided in Regulatory Order ((SWAPCA)) SWCAA 86-843 establishing such credits.

(b) Emission reduction credits deposited in the bank for public allocation as the result of Board Resolution 1988-3 amended by Board Resolution 1989-3 expire on January 24, 1999.

(c) Credits and Regulatory Orders/certificates assigned to sources from this public bank expired on July 8, 1996.

(d) Each source which had credits assigned from the public bank by issuance of a Regulatory Order shall be approved for the total of previous emissions plus any additional amount approved under a Regulatory Order assigning public credits to that source effective July 8, 1996.

(e) Emission reduction credits deposited into the public bank shall not be available to be assigned to any source after July 8, 1996.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The typographical error in the above material occurred in the copy filed by the Southwest Clean Air Agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-029, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-141 Prevention of Significant Deterioration (PSD)

[Statutory Authority: Chapter 70.94.141 RCW. Original Board adoption 93-21-005 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-029 filed 3/10/99, effective 4/11/99]

Section 40 CFR 52.21, Subparts (b), (c), (d), (e), (f), (g), (h), (i), (j), (k), (l), (m), (n), (o), (p), (r), (t), (v), and (w), Prevention of Significant Deterioration of Air Quality, as in effect on July 1, (~~1998~~) 2000, are incorporated by reference with the following additions and modifications:

(1) **Administrator.** In 40 CFR 52.21 (b)(17), federally enforceable, (f)(1)(v), (f)(3), and (f)(4)(i), exclusions from increment consumption, (g), redesignation, (l) and (2), air quality models, (p)(2), federal land manager, and (t), disputed permits or redesignations, the word "Administrator" shall be construed in its original meaning. In 40 CFR 52.21 (b)(3)(iii) Administrator shall mean the Administrator of EPA, Director of Ecology and Control Officer of the ((Authority)) Agency.

(2) **Contemporaneous.** Subpart 40 CFR 52.21 (b)(3)(ii) is changed to read: "An increase or decrease in actual emissions is contemporaneous with the increase from the particular change only if it occurs between the date ten years before construction on the particular change commences and the date that the increase from the particular change occurs. If a decrease occurred more than one year prior to the date of submittal of the Notice of Construction application for the particular change it can only be credited if the decrease has been documented by an emission reduction credit."

(3) **Public participation.** Subpart 40 CFR 51.166(q) public participation, as in effect July 1, (~~1998~~) 2000 is hereby incorporated by reference except that in 40 CFR 51.166 (q)(2)(iv), the phrase "specified time period" shall mean thirty days and the word "Administrator" shall mean the EPA Administrator.

(4) **Section 40 CFR 51.166 Subpart (p)(1).** Sources Impacting Federal Class I areas - additional requirements - Notice to EPA, as in effect on July 1, (~~1998~~) 2000, is herein incorporated by reference.

(5) **Secondary emissions.** Subpart 40 CFR 52.21 (b)(18) is changed to read: Emissions which would occur as a result of the construction or operation of a major stationary source or major modification, but do not come from the major stationary source or major modification itself. For the purpose of this section, secondary emissions must be specific, well defined, quantifiable, and impact the same general area as the stationary source or modification ((which)) that causes the secondary emissions. Secondary emissions may include, but are not limited to:

(a) Emissions from ships or trains coming to or from the new or modified stationary source; and

(b) Emissions from any offsite support facility which would not otherwise be constructed or increase its emissions as a result of the construction or operation of the major stationary source or major modification.

(6) **Significant.** The definition of "significant" in 40 CFR 52.21 (b)(23) is changed to exclude from the list of pol-

lutants which may trigger PSD review any pollutant listed under FCAA § 112.

[Note - ((SWAPCA)) SWCAA has not been delegated authority by Ecology for the PSD program.]

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 95-17-084, filed 8/21/95, effective 9/21/95)

((SWAPCA)) SWCAA 400-150 Variance (renumbered 11/93 to 400-180)

[Original Board adoption 12/17/68 (Regulation 1 Sec 2.07); Amended by Board 12/18/79; Amended by Board 4/17/84; Repealed and renumber to 400-180 93-21-005 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95]

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-21-005, filed 10/7/93, effective 11/8/93)

((SWAPCA)) SWCAA 400-151 Retrofit Requirements for Visibility Protection

[Statutory Authority: Chapter 70.94.141 RCW. Original Board adoption 93-21-005 filed 10/7/93, effective 11/8/93]

(1) **Determination of best available retrofit technology (BART).** The ((Authority)) Agency shall identify and analyze each source which may reasonably be anticipated to cause or contribute to impairment of visibility in any mandatory Class I area in Washington and any adjacent state and to determine BART for the contaminant of concern and those additional air pollution control technologies that are to be required to reduce impairment from the source.

(2) **Initially defined BART.** The owner(s) or operator(s) of any source(s) to which significant visibility impairment of a mandatory Class I area is reasonably attributable shall apply BART for each contaminant contributing to visibility impairment that is emitted at more than 250 tons per year. Each source for which BART is required must install and operate BART as expeditiously as possible, but in no case later than five years after the conditions are included in a regulatory order.

(3) **Future definitions of BART.** The owner(s) or operator(s) of any source(s) to which significant visibility impairment of a mandatory Class I area is reasonably attributable shall apply BART as new technology becomes available for a contaminant if:

(a) The source emits more than 250 tons per year of the contaminant; and,

(b) The controls representing BART have not previously been required in this section.

(4) **Appeal.** Any source owner or operator required by this section to install, operate, and maintain BART, may apply to the EPA Administrator for an exception from that requirement pursuant to 40 CFR 51.303.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-21-005, filed 10/7/93, effective 11/8/93)

((SWAPCA)) SWCAA 400-160 Use of Dispersion Techniques (renumbered 11/93 to 400-200)

[Original Board adoption 4/17/84 (Refer to WAC 403); Amended by Board and renumbered to 400-200 in 93-21-005 filed 10/7/93, effective 11/8/93]

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-21-005, filed 10/7/93, effective 11/8/93)

((SWAPCA)) SWCAA 400-161 Compliance Schedules

[Statutory Authority: Chapter 70.94.141 RCW. Original Board adoption 10/29/69 (Regulation 2 Sec 5.08); Amended by Board 12/18/79 renumbered to 400-080; Amended by Board 4/17/84 deleted section; New section added 93-21-005 filed 10/7/93, effective 11/8/93]

(1) **Issuance.** Whenever a source is found to be in violation of an emission standard or other provision of this regulation the ((Authority)) Agency may issue a regulatory order requiring that the source be brought into compliance within a specified time. The order shall contain a schedule for installation of emission control technology, with intermediate benchmark dates and a final completion date, and shall constitute a compliance schedule. Requirements for public involvement ((SWAPCA)) SWCAA 400-171) must be met.

(2) **Federal action.** A source shall be considered to be in compliance with this regulation if all the provisions of its individual compliance schedule included with a regulatory order are being met. Such compliance does not preclude federal enforcement action by the EPA until and unless the schedule is submitted and adopted as an amendment to the State Implementation Plan.

(3) **Penalties for delayed compliance.** Sources on a compliance schedule but not meeting emissions standards may be subject to penalties as provided in the Federal Clean Air Act.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-21-005, filed 10/7/93, effective 11/8/93)

((SWAPCA)) SWCAA 400-170 Requirements for Board and Director (renumbered on 11/93 to 400-220)

[Original Board adoption 12/18/79; Amended by Board 12/18/79 renumbered to 400-190; Amended by Board 11/93 deleted section renumbered to 400-220, 93-21-005 filed 10/7/93, effective 11/8/93]

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-029, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-171 Public Involvement

[Statutory Authority: Chapter 70.94.141 RCW. Original Board adoption 93-21-005 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-029 filed 3/10/99, effective 4/11/99]

(1) **Applicability.** The ((Authority)) Agency shall provide public notice for a preliminary determination of a regulatory order prior to issuance of the final approval or denial of any of the following types of applications or other actions:

(a) Notice of Construction application for any new or modified source or emissions unit that results in a significant increase in emissions (actual or potential to emit) of any pollutant regulated by state or federal law (significant as defined in ((SWAPCA)) SWCAA 400-030). Furthermore, public notice for each regulatory order for a non-significant increase may be provided at the discretion of the Control Officer; or

(b) Any application or other proposed action for which a public hearing is required by PSD rules; or

(c) Any order to determine RACT; or

(d) Any order to establish a compliance schedule or a variance. A variance shall be handled as provided in SWCAA 400-180; or

(e) The establishment, disestablishment or redesignation of a nonattainment area, or the changing of the boundaries thereof; or

(f) Any order to demonstrate the creditable height of a stack which exceeds the GEP formula height and sixty-five meters, by means of a fluid model or a field study, for the purposes of establishing an emission limitation; or

(g) Any order to authorize a bubble; or

(h) Issuance of an Order of Discontinuance as provided in SWCAA 400-230(1)(g); or

((h))i) An order issued under ((SWAPCA)) SWCAA 400-091 which establishes limitations on a source's potential to emit for the purpose of opting out of the Title V Air Operating Permit program (WAC 173-401); or

((i))j) Any Notice of Construction application or other proposed action made pursuant to this regulation in which there is a substantial public interest according to the discretion of the Control Officer;
except:

((j))k) Any Notice of Construction application or other proposed action which results in a reduction of emissions from a previously established emission limit in an order issued by the ((Authority)) Agency that has previously been subjected to public notice, or other permitting authority, may not require public notice in accordance with this section. This exemption does not apply to those sources opting out of the Title V Air Operating Permit program (WAC 173-401).

((k))l) Any Notice of Construction application or other proposed action ((which)) that does not result in a net emissions increase (actual or potential to emit) unless otherwise required by the ((Authority)) Agency.

((l))m) Public notice for a preliminary determination of a regulatory order may run concurrently with immediate approval to operate provided that a corporate officer of the source submits an affidavit that they understand the liability associated with the action and agree to implement any necessary changes that would have otherwise resulted from the public comment process.

(2) **Public notice.** Public notice shall be made only after all information required by the ((Authority)) Agency has been submitted and after applicable preliminary determinations, if any, have been made. Public notice shall include:

(a) Availability for public inspection in at least one location near the proposed project, of the nonproprietary information submitted by the applicant and of any applicable preliminary determinations, including analyses of the effect(s) on air quality.

(b) Publication in a newspaper of general circulation in the area of the proposed project of notice:

(i) Giving a brief description of the proposal;

(ii) Advising of the location of the documents made available for public inspection;

(iii) Advising of a thirty-day period for submitting written comment to the ((Authority)) Agency;

(iv) Advising that a public hearing may be held if the ((Authority)) Agency determines within a thirty-day period that significant public interest exists.

(c) A copy of the notice shall be sent to the EPA Regional Administrator.

(d) Public participation procedures for Notice of Construction applications that are processed in coordination with an application to issue or modify a Title V Air Operating Permit shall be conducted as provided in WAC 173-401.

(3) **Public comment.** No final decision on any application or action of any of the types described in subsection (1) of this section, shall be made until the public comment period has ended and any comments received have been considered. Unless a public hearing is held, the public comment period shall be the thirty-day period for written comment published as provided above. If a public hearing is held, the public comment period shall extend through the hearing date and thereafter for such period, if any, as the notice of public hearing may specify.

(4) **Public hearings.** The applicant, any interested governmental entity, any group or any person may request a public hearing within the thirty-day period published as above. Any such request shall indicate the interest of the entity filing it and why a hearing is warranted. The ((Authority)) Agency may, at the discretion of the Control Officer, hold a public hearing if it determines significant public interest exists. Any such hearing(s) shall be held upon such notice and at a time(s) and place(s) as the ((Authority)) Agency deems reasonable.

(5) **Other requirements of law.** Whenever procedures permitted or mandated by law will accomplish the objectives of public notice and opportunity for comment, such procedures may be used in lieu of the provisions of this section.

(6) **Public information.** Copies of Notices of Construction, regulatory orders, and modifications thereof which are issued hereunder shall be available for public inspection on request at the ((Authority)) Agency.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-21-005, filed 10/7/93, effective 11/8/93)

((SWAPCA)) SWCAA 400-172 Technical Advisory Council

[Statutory Authority: Chapter 70.94.141 RCW, and 70.94.240 RCW. Original Board adoption 12/17/68 (Regulation 1 Sec 2.06); Amended by Board

12/18/79 recodified and removed; Amended by Board new section 93-21-005 filed 10/7/93, effective 11/8/93]

(1) **Purpose.** To provide input to the Board of Directors regarding technical and practical aspects of present and proposed regulations. To provide a cross section of knowledge of air quality problems and methods of reducing air pollution in the Southwest ~~Clean Air Pollution Control~~ ((Authority)) Agency's jurisdiction.

(2) **Objectives.** Review regulations and make recommendations to conform with the federal and state requirements and SIP.

(a) Study changes of the federal and state clean air acts. Draft and make recommendations for necessary revisions to ((SWAPCA)) SWCAA regulations. Provide technical support for those recommendations.

(b) Participate, as requested by the Board of Directors, in SIP revisions required by the FCAA as the revisions affect the region.

(3) **Committee.** The committee shall consist of at least seven members. These members shall represent, with technical interest, the public at large and the legal profession, with at least two members being representatives of industry. Each member shall retain the right to vote.

(4) **Chair.** The Chair of the Board of Directors shall serve as the ex officio member and Chair of the Technical Advisory Council. The Technical Advisory Council may adopt rules of procedure and shall meet on call subject to timely notice. The Technical Advisory Council shall elect a Vice Chair from the Council who shall retain the right to vote.

(5) **Term of Office.** Members may be appointed for a three year term ending June 30 of the third year of said term. No member shall serve for more than two consecutive three year terms.

Reviser's note: The typographical error in the above material occurred in the copy filed by the Southwest Clean Air Agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-029, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-180 Variance

[Statutory Authority: Chapter 70.94.141 RCW, and 70.94.181 RCW. Original Board adoption 12/17/68 (Regulation 1 Sec 2.07); Amended by Board 12/18/79; Amended by Board 4/17/84; Repealed and renumbered to 400-180 93-21-005 filed 10/7/93, effective 11/8/93, previous 400-180 (Maintenance of Pay was deleted; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-029 filed 3/10/99, effective 4/11/99)]

Any person who owns or is in control of a plant, building, structure, establishment, process, or equipment may apply to the ((Authority)) Agency for a variance from provisions of ((SWAPCA)) SWCAA regulations governing the quality, nature, duration, or extent of discharges of air contaminants in accordance with the provisions of RCW 70.94.181.

(1) **Jurisdiction.** Sources in any area over which the ((Authority)) Agency has jurisdiction shall make application to the ((Authority)) Agency. Variances to State rules shall

require approval of Ecology prior to being issued by the ((Authority)) Agency. The Board of Directors may grant a variance only after public involvement per ((SWAPCA)) SWCAA 400-171.

(2) **Full faith and credit.** Variances granted in compliance with state and federal laws by the ((Authority)) Agency for sources under its jurisdiction shall be accepted as variances to this regulation.

(3) **EPA concurrence.** No variance or renewal shall be construed to set aside or delay any requirements of the Federal Clean Air Act except with the approval and written concurrence of the USEPA.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-21-005, filed 10/7/93, effective 11/8/93)

((SWAPCA)) SWCAA 400-190 Requirements for Nonattainment Areas

[Statutory Authority: Chapter 70.94.141 RCW. Original Board Adoption 93-21-005 filed 10/7/93, effective 11/8/93]

The development of specific requirements for nonattainment areas shall include consultation with local government in the area and shall include public involvement per ((SWAPCA)) SWCAA 400-171. Requirements for new or modified sources in nonattainment areas are found in ((SWAPCA)) SWCAA 400-110 and ((SWAPCA)) SWCAA 400-112.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 95-17-084, filed 8/21/95, effective 9/21/95)

((SWAPCA)) SWCAA 400-200 Creditable Stack Height and Dispersion Techniques

[Statutory Authority: Chapter 70.94.141 RCW. Original Board adoption 400-160 4/17/84 (Refer to WAC 403); Amended by Board 92-04-030 filed 1/28/92; Amended by Board and renumbered to 400-200 in 93-21-005 filed 10/7/93, effective 11/8/93, original 400-200 was renumbered to 400-230; 95-17-084 filed 8/21/95, effective 9/21/95]

(1) **Applicability.** These provisions shall apply to all sources except:

(a) Stacks for which construction had commenced on or before December 31, 1970, except where pollutants are being emitted from such stacks used by sources which were constructed, or reconstructed, or for which major modifications were carried out after December 31, 1970;

(b) Coal-fired steam electric generating units subject to the provisions of Section 118 of the Federal Clean Air Act, which commenced operation before July 1, 1957, and for whose stacks construction commenced before February 8, 1974;

(c) Flares;

(d) Open or outdoor burning for agricultural or silvicultural purposes as covered under the Smoke Management Plan;

(e) Residential wood combustion and open or outdoor burning for which episodic restrictions apply.

These provisions shall not be construed to limit the actual stack height.

(2) **Prohibitions.** No source may use dispersion techniques or excess stack height to meet ambient air quality standards or PSD increment limitations.

(a) **Excess stack height.** Excess stack height is that portion of a stack ((which)) that exceeds the greater of:

(i) Sixty-five meters (213.25 feet), measured from the ground level elevation at the base of the stack; or

(ii) $H_g = H + 1.5L$ where:

H_g = "good engineering practice" (GEP) stack height, measured from the ground level elevation at the base of the stack,

H = height of nearby structure(s) measured from the ground level elevation at the base of the stack,

L = lesser dimension, height or projected width, of nearby structure(s), subject to the provisions below.

"Nearby," as used in this subsection for purposes of applying the GEP formula means that distance up to five times the lesser of the height or the width dimension of a structure, but not greater than 0.8 kilometer (1/2 mile).

(b) **Dispersion techniques.** Increasing final exhaust gas plume rise by manipulating source process parameters, exhaust gas parameters, stack parameters, or combining exhaust gases from several existing stacks into one stack; or other selective handling of exhaust gas streams so as to increase the exhaust gas plume rise. This does not include:

(i) The reheating of a gas stream, following the use of a pollution control system, for the purpose of returning the gas to the temperature at which it was originally discharged from the facility generating the gas stream;

(ii) The merging of gas streams where:

(A) The source was originally designed and constructed with such merged gas streams, as demonstrated by the source owner(s) or operator(s).

(B) Such merging is part of a change in operation at the facility that includes the installation of pollution controls and is accompanied by a net reduction in the allowable emissions of a pollutant. This exclusion shall apply only to the emission limitation for the pollutant affected by such change in operation.

(C) Before July 8, 1985, such merging was part of a change in operation at the facility that included the installation of emissions control equipment or was carried out for sound economic or engineering reasons, and not primarily motivated by an intent to gain emissions credit for greater dispersion.

(3) **Exception.** The ((Authority)) Agency may require the use of a field study or fluid model to verify the creditable stack height for the source. This also applies to a source seeking credit after the effective date of this rule for an increase in existing stack height up to that established by the GEP formula. A fluid model or field study shall be performed according to the procedures described in the *EPA Guideline for Determination of Good Engineering Practice Height* (Technical Support Document of the Stack Height Regulations). The creditable height demonstrated by a fluid

model or field study shall ensure that the emissions from a stack do not result in excessive concentrations of any air pollutant as a result of atmospheric downwash, wakes, or eddy effects created by the source itself, nearby structures or nearby terrain features.

(a) "Nearby," as used in this subsection for conducting a field study or fluid model, means not greater than 0.8 km, except that the portion of a terrain feature may be considered to be nearby which falls within a distance of up to ten times the maximum height of the feature, not to exceed two miles if such feature achieves a height 0.8 km from the stack that is at least forty percent of the GEP stack height or twenty-six meters, whichever is greater, as measured from the ground-level elevation at the base of the stack. The height of the structure or terrain feature is measured from the ground-level elevation at the base of the stack.

(b) "Excessive concentration" is defined for the purpose of determining creditable stack height under this subsection and means a maximum ground-level concentration owing to a significant downwash effect which contributes to excursion over an ambient air quality standard. For sources subject to PSD review (WAC 173-400-141 and 40 CFR 52.21) an excessive concentration alternatively means a maximum ground-level concentration owing to a significant downwash effect (~~(which)~~) that contributes to excursion over a PSD increment. The emission rate used in this demonstration shall be the emission rate specified in the State Implementation Plan, or in the absence of such, the actual emission rate of the source. "Significant downwash effect" means a maximum ground-level concentration due to emissions from a stack due in whole or in part to downwash, wakes, and eddy effects produced by nearby structures or nearby terrain features which individually is at least forty percent in excess of the maximum concentration experienced in the absence of such downwash, wakes, or eddy effects.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-21-005, filed 10/7/93, effective 11/8/93)

~~((SWAPCA))~~ **SWCAA 400-205 Adjustment for Atmospheric Conditions**

[Statutory Authority: Chapter 70.94.141 RCW and 70.94.331 RCW. Original Board adoption 93-21-005 filed 10/7/93, effective 11/8/93]

Varying the rate of emission of a pollutant according to atmospheric conditions or ambient concentrations of that pollutant is prohibited, except as directed according to air pollution episode regulations as specified at ~~((SWAPCA))~~ **SWCAA 400-230(5)**.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-21-005, filed 10/7/93, effective 11/8/93)

~~((SWAPCA))~~ **SWCAA 400-210 Emission Requirements of Prior Jurisdictions**

[Statutory Authority: Chapter 70.94.141 RCW and 70.94.331 RCW. Original Board adoption 93-21-005 filed 10/7/93, effective 11/8/93, previous 400-210 (Criminal Penalties) was renumbered to 400-240]

Any emissions unit that was under the jurisdiction of the ~~((Authority))~~ **Agency** and now is under the jurisdiction of Ecology, shall meet all emission requirements that were applicable prior to transfer of jurisdiction if those standards are more stringent than the standards of this regulation or the specific regulation relating to that source.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-21-005, filed 10/7/93, effective 11/8/93)

~~((SWAPCA))~~ **SWCAA 400-220 Requirements for Board Members**

[Statutory Authority: Chapter 70.94.100 RCW, and 70.94.141 RCW. Original Board adoption as 400-170 12/18/79; Amended by Board 4/17/84 renumbered to 400-190; Amended by Board deleted section and renumbered to 400-220 in 93-21-005 filed 10/7/93, effective 11/8/93]

(1) **Public interest.** A majority of the members of the ~~((Authority))~~ **Agency's** Board of Directors shall represent the public interest. A majority of the members of the Board shall not derive any significant portion of their income from persons subject to enforcement orders pursuant to the State and Federal Clean Air Acts. An elected public official and the Board shall be presumed to represent the public interest. In the event that a member derives a significant portion of his/her income from persons subject to enforcement orders, he/she shall delegate sole responsibility for administration of any part of the program (~~(which)~~) that involves these persons to an assistant.

(2) **Disclosure.** Each member of the ~~((Authority))~~ **Agency's** Board of Directors shall adequately disclose any potential conflict of interest in any matter prior to any action or consideration thereon, and the member shall remove themselves from participation as a Board member in any action or voting on such matter.

(3) **Define significant income.** For the purposes of this section, "significant portion of income" shall mean twenty percent of gross personal income for a calendar year. In the case of a retired person, "significant portion of income" shall mean fifty percent of income in the form of pension or retirement benefits from a single source other than Social Security. Income derived from employment with local or state government shall not be considered in the determination of "significant portion of income".

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-029, filed 3/10/99, effective 4/11/99)

~~((SWAPCA))~~ **SWCAA 400-230 Regulatory Actions & Civil Penalties**

[Statutory Authority: Chapter 70.94.141 RCW, 70.94.211 RCW, 70.94.332 RCW, 70.94.425 RCW, 70.94.431, and 70.94.435 RCW. Original Board adoption 12/17/68 (Regulation 1 Sec 2 & 3); Amended by Board renumbered to 400-130 12/18/79; Amended by Board renumbered to 400-200 4/17/84;

PROPOSED

Amended by Board 12/16/86; Amended by Board 1/21/92, 92-04-030 filed 1/28/92; 93-21-005 filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-029 filed 3/10/99, effective 4/11/99]

(1) The ((Authority)) Agency shall have the power to issue such orders as necessary to effectuate the purpose of RCW 70.94 as provided in, including but not limited to: RCW 70.94.141, RCW 70.94.152, RCW 70.94.153, and RCW 70.94.332. The ((Authority)) Agency may issue orders for establishing limits and controls for sources of emissions to the ambient air or otherwise controlling activities that may violate any ambient air quality regulations, including but not limited to the following:

(a) **Order of Approval.** An Order of Approval may be issued by the ((Authority)) Agency to provide approval for a Notice of Construction application. An Order of Approval shall contain the following, as appropriate: reference to applicable regulations, emissions limitations, control and process equipment operating conditions and limits, testing requirements, monitoring and reporting requirements, and other conditions considered necessary by the ((Authority)) Agency. An Order of Approval which constitutes the final determination of the ((Authority)) Agency, shall be issued within sixty (60) calendar days of a complete application or for those projects subject to public notice, as promptly as possible after the 30 calendar day public notice requirements have been satisfied. An Order of Approval may not identify all applicable regulations. All Orders of Approval may be subject to the public notice and comment procedures set forth in ((SWAPCA)) SWCAA 400-171 (2), (3), and (4).

(b) **Order of Denial.** An Order of Denial may be issued by the ((Authority)) Agency in response to a Notice of Construction application that is incomplete, not feasible, proposes inadequate control technology, or otherwise would result in violation of any ambient air quality regulation, control technology requirement, or emission standards in the area in which the equipment would be located and operated. All Orders of Denial shall be subject to the public notice and comment procedures set forth in ((SWAPCA)) SWCAA 400-171 (2), (3), and (4).

(c) **Order of Violation.** An Order of Violation may be issued by the ((Authority)) Agency to document specific regulation(s) alleged to be violated and establish the facts surrounding a violation. An Order of Violation may be prepared by the ((Authority)) Agency only after formal written notice has been served on the source as provided in (2) below. The Order of Violation shall not be subject to the public notice and comment period set forth in ((SWAPCA)) SWCAA 400-171.

(d) **Order of Prevention.** An Order of Prevention may be issued by the ((Authority)) Agency to a source to prevent installation or construction of an emission unit, performance of an activity, or actions that may otherwise endanger public health that are on site, in the process of being installed, or have been installed, constructed or operated without prior ((Authority)) Agency review and approval or actions are being conducted in addition to a previous ((Authority)) Agency approval without prior approval. An Order of Prevention shall not be subject to the public notice and comment period set forth in ((SWAPCA)) SWCAA 400-171.

(e) **Consent Order.** A Consent Order may be issued by the ((Authority)) Agency to establish emission limits, operation and maintenance limits or controls, monitoring or reporting requirements, testing requirements, or other limits or controls as necessary that are determined by the ((Authority)) Agency to be necessary. Actions identified in a Consent Order may be necessary to demonstrate compliance with applicable regulations, provide measures whereby a source may take the necessary steps to achieve compliance, establish a schedule for activities, or provide other information that the Control Officer deems appropriate. The Consent Order shall be agreed to and signed by an appropriate officer of the company or source for which the Consent Order is prepared and the Control Officer, or designee, of the ((Authority)) Agency. Installation, construction, modification or operation of a source shall be subject to the New Source Review requirements of ((SWAPCA)) SWCAA 400-110. A Consent Order shall not be subject to the public notice and comment period set forth in ((SWAPCA)) SWCAA 400-171 at the discretion of the Control Officer.

(f) **Compliance Schedule Order.** A Compliance Schedule Order may be issued by the ((Authority)) Agency to a source to identify specific actions that must be implemented to establish, maintain, and/or demonstrate compliance with applicable regulations and identify the schedule by which these actions must be completed. All Compliance Schedule Orders shall be subject to the public notice and comment period set forth in SWAPCA 400-171 (2), (3), and (4). Refer to ((SWAPCA)) SWCAA 400-161 for further guidance.

(g) **Order of Discontinuance.** The ((Authority)) Agency may issue an Order of Discontinuance for any source that has discontinued operations and/or has not maintained their source registration for emission units. (Refer to ((SWAPCA)) SWCAA 400-100 (2)(d)). An Order of Discontinuance may also be issued to a source that continues to operate in violation of applicable regulations and requirements. Such issuance may require that the source cease operations that result in emissions to the ambient air that are in violation of applicable regulatory orders, requirements and regulations.

(i) Any source that fails to maintain registration fees (i.e., payment of registration fees by June 30 of each year), may be issued an Order of Discontinuance. The Order of Discontinuance shall identify the source location and emission units and identify the most current registration activity.

(ii) The Order of Discontinuance shall provide for discontinuance of operations at that source or facility and all previous authorizations, orders, agreements or stipulations shall be superseded, directly or indirectly, by the Order of Discontinuance without specific identification in the Order of Discontinuance.

(iii) The Order of Discontinuance shall be subject to the public notice and comment procedures set forth in ((SWAPCA)) SWCAA 400-171 (2), (3), and (4).

(iv) For sources that have ceased doing business in ((SWAPCA)) SWCAA jurisdiction, or the state of Washington, the ((Authority)) Agency shall make a reasonable effort to establish contact with the source. If the ((Authority)) Agency is unable to establish contact with the source, the

((Authority)) Agency shall issue an Order of Discontinuance via certified mail, return receipt requested, to the last known address. Lack of response by the source or return of the notification by the US Postal Service shall be considered de facto evidence that the source has discontinued operations.

(v) The source shall have 30 calendar days from the date of the final regulatory order after public notice in which to pay past due and current registration fees. If the source fails to pay current registration fees, the source or facility shall be considered discontinued and shall be required to submit a Notice of Construction application under the New Source Review procedures of ((SWAPCA)) SWCAA 400-110 prior to resuming or restarting operations.

(vi) Facilities that terminate operations and discontinue paying registration fees, and are later sold with the intent of restart, in whole or in part, shall be subject to the New Source Review requirements of ((SWAPCA)) SWCAA 400-110.

(vii) Sources that continue to operate in violation of established regulatory orders and regulations, the ((Authority)) Agency may issue an Order of Discontinuance that is effective immediately.

(h) **Corrective Action Order.** The ((Authority)) Agency may issue a Corrective Action Order to any source within its jurisdiction, including an unregistered source, to provide measures to correct or rectify a situation that has immediate or eminent threat to person(s) or the public or that may be in violation or have the potential of being in violation of federal, state and local regulations or may pose a threat to the public health, welfare or enjoyment of personal or public property. The Corrective Action Order may specify specific actions that must be implemented to demonstrate compliance with applicable regulations and identify dates by which these actions must be completed. All actions and dates identified in the Corrective Action Order shall be fully enforceable. Corrective Action Orders shall be issued to correct immediate problems. Corrective Action Orders shall not be subject to the public notice and comment period set forth in ((SWAPCA)) SWCAA 400-171.

(i) **Administrative Order.** An Administrative Order may be issued to a source by the ((Authority)) Agency to provide for implementation of items not addressed above, that are identified by the Control Officer. An Administrative Order may contain emission limits, operating and maintenance limitations and actions, schedules, resolutions by the Board of Directors, provide for establishing attainment or nonattainment boundaries, establish working relationships with other regulatory agencies, establish authority for enforcement of identified actions, and other activities identified by the ((Authority)) Agency. All Administrative Orders shall be subject to the public notice and comment procedures set forth in ((SWAPCA)) SWCAA 400-171 (2), (3), and (4).

(j) **Resolutions.** A Resolution may be issued by the ((Authority)) Agency as a means to document or record a Board of Directors decision, authorize or approve budget transactions, establish policies, or other actions as determined by the ((Authority)) Agency. Resolutions shall not be subject to the public notice and comment procedures set forth in ((SWAPCA)) SWCAA 400-171.

(2) The ((Authority)) Agency may take any of the following regulatory actions to enforce its regulations to meet the provisions of RCW 43.21B.300 which is incorporated herein by reference.

(a) **Enforcement Actions by the ((Authority)) Agency—Notice of Violation.** At least thirty days prior to the commencement of any formal enforcement action under RCW 70.94.430 and 70.94.431, the ((Authority)) Agency shall cause written notice to be served upon the alleged violator or violators. The notice shall specify the provision of this regulation, or the rule, regulation, regulatory order or permit requirement alleged to be violated, and the facts alleged to constitute a violation thereof, and may include an order that necessary corrective action be taken within a reasonable time. In lieu of an order, the ((Authority)) Agency may require that the alleged violator or violators appear before it for the purpose of providing the ((Authority)) Agency information pertaining to the violation or the charges complained of. Every Notice of Violation shall offer to the alleged violator an opportunity to meet with the ((Authority)) Agency prior to the commencement of enforcement action. Enforcement action may be commenced by the ((Authority)) Agency by issuance of a regulatory order as provided in ((SWAPCA)) SWCAA 400-230(1).

(b) **Civil Penalties.**

(i) In addition to or as an alternate to any other penalty provided by law, any person (e.g. owner, owner's agent, contractor, operator) who violates any of the provisions of Chapter 70.94 or 70.120 RCW, or any of the rules in force under such chapters may incur a civil penalty in an amount as set forth in RCW 70.94.431. Each such violation shall be a separate and distinct offense, and in case of a continuing violation, each day's continuance shall be a separate and distinct violation. Any person who fails to take action as specified by an order issued pursuant to this regulation shall be liable for a civil penalty as set forth by RCW 70.94.431 for each day of continued noncompliance.

(ii) Penalties incurred but not paid shall accrue interest, beginning on the ninety-first day following the date that the penalty becomes due and payable, at the highest rate allowed by RCW 19.52.020 on the date that the penalty becomes due and payable. If violations or penalties are appealed, interest shall not begin to accrue until the thirty-first day following final resolution of the appeal. The maximum penalty amounts established in RCW 70.94.431 may be increased annually to account for inflation as determined by the State Office of the Economic and Revenue Forecast Council.

(iii) Each act of commission or omission ((which)) that procures, aids, or abets in the violation shall be considered a violation under the provisions of this section and subject to the same penalty. The penalties provided in this section shall be imposed pursuant to RCW 43.21B.300. Section 113(e)(2) of the 1990 Clean Air Act Amendments provides that the number of "days of violation" is to be counted beginning on the first proven day of violation and continuing every day until the violator demonstrates that it achieved continuous compliance, unless the violator can prove by preponderance of the evidence that there were intervening days on which no

violation occurred. This definition applies to all civil and administrative penalties.

(iv) All penalties recovered under this section by the ((Authority)) Agency, shall be paid into the treasury of the ((Authority)) Agency and credited to its funds.

(v) To secure the penalty incurred under this section, the ((Authority)) Agency shall have a lien on any equipment used or operated in violation of its regulations which shall be enforced as provided in RCW 60.36.050. The ((Authority)) Agency shall also be authorized to utilize a collection agency for nonpayment of penalties and fees.

(vi) In addition to other penalties provided by this regulation, persons knowingly under-reporting emissions or other information used to set fees, or persons required to pay emission or permit fees who are more than ninety days late with such payments may be subject to a penalty equal to three times the amount of the original fee owed.

(3) **Assurance of Discontinuance.** The Control Officer may accept an assurance of discontinuance as provided in RCW 70.94.435 of any act or practice deemed in violation of this regulation as written and certified to by the source. Any such assurance shall specify a time limit during which discontinuance or corrective action is to be accomplished. Failure to perform the terms of any such assurance shall constitute prima facie proof of a violation of its regulations or any order issued thereunder which make the alleged act or practice unlawful for the purpose of securing an injunction or other relief from the Superior Court.

(4) **Restraining Orders & Injunctions.** Whenever any person has engaged in, or is about to engage in, any acts or practices which constitute or will constitute a violation of any provision of its regulations, the Control Officer, after notice to such person and an opportunity to comply, may petition the superior court of the county wherein the violation is alleged to be occurring or to have occurred for a restraining order or a temporary or permanent injunction or another appropriate order.

(5) **Emergency Episodes.** The ((Authority)) Agency may issue such orders as authorized by ((SWAPCA)) SWCAA 435 via Chapter 70.94 RCW, whenever an air pollution episode forecast is declared.

(6) **Compliance Orders.** The ((Authority)) Agency may issue a compliance order in conjunction with a Notice of Violation or when the Control Officer has reason to believe a regulation is being violated, or may be violated. The order shall require the recipient of the Notice of Violation either to take necessary corrective action or to submit a plan for corrective action and a date when such action will be initiated and completed.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-21-005, filed 10/7/93, effective 11/8/93)

((SWAPCA)) SWCAA 400-240 Criminal Penalties

[Statutory Authority: Chapter 70.94.141 RCW, and 70.94.430 RCW. Original Board adoption 12/17/68 (Regulation 1 Sec 2.09); Amended by Board 10/29/69 (Regulation 2 Sec 2.03); Amended by Board and renumbered to 400-135 12/18/79; Amended by Board renumber to 400-210 4/17/84;

Amended by Board 1/21/92, 92-04-030 filed 1/28/92; 93-21-005 filed 10/7/93, effective 11/8/93]

Persons in violation of the ((Authority)) Agency's regulations or Title 173 WAC may be subject to the provisions of RCW 70.94.430.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-029, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-250 Appeals

[Statutory Authority: Chapter 70.94.141 RCW, and 70.94.221 RCW. Original Board adoption 12/18/79 as 400-140; Amended by Board renumbered to 400-220 4/17/84; renumbered to 400-250 93-21-005, filed 10/7/93, effective 11/8/93; 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-029 filed 3/10/99, effective 4/11/99]

(1) Any decision or regulatory order issued by the ((Authority)) Agency may be appealed to the Board of Directors as provided herein or appealed directly to the Pollution Control Hearings Board as provided by RCW 43.21B and WAC 371-08. In addition, Orders of Approval and permits issued in accordance with the PSD program may be appealed to the EPA Environmental Appeals Board, to the extent authorized in 40 CFR 124. If appealed to the Board of Directors, the procedure shall be as follows:

(a) The decision, Notice of Violation, or Order issued by the Control Officer shall become final unless, not later than 15 calendar days after the date the Order is served upon the owner or applicant, the owner or applicant petitions the Control Officer for reconsideration, with reasons for the reconsideration. If the Control Officer refuses to reconsider, the Control Officer shall so notify the owner or applicant in writing, giving reasons for the decision. Such ruling on the petition shall become final unless not later than 15 calendar days after such notice of refusal is served, the owner or applicant appeals to the Board setting forth the reasons for the appeal.

(b) The Control Officer may reverse or modify the Order and issue such an Order in replacement thereof as deemed proper. Such Order also may be appealed to the Board of Directors as in (a) above.

(c) Any failure of the Control Officer to act upon a petition for reconsideration 15 calendar days after the petition is delivered to the ((Authority)) Agency, shall be considered as a refusal to reconsider.

(d) In lieu of a petition for reconsideration, the owner or applicant may appeal directly to the Board of Directors within the time specified in (a) above.

(2) The Board shall promptly hear and consider all appeals after providing reasonable notice to the appellant. The Board shall, within 30 calendar days of the hearing sustain, reverse or modify the Order of the Control Officer as it deems proper. Such ruling of the Board shall be communicated to the appellant in writing and the appellant if aggrieved, may appeal de novo to the Pollution Control Hearings Board as provided in RCW 43.21B.230 and WAC 371-08.

(3) It is the intent of the Board in establishing this regulation concerning appeals to provide for a method of resolving issues at the ((Authority)) Agency level. Consequently,

Decisions and Orders of the Control Officer on compliance, new source review, or any other matter regulated herein except violations shall not be considered as commencing any appeal period for appeals to the Pollution Control Hearings Board. Such appeal period shall commence only when the final Order is issued by the Board of Directors and served upon the person aggrieved as provided in RCW 43.21B.120.

(4) Nothing contained herein shall be construed as denying the exclusive jurisdiction of the Pollution Control Hearings Board on violations as provided by RCW 43.21B.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-21-005, filed 10/7/93, effective 11/8/93)

((SWAPCA)) SWCAA 400-260 Conflict of Interest

[Statutory Authority: Chapter 70.94.100 RCW, and 70.94.141 RCW. Original Board adoption 93-21-005 filed 10/7/93, effective 11/8/93]

All board members and officials acting or voting on decisions affecting air pollution sources, must comply with the Federal Clean Air Act, as it pertains to conflict of interest, and 40 CFR 103(d) which is incorporated by reference.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 95-17-084, filed 8/21/95, effective 9/21/95)

((SWAPCA)) SWCAA 400-270 Confidentiality of Records and Information

[Statutory Authority: Chapter 70.94.141 RCW, and 70.94.205 RCW. Original Board adoption 10/29/69 (Regulation 2 Sec 2.05); Amended by Board 12/18/79 recodified and removed; new section 95-17-084 filed 8/21/95, effective 9/21/95]

(1) The owner or operator (or person submitting the information) is responsible for clearly identifying the information that is considered proprietary and confidential prior to submittal to the ((Authority)) Agency. Information submitted to the ((Authority)) Agency that has not been identified as confidential at the time of submittal may not be classified as confidential at a later date.

(2) Confidential information submitted to the ((Authority)) Agency by an owner or operator shall be stamped or clearly marked in red ink at the time of submittal. Such information considered to be confidential or proprietary by the owner or operator will be handled as such, and will be maintained by the ((Authority)) Agency, to the extent that release of such information may provide unfair economic advantage or compromise processes, products, or formulations to competitors as provided under RCW 70.94.205. Requests for such information under the Freedom of Information Act shall be released only after:

(a) Legal opinion by the ((Authority)) Agency's legal counsel, and

(b) Notice to the source of the intent to either release or deny the release of information.

(3) Records or other information, other than ambient air quality data or emission data, furnished to or obtained by the

((Authority)) Agency, related to processes or production unique to the owner or operator if released to the public or to a competitor, and the owner or operator of such processes or production so certifies, such records or information shall be only for the confidential use of the ((Authority)) Agency as provided in RCW 70.94.205, Title 18 USC 1905, Section 114 of the 1990 Federal Clean Air Act Amendments, and 40 CFR 2 "Public Information".

(4) Emissions data furnished to or obtained by the ((Authority)) Agency shall be correlated with applicable emission limitations and other control measures and shall be available for public inspection during normal business hours at the office of the ((Authority)) Agency.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-029, filed 3/10/99, effective 4/11/99)

((SWAPCA)) SWCAA 400-280 Powers of ((Authority)) Agency

[Statutory Authority: Chapter 70.94.141 RCW. 95-17-084 filed 8/21/95, effective 9/21/95; 99-07-029 filed 3/10/99, effective 4/11/99]

In addition to any other powers vested in the ((Authority)) Agency, consistent with RCW 70.94.141, the ((Authority)) Agency shall have the power to:

(1) Adopt, amend, and repeal its own rules and regulations, implementing RCW 70.94 and consistent with it, after consideration at a public hearing held in accordance with RCW 42.30. Rules and regulations shall also be adopted in accordance with the notice and adoption procedures set forth in RCW 34.05.320, those provisions of RCW 34.05.325 that are not in conflict with RCW 42.30, and with the procedures of RCW 34.05.340, 34.05.355 through 34.05.380, and with RCW 34.08, except that rules shall not be published in the Washington Administrative Code. Judicial review of rules adopted by the ((Authority)) Agency shall be in accordance with Part V of RCW 34.05.

(2) Hold hearings relating to any aspect of or matter in the administration of RCW 70.94 not prohibited by the provisions of Chapter 62, Laws of 1970 ex. sess. and in connection therewith issue subpoenas to compel the attendance of witnesses and the production of evidence, administer oaths and take the testimony of any person under oath.

(3) Issue such orders as may be necessary to effectuate RCW 70.94 and enforce the same by all appropriate administrative and judicial proceedings subject to the rights of appeal as provided in Chapter 62, Laws of 1970 ex. sess.

(4) Require access to records, books, files and other information specific to the control, recovery or release of air contaminants into the atmosphere.

(5) Secure necessary scientific, technical, administrative and operational services, including laboratory facilities, by contract, or otherwise.

(6) Prepare and develop a comprehensive plan or plans for the prevention, abatement and control of air pollution within the jurisdiction of the ((Authority)) Agency.

(7) Encourage voluntary cooperation by persons or affected groups to achieve the purposes of RCW 70.94.

(8) Encourage and conduct studies, investigations and research relating to air pollution and its causes, effects, prevention, abatement and control.

(9) Collect and disseminate information and conduct educational and training programs relating to air pollution.

(10) Advise, consult, cooperate and contract with agencies and departments and the educational institutions of the state, other political subdivisions, industries, other states, interstate or interlocal agencies, and the United States government, and with interested persons or groups.

(11) Consult, upon request, with any person proposing to construct, install, or otherwise acquire an air contaminant source or device or system, concerning the efficacy of such device or system, or the air pollution problems which may be related to the source, device or system. Nothing in any such consultation shall be construed to relieve any person from compliance with RCW 70.94, ordinances, resolutions, rules and regulations in force pursuant thereto, or any other provision of law.

(12) Accept, receive, disburse and administer grants or other funds or gifts from any source, including public and private agencies and the United States government for the purpose of carrying out any of the functions of RCW 70.94.

except:

(13) ~~((SWAPCA))~~ SWCAA may not hold adjudicative proceedings pursuant to the Administrative Procedures Act (RCW 34.05). Such hearings shall be held by the Pollution Control Hearings Board as provided at RCW 43.21B.240.

Reviser's note: The typographical error in the above material occurred in the copy filed by the Southwest Clean Air Agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION

~~((SWAPCA))~~ SWCAA 400-290 Severability

[Statutory Authority: Chapter 70.94.141 RCW, and RCW 43.21B.001 notes. Original Board adoption 12/17/68 (Regulation 1 Sec 2.08); Amended by Board 10/29/69 (Regulation 2 Sec 2.02); Amended by Board 12/18/79 renumbered to 400-175; Amended by Board 4/17/84 removed section;]

The provisions of this regulation are severable. If any provision, meaning phrase, clause, subsection or section, or its application to any person or circumstance is held to be invalid by any court of competent jurisdiction, the application of such provision to other circumstances and the remainder of the regulation to other persons or circumstances will not be affected.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The typographical error in the above material occurred in the copy filed by the Southwest Clean Air Agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 99-07-029, filed 3/10/99, effective 4/11/99)

APPENDIX A

[Statutory Authority: Chapter 70.94.141 RCW. Original Board adoption - 99-07-029 filed 3/10/99, effective 4/11/99]

~~((SWAPCA))~~ SWCAA METHOD 9

VISUAL OPACITY DETERMINATION METHOD

1. Principle

The opacity of emissions from stationary sources is determined visually by a qualified observer.

2. Procedure

The observer must be certified in accordance with the provisions of Section 3 of 40 CFR Part 60, Appendix A, Method 9, as in effect on July 1, ~~((1998))~~ 2000.

2.1 Position

The observer shall stand at a distance sufficient to provide a clear view of the emissions with the sun oriented in the 140° sector to his/her back. Consistent with maintaining the above requirement, the observer shall, as much as possible, make his/her observations from a position such that his/her line of vision is approximately perpendicular to the plume direction, and when observing opacity of emissions from rectangular outlets (e.g., roof monitors, open baghouses, non-circular stacks), approximately perpendicular to the longer axis of the outlet. The observer's line of sight should not include more than one plume at a time when multiple stacks are involved, and in any case, the observer should make his/her observations with his/her line of sight perpendicular to the longer axis of such a set of multiple stacks (e.g., stub stacks on baghouses).

2.2 Field Records

The observer shall record the name of the plant, emission location, type of facility, observer's name and affiliation, a sketch of the observer's position relative to the source, and the date on a field data sheet. The time, estimated distance to the emission location, approximate wind direction, estimated wind speed, description of the sky condition (presence and color of clouds), and plume background are recorded on a field data sheet at the time opacity readings are initiated and completed.

2.3 Observations

Opacity observations shall be made at the point of greatest opacity in that portion of the plume where condensed water vapor is not present. The observer shall not look continuously at the plume, but instead shall observe the plume momentarily at 15-second intervals.

2.3.1 Attached Steam Plumes

When condensed water vapor is present within the plume as it emerges from the emission outlet, opacity observations shall be made beyond the point in the plume at which condensed water vapor is no longer visible. The observer shall record the approximate distance from the emission outlet to the point in the plume at which the observations are made.

PROPOSED

2.3.2 Detached Steam Plumes

When water vapor in the plume condenses and becomes visible at a distinct distance from the emission outlet, the opacity of emissions should be evaluated at the emission outlet prior to the condensation of water vapor and the formation of the steam plume.

2.4 Recording Observations

Opacity observations shall be recorded to the nearest 5 percent at 15-second intervals on a field data sheet. A minimum of 24 observations shall be recorded. Each momentary observation recorded shall be deemed to represent the average opacity of emissions for a 15-second period.

2.5 Data Reduction

The number of observation at each opacity level shall be determined and recorded on the field data sheet. Opacity shall be determined by the highest 13 observations in any consecutive 60-minute period. The opacity standard or emissions limit is exceeded if there are more than 12 observations during any consecutive 60-minute period for which an opacity greater than the standard or emission limit is recorded. The opacity standard is a 1 hour standard (rolling 60 minutes). Only one violation of the standard per hour may be recorded meaning that a violation for any given consecutive 60-minute period may be recorded in substantially fewer than 60 minutes. No one-hour time sets shall overlap for purpose of determining a violation or violations. Data used to establish a violation in one consecutive 60-minute period can not be used to establish a violation in a second consecutive 60-minute period.

3. References

Federal Register, Vol. 36, No. 247, page 24895, December 23, 1971.

"Criteria for Smoke and Opacity Training School 1970 - 1971" Oregon-Washington Air quality Committee."

"Guidelines for Evaluation of Visible Emissions" EPA 340/1-75-007."

Notes: (1) The difference between the ((SWAPCA)) SWCAA Method 9 and WDOE Method 9 or WDOE Method 9A is the ((SWAPCA)) SWCAA method does not recommend that the observer make note of the ambient relative humidity, ambient temperature, the point in the plume that the observations were made, the estimated depth of the plume at the point of observation, and the color and condition of the plume. In addition, the SWAPCA method does not recommend that pictures be taken.

(2) The difference between the ((SWAPCA)) SWCAA Method 9 and EPA Method 9 is in the data reduction section. The ((SWAPCA)) SWCAA method establishes a three-minute period in any one-hour period where opacity can not exceed an opacity limit. For the ((SWAPCA)) SWCAA method, 13 readings in a 1-hour period or less, above the established opacity limit, no matter how much, constitutes a violation. The EPA method is an arithmetic average of any 24 consecutive readings at 15-second intervals. These values are averaged and this average value cannot exceed the established opacity limit.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

WSR 00-24-092
PROPOSED RULES
SOUTHWEST
CLEAN AIR AGENCY

[Filed December 5, 2000, 11:01 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 00-17-030.

Title of Rule: SWAPCA 476 Standards for Asbestos Control, Demolition and Renovation.

Purpose: This is an existing rule that establishes emission standards and controls for the safe handling and removal of asbestos material. This rule is substantially similar to the existing federal rules.

Statutory Authority for Adoption: RCW 70.94.141.

Statute Being Implemented: RCW 70.94.141.

Summary: The changes proposed in this rule are administrative in nature. The rule is being revised to reflect a name change for the agency. No technical changes are proposed.

Reasons Supporting Proposal: The name of the agency was changed July 6, 2000, from the Southwest Air Pollution Control Authority (SWAPCA) to the Southwest Clean Air Agency (SWCAA).

Name of Agency Personnel Responsible for Drafting and Implementation: Paul Mairose, 1308 N.E. 134th Street, Vancouver, WA, (360) 574-3058; and Enforcement: Robert D. Elliott, 1308 N.E. 134th Street, Vancouver, WA, (360) 574-3058.

Name of Proponent: Southwest Clean Air Agency, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: This is an existing rule. Only administrative type changes are being proposed. There will be no effect on the public or regulated businesses as a result of these changes.

Proposal Changes the Following Existing Rules: Titles and rule numbers that include the agency name are being changed to reflect the name of the agency.

No small business economic impact statement has been prepared under chapter 19.85 RCW. Changes proposed by SWCAA are consistent with federal and state rules already in effect. This agency is not subject to the small business economic impact provisions of chapter 19.85 RCW.

RCW 34.05.328 does not apply to this rule adoption. Pursuant to RCW 70.94.141(1), section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. SWCAA is not voluntarily invoking section 201, chapter 403, Laws of 1995.

Hearing Location: Office of SWCAA, 1308 N.E. 134th Street, Vancouver, WA 98685, on February 1, 2001, at 3:00 p.m.

PROPOSED

Assistance for Persons with Disabilities: Contact Mary Allen by January 26, 2001, TDD (360) 574-3058.

Submit Written Comments to: Paul Mairose, 1308 N.E. 134th Street, Vancouver, WA 98685, fax (360) 574-3058, by January 19, 2001.

Date of Intended Adoption: February 1, 2001.

December 4, 2000

Robert D. Elliott
Executive Director

((SWAPCA)) **SWCAA 476**

**STANDARDS FOR ASBESTOS
CONTROL, DEMOLITION, AND RENOVATION**

- 476-010 Purpose**
476-020 Applicability
476-030 Definitions
476-040 Asbestos Survey Requirements
476-050 Notification Requirements and Fees
476-060 Procedures for Asbestos Emission Control
476-070 Disposal of Asbestos-Containing Waste Material
476-080 Demolition By Intentional Burning
476-090 Severability

AMENDATORY SECTION (Amending WSR 96-20-073, filed 9/30/96, effective 11/1/96)

((SWAPCA)) **SWCAA 476-010 Purpose**

[Statutory Authority: Chapter 70.94.141 RCW. WSR 93-16-008 filed 7/22/93, effective 8/22/93; 96-20-073 filed 9/30/96, effective 11/1/96]

The purpose of this regulation is to control asbestos emissions from the removal, encapsulation, salvage, disposal, or disturbance of asbestos-containing materials in order to protect public health.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 96-20-073, filed 9/30/96, effective 11/1/96)

((SWAPCA)) **SWCAA 476-020 Applicability**

[Statutory Authority: Chapter 70.94.141 RCW. WSR 93-16-008 filed 7/22/93, effective 8/22/93; 96-20-073 filed 9/30/96, effective 11/1/96]

This regulation shall apply to all demolition and renovation activities, removal of asbestos containing material, storage, transport, and disposal of asbestos containing materials and other specific activities as referenced in 40 CFR 61.140 et seq. (Subpart M).

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 96-20-073, filed 9/30/96, effective 11/1/96)

((SWAPCA)) **SWCAA 476-030 Definitions**

[Statutory Authority: Chapter 70.94.141 RCW. WSR 93-16-008 filed 7/22/93, effective 8/22/93; 96-20-073 filed 9/30/96, effective 11/1/96]

(1) "**Adequately wet**" means sufficiently mixed, saturated, penetrated, or coated with a fine mist of water or aqueous solution to prevent emissions.

(2) "**AHERA Building Inspector**" means a person who has successfully completed the training requirements for a building inspector established by the EPA Asbestos Model Accreditation Plan; Interim Final Rule (40 CFR 763, Appendix C to Subpart E, I.B.3) and whose certification is current. (Asbestos Hazard Emergency Response Act - AHERA)

(3) "**AHERA Project Designer**" means a person who has successfully completed the training requirements for an abatement project designer established by EPA regulations (40 CFR 763.90(g)) and whose certification is current.

(4) "**Asbestos**" means the asbestiform varieties of actinolite, amosite (cummingtonite-grunerite), tremolite, chrysotile (serpentine), crocidolite (riebeckite), or anthophyllite.

(5) "**Asbestos-Containing Material**" means any material containing at least one percent (1%) asbestos as determined by polarized light microscopy using the interim Method of the Determination of Asbestos in Bulk Samples contained in Appendix A of Subpart F in 40 CFR Part 763. This term does not include nonfriable asbestos-containing roofing materials, regardless of asbestos content, when the following conditions are met:

(a) The asbestos-containing roofing material is in good condition and is not peeling, cracking, or crumbling; and

(b) The binder is petroleum based, the asbestos fibers are suspended in that base, and individual fibers are still encapsulated; and

(c) The binder still exhibits enough plasticity to prevent the release of asbestos fibers in the process of removing it; and

(d) The building, vessel, or structure containing the asbestos-containing roofing material, will not be demolished by burning or mechanical renovation/demolition methods that may release asbestos fibers.

(6) "**Asbestos-Containing Waste Material**" means any waste that contains, or is contaminated with, asbestos-containing material. This term includes asbestos waste from control equipment, materials used to enclose the work area during an asbestos project, asbestos-containing material(s) collected for disposal, or asbestos-containing waste, debris, containers, bags, protective clothing, or HEPA filters. This term does not include samples of asbestos containing material taken for testing or enforcement actions.

(7) "**Asbestos Project**" means the construction, demolition, maintenance, repair, remodeling, or renovation of any public or private building(s), vessel, structure(s), or component(s) involving the demolition, removal, encapsulation, salvage, disposal, or disturbance of any asbestos-containing material. This term includes the removal and disposal of asbestos-containing waste material from manufacturing operations that combine asbestos-containing material with any other material(s) to produce a product and the removal and disposal of stored asbestos-containing material. It does not include the application of duct tape, rewettable glass cloth, canvas, cement, paint, or other nonasbestos materials to seal or fill exposed areas where asbestos fibers may be released.

Nor does this include routine maintenance and other non-abatement projects that may minimally disturb ACM.

(8) "**Asbestos Survey**" means an inspection using the procedures contained in 40 CFR 763.86, or an alternate method that has received prior approval from the ((**Authority**)) **Agency**, to determine whether materials or structures to be worked on, removed, remodeled, renovated or demolished, (including material on the outside of structures) contain asbestos.

(9) "**Authority**" or "**Agency**" means the Southwest **Clean Air** ((~~Pollution Control Authority~~)) **Agency** ((~~(SWAPCA)~~)) **SWCAA**.

(10) "**Certified Asbestos Worker/Supervisor**" means a person who is certified by the Washington State Department of Labor and Industries under WAC 296-65-010, 012, and 030 to undertake an asbestos project or, for federal employees working in a federal facility, trained in an equally effective program approved by the United States Environmental Protection Agency.

(11) "**Collected for Disposal**" means sealed in a leak-tight container while adequately wet.

(12) "**Competent Person**" means a person who is capable of identifying asbestos hazards and selecting the appropriate asbestos control strategy, has the authority to take prompt corrective measures to eliminate them, and has been trained and is currently certified in accordance with the standards established by the Washington State Department of Labor & Industries, the federal Occupational Safety & Health Administration, or the United States Environmental Protection Agency (whichever agency has jurisdiction).

(13) "**Component**" means any equipment, pipe, structural member, or other item covered with, coated with, or containing asbestos-containing material.

(14) "**Controlled Area**" means an area to which only certified asbestos workers, or other persons authorized by the Washington Industrial Safety and Health Act (WISHA), have access. For owner-occupied, single-family residence dwellings, the controlled area is the interior of the dwelling.

(15) "**Demolition**" means the wrecking, dismantling, removal of any load-supporting structural member on, or burning of, any building, vessel, structure, or portion thereof. For owner-occupied, single-family residence dwellings, a demolition means the wrecking, dismantling, or removal of any load bearing structural member by the use of heavy equipment (such as a backhoe) or the burning of the building thereby rendering as permanently uninhabitable, that portion of the building being demolished.

(16) "**Emergency Asbestos Project**" or "**Emergency Renovation Project**" means an unplanned asbestos project necessitated by a sudden and unexpected event that will imminently endanger human health and safety either through exposure to asbestos fibers or of vital utilities. Such events may include earthquakes, fire damage, non-routine failure or malfunction of equipment, or identification of additional asbestos-containing material discovered during an asbestos project.

(17) "**Encapsulant**" means a compound that creates a membrane over a surface (bridging encapsulant) or pene-

trates the material and binds its components together (penetrating encapsulant).

(18) "**Encapsulation**" means the application of an encapsulant on surfaces that are covered, coated or manufactured from asbestos containing material to control the release of asbestos fibers into the air. For purposes of this regulation, encapsulation includes the construction of enclosures.

(19) "**Enclosure**" means an airtight protective overlay, such as a ceiling, floor, or wall or a plastic wrapper or barrier, covering surfaces that are coated with, covered with, or containing asbestos-containing material to control the release of asbestos fibers into the air.

(20) "**Friable Asbestos-Containing Material**" means asbestos-containing material that, when dry, can be crumbled, disintegrated, or reduced to powder by hand pressure or by the forces expected to act upon the material in the course of demolition, renovation, or disposal. Such materials include, but are not limited to, thermal system insulation, surfacing material, and cement asbestos products.

(21) "**HEPA Filter**" means a high efficiency particulate air filter found in respirators and vacuum systems capable of filtering 0.3 micrometer mean aerodynamic diameter particles with 99.7% efficiency or greater.

(22) "**Leak Tight Container**" means a dust tight container, at least 6 mil thick that encloses the asbestos-containing waste material and prevents solids or liquids from escaping or spilling out. Such containers may include sealed plastic bags, metal or fiber drums, and polyethylene plastic.

(23) "**Local Exhaust Ventilation and Collection System**" means a system as described in Appendix J of EPA 560/565-024, *Guidance for Controlling Asbestos-Containing Materials in Buildings*.

(24) "**Nonfriable Asbestos-Containing Material**" means asbestos-containing material that, when dry, cannot be crumbled, disintegrated, or reduced to powder by hand pressure or by the forces expected to act on the material in the course of demolition, renovation, or disposal.

(25) "**Owner**" or "**Operator**" means any person who owns, leases, operates, controls, or is responsible for activities at a project site, or a project operation, or both.

(26) "**Owner-Occupied, Single-Family Residence**" means any non-multiple unit building containing space for uses such as living, sleeping, preparation of food, and eating that is currently used or was once used, occupied, or designed to be occupied by one family who owns the property as their domicile. This term includes houses with a "mother-in-law apartment" or "guest room". This term does not include rental property or multiple-family units, nor does this term include any mixed-use building, structure, or installation that contains a residential unit.

(27) "**Person**" means any individual, firm, public or private corporation, association, partnership, political subdivision, municipality, or government agency.

(28) "**Presumed Asbestos Containing Material**" means thermal system insulation and surfacing material found in buildings constructed no later than 1980 (29 CFR 1926.1101).

PROPOSED

PROPOSED

(29) "**Project**" means an asbestos project, maintenance activity, renovation, or demolition activity.

(30) "**Renovation**" means the modification of any existing building, vessel, structure, component, or portion thereof, involving the removal, encapsulation, alteration, disposal, or disturbance of any asbestos-containing material, or a project that is releasing, or likely to release asbestos fibers into the air. A renovation project is only covered under this regulation if the renovation involves asbestos-containing material or the potential to disturb asbestos-containing material. If no asbestos-containing material is present on the project, there are no notification requirements or special handling procedures.

(31) "**Suspect Asbestos-Containing Material**" means material that has historically contained asbestos including, but not limited to, surfacing material, thermal system insulation, roofing material, fire barriers, gaskets, flooring material, and siding.

(32) "**Visible Emissions**" means any emissions that are visually detectable without the aid of instruments. This term does not include condensed uncombined water vapor.

(33) "**Waste Generator**" means any owner or operator of a source whose act or process produces asbestos-containing waste material.

(34) "**Waste Shipment Record**" means the shipping document required to be originated and signed by the owner or operator, used to track and substantiate the disposition of asbestos-containing waste material.

(35) "**Working Day**" means Monday through Friday and includes holidays that fall on any of the days Monday through Friday.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 96-20-073, filed 9/30/96, effective 11/1/96)

((SWAPCA)) SWCAA 476-040 Asbestos Survey Requirements

[Statutory Authority: Chapter 70.94.141 RCW. WSR 96-20-073 filed 9/30/96, effective 11/1/96]

(1) Renovation

(a) Prior to performing any renovation activity the property owner or the owner's agent shall determine whether there are suspect asbestos-containing materials in the work area. The property owner or the owner's agent shall obtain an asbestos survey of any suspect asbestos-containing materials. The asbestos survey shall be performed by an AHERA (Asbestos Hazard Emergency Response Act) building inspector. An asbestos survey at a single family resident is not required to be performed by an AHERA building inspector when the renovation project is performed by the owner/occupant.

(b) A summary of the results of the asbestos survey shall be documented and shall either be posted by the property owner or owner's agent at the work site or communicated in writing to all persons who may come into contact with the material.

(c) Any material presumed to be asbestos-containing material is not required to be evaluated by an AHERA building inspector. Any material presumed to be asbestos-containing material shall be handled as though it was asbestos-containing material.

(d) Only an AHERA building inspector may determine that a suspect material does not contain asbestos except for renovations of an owner-occupied, single-family residence performed by the owner/occupant, however, must handle all presumed asbestos-containing material as provided in **((SWAPCA)) SWCAA 476-050**.

(2) Demolition

(a) Prior to performing any demolition project the property owner or the owner's agent shall obtain an asbestos survey of the facility or part of the facility where the demolition will occur for the presence of asbestos. The asbestos survey shall be performed by an AHERA (Asbestos Hazard Emergency Response Act) building inspector.

(b) A summary of the results of the asbestos survey shall be documented and shall either be posted by the property owner or owner's agent at the work site or communicated in writing to all persons who may come into contact with the material.

(c) Any material presumed to be asbestos-containing material is not required to be evaluated by an AHERA building inspector. Any material presumed to be asbestos-containing material shall be handled as though it was asbestos-containing material.

(d) Only an AHERA building inspector may determine that a suspect material does not contain asbestos-containing materials.

(e) Regardless of the amount of asbestos-containing material present (including none), a Notification of a Demolition activity must be submitted to the **((Authority)) Agency** on **((Authority)) Agency** approved forms prior to commencing a demolition project in accordance with **((SWAPCA)) SWCAA 476-050(2)**. In no event shall a project or activity proceed on a date other than the date indicated on the notification.

(f) If the facility is to be demolished by intentional burning, all the asbestos-containing material shall be removed as an asbestos project in accordance with **((SWAPCA)) SWCAA 476-080**.

Reviser's note: The typographical error in the above material occurred in the copy filed by the Southwest Clean Air Agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 96-20-073, filed 9/30/96, effective 11/1/96)

((SWAPCA)) SWCAA 476-050 Notification Requirements and Fees

[Statutory Authority: Chapter 70.94.141 RCW. WSR 93-16-008 filed 7/22/93, effective 8/22/93; 96-20-073 filed 9/30/96, effective 11/1/96]

(1) **Applicability.** No person shall cause or allow work on an asbestos project, maintenance, renovation, or demolition activity involving asbestos containing material unless the owner or operator has submitted a complete notification to

the ((Authority)) Agency on ((Authority)) Agency approved forms, in accordance with the advance notification period requirements and fees as provided in ((SWAPCA)) SWCAA 476-050(2).

(a) An Asbestos Notification is not required for any asbestos project involving less than 10 linear feet or 48 square feet (per structure, per year) of any asbestos-containing material unless the facility is to be demolished by intentional burning. If the facility is to be demolished by intentional burning, all asbestos-containing material shall be removed as an asbestos project. An Asbestos Notification is not required for removal of nonfriable roofing material. The owner/operator shall maintain documentation to substantiate qualification for the exemption;

(b) Regardless of the amount of asbestos-containing material present (including none), a Notification of Demolition activity must be submitted to the ((Authority)) Agency on ((Authority)) Agency approved forms prior to commencing a demolition accordance with ((SWAPCA)) SWCAA 476-050(2). In no event shall a project or activity proceed on a date other than the date indicated on the notification;

(c) The approval date to perform a project will be the date that all required submittals and fees are received at ((SWAPCA)) SWCAA;

(d) The duration of the asbestos project, maintenance activity, renovation, or demolition activity or project shall not exceed one (1) year beyond the original project starting date. The project starting and completion date for an asbestos project shall be commensurate with the amount of asbestos-containing material involved. In no event shall a project or activity start or end on a date other than the date contained on the notification;

(e) The written notification shall expire on the project completion date as specified by the owner or operator;

(f) A copy of the written notification, all amendments and the asbestos survey shall be available for inspection at the project site at all times until completion of the project;

(g) For an asbestos project, maintenance, renovation or demolition activity that will begin on a date later than the date contained in the original notification, the owner/operator or the owner's agent shall notify ((SWAPCA)) SWCAA by telephone (360-574-3058) as soon as possible before the original

start date and provide written notification (facsimile acceptable) to ((SWAPCA)) SWCAA of the new start date no later than the original start date. In no event shall a project or activity begin on a date other than the date indicated in the revised notification;

(h) For an asbestos project, maintenance, renovation or demolition activity that will begin on a date earlier than the one contained in the original notification, the owner/operator or owner's agent shall provide written notification (facsimile acceptable) to ((SWAPCA)) SWCAA of the new start date at least 10 working days before commencement of the project or activity. In no event shall a project or activity begin on a date other than the date indicated in the revised notification; and

(i) All asbestos projects, maintenance, renovation or demolition activities shall be completed on the date identified on the notification. When a project or activity will be completed prior to the date specified on the notification, the owner or operator shall notify ((SWAPCA)) SWCAA by telephone as soon as possible but in no event later than the actual completion date. The owner or operator shall provide ((SWAPCA)) SWCAA with written notification (facsimile acceptable) of actual completion within 5 calendar days if the completion date is before the date on the notification. If the actual completion date will be after the date indicated on the notification, the owner or operator shall submit an amendment to the written notification with the new completion date (facsimile acceptable) to ((SWAPCA)) SWCAA prior to the completion date on the original or amended previous notification.

(2) **Advance Notification Period and Fee.** Any notification required by ((SWAPCA)) SWCAA 476-050(1) shall be considered incomplete until all the information required by ((SWAPCA)) SWCAA 476-050(1) is received by the ((Authority)) Agency and accompanied by the appropriate fee. A facsimile of the completed notification form shall be acceptable documentation for the start of the notification period, but the appropriate fee shall be received before the project can proceed. The advance notification period and appropriate fee shall be determined as follows:

Project Type	Notification Period	Notification Fee	Forms Required
Owner-Occupied, Single Family Asbestos -Occupant Performed	Prior Notification	\$ 25	Asbestos Notification
<10 linear ft <48 square ft Asbestos	None	None	None
10-259 linear ft 48-159 square ft Asbestos	10 Working Days	\$ 100	Asbestos Notification
260-999 linear ft 160-4999 square ft	10 Working Days	\$ 250	Asbestos Notification
<input type="checkbox"/> 1,000 linear ft <input type="checkbox"/> 5,000 square ft	10 Working Days	\$ 500	Asbestos Notification

PROPOSED

PROPOSED

Amendments to All Projects	Prior Notification	\$ 25 3rd amendment & after	Amended Copy of Asbestos Notification
Annual Asbestos Notification	10 Working Days	\$ 500	Annual Asbestos Notification
Renovation With Asbestos	10 Working Days	Normal Asbestos Fee	Asbestos Notification
Renovation Without Asbestos	None	None	None
Demolition With Asbestos	10 Working Days	\$ 50 Plus Normal Asbestos Fee	Asbestos Notification & Demolition Notification
Demolition Without Asbestos	10 Working Days	\$ 50	Demolition Notification
Temporary Asbestos Storage Facility	Prior Notification	\$ 50	Temporary Storage Facility Application
Emergencies	Prior Notification	Double the Normal Notifica- tion Fee	Emergency Waiver Request Letter

(3) **Annual notification.** In lieu of the notification requirements of ((SWAPCA)) SWCAA 476-050(1) and 476-050(2), the owner or operator of a facility may submit to the ((Authority)) Agency an annual written notification to conduct asbestos projects (not including demolition or renovation) on one or more buildings, vessels, or structures at the facility during each calendar year for the purpose of scheduled maintenance or emergency repairs for removal of small quantities of asbestos-containing material as identified below. The requirements of ((SWAPCA)) SWCAA 476-050(1) shall not apply to asbestos projects undertaken during the calendar year at the applicable facility if all of the following conditions are met:

(a) Annual written notifications shall be submitted to the ((Authority)) Agency for approval before commencing work on any asbestos projects specified in an annual application.

(b) The total amount of asbestos-containing material for all asbestos projects from each structure, vessel, or building in a calendar year under this section shall be limited to less than 260 linear feet on pipes and 160 square feet on other components.

(c) Any asbestos project involving at least 260 linear feet on pipes or 160 square feet or more on other components for each building, vessel, or structure at the facility shall be subject to the notification requirements of ((SWAPCA)) SWCAA 476-050(1) and 476-050(2) in addition to the annual notification requirements.

(d) A copy of the annual notice shall be available for inspection at the property owner's or operator's office until the end of the calendar year.

(e) Asbestos-containing waste material generated from asbestos projects filed under an annual notification may be stored for disposal at the facility if all of the following conditions are met:

(i) All asbestos-containing waste material shall be treated in accordance with ((SWAPCA)) SWCAA 476-070(1); and

(ii) Accumulated asbestos-containing waste materials collected during each calendar quarter shall be kept in a con-

trolled storage area posted with one (1) or more asbestos warning signs and accessible only to authorized persons; and

(iii) For storage of asbestos-containing waste material longer than 10 days, the owner/operator or owner's agent shall apply to ((SWAPCA)) SWCAA for a Temporary Asbestos Storage Facility Authorization unless the asbestos-containing waste material is handled as dangerous waste in accordance with WAC 173-303. Asbestos-containing waste material shall only be disposed of at sites operated in accordance with the provisions of 40 CFR 61.154 or 61.155 and approved by the health department with jurisdiction.

(f) Annual written notifications shall be submitted by the facility owner or operator on forms provided by the ((Authority)) Agency. Notifications shall be submitted to the ((Authority)) Agency at least 10 days in advance of the start date and shall be accompanied by an annual fee as identified in ((SWAPCA)) SWCAA 476-050(2).

(g) The facility owner or operator shall submit quarterly written reports to the ((Authority)) Agency within fifteen (15) days after the end of each calendar quarter. Each quarterly report shall be submitted on forms provided by the ((Authority)) Agency or an alternate format approved by the ((Authority)) Agency.

(4) **Amendments.** An amended notification shall be submitted to the ((Authority)) Agency prior to deviating from any of the information contained in a notification. Amended notifications addressed by this section shall be filed by the original applicant, received by the ((Authority)) Agency no later than the last filed completion date, and are limited to the following revisions:

(a) A change in the job size category because of identification of additional asbestos-containing material. In this case, the fee shall be increased accordingly and the total fee shall be equal to, but not exceed, the fee amount provided for the new job size category as specified in ((SWAPCA)) SWCAA 476-050(2);

(b) The project starting or completion date, provided the total duration of the work does not exceed one (1) calendar year beyond the original starting date. The commencement

date of the original advance notification period shall apply with no additional waiting period required for amended notifications. If an amended notification results in a job size category that requires a waiting period as specified in ((SWAPCA)) SWCAA 476-050(2) and the original notification did not require a waiting period, the advance notification period shall commence on the date the original application was submitted;

(c) Name, mailing address, and telephone number of the owner or operator of the asbestos project site or operation;

(d) Waste disposal site, provided the revised waste disposal site is operated in accordance with the provisions of 40 CFR 61.154 or 61.155 and approved by the health department with jurisdiction;

(e) Method of removal or compliance procedures, provided the revised work plan meets the asbestos emission control and disposal requirements of ((SWAPCA)) SWCAA 476-060 and 450-070;

(f) Description, size (total square feet or number of floors), and approximate age of the building, vessel, or structure at the original address or location; and

(g) Any other information requested by the ((Authority)) Agency.

(5) Emergencies.

(a) The ((Authority)) Agency may waive the required ten (10) working day advance notification period if the property owner or occupant demonstrates in writing to the ((Authority)) Agency that an asbestos project or maintenance, renovation or demolition activity must be conducted immediately because of any of the following:

(i) There was a sudden, unexpected event that resulted in a public health or safety hazard; or

(ii) The project must proceed immediately to protect equipment, ensure continuous vital utilities, or minimize property damage; or

(iii) The project must proceed to avoid imposing an unreasonable burden.

(b) Each emergency waiver request shall include a fee as identified in ((SWAPCA)) SWCAA 476-050(2).

(c) If the emergency asbestos project occurs during non business hours, notification to ((SWAPCA)) SWCAA must occur no later than the next business day.

Reviser's note: The typographical error in the above material occurred in the copy filed by the Southwest Clean Air Agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 96-20-073, filed 9/30/96, effective 11/1/96)

((SWAPCA)) SWCAA 476-060 Procedures for Asbestos Emission Control

[Statutory Authority: Chapter 70.94.141 RCW. WSR 93-16-008 filed 7/22/93, effective 8/22/93; 96-20-073 filed 9/30/96, effective 11/1/96]

(1) **Project requirements.** No person shall cause or allow work on an asbestos project unless the following procedures are employed; except as provided in ((SWAPCA)) SWCAA 476-060(2):

When available, existing win-

(a) Any work on an asbestos project shall be performed by certified asbestos workers under the direct, on-site supervision of a certified asbestos supervisor. This requirement shall not apply to certain limited asbestos projects conducted in accordance with ((SWAPCA)) SWCAA 400-060(2) for owner-occupied, single-family dwellings performed by the owner/occupant.

(b) The asbestos project shall be conducted in a controlled area, clearly marked by barriers and asbestos warning signs. Access to the controlled area shall be restricted to authorized personnel only.

(c) All asbestos containing material shall be kept adequately wet while being removed from any structure, building, vessel, or component.

(d) No visible emissions shall result from an asbestos project.

(e) All asbestos-containing material that has been removed or may have fallen off components during the course of an asbestos project shall be:

(i) Kept adequately wet until collected for disposal;

(ii) Collected for disposal at the end of each working day;

(iii) Contained in a controlled area at all times until transported to a waste disposal site; and

(iv) Carefully lowered to the ground or a lower floor, not dropped, thrown, slid, or otherwise handled in such a manner that may risk further damage to them; or

(v) Transported to the ground via dust tight chutes or containers if they have been removed or stripped more than 50 feet above ground level and were not removed as a unit or in sections.

(f) Mechanical assemblies or components covered with, coated with, or containing asbestos-containing material, removed as a unit or in sections, shall be contained in a leak-tight wrapping after wetting and shall be labeled in accordance with ((SWAPCA)) SWCAA 476-070 (1)(a)(iii).

(i) For large components such as boilers, steam generators, and large tanks, the asbestos-containing material is not required to be removed or stripped if the component can be removed, stored, transported, and deposited at a waste disposal site or reused without disturbing or damaging the asbestos.

(ii) Metal components such as valves, fire doors, and reactor vessels that have internal asbestos-containing material may avoid wetting and leak tight wrapping if:

(A) All access to the asbestos-containing material is welded shut; or

(B) The component has mechanical seals in place that separate the asbestos-containing material from the environment and these seals cannot be removed by hand; and

(C) The components are labeled in accordance with ((SWAPCA)) SWCAA 476-070 (1)(a)(iii).

(f) Local exhaust ventilation and collection systems used on an asbestos project shall:

(i) Be maintained to ensure the integrity of the system; and

(ii) When feasible, have one or more transparent plastic or glass viewing ports installed on the walls of the enclosure in such a manner that will allow for viewing of all components may be utilized for viewing ports.

(g) Local exhaust ventilation and collection systems, control devices, and vacuum systems, used on an asbestos project shall be equipped with a HEPA exhaust filter, maintained in good working order, and shall allow no visible emissions.

(2) **Exemptions for Owner-Occupied, Single-Family Dwellings.** The requirements of ((SWAPCA)) SWCAA 476-060(1)(a) shall not apply to asbestos projects conducted in a owner-occupied, single-family dwelling by the resident owner of the dwelling.

Alternate Means of Compliance.

(a) Friable Asbestos-Containing Material Alternative Removal Methods

An alternate asbestos removal method may be employed for friable asbestos-containing material if an AHERA Project Designer (who is also qualified as a Certified Hazardous Materials Manager, Certified Industrial Hygienist, Registered Architect, or Professional Engineer) has evaluated the work area, the type of asbestos-containing material, the projected work practices, and the engineering controls, and demonstrates to the ((Authority)) Agency that the planned control method will be effective as the work practices contained in ((SWAPCA)) SWCAA 476-060(1) in controlling asbestos emissions. The property owner or the owner's agent shall document through air monitoring at the exhaust from the controlled area that the asbestos fiber concentrations outside the controlled area do not exceed 0.01 fibers/cc, 8 hour average.

The ((Authority)) Agency may require additional conditions be included in the alternate removal method that are reasonably necessary to assure the planned control method is as effective as wetting, and may revoke the alternate removal method for cause.

(b) Nonfriable Asbestos-Containing Material Alternative Removal Methods

An alternate asbestos removal method may be employed for nonfriable asbestos-containing material if a Competent Person or AHERA Project Designer has evaluated the work area, the type of asbestos-containing material, the projected work practices, and the engineering controls, and demonstrates to the ((Authority)) Agency that the planned control method will be equally as effective as the work practices in ((SWAPCA)) SWCAA 476-060(1) in controlling asbestos emissions.

The ((Authority)) Agency may require additional conditions be included in the alternate removal method that are reasonably necessary to assure the planned control method is as effective as wetting, and may revoke the alternative removal method for cause.

(c) Leaving Nonfriable Asbestos-Containing Material in Place During Demolition

Nonfriable asbestos-containing material may be left in place during demolition, if an AHERA Project Designer (who is also qualified as a Certified Hazardous Materials Manager, Certified Industrial Hygienist, Registered Architect, or Professional Engineer) has evaluated the work area, the type of asbestos-containing materials involved, the projected work practices, and the engineering controls, and demonstrates to the ((Authority)) Agency that the asbestos-containing material will remain nonfriable during all demolition

activities and subsequent disposal of the debris. No asbestos-containing material shall remain in place if the demolition involves burning or other activities that would result in the potential release of asbestos-containing material to the ambient air.

The ((Authority)) Agency may require additional conditions be included in the alternate removal method that are reasonably necessary to assure the asbestos-containing material remains nonfriable, and may revoke the Alternate Approval Notification for cause.

Exceptions for Hazardous Conditions. Asbestos-containing material need not be removed prior to a demolition if the property owner demonstrates to the ((Authority)) Agency that it is not accessible because of hazardous conditions such as: structures or buildings that are structurally unsound and may immediately collapse, or other conditions that are dangerous to life and health. The property owner must submit the written determination of the hazard by an authorized government official or a licensed structural engineer, and must submit the procedures that will be followed for controlling asbestos emissions during the demolition or renovation and disposal of the asbestos-containing material.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 96-20-073, filed 9/30/96, effective 11/1/96)

((SWAPCA)) SWCAA 476-070 Disposal of Asbestos-Containing Waste Material

[Statutory Authority: Chapter 70.94.141 RCW. WSR 93-16-008 filed 7/22/93, effective 8/22/93; 96-20-073 filed 9/30/96, effective 11/1/96]

(1) **Disposal Requirements.** No person shall cause or allow work on an asbestos project unless the following procedures are employed during the collection, processing, packaging, transporting, or deposition of any asbestos-containing waste material:

(a) Treat all asbestos-containing waste material as follows:

(i) Adequately wet all asbestos-containing waste material and mix asbestos waste from control devices, vacuum systems, or local exhaust ventilation and collection systems with water to form a slurry;

(ii) After wetting, seal all asbestos-containing waste material in leak tight containers or wrapping to ensure that they remain adequately wet when deposited at a waste disposal site;

(iii) Permanently (indelible markers or labels made with indelible ink) label wrapped materials and each container with an asbestos warning sign as specified by the Washington State Department of Labor and Industries or the Occupational Safety and Health Administration. Permanently mark the label with the date the material was collected for disposal, the name of the waste generator, the name and affiliation of the certified asbestos supervisor, and the location at which the waste was generated;

(iv) Ensure that the exterior of each container is free of all asbestos residue; and

PROPOSED

(v) Exhibit no visible emissions during any of the operations required by this section.

(b) All asbestos-containing waste material shall be deposited within ten (10) calendar days after collection at a waste disposal site operated in accordance with the provisions of 40 CFR 61.154 or 61.155 and approved by the health department with jurisdiction. Asbestos-containing waste material may remain onsite longer than 10 if the facility has a current Temporary Asbestos Storage Facility Authorization and the asbestos-containing waste material is stored within that temporary storage facility as provided in ((SWAPCA)) SWCAA 476-070(2).

(c) All asbestos-containing waste material, handled as dangerous waste in accordance with WAC 173-303, shall be excluded from the requirements of ((SWAPCA)) SWCAA 476-070 (1)(a)(iii) and 476-070 (1)(b).

(2) **Alternative Storage Method - Temporary Asbestos Storage Facility.** The owner or operator of a licensed asbestos abatement company or disposal facility may apply to the ((Authority)) Agency to establish a temporary facility for the purpose of collecting and temporarily storing asbestos-containing waste material.

(a) No person shall cause or allow the operation of a temporary asbestos storage facility without the prior written approval of the ((Authority)) Agency.

(b) The owner or operator must submit a complete application for establishment of a temporary asbestos storage facility on forms provided by the ((Authority)) Agency. When approved, an Asbestos Storage Facility Authorization will be returned to the owner or operator by ((SWAPCA)) SWCAA to be posted at the entrance to the facility or on file at the facility office.

(c) An asbestos storage facility shall meet the following general conditions:

(i) Asbestos-containing waste material must be stored in a container with a single piece liner at least 6 mil in thickness; and

(ii) Said container must be in a secured building or in a secured exterior enclosure; and

(iii) The enclosure must be locked except during transfer of asbestos-containing waste material; and

(iv) Return of the waste shipment record to the waste generator shall not exceed the 45-day requirement of 40 CFR Part 61.150 except as otherwise approved by the ((Authority)) Agency.

(3) **Alternative Disposal Method - Asbestos-Cement Water Pipe.** Asbestos-cement water pipe used on public right-of-ways or public easements shall be excluded from the disposal requirements of ((SWAPCA)) SWCAA 476-070 (1)(b) if the following conditions are met:

(a) Any asbestos-cement water pipe greater than one (1) linear foot in size may be buried on public right-of-ways or public easements if covered with at least three (3) feet or more of non-asbestos fill material; and

(b) All asbestos-containing waste material, including asbestos-cement water pipe fragments that are one (1) linear foot or less, protective clothing, HEPA filters, or other asbestos contaminated material, debris, or containers, shall be sub-

ject to the requirements of ((SWAPCA)) SWCAA 476-010 through 476-070.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 96-20-073, filed 9/30/96, effective 11/1/96)

((SWAPCA)) **SWCAA 476-080 Demolition by Intentional Burning**

[Statutory Authority: Chapter 70.94.141 RCW. WSR 96-20-073 filed 9/30/96, effective 11/1/96]

Prior to performing any fire training exercise involving intentional burning as a method of demolition, the following steps shall be completed:

(1) The owner or owner's agent shall obtain an asbestos survey of any suspect asbestos-containing materials (including non-friable roofing materials). The asbestos survey shall be performed by an AHERA building inspector as provided in ((SWAPCA)) SWCAA 476-040.

(2) If asbestos-containing material is present, regardless of amount, the asbestos-containing material shall be removed as an asbestos project in accordance with ((SWAPCA)) SWCAA 476-050.

(3) If there is no asbestos-containing material in the work area, this determination shall either be posted at the work area or communicated in writing to all persons involved in the demolition project by the owner or owner's agent.

(4) A summary of the results of the asbestos survey shall be submitted to ((SWAPCA)) SWCAA by the owner or owner's agent along with the Demolition Notification as provided in ((SWAPCA)) SWCAA 476-050.

(5) The fire district or other organization involved in the fire training exercise as a method of demolition shall notify ((SWAPCA)) SWCAA of the date, time, and location of the proposed exercise and the fire district contact person and phone number for that exercise at least five calendar days in advance of the exercise.

(6) The owner or owner's agent shall provide notice of the fire to the owners of property adjoining the property on which the fire will occur at least five calendar days in advance of the exercise.

(7) No fire training exercise that involves intentional burning as a method of demolition shall be allowed without prior written approval from ((SWAPCA)) SWCAA.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 96-20-073, filed 9/30/96, effective 11/1/96)

((SWAPCA)) **SWCAA 476-090 Severability**

[Statutory Authority: Chapter 70.94.141 RCW. WSR 96-20-073 filed 9/30/96, effective 11/1/96]

The provisions of this regulation are severable and if any provision is held invalid, the application of such provision to the other circumstances and the remainder of this regulation shall not be affected.

PROPOSED

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

WSR 00-24-093
PROPOSED RULES
SOUTHWEST
CLEAN AIR AGENCY

[Filed December 5, 2000, 11:02 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 00-17-031.

Title of Rule: SWCAA 490 Emission Standards and Controls for Sources Emitting Volatile Organic Compounds (VOC).

Purpose: This rule provides emission control requirements and emission standards for several source categories that emit volatile organic compounds.

Statutory Authority for Adoption: RCW 70.94.141.

Statute Being Implemented: RCW 70.94.141.

Summary: The changes proposed in this rule are administrative in nature. The rule is being revised to reflect a name change for the agency. No technical changes are proposed.

Reasons Supporting Proposal: The name of the agency was changed July 6, 2000, from the Southwest Air Pollution Control Authority (SWAPCA) to the Southwest Clean Air Agency (SWCAA).

Name of Agency Personnel Responsible for Drafting and Implementation: Paul Mairose, 1308 N.E. 134th Street, Vancouver, WA, (360) 574-3058; and Enforcement: Robert D. Elliott, 1308 N.E. 134th Street, Vancouver, WA, (360) 574-3058.

Name of Proponent: Southwest Clean Air Agency, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: This is an existing rule. Only administrative type changes are being proposed. There will be no effect on the public or regulated businesses as a result of these changes.

Proposal Changes the Following Existing Rules: Titles and rule numbers that include the agency name are being changed to reflect the name of the agency.

No small business economic impact statement has been prepared under chapter 19.85 RCW. Changes proposed by SWCAA are consistent with federal and state rules already in effect. This agency is not subject to the small business economic impact provisions of chapter 19.85 RCW.

RCW 34.05.328 does not apply to this rule adoption. Pursuant to RCW 70.94.141(1), section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. SWCAA is not voluntarily invoking section 201, chapter 403, Laws of 1995.

Hearing Location: Office of SWCAA, 1308 N.E. 134th Street, Vancouver, WA 98685, on February 1, 2001, at 3:00 p.m.

Assistance for Persons with Disabilities: Contact Mary Allen by January 26, 2001, TDD (360) 574-3058.

Submit Written Comments to: Paul Mairose, 1308 N.E. 134th Street, Vancouver, WA 98685, fax (360) 574-3058, by January 19, 2001.

Date of Intended Adoption: February 1, 2001.

December 4, 2000

Robert D. Elliott

Executive Director

AMENDATORY SECTION (Amending WSR 96-21-101, filed 10/21/96, effective 11/21/96)

((~~SWAPCA~~)) **SWCAA 490-010 Policy and Purpose**

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption 93-16-011 filed 7/22/93, effective 8/22/93; 96-21-101 filed 10/21/96, effective 11/21/96]

(1) It is the policy of the Southwest Clean Air ((~~Pollution Control Authority~~)) Agency ((~~SWAPCA~~)) SWCAA under the authority vested in it by Chapter 43.21A, 70.94.141, and 70.94.152((~~and 70.94.331~~)) RCW to provide for the systematic control of air pollution from air contaminant sources within Clark, Cowlitz, Lewis, Skamania, and Wahkiakum Counties.

(2) The purpose of this regulation is to establish technically feasible and reasonably attainable emission standards for sources emitting volatile organic compounds (VOCs).

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 96-21-101, filed 10/21/96, effective 11/21/96)

((SWAPCA)) SWCAA 490-020 Definitions

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption 93-16-011 filed 7/22/93, effective 8/22/93; 96-21-101 filed 10/21/96, effective 11/21/96]

The definitions of terms contained in ((SWAPCA)) SWCAA 400 are by this reference incorporated into this regulation. Unless a different meaning is clearly required by context, the following words and phrases, as used in this regulation, shall have the following meanings:

- (1) "Bottom loading" means the filling of a tank through a line entering the bottom of the tank.
- (2) "Bulk gasoline plant" means a gasoline storage and transfer facility that receives more than ninety percent of its annual gasoline throughput by transport tank, and reloads gasoline into transport tanks.
- (3) "Class II hardboard paneling finish" means finishes ((which)) that meet the specifications of Voluntary Product Standard PS-59-73 as approved by the American National Standards Institute.
- (4) "Closed refinery system" means a system that will process or dispose of those VOCs collected from another system. The mass quantity of collected VOCs emitted to the ambient air from the closed refinery system shall not exceed that required for a disposal system.
- (5) "Condensate" means hydrocarbon liquid separated from a gas stream ((which)) that condenses due to changes in the temperature or pressure and remains liquid at standard conditions.
- (6) "Condenser" means a device for cooling a gas stream to a temperature where specific VOCs become liquid and are removed.
- (7) "Control system" means one or more control devices, including condensers, that are designed and operated to reduce the quantity of VOCs emitted to the atmosphere.
- (8) "Crude oil" means a naturally occurring mixture ((which)) that consists of hydrocarbons and sulfur, nitrogen or oxygen derivatives of hydrocarbons which is a liquid at standard conditions.
- (9) "Cutback asphalt" means an asphalt that has been blended with petroleum distillates to reduce the viscosity for ease of handling and lower application temperature. An inverted emulsified asphalt shall be considered a cutback asphalt when the continuous phase of the emulsion is a cutback asphalt.
- (10) "Disposal system" means a process or device that reduces the mass quantity of the VOC that would have been emitted to the ambient air by at least ninety percent prior to their actual emission.
- (11) "Dry cleaning facility" means a facility engaged in the cleaning of fabrics in an essentially nonaqueous solvent by means of one or more washes in solvent, extraction of excess solvent by spinning, and drying by tumbling in an airstream. The facility includes, but is not limited to, any washer, dryer, filter and purification system(s), waste disposal system(s), holding tank(s), pump(s) and attendant piping and valve(s).

(12) "External floating roof" means a storage vessel cover in an open top tank consisting of a double deck or pontoon single deck which rests upon and is supported by the liquid being contained and is equipped with a closure seal or seals to close the space between the roof edge and tank wall.

(13) "Flexographic printing" means the application of words, designs and pictures to a substrate by means of a roll printing technique in which the pattern to be applied is raised above the printing roll and the image carrier is made of rubber or other elastomeric materials.

(14) "Gasoline" means a petroleum distillate which is a liquid at standard conditions and has a true vapor pressure greater than 200 mm of Hg (4 psia) at 20°C, and is used as a fuel for internal combustion engines.

(15) "Gasoline dispensing facility" means any site dispensing gasoline into motor vehicle fuel tanks from stationary storage tanks.

(16) "Gasoline loading terminal" means a gasoline transfer facility that receives more than ten percent of its annual gasoline throughput solely or in combination by pipeline, ship or barge, and loads gasoline into transport tanks.

(17) "Hardboard" means a panel manufactured primarily from interfelted lignocellulosic fibers which are consolidated under heat and pressure in a hot press.

(18) "Hardwood plywood" means plywood whose surface layer is a veneer of hardwood.

(19) "Lease custody transfer" means the transfer of produced crude oil or condensate, after processing or treating in the producing operations, from storage tanks or automatic transfer facilities to pipelines or any other forms of transportation.

(20) "Liquid-mounted seal" means a primary seal mounted in continuous contact with the liquid between the tank wall and the floating roof.

(21) "Liquid service" means equipment that processes, transfers or contains a VOC or VOCs in the liquid phase.

(22) "Low organic solvent coating" refers to coatings ((which)) that contain less organic solvent than the conventional coatings used by the industry. Low organic solvent coatings include water-borne, higher solids, electrodeposition and powder coatings.

(23) "Natural finish hardwood plywood panels" means panels whose original grain pattern is enhanced by essentially transparent finishes frequently supplemented by fillers and toners.

(24) "Packaging rotogravure printing" means rotogravure printing upon paper, paper board, metal foil, plastic film, and other substrates, which are, in subsequent operations, formed into packaging products and labels for articles to be sold.

(25) "Petroleum liquids" means crude oil, condensate, and any finished or intermediate products manufactured or extracted in a petroleum refinery.

(26) "Petroleum refinery" means a facility engaged in producing gasoline, aromatics, kerosene, distillate fuel oils, residual fuel oils, lubricants, asphalt, or other products by distilling crude oils or redistilling, cracking, extracting or reforming unfinished petroleum derivatives. Not included are facilities re-refining used motor oils or waste chemicals,

PROPOSED

processing finished petroleum products, separating blended products, or air blowing asphalt.

(27) "Prime coat" means the first of two or more films of coating applied in an operation.

(28) "Printed interior panels" means panels whose grain or natural surface is obscured by fillers and basecoats upon which a simulated grain or decorative pattern is printed.

(29) "Proper attachment fittings" means hardware for the attachment of gasoline transfer or vapor collection lines that meet or exceed industrial standards or specifications and the standards of other agencies or institutions responsible for safety and health.

(30) "Publication rotogravure printing" means rotogravure printing upon paper (~~(which)~~) that is subsequently formed into books, magazines, catalogues, brochures, directories, newspaper supplements, and other types of printed materials.

(31) "Refinery unit" means a set of components that are a part of a basic process operation, such as distillation, hydrotreating, cracking or reforming of hydrocarbons.

(32) "Roll printing" means the application of words, designs, and pictures to a substrate usually by means of a series of hard rubber or steel rolls each with only partial coverage.

(33) "Rotogravure printing" means the application of words, designs, and pictures to a substrate by means of a roll printing technique (~~(which)~~) that involves intaglio or recessed image areas in the form of cells.

(34) "Single coat" means only one film of coating is applied to the metal substrate.

(35) "Submerged fill line" means a pipe, tube, fitting or other hardware for loading liquids into a tank with either a discharge opening flush with the tank bottom; or with a discharge opening below the lowest normal operating drawoff level or that level determined by a liquid depth two and one half times the fill line diameter when measured in the main portion of the tank, but not in sumps or similar protrusions.

(36) "Submerged loading" means the filling of a tank with a submerged fill line descending nearly to the bottom.

(37) "Suitable closure or cover" means a door, hatch, cover, lid, pipe cap, pipe blind, valve or similar device that prevents the accidental spilling or emitting of VOC. Pressure relief valves, aspirator vents or other devices specifically required for safety and fire protection are not included.

(38) "Thin particleboard" means a manufactured board one-quarter inch or less in thickness made of individual wood particles (~~(which)~~) that have been coated with a binder and formed into flat sheets by pressure.

(39) "Tileboard" means paneling that has a colored waterproof surface coating.

(40) "Topcoat" means the final film or series of films of coating applied in a two-coat (or more) operation.

(41) "Transport tank" means a container used for shipping gasoline on land.

(42) "True vapor pressure" means the equilibrium partial pressure of a petroleum liquid as determined with methods described in American Petroleum Institute Bulletin 2517, 1980.

(43) "Unit turnaround" means the procedure of shutting down, repairing, inspecting, and restarting a unit.

(44) "Valves not externally regulated" means valves that have no external controls, such as in-line check valves.

(45) "Vapor collection system" means a closed system to conduct vapors displaced from a tank being filled into the tank being emptied, a vapor holding tank, or a vapor control system.

(46) "Vapor control system" means a system designed and operated to reduce or limit the emission of VOCs, or to recover the VOCs to prevent their emission into the ambient air.

(47) "Vapor-mounted seal" means a primary seal mounted so there is an annular vapor space underneath the seal. The annular vapor space is bounded by the bottom of the primary seal, the tank wall, the liquid surface, and the floating roof.

(48) "Volatile organic compound (VOC)" means any organic compound (~~(which)~~) that participates in atmospheric photochemical reactions; that is, any organic compound other than those (~~(which)~~) that the administrator designates as having negligible photochemical reactivity. VOC may be measured by a reference method, an equivalent method, an alternative method or by procedures specified under 40 CFR Part 60. A reference method, an equivalent method, or an alternative method, however, may also measure nonreactive organic compounds. In such cases, an owner or operator may exclude the nonreactive organic compounds when determining compliance with a standard.

(49) "Waxy, heavy pour crude oil" means a crude oil with a pour point of 50°F or higher as determined by the American Society for Testing and Materials Standard D97-66, "Test for Pour Point of Petroleum Oils."

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 96-21-101, filed 10/21/96, effective 11/21/96)

((SWAPCA)) SWCAA 490-025 General Applicability

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption 93-16-011 filed 7/22/93, effective 8/22/93; 96-21-101 filed 10/21/96, effective 11/21/96]

In addition to the general applicability of ((SWAPCA)) SWCAA 400 to all emission sources, specific emission standards listed in this regulation will take precedence over the general emission standards of ((SWAPCA)) SWCAA 400.

(1) This regulation shall apply to the specified emission sources of VOCs located in or operating within designated ozone nonattainment areas and areas covered by a maintenance plan within the jurisdiction of ((SWAPCA)) SWCAA.

(2) This regulation does not apply to those sources under the jurisdiction of the Energy Facility Site Evaluation Council (EFSEC).

(3) A source of VOC emissions not belonging to any of the categories listed in ((SWAPCA)) SWCAA 490-030 nor specifically identified in any section, but which is located on the same or adjacent property and owned or operated by the same person as a regulated emission source, shall not be required to comply with this regulation.

(4) Sources of VOC emissions may be exempted, by the director, from any or all requirements to control or reduce the emissions of VOCs when:

(a) The source is a development operation and the equipment is used exclusively for research, laboratory analysis or determination of product quality and commercial acceptance, provided emissions of VOCs from such operations do not exceed 300 kg (660 lbs) per month; or

(b) The source has emissions of VOCs which do not exceed 18 kg (40 lbs) per month and registration is not required under ((SWAPCA)) SWCAA 490-030; or

(c) The source is a spray booth ((which)) that is used solely for maintenance and utility activities and whose emissions do not exceed 18 kg (40 lbs) per month.

(5) Sources of VOCs may be granted exemptions from emissions standards for a period not to exceed thirty days if the source is a newly permitted source ((which)) that is to replace a similar permitted source and the new source is intended to utilize the existing emission control system. This provision is intended to apply to a break-in period prior to the shutdown and removal of the existing source.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 96-21-101, filed 10/21/96, effective 11/21/96)

((SWAPCA)) **SWCAA 490-030 Registration and Reporting**

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption 93-16-011 filed 7/22/93, effective 8/22/93; 96-21-101 filed 10/21/96, effective 11/21/96]

(1) The owner or operator of a stationary emission source of VOCs in the following source categories and located in a designated ozone nonattainment area or area covered by a maintenance plan shall register the source with ((SWAPCA)) SWCAA unless registration is required by the Energy Facility Site Evaluation Council (EFSEC) as provided under RCW 80.50.

- (a) Petroleum refineries.
- (b) Petroleum liquid storage tanks.
- (c) Gasoline loading terminals.
- (d) Bulk gasoline plants.
- (e) Gasoline dispensing facilities.
- (f) Surface coaters.
- (g) Open top vapor degreasers.
- (h) Conveyorized degreasers.
- (i) Gasoline transport tanks.
- (j) Vapor collection systems.
- (k) Perchloroethylene dry cleaning systems.
- (l) Graphic arts systems.
- (m) Surface coaters of miscellaneous metal parts and products.
- (n) Synthesized pharmaceutical manufacturing facilities.
- (o) Flatwood panel manufacturers and surface finishing facilities.

(2) A new emission source of VOCs that must comply with any requirements in ((SWAPCA)) SWCAA 490-040, 490-200, 490-201, 490-202, 490-203, 490-204, 490-205,

490-206 and 490-207, shall comply with the requirements of ((SWAPCA)) SWCAA 400-100 and shall register with ((SWAPCA)) SWCAA prior to operation of the new source, and shall submit sufficient information to demonstrate that the new source is capable of complying with the requirements in this regulation. An opportunity shall be provided for an inspection of the new source by ((SWAPCA)) SWCAA inspectors prior to its operation.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-16-011, filed 7/22/93, effective 8/22/93)

((SWAPCA)) **SWCAA 490-040 Requirements**

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption 93-16-011 filed 7/22/93, effective 8/22/93]

To demonstrate compliance with this regulation, refer to ((SWAPCA)) SWCAA 400-105.

(1) **Petroleum refineries.**

This regulation shall apply to all petroleum refineries with a crude oil or feed stock capacity greater than one million four hundred thirty thousand liters (1,430,000 l or 9,000 bb) per day.

(a) Vacuum producing system.

(i) Noncondensable VOC from vacuum producing systems shall be piped to an appropriate firebox, incinerator or to a closed refinery system.

(ii) Hot wells associated with contact condensers shall be tightly covered and the collected VOC introduced into a closed refinery system.

(b) Wastewater separator.

(i) Wastewater separator forebays shall incorporate a floating pontoon or fixed solid cover with all openings sealed, totally enclosing the compartmented liquid contents, or a floating pontoon or a double deck-type cover equipped with closure seals between the cover edge and compartment wall.

(ii) Accesses for gauging and sampling shall be designed to minimize VOC emissions during actual use. All access points shall be closed with suitable covers when not in use.

(c) Process unit turnaround.

(i) The VOC contained in a process unit to be depressurized for turnaround shall be introduced to a closed refinery system, combusted by a flare, or vented to a disposal system.

(ii) The pressure in a process unit following depressurization for turnaround shall be less than five psig before venting to the ambient air.

(iii) Venting or depressurization to the ambient air of a process unit for turnaround at a pressure greater than five psig shall be allowed if the owner demonstrates the actual emission of VOC to the ambient air is less than permitted by ((SWAPCA)) SWCAA 490-040 (1)(c)(ii).

(d) Maintenance and operation of emission control equipment. Equipment for the reduction, collection or disposal of VOC shall be maintained and operated in a manner consistent with the level of maintenance and housekeeping of the overall plant.

(2) **Petroleum liquid storage tanks.**

PROPOSED

(a) All fixed-roof tanks (except as noted in subparagraph (d) of this subsection) storing volatile organic petroleum liquids with a true vapor pressure as stored greater than 78 mm of Hg (1.5 psi) at actual monthly average storage temperatures and having a capacity greater than one hundred fifty thousand liters (40,000 gallons) shall comply with one of the following:

(i) Meet the equipment specifications and maintenance requirements of the federal standards of performance for new stationary sources - Storage Vessels for Petroleum Liquids (40 CFR 60, subpart K); or

(ii) Be retrofitted with a floating roof or internal floating cover using a metallic seal or a nonmetallic resilient seal at least meeting the equipment specifications of the federal standards referred to in ((SWAPCA)) SWCAA 490-040 (2)(a)(i) or its equivalent; or

(iii) Be fitted with a floating roof or internal floating cover meeting the manufacturer's specifications in effect when installed.

(b) All seals used in ((SWAPCA)) SWCAA 490-040 (2)(a)(ii) and (iii) are to be maintained in good operating condition and the seal fabric shall contain no visible holes, tears or other openings.

(c) All openings not related to safety are to be sealed with suitable closures.

(d) Tanks used for the storage of gasoline in bulk gasoline plants and equipped with vapor balance systems as required in ((SWAPCA)) SWCAA 490-040 (4)(b) shall be exempt from the requirements of ((SWAPCA)) SWCAA 490-040(2).

(3) Gasoline loading terminals.

(a) This regulation shall apply to all gasoline loading terminals with an average annual daily gasoline throughput greater than seventy-five thousand liters (75,000 l or 20,000 gallons).

(b) Loading facilities. Facilities for the purpose of loading gasoline into any transport tank shall be equipped with a vapor recovery system (VRS) as described in ((SWAPCA)) SWCAA 490-040 (3)(c) and comply with the following conditions:

(i) The loading facility shall employ submerged or bottom loading for all transport tanks.

(ii) The VRS shall be connected to the transport tank being loaded and shall operate during the entire loading of every transport tank loaded at the facility.

(iii) The loading of all transport tanks shall be performed such that ninety percent by weight of the gasoline vapors displaced during filling are prevented from being released to the ambient air. Emissions from pressure relief valves shall not be included in the controlled emissions when the back pressure in the VRS collection lines is lower than the relief pressure setting of the transport tank's relief valves.

(iv) All loading lines and vapor lines shall be equipped to close automatically upon disconnect. The point of closure shall be on the tank side of any hose or intermediate connecting line.

(c) Vapor recovery system (VRS). The VRS shall be designed and built according to accepted industrial practices and meet the following conditions:

(i) The VRS shall prevent at least ninety percent by weight of the gasoline vapors displaced during loading of each transport tank from entering the ambient air and in no case shall the gasoline vapors emitted to the ambient air exceed eighty milligrams per liter of gasoline loaded.

(ii) The VRS shall be equipped with a signal device to alert personnel when the system is not operating or unintentionally shuts down.

(iii) The back pressure in the VRS collection lines shall not exceed the transport tank's pressure relief settings.

(d) Alternative loading facility. The loading of transport tanks by other means and using other vapor control systems shall require the facility owner to demonstrate that the emission of gasoline vapors to the ambient air is less than eighty milligrams per liter of gasoline loaded.

(4) Bulk gasoline plants.

(a) This regulation shall apply to all bulk gasoline plants with an annual average daily gasoline throughput greater than fifteen thousand liters (15,000 l or 4,000 gallons).

(b) Storage tanks. All storage tanks with a capacity greater than two thousand one hundred liters (2100 l or 550 gallons) and used for the storage of gasoline shall comply with the following conditions:

(i) Each storage tank shall be equipped with a submerged fill line.

(ii) Each storage tank shall be equipped for vapor balancing of gasoline vapors with transport tanks during gasoline transfer operations.

(iii) The vapor line fittings on the storage tank side of break points with the transport tank vapor connection pipe or hose shall be equipped to close automatically upon planned or unintentional disconnect.

(iv) The pressure relief valves on storage tanks shall be set at the highest possible pressure consistent with local and state codes for fire and safety.

(c) Transport tanks. All transport tanks, except those meeting the conditions in ((SWAPCA)) SWCAA 490-040 (4)(d), transferring gasoline with storage tanks in a bulk gasoline plant shall comply with the following conditions:

(i) The transport tank shall be equipped with the proper attachment fittings to make vapor tight connections for vapor balancing with storage tanks.

(ii) The vapor line fittings on the transport tank side of break points with the storage tank connection pipe or hose shall be equipped to close automatically upon planned or unintentional disconnect.

(iii) The pressure relief valves on transport tanks shall be set at the highest possible pressure consistent with local and state codes for fire and safety.

(d) Transport tanks used for gasoline and meeting all of the following conditions shall be exempt from the requirement to be equipped with any attachment fitting for vapor balance lines:

(i) The transport tank is used exclusively for the delivery of gasoline into storage tanks of a facility exempt from the vapor balance requirements of ((SWAPCA)) SWCAA 490-040(5); and

(ii) The transport tank has a total capacity less than fifteen thousand liters (15,000 l or 4,000 gallons) and is of a

compartmented design and construction requiring the installation of four or more separate vapor balance fittings.

(e) Gasoline transfer operations. No owner or operator of a bulk gasoline plant or transport tank shall allow the transfer of gasoline between a transport tank and a storage tank except under the following conditions:

(i) All tanks shall be submerged filled or bottom loaded.

(ii) The loading of all tanks, except those exempted under ((SWAPCA)) SWCAA 490-040 (4)(d) shall be performed such that ninety percent by weight of the gasoline vapors displaced during filling are prevented from being released into the ambient air. Emissions from pressure relief valves shall not be included in the controlled emissions.

(f) Equipment or system failures. Failures or leaks in the vapor balance system shall be limited by the following conditions:

(i) During the months of April, May, June, July, August, September and October, failures of the vapor balance system to comply with this regulation shall require that gasoline transfer operations stop for the failed part of the system. Other transfer points that can operate in compliance may be used.

(ii) Loading or unloading of the transport tank connected to the failed part of the vapor balance system may be completed.

(iii) Breakdowns and upset conditions during all months of the year shall also comply with the provisions of ((SWAPCA)) SWCAA 400-105(5).

(g) The owner or operator of a bulk gasoline plant or transport tank shall take all reasonable necessary measures to prevent the spilling, discarding in sewers, storing in open containers or handling of gasoline in a manner on the plant site that will result in evaporation to the ambient air.

(5) Gasoline dispensing facilities (Stage I).

(a) This regulation shall apply to all gasoline dispensing facilities with a total annual gasoline throughput greater than 200,000 gallons (16,670 gallons per month) and total gasoline storage capacity greater than 10,000 gallons.

(b) All gasoline storage tanks of the facilities defined in ((SWAPCA)) SWCAA 490-040 (5)(a) shall be equipped with submerged or bottom fill lines and fittings for vapor balancing gasoline vapors with the delivery transport tank.

(c) Gasoline storage tanks with offset fill lines shall be exempt from the requirement of ((SWAPCA)) SWCAA 490-040 (5)(b) if installed prior to January 1, 1979.

(d) The vapor balance system (for the purpose of measuring compliance with the emission control efficiency) shall consist of the transport tank, gasoline vapor transfer lines, storage tank and all tank vents. The vapor balance system shall prevent at least ninety percent of the displaced gasoline vapors from entering the ambient air. A vapor balance system that is designed, built and operated according to accepted industrial practices will satisfy this requirement.

(e) The owner or operator of a gasoline dispensing facility shall not permit the loading of gasoline into a storage tank equipped with vapor balance fittings unless the vapor balance system is attached to the transport tank and operated satisfactorily.

(6) Surface coaters.

The operation of a coater and dryer, that may serve one or more process lines, shall comply with the following emission limits if the potential uncontrolled emissions of VOC from the coater, flashoff areas, and dryer would be greater than 18 kg (40 pounds) in any given twenty-four hour period. The emission limits and uncontrolled emission quantity shall include the additional quantity of emissions from the dryer during the twelve-hour period after application of the coating.

Process	VOC Limitation (Excluding Water)	
	Grams/Liter of Coating	lb/Gallon of Coating
Can Coating		
Sheet basecoat and overvarnish; two-piece can exterior	340	2.8
Two and three piece can interior body spray, two piece can exterior end	510	4.2
Side-seam spray	660	5.5
End sealing compound	440	3.7
Coil coating	310	2.6
Fabric coating	350	2.9
Vinyl coating	450	3.8
Paper coating	350	2.9
Auto and light duty truck coating		
Prime	230	1.9
Topcoat	340	2.8
Repair	580	4.8
Metal furniture coating	360	3.0
Magnet wire coating	200	1.7
Large appliance coating	340	2.8

(7) Open top vapor degreasers.

(a) All open top vapor degreasers shall:

(i) Have a cover that may be readily opened and closed. When a degreaser is equipped with a lip exhaust, the cover shall be located below the lip exhaust. When a degreaser has a freeboard ratio equal to or greater than 0.75 and the opening is greater than one square meter (10 square feet) the cover shall be power operated.

(ii) Have one of the following:

- (A) A freeboard ratio equal to or greater than 0.75; or
- (B) A freeboard chiller; or
- (C) A closed design such that the cover opens only when the part enters or exits the degreaser.

(iii) Be equipped with at least the following three safety switches:

(A) Condenser-flow switch and thermostat (shuts off sump heat if coolant is either not circulating or too warm); and

(B) Spray safety switch (shuts off spray pump if the vapor level drops excessively); and

(C) Vapor level control thermostat (shuts off sump heat when vapor level rises too high).

PROPOSED

(iv) Post a permanent and conspicuous pictograph or instructions clearly explaining the following work practices:

(A) Do not degrease porous or absorbent materials such as cloth, leather, wood or rope.

(B) The cover of the degreaser should be closed at all times except when processing workloads.

(C) When the cover is open the lip of the degreaser should not be exposed to steady drafts greater than 15.3 meters per minute (50 feet per minute).

(D) Rack parts so as to facilitate solvent drainage from the parts.

(E) Workloads should not occupy more than one-half of the vapor-air interface area.

(F) When using a powered hoist, the vertical speed of parts in and out of the vapor zone should be less than 3.35 meters per minute (11 feet per minute).

(G) Degrease the workload in the vapor zone until condensation ceases.

(H) Spraying operations should be done within the vapor layer.

(I) Hold parts in the degreaser until visually dry.

(J) When equipped with a lip exhaust, the fan should be turned off when the cover is closed.

(K) The condenser water shall be turned on before the sump heater when starting up a cold vapor degreaser. The sump heater shall be turned off and the solvent vapor layer allowed to collapse before closing the condenser water when shutting down a hot vapor degreaser.

(L) Water shall not be visible in the solvent stream from the water separator.

(b) A routine inspection and maintenance program shall be implemented for the purpose of preventing and correcting solvent losses. For example, leaks from drain taps, cracked gaskets, and malfunctioning equipment must be repaired immediately.

(c) Sump drainage and transfer of hot or warm solvent shall be carried out using threaded or other leakproof couplings.

(d) Still and sump bottoms shall be kept in closed containers.

(e) Waste solvent shall be stored in covered containers and returned to the supplier or to a firm which processes solvents for disposal.

(8) Conveyorized degreasers.

(a) The owner or operator of conveyorized cold cleaners and conveyorized vapor degreasers shall comply with the following operating requirements:

(i) Exhaust ventilation shall not exceed twenty cubic meters per minute per square meter (65 cfm per ft.²) of degreaser opening, unless necessary to meet OSHA requirements.

(ii) Post in the immediate work area a permanent and conspicuous pictograph or instructions clearly explaining the following work practices:

(A) Rack parts for best drainage.

(B) Maintain vertical speed of conveyed parts to less than 3.35 meters per minute (11 feet per minute).

(C) The condenser water shall be turned on before the sump heater when starting up a cold vapor degreaser. The

sump heater shall be turned off and the solvent vapor layer allowed to collapse before closing the condenser water when shutting down a hot vapor degreaser.

(D) Water shall not be visible in the solvent stream from the water separator.

(iii) Vapor degreasers shall be equipped with at least the following three safety switches:

(A) Condenser flow switch and thermostat (shuts off sump heat if coolant is either not circulating or too warm); and

(B) Spray safety switch (shuts off spray pump if the vapor level drops excessively); and

(C) Vapor level control thermostat (shuts off sump heat when vapor level rises too high).

(b) A routine inspection and maintenance program shall be implemented for the purpose of preventing and correcting solvent losses. For example, leaks from drain taps, cracked gaskets, and malfunctioning equipment must be repaired immediately.

(c) Sump drainage and transfer of hot or warm solvent shall be carried out using threaded or other leakproof couplings.

(d) Still and sump bottoms shall be kept in closed containers.

(e) Waste solvent shall be stored in covered containers and returned to the supplier or to a firm ((which)) that processes solvents for disposal.

(f) All conveyorized cold cleaners and conveyorized vapor degreasers with air/vapor interfaces of 2.0 m² or greater shall have a carbon adsorption system, exhausting less than 25 ppm of solvent averaged over a complete adsorption cycle (based on exhaust ventilation of 15 m³ per min per m² of air/vapor area, when downtime covers are open), or a system with control effectiveness equal to or better than a carbon adsorption system.

(9) Cutback asphalt paving.

(a) All paving applications of cutback asphalts are prohibited during the months of April, May, June, July, August, September and October, except as provided for in ((SWAPCA)) SWCAA 490-040 (9)(b).

(b) The following paving uses and applications of cutback asphalts are permitted during all months of the year.

(i) As a penetrating prime coat on aggregate bases prior to paving.

(ii) The manufacture of patching mixes used exclusively for pavement maintenance and needed to be stockpiled for times longer than one month.

(iii) All paving uses when the temperature during application is below 10°C (50°F). Any person using cutback asphalt for paving shall demonstrate that the ambient air temperature at 8 a.m. (PST) is below 50°F. The paving application of cutback asphalt when the ambient air temperature is 50°F or higher is in violation of this regulation.

(10) Cold cleaners.

(a) The owners or operators of all cold cleaners shall comply with the following equipment specifications:

(i) Be equipped with a cover that is readily opened and closed.

PROPOSED

(ii) Be equipped with a drain rack that returns the drained solvent to the solvent bath.

(iii) Have a freeboard ratio of at least 0.5.

(iv) Have a visible fill line.

(b) An owner or operator of a cold cleaner shall be responsible for following the required operating parameters and work practices. The owner shall post and maintain in the work area of each cold cleaner a pictograph or instructions clearly explaining the following work practices:

(i) The solvent level shall not be above the fill line.

(ii) The spraying of parts to be cleaned shall be performed only within the confines of the cold cleaner.

(iii) The cover of the cold cleaner shall be closed when not in use or when parts are being soaked or cleaned by solvent agitation.

(iv) Solvent-cleaned parts shall be rotated to drain cavities or blind holes and then set to drain until dripping has stopped.

(v) Waste solvent shall be stored in covered containers and returned to the supplier or to a firm (~~which~~) that processes solvents for disposal.

(c) The owner or operator shall maintain cold cleaners in good working condition and free of solvent leaks.

(d) If the solvent has a vapor pressure greater than 2.0 kPa (0.3 psi) measured at 38°C (100°F), or if the solvent is agitated or heated, then the cover must be designed so that it can be easily operated with one hand.

(e) If the solvent has a vapor pressure greater than 4.3 kPa (0.6 psi) measured at 38°C (100°F), then the drainage facility must be internal, so that parts are enclosed under the cover while draining. The drainage facility may be external for applications where an internal type cannot fit into the cleaning system.

(f) If the solvent has a vapor pressure greater than 4.3 kPa (0.6 psi) measured at 38°C (100°F), or if the solvent is heated above 50°C (120°F), one of the following solvent vapor control systems must be used:

(i) The freeboard ratio must be equal to or greater than 0.70; or

(ii) Water must be kept over the solvent. The solvent must be more dense and insoluble in water.

Reviser's note: The typographical error in the above material occurred in the copy filed by the Southwest Clean Air Agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 96-21-101, filed 10/21/96, effective 11/21/96)

((SWAPCA)) SWCAA 490-080 Exceptions and Alternative Methods

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption 93-16-011 filed 7/22/93, effective 8/22/93; 96-21-101 filed 10/21/96, effective 11/21/96]

(1) Other emission reduction methods may be used if the source operator demonstrates to ((SWAPCA)) SWCAA that they are at least as effective as the required methods; and

(2) The operation of a natural gas-fired incinerator and associated capture system installed for the purpose of complying with this regulation shall be required only during the months of April, May, June, July, August, September and October, unless the operation of such devices is required for purposes of occupational health or safety, or for the control of toxic substances, malodors, or other regulated pollutants.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 96-21-101, filed 10/21/96, effective 11/21/96)

((SWAPCA)) SWCAA 490-090 New Source Review

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption 93-16-011 filed 7/22/93, effective 8/22/93; 96-21-101 filed 10/21/96, effective 11/21/96]

The provisions of ((SWAPCA)) SWCAA 400-110 shall apply to all new sources and emissions units to which this regulation is applicable.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-16-011, filed 7/22/93, effective 8/22/93)

((SWAPCA)) SWCAA 490-200 Petroleum Refinery Equipment Leaks

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption 93-16-011 filed 7/22/93, effective 8/22/93]

(1) Specific applicability. This section shall apply to all petroleum refineries as qualified in ((SWAPCA)) SWCAA 490-025.

(2) Provisions for specific processes.

(a) The owner(s) or operator(s) of a petroleum refinery shall:

(i) Develop and conduct a monitoring program consistent with the provisions in ((SWAPCA)) SWCAA 490-200(3), 490-200(4), 490-200(5), and 400-105;

(ii) Record all leaking components (~~which~~) that have a VOC concentration greater than 10,000 ppm when tested according to the provisions in ((SWAPCA)) SWCAA 490-200(3) and place an identification tag on each component consistent with the provisions of ((SWAPCA)) SWCAA 490-200 (4)(c);

(iii) Correct and retest the leaking component, as defined in ((SWAPCA)) SWCAA 490-200 (2)(a)(ii), as soon as practicable, but not later than fifteen days after the leak is recorded. If a leak continues after all reasonable corrective actions have been taken, then the component shall be repaired or replaced on the next scheduled turnaround.

(iv) Identify all leaking components, as defined in ((SWAPCA)) SWCAA 490-200 (2)(a)(ii), that cannot be corrected until the refinery unit is shut down for turnaround.

(b) The owner or operator of a petroleum refinery shall not install or operate a valve at the end of a pipe or line containing VOC unless the pipe or line is sealed with a second suitable closure. Exceptions to this requirement are the ends of a pipe or line connected to pressure relief valves, aspirator

vents or other devices specifically required to be open for safety protection. The sealing device may be removed only when a sample is being taken or during maintenance operations.

(3) Testing procedures. To demonstrate compliance with this regulation, refer to ((SWAPCA)) SWCAA 400-105(5).

(4) Monitoring.

(a) The owner or operator of a petroleum refinery shall conduct a monitoring program consistent with the following provisions:

(i) Monitor yearly by the methods referenced in ((SWAPCA)) SWCAA 490-200(3) all pump seals, pipeline valves in liquid service and process drains;

(ii) Monitor quarterly by the methods referenced in ((SWAPCA)) SWCAA 490-200(3) all compressor seals, pipeline valves in gaseous service and pressure relief valves in gaseous service;

(iii) Monitor weekly by visual methods all pump seals;

(iv) Monitor immediately any pump seal from which liquids are observed leaking;

(v) Monitor any relief valve within twenty-four hours after it has vented to the atmosphere; and

(vi) After a leaking component is repaired, monitor for leaks prior to return to service.

(b) Pressure relief devices that are connected to an operating flare header, vapor recovery device, inaccessible valves, storage tank valves, and valves that are not externally regulated are exempt from the monitoring requirements in ((SWAPCA)) SWCAA 490-200 (4)(a).

(c) The owner or operator of a petroleum refinery, upon the detection of a leaking component, as defined in ((SWAPCA)) SWCAA 490-200 (2)(a)(ii), shall affix a weatherproof and readily visible tag, bearing an identification number and the date the leak is located, to the leaking component. This tag shall remain in place until the leak is corrected.

(5) Recordkeeping.

(a) The owner or operator of a petroleum refinery shall maintain a leaking component's monitoring log as specified in ((SWAPCA)) SWCAA 490-200 (2)(a)(ii) that shall contain, at a minimum, the following data:

(i) The name of the process unit where the component is located.

(ii) The type of component (e.g., valve, seal).

(iii) The tag number of the component.

(iv) The date on which a leaking component is discovered.

(v) The date on which a leaking component is repaired.

(vi) The date and instrument reading of the recheck procedure after a leaking component is repaired.

(vii) A record of the calibration of the monitoring instrument.

(viii) Those leaks that cannot be repaired until turnaround.

(ix) The total number of components checked and the total number of components found leaking.

(b) Copies of the monitoring log shall be retained by the owner or operator for a minimum of two years after the date on which the record was made or the report prepared.

(c) Copies of the monitoring log shall immediately be made available to ((SWAPCA)) SWCAA, upon verbal or written request, at any reasonable time.

(6) Reporting. The owner or operator of a petroleum refinery shall notify ((SWAPCA)) SWCAA in writing within forty-five days following each quarterly or annual inspection for component leaks when:

(a) The number of discovered leaks has increased by more than ten percent above the number recorded during the last inspection of the same components;

(b) The number of leaking components has increased for two consecutive quarterly or annual inspections;

(c) The number of leaks not corrected within fifteen days exceeds five percent of the leaks detected;

(d) The next scheduled process unit turnaround needed to repair an uncorrectable leak is more than twelve months away.

(7) Petition for alternative monitoring.

(a) After two complete liquid service inspections and five complete gaseous service inspections, the owner or operator of a petroleum refinery may petition the director for alternative monitoring procedures or a reduction in monitoring frequency.

(b) A petition for alternative monitoring procedures shall contain:

(i) The name and address of the company and the name and telephone number of the responsible person over whose signature the petition is submitted;

(ii) A detailed description of the problems encountered under ((SWAPCA)) SWCAA 490-200(4); and

(iii) A detailed description of the alternative monitoring procedures and how this alternative procedure will solve or reduce the problems encountered under ((SWAPCA)) SWCAA 490-200(4).

(c) A petition for a reduction in monitoring frequency shall contain:

(i) The information requested in ((SWAPCA)) SWCAA 490-200 (7)(b)(i);

(ii) A detailed description of the proposed component-monitoring schedule;

(iii) A demonstration by the owner or operator that the facility is currently operating with a low level of component leaks and is committed to a maintenance program that will assure a frequency and severity of component leaks as good as that attainable under ((SWAPCA)) SWCAA 490-200(2).

(d) An approved petition for a reduction in monitoring frequency shall begin with the next quarterly inspection and shall be valid for a period of twelve quarters (three years). At the time of the last inspection in the twelve quarters, a new submittal of the information required in ((SWAPCA)) SWCAA 490-200 (7)(c) shall be made if the reduced frequency of monitoring is to continue.

(e) ((SWAPCA)) SWCAA may approve a part or all of a petition for alternative monitoring requested under ((SWAPCA)) SWCAA 490-200 (7)(b) or (c). Approval or disapproval will be in writing and within forty-five calendar days of receipt of the petition by ((SWAPCA)) SWCAA. A failure to approve or disapprove a new petition or petition for renewal within the stated time limit shall be taken as an approval.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 96-21-101, filed 10/21/96, effective 11/21/96)

((SWAPCA)) SWCAA 490-201 Petroleum Liquid Storage in External Floating Roof Tanks

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption 93-16-011 filed 7/22/93, effective 8/22/93; 96-21-101 filed 10/21/96, effective 11/21/96]

(1) Specific applicability.

(a) This section shall apply to all petroleum liquid storage vessels equipped with external floating roofs, having capacities greater than 150,000 liters (40,000 gallons), and as qualified in ((SWAPCA)) SWCAA 490-025.

(b) This section does not apply to petroleum liquid storage vessels that:

- (i) Are used to store waxy, heavy pour crude oil; or
- (ii) Have capacities less than 1,600,000 liters (420,000 gallons) and are used to store produced crude oil and condensate prior to lease custody transfer; or
- (iii) Contain a petroleum liquid with a true vapor pressure of less than 10.5 kPa (1.5 psia); or
- (iv) Contain a petroleum liquid with a true vapor pressure less than 27.6 kPa (4.0 psia); are of welded construction; and presently possess a metallic-type shoe seal, a liquid-mounted foam seal, a liquid-mounted liquid filled type seal, or other closure device of demonstrated equivalence approved by ((SWAPCA)) SWCAA; or
- (v) Are of welded construction, equipped with a metallic-type shoe primary seal and have secondary seal from the top of the shoe seal to the tank wall (shoe-mounted secondary seal).

(2) Provisions for specific processes.

(a) No owner(s) or operator(s) of a petroleum liquid storage vessel shall store a petroleum liquid in that vessel unless:

- (i) The vessel has been fitted with:
 - (A) A continuous secondary seal extending from the floating roof to the tank wall (rim-mounted secondary seal); or
 - (B) A closure or other device which controls VOC emissions with an effectiveness equal to or greater than a seal required under ((SWAPCA)) SWCAA 490-201 (2)(a)(i)(A) and approved by ((SWAPCA)) SWCAA.

(ii) All seal closure devices meet the following requirements:

- (A) There are no visible holes, tears, or other openings in the seal or seal fabric;
- (B) The seal is intact and uniformly in place around the circumference of the floating roof between the floating roof and the tank wall; and
- (C) For vapor mounted primary seals, the accumulated area of gaps exceeding 0.32 cm (1/8 inch) in width between the secondary seal and the tank wall shall not exceed 21.2 cm² per meter of tank diameter (1.0 in² per foot of tank diameter), as determined by the method in ((SWAPCA)) SWCAA 490-201(3).

(iii) All openings in the external floating roof, except for automatic bleeder vents, rim space vents, and leg sleeves, are:

- (A) Equipped with covers, seals, or lids in the closed position except when the openings are in actual use; and
- (B) Equipped with projections into the tank ((which)) that remain below the liquid surface at all times.

(iv) Automatic bleeder vents are closed at all times except when the roof is floated off or landed on the roof leg supports;

(v) Rim vents are set to open when the roof is being floated off the leg supports or at the manufacturer's recommended setting; and

(vi) Emergency roof drains are provided with slotted membrane fabric covers or equivalent covers ((which)) that cover at least ninety percent of the area of the opening.

(b) The owner(s) or operator(s) of a petroleum liquid storage vessel with an external floating roof subject to this regulation shall:

(i) Perform routine inspections annually in order to insure compliance with ((SWAPCA)) SWCAA 490-201 (2)(a) and the inspection shall include a visual inspection of the secondary seal gap;

(ii) Measure the secondary seal gap annually in accordance with ((SWAPCA)) SWCAA 490-201(3) when the floating roof is equipped with a vapor-mounted primary seal; and

(iii) Maintain records of the types of volatile petroleum liquids stored, the maximum true vapor pressure of the liquid as stored, and the results of the inspections performed in ((SWAPCA)) SWCAA 490-201 (2)(b)(i) and (ii).

(c) The owner(s) or operator(s) of a petroleum liquid storage vessel with an external floating roof exempted from this regulation by ((SWAPCA)) SWCAA 490-201 (1)(b)(iii), but containing a petroleum liquid with a true vapor pressure greater than 7.0 kPa (1.0 psi), shall maintain records of the average monthly storage temperature, the type of liquid, and the maximum true vapor pressure for all petroleum liquids with a true vapor pressure greater than 7.0 kPa.

(d) Copies of all records under ((SWAPCA)) SWCAA 490-201 (2)(b) and (c) shall be retained by the owner(s) or operator(s) for a minimum of two years after the date on which the record was made.

(e) Copies of all records required under ((SWAPCA)) SWCAA 490-201 shall immediately be made available to the director, upon verbal or written request, at any reasonable time.

(3) Testing and monitoring.

(a) The owner or operator of a storage vessel covered under ((SWAPCA)) SWCAA 490-201 shall demonstrate compliance by the methods of this subsection or an alternative method approved by ((SWAPCA)) SWCAA.

(b) A person proposing to measure the seal fit of a storage vessel in order to comply with this section shall notify ((SWAPCA)) SWCAA of the intent to measure not less than five working days before the measurement so the director or a representative may observe the measurement if desired.

(c) Compliance with ((SWAPCA)) SWCAA 490-201 (2)(a)(ii)(C) shall be determined by physically measuring the length and width of all gaps around the circumference of the secondary seal in each place where a 0.32 cm (1/8 in.) diam-

eter probe passes freely (without forcing or binding against the seal) between the seal and the tank wall and summing the area of the individual gaps.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 96-21-101, filed 10/21/96, effective 11/21/96)

((SWAPCA)) SWCAA 490-202 Leaks from Gasoline Transport Tanks and Vapor Collection Systems

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption 93-16-011 filed 7/22/93, effective 8/22/93; 96-21-101 filed 10/21/96, effective 11/21/96]

(1) Specific applicability.

This section shall apply to all gasoline transport tanks equipped for gasoline vapor collection and all vapor collection systems at gasoline loading terminals, bulk gasoline plants and gasoline dispensing facilities as qualified in ((SWAPCA)) SWCAA 490-025 and 490-040.

(2) Provisions for specific processes.

(a) The owner(s) or operator(s) of a gasoline loading or unloading facility shall only allow the transfer of gasoline between the facility and a transport tank when a current leak test certification for the transport tank is on file with the facility or a valid inspection sticker is displayed on the vehicle.

(b) The owner(s) or operator(s) of a transport tank shall not make any connection to the tank for the purpose of loading or unloading gasoline, except in the case of an emergency, unless the gasoline transport tank:

(i) Is tested annually according to the schedule in ((SWAPCA)) SWCAA 490-202 (3)(b) and the test procedure referenced in ((SWAPCA)) SWCAA 490-202 (3)(c);

(ii) Sustains a pressure change of no more than 0.75 kilopascals (3 inches of water) in five minutes when pressurized to a gauge pressure of 4.5 kilopascals (460 mm H₂O or 18 inches of water) or evacuated to a gauge pressure of 1.5 kilopascals (150 mm H₂O or 6 inches of water) during the testing required in ((SWAPCA)) SWCAA 490-202 (2)(b)(i). Effective December 15, 1997, certification and allowable pressures shall be as provided below in accordance with 40 CFR 63.420 et seq. (Subpart R);

Tank or Compartment Capacity liters (gallons)	Certification Pressure mm H ₂ O (in. H ₂ O)	Pressure Change Any Time mm H ₂ O (in. H ₂ O)
9464 or more (2500 or more)	25 (1.0)	64 (2.5)
9463 to 5676 (2499 to 1500)	38 (1.5)	76 (3.0)
5679 to 3785 (1499 to 1000)	51 (2.0)	89 (3.5)
3782 or less (999 or less)	64 (2.5)	102 (4.0)

(iii) Is repaired by the owner(s) or operator(s) and retested within fifteen days of testing if it does not meet the criteria of ((SWAPCA)) SWCAA 490-202 (2)(b)(ii);

(iv) All transport tanks transferring gasoline at bulk plants and stationary tanks (including dispensing facilities) shall use gasoline vapor recovery equipment as provided in ((SWAPCA)) SWCAA 491-040(3).

(c) The owner(s) or operator(s) of a transport tank shall:
(i) Have a current leak test certification for the transport tank on file with each gasoline loading or unloading facility where gasoline is transferred; or

(ii) Display a sticker near the Department of Transportation certification plate required by 49 CFR 178.340-10b which:

(A) Shows the date that the gasoline tank truck last passed the test required in ((SWAPCA)) SWCAA 490-202 (2)(b)(i) and (ii);

(B) Shows the identification number of the gasoline tank truck tank;

(C) Shows the certification number of the tanker; and

(D) Shows the expiration date.

(d) The owner(s) or operator(s) of a vapor collection system shall:

(i) Operate the vapor collection system and the gasoline loading equipment during all loadings and unloadings of transport tanks equipped for emission control such that:

(A) A gauge reading of tank pressure will not exceed 4.5 kilopascals (18 inches of water) or vacuum 1.5 kilopascals (6 inches of water);

(B) The concentration of gasoline vapors is below the lower explosive limit (LEL, measured as propane) at all points a distance of 2.5 cm (1 inch) from potential leak sources when measured by the method in ((SWAPCA)) SWCAA 490-202(3); and

(C) There are no visible liquid leaks.

(ii) Repair and retest a vapor collection system that exceeds the limits of ((SWAPCA)) SWCAA 490-202 (2)(d)(i) within fifteen days.

(e) ((SWAPCA)) SWCAA may, at any time, monitor a gasoline transport tank and vapor collection system during loading or unloading operations by the procedure in ((SWAPCA)) SWCAA 490-202 (3)(d) to confirm continuing compliance with ((SWAPCA)) SWCAA 490-202 (2)(b) or (d).

(f) ((SWAPCA)) SWCAA may, at any time, require that a cargo tank be tested for leak detection, pressure decay, or vapor tightness using the procedures identified in 40 CFR 63.425 (f), (g), and (h). The allowable pressure change for testing under 40 CFR 425 (g) and (h) shall be as provided in column three of the table in 2(b) of this section.

(3) Testing and monitoring.

(a) The owner(s) or operator(s) of a gasoline transport tank or vapor collection system shall, at his own expense, demonstrate compliance with ((SWAPCA)) SWCAA 490-202 (2)(a) and (b), respectively. All tests shall be made by, or under the direction of, a person qualified to perform the tests. Persons or companies performing the testing shall be approved by ((SWAPCA)) SWCAA. Persons or companies performing testing shall submit a copy of their test procedures and test equipment calibration procedures to ((SWAPCA)) SWCAA for review and approval for initial qualification. ((SWAPCA)) SWCAA may request calibration and test procedures as necessary to assure continued proper test protocol.

(b) Certification testing shall be performed annually and the certification sticker shall be replaced annually. Certification testing shall be performed no later than the expiration

PROPOSED

date on the sticker and no sooner than 30 days prior to the expiration date. Renewals shall be made for a period of one year from the previous expiration date. Expiration dates shall initially be established by ((SWAPCA)) SWCAA based on a successful certification test. The expiration date may be requested to be adjusted by an owner or operator but, if adjusted, shall not exceed one year from the date of the last valid certification test.

(c) Compliance shall be demonstrated for each required test by the following methods:

TEST TYPE	METHOD
Annual certification (40 CFR 63.425(e))	EPA Method 27
Leak detection test (40 CFR 63.425(f))	EPA Method 21
Nitrogen pressure decay field test (40 CFR 63.425(g))	See 40 CFR 63.425(g)
Continuous performance pressure decay (40 CFR 63.425(h))	EPA Method 27

(d) Monitoring to confirm the continuing existence of leak tight conditions shall be consistent with the procedures in ((SWAPCA)) SWCAA 490-202 (3)(c).

(4) Recordkeeping.

(a) The owner(s) or operator(s) of a gasoline transport tank or vapor collection system shall maintain records of all certification tests and repairs for at least two years after the test or repair is completed.

(b) The records of certification tests required by ((SWAPCA)) SWCAA 490-202 (4)(a) shall, as a minimum, contain:

- (i) The transport tank identification number and tank capacity;
- (ii) The initial test pressure and the time of the reading;
- (iii) The final test pressure and the time of the reading;
- (iv) The initial test vacuum and the time of the reading;
- (v) The final test vacuum and the time of the reading;
- (vi) At the top of each report page, the company name, date and location of the tests on that page; and
- (vii) Name, signature, and title of the person conducting the test.

(c) The owner(s) or operator(s) of a gasoline transport tank shall annually certify that the transport tank passed the required tests.

(d) Each owner or operator of a gasoline transport tank shall pay a fee and register annually for each gasoline transport tank as provided in ((SWAPCA)) SWCAA 400-100(3). The registration fee is due at the time of initial certification and subsequently at the time of annual certification renewal.

(e) Copies of all records required under ((SWAPCA)) SWCAA 490-202 shall immediately be made available to ((SWAPCA)) SWCAA, upon written request, at any reasonable time.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-16-011, filed 7/22/93, effective 8/22/93)

((SWAPCA)) SWCAA 490-203 Perchloroethylene Dry Cleaning Systems

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption 93-16-011 filed 7/22/93, effective 8/22/93]

(1) Specific applicability. This section shall apply to all dry cleaning systems using perchloroethylene cleaning solvent and as qualified in ((SWAPCA)) SWCAA 490-203 (1)(a) and (b) and 490-025.

(a) The following dry cleaning systems are exempt from the requirements of ((SWAPCA)) SWCAA 490-203 (2)(a)(i) and (ii):

- (i) Coin-operated systems;
- (ii) Systems located in a facility with inadequate space to accommodate an adsorber;
- (iii) Systems with insufficient steam capacity to desorb adsorbers.

(b) An exemption for the conditions stated in ((SWAPCA)) SWCAA 490-203 (2)(a)(i) and (ii) may be granted by ((SWAPCA)) SWCAA when sufficient evidence is submitted by the owner(s) or operator(s) of the dry cleaning system to justify the exemption.

(c) A material balance will be used to determine VOC losses.

(2) Provisions for specific processes.

(a) The owner(s) or operator(s) of a perchloroethylene dry cleaning facility subject to this regulation shall:

- (i) Vent the entire dryer exhaust through a properly functioning carbon adsorption system or equally effective control device;
- (ii) Emit no more than 100 ppmv when demonstrated in accordance with ((SWAPCA)) SWCAA 490-203 (3)(c)(i), of VOCs from the dryer control device before dilution;
- (iii) Immediately repair all components found to be leaking liquid VOCs;
- (iv) Cook or treat all diatomaceous earth filters so that the residue contains 25 kg or less of VOCs per 100 kg of wet waste material;
- (v) Reduce the VOCs from all solvent stills to 60 kg or less per 100 kg of wet waste material;
- (vi) Drain all filtration cartridges, in the filter housing or other enclosed container, for at least twenty-four hours before discarding the cartridges; and
- (vii) When possible, dry all drained cartridges without emitting VOCs to the atmosphere.

(3) Testing and monitoring.

(a) Compliance with ((SWAPCA)) SWCAA 490-203 (2)(a)(i), (vi), and (vii) shall be determined by means of visual inspection.

(b) Compliance with ((SWAPCA)) SWCAA 490-203 (2)(a)(iii) shall be determined by means of visual inspection of the following components:

- (i) Hose connections, unions, couplings and valves;
- (ii) Machine door gaskets and seatings;
- (iii) Filter head gasket and seating;
- (iv) Pumps;
- (v) Base tanks and storage containers;
- (vi) Water separators;

PROPOSED

- (vii) Filter sludge recovery;
- (viii) Distillation unit;
- (ix) Diverter valves;
- (x) Saturated lint from lint basket; and
- (xi) Cartridge filters.

(c) Compliance with ((SWAPCA)) SWCAA 490-203 (2)(a)(ii) shall be demonstrated by:

(i) A test consistent with the procedures on file with and approved by ((SWAPCA)) SWCAA; or

(ii) The proper installation, operation, and maintenance of equipment that has been demonstrated by the owner(s) or operator(s) to adequately meet the emission limits in ((SWAPCA)) SWCAA ~~WAC 173-490-203~~ (2)(a)(ii).

(d) Compliance with ((SWAPCA)) SWCAA ~~WAC 173-490-203~~ (2)(a)(iv) and (v) shall be demonstrated by tests consistent with the procedures on file with and approved by ((SWAPCA)) SWCAA.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The typographical errors in the above material occurred in the copy filed by the Southwest Clean Air Agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-16-011, filed 7/22/93, effective 8/22/93)

((SWAPCA)) SWCAA 490-204 Graphic Arts Systems

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption 93-16-011 filed 7/22/93, effective 8/22/93]

(1) Specific applicability.

(a) This section shall apply to all packaging rotogravure, publication rotogravure, specialty printing operations, and flexographic printing facilities that use more than 90 megagrams (100 tons) per year of VOCs as a component of ink, for the thinning of ink, cleaning of presses, press components and equipment; and are covered by ((SWAPCA)) SWCAA 490-025.

(b) Machines that have both coating units (apply a uniform layer of material across the entire width of a web) and printing units (forming words, designs, and pictures) shall be included under ((SWAPCA)) SWCAA 490-204 rather than ((SWAPCA)) SWCAA 490-040(6), Surface Coaters.

(2) Provisions for specific processes.

(a) No owner(s) or operator(s) of a packaging rotogravure, publication rotogravure or flexographic printing subject to this regulation and employing solvent containing ink may operate, cause, allow or permit the operation of the facility unless:

(i) The volatile fraction of ink, as it is applied to the substrate, contains twenty-five percent by volume or less of organic solvent and seventy-five percent by volume or more of water;

(ii) The ink as it is applied to the substrate, less water, contains sixty percent by volume or more nonvolatile material; or

(iii) The owner(s) or operator(s) installs and operates a system that captures at least ninety percent by weight and;

(A) A carbon adsorption system ((which)) that reduces the volatile organic emissions from the capture system by at least ninety percent by weight;

(B) An incineration system ((which)) that oxidizes at least ninety percent of the nonmethane VOCs (VOC measured as total combustible carbon) to carbon dioxide and water; or

(C) An alternative VOC emission reduction system demonstrated to have at least a ninety percent reduction efficiency, measured across the control system, and has been approved by ((SWAPCA)) SWCAA.

(b) A collection system shall be used with the emission controls of ((SWAPCA)) SWCAA 490-204 (2)(a)(iii). The design and operation of the collection system shall be consistent with good engineering practice, and shall provide an overall reduction in the emission of VOCs of at least:

(i) Seventy-five percent where a publication rotogravure process is used; or

(ii) Sixty-five percent where a packaging rotogravure process is used; or

(iii) Sixty percent where a flexographic process is used.

(3) Testing and monitoring.

(a) To demonstrate compliance with this regulation, refer to ((SWAPCA)) SWCAA 400-105.

(b) When add-on control equipment is used, continuous monitors of the following parameters shall be installed, periodically calibrated, and operated at all times that the associated control equipment is operating:

(i) Exhaust gas temperature of all incinerators;

(ii) Temperature rise across a catalytic incinerator bed;

(iii) Breakthrough of VOC on a carbon adsorption unit; and

(iv) Any other continuous monitoring or recording device required by ((SWAPCA)) SWCAA.

(c) The owner or operator of a facility shall be responsible for all expenses of monitoring required by ((SWAPCA)) SWCAA 490-204 (3)(b).

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-16-011, filed 7/22/93, effective 8/22/93)

((SWAPCA)) SWCAA 490-205 Surface Coating of Miscellaneous Metal Parts and Products

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption 93-16-011 filed 7/22/93, effective 8/22/93]

(1) Specific applicability. This section shall apply to surface coating of miscellaneous metal parts and products in the following industries, if the potential uncontrolled emissions of VOC is greater than 10 tons per year and as qualified in ((SWAPCA)) SWCAA 490-205 (1)(b), (c), and (d), and 490-025.

(a) Miscellaneous metal parts and products shall include:

(i) Large farm machinery (harvesting, fertilizing and planting machines, tractors, combines, etc.);

(ii) Small farm machinery (lawn and garden tractors, lawn mowers, rototillers, etc.);

(iii) Small appliances (fans, mixers, blenders, crock pots, dehumidifiers, vacuum cleaners, etc.);

(iv) Commercial machinery (office equipment, computers and auxiliary equipment, typewriters, calculators, vending machines, etc.);

(v) Industrial machinery (pumps, compressors, conveyor components, fans, blowers, transformers, etc.);

(vi) Fabricated metal products (metal covered doors, frames, etc.); and

(vii) Any other industrial category (~~which~~) that coats metal parts or products under the Standard Industrial Classification Code of Major Group 33 (primary metal industries), Major Group 34 (fabricated metal products), Major Group 35 (nonelectric machinery), Major Group 36 (electrical machinery), Major Group 37 (transportation equipment), Major Group 38 (miscellaneous instruments), Major Group 39 (miscellaneous manufacturing industries), Major Group 40 (railroad transportation), and Major Group 41 (transit passenger transportation).

(b) This section is not applicable to the surface coating of the following metal parts and products:

- (i) Automobiles and light-duty trucks;
- (ii) Metal cans;
- (iii) Flat metal sheets and strips in the form of rolls or coils;
- (iv) Magnet wire for use in electrical machinery;
- (v) Metal furniture;
- (vi) Large appliances;
- (vii) Airplanes;
- (viii) Automobile refinishing;
- (ix) Customized top coating of automobiles and trucks, if production is less than thirty-five vehicles per day; and
- (x) Exterior of marine vessels.

(c) This regulation applies to the application area, flashoff area, air and forced air drier, and oven used in the surface coating of the metal parts and products in ((SWAPCA)) SWCAA 490-205 (1)(a). This regulation also applies to prime coat, top coat, and single coat operations.

(d) The application of coatings whose formulations are controlled by federal specifications and the use of which is required by federal agencies shall be exempt from the emission limits in ((SWAPCA)) SWCAA 490-205 (2)(a).

(e) A case-by-case determination of the emission controls best representing RACT may be substituted for the requirements of ((SWAPCA)) SWCAA 490-205(2). Such a determination shall be approved by ((SWAPCA)) SWCAA.

(2) Provisions for specific processes.

(a) The owner or operator of a coating application system shall not emit a quantity of VOCs greater than those listed by specific coating, excluding water and as delivered to the application system:

(i) Clear coatings	0.52 kg/liter	(4.3 lb/gallon)
(ii) Extreme performance coatings	0.42 kg/liter	(3.5 lb/gallon)
(iii) Air dried coatings	0.42 kg/liter	(3.5 lb/gallon)
(iv) All others	0.36 kg/liter	(3.0 lb/gallon)
(v) Powder coatings	0.05 kg/liter	(0.4 lb/gallon)

(b) When more than one emission limitation listed in ((SWAPCA)) SWCAA 490-205 (2)(a) applies to a specific coating, the least stringent will apply.

(c) All VOC emissions from solvent washings shall be considered in the emission limitations in ((SWAPCA)) SWCAA 490-205 (2)(a), unless the solvent is directed into containers that prevent evaporation into the atmosphere.

(d) The emission limits set forth in ((SWAPCA)) SWCAA 490-205 (2)(a) shall be achieved by:

- (i) The application of low solvent coating technology; or
- (ii) An incineration system that oxidizes at least ninety percent of the VOCs (VOC measured as total combustible carbon) to carbon dioxide and water; or
- (iii) An equivalent means of VOC reduction certified by the owner(s) or operator(s) and approved by ((SWAPCA)) SWCAA.

(e) A collection system shall be used together with the incinerator of ((SWAPCA)) SWCAA 490-205 (2)(d)(ii). The design and operation of the collection system shall be consistent with good engineering practice and provide for an overall VOC emission reduction necessary to comply with the emission limits of ((SWAPCA)) SWCAA 490-205 (2)(a). The required VOC emission reduction shall be calculated on a unit volume of uncured solids basis.

(3) Testing and monitoring.

(a) ((SWAPCA)) SWCAA may require the owner(s) or operator(s) of a source to demonstrate at his/her own expense, compliance by the methods of ((SWAPCA)) SWCAA 490-205 (3)(c).

(b) The owner(s) or operator(s) of a source shall notify ((SWAPCA)) SWCAA at least ten days before a proposed emission certification test so the director or a representative may observe the test.

(c) To demonstrate compliance with this regulation, refer to ((SWAPCA)) SWCAA 400-105.

(d) ((SWAPCA)) SWCAA may require monitoring of the following parameters:

- (i) Exhaust gas temperature of all incinerators;
- (ii) Temperature rise across a catalytic incinerator bed; and
- (iii) Breakthrough of VOC on a carbon adsorption unit.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-16-011, filed 7/22/93, effective 8/22/93)

((SWAPCA)) SWCAA 490-207 Surface Coating of Flatwood Paneling

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption 93-16-011 filed 7/22/93, effective 8/22/93]

(1) Specific applicability.

(a) This section shall apply to all flatwood panel manufacturers and surface finishing facilities as qualified in ((SWAPCA)) SWCAA 490-207 (1)(b) and (c) and 490-025.

(b) These regulations shall apply to all operations and equipment that is used to apply, convey and dry (including flashoff areas) a surface pattern or coating on the following products:

PROPOSED

(i) Printed interior panels made of hardwood plywood and thin particleboard;

(ii) Natural finish hardwood plywood panels; or

(iii) Hardboard paneling with Class II finishes.

(c) These regulations do not apply to the manufacture of exterior siding, tileboard, or particleboard used as a furniture component.

(2) Provisions for specific processes.

(a) The owner(s) or operator(s) of a facility shall not emit VOCs from a coating application system in excess of:

(i) 2.9 kg per 100 square meters of coated finished product (6.0 lb/1,000 square feet) from printed interior panels, regardless of the number of coats applied;

(ii) 5.9 kg per 100 square meters of coated finished product (12.0 lb/1,000 square feet) from natural finish hardwood plywood panels, regardless of the number of coats applied; and

(iii) 4.9 kg per 100 square meters of coated finished product (10.0 lb/1,000 square feet) from Class II finishes on hardboard panels, regardless of the number of coats applied.

(b) The emission limits in ((SWAPCA)) SWCAA 490-207 (2)(a) shall be achieved by:

(i) The application of low solvent content coating technology; or

(ii) An incineration system ((which)) that oxidizes at least ninety percent of the nonmethane VOCs entering the incinerator (VOC measured as total combustible carbon) to carbon dioxide and water; or

(iii) An equivalent means of VOC removal. The equivalent means must be certified by the owner(s) or operator(s) and approved by ((SWAPCA)) SWCAA.

(c) A capture system shall be used in conjunction with the emission control systems in ((SWAPCA)) SWCAA 490-207 (2)(b)(ii) and (iii). The design and operation of the capture system must be consistent with good engineering practice and shall be required to provide for an overall emission reduction sufficient to meet the emission limitation in ((SWAPCA)) SWCAA 490-207 (2)(a).

(3) Testing and monitoring.

(a) ((SWAPCA)) SWCAA may require the owner or operator of a facility to demonstrate at his/her own expense compliance by the methods of ((SWAPCA)) SWCAA 490-207 (3)(c).

(b) The owner(s) or operator(s) of a facility shall notify ((SWAPCA)) SWCAA at least ten days before a proposed emission certification test so the director or a representative may observe the test.

(c) To demonstrate compliance with this regulation, refer to ((SWAPCA)) SWCAA 400-105.

(d) ((SWAPCA)) SWCAA may require monitoring of the following parameters:

(i) Exhaust gas temperature of all incinerators;

(ii) Temperature rise across a catalytic incinerator bed; and

(iii) Breakthrough of VOC on a carbon adsorption unit.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 93-16-011, filed 7/22/93, effective 8/22/93)

((SWAPCA)) SWCAA 490-208 **Aerospace Assembly and Component Coating Operations**

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption 93-16-011 filed 7/22/93, effective 8/22/93]

(1) Specific applicability. This section shall apply to all aerospace component coating facilities that emit an annual average of eighteen kilograms (forty pounds) or more of VOCs per operating day and as qualified in ((SWAPCA)) SWCAA 490-025.

(2) It shall be unlawful for any person to cause or allow:

(a) The application of any primer or topcoat to aerospace components ((which)) that contains in excess of:

(i) 650 grams of VOC per liter of primer, less water, as applied.

(ii) 600 grams of VOC per liter of topcoat, less water, as applied.

(b) The application of any temporary protective coating to aerospace components that contains more than 250 grams of VOC per liter of material, less water, as applied.

(c) The use of VOCs of composite vapor pressure of 10.4 kPa (1.5 psia) or greater at a temperature of 21.1°C (70°F) for surface preparation or cleanup, excluding paint removal.

(d) The use of VOCs for the cleanup of spray equipment used in aerospace component coating operations unless 85 percent of the VOCs by weight, are collected and disposed so that they are not emitted to the atmosphere.

(e) The use of a stripper ((which)) that contains more than 400 grams of VOC per liter or has a composite vapor pressure of VOCs more than 1.3 kPa (0.19 psia) at 21.1°C (70°F).

(3) The emission limits of paragraph (2) shall be achieved by:

(a) The application of reasonably available low solvent coating technology;

(b) A vapor collection and disposal system; or

(c) An equivalent method of VOC reduction certified by the owner(s) or operator(s) and approved by ((SWAPCA)) SWCAA.

(4) The provisions of ((SWAPCA)) SWCAA 490-208 (2)(a) and (2)(b) shall not apply to the following materials:

(a) Coatings for masking in chemical etching operations,

(b) Adhesive bonding primer,

(c) Flight test coatings,

(d) Space vehicle coatings, or

(e) Fuel tank coatings.

(5) Upon the submission of an alternative coating evaluation, ((SWAPCA)) SWCAA may determine that a reasonably available low solvent coating does exist for a given application and may exempt the coating from requirements of ((SWAPCA)) SWCAA 490-208. All alternative coating evaluations shall contain, as a minimum:

(a) Types of products to be coated,

(b) Types of coatings evaluated,

(c) Results of performance tests,

(d) Status of research into development of low VOC coatings for the application,

- (e) Feasibility of installing control equipment,
 (f) Mitigating measures that could be implemented to reduce VOC emissions.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

WSR 00-24-094
PROPOSED RULES
SOUTHWEST
CLEAN AIR AGENCY

[Filed December 5, 2000, 11:03 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 00-17-032.

Title of Rule: SWCAA 491 Emission Standards and Controls for Sources Emitting Gasoline Vapors.

Purpose: This is an existing rule that establishes gasoline vapor requirements for various types of facilities that handle or distribute gasoline.

Statutory Authority for Adoption: RCW 70.94.141.

Statute Being Implemented: RCW 70.94.141.

Summary: The changes proposed in this rule are administrative in nature. The rule is being revised to reflect a name change for the agency. No technical changes are proposed.

Reasons Supporting Proposal: The name of the agency was changed July 6, 2000, from the Southwest Air Pollution Control Authority (SWAPCA) to the Southwest Clean Air Agency (SWCAA).

Name of Agency Personnel Responsible for Drafting and Implementation: Paul Mairose, 1308 N.E. 134th Street, Vancouver, WA, (360) 574-3058; and Enforcement: Robert D. Elliott, 1308 N.E. 134th Street, Vancouver, WA, (360) 574-3058.

Name of Proponent: Southwest Clean Air Agency, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: This is an existing rule. Only administrative type changes are being proposed. There will be no effect on the public or regulated businesses as a result of these changes.

Proposal Changes the Following Existing Rules: Titles and rule numbers that include the agency name are being changed to reflect the name of the agency.

No small business economic impact statement has been prepared under chapter 19.85 RCW. Changes proposed by SWCAA are consistent with federal and state rules already in effect. This agency is not subject to the small business economic impact provisions of chapter 19.85 RCW.

RCW 34.05.328 does not apply to this rule adoption. Pursuant to RCW 70.94.141(1), section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. SWCAA is not voluntarily invoking section 201, chapter 403, Laws of 1995.

Hearing Location: Office of SWCAA, 1308 N.E. 134th Street, Vancouver, WA 98685, on February 1, 2001, at 3:00 p.m.

Assistance for Persons with Disabilities: Contact Mary Allen by January 26, 2001, TDD (360) 574-3058.

Submit Written Comments to: Paul Mairose, 1308 N.E. 134th Street, Vancouver, WA 98685, fax (360) 574-3058, by January 19, 2001.

Date of Intended Adoption: February 1, 2001.

December 4, 2000

Robert D. Elliott
 Executive Director

((SWAPCA)) SWCAA 491

EMISSION STANDARDS AND CONTROLS FOR SOURCES EMITTING GASOLINE VAPORS

- 491-010 Policy and Purpose
- 491-015 Applicability
- 491-020 Definitions
- 491-030 Registration
- 491-040 Gasoline Vapor Control Requirements
- 491-050 Failures, Certification, Testing and Recordkeeping
- 491-060 Severability

AMENDATORY SECTION (Amending WSR 96-21-102, filed 10/21/96, effective 11/21/96)

((SWAPCA)) SWCAA 491-010 Policy and Purpose

[Statutory Authority: Chapter 70.94.141 RCW and 70.94.165 RCW. Original adoption WSR 93-16-011 filed 7/22/93, effective 8/22/93; WSR 96-21-102 filed 10/21/96, effective 11/21/96]

(1) It is the policy of the Southwest Clean Air (~~Pollution Control Authority~~) Agency ((SWAPCA)) SWCAA under the authority provided in Chapter 70.94.141, and 70.94.152 and 70.94.((331))165 RCW to provide for the systematic control of air pollution from air contaminant sources within the jurisdiction of ((SWAPCA)) SWCAA.

(2) It is the purpose of this regulation to establish standards for the control of air contaminants emitted from gasoline marketing and dispensing sources within the jurisdiction of ((SWAPCA)) SWCAA including Clark, Cowlitz, Lewis, Skamania, and Wahkiakum Counties.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 00-11-149, filed 5/24/2000, effective 6/24/2000)

((SWAPCA)) SWCAA 491-015 Applicability

[Statutory Authority: Chapter 70.94.141 RCW and 70.94.165 RCW. Original adoption WSR 93-16-011 filed 7/22/93, effective 8/22/93; WSR 96-21-102 filed 10/21/96, effective 11/21/96, WSR 00-11-149 filed 5/24/2000, effective 6/24/2000]

This regulation applies to gasoline marketing operations within ((SWAPCA)) SWCAA jurisdiction, including the storage, transport, and transfer of gasoline, transfer from storage tanks into transport tanks, marine vessel loading and

PROPOSED

unloading, and transfer from storage tanks into motor vehicles. This regulation applies to facilities with above ground and underground storage tanks.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 00-11-149, filed 5/24/2000, effective 6/24/2000)

((SWAPCA)) SWCAA 491-020 Definitions

[Statutory Authority: Chapter 70.94.141 RCW and 70.94.165 RCW. Original adoption WSR 93-16-011 filed 7/22/93, effective 8/22/93; WSR 96-21-102 filed 10/21/96, effective 11/21/96, WSR 00-11-149 filed 5/24/2000, effective 6/24/2000]

The definitions of terms contained in ((SWAPCA)) SWCAA 400 are by this reference incorporated into this regulation. Unless a different meaning is clearly required by context, the following words and phrases, as used in this regulation, shall have the following meanings:

(1) "Bottom loading" means the filling of a tank through a line entering the bottom of the tank.

(2) "Bulk gasoline plant" means a gasoline storage and transfer facility that receives more than ninety percent of its annual gasoline throughput by transport tank, and reloads gasoline into transport tanks.

(3) "Bunkering" means, for purpose of this rule, refueling a vessel with a fuel product where the intended use of that gasoline or fuel product is for combustion in the onboard engine of the marine vessel.

(4) "Canister capture rate" means canister effectiveness times the percent of light duty vehicles that have onboard vapor recovery systems.

(5) "Canister effectiveness" means the percent of refueling vapors recovered by a representative onboard vapor recovery system.

(6) "Centroid" means the geometric center of a gas pump or a bank of gas pumps or, if a station has more than one bank of pumps, the geometric center of each bank of pumps.

(7) "Certified vapor recovery system" means a vapor recovery system ((which)) that has been certified by the California Air Resources Board (CARB). Only Stage II vapor recovery systems with a single coaxial hose can be certified. ((SWAPCA)) SWCAA may certify vapor recovery systems in addition to those certified by the California Air Resources Board as of the effective date of the regulation.

(8) "Gas freed" means a marine vessel's cargo tank has been certified by a Marine Chemist as "Safe for Workers" according to the requirements outlined in the National Fire Protection Association Rule 306.

(9) "Gasoline" means a petroleum distillate ((which)) that is a liquid at standard conditions and has a true vapor pressure greater than four pounds per square inch absolute (4.0 psia) at twenty degrees C (20°C), and is used as a fuel for internal combustion engines. Also any liquid sold as a vehicle fuel with a true vapor pressure greater than four pounds per square inch absolute at twenty degrees C (20°C) shall be considered "gasoline" for purpose of this regulation.

(10) "Gasoline dispensing facility" means any site dispensing gasoline into motor vehicle fuel tanks from stationary storage tanks (above ground or underground).

(11) "Gasoline loading terminal" means a gasoline transfer facility that receives more than ten percent of its annual gasoline throughput solely or in combination by pipeline, ship or barge, and loads gasoline into transport tanks.

(12) "Leak free" means a liquid leak of less than four drops per minute.

(13) "Lightering" means the transfer of fuel product into a cargo tank from one marine tank vessel to another.

(14) "Loading event" means the loading or lightering of gasoline into a marine tank vessel's cargo tank, or the loading of any product into a marine tank vessel's cargo tank where the prior cargo was gasoline. The event begins with the connection of a marine tank vessel to a storage or cargo tank by means of piping or hoses for the transfer of a fuel product from the storage or cargo tank(s) into the receiving marine tank vessel. The event ends with disconnection of the pipes and/or hoses upon completion of the loading process.

(15) "Marine tank vessel" means any marine vessel constructed or converted to carry liquid bulk cargo that transports gasoline.

(16) "Marine terminal" means any facility or structure used to load or unload any fuel product cargo into or from marine tank vessels.

(17) "Marine vessel" means any tugboat, tanker, freighter, passenger ship, barge or other boat, ship or watercraft.

(18) "Modified" means any physical change in equipment, or change in the method of operation, of a gasoline dispensing facility, terminal, or loading or unloading facility, that increases the amount of any air contaminant emitted by such source or that results in the emission of any air contaminant not previously emitted. The term modified shall be construed consistent with the definitions of modification in Section 7411, Title 42, United States Code, and with rules implementing that section. Section 7411 exempts changes in gasoline throughput not resulting directly from a physical change.

(19) "NAAQS" means National Ambient Air Quality Standard.

(20) "Ozone contributing county" means a county in which the emissions have contributed to the formation of ozone in any county or area where violation of federal ozone standards have been measured, and includes: Cowlitz, Island, Kitsap, Lewis, Skagit, Thurston, Wahkiakum, and Whatcom counties.

(21) "Permanent residence" means a single-family or multi-family dwelling or any other facility designed for use as permanent housing.

(22) "((SWAPCA)) SWCAA" means the Southwest Clean Air ((Pollution Control Authority)) Agency.

(23) "Stage I" means gasoline vapor recovery during all gasoline marketing transfer operations except motor vehicle refueling.

(24) "Stage II" means gasoline vapor recovery during motor vehicle refueling operations from stationary tanks.

(25) "Submerged fill line" means any discharge pipe or nozzle which meets either of the following conditions:

- Where the tank is filled from the top, the end of (upper cut of the bevel on) the discharge pipe or nozzle must be totally submerged when the liquid level is six inches from the bottom of the tank, or;

- Where the tank is filled from the side, the discharge pipe or nozzle must be totally submerged when the liquid level is eighteen inches from the bottom of the tank.

(26) "Submerged loading" means the filling of a tank with a submerged fill line.

(27) "Suitable cover" means a door, hatch, cover, lid, pipe cap, pipe blind, valve, or similar device that prevents the accidental spilling or emitting of gasoline. Pressure relief valves, aspirator vents, or other devices specifically required for safety and fire protection are not included.

(28) "Throughput" means the amount of material passing through a facility.

(29) "Top off" means to attempt to dispense gasoline to a motor vehicle fuel tank after a vapor recovery dispensing nozzle has shut off automatically.

(30) "Transport tank" means a container used for shipping gasoline over roadways.

(31) "True vapor pressure" means the equilibrium partial pressure of a petroleum liquid as determined by methods described in American Petroleum Institute (API) Bulletin 2517, 1980.

(32) "Upgraded" means the modification of a gasoline storage tank, including tank installation or replacement, or piping to add cathodic protection, tank lining or spill and overflow protection that involved removal of ground or ground cover above a portion of the product piping.

(33) "Vapor balance system" means a system consisting of the transport tank, gasoline vapor transfer lines, storage tank, and all tank vents designed to route displaced gasoline vapors from a tank being filled with liquid gasoline.

(34) "Vapor collection system" means a closed system to conduct vapors displaced from a tank being filled into the tank being emptied, a vapor holding tank, or a vapor control system.

(35) "Vapor control system" means a system designed and operated to reduce or limit the emission of gasoline vapors emission into the ambient air.

(36) "Vapor-mounted seal" means a primary seal mounted continuously around the circumference of the tank so there is an annular vapor space underneath the seal. The annular vapor space is bounded by the bottom of the primary seal, the tank wall, the liquid surface, and the floating roof.

(37) "Vapor tight" means a leak of less than one hundred percent of the lower explosive limit on a combustible gas detector measured at a distance of one inch from the source or no visible evidence of air entrainment in the sight glasses of liquid delivery hoses.

(38) "WDOE" or "Ecology" means the Washington Department of Ecology.

(39) "Western Washington counties" means the following counties: Clallam, Clark, Cowlitz, Grays Harbor, Island, Jefferson, King, Kitsap, Lewis, Mason, Pacific, Pierce, San Juan, Skagit, Skamania, Snohomish, Thurston, Wahkiakum, and Whatcom.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 00-11-149, filed 5/24/2000, effective 6/24/2000)

((SWAPCA)) SWCAA 491-030 Registration

[Statutory Authority: Chapter 70.94.141 RCW, 70.94.151 RCW and 70.94.165 RCW. Original adoption WSR 93-16-011 filed 7/22/93, effective 8/22/93; WSR 96-21-102 filed 10/21/96, effective 11/21/96, WSR 00-11-149 filed 5/24/2000, effective 6/24/2000]

(1) The owner or operator of a gasoline loading terminal, bulk gasoline plant, or gasoline dispensing facility subject to the provisions of ((SWAPCA)) **SWCAA** 491-040 (2) through (5) shall register the facility annually with ((SWAPCA)) **SWCAA**. Facilities subject to registration under this section shall be assessed fees consistent with and as required in ((SWAPCA)) **SWCAA** 400-100.

(2) Administration of the registration program shall be consistent with the Registration Program requirements of ((SWAPCA)) **SWCAA** 400-100.

(3) ((SWAPCA)) **SWCAA** will provide a written verification of registration to owners or operators of facilities subject to the provisions of ((SWAPCA)) **SWCAA** 491-040 (2) through (6). Such verification shall be available for inspection by ((SWAPCA)) **SWCAA** personnel during normal business hours.

(4) The owner or operator of a gasoline loading terminal or a gasoline dispensing facility (non-major source) shall maintain total annual gasoline throughput records for the most recent three calendar years. Such records shall be available for inspection by ((SWAPCA)) **SWCAA** personnel during normal business hours.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 00-11-149, filed 5/24/2000, effective 6/24/2000)

((SWAPCA)) SWCAA 491-040 Gasoline Vapor Control Requirements

[Statutory Authority: Chapter 70.94.141 RCW and 70.94.165 RCW. Original adoption WSR 93-16-011 filed 7/22/93, effective 8/22/93; WSR 96-21-102 filed 10/21/96, effective 11/21/96, WSR 00-11-149 filed 5/24/2000, effective 6/24/2000]

(1) Fixed-roof gasoline storage tanks.

(a) All fixed-roof gasoline storage tanks having a nominal storage capacity greater than forty thousand (40,000) gallons shall comply with one of the following:

(i) Meet the equipment specifications and maintenance requirements of the federal standards of performance for new stationary sources - Storage Vessels for Petroleum Liquids (40 CFR 60, subparts K, Ka and Kb).

(ii) Be retrofitted with a floating roof or internal floating cover using a metallic seal or a nonmetallic resilient seal at least meeting the equipment specifications of the federal standards referred to in (a)(i) of this subsection or its equivalent.

PROPOSED

(iii) Be fitted with a floating roof or internal floating cover meeting the manufacturer's equipment specifications in effect when it was installed.

(b) All seals used in (a)(ii) and (iii) of this subsection are to be maintained in good operating condition and the seal fabric shall contain no visible holes, tears, or other openings consistent with 40 CFR 60 subparts Ka and Kb.

(c) All openings not related to safety are to be sealed with suitable closures.

(d) Tanks used for the storage of gasoline in bulk gasoline plants and equipped with vapor balance systems as required in subsection (3)(b) of this section shall be exempt from the requirements of subsection (1) of this section.

(e) All fixed roof gasoline storage tanks subject to this section shall comply no later than December 31, 1993 or at the time that the throughput is exceeded.

(2) Gasoline loading terminals.

(a) This section shall apply to all gasoline loading terminals with an average annual gasoline throughput greater than 7.2 million gallons on a calendar basis and shall comply no later than December 31, 1993 or when the throughput is exceeded.

(b) Facilities loading gasoline into any transport tank shall be equipped with a vapor control system (VCS) as described in (c) of this subsection and comply with the following conditions:

(i) The loading facility shall employ submerged or bottom loading for all transport tanks.

(ii) The VCS shall be connected during the entire loading of all transport tanks.

(iii) The loading of all transport tanks shall be performed such that the transfer is at all times vapor tight. Emissions from pressure relief valves shall not be included in the controlled emissions when the back pressure in the VRS collection lines is lower than the relief pressure setting of the transport tank's relief valves.

(iv) All loading lines and vapor lines shall be equipped to close automatically when disconnected. The point of closure shall be on the tank side of any hose or intermediate connecting line.

(c) The VCS shall be designed and built according to accepted industrial practices and meet the following conditions:

(i) The VCS shall not allow organic vapors emitted to the ambient air to exceed thirty-five milligrams per liter (35 mg/l) (three hundred twenty-two milligrams per gallon or 322 mg/gal) of gasoline loaded.

(ii) The VCS shall be equipped with a device to monitor the system while the VCS is in operation.

(iii) The back pressure in the VCS collection lines shall not exceed the transport tank's pressure relief settings.

(3) Bulk gasoline plants and transport tanks.

(a) This section shall apply to all bulk gasoline plants with an average annual gasoline throughput greater than 7.2 million gallons on a calendar basis and shall comply no later than December 31, 1993, or when the throughput is exceeded, and gasoline transport tanks.

(b) Deliveries to bulk gasoline plant storage tanks.

(i) The owner or operator of a bulk gasoline plant shall not permit the loading of gasoline into a storage tank equipped with vapor balance fittings unless the vapor balance system is attached to the transport tank and operated properly. The vapor balance system shall prevent at least ninety percent of the displaced gasoline vapors from entering the ambient air. A vapor balance system that is designed, built, and operated according to accepted industrial practices will satisfy this requirement.

(ii) Storage tank requirements. All storage tanks with a nominal capacity greater than five hundred fifty (550) gallons and used for the storage of gasoline shall comply with the following conditions:

(A) Each storage tank shall be equipped with a submerged fill line.

(B) Each storage tank shall be equipped for vapor balancing of gasoline vapors with transport tanks during gasoline transfer operations.

(C) The vapor line fittings on the storage tank side of break points with the transport tank vapor connection pipe or hose shall be equipped to close automatically when disconnected.

(D) The pressure relief valves on storage tanks shall be set at the highest possible pressure consistent with local and state codes for fire and safety but in no case greater than ninety percent of the tank's safe working pressure.

(iii) Transport tank requirements. All transport tanks transferring gasoline to storage tanks in a bulk gasoline plant shall comply with the following conditions:

(A) The transport tank shall be equipped with the proper attachment fittings to make vapor tight connections for vapor balancing with storage tanks.

(B) The vapor line fittings on the transport tank side of break points with the storage tank connection pipe or hose shall be equipped to close automatically when disconnected.

(C) The pressure relief valves on transport tanks shall be set at the highest possible pressure consistent with local and state codes for fire and safety.

(c) Gasoline transfer operations.

(i) No owner or operator of a bulk gasoline plant or transport tank shall allow the transfer of gasoline between a stationary storage tank and a transport tank except when the following conditions exist:

(A) The transport tanks are being submerged filled or bottom loaded.

(B) The loading of all transport tanks, except those exempted under (c)(ii) of this subsection are being performed using a vapor balance system.

(C) The transport tanks are equipped to balance vapors and maintained in a leak tight condition in accordance with subsection (6) of this section.

(D) The vapor return lines are connected between the transport tank and the stationary storage tank and the vapor balance system is operated properly.

(ii) Transport tanks used for gasoline that meet all of the following conditions shall be exempt from the requirement to be equipped with any attachment fitting for vapor balance lines if:

(A) The transport tank is used exclusively for the delivery of gasoline into storage tanks of a facility exempt from

the vapor balance requirements of subsection (4) of this section; and

(B) The transport tank has a total nominal capacity less than four thousand gallons and is constructed so that it would require the installation of four or more separate vapor balance fittings.

(4) Gasoline dispensing facilities (Stage I).

(a) This section shall apply to the delivery of gasoline to gasoline dispensing facilities with an annual gasoline throughput greater than three hundred sixty thousand gallons in Cowlitz, Lewis, Skamania and Wahkiakum Counties. For Clark County, this section applies to gasoline dispensing facilities with greater than 200,000 gallons annual throughput on a calendar year basis. All facilities subject to this section shall comply when the throughput is exceeded.

(b) All gasoline storage tanks of the facilities defined in (a) of this subsection shall be equipped with submerged or bottom fill lines and fittings to vapor balance gasoline vapors with the delivery transport tank.

(c) Gasoline storage tanks with offset fill lines shall be exempt from the requirement of (b) of this subsection if installed prior to January 1, 1979.

(d) The owner or operator of a gasoline dispensing facility shall not permit the loading of gasoline into a storage tank equipped with vapor balance fittings unless the vapor balance system is attached to the transport tank and operated satisfactorily. In addition, no owner or operator of a transport tank shall load gasoline into a storage tank equipped with vapor balance fittings unless the vapor balance system is attached to the transport tank and operated satisfactorily.

(e) All gasoline dispensing facilities subject to this section shall be equipped with CARB or ((SWAPCA)) SWCAA certified Stage I vapor recovery fittings or equipment.

(f) Only two point Stage I fittings shall be used with vacuum assist type Stage II systems. Coaxial Stage I fittings may continue to be used for balance type Stage II systems and systems without Stage II gasoline vapor recovery controls.

(g) All Stage I gasoline vapor recovery equipment shall be maintained in proper working order at all times. All Stage I gasoline vapor recovery equipment shall be maintained in accordance with the CARB Executive Order(s) certifying the equipment or system. Whenever a Stage I gasoline vapor recovery system or component is determined to be defective or not operating properly, the owner or operator shall immediately take the system out of service until repairs are made. Systems shall not be returned to service until the defective system is operating properly.

(h) Any alteration of the equipment, parts, design, or operation of the Stage I gasoline vapor recovery system as certified by CARB is prohibited, and shall not be performed without submittal of a Notice of Construction application and prior approval from ((SWAPCA)) SWCAA.

(i) All new gasoline dispensing facilities shall have a tank tightness test performed at the time of installation to ensure proper connection and absence of leaks refer to WDOE publication 91-43 "Tank Owner/Operator's Guide to Tightness Testing". Results of the testing shall be submitted to ((SWAPCA)) SWCAA within 14 calendar days of testing.

(j) Pressure/vacuum valves shall be installed as required by the CARB Executive Order that certified the particular Stage I or Stage II vapor recovery system or equipment. Relief set points shall be as provided in the applicable CARB Executive Order and local fire ordinances.

(5) Gasoline dispensing facilities (Stage II).

(a) This section shall apply to the refueling of motor vehicles for the general public from stationary tanks at all gasoline-dispensing facilities as follows:

(1) For Clark County, all facilities dispensing 600,000 gallons in a calendar year or greater;

(2) For Cowlitz County, all facilities dispensing 1.2 million gallons in a calendar year or greater;

(3) For Lewis, Skamania and Wahkiakum Counties, Stage II vapor control equipment is not required unless the facility exceeds the throughput and distance requirements below:

Gallons Throughput (millions)	Distance to Property Line (meters)
1.5	20
2.0	25
2.5	28
3.0	32
3.5	35
4.0	38
5.0	43
6.0	49
8.0	58
10.0	66
12.0	75
16.0	90
20.0	103
25.0	118

(i) When the throughput is not shown in the chart, interpolate to get the distance for that throughput.

(ii) The allowable distance shall be measured from the centroid of the pumps to the nearest point on the property line of the nearest lot on which a permanent residence is located. However, if the permanent residence is located at least twice the allowable distance from the centroid of the pumps, the requirements of (3) of this subsection shall not apply.

(b) Stage II vapor control equipment may be removed from any gasoline dispensing facility located in Lewis, Wahkiakum or Skamania County as in (a) above, or from any facility in Cowlitz County dispensing less than 1.2 million gallons annually, by submittal of a complete Notice of Construction and receipt of an Order of Approval, provided that the requirements of subsection (a) above are met.

(c)(i) Beginning on July 1, 2001, and each year thereafter, the Department of Ecology will publish the canister capture rate for use with this rule.

(ii) When the canister capture rate reaches 15% and there are no major exceptions, waivers, or other adjustments to the EPA onboard canister regulations or program implementation, the Department of Ecology will revise the state rules and incorporate the effect of canisters.

(d) The owner or operator of a new or modified gasoline dispensing facility shall file a Notice of Construction as provided in ((SWAPCA)) SWCAA 400-110, and obtain an

PROPOSED

Order of Approval prior to commencing construction or modification.

(e) The owner or operator of any gasoline dispensing facility may elect to submit a site-specific analysis of the requirement for a Stage II vapor recovery system under (a) of this subsection and request the Department of Ecology to evaluate it subject to the fees described in (f) of this subsection. The Department of Ecology will review and evaluate a second tier analysis described under WAC 173-460-090 within 45 days of determining that the analysis submitted is complete and no additional information is needed. The requirements for gasoline vapor control shall be determined as a result of that process.

(f) The fee for new source review of a gasoline dispensing facility under this section shall be the same as the fee under ((SWAPCA)) SWCAA 400-110 except, if a site-specific review is elected under (e) of this subsection, the fee shall be as provided under WAC 173-400-116 (3)(c) for a tier two analysis.

(g) All gasoline dispensing facilities subject to this section shall be equipped with a CARB or ((SWAPCA)) SWCAA certified Stage II vapor recovery system.

(h) The owner or operator of a gasoline dispensing facility subject to this section shall not transfer or allow the transfer of gasoline from stationary tanks into motor vehicle fuel tanks unless a certified Stage II vapor recovery system is used.

(i) All Stage II vapor recovery equipment shall be installed in accordance with the system's certification requirements and shall be maintained to be leak free, vapor tight, and in good working order.

(j) Whenever a Stage II vapor recovery system component is determined to be defective, the owner or operator shall take the system out of service until it has been repaired, replaced, or adjusted, as necessary.

(k) The owner or operator of each gasoline dispensing facility utilizing a Stage II system shall conspicuously post operating instructions for the system in the gasoline dispensing area. The instructions shall clearly describe how to fuel vehicles correctly using the vapor recovery nozzles and include a warning against topping off. Additionally, the instructions shall include a prominent display of ((SWAPCA)) SWCAA's or Department of Ecology's toll free telephone number (800-633-0709 or 800-272-3780) for complaints regarding the operation and condition of the vapor recovery system.

(l) Every retailer and wholesale purchaser-consumer (gasoline dispensing facility) handling over 10,000 gallons per month shall equip each pump from which gasoline or methanol is introduced into motor vehicles with a nozzle that dispenses fuel at a flowrate not to exceed 10 gallons per minute as provided in 40 CFR 80.22 Subpart B.

(m) All new or upgraded facilities with Stage II gasoline vapor recovery controls shall conduct a performance test upon installation prior to placing in service. For balance type systems, the owner/operator shall conduct and pass a back pressure/blockage test. For vacuum assist systems, the owner/operator shall conduct and pass performance testing every 12 months. Results of all testing shall be submitted to

((SWAPCA)) SWCAA within 14 calendar days of test completion.

(n) Pressure/vacuum valves shall be installed as required by the CARB Executive Order that certified the particular Stage I or Stage II vapor recovery system or equipment. Relief set points shall be as provided in the applicable CARB Executive Order and local fire ordinances.

(6) Loading or Unloading Gasoline into Marine Tank Vessels

(a) Applicability. This rule applies to loading events at any location within the Vancouver ozone air quality maintenance area when gasoline is placed into a marine tank vessel cargo tank; or when any liquid is placed into a marine tank vessel cargo tank that had previously held gasoline. The owner or operator of each marine terminal and marine tank vessel is responsible for and must comply with this rule. All facilities shall be in compliance no later than June 1, 2001.

(b) Exemptions. The following activities are exempt from the marine vapor control emission limits of this rule:

(i) Marine vessel bunkering (refueling);

(ii) Lightering when neither vessel is berthed at a marine terminal dock,

(iii) Loading when both of the following conditions are met:

The vessel has been gas freed (regardless of the prior cargo), and

When loading any products other than gasoline.

(c) Vapor Collection System. The owner or operator of a marine terminal subject to this rule must equip each loading berth with a vapor collection system that is designed to collect all displaced VOC vapors during the loading of marine tank vessels. The owner or operator of a marine tank vessel subject to this rule must equip each marine tank vessel with a vapor collection system that is designed to collect all displaced VOC vapors during the loading of marine tank vessels. The collection system must be designed such that all displaced VOC vapors collected during any loading event are vented only to the control device.

(d) Marine Vapor Control Emission Limits. Vapors that are displaced and collected during marine tank vessel loading events must meet one of the following:

(i) Vapors must be reduced from the uncontrolled condition by at least 95 percent by weight, as determined by EPA Method 25 or other methods approved in writing by ((SWAPCA)) SWCAA, or

(ii) Vapor emissions shall not exceed 5.7 grams per cubic meter (2 pounds per 1000 barrels) of liquid loaded.

(e) Operating Practice and Maintenance.

(i) All hatches, pressure relief valves, connections, gauging ports and vents associated with the loading of fuel product into marine tank vessels must be maintained to be leak free and vapor tight.

(ii) The owner or operator of any marine tank vessel must certify to ((SWAPCA)) SWCAA that the vessel is leak free, vapor tight, and in good working order based on an annual inspection using EPA Method 21 or other methods approved in writing by ((SWAPCA)) SWCAA.

(iii) Gaseous leaks must be detected using EPA Method 21 or other methods approved in writing by ((SWAPCA)) SWCAA.

(iv) Loading must cease anytime gas or liquid leaks are detected. Loading may continue only after leaks are repaired or if documentation is provided to ((SWAPCA)) SWCAA that the repair of leaking components is technically infeasible without dry-docking the vessel or cannot otherwise be undertaken safely. Subsequent loading events involving the leaking components are prohibited until the leak is repaired. Any liquid or gaseous leak detected by ((SWAPCA)) SWCAA staff is a violation of this rule.

(f) Monitoring and Record-Keeping.

Marine terminal operators must maintain operating records for at least five years of each loading event at their terminal. Marine tank vessel owners and operators are responsible for maintaining operating records for at least five years for all loading events involving each of their vessels. Records must be made available to ((SWAPCA)) SWCAA upon request. These records must include but are not limited to:

- (i) The location of each loading event.
- (ii) The date of arrival and departure of the vessel.
- (iii) The name, registry and legal owner of each marine tank vessel participating in the loading event.
- (iv) The type and amount of fuel product loaded into the marine tank vessel.
- (v) The prior cargo carried by the marine tank vessel. If the marine tank vessel has been gas freed, then the prior cargo can be recorded as gas freed.
- (vi) The description of any gaseous or liquid leak, date and time of leak detection, leak repair action taken and screening level after completion of the leak repair.
- (g) Lightering exempted from controls by subsection 6 (b) of this rule must be curtailed from 2:00 AM until 2:00 PM when ((SWAPCA)) SWCAA declares a Clean Air Action (CAA) day. If ((SWAPCA)) SWCAA declares a second CAA day before 2:00 PM of the first curtailment period, then such uncontrolled lightering must be curtailed for an additional 24 hours until 2:00 PM on the second day. If a third CAA day in a row is declared, then uncontrolled lightering is permissible for a 12 hour period starting at 2 PM on the second CAA day and ending at 2 AM on the third CAA day. Uncontrolled lightering must be curtailed from 2 AM until 2 PM on the third CAA day. If ((SWAPCA)) SWCAA continues to declare CAA days consecutively after the third day, the curtailment and loading pattern used for the third CAA day will apply.
- (h) Safety/Emergency Operations. Nothing in this rule is intended to:
 - (i) Require any act or omission that would be in violation of any regulation or other requirement of the United States Coast Guard; or
 - (ii) Prevent any act that is necessary to secure the safety of a vessel or the safety of passengers or crew.

Reviser's note: The typographical error in the above material occurred in the copy filed by the Southwest Clean Air Agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 00-11-149, filed 5/24/2000, effective 6/24/2000)

((SWAPCA)) SWCAA 491-050 Failures, Certification, Testing and Recordkeeping

[Statutory Authority: Chapter 70.94.141 RCW and 70.94.165 RCW. Original adoption WSR 93-16-011 filed 7/22/93, effective 8/22/93; WSR 96-21-102 filed 10/21/96, effective 11/21/96, WSR 00-11-149 filed 5/24/2000, effective 6/24/2000]

This section shall apply to all gasoline transport tanks equipped for gasoline vapor collection and all vapor collection systems at gasoline loading terminals, and bulk gasoline plants as described in subsections (2) and (3) of ((SWAPCA)) SWCAA 491-040.

(1) Failures.

During the months of May, June, July, August, and September any failure of a vapor collection system at a bulk gasoline plant or gasoline loading terminal to comply with this section requires the immediate discontinuation of gasoline transfer operations for the failed part of the system. Other transfer points that can continue to operate in compliance may be used. The loading or unloading of the transport tank connected to the failed part of the vapor collection system may be completed during the other months of the year. Upon completion of loading or unloading of a transport tank connected at the time of the failure, gasoline transfer operations shall be discontinued for the failed part of the system.

(2) Certification.

(a) The owner or operator of a gasoline loading terminal or bulk gasoline plant shall only allow the transfer of gasoline between the facility and a transport tank or a marine vessel if a current leak test certification for the transport tank is on file with the facility or a valid inspection sticker is displayed on the vehicle or marine vessel. Certification is required annually as provided in ((SWAPCA)) SWCAA 490-202 and ((SWAPCA)) SWCAA 491-040 (6)(e).

(b) The owner or operator of a transport tank shall not make any connection to the tank or marine vessel for the purpose of loading or unloading gasoline, except in the case of an emergency, unless the gasoline transport tank or marine vessel has successfully completed the annual certification testing requirements in (3) of this subsection, and such certification is confirmed either by:

- (i) Having on file with each gasoline loading or unloading facility at which gasoline is transferred a current leak test certification for the transport tank; or
- (ii) For transport tanks (tanker trucks), displaying a sticker near the Department of Transportation certification plate required by 49 CFR 178.340-10b which:
 - (A) Shows the date that the gasoline tank truck last passed the test required in (3) of this subsection;
 - (B) Shows the identification number of the gasoline tank truck; and
 - (C) Expires not more than one year from the date of the leak tight test.
- (iii) For marine vessels, displaying a sticker/certification with the other Coast Guard required certifications (e.g. in the

PROPOSED

vessel ecology box, ship's bridge or tankerman's shack) which:

(A) Shows the date that the marine vessel last passed the test required in (3) of this subsection;

(B) Shows the identification number of the marine vessel; and

(C) Expires not more than one year from the date of the leak tight test.

(c) The owner or operator of a vapor collection system shall:

(i) Operate the vapor collection system and the gasoline loading equipment during all loadings and unloadings of transport tanks and marine vessels equipped for emission control such that:

(A) The tank pressure will not exceed a pressure of eighteen inches of water or a vacuum of six inches of water;

(B) The concentration of gasoline vapors is below the lower explosive limit (LEL, measured as propane) at all points a distance of one inch from potential leak sources; and

(C) There are no visible liquid leaks except for a liquid leak of less than four drops per minute at the product loading connection during delivery.

(D) Upon disconnecting transfer fittings, liquid leaks do not exceed ten milliliters (0.34 fluid ounces) per disconnect averaged over three disconnects.

(ii) Repair and retest a vapor collection system that exceeds the limits of (2)(c)(i) of this subsection within fifteen days.

(d) ((SWAPCA)) SWCAA may, at any time, monitor a gasoline transport tank, marine vessel and vapor collection system during loading or unloading operations by the procedure in (3) of this subsection to confirm continuing compliance with this section.

(3) Testing and monitoring.

(a) The owner or operator of a gasoline transport tank, marine vessel or vapor collection system shall, at his own expense, demonstrate compliance with (1) and (2) of this subsection, respectively. All tests shall be made by, or under the direction of, a person qualified to perform the tests and approved by WDOE or ((SWAPCA)) SWCAA.

(b) Testing to determine compliance with this section shall use procedures approved by ((SWAPCA)) SWCAA. See testing requirements in ((SWAPCA)) SWCAA 490 for transport tanks and section 491-040 (6)(e) for marine vessels.

(c) Monitoring to confirm continuing leak tight conditions shall use procedures approved by ((SWAPCA)) SWCAA.

(4) Recordkeeping.

(a) The owner or operator of a gasoline transport tank, marine vessel or vapor collection system shall maintain records of all certification tests and repairs for at least two years after the test or repair is completed.

(b) The records of certification tests required by this section shall, as a minimum, contain:

(i) The transport tank or marine vessel identification number;

(ii) The transport tank or marine vessel capacity;

(iii) The transport tank initial test pressure and the time of the reading;

(iv) The transport tank final test pressure and the time of the reading;

(v) The transport tank initial test vacuum and the time of the reading;

(vi) The transport tank final test vacuum and the time of the reading;

(vii) At the top of each report page the company name, date, and location of the tests on that page; and

(viii) Name and title of the person conducting the test.

(c) The owner or operator of a gasoline transport tank shall annually certify that the transport tank or marine vessel passed the required tests.

(d) Copies of all records required under this section shall immediately be made available to ((SWAPCA)) SWCAA, upon written request, at any reasonable time.

(5) Preventing evaporation. All persons shall take reasonable measures to prevent the spilling, discarding in sewers, storing in open containers, or handling of gasoline in a manner that will result in evaporation to the ambient air.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending WSR 96-21-102, filed 10/21/96, effective 11/21/96)

((SWAPCA)) SWCAA 491-060 Severability

[Statutory Authority: Chapter 70.94.141 RCW. Original adoption WSR 96-21-102 filed 10/21/96, effective 11/21/96]

The provisions of this regulation are severable and if any provision is held invalid, the application of such provision to the other circumstances and the remainder of this regulation shall not be affected.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

WSR 01-01-023

WITHDRAWAL OF PROPOSED RULES

COUNTY ROAD

ADMINISTRATION BOARD

[Filed December 7, 2000, 12:37 p.m.]

Please withdraw WAC 136-161-020 and 136-161-070, WSR 00-22-097 filed on November 1, 2000. We have refiled these sections with additional changes on December 5, 2000, as WSR 00-24-096.

Please contact Karen Pendleton at (360) 753-5989 if you have questions.

Jay Weber
Executive Director

PROPOSED

WSR 01-01-024
PROPOSED RULES
SUPERINTENDENT OF
PUBLIC INSTRUCTION
 [Filed December 7, 2000, 2:28 p.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 00-18-039.

Title of Rule: Elimination of Program 94 - Instructional support

Purpose: To remove references to Program 94 from three sections of the Office of the Superintendent of Public Instruction's (OSPI) existing rules.

Other Identifying Information: Three WAC sections to be revised are WAC 392-121-210, 392-140-903, and 392-140-956.

Statutory Authority for Adoption: RCW 28A.150.290, 28A.505.140.

Summary: Program 94 has been eliminated from the school district account code structure effective 2000-01. Rule amendments are required to remove references to program 94 from OSPI's existing rules.

Name of Agency Personnel Responsible for Drafting: Linda Harrison, Office of Superintendent of Public Instruction, (360) 753-2289; Implementation: Allen H. Jones, Office of Superintendent of Public Instruction, (360) 753-6708; and Enforcement: Michael L. Bigelow, Office of Superintendent of Public Instruction, (360) 753-1718.

Name of Proponent: Office of Superintendent of Public Instruction, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: Before the 2000-01 school year, most instruction expenditures (principal's office, guidance and counseling, learning resources, etc.) were recorded in Program 94 Instruction Support. OSPI, in conjunction with the State Auditor's Office (SAO), eliminated Program 94 from the school district account code structure beginning with the 2000-01 school year. Instructional support costs formerly charged to Program 94 will now be charged in other instructional programs, primarily Program 01, Basic Education. Expenditures for instruction support activities will continue to be identifiable using the activity account code structure used by school districts.

Rule amendments proposed are needed to remove references to Program 94 from three sections of OSPI's rules. The three rule sections affected are WAC 392-121-210 Definition—Basic education certificated instructional employee, 392-140-903 K-4 Staff enhancement—Definitions, and 392-140-956 Learning improvement days—Other definitions.

These changes have no state or local fiscal impact if all Program 94 staff are coded to basic education programs (01, 31, 45, and 97). Coding Program 94 to other instructional programs may have minor fiscal impacts on a school district's state-funded basic education K-4 ratio, average funded mix factor or learning improvement days.

Proposal Changes the Following Existing Rules: Eliminates references to Program 94 - Instruction Support.

No small business economic impact statement has been prepared under chapter 19.85 RCW. No impact.

RCW 34.05.328 does not apply to this rule adoption. This rule only applies to governmental entities and is excepted under RCW 34.05.328 (5)(b)(ii).

Hearing Location: Old Capitol Building, P.O. Box 47200, Olympia, WA 98504-7200, on January 23, 2001, at 9 a.m.

Assistance for Persons with Disabilities: Contact Sheila Emery by January 9, 2001, TDD (360) 664-3631.

Submit Written Comments to: Legal Services, OSPI, P.O. Box 47200, 600 South Washington Street, Olympia, WA 98504-7200, fax (360) 753-4201, by January 22, 2001.

Date of Intended Adoption: January 24, 2001.

December 7, 2000
 Dr. Terry Bergeson
 Superintendent of
 Public Instruction

AMENDATORY SECTION (Amending Order 99-01, filed 3/25/99, effective 4/25/99)

WAC 392-121-210 Definition—Basic education certificated instructional employee. As used in this chapter, "basic education certificated instructional employee" means a district certificated instructional employee or a contractor certificated instructional employee assigned in whole or in part to the following programs as defined in the accounting manual for public school districts in the state of Washington:

- (1) Basic education, program 01;
- (2) Vocational, basic, state, program 31;
- (3) Skills center, basic, state, program 45; and
- (4) (~~Instruction support, program 94; and~~
- (5)) District-wide support, program 97.

AMENDATORY SECTION (Amending WSR 00-02-063, filed 1/3/00, effective 2/3/00)

WAC 392-140-903 K-4 Staff enhancement—Definitions. As used in WAC 392-140-900 through 392-140-913:

(1) "Report S-275" means the school district personnel report as defined in WAC 392-121-225.

(2) "Form SPI 1158" means the form provided by the superintendent of public instruction on which school districts report supplemental K-12 full-time equivalent (FTE) staff and/or supplemental K-4 FTE staff for the school year.

(3) "Report 1159" means the report produced by the superintendent of public instruction displaying the calculations of K-4 certificated instructional staffing and K-4 apportionment ratios and other information as necessary.

(4) "Form SPI 1160" means the form provided by the superintendent of public instruction on which school districts may select the period of enrollment the superintendent of public instruction shall use to calculate staffing ratios.

(5) "Form SPI 1230" means the form provided by the superintendent of public instruction on which school districts have the option of reporting 1989-90 FTE K-3 basic education classified instructional assistants pursuant to WAC 392-140-716 and 392-140-745.

(6) "Form SPI 1230K-4" means the form provided by the superintendent of public instruction on which school districts have the option of reporting 1989-90 FTE K-4 basic education classified instructional assistants after September 1, 1999.

(7) "FTE K-4 basic education enrollment" means the school district's K-4 full-time equivalent enrollment reported for basic education funding pursuant to WAC 392-121-122 for the month of October or such other period selected by the district on optional Form SPI 1160.

(8) "FTE basic education certificated instructional employee" means the FTE calculated pursuant to WAC 392-121-215 for a basic education certificated instructional employee assigned in whole or in part to the following programs as defined in the *Accounting Manual for Public School Districts in the State of Washington*:

- (a) Basic education, program 01;
- (b) Vocational, basic, state, program 31;
- (c) Skills center, basic, state, program 45; and
- (d) ~~((Instruction support, program 94; and~~
- ~~(e))~~ District-wide support, program 97.

(9) "FTE K-4 basic education certificated instructional employee" means for a FTE basic education certificated instructional employee the following:

(a) If the basic education certificated instructional employee serves only K-4 students, one hundred percent of the FTE assigned to basic education; or

(b) If the basic education certificated instructional employee serves K-4 students and students of one or more other grades, multiply the FTE assigned to basic education by:

- (i) The proportion of time spent serving K-4 students to all time serving students;
- (ii) The proportion of K-4 students served to all students served; or
- (iii) Any combination of (i) or (ii) of this subsection as appropriate.

(10) "FTE K-4 basic education certificated instructional staff" means the sum of FTE K-4 basic education certificated instructional employees for a school district.

(11) "Basic education classified instructional assistant" means a person who is assigned in whole or in part to:

- (a) Program 01 - basic education; 31 - vocational, basic, state; or 45 - skills center, basic, state; and
- (b) Activity 27 - teaching; and
- (c) Duty 910 - aide.

(12) "Basic education classified instructional assistant FTE" means the number determined for a basic education classified instructional assistant as follows:

(a) Determine the hours per year that the employee is assigned as a basic education classified instructional assistant; and

(b) Divide by 2080.

(13) "District FTE K-4 basic education classified instructional assistants" means the sum of a school district's FTE K-4 basic education classified instructional assistants.

(a) If the basic education classified instructional assistant serves only K-4 students, one hundred percent of the FTE determined pursuant to WAC 392-140-903(12).

(b) If the basic education classified instructional assistant serves K-4 students and students of one or more other grades, multiply the FTE determined pursuant to WAC 392-140-903(12) by:

(i) The proportion of time spent serving K-4 students to all time serving students;

(ii) The proportion of K-4 students served to all students served; or

(iii) Any combination of (b)(i) or (ii) of this subsection as appropriate.

(14) "Actual average salary for basic education classified instructional assistants" means the dollar amount determined for a school district for a school year as follows:

(a) For each basic education certificated instructional assistant reported on Report S-275 determine the assignment salary reported;

(b) Sum the dollar amounts determined pursuant to (a) of this subsection; and

(c) Divide the result of (b) of this subsection by the sum of the school district's FTE basic education classified instructional assistants as reported on Report S-275.

AMENDATORY SECTION (Amending Order 98-07, filed 9/28/99, effective 9/29/99)

WAC 392-140-956 Learning improvement days— Other definitions. As used in WAC 392-140-950 through 392-140-967:

(1) "Certificated instructional staff" means district certificated instructional employees and contractor certificated instructional employees as defined in WAC 392-121-205 and 392-121-206.

(2) "Base contract" means a contract protected by the continuing contract law, RCW 28A.405.300. The base contract does not include hours or compensation provided under a supplemental contract as defined in RCW 28A.400.200.

(3) "Number of days in the base contract" means the number of full work days in the school year for a full-time certificated instructional employee holding the position for the full school year. Days include paid leave. The number of hours in a full work day is determined by each school district. Days scheduled before September 1 can be counted in the school year if included and compensated in the base contract for the school year beginning September 1.

(4) "Selected state-funded programs" means the following programs as defined in the *Accounting Manual for Public School Districts in the State of Washington*:

- 01 Basic Education
- 21 Special Education-Supplemental-State
- 31 Vocational-Basic-State
- 45 Skills Center-Basic-State
- 55 Learning Assistance Program-State
- 65 Transitional Bilingual-State
- 74 Highly Capable
- ~~((94 Instruction Support))~~
- 97 District-wide Support

(5) "State institutional education programs" means the following programs:

- 26 Special Education-Institutions-State

56 State Institutions, Centers, and Homes-Delinquent

Date of Intended Adoption: February 9, 2001.

December 7, 2000

Evan Jacoby

Rules Coordinator

WSR 01-01-025
PROPOSED RULES
DEPARTMENT OF
FISH AND WILDLIFE

[Filed December 7, 2000, 4:17 p.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 00-17-116.

Title of Rule: Personal use rules.

Purpose: Amend shellfish gear rules.

Statutory Authority for Adoption: RCW 77.12.047.

Statute Being Implemented: RCW 77.12.047.

Summary: Allows use of three units of crab gear.

Reasons Supporting Proposal: The department is considering complete gear closures during crab molting periods. Additional gear during open periods may offset loss of fishing opportunity during closures.

Name of Agency Personnel Responsible for Drafting: Evan Jacoby, 1111 Washington Street, Olympia, 902-2930; Implementation: Lew Atkins, 1111 Washington Street, Olympia, 902-2651; and Enforcement: Bruce Bjork, 1111 Washington Street, Olympia, 902-2927.

Name of Proponent: Washington State Department of Fish and Wildlife, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: Current rules allow two units of crab gear and two units of shrimp gear. This will increase the crab gear allowance to three units of gear, which may allow a greater number of crab to be harvested by recreational crabbers. This would reestablish the proportionate allocation that will be lost if the department institutes complete closures to all harvest during molting periods. Additional housekeeping change to correct name of Hood Canal shrimp district.

Proposal Changes the Following Existing Rules: Changes number of units of crab gear allowed per recreational fisher.

No small business economic impact statement has been prepared under chapter 19.85 RCW. This rule does not involve small businesses, it involves recreational crab fishing.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. Not hydraulics rules.

Hearing Location: Best Western Southcenter, 15901 West Valley Road, Tukwila, WA, on February 9-10, 2001, at 8:00 a.m.

Assistance for Persons with Disabilities: Contact Debbie Nelson by February 2, 2001, TDD (360) 902-2207, or (360) 902-2226.

Submit Written Comments to: Evan Jacoby, 600 Capitol Way North, Olympia, WA 98501, fax (360) 902-2944, by February 8, 2001.

AMENDATORY SECTION (Amending Order 00-29, filed 3/29/00, effective 5/1/00)

WAC 220-56-315 Crabs, shrimp, crawfish—Unlawful acts. (1) It is unlawful to take and possess crabs, shrimp, and crawfish taken for personal use except by hand or with hand dip nets, ring nets, shellfish pots, and any hand-operated instrument that will not penetrate the shell.

(2) It is unlawful to use more than two units of gear at any one time except:

(a) In Puget Sound waters other than Hood Canal Shrimp District ((5)) it is unlawful to use at any one time more than ((two)) three units of gear for the purpose of taking crabs and two additional units of gear for the purpose of taking shrimp.

(b) In Hood Canal Shrimp District ((5-(Hood Canal))) it is unlawful to use more than one shrimp pot and a total of two star traps or ring nets during the Hood Canal shrimp season. It is unlawful for the operator of any boat from which shrimp pots are set or pulled to have on board or to fish more than four shrimp pots.

(3) It is unlawful for any person to operate a shellfish pot not attached to a buoy bearing that person's name, except that a second person may assist the pot owner in operation of the gear.

(4) It is unlawful to salvage or attempt to salvage shellfish pot gear from Hood Canal that has been lost without first obtaining a permit authorizing such activity issued by the director, and it is unlawful to fail to comply with all provisions of such permit.

(5) It is unlawful to fish for or possess crab taken for personal use from the waters of Fidalgo Bay within 25 yards of the Burlington Northern Railroad trestle connecting March Point and Anacortes.

(6) It is unlawful to fish for or possess crab taken for personal use with shellfish pot or ring net gear from the waters of Padilla Bay or Swinomish Slough within 25 yards of the Burlington Northern Railroad crossing the northern end of Swinomish Slough except from one hour before official sunrise to one hour after official sunset.

(7) It is unlawful to dig for or possess ghost or mud shrimp taken for personal use by any method except hand operated suction devices or dug by hand.

(8) One unit of gear is equivalent to one ring net or one shellfish pot.

(9) Each unit of gear must be attached to its own buoy line and have a separate buoy for each unit of gear.

(10) No fisher may set or pull shellfish pots, ring nets or star traps from a vessel in all state waters from one hour after official sunset to one hour before official sunrise.

WSR 01-01-077
PROPOSED RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES
 (Medical Assistance Administration)

[Filed December 13, 2000, 4:08 p.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 00-14-043.

Title of Rule: WAC 388-438-0110 Alien emergency medical (AEM) program.

Purpose: The proposed amendment is necessary to include the client population eligible for nursing facility or COPEs services.

Statutory Authority for Adoption: RCW 74.08.090 and C.F.R. 436.128, 436.406(c) and 440.255.

Statute Being Implemented: RCW 74.08.090 and C.F.R. 436.128, 436.406(c) and 440.255.

Summary: A person determined by the department to require nursing facility or COPEs level of care meets the emergency medical condition criteria of the alien emergency medical program.

Name of Agency Personnel Responsible for Drafting, Implementation and Enforcement: Joanie Scotson, Medical Assistance Administration, Mailstop 45534, Olympia, Washington 98504-5534, (360) 725-1330.

Name of Proponent: Department of Social and Health Services, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: See Purpose above.

Proposal Changes the Following Existing Rules: See Purpose above.

No small business economic impact statement has been prepared under chapter 19.85 RCW. This proposed rule has no impact on small businesses. It affects eligibility for medical assistance programs.

RCW 34.05.328 does not apply to this rule adoption. RCW 34.05.328 (5)(b)(vii) exempts DSHS rules that apply to eligibility.

Hearing Location: Blake Office Building East, 4500 10th Avenue S.E., Rose Room, Lacey, WA 98503, on January 23, 2001, at 10:00 a.m.

Assistance for Persons with Disabilities: Contact Kelly Cooper by January 16, 2001, phone (360) 664-6094, TTY (360) 664-6178, e-mail coopekd@dshs.wa.gov.

Submit Written Comments to: Identify WAC Numbers, Kelly Cooper, Rules Coordinator, P.O. Box 45850, Olympia, WA 98504-5850, fax (360) 902-8292, by January 23, 2001.

Date of Intended Adoption: No sooner than January 24, 2001.

December 11, 2000

Marie Myerchin-Redifer, Manager
 Rules and Policies Assistance Unit

AMENDATORY SECTION (Amending WSR 99-23-082, filed 11/16/99, effective 12/17/99)

WAC 388-438-0110 The alien emergency medical (AEM) program. (1) The alien emergency medical (AEM) program is a federally-funded program. It is for aliens who are ineligible for other Medicaid programs, due to citizenship or alien status requirements described in WAC 388-424-0005 and 388-424-0010.

(2) Except for the Social Security Number, citizenship, or alien status requirements, ~~((the))~~ an alien must meet categorical Medicaid eligibility requirements as described in:

- (a) WAC 388-505-0110, for an SSI-related person;
- (b) WAC 388-505-0220, for family medical programs;
- (c) WAC 388-505-0210, for a child under the age of nineteen; or
- (d) WAC 388-523-0100, for medical extensions.

(3) When an alien has monthly income which exceeds the CN medical standards, the department will consider AEM medically needy coverage for children or for adults who are age sixty-five or over or who meet SSI disability criteria. See WAC 388-519-0100.

(4) To qualify for the AEM program, the alien must have:

(a) An emergency medical condition as described in WAC 388-500-0005, or

(b) Been approved by the department as requiring nursing facility or COPEs level of care.

(5) The alien's date of arrival in the United States is not used when determining eligibility for the AEM program.

WSR 01-01-092

PROPOSED RULES

SPOKANE COUNTY AIR

POLLUTION CONTROL AUTHORITY

[Filed December 15, 2000, 11:24 p.m.]

Original Notice.

Exempt from preproposal statement of inquiry under RCW 70.94.141(1).

Title of Rule: SCAPCA Regulation I, Article VI, Section 6.01.D.5.

Purpose: To postpone the expiration of the open burning program for certain areas in Spokane County beyond the current deadline of December 31, 2000.

Statutory Authority for Adoption: RCW 70.94.141, 70.94.380(2), chapter 173-425 WAC.

Statute Being Implemented: RCW 70.94.755, 70.94.775 - 70.94.780, chapter 173-425 WAC.

Summary: The regulation amendment postpones the burn ban from December 31, 2000, to April 30, 2001.

Reasons Supporting Proposal: A postponement of the burn ban allows SCAPCA additional time to consider more comprehensive amendments to its outdoor burning regulation and then to inform the public about the amendments.

Name of Agency Personnel Responsible for Drafting, Implementation and Enforcement: Matt Holmquist, 1101 West College, #403, Spokane, WA 99201, (509) 477-4727.

PROPOSED

Name of Proponent: Spokane County Air Pollution Control Authority, governmental.

Agency Comments or Recommendations, if any, as to Statutory Language, Implementation, Enforcement, and Fiscal Matters: Spokane County Air Pollution Control Authority (SCAPCA) is in the process of amending Article VI, Section 6.01 in response to the amendments made to chapter 173-425 WAC. On November 2, 2000, SCAPCA's board of directors instructed staff to draft a regulation, that among other things, allows for one more seven day spring yard and garden debris burn season in 2001. In the interest of having a rule adopted that postpones the ban on outdoor burning from December 31, 2000, to April 30, 2001, SCAPCA Regulation I, Article VI, Section 6.01.D.5 is being amended and filed in an expeditious manner. More comprehensive revisions to Article VI, Section 6.01, will occur in the future.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: The regulation postpones the ban on outdoor or open burning from December 31, 2000, to April 30, 2001, for certain urban growth areas in Spokane County. The regulation provides SCAPCA an opportunity to conduct a seven day spring yard and garden debris burn season in 2001 within urban growth areas for incorporated cities having a population of less than five thousand people that are neither within nor contiguous with any nonattainment area and/or former nonattainment area.

Proposal Changes the Following Existing Rules: Under current rules, open burning is banned in all urban growth areas of Spokane County as of December 31, 2000. The regulation postpones the ban on outdoor burning from December 31, 2000, to April 30, 2001.

No small business economic impact statement has been prepared under chapter 19.85 RCW. SCAPCA is not required under chapter 19.85 RCW to file small business economic impact statements.

RCW 34.05.328 does not apply to this rule adoption. This is a local agency rule and RCW 34.05.328 has not been made voluntarily applicable to this rule.

Hearing Location: Spokane County Public Works Building, 1206 West Broadway, Hearing Room Lower Level, Spokane, WA 99201, on February 1, 2001, at 9:00 a.m.

Submit Written Comments to: Matt Holmquist, Spokane County Air Pollution Control Authority, 1101 West College, Suite #403, Spokane, WA 99201, fax (509) 477-6828, by January 23, 2001.

Date of Intended Adoption: February 1, 2001.

December 11, 2000

Matt Holmquist

Compliance Administrator

ARTICLE VI EMISSIONS PROHIBITED

AMENDATORY SECTION

SECTION 6.01 OPEN BURNING

D. Prohibitions. Except as provided in Section 6.01.E., no person shall practice or permit the practice of open burning in any of the following circumstances and locations:

1. Within the No-Burn Area, as defined by resolution of the Board of Directors of the Authority.

2. Within any part of a nonattainment area that is not within an open burning phase-out area.

3. After November 1, 1994, in any area where no permit program is being administered by a permitting authority.

4. Within any open burning phase-out area after the final phase-out date as approved by the Department of Ecology.

5. After December 31, 2000, within any urban growth area having a population of 5,000 or more people, or within any incorporated city or town (with) having a population of 10,000 or more people, or within any urban growth area contiguous with a nonattainment area. After April 30, 2001, within any urban growth area.

6. Outside the period designated by the Authority or permitting authority for burning yard and garden debris.

7. When the materials to be burned include any prohibited materials.

8. During an episode or impaired air quality as declared by the Department of Ecology or the Authority for a defined geographical area.

9. When the fire is larger than a small fire, unless a valid written permit has been issued by a permitting authority.

10. In or within 500 feet of forest slash, unless a written permit has been issued by the permitting authority.

11. When burning is for commercial purposes, other than silvicultural burning, agricultural burning, or burning of land clearing debris.

12. Where the Authority, Department of Ecology, or permitting authority has determined that reasonable alternatives are available.

13. When burning causes a nuisance, or the Authority or permitting authority determines that the creation of a nuisance is the likely result of burning.

WSR 01-01-093

PROPOSED RULES

SPOKANE COUNTY AIR POLLUTION CONTROL AUTHORITY

[Filed December 15, 2000, 11:26 a.m.]

Original Notice.

Exempt from preproposal statement of inquiry under RCW 70.94.141(1).

Title of Rule: Regulation I, Article VI; Section 6.10 - Grass Field Burning; Section 6.11 - Agricultural Burning.

Purpose: To define the circumstances under which agricultural burning may or may not occur. To define responsi-

PROPOSED

bilities of farmers, relative to agricultural burning. To define responsibilities of permitting authorities.

Statutory Authority for Adoption: RCW 70.94.141(1).

Statute Being Implemented: Chapter 70.94 RCW.

Summary: Section 6.10 is proposed to be deleted in its entirety, because there is no longer a need for a separate grass field burning regulation. Section 6.11 applies to all agricultural burning in Spokane County. It defines various terms, it stipulates when agricultural burning is prohibited, it outlines procedural requirements for obtaining agricultural burning permits, it outlines the responsibilities of farmers who seek approval to burn, and it outlines the responsibilities of permitting authorities who administer burn permit programs.

Reasons Supporting Proposal: State laws and regulations, governing agricultural burning, have changed since 1994, when SCAPCA's agricultural burning regulations were last amended. The proposal is necessary in order to reflect the changes made in the state laws and regulations.

Name of Agency Personnel Responsible for Drafting: Eric Skelton, 1101 West College, #403, Spokane, WA 99201, (509) 477-4727; Implementation and Enforcement: Matt Holmquist, 1101 West College, #403, Spokane, WA 99201, (509) 477-4727.

Name of Proponent: Spokane County Air Pollution Control Authority, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: The rule addresses requirements for agricultural burning in Spokane County. The purpose of the rule is to define circumstances under which agricultural burning may or may not occur in Spokane County. The rule also defines responsibilities of farmers, relative to agricultural burning and responsibilities of permitting authorities. The rule also defines impaired air quality conditions, under which agricultural burning is not allowed. Impaired air quality conditions may be in effect if ambient air quality levels for carbon monoxide, coarse particles (PM10), or fine particles (PM2.5) exceed specified levels.

For the most part, the effect of the proposed amendments to the rule is to make it more consistent with state laws and regulations, which have been amended several times since the last amendments to SCAPCA's agricultural burning rules. State laws and regulations do not currently contain a definition for impaired air quality, due to fine particle pollution. Therefore, SCAPCA's agricultural burning rule, if adopted, may be more restrictive than state laws and regulations, regarding when burning may not occur, under impaired air quality conditions.

Proposal Changes the Following Existing Rules: The proposal repeals SCAPCA's Grass Field Burning rule (Section 6.10) and addresses all agricultural burning under Section 6.11, grass field burning included. Section 6.11 is amended, primarily to make it more consistent with state laws and regulations. A new, more restrictive definition of impaired air quality is also added, as described above.

No small business economic impact statement has been prepared under chapter 19.85 RCW. This is a local agency rule and RCW 34.05.328 has not been made voluntarily applicable to this rule.

RCW 34.05.328 does not apply to this rule adoption. Pursuant to RCW 70.94.141(1), RCW 34.05.328 does not apply to this rule adoption.

Hearing Location: Spokane County Public Works Building, 1026 West Broadway, Hearing Room Lower Level, Spokane, WA 99201, on February 1, 2001, at 8:30 a.m.

Assistance for Persons with Disabilities: Contact Barbara Nelson by January 29, 2001, (509) 477-4727.

Submit Written Comments to: Spokane County Air Pollution Control Authority, 1101 West College, Suite #403, Spokane, WA 99201, fax (509) 477-6828, by January 26, 2001.

Date of Intended Adoption: February 1, 2001.

December 12, 2000

Eric P. Skelton

Director

CR-102 VERSION, 5/22/00

SPOKANE COUNTY AIR POLLUTION CONTROL AUTHORITY, REGULATION I

REPEALER (Repealing SCAPCA Res. 90-05, 5/3/90, and Order 93-11-036, filed 5/11/93)

SECTION 6.10 GRASS FIELD BURNING

AMENDATORY SECTION (Amending Order 94-23-036, filed 11/9/94)

SECTION 6.11 AGRICULTURAL BURNING

A. Purpose. (~~This Section establishes fees and controls for agricultural burning in Spokane County, consistent with best management practices.~~) The primary purpose of this Section is to establish specific requirements for agricultural burning in Spokane County, consistent with Chapter 173-430 WAC.

B. Applicability. This Section applies to agricultural burning in all areas of Spokane County unless specifically exempted. This Section does not apply to Silvicultural Burning (see Chapter 332-24 WAC) or to Outdoor Burning (see Chapter 173-425 WAC).

NEW SECTION

SECTION 6.11 AGRICULTURAL BURNING

C. Statement of Authority. The Spokane County Air Pollution Control Authority is empowered, pursuant to Chapter 70.94 RCW, to administer the agricultural burning program in Spokane County. Included is the authority to:

1. Issue and deny burning permits;
2. Establish conditions on burning permits to insure that the public interest in air, water, and land pollution, and safety to life and property is fully considered;
3. Determine if a request to burn is consistent with best management practices, pursuant to WAC 173-430-050; or qualifies for a waiver, pursuant to WAC 173-430-045;
4. Delegate local administration of permit and enforcement programs to certain political subdivisions;

5. Declare burn days and no-burn days, based on meteorological, geographical, population, air quality, and other pertinent criteria; and

6. Restrict the hours of burning, as necessary to protect air quality.

Reviser's note: The unnecessary underscoring in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending Order 94-23-036, filed 11/9/94)

SECTION 6.11 AGRICULTURAL BURNING

D((€)). Definitions. Unless a different meaning is clearly required by context, words and phrases used in this Section shall have the following meaning:

1. Agricultural Burning means burning of vegetative debris from an agricultural operation necessary for disease or pest control, necessary for crop propagation and/or crop rotation, necessary to destroy weeds or crop residue along farm fence rows, irrigation ditches, or farm drainage ditches, or where identified as a best management practice by the agricultural burning practices and research task force, established in RCW 70.94.650, or other authoritative source on agricultural practices.

2. Authority means the Spokane County Air Pollution Control Authority.

3. Episode means a period when a forecast, alert, warning, or emergency air pollution stage is declared, as ~~((stated))~~ provided in Chapter 173-435 WAC.

4. Extreme Conditions means conditions, usually associated with a natural disaster, that prevent the delivery and placement of mechanical residue management equipment on the field, and applies only to the growing of field and turf grasses for seed, for which a waiver is requested.

5((4)). Impaired Air Quality, for purposes of agricultural burning, means a condition declared by the Authority when meteorological conditions are conducive to an accumulation of air contaminants, concurrent with at least one of the following criteria:

a. Particulates ~~((which))~~ that are ten microns or smaller in diameter (PM10) are measured at any location inside Spokane County at or above an ambient level of ~~((seventy-five))~~ sixty micrograms per cubic meter of air, measured on a 24-hour average, by a method which has been determined, by Ecology or the Authority, to have a reliable correlation to the federal reference method, CFR Title 40 Part 50 Appendix J, or equivalent:

b. Carbon monoxide is measured at any location inside Spokane County at or above an ambient level of eight parts of contaminant per million parts of air by volume (ppm), measured on an eight-hour average by a method which has been determined, by Ecology or the Authority, to have a reliable correlation to the federal reference method, CFR Title 40 Part 50 Appendix C, or equivalent.

c. Particulates that are two and one-half microns or smaller in diameter (PM2.5) are measured at any location inside Spokane County at or above an ambient level of 15 micrograms per cubic meter of air, measured on a 24-hour average, by a method which has been determined, by Ecology or the Authority, to have a reliable correlation to the federal reference method, CFR Title 40 Part 50 Appendix L, or equivalent.

ogy or the Authority, to have a reliable correlation to the federal reference method, CFR Title 40 Part 50 Appendix L, or equivalent.

d((e)). Air contaminant levels reach or exceed other limits, established by Ecology pursuant to RCW 70.94.331 ((Chapter 173-425-030(5)(b) WAC, by resolution of the Board of Directors of the Authority)).

6((5)). Nuisance means an emission of smoke or other emissions from agricultural burning that unreasonably interferes with the use and enjoyment of property or public areas.

7((6)). Permitting Authority means the Spokane County Air Pollution Control Authority (Authority), or one or more of the following entities, whenever the Authority has delegated administration of the permitting program, pursuant to RCW 70.94.654, to one or more of the referenced entities, provided such delegation of authority has not been withdrawn: Spokane County, the Spokane County Conservation District, or any fire protection agency within Spokane County ((, whenever the referenced agency is delegated the authority, pursuant to RCW 70.94.654, to issue permits)).

8. Pest means weeds, disease, or insects, infesting agricultural lands, crops, or residue.

9((7)). Prohibited Materials means garbage, dead animals, asphalt, petroleum products, paints, rubber products, plastics, paper (other than what is necessary to start a fire), cardboard, treated wood, construction debris, demolition debris, metal or any substance (other than natural vegetation) ~~((which when burned))~~ that releases toxic emissions, dense smoke or obnoxious odors, when burned.

10((8)). Responsible Person means any person who has applied for and received a permit for agricultural burning, or any person allowing, igniting or attending to agricultural burning, or any person who owns or controls property on which agricultural burning occurs.

NEW SECTION

SECTION 6.11 AGRICULTURAL BURNING

E. Requirements. No person shall practice or permit the practice of Agricultural Burning, other than incidental agricultural burning pursuant to RCW 70.94.745(7), unless the applicant demonstrates to the satisfaction of the Authority or permitting authority that burning, as requested:

1. Is reasonably necessary to successfully carry out the enterprise in which the applicant is engaged; or

2. Constitutes a best management practice and no practical alternative is reasonably available.

Reviser's note: The unnecessary underscoring in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending Order 94-23-036, filed 11/9/94)

SECTION 6.11 AGRICULTURAL BURNING

F((D)). Prohibitions. ~~((Except as provided in Section 6.11.E, n))~~ No person shall practice or permit the practice of agricultural burning in any of the following circumstances ~~((and locations))~~:

~~((1. Within the No-Burn Area, as defined by resolution of the Board of Directors of the Authority:))~~

1. Where there is a practice, program, technique, or device, that Ecology has certified as a practical alternative to burning.

2. When the materials to be burned include any prohibited materials.

3. During an episode, as declared by Ecology, or during ((impaired air quality)) Impaired Air Quality, as declared by ((the Department of)) Ecology or the Authority for a defined geographical area.

4. ~~((When))~~ Where burning causes a nuisance or when the Authority or permitting authority determines that the creation of a nuisance ((is the)) would likely result ((of)) from burning.

5. ~~((Unless))~~ Without a written permit, ((has been)) issued by the permitting authority, except for incidental agricultural burning, as provided in RCW 70.94.745(7).

~~((6. If the applicant is unable to show to the satisfaction of the Authority or permitting authority that burning, as requested-~~

~~a. is reasonably necessary to successfully carry out the enterprise in which the applicant is engaged; or~~

~~b. constitutes a best management practice; or~~

~~c. is necessary to control disease or insect infestation, and other measures are not available.))~~

~~6((7)). ((If the burning))~~ When the materials to be burned include((s)) any material other than natural vegetation generated on the property, which is the burning site, or was transported to the burning site by wind or water.

7. In the case of growing of field or turf grasses for seed, unless the request to burn qualifies for a waiver for slope or extreme conditions pursuant to WAC 173-430-045(4).

8. When a no-burn day is declared by the Authority or the permitting authority.

REPEALER

SECTION 6.11 AGRICULTURAL BURNING

~~((E. Nothing in Section 6.11 shall apply to the following types of fires:~~

~~1. Silvicultural burning.~~

~~2. Grass Field Burning pursuant to Section 6.10.))~~

AMENDATORY SECTION (Amending Order 94-23-036, filed 11/9/94)

SECTION 6.11 AGRICULTURAL BURNING

~~G((F)).~~ General Conditions. Considering population density and local conditions affecting air quality, the Authority or permitting authority shall establish conditions for all permits to minimize air pollution as much as practical. Such conditions may be general (applying to all permits) or specific (applying to individual permits). Conditions may ~~((include but are not limited to restricting the))~~ address permissible hours of burning, ((restricting burning to a defined season, restricting the size of fires)) maximum daily burn acreage or volume of material to be burned, ((imposing)) requirements for good combustion practice, ((and restrict-

ing)) burning ((to)) under specified weather conditions, pre and post-burn reporting, and other criteria, determined by the permitting authority, as necessary to minimize air pollution. Any person who practices or permits the practice of agricultural burning shall, in addition to any specific permit conditions imposed, comply with the general agricultural burning permit conditions and criteria in WAC 173-430-070 and all of the following conditions:

1. Whenever an episode or ~~((impaired air quality))~~ Impaired Air Quality is declared, or other meteorological condition occurs that the permitting authority determines is likely to contribute to a nuisance, all fires shall be extinguished by withholding new fuel or ceasing further ignition, as appropriate ((and)) to allow((ing)) the fire to burn down in the most expeditious manner. In no case shall a fire be allowed to burn longer than 3 hours after declaration of an episode or Impaired Air Quality, or determination of the specific meteorological condition.

2. Until extinguished, the ((The)) fire shall be attended by a person who is responsible for the same, ((and)) capable of extinguishing the fire, and has the permit or a copy of the permit in his or her immediate possession. ((The fire must be extinguished before leaving it.))

3. Burning shall occur only during daylight hours ~~((only)),~~ or a more restrictive period as determined by the Authority or the permitting authority.

4. Permission from ~~((a))~~ the landowner, or the landowner's designated representative, must be obtained before starting the fire.

5. The fire district of jurisdiction shall be notified by the responsible person, prior to igniting a fire.

6. If it becomes apparent at any time to the Authority or permitting authority that limitations need to be imposed to reduce smoke, ~~((and))~~ prevent air pollution and/or protect property and the health, safety and comfort of persons from the effects of burning, the Authority or permitting authority shall notify the permittee or responsible person and any limitation so imposed shall become a condition under which the permit is issued.

7. Follow the smoke management guidelines of the permitting authority.

~~H((G)).~~ Administrative requirements.

1. ~~((Until January 1, 1995, all applicants for agricultural burning permits shall pay a one-time interim fee of \$20 at the time the application is submitted. Payment shall be made by check, payable to the Washington Department of Ecology.))~~ All applicants for agricultural burning permits must submit their requests to burn, on forms or in a format provided by the permitting authority.

2. The permitting authority may require additional information from the applicant, as necessary to determine if agricultural burning is reasonably necessary to carry out the enterprise, to determine how best to minimize air pollution, and as necessary to compile information for the annual program summary (Section 6.11.J.10).

3. The permitting authority may deny an application or revoke a previously issued permit if it is determined by the permitting authority that the application contained inaccurate information, or failed to contain pertinent information, which information is deemed by the permitting authority to be sig-

nificant enough to have a bearing on the permitting authority's decision to grant a permit.

4((2)). ((After January 1, 1995, a)) All applicants for agricultural burning permits shall pay a fee at the time of application, ((not to exceed the level determined by the agricultural burning practices and research task force, pursuant to Chapter 70.94.650 RCW)) according to ((The)) a schedule of fees, ((shall be)) established by resolution of the permitting authority. When the permitting authority is the Spokane County Air Pollution Control Authority, the fee shall be according to the schedule in Regulation I, Article X.

4. ((The permitting authority shall act upon a complete permit application within 7 days from the date such complete application is filed.))

5. No permit for agricultural burning shall be granted on the basis of a previous permit history.

6. The permitting authority may waive or reduce the sixty and thirty-day advance requirements for submitting and completing a waiver request, made pursuant to WAC 173-430-045(5), if the permitting authority determines that an alternate advance period will suffice for evaluating the request.

Reviser's note: The typographical errors in the above material occurred in the copy filed by the SCAPCA and appear in the Register pursuant to the requirements of RCW 34.08.040.

NEW SECTION

SECTION 6.11 AGRICULTURAL BURNING

I. Responsibilities of Farmers. In order to make the required showing, referenced in Section 6.11.E., a farmer, as defined in WAC 173-430-030(7), is responsible for providing the following to the permitting authority, if applicable:

1. Advance notice of the potential need to burn, including documentation of pest problems, which if possible, shall be given prior to crop maturity.

2. For pest management burning requests, a plan establishing how a recurring pest problem will be addressed through non-burning management practices by the following year, if possible, or by no later than three years.

3. An evaluation of alternatives to burning, including those successfully and customarily used by other farmers in similar circumstances, with particular attention to alternatives customarily used in Spokane County, which evaluation shall include an explanation as to why the alternatives are unreasonable and burning is necessary.

4. A showing as to how burning will meet the applicable crop-specific or general Best Management Practices, established pursuant to RCW 70.94.650(4).

5. For residue management burn requests, a showing that the residue level meets the permitting authority's criteria for consideration of a residue management burn.

6. For residue management burn requests, a showing that non-burning alternatives would limit attaining the desired level of water infiltration/retention, soil erodibility, seed/soil contact, seeding establishment or other desirable agronomic qualities.

7. Field access to representatives of the permitting authority.

J. Responsibilities of Permitting Authorities. Permitting authorities are responsible for performing the following activities:

1. Evaluation of individual permit applications to determine whether the applicant has made the required showing, referenced in Section 6.11.E.

2. Consultation with a trained agronomist on individual permit applications, as necessary, to evaluate the need to burn and non-burning alternatives.

3. Field inspection, as necessary to verify the following:
a. Accuracy of information in permit and waiver applications,

b. Compliance with permit conditions and applicable laws and regulations, and

c. Acreage and materials burned.

4. Taking final action on permit applications within 7 days of the date the application is deemed complete.

5. Incorporation of appropriate permit conditions, both general and specific, as referenced in Section 6.11.G, in order to achieve the following:

a. Minimizing air pollution and emissions of air pollutants, and

b. Insuring that the public interest in air, water, and land pollution, and safety to life and property has been fully considered, in accordance with RCW 70.94.650(1)(c).

6. Enforcement and compliance efforts, with the goal of assuring compliance with all applicable laws, regulations, and permit conditions, and ensuring that timely and appropriate enforcement actions are commenced, when violations are discovered.

7. Complaint logging and appropriate level of response.

8. Collection of fees.

9. Declaration of burn days and no-burn days, taking into consideration, at a minimum, the following criteria:

a. Local air quality and meteorological conditions;

b. Time of year when agricultural burning is expected to occur;

c. Acreage/volume of material expected to be burned per day and by geographical location;

d. Proximity of burn locations to roads, homes, population centers, and public areas;

e. Public interest and safety; and

f. Risk of escape of fire onto adjacent lands, during periods of high fire danger.

10. Development of smoke management guidelines, that include procedures to minimize the occurrence of nuisance, and to facilitate making burn/no burn decisions.

11. Dissemination of burn decisions, as necessary to inform responsible persons and the public.

12. Compilation of an annual program summary, which at a minimum, includes the following:

a. Permits and acres approved for burning;

b. Permit/waiver requests and acres denied;

c. Number and dates of complaints received; and

d. Number of documented violations.

Reviser's note: The unnecessary underscoring in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending Order 94-23-036, filed 11/9/94)

SECTION 6.11 AGRICULTURAL BURNING

~~K((H)). Compliance ((with other laws and regulations)).~~
The responsible person is expected to comply with all applicable laws and regulations. Compliance with Section 6.11 does not ~~((necessarily mean))~~ insure that agricultural burning complies with other applicable laws and regulations implemented by any other ((authorities)) authority or entity.

WSR 01-01-098

PROPOSED RULES

SUPERINTENDENT OF PUBLIC INSTRUCTION

[Filed December 15, 2000, 2:05 p.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 00-19-024.

Title of Rule: WAC 392-140-600 through 392-140-685, state special education safety net funding.

Purpose: To reflect policy changes made by the State Safety Net Oversight Committee.

Statutory Authority for Adoption: RCW 28A.150.290.

Statute Being Implemented: Section 507(7), chapter 309, Laws of 1999.

Summary: Proposed changes will remove one application type and replace with a new application type. Numerous other changes will provide better information to applicants about types of applications, order of application, criteria of application, and worksheets used in application process.

Reasons Supporting Proposal: Changes are needed to clarify order of application process.

Name of Agency Personnel Responsible for Drafting: Sara Cundy, Office of Superintendent of Public Instruction, (360) 753-2298; Implementation: Allen H. Jones, Office of Superintendent of Public Instruction, (360) 753-6708; and Enforcement: Michael L. Bigelow, Office of Superintendent of Public Instruction, (360) 753-1718.

Name of Proponent: Office of Superintendent of Public Instruction, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: Changes to implement the 1999-2001 state Operating Appropriations Act:

- Requirement that superintendent expend all available federal discretionary funds necessary to meet the extraordinary needs of individuals special education students.

Changes to rules:

- Addition of other factors application type and elimination of demographics application type.
- Requirement that applicant apply for award types successively as follows: Maintenance, percentage, high-cost individual, other factors. Additional requirement

that applicant apply in each successive type after eligibility is exhausted in prior type.

- Requirement that safety net applicant use the state adopted excess cost method of accounting consistently on Worksheet "A."

Proposal Changes the Following Existing Rules: As described above.

No small business economic impact statement has been prepared under chapter 19.85 RCW. No small business impacts have been identified.

RCW 34.05.328 does not apply to this rule adoption.

Hearing Location: Bryan Conference Room, Old Capitol Building, P.O. Box 47200, Olympia, WA 98504-7200, on January 23, 2001, at 9 a.m.

Assistance for Persons with Disabilities: Contact Sheila Emery by January 9, 2001.

Submit Written Comments to: Legal Services, Office of Superintendent of Public Instruction, P.O. Box 47200, 600 South Washington Street, Olympia, WA 98504-7200, fax (360) 753-4201, by January 22, 2001.

Date of Intended Adoption: January 24, 2001.

December 15, 2000

Dr. Terry Bergeson

Superintendent of

Public Instruction

AMENDATORY SECTION (Amending WSR 00-03-015, filed 1/7/00, effective 2/7/00)

WAC 392-140-600 Special education safety net—Applicable provisions. The provisions of WAC 392-140-600 through 392-140-685 apply to the determination of safety net allocations of state special education moneys and Individuals with Disabilities Education Act (IDEA) federal discretionary moneys for the 2000-01 school year and thereafter.

AMENDATORY SECTION (Amending WSR 00-03-015, filed 1/7/00, effective 2/7/00)

WAC 392-140-605 Special education safety net—((Safety net)) Application((—Basis)) types, certification, worksheets. Application for safety net funding shall be made on Form SPI 1381 - Maintenance or Form SPI 1381 - Certification published by the superintendent of public instruction as follows:

(1) School districts may make application for safety net funding on ~~((the basis of))~~ one or more of the ~~((following:))~~ four application types described below. Applications will be considered and awards made in the order shown until the district's eligibility is exhausted.

(a) Maintenance of effort (state revenue only) hereafter referred to as MOESR. State safety net funding may be requested when a district shows a MOESR loss calculated by the superintendent of public instruction pursuant to WAC 392-140-620.

(b) ~~((Special characteristics and costs:))~~ Students above the funded percentage hereafter referred to as percentage. State safety net funding may be requested ~~((by a school dis-~~

trict with special education costs of providing services that are reasonable, but differ significantly from the assumptions contained in the state special education funding formula provided that the applicant school district meets the standards of WAC 392-140-613 and can demonstrate, pursuant to WAC 392-140-625 either of the following:

(i) ~~The~~ if district's actual resident special education enrollment exceeds the district's funded resident special education enrollment, the district ~~((has adopted))~~ is implementing a plan of action to contain or eliminate any unnecessary, duplicative, or ineffective enrollment practices, and all available funding, including state, federal, and local if provided in the past, is insufficient to meet the expenditure level necessary for special education ~~((or~~

(ii) ~~The district's resident special education enrollment percentage is equal to the funded special education enrollment percentage and the district has incurred an adverse change in the demographics of its resident special education enrollment, and all available funding, including state, federal, and local if provided in the past, is insufficient to meet the expenditure level necessary for special education))~~.

(c) High-cost individual student. A school district may submit applications for federal safety net funding for high-cost individual students meeting the standards in WAC 392-140-616.

(d) Factors other than students above the funded level or high-cost individual students hereafter referred to as other factors. State safety net funding may be requested by a school district with unfunded special education costs due to factors beyond the district's control and not attributable to district philosophy or service delivery style. The applicant district must meet standards of WAC 392-140-613 and 392-140-625.

(2) The school district making application for safety net funding shall certify that:

(a) The application complies with the respective safety net application standards of WAC 392-140-610, 392-140-613, or 392-140-616;

(b) The application provides true and complete information to the best of the school district's knowledge; and

(c) The district understands that safety net funding is not an entitlement, is subject to adjustment and recovery, may not be available in future years, state safety net funding must be expended in program 21 which impacts the amount that must be maintained for the federal maintenance of effort test, and federal safety net funding must be expended in program 24, and federal Medicaid has been billed for all services to eligible students.

(3) Worksheets included with the application shall demonstrate the need for safety net funding. School districts are encouraged and may be required to submit additional information designed to assist the state oversight committee in analyzing the application.

(a) MOESR applications pursuant to subsection (1)(a) of this section do not require any worksheets. Applications for MOESR shall include certification of standards and criteria described in WAC 392-140-610.

(b) ~~((Special characteristics and costs))~~ Percentage applications pursuant to subsection (1)(b) ~~((+))~~ of this section require completion of ~~((the narrative and))~~ worksheet ~~((s))~~

"A" described in WAC 392-140-625, certification of standards and criteria pursuant to WAC 392-140-613 and percentage application narrative.

(c) High-cost individual student applications shall include ~~((completed budget forms SPI F-1000B and SPI E-795B, and))~~ worksheets "A" and "C" and summary published in the safety net application, and certification of standards and criteria pursuant to WAC 392-140-616.

(d) Other factors applications pursuant to subsection (1)(d) of this section require completion of application narrative, worksheet "A" described in WAC 392-140-625, and certification of standards and criteria described in WAC 392-140-613.

AMENDATORY SECTION (Amending Order 96-15, filed 9/18/96, effective 10/19/96)

WAC 392-140-609 Special education safety net—Standards and criteria—Appropriate and properly and efficiently prepared and formulated IEPs. Individualized education programs (IEPs) which are appropriate, properly and efficiently prepared and formulated are those IEPs that meet all of the following criteria:

(1) The IEPs comply with federal and state procedural requirements.

(2) The delivery of specially designed instruction complies with state standards (regularly scheduled teaching or training activities provided or designed by special education qualified staff).

(3) Areas for the provision of special education services conform with areas of need identified in the students evaluation made pursuant to WAC ~~((392-172-152))~~ 392-172-111.

(4) The state oversight committee determines:

(a) There are no unresolved state audit examination findings related to special education which are material in nature;

(b) There are no unresolved state child count verification findings which are material in nature; and

(c) All corrections to state enrollment reporting, required for resolution of (a) and (b) of this subsection, are completed.

AMENDATORY SECTION (Amending WSR 00-03-015, filed 1/7/00, effective 2/7/00)

WAC 392-140-613 Special education safety net—Standards and criteria—~~((Special characteristics and costs))~~ Percentage and other factors applications. For a school district requesting state safety net funding due to ~~((special enrollment characteristics of the district and costs of providing services which differ significantly from the assumptions contained in the state special education funding formula))~~ students above the funded percentage or other factors, the district shall demonstrate at a minimum that:

(1) IEPs are appropriate and are properly and efficiently prepared and formulated.

(2) The district is making reasonable effort to provide appropriate services for students in need of special education utilizing state funding generated by the basic education apportionment and special education funding formulas.

(3) The district's special education services are operated in a reasonably efficient manner and the district has adopted a plan of action to contain or eliminate any unnecessary, duplicative, or inefficient practices.

(4) Indirect costs included for purposes of determining safety net allocations do not exceed the allowable percent for the federal special education program plus one percent.

(5) Any available federal funding is insufficient to address the additional needs.

(6) The costs of any supplemental contracts are not included for purposes of determining safety net allocations. Supplemental contracts are those contracts made pursuant to RCW 28A.400.200(4) excluding extended school year contracts (ESY) required by an IEP.

(7) The costs of any summer school instruction are not included for purposes of making safety net determinations excluding extended school year contracts (ESY) required by an IEP.

AMENDATORY SECTION (Amending Order 98-05, filed 3/18/98, effective 4/18/98)

WAC 392-140-616 Special education safety net—Standards—High-cost individual student applications. For districts requesting safety net funding to meet the extraordinary needs of an eligible high-cost individual special education student, the district shall demonstrate at a minimum that:

(1) The IEP for the eligible special education student is appropriate, and properly and efficiently prepared and formulated.

(2) All of the following criteria apply to the high-cost individual student:

(a) Costs eligible for safety net consideration must be direct expenditures for services required in the IEP.

(b) In order to deliver appropriate special education to the student, the district must be providing services which incur additional costs which exceed available district annual average per-pupil revenues, including state, federal and local revenues, by seven thousand dollars. This threshold amount shall be adjusted ~~((downward by the portion of the year for which the individual student was actually enrolled))~~ pro rata for students not counted or expected to be counted for special education services on all eight enrollment count dates (October through May). For example, for a student served and reported for only ~~((one-half the year))~~ six of the eight count dates, the threshold amount shall be reduced ~~((by one-half))~~ to three-quarters of the full amount. The state safety net oversight committee may set a lower threshold for small school districts.

(c) The total cost of educational services must exceed any carryover of federal flow-through special education funding as of August 31 of the prior school year.

(d) The cost of providing special education services, as directed in the IEP, for this student would be detrimental to the school district's ability to provide necessary services to the other students being provided special education in the district.

(3) The state safety net oversight committee shall adapt the high cost individual student application as appropriate for

applications prepared by the Washington state school for the blind and the Washington state school for the deaf.

AMENDATORY SECTION (Amending WSR 00-03-015, filed 1/7/00, effective 2/7/00)

WAC 392-140-625 Special education safety net—Demonstration of ~~((special characteristics and costs))~~ percentage and other factors. Applications ~~((pursuant to WAC 392-140-605 (1)(b) must demonstrate special characteristics and costs as provided in this section:))~~ for percentage or other factors shall demonstrate need for safety net funding as follows:

(1) Applications from districts with actual enrollment greater than funded enrollment pursuant to WAC 392-140-605 (1)(b)~~((+))~~ must demonstrate, through the application narrative, that the district ~~((has adopted))~~ is implementing a plan of action to contain or eliminate any unnecessary, duplicative, or ineffective enrollment practices. The district shall demonstrate a financial need on worksheet "A" of the application. Applicants shall cooperate with the special education program audit team and shall provide the team with any information required by the team to review and verify certifications made on the safety net application.

~~((2) Applications from districts with actual enrollment equal to funded enrollment pursuant to WAC 392-140-605 (1)(b)(ii) must demonstrate, through the application narrative and on application worksheet "A" and "B," an adverse change in resident special education enrollment characteristics and program costs. For initial awards, the district must demonstrate adverse change since the prior school year. For continuing awards, the district must demonstrate continued adverse change.))~~

(a) The application narrative completed by the school district shall provide any information and explanations related to ~~((special enrollment characteristics))~~ students above the funded percentage as required in the published instructions.

(b) Application worksheet "A" shall demonstrate a financial need by displaying the school district's special education expenditures, revenues, and special education enrollments for the prior and current school years. ~~((Application worksheet "B" shall display changes in staff services and staff-to-ratios between the prior and current school years.))~~

(c) Cost differences between the current and prior school years shall be explained in the application narrative. The application narrative shall detail cost differences in services to students which occurred between the current school year and the prior school year. Such details shall include costs and savings associated with each change in services.

(d) A fiscal need shall be demonstrated through the application narrative, on application worksheet~~((s))~~ "A" ~~((and "B,")~~) and other information available to the state oversight committee.

(2) Applications for other factors pursuant to WAC 392-140-605 (1)(d) must demonstrate, through application narrative and on application worksheet "A," financial need caused by factors other than the presence of students above the funded percentage or high-cost individual student(s).

(a) The narrative shall identify causal factors beyond the district's control and not attributable to the district philosophy or service delivery style, and:

(i) Outline each causal factor asserted in the application;
(ii) Provide a clear explanation of the impact of each factor to the district in terms of number and/or severity of students;

(iii) Quantify the safety net funding need due to the factor. Show the assumptions and calculations used to arrive at the dollar amount of unfunded costs attributable to each factor.

(b) Provide a copy or explanation of any action plan the district has adopted to contain or eliminate any unnecessary, duplicative, or inefficient practices pursuant to WAC 392-140-613.

(c) If the district received an award in a prior year, describe the program, prior year costs, and compare and contrast to the current year program and costs.

AMENDATORY SECTION (Amending WSR 00-03-015, filed 1/7/00, effective 2/7/00)

WAC 392-140-626 Special education safety net—Worksheet A—Demonstration of need. Applications for ~~((special characteristics and costs and))~~ percentage, high cost individual students, and other factors shall demonstrate financial need as follows:

(1) Application worksheet "A" shall demonstrate a fiscal need in excess of ~~((the sum of)):~~

(a) ~~((All current school year safety net awards to the district))~~ The district's maximum eligibility for MOESR ((or special characteristics and costs));

(b) Any previous safety net awards for the current school year; and

(c) All other available revenue for special education, including all carryover of federal special education revenue.

(2) Awards ~~((for special characteristics and costs pursuant to WAC 392-140-605 (1)(b)(ii) and high cost individual awards))~~ shall not exceed the amount of need demonstrated on the worksheet "A."

(3) Worksheets submitted with safety net applications are to reflect ~~((an))~~ the state adopted excess cost ((basis)) method of accounting, consistently applied for both years presented. ~~((The district may be required to describe the district's excess cost methodology.))~~

(4) The safety net oversight committee may revise the district's worksheet "A" submitted for errors or omissions.

(5) The school district shall provide additional information as requested by the state oversight committee.

(6) After the close of the school year, the safety net oversight committee may review the worksheet "A" used to determine need for a district's award against the actual final school year enrollments, revenues, and expenditures reported by the district. Based upon the results of this review:

(a) The safety net allocation for the school year may be adjusted or recovered; or

(b) If the committee finds that a portion of the safety net allocation was not needed to balance revenues and expenditures, the committee may consider that portion of the allocation available to meet the needs of the ensuing school year.

AMENDATORY SECTION (Amending WSR 00-03-015, filed 1/7/00, effective 2/7/00)

WAC 392-140-660 Special education safety net—Approved application—Special education safety net allocations. The total amount allocated to school districts may not exceed the authorized appropriation.

(1) The special education safety net allocation shall be the smaller of:

(a) The amount requested by the school district; or

(b) The amount authorized by the state oversight committee.

(2) If the district requests and the oversight committee approves the "full" allocation permitted by a state formula, then the allocation shall be adjusted periodically during the year and again in January after the close of the school year to reflect the amount determined under the formula.

(3) Special education safety net allocations of state moneys for ~~((special characteristics))~~ percentage and other factors applicants under WAC 392-140-605 (1)(b) and (d) shall be prorated if total year-to-date state allocations for all safety net applications under WAC 392-140-605 (1)(a) ~~((and)), (b), and (d)~~ exceed the authorized appropriation for that school year.

(4) Special education safety net allocations for high-cost individual students under WAC 392-140-605 (1)(c) shall ~~((first))~~ use appropriated federal moneys. ~~((If federal moneys are insufficient, state moneys may be used if provided for this purpose in the state Operating Appropriations Act, otherwise high cost individual student allocations shall be prorated as needed to stay within the authorized federal appropriation.))~~ If safety net awards to meet the extraordinary needs of one or more individual special education students exceed the general fund—federal appropriation, the superintendent shall expend all available federal discretionary funds necessary to meet this need. General fund—state funds shall not be expended for this purpose.

AMENDATORY SECTION (Amending WSR 00-03-015, filed 1/7/00, effective 2/7/00)

WAC 392-140-675 Special education safety net—Adjustments to special education safety net allocations. Safety net allocations may be adjusted as follows:

(1) For those districts not maximizing Medicaid billing for special education students under ~~((chapter 318, Laws of 1999))~~ RCW 74.09.5255, special education safety net allocations shall be reduced by the estimated potential additional incentive payments for the school year if the district maximized Medicaid incentive payments. Potential additional incentive payments shall be estimated by the superintendent of public instruction based on the district's percent of Medicaid eligible students billed and a state-wide average incentive payment per student determined by the superintendent in October of the school year. The average incentive payment per student shall be determined using the prior school year's state-wide Medicaid billing data assuming fifty percent incentive payments for all school districts. The superintendent of public instruction shall update Medicaid billing adjustments to safety net allocations periodically during the

PROPOSED

school year and again in January following the close of the school year.

(2) Special education safety net allocations for a school district may be adjusted to reflect changes in factors for which additional or revised information becomes available after the awarding of the initial safety net allocation. This means:

(a) MOESR awards for the "full" amount shall be increased, reduced, or nullified when a recalculation pursuant to WAC 392-140-620 results in a change in the amount previously calculated pursuant to WAC 392-140-620.

(b) ~~((Special characteristics and costs))~~ Percentage awards for the full amount under WAC 392-140-605 (1)(b)(~~(+)~~) shall be increased, reduced, or nullified when the district's enrollment or state funding factors change.

(c) ~~((Special characteristics and costs))~~ Percentage and other factors awards may be reduced or nullified when the school district's actual revenues and expenditures for the school year differ significantly from the estimates on which the initial safety net award was based.

(d) A school district's safety net award may be adjusted by the safety net oversight committee based on the results of the review conducted by the special education program audit team pursuant to WAC 392-140-630.

(3) Allocations of state moneys ~~((for special characteristics applicants))~~ under WAC 392-140-605 (1)(b) and (d) shall be prorated if total state allocations for all safety net applications under WAC 392-140-605 (1)(a) ~~(and)~~, (b), and (d) exceed the authorized appropriation for that school year. Allocations shall be restored to full funding if additional appropriation authority becomes available.

WSR 01-01-131

WITHDRAWAL OF PROPOSED RULES DEPARTMENT OF SOCIAL AND HEALTH SERVICES

(By the Code Reviser's Office)

[Filed December 19, 2000, 4:04 p.m.]

WAC 388-31-010, 388-31-015, 388-31-020, 388-31-025, 388-31-030, 388-31-035, 388-273-0010, 388-273-0020, 388-273-0025, 388-273-0030 and 388-273-0035, proposed by the Department of Social and Health Services in WSR 00-12-083 appearing in issue 00-12 of the State Register, which was distributed on June 21, 2000, is withdrawn by the code reviser's office under RCW 34.05.335(3), since the proposal was not adopted within the one hundred eighty day period allowed by the statute.

Kerry S. Radcliff, Editor
Washington State Register

WSR 01-01-133

PROPOSED RULES

DEPARTMENT OF LICENSING

[Filed December 20, 2000, 8:58 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 00-21-092.

Title of Rule: WAC 308-13-150 Landscape architect fees.

Purpose: This rule is needed to increase the charge that candidates pay for the landscape architect registration examination and the department collects on the vendor's behalf.

Statutory Authority for Adoption: RCW 18.96.080 Fees and 43.24.086 Fee policy for professions, occupations and businesses; requires fees to be at a sufficient level to defray the costs of administering the program.

Statute Being Implemented: RCW 43.24.086 Fee policy for professions, occupations and businesses; requires fees to be at a sufficient level to defray the costs of administering the program.

Summary: This is a national driven fee increase and not the request of the department.

Reasons Supporting Proposal: The cost of the examinations are charged directly to the candidates for registration.

Name of Agency Personnel Responsible for Drafting: Joan Y. Robinson, 405 Black Lake Boulevard, Olympia, (360) 664-1387; Implementation and Enforcement: Margaret Epting, 405 Black Lake Boulevard, Olympia, (360) 664-1386.

Name of Proponent: Landscape Architect Registration Board, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: The examination vendor has increased the examination charges. This rule is needed to increase the examination charges that candidates pay for the examination, to a sufficient level to meet the cost of purchasing the examinations for the candidates.

Proposal Changes the Following Existing Rules: It increases the charges that are collected from candidates for the examinations ordered from the test vendor. The charges recovered by the department shall be refunded to the vendor for the cost of the examinations.

No small business economic impact statement has been prepared under chapter 19.85 RCW. This increase in charges is to individual applicants, not business enterprises. The vendor will provide the tests only at these prices. The costs are not negotiable.

Without these increases in examination charges the refund account would be a deficit with the first examination session.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. This section of regulations is not a "significant legislative rule" as defined by RCW 34.05.328 (5)©(iii) [(5)(c)(iii)] and is exempt under the provisions of RCW 34.05.38 [34.05.328] (5)(b)(vi).

PROPOSED

Hearing Location: Department of Licensing, 405 Black Lake Boulevard, Conference Room 1, Olympia, WA 98502, on January 25, 2001, at 9:00 a.m.

Assistance for Persons with Disabilities: Contact Joan Y. Robinson by January 23, 2001, TDD (360) 586-2788, or (360) 664-1387.

Submit Written Comments to: Margaret Epting, Landscape Architect Registration Board, P.O. Box 9045, Olympia, WA 98507-9045, fax (360) 664-2551, by January 23, 2001.

Date of Intended Adoption: January 25, 2001.

WSR 01-01-143
PROPOSED RULES
GAMBLING COMMISSION
 [Filed December 20, 2000, 11:17 a.m.]

Supplemental Notice to WSR 00-20-081.

Preproposal statement of inquiry was filed as WSR 00-13-029 with a published date of July 5, 2000.

Title of Rule: New rules relating to new marketing schemes for pull-tabs. WAC 230-30-033 Event pull-tab series—Definitions—Restrictions, 230-20-036 Strip pull-tab series—Definitions—Restrictions, 230-30-034 Pull-tab series with seal card games—Definitions—Restrictions, and 230-02-260 Pull-tab defined.

Purpose: On October 3, 2000, a proposed rule making (CR-102) was filed under WSR 00-20-081 with a published date of October 18, 2000. That rules package was the result of a Bingo Net Return Task force investigating way to promote business at bingo halls. This supplemental filing is to provide notification of the following changes made after the original filing: Event pull-tab series will be operated only at bingo halls. Therefore, only charitable or nonprofit organizations will operate these games, not commercial organizations. The name of the "hold" pull-tab series was changed to "event" pull-tab; previously, two types of games involving a secondary element of chance were set forth in the event pull-tab series. One of these games "seal card games" was removed from the event pull-tab rule and placed in its own separate rule, and additional requirements and restrictions were added. The definition of pull-tabs was added for house-keeping purposes. Finally, due to lack of interest by the industry, it is recommended that the rule relating to strip pull-tab series not be adopted.

Statutory Authority for Adoption: RCW 9.46.070.

Summary: See Purpose above.

Reasons Supporting Proposal: The industry has requested new marketing schemes for their pull-tab games.

Name of Agency Personnel Responsible for Drafting: Susan Arland, Lacey, (360) 438-7654 ext. 374; Implementation: Ben Bishop, Lacey, (360) 438-7640; and Enforcement: Sherri Winslow, Lacey, (360) 438-7654 ext. 301.

Name of Proponent: Staff, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: See Purpose above.

Proposal Changes the Following Existing Rules: See Purpose and Reasons Supporting Proposal above.

No small business economic impact statement has been prepared under chapter 19.85 RCW. Proposal is exempt under RCW 19.85.025(2), therefore a small business economic impact statement is not required.

PROPOSED

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. This agency does not choose to make section 201, chapter 403, Laws of 1995, apply to this rule adoption.

Hearing Location: Cavanaugh's at Capitol Lake, 2300 Evergreen Park Drive S.E., Olympia, WA 98502, phone (360) 943-4000, on February 9, 2001, at 10:00 a.m.

Assistance for Persons with Disabilities: Contact Shirley Corbett by February 1, 2001, TDD (360) 438-7638, or (360) 438-7654 ext. 302.

Submit Written Comments to: Susan Arland, Mailstop 42400, Olympia, WA 98504-2400, fax (360) 438-8652, by February 9, 2001.

Date of Intended Adoption: February 1, 2001.

December 20, 2000

Susan Arland

Rules Coordinator

NEW SECTION

WAC 230-30-033 Event pull-tab series—Definitions—Restrictions Charitable or nonprofit bingo operators may use pull-tab series that are specifically designed to include event activities. Such games shall be operated under the following definitions and restrictions.

Definitions.

(1) The following definitions apply to this section:

(a) Event pull-tab series are defined as a pull-tab series that includes a predetermined number of pull-tabs which allow a player the opportunity to advance to another round (the event round) involving a secondary element of chance.

(b) The event round is defined as the secondary element of chance associated with a bingo session, where the prize is determined based on the outcome of a bingo game during the session.

(c) Event winners shall be determined based on a pull-tab that ties the specific winning number to the bingo game. This winning number must fall within numbers 1 through 75.

Manufacturing restrictions.

(2) The following manufacturing restrictions apply to this section:

(a) An event pull-tab series shall be manufactured meeting all standards of construction included in WAC 230-30-103;

(b) An event pull-tab series may include instant winning tickets in addition to event prizes;

(a) The flare shall clearly set out the following:

(i) All prizes available, in accordance with WAC 230-30-106;

(ii) The number of chances available to advance to the event round, and how the event winner is to be determined; and

(iii) The number of winning tabs at the instant winner level, and the number of winning tabs at the event round level.

(e) If perforated windows are used as a part of determining the winners in the event round the numbers or symbols must be covered by an approved means which prevents detection of the winning number or symbol prior to opening.

Operational restrictions.

(a) The event pull-tab series must be played in a charitable or nonprofit bingo hall, and must be played and completed within one bingo session;

(b) Prior to putting an event series into play, the operator must fully disclose, in plain view, when the event round (which involves the second element of chance) will take place;

(c) Event pull-tabs must be available for purchase until immediately prior to the event round, unless the game has been completely sold out;

(d) A licensed manager must be present at all times the event round takes place, including sales of tickets and selection of winners;

(e) The following are prohibited for use with event pull-tab series:

(i) Substitute flares; and

(ii) Bonus pull-tab series and carry-over jackpots.

NEW SECTION

WAC 230-30-034 Pull-tab series with seal card games—Definitions—Restrictions Operators may use pull-tab series that are specifically designed to include seal cards. Such games shall be operated under the following definitions and restrictions:

Definitions.

(1) The following definitions apply to this section:

(a) Pull-tab series with seal cards are defined as a pull-tab series that include a predetermined number of pull-tabs which allow a player the opportunity to advance to another round involving a secondary element of chance; and

(b) Seal cards are defined as cards located on the flare which conceal the number or symbol assigned to the prize to be awarded as part of the secondary element of chance.

Manufacturing restrictions.

(2) The following manufacturing restrictions apply to this section:

(a) A pull-tab series with seal cards shall be manufactured meeting all standards of construction included in WAC 230-30-103;

(b) The flare may include up to two seals. The second seal may be offered as an additional prize, but may not be offered as an alternative to the original seal prize;

(c) The pull-tab series shall include forms to be attached to the pull-tabs that lists each seal card level participant with adequate information for contacting winners of the seal card game;

(d) The flare shall clearly set out the following:

(i) All prizes available, in accordance with WAC 230-30-106;

(ii) The number of chances available to advance to the seal card round, and how the seal card winner is to be determined; and

(iii) The number of winning tabs at the instant winner level, and the number of winning tabs at the seal card level.

(e) If perforated windows are used as a part of determining the winners in the seal card round, the numbers or sym-

bols must be covered by an approved means which prevents detection of the winning number or symbol prior to opening.

Operating restrictions.

(3) The following operational restrictions apply to this section:

(a) Pull-tabs with seal cards must be played in the following manner:

(i) The seal card prize shall be awarded for all pull-tab series with seal cards that are placed out for play. The pull tab series must be played out before it is pulled from play unless the operator elects to award the seal card prize without all tickets being purchased. The operator shall contact the seal card winner within two business days. The seal card winner shall be given two weeks after being contacted to redeem their prize. If the seal card winner does not redeem their prize within two weeks an alternate winner may be selected. The method of selecting an alternate winner must be established and fully disclosed prior to placing a game out for play; and

(ii) When a player receives a ticket that allows them to enter the seal card round, they must enter their name or allow the operator to enter their name on the flare based on the line indicated by the number or symbol on the pull-tab. The player must then turn in their ticket to the operator. The information to locate the winner shall be recorded at the time their name is entered on the flare. This information shall be maintained with the records of the game and be kept during the maintenance period of the game. All seal card games must be maintained on premises and be available for public inspection for a period of two weeks after they are pulled from play. If a seal card winner is not located within that time frame, the maintenance time shall be extended until a winner is designated for the game.

(b) Substitute flares, bonus pull-tab series and carry-over jackpots are prohibited from use with pull-tab series that include seal cards.

AMENDATORY SECTION (Amending Order 5, filed 12/19/73)

WAC 230-02-260 Pull-tab defined. A "pull-tab" is a card, or a single folded or banded ticket (~~card/ticket~~) (~~or is a card~~), the face of which is initially covered or otherwise hidden from view to conceal a number, symbol or set of symbols (~~(, a few of which numbers or symbols out of every set of pull-tabs have been designated in advance and at random as prize winners, when)~~). Each pull-tab series has winning numbers or symbols designated randomly, in advance, on some card/tickets. Upon opening a card/ticket to reveal the numbers or symbols, players will know immediately if the card/ticket is a winner or not. Provided, That event pull-tab series operators may determine winners at the conclusion of each event series (see WAC 230-30-033(3)). A person must pay some consideration to an operator for the opportunity to obtain each ((such folded or banded ticket or card;)) ticket/card, view the numbers or symbols ((thereon)) and possibly win a prize ((obtain a prize winning pull-tab, a person pays some consideration to an operator)).

Reviser's note: The typographical error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

NEW SECTION

WAC 230-20-036 Strip pull-tab series—Definitions—Restrictions. Strip pull-tab series are defined as two, three, four or five individual pull-tab series brought together to form a single "strip" series.

Separate series combined on one pull-tab.

(1) Each perforated window on a strip pull-tab shall be considered a separate series. Each window will be opened separately and contain symbols for players to match to separate series listed on the flare. The flare will separate each series by a number and distinct game name.

Flares.

(2) One flare will replace individual flares, either by the manufacturer or under the requirements of WAC 230-30-106. The following items are required to be listed on the single flare:

- (a) All prizes over twenty dollars;
- (b) Minimum control information shall include, but is not limited to:
 - (i) Serial numbers of each series;
 - (ii) Winner verification codes of all winners over twenty dollars;
 - (iii) Size of game; and
 - (iv) Color of strip pull-tabs.
- (3) Each series will be assigned a separate Washington identification stamp.

Requirements.

- (4) Each strip pull-tab series shall be played in accordance with WAC 230-30-050. The following additional requirements shall apply to strip series:
 - (a) Maximum ticket count is ten thousand;
 - (b) Each series included in the strip series must contain the same number of tickets;
 - (c) Maximum price per strip pull-tab is five dollars;
 - (d) Each pull-tab shall cost the same;
 - (e) The total payout of a strip series shall be at least sixty percent; and
 - (f) The total payout of each series included in a strip series shall be at least sixty percent.

PROPOSED

WSR 00-23-107

PERMANENT RULES

DEPARTMENT OF

SOCIAL AND HEALTH SERVICES

(Health and Rehabilitative Services Administration)

[Filed November 21, 2000, 3:50 p.m., effective January 1, 2001]

Date of Adoption: November 21, 2000.

Purpose: Chapter 388-805 WAC, Certification requirements for chemical dependency service providers, establishes the level of quality and patient care standards for chemical dependency service providers seeking certification by DSHS/DASA.

Citation of Existing Rules Affected by this Order: Repealing chapter 440-22 WAC and WAC 440-44-020.

Statutory Authority for Adoption: RCW 70.96A.090.

Other Authority: Chapter 70.96A RCW.

Adopted under notice filed as WSR 00-13-073 on June 19, 2000.

Changes Other than Editing from Proposed to Adopted Version: The department modified the definition of treatment alternatives to street crimes (TASC) services and the definition for chemical dependency counseling.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 77, Amended 0, Repealed 84.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 77, Amended 0, Repealed 84.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 77, Amended 0, Repealed 84.

Effective Date of Rule: January 1, 2001.

Rules and Policies Assistance Unit

Chapter 388-805 WAC

CERTIFICATION REQUIREMENTS FOR CHEMICAL DEPENDENCY SERVICE PROVIDERS

SECTION I—PURPOSE AND DEFINITIONS

NEW SECTION

WAC 388-805-001 What is the purpose of this chapter? These rules describe the standards and processes necessary to be a certified chemical dependency treatment program. The rules have been adopted under the authority and purposes of the following chapters of law.

(1) Chapter 10.05 RCW, Deferred prosecution—Courts of limited jurisdiction;

(2) Chapter 46.61 RCW, Rules of the road;

(3) Chapter 49.60 RCW, Discrimination—Human rights commission;

(4) Chapter 70.96A RCW, Treatment for alcoholism, intoxication and drug addiction; and

(5) Chapter 74.50 RCW, Alcoholism and Drug Addiction Treatment and Support Act (ADATSA).

NEW SECTION

WAC 388-805-005 What definitions are important throughout this chapter? "Added service" means the adding of certification for chemical dependency levels of care to an existing certified agency at an approved location.

"Addiction counseling competencies" means the knowledge, skills, and attitudes of chemical dependency counselor professional practice as described in Technical Assistance Publication No. 21, Center for Substance Abuse Treatment, Substance Abuse and Mental Health Services Administration, U.S. Department of Health and Human Services 1998.

"Administrator" means the person designated responsible for the operation of the certified treatment service.

"Adult" means a person eighteen years of age or older.

"Alcoholic" means a person who has the disease of alcoholism.

"Alcoholism" means a primary, chronic disease with genetic, psychosocial, and environmental factors influencing its development and manifestations. The disease is often progressive and fatal. It is characterized by impaired control over drinking, preoccupation with the drug alcohol, use of alcohol despite adverse consequences, and distortions in thinking, most notably denial. Each of these symptoms may be continuous or periodic.

"Approved supervisor" means a person who meets the education and experience requirements described in WAC 246-811-030 and 246-811-045 through 246-811-049 and who is available to the person being supervised.

"Authenticated" means written, permanent verification of an entry in a patient treatment record by an individual, by means of an original signature including first initial, last name, and professional designation or job title, or initials of the name if the file includes an authentication record, and the date of the entry. If patient records are maintained electronically, unique electronic passwords, biophysical or passcard equipment are acceptable methods of authentication.

"Authentication record" means a document that is part of a patient's treatment record, with legible identification of all persons initialing entries in the treatment record, and includes:

(1) Full printed name;

(2) Signature including the first initial and last name; and

(3) Initials and abbreviations indicating professional designation or job title.

"Bloodborne pathogens" means pathogenic microorganisms that are present in human blood and can cause disease in humans. The pathogens include, but are not limited

to, hepatitis B virus (HBV) and human immunodeficiency virus (HIV).

"Branch site" means a physically separate certified site where qualified staff provides a certified treatment service, governed by a parent organization. The branch site is an extension of a certified provider's services to one or more sites.

"Certified treatment service" means a discrete program of chemical dependency treatment offered by a service provider who has a certificate of approval from the department of social and health services, as evidence the provider meets the standards of chapter 388-805 WAC.

"Change in ownership" means one of the following conditions:

(1) When the ownership of a certified chemical dependency treatment provider changes from one distinct legal entity (owner) to a distinct other;

(2) When the type of business changes from one type to another; or

(3) When the current ownership takes on a new owner of five percent or more of the organizational assets.

"Chemical dependency" means a person's alcoholism or drug addiction or both.

"Chemical dependency counseling" means face-to-face individual or group contact using therapeutic techniques that are:

(1) Led by a chemical dependency professional (CDP), or CDP trainee under supervision of a CDP;

(2) Directed toward patients and others who are harmfully affected by the use of mood-altering chemicals or are chemically dependent; and

(3) Directed toward a goal of abstinence for chemically dependent persons.

"Chemical dependency professional" means a person certified as a chemical dependency professional by the Washington state department of health under chapter 18.205 RCW.

"Child" means a person less than eighteen years of age, also known as adolescent, juvenile, or minor.

"County coordinator" means the person designated by the chief executive officer of a county to carry out administrative and oversight responsibilities of the county chemical dependency program.

"Criminal background check" means a search by the Washington state patrol for any record of convictions or civil adjudication related to crimes against children or other persons, including developmentally disabled and vulnerable adults, per RCW 43.43.830 through 43.43.842 relating to the Washington state patrol.

"Danger to self or others," for purposes of WAC 388-805-520, means a youth who resides in a chemical dependency treatment agency and creates a risk of serious harm to the health, safety, or welfare to self or others. Behaviors considered a danger to self or others include:

(1) Suicide threat or attempt;

(2) Assault or threat of assault; or

(3) Attempt to run from treatment, potentially resulting in a dangerous or life-threatening situation.

"Department" means the Washington state department of social and health services.

"Detoxification" or **"detox"** means care and treatment of a person while the person recovers from the transitory effects of acute or chronic intoxication or withdrawal from alcohol or other drugs.

"Disability, a person with" means a person whom:

(1) Has a physical or mental impairment that substantially limits one or more major life activities of the person;

(2) Has a record of such an impairment; or

(3) Is regarded as having such an impairment.

"Discrete treatment service" means a chemical dependency treatment service that:

(1) Provides distinct chemical dependency supervision and treatment separate from any other services provided within the facility;

(2) Provides a separate treatment area for ensuring confidentiality of chemical dependency treatment services; and

(3) Has separate accounting records and documents identifying the provider's funding sources and expenditures of all funds received for the provision of chemical dependency treatment services.

"Domestic violence" means:

(1) Physical harm, bodily injury, assault, or the infliction of fear of imminent physical harm, bodily injury, or assault between family or household members;

(2) Sexual assault of one family or household member by another;

(3) Stalking as defined in RCW 9A.46.110 of one family or household member by another family or household member; or

(4) As defined in RCW 10.99.020, RCW 26.50.010, or other Washington state statutes.

"Drug addiction" means a primary, chronic disease with genetic, psychosocial, and environmental factors influencing its development and manifestations. The disease is often progressive and fatal. Drug addiction is characterized by impaired control over use of drugs, preoccupation with drugs, use of a drug despite adverse consequences, and distortions in thinking, most notably denial. Each of these symptoms may be continuous or periodic.

"Essential requirement" means a critical element of chemical dependency treatment services that must be present in order to provide effective treatment.

"First steps" means a program available across the state for low-income pregnant women and their infants. First steps provides maternity care for pregnant and postpartum women and health care for infants and young children.

"Governing body" means the legal entity responsible for the operation of the chemical dependency treatment service.

"HIV/AIDS brief risk intervention (BRI)" means an individual face-to-face interview with a client or patient, to help that person assess personal risk for HIV/AIDS infection and discuss methods to reduce infection transmission.

"HIV/AIDS education" means education, in addition to the brief risk intervention, designed to provide a person with information regarding HIV/AIDS risk factors, HIV anti-

body testing, HIV infection prevention techniques, the impact of alcohol and other drug use on risks and the disease process, and trends in the spread of the disease.

"Medical practitioner" means a physician, advanced registered nurse practitioner (ARNP), or certified physician's assistant. ARNPs and midwives with prescriptive authority may perform practitioner functions related only to indicated specialty services.

"Misuse" means use of alcohol or other drugs by a person in:

- (1) Violation of any law; or
- (2) Breach of agency policies relating to the drug-free work place.

"Off-site treatment" means provision of chemical dependency treatment by a certified provider at a location where treatment is not the primary purpose of the site; such as in schools, hospitals, or correctional facilities.

"Opiate substitution treatment agency" means an organization that administers or dispenses an approved drug as specified in 212 CFR Part 291 for treatment or detoxification of opiate substitution. The agency is:

- (1) Approved by the Federal Food and Drug Administration;
- (2) Registered with the Federal Drug Enforcement Administration;
- (3) Registered with the State Board of Pharmacy;
- (4) Licensed by the county in which it operates; and
- (5) Certified as an opiate substitution treatment agency by the department.

"Outcomes evaluation" means a system for determining the effectiveness and efficiency of results achieved by patients during or following service delivery, and patient satisfaction with those results for the purpose of program improvement.

"Patient" is a person receiving chemical dependency treatment services from a certified program.

"Patient contact" means time spent with a client or patient to do assessments, individual or group counseling, or education.

"Patient placement criteria (PPC)" means admission, continued service, and discharge criteria found in the Patient Placement Criteria for the Treatment of Substance-Related Disorders as published and revised by the American Society of Addiction Medicine (ASAM).

"Probation assessment officer (PAO)" means a person employed at a certified district or municipal court probation assessment service that meets the PAO requirements of WAC 388-805-220.

"Probation assessment service" means a certified assessment service offered by a misdemeanor probation department or unit within a county or municipality.

"Progress notes" are a permanent record of ongoing assessments of a patient's participation in and response to treatment, and progress in recovery.

"Qualified personnel" means trained, qualified staff, consultants, trainees, and volunteers who meet appropriate legal, licensing, certification, and registration requirements.

"Registered counselor" means a person registered, or certified by the state department of health as required by chapter 18.19 RCW.

"Relocation" means change in location from one office space to a new office space, or moving from one office building to another.

"Remodeling" means expansion of existing office space to additional office space at the same address, or remodeling of interior walls and space within existing office space.

"Restraint," for purposes of WAC 388-805-520, means the use of methods, by a trained staff person, to prevent or limit free body movement in case of out-of-control behavior.

"Restraint" includes:

- (1) Containment or seclusion in an unlocked quiet room;
- (2) Physical restraint, meaning a person physically holds or restricts another person in a safe manner for a short time in an immediate crisis; or
- (3) Use of a safe and humane apparatus, which the person cannot release by oneself.

"Service provider" or **"provider"** means a legally operated entity certified by the department to provide chemical dependency services. The components of a service provider are:

- (1) Legal entity/owner;
- (2) Facility; and
- (3) Staff and services.

"Sexual abuse" means sexual assault, incest, or sexual exploitation.

"Sexual harassment" means unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature when:

- (1) Submission to such conduct is made either explicitly or implicitly a term or condition of employment or treatment; or
- (2) Such conduct interferes with work performance or creates an intimidating, hostile, or offensive work or treatment environment.

"Substance abuse" means a recurring pattern of alcohol or other drug use that substantially impairs a person's functioning in one or more important life areas, such as familial, vocational, psychological, physical, or social.

"Summary suspension" means an immediate suspension of certification, per RCW 34.05.422(4), by the department pending administrative proceedings for suspension, revocation, or other actions deemed necessary by the department.

"Supervision" means:

- (1) Regular monitoring of the administrative, clinical, or clerical work performance of a staff member, trainee, student, volunteer, or employee on contract by a person with the authority to give directions and require change; and
- (2) **"Direct supervision"** means the supervisor is on the premises and available for immediate consultation.

"Suspend" means termination of the department's certification of a provider's treatment services for a specified period or until specific conditions have been met and the department notifies the provider of reinstatement.

"Treatment services" means the broad range of emergency, detoxification, residential, and outpatient services and care. Treatment services include diagnostic evaluation, chemical dependency education, individual and group counseling, medical, psychiatric, psychological, and social services, vocational rehabilitation and career counseling that may be extended to alcoholics and other drug addicts and their families, persons incapacitated by alcohol or other drugs, and intoxicated persons.

"Urinalysis" means analysis of a patient's urine sample for the presence of alcohol or controlled substances by a licensed laboratory or a provider who is exempted from licensure by the department of health:

(1) **"Negative urine"** is a urine sample in which the lab does not detect specific levels of alcohol or other specified drugs; and

(2) **"Positive urine"** is a urine sample in which the lab confirms specific levels of alcohol or other specified drugs.

"Vulnerable adult" means a person who lacks the functional, mental, or physical ability to care for oneself.

"Young adult" means an adult who is eighteen, nineteen, or twenty years old.

"Youth" means a person seventeen years of age or younger.

SECTION II—APPLICATION FOR CERTIFICATION

NEW SECTION

WAC 388-805-010 What chemical dependency services are certified by the department? (1) The department certifies the following types of chemical dependency services:

(a) **Detoxification services**, which assist patients in withdrawing from alcohol and other drugs including:

(i) **Acute detox**, which provides medical care and physician supervision for withdrawal from alcohol or other drugs; and

(ii) **Sub-acute detox**, which is nonmedical detoxification or patient self-administration of withdrawal medications ordered by a physician, provided in a home-like environment.

(b) **Residential treatment services**, which provide chemical dependency treatment for patients and include room and board in a twenty-four-hour-a-day supervised facility, including:

(i) **Intensive inpatient**, a concentrated program of individual and group counseling, education, and activities for detoxified alcoholics and addicts, and their families;

(ii) **Recovery house**, a program of care and treatment with social, vocational, and recreational activities to aid in patient adjustment to abstinence and to aid in job training, employment, or other types of community activities; and

(iii) **Long-term treatment**, a program of treatment with personal care services for chronically impaired alcoholics and addicts with impaired self-maintenance capabilities. These patients need personal guidance to maintain abstinence and good health.

(c) **Outpatient treatment services**, which provide chemical dependency treatment to patients less than twenty-four hours a day, including:

(i) **Intensive outpatient**, a concentrated program of individual and group counseling, education, and activities for detoxified alcoholics and addicts and their families;

(ii) **Outpatient**, individual and group treatment services of varying duration and intensity according to a prescribed plan; and

(iii) **Opiate substitution outpatient treatment**, which meets both outpatient and opiate substitution treatment service requirements.

(d) **Assessment services**, which include:

(i) **ADATSA assessments**, alcohol and other drug assessments of clients seeking financial assistance from the department due to the incapacity of chemical dependency. Services include assessment, referral, case monitoring, and assistance with employment; and

(ii) **DUI assessments**, diagnostic services requested by the courts to determine a client's involvement with alcohol and other drugs and to recommend a course of action.

(e) **Information and assistance services**, which include:

(i) **Alcohol and drug information school**, an education program about the use and abuse of alcohol and other drugs, for persons referred by the courts and others, who do not present a significant chemical dependency problem, to help those persons make informed decisions about the use of alcohol and other drugs;

(ii) **Information and crisis services**, response to persons having chemical dependency needs, by phone or in person;

(iii) **Emergency service patrol**, assistance provided to intoxicated persons in the streets and other public places;

(iv) **Treatment alternatives to street crime (TASC)**, is a referral and case management service. TASC providers furnish a link between the criminal justice system and the treatment system. TASC identifies, assesses, and refers appropriate alcohol and other drug dependent offenders to community-based substance abuse treatment and monitors the outcome for the criminal justice system.

(2) The department may certify a provider for more than one of the services listed under subsection (1) of this section when the provider complies with the specific requirements of the selected services.

NEW SECTION

WAC 388-805-015 How do I apply for certification as a chemical dependency service provider? (1) A potential new chemical dependency service provider, otherwise referred to as applicant, seeking certification for one or more services, as described under WAC 388-805-010, must:

(a) Request from the department an application packet of information on how to become a certified chemical dependency service provider; and

(b) Obtain a license as a residential treatment facility from the department of health, if planning to offer residential services.

(2) The applicant must submit a completed application to the department that includes:

(a) If the applicant is a sole provider: the name and address of the applicant, and a statement of sole proprietorship;

(b) If the applicant is a partnership: the name and address of every partner, and a copy of the written partnership agreement;

(c) If the applicant is a limited liability company: the name and addresses of its officers, and any owner of five percent or more of the organizational assets, and a copy of the certificate of formation issued by the state of Washington, secretary of state;

(d) If the applicant is a corporation: the names and addresses of its officers, board of directors and trustees, and any owner of five percent or more of the organizational assets, and a copy of the corporate articles of incorporation and bylaws;

(e) A copy of the Master Business License authorizing the organization to do business in Washington state;

(f) The Social Security Number or Federal Employer Identification Number for the governing organization or person;

(g) The name of the individual administrator under whose management or supervision the services will be provided;

(h) A copy of the report of findings from a criminal background check of any owner of five percent or more of the organizational assets and the administrator;

(i) Additional disclosure statements or background inquiries if the department has reason to believe that offenses, specified under RCW 43.43.830, have occurred since completion of the original application;

(j) The physical location of the facility where services will be provided including, in the case of a location known only by postal route and box numbers, and the street address;

(k) A plan of the premises assuring the chemical dependency treatment service is discrete from other programs, indicating capacities of the location for the proposed uses;

(l) Floor plan showing use of each room and location of:

(i) Windows and doors;

(ii) Restrooms;

(iii) Floor to ceiling walls;

(iv) Areas serving as confidential counseling rooms;

(v) Other therapy and recreation areas and rooms;

(vi) Confidential patient records storage; and

(vii) Sleeping rooms, if a residential facility.

(m) A completed facility accessibility self-evaluation form;

(n) Policy and procedure manuals specific to the agency at the proposed site, and meet the manual requirements described later in this regulation, including the:

(i) Administrative manual;

(ii) Personnel manual; and

(iii) Clinical manual.

(o) Sample patient records for each treatment service applied for; and

(p) Evidence of sufficient qualified staff to deliver services.

(3) The agency owner or legal representative must:

(a) Sign the completed application form and submit the original to the department;

(b) Send a copy of the completed application form to the county coordinator in the county where services will be provided;

(c) Submit the application fee with the application materials; and

(d) Report any changes occurring during the certification process.

NEW SECTION

WAC 388-805-020 How do I apply for certification of a branch agency or added service? (1) A certified chemical dependency service provider applying for a branch site or an additional certified service must request an abbreviated application packet from the department.

(2) The applicant must submit an abbreviated application, including:

(a) The name of the individual administrator providing management or supervision of the services;

(b) A written declaration that a current copy of the agency policy and procedure manual will be maintained at the branch site and that the manual has been revised to accommodate the differences in business and clinical practices at that site;

(c) An organization chart, showing the relationship of the branch to the main organization, job titles, and lines of authority;

(d) Evidence of sufficient qualified staff to deliver services at the branch site; and

(e) Evidence of meeting the requirements of:

(i) WAC 388-805-015 (1)(b);

(ii) WAC 388-805-015 (2)(h) through (2)(l) and (m); and

(iii) WAC 388-805-015(3).

NEW SECTION

WAC 388-805-030 How do I apply for opiate substitution treatment service certification? In addition to WAC 388-805-015 or 388-805-020 requirements, a potential opiate substitution treatment service provider must submit to the department:

(1) Evidence of licensure from the county served, or evidence the county has authorized a specific certified agency to provide opiate substitution treatment, per RCW 70.96A.400 through 70.96A.420.

(2) A copy of the registration certificate from the Washington state board of pharmacy.

(3) A copy of the application to the Federal Drug Enforcement Administration.

(4) A copy of the application to the Federal Food and Drug Administration.

(5) Policies and procedures identified under WAC 388-805-700 through 388-805-750.

(6) Certification for opiate substitution treatment is contingent on the concurrent approval by the applicable county, state, and federal regulatory authorities.

NEW SECTION

WAC 388-805-060 How does the department conduct an examination of nonresidential facilities? The department must conduct an on-site examination of each new nonresidential applicant's facility or branch facility. The department must determine if the applicant's facility is:

- (1) Substantially as described.
- (2) Suitable for the purposes intended.
- (3) Not a personal residence.
- (4) Approved as meeting all building and safety requirements.

NEW SECTION

WAC 388-805-065 How does the department determine disqualification or denial of an application? The department must consider the ability of each person named in the application to operate in accord with this chapter before the department grants or renews certification of a chemical dependency service.

(1) The department must deny an applicant's certification when any of the following conditions occurred and was not satisfactorily resolved, or when any owner or administrator:

- (a) Had a license or certification for a chemical dependency treatment service or health care agency denied, revoked, or suspended;
- (b) Was convicted of child abuse or adjudicated as a perpetrator of substantiated child abuse;
- (c) Obtained or attempted to obtain a health provider license, certification, or registration by fraudulent means or misrepresentation;
- (d) Committed, permitted, aided, or abetted the commission of an illegal act or unprofessional conduct as defined under chapter 18.130.180 RCW;
- (e) Demonstrated cruelty, abuse, negligence, misconduct, or indifference to the welfare of a patient or displayed acts of discrimination;
- (f) Misappropriated patient property or resources;
- (g) Failed to meet financial obligations or contracted service commitments that affect patient care;
- (h) Has a history of noncompliance with state or federal regulations in an agency with which the applicant has been affiliated;
- (i) Knowingly, or with reason to know, made a false statement of fact or failed to submit necessary information in:
 - (i) The application or materials attached; and
 - (ii) Any matter under department investigation.
- (j) Refused to allow the department access to records, files, books, or portions of the premises relating to operation of the chemical dependency service;
- (k) Willfully interfered with the preservation of material information or attempted to impede the work of an authorized department representative;
- (l) Is in violation of any provision of chapter 70.96A RCW; or

(m) Does not meet criminal background check requirements.

(2) The department may deny certification when an applicant:

- (a) Fails to provide satisfactory application materials; or
- (b) Advertises itself as certified when certification has not been granted, or has been revoked or canceled.

(3) The applicant may appeal department decisions in accord with chapter 34.05 RCW, the Washington Administrative Procedure Act and chapter 388-02 WAC.

NEW SECTION

WAC 388-805-070 What happens after I make application for certification? (1) The department may grant an applicant initial certification after a review of application materials and an on-site visit confirms the applicant has the capacity to operate in compliance with this chapter.

(2) A provider's failure to meet and maintain conditions of the initial certification may result in suspension of certification.

(3) An initial certificate of approval may be issued for up to one year.

(4) The provider must post the certificate in a conspicuous place on the premises.

NEW SECTION

WAC 388-805-075 How do I apply for an exemption?

(1) The department may grant an exemption from compliance with specific requirements in this WAC chapter when a provider submits an exemption request in writing. The provider must assure the exemption request does not:

(a) Jeopardize the safety, health, or treatment of patients; and

(b) Impede fair competition of another service provider.

(2) Providers must submit a signed letter requesting the exemption to the Supervisor, Certification Section, Division of Alcohol and Substance Abuse, P.O. Box 45331, Olympia, WA 98504-5331.

(3) The department must approve or deny all exemption requests in writing.

(4) The department and the provider must maintain a copy of the decision.

SECTION III—CERTIFICATION FEES

NEW SECTION

WAC 388-805-080 What are the fee requirements for certification? (1) The department must set fees to be charged for certification.

(2) Providers must pay certification fees:

(a) At the time of application. One-half of the application fee may be refunded if an application is withdrawn before certification or denial; and

(b) Within thirty days of receiving an invoice.

(3) Payment must be made by check, draft, or money order made payable to the department of social and health services.

PERMANENT

(4) Fees will not be refunded when certification is denied, revoked, or suspended.

NEW SECTION

WAC 388-805-085 What are the fees for agency certification? (1) Application fees:

- (a) New agency \$500
- (b) Branch agency \$500
- (c) Application for adding one or more services \$200
- (d) Change in ownership \$500

(2) Initial and annual certification fees:

- (a) For detoxification and residential services: \$26 per licensed bed
- (b) For nonresidential services:
 - (i) Large size agencies: \$1,125 per year 3,000 or more clients served per year
 - (ii) Medium size agencies: \$750 per year 1,000-2,999 clients served per year
 - (iii) Small size agencies: \$375 per year 0-999 clients served per year
- (c) For agencies certified through deeming per WAC 388-805-0115 \$200 per year

(3) Each year providers must complete a declaration form provided by the department indicating the number of patients served annually, the provider's national accreditation status, and other information necessary for establishing fees and updating certification information.

NEW SECTION

WAC 388-805-090 May certification fees be waived?

(1) Certification fees may be waived when the fees would not be in the interest of public health and safety, or when the fees would be to the financial disadvantage of the state.

(2) Providers may submit a letter requesting a waiver of fees to the Supervisor, Certification Section, Division of Alcohol and Substance Abuse, P.O. Box 45331, Olympia, Washington, 98504-5331.

(3) Fee waivers may be granted to qualified providers who receive funding from tribal, federal, state or county government resources as follows:

- (a) For residential providers: The twenty-six dollar per bed annual fee will be assessed only for those beds not funded by a governmental source;
- (b) For nonresidential providers: The amount of the fee waiver must be determined by the percent of the provider's revenues that come from governmental sources, according to the following schedule:

Percent Government Revenues	90-100%	75-89%	50-74%	0-49%
Small agency	No fee	\$90	\$185	\$375
Medium agency	No fee	\$185	\$375	\$750
Large agency	No fee	\$285	\$565	\$1,125

(4) Requests for fee waiver must be mailed to the department and include the following:

- (a) The reason for the request;
- (b) For residential providers:
 - (i) Documentation of the number of beds currently licensed by the department of health;
 - (ii) Documentation showing the number of beds funded by a government entity including, tribal, federal, state or county government sources.
- (c) For nonresidential providers:
 - (i) Documentation of the number of clients served during the previous twelve-month period;
 - (ii) Documentation showing the amount of government revenues received during the previous twelve-month period;
 - (iii) Documentation showing the amount of private revenues received during the previous twelve-month period.

NEW SECTION

WAC 388-805-095 How long are certificates effective? Certificates are effective for one year from the date of issuance unless:

- (1) The department has taken action for noncompliance under WAC 388-805-065, 388-805-125, or 388-805-130; or
- (2) The provider does not pay required fees.

SECTION IV—MAINTAINING CERTIFICATION

NEW SECTION

WAC 388-805-100 What do I need to do to maintain agency certification? (1) A service provider's continued certification and renewal is contingent upon:

- (a) Completion of an annual declaration of certification; and
- (b) Payment of certification fees, if applicable.
- (2) Providing the essential requirements for chemical dependency treatment, including the following elements:
 - (a) Treatment process:
 - (i) Assessments, as described in WAC 388-805-310;
 - (ii) Treatment planning, as described in WAC 388-805-315 (2)(a) and 388-805-325(11);
 - (iii) Documenting patient progress, as described in WAC 388-805-315 (1)(c) and 388-805-325(13);
 - (iv) Treatment plan reviews and updates, as described in WAC 388-805-315 (2)(b), 388-805-325 (11)(g) and 388-805-325 (13)(c);
 - (v) Patient compliance reports, as described in WAC 388-805-315 (4)(b), 388-805-325(17), and 388-805-330;
 - (vi) Continuing care, and discharge planning, as described in WAC 388-805-315 (2)(e)(f) and (7), and 388-805-325 (18) and (19).

PERMANENT

(b) Staffing: Provide sufficient qualified personnel for the care of patients as described in WAC 388-805-140(4) and 388-805-145(4);

(c) Facility:

(i) Provide sufficient facilities, equipment, and supplies for the care and safety of patients as described in WAC 388-805-140 (4) and (5);

(ii) If a residential provider, be licensed by the department of health as described by WAC 388-805-015 (1)(b).

(3) Findings during periodic on-site surveys and complaint investigations to determine the provider's compliance with this chapter. During on-site surveys and complaint investigations, provider representatives must cooperate with department representatives to:

(a) Examine any part of the facility at reasonable times and as needed;

(b) Review and evaluate records, including patient clinical records, personnel files, policies, procedures, fiscal records, data, and other documents as the department requires to determine compliance; and

(c) Conduct individual interviews with patients and staff members.

(4) The provider must post the notice of a scheduled department on-site survey in a conspicuous place accessible to patients and staff.

(5) The provider must correct compliance deficiencies found at such surveys immediately or as agreed by a plan of correction approved by the department.

NEW SECTION

WAC 388-805-105 What do I need to do for a change in ownership? (1) When a certified chemical dependency service provider plans a change in ownership, the current service provider must submit a change in ownership application form sixty or more days before the proposed date of ownership change.

(2) The current provider must include the following information with the application:

(a) Name and address of each new prospective owner of five percent or more of the organizational assets as required by WAC 388-805-015 (2)(a) through (d);

(b) Current and proposed name (if applicable) of the affected;

(c) Date of the proposed transaction;

(d) A copy of the transfer agreement between the outgoing and incoming owner(s);

(e) If a corporation, the names and addresses of the proposed responsible officers or partners;

(f) A statement regarding the disposition and management of patient records, as described under 42 CFR, Part 2 and WAC 388-805-320; and

(g) A copy of the report of findings from a criminal background check of any new owner of five percent or more of the organizational assets and new administrator when applicable.

(3) The department must determine which, if any, WAC 388-805-015 or 388-805-020 requirements apply to the potential new service provider, depending on the extent of ownership and operational changes.

(4) The department may grant certification to the new owner when the new owner:

(a) Successfully completes the application process; and

(b) Ensures continuation of compliance with rules of this chapter and implementation of plans of correction for deficiencies relating to this chapter, when applicable.

NEW SECTION

WAC 388-805-110 What do I do to relocate or remodel a facility? When a certified chemical dependency service provider plans to relocate or change the physical structure of a facility in a manner that affects patient care, the provider must:

(1) Submit a completed agency relocation approval request form, or a request for approval in writing if remodeling, sixty or more days before the proposed date of relocation or change.

(2) Submit a sample floor plan that includes information identified under WAC 388-805-015 (2)(f) through (k).

(3) Submit a completed facility accessibility self-evaluation form.

(4) Provide for department examination of nonresidential premises before approval, as described under WAC 388-805-060.

(5) Contact the department of health for approval before relocation or remodel if a residential treatment facility.

NEW SECTION

WAC 388-805-115 How does the department deem national accreditation? (1) The department must deem accreditation by a national chemical dependency accreditation body, recognized by the department, if the treatment provider was initially certified by the department and when:

(a) A major portion of the national accreditation body requirements meet or exceed chapter 388-805 WAC requirements;

(b) The national accreditation time intervals meet or exceed state expectations;

(c) The provider notifies the department of scheduled on-site surveys;

(d) The provider promptly sends a copy of survey findings, corrective action plans, and follow-up responses to the department; and

(e) WAC 388-805-001 through 388-805-135 continue to apply at all times.

(2) The department may apply an abbreviated department survey, which includes requirements specific to Washington state at its regular certification intervals.

(3) The department must act upon:

(a) Complaints received; and

(b) Deficiencies cited by the national accreditation body for which there is no evidence of correction.

NEW SECTION

WAC 388-805-120 How does the department assess penalties? (1) When the department determines that a service

provider fails to comply with provider entry requirements or ongoing requirements of this chapter, the department may:

(a) Assess fees to cover costs of added certification activities;

(b) Cease referrals of new patients who are recipients of state or federal funds; and

(c) Notify the county alcohol and drug coordinator and local media of ceased referrals, involuntary cancellations, suspensions, revocations, or nonrenewal of certification.

(2) When the department determines a service provider knowingly failed to report to the court a patient's noncompliance with treatment ordered by the court under chapter 46.61 RCW, the department must assess the provider a fine of two hundred fifty dollars for each incident of nonreporting.

NEW SECTION

WAC 388-805-125 How does the department cancel certification? The department may cancel a provider's certification if the provider:

(1) Ceases to provide services for which the provider is certified.

(2) Voluntarily cancels certification.

(3) Fails to submit required certification fees.

(4) Changes ownership without prior notification and approval.

(5) Relocates without prior notification and approval.

NEW SECTION

WAC 388-805-130 How does the department suspend or revoke certification? (1) The department must suspend or revoke a provider's certification when a disqualifying situation described under WAC 388-805-065 applies to a current service provider.

(2) The department must revoke a provider's certification when the provider knowingly failed to report to the court, within a continuous twelve-month period, three incidents of patient noncompliance with treatment ordered by the court under chapter 46.61 RCW.

(3) The department may suspend or revoke a provider's certification when any of the following provider deficiencies or circumstances occur:

(a) A provider fails to provide the essential requirements of chemical dependency treatment as described in WAC 388-805-100(2), and one or more of the following conditions occur:

(i) Violation of a rule threatens or results in harm to a patient;

(ii) A reasonably prudent provider should have been aware of a condition resulting in significant violation of a law or rule;

(iii) A provider failed to investigate or take corrective or preventive action to deal with a suspected or identified patient care problem;

(iv) Noncompliance occurs repeatedly in the same or similar areas;

(v) There is an inability to attain compliance with laws or rules within a reasonable period of time.

(b) The provider fails to submit an acceptable and timely plan of correction for cited deficiencies; or

(c) The provider fails to correct cited deficiencies.

(4) The department may suspend certification upon receipt of a providers written request. Providers requesting voluntary suspension must submit a written request for reinstatement of certification within one year from the effective date of the suspension. The department will review the request for reinstatement, determine if the provider is able to operate in compliance with certification requirements, and notify the provider of the results of the review for reinstatement.

NEW SECTION

WAC 388-805-135 What is the prehearing, hearing and appeals process? (1) In case of involuntary certification cancellation, suspension, or revocation of the certification, or a penalty for noncompliance, the department must:

(a) Notify the service provider and the county coordinator of any action to be taken; and

(b) Inform the provider of pre-hearing and dispute conferences, hearing, and appeal rights under chapter 388-02 WAC.

(2) The department may order a summary suspension of the provider's certification pending completion of the appeal process when the preservation of public health, safety, or welfare requires emergency action.

SECTION V—ORGANIZATIONAL STANDARDS

NEW SECTION

WAC 388-805-140 What are the requirements for a provider's governing body? The provider's governing body, legally responsible for the conduct and quality of services provided, must:

(1) Appoint an administrator responsible for the day-to-day operation of the program.

(2) Maintain a current job description for the administrator including the administrator's authority and duties.

(3) Establish the philosophy and overall objectives for the treatment services.

(4) Notify the department within thirty days, of changes of the agency administrator.

(5) Provide personnel, facilities, equipment, and supplies necessary for the safety and care of patients.

(6) If a nonresidential provider, ensure:

(a) Safety of patients and staff; and

(b) Maintenance and operation of the facility.

(7) Review and approve written administrative, personnel, and clinical policies and procedures required under WAC 388-805-150, 388-805-200, and 388-805-300.

(8) Ensure the administration and operation of the agency is in compliance with:

(a) Chapter 388-805 WAC requirements;

(b) Applicable federal, state, and local laws and rules; and

(c) Federal, state, and local licenses, permits, and approvals.

NEW SECTION

WAC 388-805-145 What are the key responsibilities required of an agency administrator? (1) The administrator is responsible for the day-to-day operation of the certified treatment service, including:

- (a) All administrative matters;
- (b) Patient care services; and
- (c) Meeting all applicable rules and ethical standards.

(2) When the administrator is not on duty or on call, a staff person must be delegated the authority and responsibility to act in the administrator's behalf.

(3) The administrator must ensure administrative, personnel, and clinical policy and procedure manuals:

- (a) Are developed and adhered to; and
- (b) Are reviewed and revised as necessary, and at least annually.

(4) The administrator must employ sufficient qualified personnel to provide adequate chemical dependency treatment, facility security, patient safety and other special needs of patients.

(5) The administrator must ensure all persons providing counseling services are registered, certified or licensed by the department of health.

(6) The administrator must ensure full-time chemical dependency professionals (CDPs) or CDP trainees do not exceed one hundred twenty hours of patient contact per month.

(7) The administrator must assign the responsibilities for a clinical supervisor to a least one person within the organization.

NEW SECTION

WAC 388-805-150 What must be included in an agency administrative manual? Each service provider must have and adhere to an administrative manual that contains at a minimum:

- (1) The organization's:
 - (a) Articles and certificate of incorporation if the owner is a corporation;
 - (b) Partnership agreement if the owner is a partnership;

or

- (c) Statement of sole proprietorship.
- (2) The agency's bylaws if the owner is a corporation.
- (3) Copies of a current master license and state business licenses or a current declaration statement that they are updated as required.

(4) The provider's philosophy on and objectives of chemical dependency treatment with a goal of total abstinence, consistent with RCW 70.96A.011.

(5) Policies and procedures describing how services will be made sensitive to the needs of each patient, including assurance that:

- (a) Certified interpreters or other acceptable alternatives are available for persons with limited English-speaking proficiency and persons having a sensory impairment; and

(b) Assistance will be provided to persons with disabilities in case of an emergency.

(6) A policy addressing special needs and protection for youth and young adults, and for determining whether a youth or young adult can fully participate in treatment, before admission of:

- (a) A youth to a treatment service caring for adults; or
- (b) A young adult to a treatment service caring for youth.
- (7) An organization chart specifying:
 - (a) The governing body;
 - (b) Each staff position by job title, including volunteers, students, and persons on contract; and
 - (c) The number of full- or part-time persons for each position.

(8) A delegation of authority policy.

(9) A copy of current fee schedules.

(10) Policies and procedures implementing state and federal regulations on patient confidentiality, including provision of a summary of 42 CFR Part 2.22 (a)(1) and (2) to each patient.

(11) Policies and procedures for reporting suspected child abuse and neglect.

(12) Policies and procedures for reporting the death of a patient to the department when:

- (a) The patient is in residence; or
- (b) An outpatient dies on the premises.

(13) Patient grievance policy and procedures.

(14) Policies and procedures on reporting of incidents and actions taken.

(15) Smoking policies consistent with the Washington Clean Indoor Air Act, chapter 70.160 RCW.

(16) For a residential provider, a facility security policy and procedures, including:

- (a) Preventing entry of unauthorized visitors; and
- (b) Use of passes for leaves of patients.

(17) For a nonresidential provider, an evacuation plan for use in the event of a disaster, addressing:

- (a) Communication methods for patients, staff, and visitors including persons with a visual or hearing impairment or limitation;
- (b) Evacuation of mobility-impaired persons;
- (c) Evacuation of children if child care is offered;
- (d) Different types of disasters;
- (e) Placement of posters showing routes of exit; and
- (f) The need to mention evacuation routes at public meetings.

NEW SECTION

WAC 388-805-155 What are the requirements for provider facilities? (1) The administrator must ensure the treatment service site:

- (a) Is accessible to a person with a disability;
- (b) Has a reception area separate from living and therapy areas;
- (c) Has adequate private space for personal consultation with a patient, staff charting, and therapeutic and social activities, as appropriate;
- (d) Has secure storage of active and closed confidential patient records; and

- (e) Has one private room available if youth are admitted to a detox or residential facility.
- (2) The administrator of a nonresidential facility must ensure:
 - (a) Evidence of a current fire inspection approval;
 - (b) Facilities and furnishings are kept clean, in good repair;
 - (c) Adequate lighting, heating, and ventilation; and
 - (d) Separate and secure storage of toxic substances, which are used only by staff or supervised persons.

SECTION VI—HUMAN RESOURCE MANAGEMENT

NEW SECTION

WAC 388-805-200 What must be included in an agency personnel manual? The administrator must have and adhere to a personnel manual, which contains policies and procedures describing how the agency:

- (1) Meets the personnel requirements of WAC 388-805-210 through 388-805-260.
- (2) Conducts criminal background checks on its employees in order to comply with the rules specified in RCW 43.43.830 through 43.43.842.
- (3) Provides for a drug free work place which includes:
 - (a) A philosophy of nontolerance of illegal drug-related activity;
 - (b) Agency standards of prohibited conduct; and
 - (c) Actions to be taken in the event a staff member misuses alcohol or other drugs.
- (4) If a nonresidential provider, provides for prevention and control of communicable disease, including specific training and procedures on:
 - (a) Bloodborne pathogens, including HIV/AIDS and Hepatitis B;
 - (b) Tuberculosis; and
 - (c) Other communicable diseases.
- (5) Provides staff orientation prior to assigning unsupervised duties, including orientation to:
 - (a) The administrative, personnel and clinical manuals;
 - (b) Staff ethical standards and conduct, including reporting of unprofessional conduct to appropriate authorities;
 - (c) Staff and patient grievance procedures; and
 - (d) The facility evacuation plan.

NEW SECTION

WAC 388-805-205 What are agency personnel file requirements? (1) The administrator must ensure that there is a current personnel file for each employee, trainee, student, and volunteer, and for each contract staff person who provides or supervises patient care.

- (2) The administrator must designate a person to be responsible for management of personnel files.
- (3) Each person's file must contain:
 - (a) A copy of the results of a tuberculin skin test or evidence the person has completed a course of treatment approved by a physician or local health officer if the results are positive;

(b) Documentation of training on bloodborne pathogens, including HIV/AIDS and hepatitis B for all employees, volunteers, students, and treatment consultants on contract;

- (i) At the time of staff's initial assignment to tasks where occupational exposure may take place;
- (ii) Annually thereafter for bloodborne pathogens;
- (c) A signed and dated commitment to maintain patient confidentiality in accordance with state and federal confidentiality requirements; and
- (d) A record of an orientation to the agency as described in WAC 388-805-200(5).

(4) For residential facilities, documentation of current cardiopulmonary resuscitation (CPR) and first aid training for at least one person on each shift.

(5) Documentation of health department training and approval for any staff administering or reading a TB test.

(6) Employees who are patients or have been patients of the agency must have personnel records:

- (a) Separate from clinical records; and
- (b) Have no indication of current or previous patient status.

(7) In addition, each patient care staff member's personnel file must contain:

(a) Verification of qualifications for their assigned position including:

(i) For a chemical dependency professional (CDP): A copy of the person's valid CDP certification issued by the department of health (DOH);

(ii) For approved supervisors: Documentation to substantiate the person meets the qualifications of an approved supervisor as defined in WAC 246-811-010.

(iii) For other persons providing counseling, a copy of a valid registration, certification, or license issued by the DOH.

(iv) For probation assessment officers (PAO): Documentation that the person has met the education and experience requirements described in WAC 388-805-220;

(v) For probation assessment officer trainees:

(A) Documentation that the person meets the qualification requirements described in WAC 388-805-225; and

(B) Documentation of the PAO trainee's supervised experience as described in WAC 388-805-230 including an individual education and experience plan and documentation of progress toward completing the plan.

(vi) For information school instructors:

(A) A copy of a certificate of completion of an alcohol and other drug information school instructor's training course approved by the department; and

(B) Documentation of continuing education as specified in WAC 388-805-250.

(b) A copy of a current job description, signed and dated by the employee and supervisor which includes:

- (i) Job title;
- (ii) Minimum qualifications for the position;
- (iii) Summary of duties and responsibilities;
- (iv) For contract staff, formal agreements or personnel contracts, which describe the nature and extent of patient care services, may be substituted for job descriptions.

(c) A written performance evaluation for each year of employment:

- (i) Conducted by the immediate supervisor of each staff member; and
- (ii) Signed and dated by the employee and supervisor.

NEW SECTION

WAC 388-805-210 What are the requirements for approved supervisors of chemical dependency professional trainees? (1) When an administrator decides to provide training opportunities for persons seeking to become chemical dependency professionals (CDP) trainees, the administrator must assign an approved supervisor, as defined in WAC 388-805-005, to each CDP trainee.

(2) Approved supervisors must provide the CDP trainees assigned to them with documentation substantiating their qualifications as an approved supervisor before the initiation of training.

(3) Approved supervisors must decrease the hours of patient contact allowed under WAC 388-805-145(6) by twenty percent for each full-time CDP trainee supervised.

(4) Approved supervisors are responsible for all patients assigned to the CDP trainees under their supervision.

(5) An approved supervisor must provide supervision to a CDP trainee as required by WAC 246-811-048.

(6) CDPs must review and co-authenticate all clinical documentation of CDP trainees.

(7) Approved supervisors must supervise, assess and document the progress the CDP trainees under their supervision are making toward meeting the requirements described in WAC 246-811-030 and 246-811-047. This documentation must be provided to trainees upon request.

NEW SECTION

WAC 388-805-220 What are the requirements to be a probation assessment officer? A probation assessment officer (PAO), must:

(1) Be employed as a probation officer at a misdemeanor probation department or unit within a county or municipality;

(2) Be certified as a chemical dependency professional, or

(3) Have obtained a bachelor's or graduate degree in a social or health sciences field and have completed twelve quarter or eight semester credits from an accredited college or university in courses that include the following topics:

(a) Understanding addiction and the disease of chemical dependency;

(b) Pharmacological actions of alcohol and other drugs;

(c) Substance abuse and addiction treatment methods;

(d) Understanding addiction placement, continuing care, and discharge criteria, including ASAM PPC criteria;

(e) Cultural diversity including people with disabilities and it's implication for treatment;

(f) Chemical dependency clinical evaluation (screening and referral to include co-morbidity);

(g) HIV/AIDS brief risk intervention for the chemically dependent;

(h) Chemical dependency confidentiality;

(i) Chemical dependency rules and regulations.

(4) In addition, a PAO must complete:

(a) Two thousand hours of supervised experience as a PAO trainee in a state-certified DUI assessment service program if a PAO possesses a baccalaureate degree;

(b) One thousand five hundred hours of experience as a PAO trainee in a state-certified DUI assessment service program if a PAO possesses a masters or higher degree.

(5) PAOs, must complete fifteen clock hours of continuing education each year in chemical dependency subject areas which will enhance competency as a PAO beginning on January 1 of the year following the year of initial qualification.

(6) A PAO is grandparented if they were qualified as a PAO by June 30, 2000, under WAC 440-22-240(2).

NEW SECTION

WAC 388-805-225 What are the requirements to be a probation assessment officer trainee? A probation assessment officer (PAO) trainee must:

(1) Be employed as a probation officer at a misdemeanor probation department or unit within a county or municipality; and

(2) Be directly supervised and tutored by a PAO.

NEW SECTION

WAC 388-805-230 What are the requirements for supervising probation assessment officer trainees? (1) Probation assessment officers (PAO) are responsible for all offenders assigned to PAO trainees under their supervision.

(2) PAO trainee supervisors must:

(a) Review and co-authenticate all trainee assessments entered in each offender's assessment record;

(b) Assist the trainee to develop and maintain an individualized education and experience plan (IEEP) designed to assist the trainee in obtaining the education and experience necessary to become a PAO;

(c) Provide the trainee orientation to the various laws and regulations that apply to the delivery of chemical dependency assessment and treatment services;

(d) Instruct the trainee in assessment methods and the transdisciplinary foundations described in the addiction counseling competencies;

(e) Observe the trainee conducting assessments; and

(f) Document quarterly evaluations of the progress of each trainee.

NEW SECTION

WAC 388-805-240 What are the requirements for student practice in treatment agencies? (1) The treatment provider must have a written agreement with each educational institution using the treatment agency as a setting for student practice.

(2) The written agreement must describe the nature and scope of student activity at the treatment setting and the plan for supervision of student activities.

(3) Each student and academic supervisor must sign a confidentiality statement, which the provider must retain.

NEW SECTION

WAC 388-805-250 What are the requirements to be an information school instructor? (1) An information school instructor must:

(a) Have a certificate of completion of an alcohol and other drug information school instructor's training course approved by the department; and

(b) Not have a history of alcohol or other drug misuse for two years before being qualified by the department.

(2) To remain qualified, the information school instructor must:

(a) Not display misuse of alcohol or other drugs while serving as an information school instructor; and

(b) Maintain information school instructor status by completing fifteen clock hours of continuing education:

(i) During each two-year period beginning January of the year following initial qualification; and

(ii) In subject areas that increase knowledge and skills in training, teaching techniques, curriculum planning and development, presentation of educational material, laws and rules, and developments in the chemical dependency field.

NEW SECTION

WAC 388-805-260 What are the requirements for using volunteers in a treatment agency? (1) Each volunteer assisting a provider must be oriented as required under WAC 388-805-200(5).

(2) A volunteer must meet the qualifications of the position to which the person is assigned.

(3) A volunteer may provide counseling services when the person meets the requirements for a chemical dependency professional trainee or is a chemical dependency professional.

SECTION VII—PROFESSIONAL PRACTICES

NEW SECTION

WAC 388-805-300 What must be included in the agency clinical manual? Each chemical dependency service provider must have and adhere to a clinical manual containing patient care policies and procedures, including:

(1) How the provider meets WAC 388-805-305 through 388-805-350 requirements.

(2) How the provider will meet applicable certified service requirements of WAC 388-805-400 through 388-805-840, including a description of each service offered, detailing:

(a) The number of hours of treatment and education for each certified service; and

(b) Allowance of up to twenty percent of education time to consist of film or video presentations.

(3) Identification of resources and referral options so staff can make referrals required by law and as indicated by patient needs.

(4) Assurance that there is an identified clinical supervisor who:

(a) Is a chemical dependency professional (CDP);

(b) Reviews a sample of patient records of each CDP quarterly; and

(c) Ensures implementation of assessment, treatment, continuing care, transfer and discharge plans in accord with WAC 388-805-315.

(5) Patient admission and discharge criteria using PPC:

(a) The administrator must not admit or retain a person unless the person's treatment needs can be met;

(b) A chemical dependency professional (CDP), or a CDP trainee under supervision of a CDP, must assess and refer each patient to the appropriate treatment service; and

(c) A person needing detoxification must immediately be referred to a detoxification provider, unless the person needs acute care in a hospital.

(6) Tuberculosis screening for prevention and control of TB in all detox, residential, and outpatient programs, including:

(a) Obtaining a history of preventive or curative therapy;

(b) Screening and related procedures for coordinating with the local health department; and

(c) Implementing TB control as provided by the department of health TB control program.

(7) HIV/AIDS information, brief risk intervention, and referral.

(8) Limitation of group counseling sessions to twelve or fewer patients.

(9) Counseling sessions with nine to twelve youths to include a second adult staff member.

(10) Provision of education to each patient on:

(a) Alcohol, other drugs, and chemical dependency;

(b) Relapse prevention; and

(c) HIV/AIDS, hepatitis, and TB.

(11) Provision of education or information to each patient on:

(a) The impact of chemical use during pregnancy, risks to the fetus, and the importance of informing medical practitioners of chemical use during pregnancy;

(b) Emotional, physical, and sexual abuse; and

(c) Nicotine addiction.

(12) An outline of each lecture and education session included in the service, sufficient in detail for another trained staff person to deliver the session in the absence of the regular instructor.

(13) Assigning of work to a patient by a CDP when the assignment:

(a) Is part of the treatment program; and

(b) Has therapeutic value.

(14) Use of self-help groups.

(15) Patient rules and responsibilities, including disciplinary sanctions for noncomplying patients.

(16) If youth are admitted, a policy and procedure for assessing the need for referral to child welfare services.

(17) Implementation of the deferred prosecution program.

(18) Policy and procedures for reporting status of persons convicted under chapter 46.61 RCW to the department of licensing.

(19) Nonresidential providers must have policies and procedures on:

- (a) Medical emergencies;
- (b) Suicidal and mentally ill patients;
- (c) Medical oversight, including provision of a physical examination by a medical practitioner, on a person who:
 - (i) Is at risk of withdrawal from barbiturates or benzodiazepines; or
 - (ii) Used intravenous drugs in the thirty days before admission;
 - (d) Laboratory tests;
 - (e) Services and resources for pregnant women:
 - (i) A pregnant woman who is not seen by a private physician must be referred to a physician or the local first steps maternity care program for determination of prenatal care needs; and
 - (ii) Services include discussion of pregnancy specific issues and resources.
 - (f) If using medication services:
 - (i) A medical practitioner must evaluate each patient who is taking disulfiram at least once every ninety days;
 - (ii) Patient medications are stored, disbursed, and recorded in accord with chapter 246-326 WAC; and
 - (iii) Only a licensed nurse or medical practitioner may administer medication.

NEW SECTION

WAC 388-805-305 What are patients' rights requirements in certified agencies? (1) Each service provider must ensure each patient:

- (a) Is admitted to treatment without regard to race, color, creed, national origin, religion, sex, sexual orientation, age, or disability, except for bona fide program criteria;
- (b) Is reasonably accommodated in case of sensory or physical disability, limited ability to communicate, limited English proficiency, and cultural differences;
- (c) Is treated in a manner sensitive to individual needs and which promotes dignity and self-respect;
- (d) Is protected from invasion of privacy except that staff may conduct reasonable searches to detect and prevent possession or use of contraband on the premises;
- (e) Has all clinical and personal information treated in accord with state and federal confidentiality regulations;
- (f) Has the opportunity to review their own treatment records in the presence of the administrator or designee;
- (g) Has the opportunity to have clinical contact with a same gender counselor, if requested and determined appropriate by the supervisor, either at the agency or by referral;
- (h) Is fully informed regarding fees charged, including fees for copying records to verify treatment and methods of payment available;
- (i) Is provided reasonable opportunity to practice the religion of their choice as long as the practice does not infringe on the rights and treatment of others or the treatment service. The patient has the right to refuse participation in any religious practice;
- (j) Is allowed necessary communication:
 - (i) Between a minor and a custodial parent or legal guardian;

- (ii) With an attorney; and
- (iii) In an emergency.
- (k) Is protected from abuse by staff at all times, or from other patients who are on agency premises, including:
 - (i) Sexual abuse or harassment;
 - (ii) Sexual or financial exploitation;
 - (iii) Racism or racial harassment; and
 - (iv) Physical abuse or punishment.
- (l) Is fully informed and receives a copy of counselor disclosure requirements established under RCW 18.170.060;
- (m) Receives a copy of patient grievance procedures upon request; and
- (n) In the event of an agency closure or treatment service cancellation, each patient must be:
 - (i) Given thirty days notice;
 - (ii) Assisted with relocation;
 - (iii) Given refunds to which the person is entitled; and
 - (iv) Advised how to access records to which the person is entitled.
- (2) A service provider must obtain patient consent for each release of information to any other person or entity. This consent for release of information must include:
 - (a) Name of the consenting patient;
 - (b) Name or designation of the provider authorized to make the disclosure;
 - (c) Name of the person or organization to whom the information is to be released;
 - (d) Nature of the information to be released, as limited as possible;
 - (e) Purpose of the disclosure, as specific as possible;
 - (f) Specification of the date or event on which the consent expires;
 - (g) Statement that the consent can be revoked at any time, except to the extent that action has been taken in reliance on it;
 - (h) Signature of the patient or parent, guardian, or authorized representative, when required, and the date; and
 - (i) A statement prohibiting further disclosure unless expressly permitted by the written consent of the person to whom it pertains.
- (3) A service provider must notify patients that outside persons or organizations which provide services to the agency are required by written agreement to protect patient confidentially.
- (4) A service provider must notify an ADATSA recipient of the recipient's additional rights as required by WAC 388-800-0090.
- (5) The administrator must ensure a copy of patients' rights is given to each patient receiving services, both at admission and in case of disciplinary discharge.
- (6) The administrator must post a copy of patients' rights in a conspicuous place in the facility accessible to patients and staff.

NEW SECTION

WAC 388-805-310 What are the requirements for chemical dependency assessments? A chemical dependency professional (CDP), or a CDP trainee under supervision of a CDP, must conduct and document an assessment of

each client's involvement with alcohol and other drugs. The CDP's assessment must include:

(1) A face-to-face diagnostic interview with each client to obtain, review, evaluate, and document the following:

(a) A history of the client's involvement with alcohol and other drugs, including:

- (i) The type of substances used;
- (ii) The route of administration; and
- (iii) Amount, frequency, and duration of use.

(b) History of alcohol or other drug treatment or education;

(c) The client's self-assessment of use of alcohol and other drugs;

- (d) A relapse history; and
- (e) A legal history.

(2) If the client is in need of treatment, a multidimensional assessment of the person's:

- (a) Acute intoxication and/or withdrawal risk;
- (b) Biomedical conditions and complications;
- (c) Emotional/behavioral conditions and complications;
- (d) Treatment acceptance/resistance;
- (e) Relapse/continued use potential; and
- (f) Recovery environment.

(3) If an assessment is conducted on a youth, and the client is in need of treatment, the CDP, or CDP trainee under supervision of a CDP, must also obtain the following information:

(a) Parental and sibling use of drugs;

(b) History of school assessments for learning disabilities or other problems, which may affect ability to understand written materials;

(c) Past and present parent/guardian custodial status, including running away and out-of-home placements;

(d) History of emotional or psychological problems;

(e) History of child or adolescent developmental problems; and

(f) Ability of parents/guardians to participate in treatment.

(4) Documentation of the information collected, including:

(a) A written summary interpreting the data gathered in subsections (1), (2), and (3) of this section including patient strengths and needs for each dimension;

(b) A diagnostic assessment statement including applicable criteria and severity of involvement with alcohol and other drugs;

(c) A statement regarding provision of an HIV/AIDS brief risk intervention, and referrals made; and

(d) Evidence the client:

(i) Was notified of the assessment results; and

(ii) Documentation of treatment options provided, and the client's choice; or

(iii) If the client was not notified of the results and advised of referral options, the reason must be documented.

(5) Documentation of the treatment recommended, using PPC.

(6) Completion and submission of all reports required by the courts, department of licensing, and department of social and health services in a timely manner.

(7) Referral of an adult or minor who requires assessment for involuntary chemical dependency treatment to the county-designated chemical dependency specialist.

NEW SECTION

WAC 388-805-315 What are the requirements for treatment, continuing care, transfer, and discharge plans? (1) A chemical dependency professional (CDP), or a CDP trainee under supervision of a CDP, must be responsible for the overall treatment plan for each patient, including:

(a) Patient involvement in treatment planning;

(b) Documentation of progress toward patient attainment of goals; and

(c) Completeness of patient records.

(2) A CDP or a CDP trainee under supervision of a CDP must:

(a) Develop the individualized treatment plan based on PPC;

(b) Conduct individual and group counseling;

(c) Evaluate the patient and conduct ongoing assessments in accord with PPC. In cases where it is not possible to place or provide the patient with the clinically indicated treatment, the reason must be documented as well as whether other treatment will be provided;

(d) Update the treatment plan, and determine continued service needs using PPC;

(e) Develop the continuing care plan using PPC; and

(f) Complete the discharge summary using PPC.

(3) A CDP, or CDP trainee under supervision of a CDP, must also include in the treatment plan for youth problems identified in specific youth assessment, including any referrals to school and community support services.

(4) A CDP, or CDP trainee under supervision of a CDP, must follow up when a patient misses an appointment to:

(a) Try to motivate the patient to stay in treatment; and

(b) Report a noncompliant patient to the committing authority as appropriate.

(5) A CDP, or CDP trainee under supervision of a CDP, must involve each patient's family or other support persons, when the patient gives written consent:

(a) In the treatment program; and

(b) In self-help groups.

(6) When transferring a patient from one certified treatment service to another within the same agency, at the same location, a CDP, or a CDP trainee under supervision of a CDP, must:

(a) Update the patient assessment and treatment plan using PPC; and

(b) Provide a summary report of the patient's treatment and progress, in the patient's record. In detox, this may be done by a nurse or physician.

(7) A CDP, or CDP trainee under supervision of a CDP, must meet with each patient at the time of discharge from any treatment agency, unless in detox or when a patient leaves treatment without notice, to:

(a) Finalize a continuing care plan using PPC to assist in determining appropriate recommendation for care;

(b) Assist the patient in making contact with necessary agencies or services; and

(c) Provide the patient a copy of the plan.

(8) When transferring a patient to another treatment provider, the current provider must forward copies of the following information to the receiving provider when a release of confidential information is signed by the patient:

(a) Patient demographic information;

(b) Diagnostic assessment statement and other assessment information, including:

(i) Documentation of the HIV/AIDS intervention;

(ii) TB test result;

(iii) A record of the patient's detox and treatment history;

(iv) The reason for the transfer, based on using PPC; and

(v) Court mandated or agency recommended follow-up treatment.

(c) Discharge summary; and

(d) The plan for continuing care or treatment.

(9) A CDP, or CDP trainee under supervision of a CDP, must complete a discharge summary, within seven days of each patient's discharge from the agency, which includes:

(a) The date of discharge or transfer;

(b) A summary of the patient's progress toward each treatment goal, except in detox; and

(c) In detox, a summary of the patient's physical condition.

NEW SECTION

WAC 388-805-320 What are the requirements for a patient record system? Each service provider must have a comprehensive patient record system maintained in accord with recognized principles of health record management. The provider must ensure:

(1) A designated individual is responsible for the record system;

(2) A secure storage system which:

(a) Promotes confidentiality of and limits access to both active and inactive records; and

(b) Protects active and inactive files from damage during storage.

(3) Patient record policies and procedures on:

(a) Who has access to records;

(b) Content of active and inactive patient records;

(c) A systematic method of identifying and filing individual patient records so each can be readily retrieved;

(d) Assurance that each patient record is complete and authenticated by the person providing the observation, evaluation, or service;

(e) Retention of patient records for a minimum of five years after the discharge or transfer of the patient; and

(f) Destruction of patient records.

(4) In addition to subsection (1) through (3) of this section, providers maintaining electronic patient records must:

(a) Make records available in paper form upon request:

(i) For review by the department;

(ii) By patients requesting record review as authorized by WAC 388-805-305 (1)(f).

(b) Provide secure, limited access through means that prevent modification or deletion after initial preparation;

(c) Provide for back up of records in the event of equipment, media or human error;

(d) Provide for protection from unauthorized access, including network and Internet access.

(5) In case of an agency closure, the provider closing its treatment agency must arrange for the continued management of all patient records. The closing provider must notify the department in writing of the mailing and street address where records will be stored and specify the person managing the records. The closing provider may:

(a) Continue to manage the records and give assurance they will respond to authorized requests for copies of patient records within a reasonable period of time;

(b) Transfer records of patients who have given written consent to another certified provider;

(c) Enter into a qualified service organization agreement with a certified provider to store and manage records, when the outgoing provider will no longer be a chemical dependency treatment provider; or

(d) In the event none of the arrangements listed in (a) through (c) of this subsection can be made, the closing provider must arrange for transfer of patient records to the department.

NEW SECTION

WAC 388-805-325 What are the requirements for patient record content? The service provider must ensure patient record content includes:

(1) Demographic information;

(2) A chemical dependency assessment and history of involvement with alcohol and other drugs;

(3) Documentation the patient was informed of the diagnostic assessment and options for referral or the reason not informed;

(4) A report of a physical examination by a medical practitioner in accord with a nonresidential provider's policy on medical oversight, when a patient is at risk of withdrawal from barbiturates or benzodiazepines, or used intravenous drugs within thirty days of admission;

(5) Documentation the patient was informed of federal confidentiality requirements and received a copy of the patient notice required under 42 CFR, Part 2;

(6) Treatment service rules, translated when needed, signed and dated by the patient before beginning treatment;

(7) Voluntary consent to treatment signed and dated by the patient, parent or legal guardian, except as authorized by law for protective custody and involuntary treatment;

(8) Evidence of counselor disclosure information, acknowledged by the provider and patient by signature and date;

(9) Evidence of a tuberculosis test and results;

(10) Evidence of the HIV/AIDS brief risk intervention;

(11) Initial and updated individual treatment plans, including results of the initial assessment and periodic reviews, addressing:

(a) Patient biopsychosocial problems;

(b) Short- and long-term treatment goals;

(c) Estimated dates for completion of each treatment goal;

- (d) Approaches to resolve the problems;
- (e) Identification of persons responsible for implementing the approaches;
- (f) Medical orders, if appropriate.
- (12) Documentation of referrals made for specialized care or services;
- (13) At least weekly individualized documentation of ongoing services in residential services, and as required in intensive outpatient and outpatient services, including:
 - (a) Date, duration, and content of counseling and other treatment sessions;
 - (b) Ongoing assessments of each patient's participation in and response to treatment and other activities;
 - (c) Progress notes as events occur, each shift in detox, and treatment plan reviews as specified under each treatment service of chapter 388-805 WAC; and
 - (d) Documentation of missed appointments.
- (14) Medication records, if applicable;
- (15) Laboratory reports, if applicable;
- (16) Properly completed authorizations for release of information;
- (17) Copies of all correspondence related to the patient, including reports of noncompliance;
- (18) A copy of the continuing care plan signed and dated by the CDP and the patient; and
- (19) The discharge summary.

NEW SECTION

WAC 388-805-330 What are the requirements for reporting patient noncompliance? The following standards define patient noncompliance behaviors and set minimum time lines for reporting these behaviors to the appropriate court. Chemical dependency service providers failing to report patient noncompliance with court ordered or deferred prosecution treatment requirements may be considered in violation of chapter 46.61 or 10.05 RCW reporting requirements and be subject to penalties specified in WAC 388-805-120, 388-805-125, and 388-805-130.

(1) For emergent noncompliance: The following noncompliance is considered emergent noncompliance and must be reported to the appropriate court within three working days from obtaining the information:

- (a) Patient failure to maintain abstinence from alcohol and other nonprescribed drugs as verified by patient self-report, identified third party report confirmed by the agency, or blood alcohol content or other laboratory test;
- (b) Patient reports a subsequent alcohol/drug related arrest;
- (c) Patient leaves program against program advice or is discharged for rule violation.

(2) For nonemergent noncompliance: The following noncompliance is considered nonemergent noncompliance and must be reported to the appropriate court as required by subsection (3) and (4) of this section:

- (a) Patient has unexcused absences or failure to report. Agencies must report all patient unexcused absences, including failure to attend self-help groups. Report failure of patient to provide agency with documentation of attendance at self-help groups if under a deferred prosecution order or

required by the treatment plan. In providing this report, include the agency's recommendation for action.

(b) Patient failure to make acceptable progress in any part of the treatment plan. Report details of the patient's non-compliance behavior along with a recommendation for action.

(3) If a court accepts monthly progress reports, nonemergent noncompliance may be reported in monthly progress reports, which must be mailed to the court within ten working days from the end of each reporting period.

(4) If a court does not wish to receive monthly reports and only requests notification of noncompliance or other significant changes in patient status, the reports should be transmitted as soon as possible, but in no event longer than ten working days from the date of the noncompliance.

SECTION VIII—OUTCOMES EVALUATION

NEW SECTION

WAC 388-805-350 What are the requirements for outcomes evaluation? Each service provider must develop and implement policies and procedures for outcomes evaluation, to monitor and evaluate outcomes for the purpose of program improvement. Outcomes evaluation includes:

- (1) A program description of:
 - (a) Measurable program objectives in the areas of effectiveness, efficiency, and patient satisfaction;
 - (b) Baseline measurement of program objectives; and measurement of outcomes at least two of the following times:
 - (i) during treatment, or
 - (ii) at discharge, or
 - (iii) after treatment.
- (2) Use of the results.
- (3) Measurement of a representative sample of patients served by the treatment provider.

SECTION IX—PROGRAM SERVICE STANDARDS

NEW SECTION

WAC 388-805-400 What are the requirements for detoxification providers? Detoxification services include acute and subacute services. To be certified to offer detoxification services, a provider must:

- (1) Meet WAC 388-805-001 through 388-805-350 requirements; and
- (2) Meet relevant requirements of chapter 246-326 WAC.

NEW SECTION

WAC 388-805-410 What are the requirements for detox staffing and services? (1) The service provider must ensure staffing as follows:

- (a) A chemical dependency professional (CDP), or a CDP trainee under supervision of a CDP, must assess, counsel, and attempt to motivate each patient for referral;

(b) Other staff as necessary to provide services needed by each patient;

(c) All personnel providing patient care, except licensed staff and CDPs, must complete a minimum of forty hours of documented training before assignment of patient care duties. The personnel training must include:

- (i) Chemical dependency;
- (ii) HIV/AIDS and hepatitis B education;
- (iii) TB prevention and control; and
- (iv) Detox screening, admission, and signs of trauma.

(d) All personnel providing patient care must have current training in:

- (i) Cardio-pulmonary resuscitation (CPR); and
- (ii) First aid.

(2) The service provider must ensure detoxification services include:

(a) Screening of each person before admission by a person knowledgeable about alcoholism and other addictions and skilled in observation and eliciting information;

(b) A chemical dependency assessment, which must be attempted within forty-eight hours of a patient's admission;

(c) Counseling of each patient by a CDP, or CDP trainee under supervision of a CDP, at least once:

- (i) Regarding the patient's chemical dependency; and
- (ii) Attempting to motivate each person to accept referral into a continuum of care for chemical dependency treatment.

(d) Sleeping arrangements that permit observation of patients;

(e) Separate sleeping rooms for youth and adults; and

(f) Referral of each patient to other appropriate treatment services.

NEW SECTION

WAC 388-805-500 What are the requirements for residential providers? To be certified to offer intensive inpatient, recovery, or long-term residential services, a provider must meet the requirements of:

(1) WAC 388-805-001 through 388-805-350;

(2) WAC 388-805-510 through 388-805-550 as applicable; and

(3) Chapter 246-326 WAC as required for department of health licensing.

NEW SECTION

WAC 388-805-510 What are the requirements for residential providers admitting youth? A residential service provider admitting youth must ensure:

(1) A youth will be admitted only with the written permission of a parent or legal guardian. In cases where the youth meets the requirements of child in need of services (CHINS) the youth may sign themselves into treatment.

(2) The youth must agree to, and both the youth and parent or legal guardian must sign the following when possible:

- (a) Statement of patient rights and responsibilities;
- (b) Treatment or behavioral contracts; and
- (c) Any consent or release form.

(3) Youth chemical dependency treatment must include:

- (a) Group meetings to promote personal growth; and

(b) Recreational, leisure, and other therapy and related activities.

(4) A certified teacher or tutor must provide each youth one or more hours per day, five days each week, of supervised academic tutoring or instruction when the youth is unable to attend school for an estimated period of four weeks or more. The provider must:

(a) Document the patient's most recent academic placement and achievement level; and

(b) Obtain schoolwork, where applicable, from the patient's home school or provide schoolwork and assignments consistent with the person's academic level and functioning.

(5) Adult staff must lead or supervise seven or more hours of structured recreation each week.

(6) Staff must conduct room checks frequently and regularly when patients are in their rooms.

(7) A person fifteen years of age or younger must not room with a person eighteen years of age or older.

(8) Sufficient numbers of adult staff, whose primary task is supervision of patients, must be trained and available at all times to ensure appropriate supervision, patient safety, and compliance with WAC 388-805-520.

(9) In co-ed treatment services, there must be at least one adult staff person of each gender present or on call at all times.

(10) There must be at least one chemical dependency professional (CDP) for every ten youth patients.

(11) Staff must document attempts to notify the parent or legal guardian within two hours of any change in the status of a youth.

(12) For routine discharge, each youth must be discharged to the care of the youth's legal custodian.

(13) For emergency discharge and when the custodian is not available, the provider must contact the appropriate authority.

NEW SECTION

WAC 388-805-520 What are the requirements for behavior management? (1) Upon application for a youth's admission, a service provider must:

(a) Advise the youth's parent and other referring persons of the programmatic and physical plant capabilities and constraints in regard to providing treatment with or without a youth's consent;

(b) Obtain the parent's or other referring person's agreement to participate in the treatment process as appropriate and possible; and

(c) Obtain the parent's or other referring person's agreement to return and take custody of the youth as necessary and appropriate on discharge or transfer.

(2) The administrator must ensure policies and procedures are written and implemented which detail least to increasingly restrictive practices used by the provider to stabilize and protect youth who are a danger to self or others, including:

(a) Obtaining signed behavioral contracts from the youth, at admission and updated as necessary;

- (b) Acknowledging positive behavior and fostering dignity and self respect;
- (c) Supporting self-control and the rights of others;
- (d) Increased individual counseling;
- (e) Increased staff monitoring;
- (f) Verbal de-escalation;
- (g) Use of unlocked room for containment or seclusion;
- (h) Use of restraints; and
- (i) Emergency procedures, including notification of the parent, guardian or other referring person, and, when appropriate, law enforcement.

(3) The provider must ensure staff is trained in safe and therapeutic techniques for dealing with a youth's behavioral and emotional crises, including:

- (a) Verbal de-escalation;
 - (b) Crisis intervention;
 - (c) Anger management;
 - (d) Suicide assessment and intervention;
 - (e) Conflict management and problem solving skills;
 - (f) Management of assaultive behavior;
 - (g) Proper use of restraint; and
 - (h) Emergency procedures.
- (4) To prevent a youth's unauthorized exit from the residential treatment site, the provider may have:
- (a) An unlocked room for containment or seclusion;
 - (b) A secure perimeter, such as a nonscalable fence with locked gates; and
 - (c) Locked windows and exterior doors.
- (5) Providers using holding mechanisms in subsection (4) of this section must meet current Uniform Building Code requirements, which include fire safety and special egress control devices, such as alarms and automatic releases.

(6) When less restrictive measures are not sufficient to de-escalate a behavioral crisis, clinical staff may contain or seclude a youth in a quiet unlocked room which has a window for observation and:

- (a) The clinical supervisor must be notified immediately of the staff person's use of a quiet room for a youth, and must determine its appropriateness;
- (b) A chemical dependency professional (CDP) must consult with the youth immediately and at least every ten minutes, for counseling, assistance, and to maintain direct communication; and
- (c) The clinical supervisor or designated alternate must evaluate the youth and determine the need for mental health consultation.

(7) Youth who demonstrate continuing refusal to participate in treatment or continuing to exhibit behaviors that present health and safety risks to self, other patients, or staff may be discharged or transferred to more appropriate care after:

- (a) Interventions appropriate to the situation from those listed in subsection (2) of this section have been attempted without success;
- (b) The person has been informed of the consequences and return options;
- (c) The parents, guardian, or other referring person has been notified of the emergency and need to transfer or discharge the person; and

(d) Arrangements are made for the physical transfer of the person into the custody of the youth's parent, guardian, or other appropriate person or program.

(8) Involved staff must document the circumstances surrounding each incident requiring intervention in the youth's record and include:

- (a) The precipitating circumstances;
- (b) Measures taken to resolve the incident;
- (c) Final resolution; and
- (d) Record of notification of appropriate others.

NEW SECTION

WAC 388-805-530 What are the requirements for intensive inpatient services? (1) A chemical dependency professional (CDP), or a CDP trainee under supervision of a CDP, must:

- (a) Complete the initial treatment plan within five days of admission;
- (b) Conduct at least one face-to-face individual chemical dependency counseling session with each patient each week;
- (c) Provide a minimum of ten hours of chemical dependency counseling with each patient each week;
- (d) Document a treatment plan review, at least weekly, which updates patient status, progress toward goals, and PPC level of service; and
- (e) Refer each patient for ongoing treatment or support, as necessary, upon completion of treatment.

(2) The provider must ensure a minimum of twenty hours of treatment services for each patient each week; up to ten hours may be education.

NEW SECTION

WAC 388-805-540 What are the requirements for recovery house services? (1) A chemical dependency professional (CDP), or a CDP trainee under supervision of a CDP, must provide a minimum of five hours of treatment, for each patient each week, consisting of:

- (a) Education regarding drug-free and sober living; and
- (b) Individual or group counseling.

(2) A CDP, or CDP trainee under supervision of a CDP, must update patient records at least monthly; and

(3) Staff must assist patients with general reentry living skills and, for youth, continuation of educational or vocational training.

NEW SECTION

WAC 388-805-550 What are the requirements for long-term treatment services? Each chemical dependency service provider must ensure each patient receives:

- (1) Education regarding alcohol, other drugs, and other addictions, at least two hours each week.
- (2) Individual or group counseling by a chemical dependency professional (CDP), or CDP trainee under supervision of a CDP, a minimum of two hours each week.
- (3) Education on social and coping skills.
- (4) Social and recreational activities.

- (5) Assistance in seeking employment, when appropriate.
- (6) Patient record review and update at least monthly.
- (7) Assistance with re-entry living skills.
- (8) A living arrangement plan.

NEW SECTION

WAC 388-805-600 What are the requirements for outpatient providers? To be certified to provide intensive or other outpatient services, a chemical dependency service provider must meet the requirements of:

- (1) WAC 388-805-001 through 388-805-350;
- (2) WAC 388-805-610 through 388-805-630, as applicable; and
- (3) WAC 388-805-700 through 388-805-750, if offering opiate substitution treatment services.

NEW SECTION

WAC 388-805-610 What are the requirements for intensive outpatient treatment services? (1) Patients admitted to intensive outpatient treatment under a deferred prosecution order pursuant to chapter 10.05 RCW, must complete intensive treatment as described in subsection (2) of this section. Any exceptions to this requirement must be approved, in writing, by the court having jurisdiction in the case.

(2) Each chemical dependency service provider must ensure intensive outpatient services are designed to deliver:

- (a) A minimum of seventy-two hours of treatment services within a maximum of twelve weeks,
- (b) The first four weeks of treatment must consist of:
 - (i) At least three sessions each week;
 - (ii) Each group session must last at least one hour; and
 - (iii) Each session must be on separate days of the week.
- (c) Individual chemical dependency counseling sessions with each patient every twenty hours of treatment, or more if clinically indicated;
- (d) Education totaling not more than fifty percent of the treatment services regarding alcohol, other drugs, relapse prevention, HIV/AIDS, hepatitis B and TB prevention, and other air/blood-borne pathogens;
- (e) Self-help group attendance in addition to the seventy-two hours;
- (f) A chemical dependency professional (CDP), or a CDP trainee under supervision of a CDP, must conduct and document a review of each patient's treatment plan every twenty hours of treatment, to assess adequacy and attainment of goals, using PPC;
- (g) Upon completion of intensive outpatient treatment, a CDP, or a CDP trainee under the supervision of a CDP, must refer each patient for ongoing treatment or support, as necessary, using PPC.

(3) Patients not under deferred prosecution orders, including youth patients, may be admitted to levels of care as determined appropriate using PPC.

NEW SECTION

WAC 388-805-620 What are the requirements for outpatient services? A chemical dependency professional (CDP), or a CDP trainee under supervision of a CDP, must:

- (1) Complete admission assessments within ten calendar days of admission, or by the second visit, unless participation in this outpatient treatment service is part of the same provider's continuum of care.
- (2) Conduct group or individual chemical dependency counseling sessions for each patient, each month, according to an individual treatment plan.
- (3) Assess and document the adequacy of each patient's treatment and attainment of goals:
 - (a) Once a month for the first three months; and
 - (b) Quarterly thereafter or sooner if required by other laws.

NEW SECTION

WAC 388-805-630 What are the requirements for outpatient services in a school setting? Any certified chemical dependency service provider may offer school-based services by:

- (1) Meeting WAC 388-805-640 requirements; and
- (2) Ensuring counseling is provided by a chemical dependency professional (CDP), or a CDP trainee under supervision of a CDP.

NEW SECTION

WAC 388-805-640 What are the requirements for providing off-site chemical dependency treatment services? (1) If a certified service provider wishes to offer treatment services, for which the provider is certified, at a site where clients are located primarily for purposes other than chemical dependency treatment, the administrator must:

- (a) Ensure off-site treatment services will be provided:
 - (i) In a private, confidential setting that is discrete from other services provided within the off-site location; and
 - (ii) By a chemical dependency professional (CDP) or CDP trainee under supervision of a CDP;
- (b) Revise agency policy and procedures manuals to include:
 - (i) A description of how confidentiality will be maintained at each off-site location, including how confidential information and patient records will be transported between the certified facility and the off-site location;
 - (ii) A description of how services will be offered in a manner that promotes patient and staff member safety; and
 - (iii) Relevant administrative, personnel, and clinical practices.

(c) Maintain a current list of all locations where off-site services are provided including the name, address (except patient in-home services), primary purpose of the off-site location, level of services provided, and date off-site services began at the off-site location.

NEW SECTION

WAC 388-805-700 What are the requirements for opiate substitution treatment providers? An opiate substitution treatment provider must meet requirements of:

- (1) WAC 388-805-001 through 388-805-350;
- (2) WAC 388-805-610 and 388-805-620; and
- (3) WAC 388-805-700 through 388-805-750.

NEW SECTION

WAC 388-805-710 What are the requirements for opiate substitution medical management? (1) A program physician must provide oversight for determination of opiate physical addiction for each patient before admission unless the patient is exempted by the Federal Food and Drug Administration, and:

- (a) Be available for consultation when an opiate physical addiction determination is conducted by anyone other than the program physician; and
 - (b) Conduct the opiate physical addiction determination for all youth patients.
- (2) A physical examination must be conducted on each patient:
- (a) By a program physician or other medical practitioner; and
 - (b) Within twenty-one days of admission.
- (3) Following the patient's initial dose of opiate substitution treatment, the physician must establish adequacy of dose, considering:
- (a) Signs and symptoms of withdrawal;
 - (b) Patient comfort; and
 - (c) Side effects from over-medication.
- (4) At the appropriate time, a program physician must approve an individual detoxification schedule for each patient being detoxified.

NEW SECTION

WAC 388-805-720 What are the requirements for urinalysis in opiate substitution treatment? (1) The provider must obtain a urine sample from each patient for urinalysis:

- (a) At least once each month; and
 - (b) Randomly, without notice to the patient.
- (2) Staff must observe the collection of each urine sample and use proper chain of custody techniques when handling each sample;
- (3) When a patient refuses to provide a urine sample or initial the log of sample numbers, staff must consider the urine positive; and
- (4) Staff must document a positive urine and discuss the findings with the patient in a counseling session within seven days of receiving the results of the test.

NEW SECTION

WAC 388-805-730 What are the requirements for opiate substitution treatment dispensaries? (1) Each opiate substitution treatment provider must comply with applica-

ble portions of 21 CFR, Part 1301 requirements, as now or later amended.

(2) The administrator must ensure written policies and procedures to verify the identity of patients.

(3) Dispensary staff must maintain a file with a photograph of each patient. Dispensary staff must ensure pictures are updated when:

- (a) The patient's physical appearance changes significantly; or
- (b) Every two years, whichever comes first.

(4) In addition to notifying the Food and Drug Administration, the administrator must immediately notify the department and the state board of pharmacy of any theft or significant loss of a controlled substance.

NEW SECTION

WAC 388-805-740 What are the requirements for opiate substitution treatment counseling? (1) A chemical dependency professional (CDP), or a CDP trainee under supervision of a CDP, must provide individual or group counseling sessions once each:

(a) Week, for the first ninety days, for a new patient or a patient readmitted more than ninety days since the person's most recent discharge from opiate substitution treatment;

(b) Week, for the first month, for a patient readmitted within ninety days of the most recent discharge from opiate substitution treatment; and

(c) Month, for a patient transferring from another opiate substitution treatment agency where the patient stayed for ninety or more days.

(2) A CDP, or a CDP trainee under supervision of a CDP, must conduct and document a continuing care review with each patient to review progress, discuss facts, and determine the need for continuing opiate substitution treatment:

- (a) Between six and seven months after admission; and
- (b) Once every six months thereafter.

(3) A CDP, or a CDP trainee under supervision of a CDP, must provide counseling in a location that is physically separate from other activities.

(4) The administrator must ensure at least one full-time CDP, or a CDP trainee under supervision of a CDP, for each fifty patients:

(a) A CDP with one or more CDP trainees may be assigned as primary counselor for up to seventy-five patients, including those assigned to the CDP trainee; and

(b) A CDP trainee may be assigned up to thirty-five patients.

(5) A pregnant woman and any other patient who requests, must receive at least one-half hour of counseling and education each month on:

- (a) Matters relating to pregnancy and street drugs;
- (b) Pregnancy spacing and planning; and
- (c) The effects of opiate substitution treatment on the woman and fetus, when opiate substitution treatment occurs during pregnancy.

(6) Staff must provide at least one-half hour of counseling on family planning with each patient through either individual or group counseling.

(7) The administrator must ensure there is one staff member who has training in family planning, prenatal health care, and parenting skills.

NEW SECTION

WAC 388-805-750 What are the requirements for opiate substitution treatment take-home medications? (1) An opiate substitution treatment provider may authorize take-home medications for a patient when:

(a) The medication is for a Sunday or legal holiday, as identified under RCW 1.16.050; or

(b) Travel to the facility presents a safety risk for patients or staff due to inclement weather.

(2) A service provider may permit take-home medications on other days for a stabilized patient who:

(a) Has received opiate substitution treatment medication for a minimum of ninety days; and

(b) Had negative urines for the last sixty days.

(3) The provider must meet 21 CFR, Part 291 requirements.

(4) The provider may arrange for opiate substitution treatment medication to be administered by licensed staff or self-administered by a pregnant woman receiving treatment at a certified residential treatment agency when:

(a) The woman had been receiving treatment medication for ninety or more days; and

(b) The woman's use of treatment medication can be supervised.

NEW SECTION

WAC 388-805-800 What are the requirements for free-standing ADATSA assessment providers and services? (1) A certified ADATSA assessment provider must conduct an ADATSA assessment for each eligible patient and be governed by the requirements under:

(a) WAC 388-805-001 through 388-805-310;

(b) WAC 388-805-020 and 388-805-325 (1), (2), (3), (5), (10), (16), (17), 388-805-330; and 388-805-350; and

(c) Chapter 388-800 WAC.

NEW SECTION

WAC 388-805-810 What are the requirements for DUI assessment providers? (1) If located in a district or municipal probation department, each DUI service provider must meet the requirements of:

(a) WAC 388-805-001 through 388-805-135,

(b) WAC 388-805-145 (4), (5), and (6);

(c) WAC 388-805-150, the administrative manual, subsections (4), (7) through (11), (13), and (14);

(d) WAC 388-805-155, facilities, subsections (1)(b), (c), (d), and (2)(b);

(e) WAC 388-805-200 (1), (4), and (5);

(f) WAC 388-805-205 (1), (2), (3)(a) through (e), (4), (6), (7), and (8);

(g) WAC 388-805-220, 388-805-225, and 388-805-230;

(h) WAC 388-805-260, volunteers;

(i) WAC 388-805-300, clinical manual, subsections (1), (2), (3), (7), (14), (18), and (19)(e);

(j) WAC 388-805-305, patients' rights;

(k) WAC 388-805-310, assessments;

(l) WAC 388-805-320, patient record system, subsections (3)(a) through (f), and (4);

(m) WAC 388-805-325, record content, subsections (1), (2), (3), (5), (8), (10), (12), (16), and (17); and

(n) WAC 388-805-350, outcomes evaluation;

(o) WAC 388-805-815, DUI assessment services.

(2) If located in another certified chemical dependency treatment facility, the DUI service provider must meet the requirements of:

(a) WAC 388-805-001 through 388-805-260; 388-805-305 and 388-805-310;

(b) WAC 388-805-300, 388-805-320, 388-805-325 as noted in subsection (1) of this section, 388-805-350; and

(c) WAC 388-805-815.

NEW SECTION

WAC 388-805-815 What are the requirements for DUI assessment services? (1) The administrator must limit clients to persons who have been arrested for a violation of driving while under the influence of intoxicating liquor or other drugs or in physical control of a vehicle as defined under chapter 46.61 RCW;

(2) A chemical dependency professional (CDP), or a CDP trainee under the supervision of a CDP, or a probation assessment officer must conduct each client assessment and ensure the assessment includes, in addition to the requirements under WAC 388-805-310:

(a) Evaluation of the client's blood alcohol level and other drug levels at the time of arrest, if available; and

(b) Assessment of the client's self-reported driving record and the abstract of the client's legal driving record.

NEW SECTION

WAC 388-805-820 What are the requirements for alcohol and other drug information school? (1) Alcohol and other drug information school providers must be governed under:

(a) WAC 388-805-001 through 388-805-135; and

(b) This section.

(2) The provider must:

(a) Inform each student of fees at the time of enrollment; and

(b) Ensure adequate and comfortable seating in well-lit and ventilated rooms.

(3) A certified information school instructor must teach the course and:

(a) Advise each student there is no assumption the student is an alcoholic or drug addict, and this is not a therapy session;

(b) Discuss the class rules;

(c) Review the course objectives;

(d) Follow curriculum contained in "Alcohol and Other Drugs Information School Training Curriculum," published in 1991, or later amended;

(e) Ensure not less than eight and not more than fifteen hours of class room instruction;

(f) Administer the post-test from the above reference to each enrolled student after the course is completed;

(g) Ensure individual client records include:

(i) Intake form;

(ii) Hours and date or dates in attendance;

(iii) Source of referral;

(iv) Copies of all reports, letters, certificates, and other correspondence;

(v) A record of any referrals made; and

(vi) A copy of the scored post-test.

(h) Complete and submit reports required by the courts and the department of licensing, in a timely manner.

NEW SECTION

WAC 388-805-830 What are the requirements for information and crisis services? (1) Information and crisis service providers must be governed under:

(a) WAC 388-805-001 through 388-805-135; and

(b) This section.

(2) The information and crisis service administrator must:

(a) Ensure a chemical dependency professional (CDP), or a CDP trainee under supervision of a CDP, is available or on staff;

(b) Maintain a current directory of certified chemical dependency service providers in the state;

(c) Maintain a current list of local resources for legal, employment, education, interpreter, and social and health services;

(d) Have services available twenty-four hours a day, seven days a week;

(e) Ensure all staff completes forty hours of training that covers the following areas before assigning unsupervised duties:

(i) Chemical dependency crisis intervention techniques;

(ii) Alcoholism and drug abuse; and

(iii) Prevention and control of TB and bloodborne pathogens.

(f) Have policies and procedures for provision of emergency services, by phone or in person, to a person incapacitated by alcohol or other drugs, or to the person's family, such as:

(i) General assessments;

(ii) Interviews for diagnostic or therapeutic purposes;

(iii) Crisis counseling; and

(iv) Referral.

(g) Maintain records of each patient contact, including:

(i) The presenting problem;

(ii) The outcome;

(iii) A record of any referral made;

(iv) The signature of the person handling the case; and

(v) The name, age, sex, and race of the patient.

NEW SECTION

WAC 388-805-840 What are the requirements for emergency service patrol? (1) The emergency service patrol provider must ensure staff providing the service:

(a) Have proof of a valid Washington state driver's license;

(b) Possess annually updated verification of first aid and cardiopulmonary resuscitation training;

(c) Have completed forty hours of training in chemical dependency crisis intervention techniques, and alcoholism and drug abuse, to improve skills in handling crisis situations; and

(d) Have training on communicable diseases, including:

(i) TB prevention and control; and

(ii) Bloodborne pathogens such as HIV/AIDS and hepatitis.

(2) Emergency service patrol staff must:

(a) Respond to calls from police, merchants, and other persons for assistance with an intoxicated person in a public place;

(b) Patrol assigned areas and give assistance to a person intoxicated in a public place; and

(c) Conduct a preliminary assessment of a person's condition relating to the state of inebriation and presence of a physical condition needing medical attention:

(i) When a person is intoxicated, but subdued and willing, transport the person home, to a certified treatment provider, or a health care facility;

(ii) When a person is incapacitated, unconscious, or has threatened or inflicted harm on another person, staff must make reasonable efforts to:

(A) Take the person into protective custody; and

(B) Transport the person to an appropriate treatment or health care facility.

(3) Emergency service patrol staff must maintain a log including:

(a) The time and origin of each call received for assistance;

(b) The time of arrival at the scene;

(c) The location of the person at the time of the assist;

(d) The name and sex of the person transported;

(e) The destination of the transport and time of arrival; and

(f) In case of nonpickup of a person, a notation must be made about why the pickup did not occur.

NEW SECTION

WAC 388-805-850 What are the requirements for treatment alternatives to street crime (TASC) providers and services? (1) A certified TASC provider must provide referral and case management services to each eligible patient and meet the requirements of:

(a) WAC 388-805-001 through 388-805-210;

(b) WAC 388-805-240, students;

(c) WAC 388-805-260, volunteers;

(d) WAC 388-805-300, clinical manual, subsections (1) through (7), (13) through (18), and (19)(a), (b), (d), (e), and (f);

(e) WAC 388-805-305, patients' rights, subsections (1) through (3), and (5) through (6);

(f) WAC 388-805-310, assessments, subsections (1) through (7);

(g) WAC 388-805-315, treatment, continuing care, transfer, and discharge plans, subsections (1), (2)(a), (c), (d), (e), and (f), (5), and (7) through (9);

(i) A CDP, or a CDP trainee under supervision of a CDP, must substitute referral and case management plans for treatment plan requirements in WAC 388-805-315 (1) and (2)(a) (d);

(ii) A CDP, or a CDP trainee under supervision of a CDP, must coordinate the referral of patients with the appropriate treatment provider for each identified problem, ensure they receive adequate treatment, and add new problems to the case management plan as they are identified;

(iii) A CDP, or a CDP trainee under supervision of a CDP, must coordinate the continuing care plan of the patient with appropriate treatment providers; and,

(iv) When transferring a patient to another treatment provider, a TASC provider will substitute a summary of the patient's progress toward each referral and case management goal.

(h) WAC 388-805-320, patient record system;

(i) WAC 388-805-325, patient record content, subsections (1) through (3), (5) through (10), and (12) through (19);

(j) WAC 388-805-330, reporting patient noncompliance; and

(k) WAC 388-805-350, outcomes evaluation.

(2) A CDP, or a CDP trainee under supervision of a CDP, must assess and document the adequacy of each client's referral and case management plan and attainment of goals once each month.

NEW SECTION

WAC 388-805-900 What are the requirements for outpatient child care when a parent is in treatment? A certified outpatient chemical dependency service provider may offer child care services when the provider:

(1) Notifies the department of the provider's intent to offer child care services.

(2) Submits a plan indicating numbers of children to be served and physical space available for the child care service which meets WAC 388-805-155 requirements.

(3) Demonstrates capability of meeting WAC 388-805-905 through 388-805-935 requirements.

(4) Has an approval letter from the department to provide child care services.

NEW SECTION

WAC 388-805-905 What are the requirements for outpatient child care admission and health history? (1) A chemical dependency service provider must have and implement written policies and procedures to ensure:

(a) A parent serves as the responsible caregiver; and

(b) Each child admitted is free of serious medical conditions and not in need of nursing care.

(2) The provider must have a file for each child which includes a health history of each child, obtained on admission, including:

(a) Name and phone number of the child's physician;

(b) Date of last physical examination;

(c) Statement of allergies and reactions, if any;

(d) Notation of special health problems;

(e) Immunization status; and

(f) Notation of medications currently being taken.

NEW SECTION

WAC 388-805-910 What are the requirements for outpatient child care policies? The administrator must ensure implementation of childcare policies which include:

(1) Encouragement of each parent to obtain health care for each child when necessary.

(2) What to do in case of a medical emergency.

(3) Protection from child abuse, neglect, and exploitation.

(4) Reporting of child abuse and neglect.

NEW SECTION

WAC 388-805-915 What are the requirements for an outpatient child care activity program? The person designated responsible for the child care program must:

(1) Address the developmental, cultural, and individual needs of each child served.

(2) Offer a variety of activity choices.

(3) Offer each child daily opportunities for small and large muscle activities.

(4) Implement a planned program of activities, as evidenced by a current, written activity schedule.

(5) Provide a variety of easily accessible, culturally and developmentally appropriate learning and play materials.

(6) Promote a nurturing, respectful, supportive, and responsive environment.

NEW SECTION

WAC 388-805-920 What are the requirements for outpatient child care behavior management and discipline? (1) The provider and the person responsible for child care must ensure behavior management and disciplinary practices promote:

(a) Each child's developmentally appropriate social behavior, self-control, and respect for the rights of others; and

(b) Fair, reasonable, and consistent practices related to a child's behavior.

(2) The following practices are prohibited by any person:

(a) Corporal punishment, including biting, jerking, shaking, spanking, slapping, hitting, striking, or kicking a child, or other means of inflicting physical pain or causing bodily harm;

(b) Use of a physical restraint method injurious to a child;

- (c) Use of a mechanical restraint, locked time-out room or closet;
- (d) Withholding of food; and
- (e) Use of derogatory terms.

NEW SECTION

WAC 388-805-925 What are the requirements for outpatient child care diaper changing? The administrator must ensure diaper changing policies and procedures are approved by the person developing health care policies and include:

- (1) A designated place for diaper changing that is:
 - (a) Separate from food preparation areas;
 - (b) Adjacent to a handwashing sink;
 - (c) Sanitized between use for different children;
 - (d) Impervious to moisture; and
 - (e) Safe, with safety rails or straps.
- (2) Appropriateness of changing diapers in the child's bed.
- (3) Posting of diaper changing procedures accessible to staff and parents.
- (4) Removal of soiled disposable diapers from the premises daily.
- (5) Removal of soiled reusable diapers according to a commercial diaper service schedule.
- (6) Handwashing procedures.

NEW SECTION

WAC 388-805-930 What are the requirements for outpatient child care food service? The service provider must have policies that address:

- (1) Feeding schedules for infants and children.
- (2) Safe and sanitary formula preparation and storage.
- (3) Storage and handling of bottles and nipples in a sanitary manner, separate from diaper-changing areas.
- (4) Identification of prepared bottles with each child's name and date of preparation.
- (5) Promotion of a safe and nurturing method for child feeding including:
 - (a) Holding infants in a semi-sitting position unless against medical advice or the child is able to sit in a high chair;
 - (b) Interacting with the infant; and
 - (c) Not propping bottles.

NEW SECTION

WAC 388-805-935 What are the staffing requirements for outpatient child care services? (1) The service provider must designate a person responsible for the child care program who:

- (a) Meets relevant personnel requirements under WAC 388-805-200 and 388-805-205;
 - (b) Is eighteen years of age or older; and
 - (c) Is capable of implementing WAC 388-805-905 through 388-805-930.
- (2) The service provider must maintain staffing ratios as follows:

- (a) One adult for up to and including four infants through eleven months of age;
 - (b) One adult for up to and including five children twelve through twenty-nine months of age;
 - (c) One adult for every ten children thirty months through five years of age; and
 - (d) One adult for every fifteen children five years of age or older.
- (3) When there are children of mixed ages, the service provider must maintain the ratio prescribed for the youngest child in the mixed group.

REPEALER

The following section of the Washington Administrative Code is repealed:

- WAC 440-44-020 Alcohol and drug agency certification fees.

WSR 01-01-007

PERMANENT RULES

DEPARTMENT OF

SOCIAL AND HEALTH SERVICES

(Health and Rehabilitative Services Administration)

[Filed December 6, 2000, 3:18 p.m.]

Date of Adoption: December 6, 2000.

Purpose: Chapter 275-16 WAC, Liability for costs of care and hospitalization of the mentally ill, compliance with the executive order on regulatory improvement and to update references to law and other regulations, add one definition and modify two others, delete part of one section and increase the monthly exempt income of a patient. The rewritten rules will be renumbered into chapter 388-855 WAC.

AMENDATORY SECTION (Amending Order 1627, filed 3/25/81)

WAC 275-16-015 Definitions. ~~((+))~~ "**Adjusted charges**" are those amounts charged to a patient who is or has been confined to a state hospital for the mentally ill, either by voluntary or involuntary admission, and their estates and responsible relatives, which are less than the actual cost of hospitalization as reflected in the schedule of charges herein and which has been established by the issuance of a notice of finding of responsibility.

~~((2))~~ "**Adjusted gross income**" is that gross income of the estate of the patient and responsible relatives less any deductions, contributions or payments mandated by law including, but not necessarily limited to, income tax and social security.

~~((3))~~ "**Dependent**" means any spouse, minor son or daughter, or permanently disabled son or daughter, of the patient living in the patient's household. If the patient is a minor, then the same definitions shall apply in determining the dependency of members of the parent's household. If a minor son or daughter is not living in the patient's household, that son or daughter shall not be considered a dependent unless the patient is in fact contributing more than fifty percent of that child's support in accordance with a court order or court-recognized agreement.

~~((4))~~ "Department" means the department of social and health services.

~~((5))~~ "Determination officer" is that duly appointed and qualified claims investigator who is delegated authority by the secretary to conduct or cause to have conducted an investigation of the financial condition of the estate of the patient and responsible relatives; to evaluate the results of such investigations; to make determinations of the ability to pay hospitalization charges from such investigations and evaluations; and to issue notices of findings of responsibility to the responsible parties.

~~((6))~~ "Estate of patient and responsible relative" means the total assets available to the patient and his responsible relatives to reimburse the department for hospitalization charges incurred by the patient in a state hospital for the mentally ill in accordance with these regulations.

~~((7))~~ "Gross income" means the total assets available to the estate of the patient and responsible relatives expressed in terms of their cash equivalent on a monthly basis. ~~((t))~~ The total assets available to the estate of the patient and responsible relatives are converted to a monthly cash equivalent figure by dividing those assets by twelve months. Gross income includes all of the following calculated prior to any mandatory deductions: gross wages for service; net earnings from self-employment; and all other assets (of the estate prior to any mandatory deductions) divided by twelve months.

~~((8))~~ "Responsible relative" includes the spouse of a patient, or the parent of a patient who is under eighteen years of age.

"Secretary" means the secretary of the department of social and health services.

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

AMENDATORY SECTION (Amending Order 1627, filed 3/25/81)

WAC 275-16-035 Available assets of estate of patients and responsible relatives. (1) The department will include, but not necessarily be limited to, in their determination of the assets of the estates of present and former patients of state hospitals for the mentally ill and their responsible relatives, cash, stocks, bonds, savings, security interests, insurance benefits, guardianship funds, trust funds, governmental benefits, pension benefits and personal property.

(2) Real property shall also be an available asset to the estate: Provided, That the patient's home shall not be considered an available asset if that property is owned by the estate and serves as the principal dwelling and actual residence of the patient, the patient's spouse, and/or minor children and disabled sons or daughters: Provided further, That if the home is not being used for residential purposes by the patient, the patient's spouse, and/or minor children and disabled sons or daughters, and in the opinion of two physicians, there is no reasonable expectancy that the patient will be able to return to the home during the remainder of his life, the home shall be considered an asset available to the estate((-

~~(3)~~ In determining if a particular asset is available to the estate of a patient who is eligible or potentially eligible for Medicaid, the determination officer will apply the standards of WAC 388-92-045)).

AMENDATORY SECTION (Amending Order 1270, filed 2/17/78)

WAC 275-16-045 Exempt income. Patients whose total resources are insufficient to pay for the actual cost of care shall be entitled to a monthly exemption from income in the amount of ~~((25))~~ forty-one dollars and sixty-two cents or such amount as specified in WAC ~~((388-29-125))~~ 388-478-0040.

AMENDATORY SECTION (Amending Order 3083, filed 10/9/90, effective 11/9/90)

WAC 275-16-055 Notice and finding of responsibility (NFR)—Appeal procedure. (1) The determination officer's assessment of the ability and liability of a person or of the person's estate to pay hospitalization charges shall be issued in the form of a notice and finding of responsibility (NFR) as prescribed by RCW 43.20B.340.

(2) When the NFR is for full hospitalization charges as specified under WAC ~~((275-16-030))~~ 388-855-0030, the department shall:

(a) Inform the financially responsible person of the current charges; and

(b) Periodically recompute the financially responsible person's charges.

(3) When the NFR is for adjusted charges, the department shall:

(a) Express the charges in a daily or monthly rate; and

(b) Set aside charges for ancillary services.

(4) The right to an adjudicative proceeding to contest the NFR is contained in RCW 43.20B.340.

(a) A financially responsible person wishing to contest the NFR shall, within twenty-eight days of receipt of the NFR:

(i) File a written application for an adjudicative proceeding showing proof of receipt with the Secretary, DSHS, Attn: Determination Officer, P.O. Box 9768, Olympia, WA 98504; and

(ii) Include in or with the application:

(A) A specific statement of the issues and law involved;

(B) The grounds for contesting the department decision;

and

(C) A copy of the contested NFR.

(b) The proceeding shall be governed by the Administrative Procedure Act (chapter 34.05 RCW), RCW 43.20B.340, this chapter, and chapter ~~((388-08))~~ 388-02 WAC. If any provision in this chapter conflicts with chapter ~~((388-08))~~ 388-02 WAC, the provision in this chapter governs.

AMENDATORY SECTION (Amending Order 1627, filed 3/25/81)

WAC 275-16-065 Determination of liability. (1) In determining the ability of the estate of the patient and respon-

sible relative to pay hospitalization charges, first priority shall be given to any third party benefits which might be available. The availability of third party benefits, such as medical insurance, health insurance, Medicare, Medicaid, CHAMPUS, CHAMPVA, shall be considered as an available asset of the estate and shall justify a finding for actual costs of hospitalization during such period as the coverage is in effect.

(2) In the absence of third party benefits, charges shall be based upon the available assets of the estate giving consideration to any unusual and exceptional circumstances and other pertinent factors. No financial determination of the ability of the estate to pay hospitalization charges shall conflict with the eligibility requirements for Medicaid for those patients who are eligible or potentially eligible for such benefits.

(3) The ability of the estate to pay adjusted charges will be determined by applying the following formula:

$$X = (Z-E)F$$

Where $Z = (A-Y-N-R)+D$

Z = available income per family member

X = adjusted charges (daily)

A = gross income

Y = mandatory deductions

N = allowance for unusual and exceptional circumstances

R = allowance for other pertinent factors

D = number of dependents

E = exempt income

F = a factor which converts the monthly figures to a daily rate (.0328767).

All calculations are expressed in monthly terms except the final adjusted charge which is converted to a daily rate. All final figures are rounded out to the nearest cent.

(4) The adjusted gross income (A-Y) is determined by first developing the gross income of the estate of the patient and the responsible relative. Gross income (A) includes not only gross wages for services rendered, and/or net earnings from self-employment, but all other available assets (~~converted to some reasonable~~) which have been divided by twelve months to convert them to a monthly cash equivalent figure. All mandatory deductions (Y), such as income tax and social security, are deducted from the gross income to arrive at the adjusted gross income.

(5) Approved allowances for unusual and exceptional circumstances (N) and for other pertinent factors (R) are then subtracted from the adjusted gross income.

(6) The available income (A-Y-N-R) is then divided by the number of dependents in the household of the patient (D) to determine the available income per family member.

(7) Exempt income (E) as defined in WAC (~~275-16-045~~) 388-855-0045 is then subtracted from the available income per family member to arrive at the monthly adjusted charges.

(8) The monthly adjusted charges are multiplied by the factor of .0328767 which converts the monthly figure to a daily rate.

AMENDATORY SECTION (Amending WSR 96-18-090, filed 9/4/96, effective 10/5/96)

WAC 275-16-085 Other pertinent factors. The determination officer may consider the following other pertinent factors in determining the ability of the estate of the patient and responsible relatives to pay.

(1) The determination officer may consider those factors related to the well-being, education and training, child support obligations set by court order or by administrative finding under chapter 74.20A RCW, and/or rehabilitation of the patient and the patient's immediate family, to whom the patient owes a duty of support. The patient and/or responsible relatives shall show the existence and the necessity for the pertinent factors as defined. Upon such a showing, the determination officer may consider such resources necessary to reasonably provide for such pertinent factors as assets not available to the estate of the patient and responsible relatives.

(2) Consistent with RCW 43.20B.335, the determination officer shall consider a judgment owed by the patient to any victim of an act that would have resulted in criminal conviction of the patient but for a finding of the patient's criminal insanity. A victim shall include an estate's personal representative who has obtained judgment for wrongful death against the criminally insane patient((-

~~(3) The department shall ensure that any allowance for other pertinent factors does not conflict with Medicaid eligibility requirements for those patients who are eligible or potentially eligible for such benefits)).~~

WSR 01-01-008
PERMANENT RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES
 (Health and Rehabilitative Services Administration)
 [Filed December 6, 2000, 3:20 p.m.]

Date of Adoption: December 6, 2000.

Purpose: Chapter 275-59 WAC, Criminally insane person committed to the care of the Department of Social and Health Services—Evaluation, placement, care, and discharge, compliance with EO 97-02, to make changes consistent with recent amendments to chapter 10.77 RCW, and to renumber for inclusion into chapter 388-875 WAC.

Citation of Existing Rules Affected by this Order: Amending WAC 275-59-020, 275-59-030, and 275-59-060.

Statutory Authority for Adoption: Chapter 10.77 RCW.

Adopted under notice filed as WSR 00-17-156 on August 22, 2000.

Changes Other than Editing from Proposed to Adopted Version: Changed WAC 275-59-020, "'Evaluation' means when a court requests the department to determine..." to "'Evaluation' means when a court requests the department to provide an opinion..."

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 1, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 1, Amended 3, Repealed 0.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 1, Amended 3, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 1, Amended 3, Repealed 0.

Effective Date of Rule: Thirty-one days after filing.

 Rules and Policies Assistance Unit

AMENDATORY SECTION (Amending Order 1373, filed 3/1/79)

WAC 275-59-020 Definitions. ~~((1)) "Secretary" means the secretary of the department of social and health services or his designee.~~

~~((2)) "Department" means the state department of social and health services.~~

~~((3)) "Division" means the mental health division, department of social and health services.~~

~~((4)) "Evaluation" means the initial procedure when a court requests the department to provide an opinion if a person charged with a crime is competent to stand trial or, if indicated and appropriate, if the person was suffering under a~~

~~mental disease or defect excluding responsibility at the time of the commission of the crime.~~

~~"Indigent" means any person who is financially unable to obtain counsel or other necessary expert or professional services without causing substantial hardship to himself or his family.~~

~~"Professional person" means:~~

~~(1) A psychiatrist. This is defined as a person having a license as a physician and surgeon in this state, who has in addition, completed three years of graduate training in psychiatry in a program approved by the American Medical Association or the American Osteopathic Association and who is certified or is eligible to be certified by the American Board of Psychiatry and Neurology or the American Osteopathic Board of Neurology and Psychiatry.~~

~~(2) A psychologist. This is defined as a person who has been licensed as a psychologist pursuant to chapter 18.83 RCW.~~

~~(3) A social worker. This is defined as a person with a master's or further advanced degree from an accredited school of social work or a degree deemed equivalent under rules adopted by the secretary.~~

~~"Secretary" means the secretary of the department of social and health services or his designee.~~

~~"Superintendent" means the person responsible for the functioning of a treatment facility.~~

~~"Treatment facility" means any facility operated or approved by the department of social and health services for the treatment of the criminally insane. Such definition shall not include any state correctional institution or facility.~~

~~((5)) "Superintendent" means the person responsible for the functioning of a treatment facility.~~

~~(6) "Evaluation" means the initial procedure when a court requests the department to determine if a person charged with a crime is competent to stand trial or, if indicated and appropriate, if the person was suffering under a mental disease or defect excluding responsibility at the time of the commission of the crime.~~

~~(7) "Indigent" means any person who is financially unable to obtain counsel or other necessary expert or professional services without causing substantial hardship to himself or his family.~~

~~(8) "Mental health professional" means:~~

~~(a) A psychiatrist. This is defined as a person having a license as a physician and surgeon in this state, who has in addition, completed three years of graduate training in psychiatry in a program approved by the American Medical Association or the American Osteopathic Association.~~

~~(b) A psychologist. This is defined as a person with a doctoral degree in clinical psychology from an accredited college or university, or who has been licensed as a psychologist pursuant to chapter 18.83 RCW.~~

~~(c) A social worker. This is defined as a person with a master's or further advanced degree from an accredited school of social work, and who has had a minimum of two years of experience in the direct treatment of mentally ill or emotionally disturbed persons under the supervision of a mental health professional.~~

(d) A psychiatric nurse. This is defined as a registered nurse who has a master's or further advanced degree in psychiatric nursing from an accredited college or university, and who has had a minimum of two years of experience in the direct treatment of mentally ill or emotionally disturbed persons under the supervision of a mental health professional.)

AMENDATORY SECTION (Amending Order 1373, filed 3/1/79)

WAC 275-59-030 Mental health division. The secretary designates to the division the responsibility for:

(1) Evaluation and treatment of any person committed to the secretary for evaluation or treatment, under chapter 10.77 RCW;

(2) Assisting the court in obtaining nondepartmental ~~((mental health professionals))~~ experts or professional persons to participate in the evaluation or a hearing on behalf of the defendant and supervising the procedure whereby such professionals will be compensated, according to fee schedule if the person being evaluated or treated is an indigent;

(3) Assuring that any nondepartmental ~~((mental health))~~ expert or professional person requesting compensation has maintained adequate evaluation and treatment records which justify compensation;

(4) Assisting the court by designation of experts or professional~~((s))~~ persons to examine the defendant and report to the court when the defendant is not committed to the secretary;

(5) Determination of what treatment ~~((center))~~ facility shall have custody of persons committed to the secretary under chapter 10.77 RCW.

(6) If the court is advised by any party that the defendant may be developmentally disabled, at least one of the experts or professional persons appointed shall be a developmental disabilities professional.

AMENDATORY SECTION (Amending Order 1373, filed 3/1/79)

WAC 275-59-060 Individualized treatment. (1) Whenever a person is committed to the secretary as criminally insane, the treatment facility to which the person is assigned shall, within fifteen days of admission to the ~~((center, and through the use of appropriate mental health professionals))~~ facility, evaluate and diagnose the committed person for the purpose of devising an individualized treatment program.

(2) Every person, committed to the secretary as criminally insane, shall have an individualized treatment plan formulated by the treatment ~~((center))~~ facility. This plan shall be developed by appropriate ~~((mental health professionals))~~ treatment team members and implemented as soon as possible but no later than fifteen days after the person's admission to the treatment ~~((center))~~ facility as criminally insane. Each individualized treatment plan shall include, but not be limited to:

(a) A statement of the nature of the specific problems and specific needs of the patient;

(b) A statement of the physical setting necessary to achieve the purposes of commitment;

(c) A description of intermediate and long-range treatment goals, with a projected timetable for their attainment;

(d) A statement and rationale for the plan of treatment for achieving these intermediate and long-range goals;

(e) A specification of staff responsibility and a description of proposed staff involvement with a patient in order to attain these treatment goals;

(f) Criteria for recommendation to the court for release.

(3) This individualized treatment plan shall be reviewed by the treatment ~~((center))~~ facility periodically, at least every six months, and a copy of the plan shall be sent to the committing court.

NEW SECTION

WAC 388-875-0110 Access to records by criminal justice agencies. Upon written request, criminal justice agencies shall have access to the following documents developed pursuant to the procedures set forth in chapter 10.77 RCW, the most recent forensic:

(1) Psychiatric assessment;

(2) Release summary; and

(3) Pre-trial report of the examination, either inpatient or outpatient.

Other relevant information may be provided by agreement between the requesting criminal justice agency and the treatment facility, subject to federal and state confidentiality provisions.

PERMANENT

WSR 01-01-009
PERMANENT RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES
(Medical Assistance Administration)
[Filed December 6, 2000, 3:22 p.m.]

Date of Adoption: December 6, 2000.

Purpose: Incorporates language from repealed WAC 388-86-120 Medical care services, into a new section, WAC 388-556-0500 Medical care services under state-administered cash programs, which clarifies and updates program requirements and complies with the Governor's Executive Order 97-02. The new section defines "medical care services (MCS)" as medical care services provided to clients under the state-administered cash programs, and lists services covered under MCS by cross-referencing WAC 388-529-0200 Medical services available to eligible clients.

Citation of Existing Rules Affected by this Order: Repealing WAC 388-86-120.

Statutory Authority for Adoption: RCW 74.08.090 and 74.09.035.

Adopted under notice filed as WSR 00-17-053 on August 9, 2000.

Changes Other than Editing from Proposed to Adopted Version: WAC 388-556-0500:

(1) The ~~medical assistance administration (MAA)~~ department of social and health services (DSHS) covers...

(2) ~~MAA~~ DSHS does not cover...

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 1, Amended 0, Repealed 1.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 1, Amended 0, Repealed 1.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 1, Amended 0, Repealed 1.

Effective Date of Rule: Thirty-one days after filing.

Marie Myerchin-Redifer, Manager
Rules and Policies Assistance Unit

NEW SECTION

WAC 388-556-0500 Medical care services under state-administered cash programs. Medical care services (MCS) are state-administered medical care services provided to a client receiving cash benefits under the general assistance-unemployable (GA-U) program or the Alcohol and Drug Addiction Treatment and Support Act (ADATSA) program. For a client eligible for MCS:

(1) The department of social and health services (DSHS) covers only the medically necessary services within the notated applicable program limitations listed in the MCS column under WAC 388-529-0200.

(2) DSHS does not cover medical services received outside the state of Washington unless the medical services are provided in a border area listed under WAC 388-501-0175.

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 388-86-120 Medical care services.

WSR 01-01-010
PERMANENT RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES
(Medical Assistance Administration)
[Filed December 6, 2000, 3:24 p.m.]

Date of Adoption: December 6, 2000.

Purpose: The department has consolidated and clarified rules regarding vision care services in a new chapter. The proposed rules reflect long-standing department policy, are more readable, and comply with the Governor's Executive Order 97-02 on regulatory reform.

New: Vision care, WAC 388-544-0050, 388-544-0100, 388-544-0150, 388-544-0200, 388-544-0250, 388-544-0300, 388-544-0350, 388-544-0400, 388-544-0450, 388-544-0500, 388-544-0550, and 388-544-0600.

Citation of Existing Rules Affected by this Order: Repealing WAC 388-86-030 and 388-87-062.

Statutory Authority for Adoption: RCW 74.08.090.

Other Authority: RCW 74.09.510 and 74.09.520.

Adopted under notice filed as WSR 00-17-097 on August 15, 2000.

Changes Other than Editing from Proposed to Adopted Version: WAC 388-544-0100 Client eligibility for vision care services.

(1) The medical assistance administration (MAA) covers vision care services for clients eligible for the following "scope-of-care" designations (see WAC 388-529-0200 0100):

(a) Categorically needy (e.g., CNP, CHIP, Children's Health);

(b) Medically needy (MNP); and

(c) Medical care services (MCS or GAU/ADATSA).

~~(+)~~(2) MAA does not cover vision care services for clients with the following program designations:

(a) Medically indigent (MIP) unless the qualifying emergency medical condition is related to the eye(s);

(b) Family planning only;...

WAC 388-544-0150 Requirements for vision care providers.

(1) The following providers...

(a) Ophthalmologists/MD or DO;

(b) Optometrists; and

(c) Opticians;

WAC 388-544-0200 Vision care services MAA covers without MAA's prior authorization.

(3) MAA covers medically necessary eyeglasses (frames and/or lenses as needed) according to the following:

(a) When the client's condition in both eyes is stable as defined in WAC 388-544-0050 "Stable Visual Condition," and when the...

(b) MAA covers one pair of back-up eyeglasses when contact lenses are medically necessary and they are the client's primary visual correction...

(4) MAA covers medically necessary gas permeable or daily-wear-soft contact lenses...

(5) MAA covers medically necessary therapeutic contact bandage lenses...

(7) MAA covers medically necessary ocular orthotics/prosthetics...

(8) MAA covers the following surgeries when medically necessary and when performed by a physician (M.D.) or Osteopathic physician (D.O.) licensed per RCW 18.57 or RCW 18.71 who is qualified to perform such surgeries:...

(a) Strabismus surgery for clients eighteen seventeen years of age and younger; and...

(9) MAA considers all requests for vision care services not listed as covered in this section or where requested services exceed stated limitations. MAA considers such requests under WAC 388-501-0165.

WAC 388-544-0250 Vision care services MAA does not cover without MAA's prior authorization.

(1) MAA evaluates a request for any service that is listed as noncovered in this chapter under the provisions of WAC 388-501-0165.

(2) MAA evaluates a request for a service that is in a covered category, but has been determined to be experimental or investigational under WAC 388-531-0550, under the provisions of WAC 388-501-0165 which relate to medical necessity.

(3) MAA evaluates a request for a covered service that is subject to limitation(s) or other restriction(s), and approves such a service beyond those specific limitations or restrictions when the service is medically necessary, under the standards for covered services in WAC 388-501-0165.

(4) The vision care services that MAA does not cover without MAA's prior authorization include, but are not limited to:...

(i) Lens replacements for a refractive change which is unstable when the client does not have a "stable visual condition" as defined in WAC 388-544-0050 (see WAC 388-544-0350 (1));...

(p) Strabismus surgery for a client nineteen eighteen years of age or older unless the client meets MAA's established prior authorization criteria for correctable double vision;

~~(2) MAA considers all requests for vision care service under WAC 388-501-0165.~~

WAC 388-544-0300 Eyeglass frames and service.

(6) If the client has a medically diagnosed allergy to plastic the materials in the available eyeglass frames, MAA

covers the cost of coating of the contract eyeglass frames to make them the frames nonallergenic.

WAC 388-544-0350 Eyeglass lenses and service.

(1) The medical assistance administration (MAA) covers medically necessary eyeglass lenses to correct a client's vision if both of the following apply:

(a) The condition requiring correction is a "stable visual condition" as defined in WAC 388-544-0050; and

(b) The prescription is less than two years old.

~~(+)(2)~~ MAA covers the following types of medically necessary eyeglass lenses:...

~~(+)(3)~~ For clients who own their own serviceable eyeglass frames and request lenses only, MAA covers these requests if the lenses are medically necessary and the size and style of the requested lens(es) meet MAA's contract requirements.

~~(+)(4)~~ MAA covers medically necessary lens replacements without regard to time limits when (a), (b) and (c) of this subsection apply:...

(b) Both the eye condition and the treatment have stabilized as defined in WAC 388-544-0050 "stable visual condition";

WAC 388-544-0400 Contact lenses and services.

(7) MAA covers contact lenses when:

(a) The client has high anisometropia (the eyes have refractive errors that differ, left to right, by plus or minus 3 diopters or greater); and

(b) Eyeglasses cannot reasonably correct the refractive errors.

WAC 388-544-0550 Cataract surgery.

(1) MAA covers cataract surgery when: (a) It is included in the scope of care for the client's medical program; (b) It is medically necessary; and (c) The provider clearly documents the need in the client's record. (2) MAA considers the surgery medically necessary when the client has:

~~(+)(a)~~ Correctable visual acuity in the affected eye at 20/50 or worse, as measured on the Snellen test chart; or

~~(2)(b)~~ One or more of the following conditions:

~~(+)(i)~~ Dislocated or subluxated lens;

~~(b)(ii)~~ Intraocular foreign body;

~~(e)(iii)~~ Ocular trauma;

~~(d)(iv)~~ Phacogenic glaucoma;

~~(e)(v)~~ Phacogenic uveitis; or

~~(+)(vi)~~ Phacoanaphylactic endophthalmitis.

(3) MAA covers cataract surgery as a nonemergent procedure under any of its medical coverage programs, unless the client is diagnosed as being statutorily blind as defined in WAC 388-544-0350 (10)(b). If the client is blind, the need for cataract surgery is emergent and the cataract surgery is covered by MAA, even if the client is eligible only for medically indigent coverage (MIP).

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 12, Amended 0, Repealed 2.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 12, Amended 0, Repealed 2.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 12, Amended 0, Repealed 2.

VISION CARE

NEW SECTION

WAC 388-544-0050 Definitions for vision care services. The following definitions and abbreviations and those found in WAC 388-500-0005 apply to this chapter. Defined words and phrases are bolded the first time they are used in the text. Unless otherwise defined in this chapter, medical terms are used as commonly defined within the scope of professional medical practice in the state of Washington.

"Stable visual condition" means that a client's eye condition has no acute disease or injury; or the client has reached a point after any acute disease or injury where the variation in need for refractive correction has diminished or steadied. The client's vision condition has stabilized to the extent that eyeglasses or contact lenses are appropriate and that any prescription for refractive correction is likely to be sufficient for one year or more.

"Visual field exams or testing" means a process to determine defects in the field of vision and tests the function of the retina, optic nerve and optic pathways. The process may include simple confrontation to increasingly complex studies with sophisticated equipment.

NEW SECTION

WAC 388-544-0100 Client eligibility for vision care services. (1) The **medical assistance administration (MAA)** covers vision care services for clients eligible for the following "scope-of-care" designations (see WAC 388-529-0100):

(a) **Categorically needy** (e.g., CNP, CHIP, children's health);

(b) **Medically needy (MNP)**; and

(c) **Medical care services (MCS or GAU/ADATSA).**

(2) MAA does not cover vision care services for clients with the following program designations:

(a) **Medically indigent (MIP)** unless the qualifying emergency medical condition is related to the eye(s);

(b) Family planning only;

(c) Any program designated "emergency medical only"; or

(d) Any other program that does not meet the conditions of subsection (1) of this section.

NEW SECTION

WAC 388-544-0150 Requirements for vision care providers. (1) The following providers are eligible to enroll/contract with MAA to provide and bill for vision care services furnished to eligible clients:

(a) Ophthalmologists/MD or DO.

(b) Optometrists; and

(c) Opticians.

(2) Enrolled/contracted eye care providers must:

(a) Meet the requirements in chapter 388-502 WAC;

(b) Provide only those services that are within the scope of the provider's license; and

(c) Obtain all hardware and contact lenses from MAA's contract suppliers.

NEW SECTION

WAC 388-544-0200 Vision care services MAA covers without MAA's prior authorization. (1) MAA covers **medically necessary** eye examinations, refractions, eyeglasses (frames and/or lenses), and fitting fees as follows:

(a) For clients who are asymptomatic and are twenty-one years of age or older, once every twenty-four months;

(b) For clients who are asymptomatic and are twenty years of age or younger, once every twelve months;

(c) For adults or children who are identified on the medical assistance identification card (MAID) as being developmentally disabled, once every twelve months;

(d) For clients on medication that affects vision, as often as is medically necessary as documented by the provider;

(e) For clients for whom the provider is diagnosing or treating a medical condition that has symptoms of vision problems or disease, as often as medically necessary. The provider must document the diagnosis and/or treatment in the client's record to justify the frequency of examinations and other services.

(2) MAA covers medically necessary **visual field exams** for the diagnosis and treatment of abnormal signs, symptoms or injuries. MAA does not reimburse visual field exams that are done by simple confrontation. Documentation in the record must show all of the following:

(a) The extent of the testing;

(b) Why the testing was reasonable and necessary for the client; and

(c) The medical basis for the frequency of testing.

(3) MAA covers medically necessary eyeglasses (frames and/or lenses as needed) according to the following:

(a) When the client's condition in both eyes is **stable** as defined in WAC 388-544-0050, Stable visual condition, and when the minimum correction need is documented and meets one of the following:

(i) Sphere power equal to or greater than plus or minus 0.50 diopters;

(ii) Astigmatism power equal to or greater than plus or minus 0.50 diopters; or

(iii) A combination of spherical power and astigmatic power that is equal to or greater than a spherical equivalent of plus or minus 0.75 diopters (the spherical equivalent means

one half cylinder added algebraically to the sphere correction).

(b) MAA covers one pair of back-up eyeglasses when contact lenses are medically necessary and they are the client's primary visual correction aid as described in WAC 388-544-0400. MAA limits back-up eye glasses as follows (also see WAC 388-544-0250 (1)(e)):

(i) For clients twenty years of age or younger, once every two years;

(ii) For clients twenty-one years of age and older, once every six years; or

(iii) When MAA agrees in advance to the medical necessity and the service is provided consistent with the limitations included in MAA's authorization.

(4) MAA covers medically necessary gas permeable or daily-wear-soft contact lenses per WAC 388-544-0400.

(5) MAA covers medically necessary therapeutic contact bandage lenses per WAC 388-544-0450.

(6) MAA covers all hyperopic prescriptions for clients who are twenty years of age or younger and who have a diagnosis of "accommodative esotropia" or any strabismus correction. These clients are not subject to the requirements in subsection (3)(a) of this section (stable eye condition and minimum correction need).

(7) MAA covers medically necessary ocular orthotics/prosthetics per WAC 388-544-0500.

(8) MAA covers the following surgeries:

(a) Strabismus surgery for clients seventeen years of age and younger; and

(b) Cataract surgery per WAC 388-544-0550.

(9) MAA considers all requests for vision care services not listed as covered in this section or where requested services exceed stated limitations. MAA considers such requests under WAC 388-501-0165.

NEW SECTION

WAC 388-544-0250 Vision care services MAA does not cover without MAA's prior authorization. (1) MAA evaluates a request for any service that is listed as noncovered in this chapter under the provisions of WAC 388-501-0165.

(2) MAA evaluates a request for a service that is in a covered category, but has been determined to be experimental or investigational under WAC 388-531-0550, under the provisions of WAC 388-501-0165 which relate to medical necessity.

(3) MAA evaluates a request for a covered service that is subject to limitation(s) or other restriction(s), and approves such a service beyond those specific limitations or restrictions when the service is medically necessary, under the standards for covered services in WAC 388-501-0165.

(4) The vision care services that MAA does not cover without MAA's prior authorization include, but are not limited to:

(a) Any of the following types of contact lenses:

(i) Disposable lenses;

(ii) Extended wear soft lenses; or

(iii) Extended wear soft toric lenses.

(b) Any eye service or hardware that MAA considers not to be medically necessary;

(c) Any eyeglasses (frames and/or lenses) or contact lenses upgraded at private expense to avoid MAA's contract limitations (e.g., frames that are not available through MAA's contract or noncontract frames or lenses for which the client or other person pays the difference between MAA's payment and the total cost) (see WAC 388-544-0300(7) and 388-544-0350(3));

(d) Bifocal additions to eyeglasses with bifocal correction of less than 1.0 diopter;

(e) Both eyeglasses and contact lenses in a two-year period for any client (see WAC 388-544-0200 (3)(b) for backup eyeglass exceptions);

(f) Eyeglasses or contact lenses when the prescribed need does not meet the minimum corrections described in this chapter;

(g) Eyeglasses or contact lenses when the prescription is over two years old;

(h) Group vision screening for eyeglasses;

(i) Lens replacements for a refractive change when the client does not have a stable visual condition as defined in WAC 388-544-0050 (see WAC 388-544-0350(1));

(j) Other vision services or hardware for persons enrolled in MAA's managed care program (Healthy Options) when the requirements of that program have not been met;

(k) Orthoptics and visual training therapy;

(l) Plano lenses (no refractive correction) for both eyes, except as provided in WAC 388-544-0350 (12)(a);

(m) Progressive additions lenses, including blended bifocals;

(n) Refractive surgery of any type (e.g., Radial Keratotomy or laser resurfacing);

(o) Separate charges for eye exams conducted in combination with emergency or operating room procedures;

(p) Strabismus surgery for a client eighteen years of age or older, unless the client meets MAA's established prior authorization criteria for correctable double vision;

(q) Sunglasses or colored/tinted lenses requested for cosmetic or other nonmedical reasons;

(r) Two pairs of eyeglasses (e.g., instead of one pair of multifocals); and

(s) Other services or hardware that do not meet the requirements in this chapter.

NEW SECTION

WAC 388-544-0300 Eyeglass frames and service. (1) The medical assistance administration (MAA) covers pre-approved eyeglass frames through MAA's contracted supplier.

(2) MAA covers eyeglass frames, with specific time limits, for eligible clients who:

(a) Are twenty-one years of age and older, once every twenty-four months;

(b) Are twenty years of age and younger, once every twelve months;

(c) Are identified on the MAID card as being developmentally disabled (adults or children), once every twelve months;

(d) Have been unable to adjust to contact lenses after thirty days. The provider must document the client's inability

to adjust and the client must return the contact lenses to the provider.

(3) MAA covers preapproved special frames called "durable and flexible frames" through MAA's contracted supplier when a client:

(a) Is diagnosed with a seizure disorder that results in frequent falls; or

(b) Has a medical condition that has resulted in two or more broken eyeglass frames in a twelve-month period (e.g., Tourette's syndrome).

(4) MAA covers replacement eyeglass frames that have been lost, broken, or stolen:

(a) For adults, only with MAA's prior authorization (see WAC 388-501-0165); and

(b) Without MAA's prior authorization for clients who are either:

(i) Twenty years of age or younger; or

(ii) Identified on the MAID care as being developmentally disabled, regardless of the client's age.

(5) MAA covers incidental repairs to a client's eyeglass frames when both of the following apply:

(a) The repair or adjustment is not typically provided to the public at no cost; and

(b) The cost of the repair does not exceed MAA's cost for replacement frames. MAA's reimbursement for repairs does not exceed its payment level for replacement frames.

(6) If the client has a medically diagnosed allergy to the materials in the available eyeglass frames, MAA covers the cost of coating the contract eyeglass frames to make the frames nonallergenic.

(7) MAA does not allow clients to upgrade eyeglass frames and pay only the upgrade costs in order to avoid MAA's contract limitations (see WAC 388-544-0250 (1)(c) and 388-544-0350(3)).

NEW SECTION

WAC 388-544-0350 Eyeglass lenses and service. (1)

The medical assistance administration (MAA) covers medically necessary eyeglass lenses to correct a client's vision if both of the following apply:

(a) The condition requiring correction is a stable visual condition as defined in WAC 388-544-0050; and

(b) The prescription is less than two years old.

(2) MAA covers the following types of medically necessary eyeglass lenses:

(a) Single vision lenses;

(b) Round or flat top D-style bifocals;

(c) Trifocals that are twenty-five or twenty-eight millimeters;

(d) Slab-off and prism lenses (including Fresnel lenses); and

(e) Glass lenses fifty-four millimeters and smaller.

(3) For clients who own their own serviceable eyeglass frames and request lenses only, MAA covers these requests if the lenses are medically necessary and the size and style of the required lens(es) meet MAA's contract requirements.

(4) MAA covers medically necessary lens replacements without regard to time limits when (a), (b), and (c) of this subsection apply:

(a) One of the following caused the vision change:

(i) Eye surgery;

(ii) The effect(s) of prescribed medication; or

(iii) One or more diseases;

(b) Both the eye condition and the treatment have stabilized as defined in WAC 388-544-0050, Stable visual condition; and

(c) The lens correction has at least one diopter difference between the old and new prescriptions.

(5) MAA covers lens replacement for lost or broken lenses according to the same standards as frames in WAC 388-544-0300 (2) and (4).

(6) MAA allows bifocal lenses to be replaced with single vision lenses or trifocal lenses to be replaced with bifocals or single vision lenses when all of the following apply:

(a) A client has attempted to adjust to the bifocals or trifocals for at least sixty days;

(b) The client is unable to make the adjustment; and

(c) The bifocal or trifocal lenses being replaced are returned to the provider.

(7) MAA covers plastic executive bifocals or trifocals only for clients who are diagnosed with:

(a) Accommodative esotropia; or

(b) Strabismus.

(8) MAA covers high index lenses when the client requires a refractive correction of plus or minus eight diopters or greater.

(9) MAA covers the tinting of plastic lenses when:

(a) The client's medical need is diagnosed and documented as a chronic eye condition causing photophobia; and

(b) The tinting is done by MAA's contracted lens supplier.

(10) MAA covers glass photochromatic lenses when the client's medical need is diagnosed and documented as related to either (a) or (b) of this subsection:

(a) Ocular albinism; or

(b) Blindness, defined as:

(i) Visual acuity for distance vision of twenty/two hundred or worse in the better eye with best correction; or

(ii) A limitation of the client's visual field (widest diameter) subtending an angle of less than twenty degrees from central.

(11) MAA covers treating plastic lenses for scratch resistance only when the client is either:

(a) Twenty years or age or younger; or

(b) Identified on the MAID card as being developmentally disabled.

(12) MAA covers polycarbonate lenses when a client is any of the following:

(a) Blind in one eye as defined in subsection (10) of this section and the client needs protection for the other eye, regardless of whether a vision correction is required;

(b) Twenty years of age or younger and diagnosed with strabismus or amblyopia; or

(c) Identified on the MAID card as being developmentally disabled.

NEW SECTION

WAC 388-544-0400 Contact lenses and services. (1) The medical assistance administration (MAA) covers gas permeable or daily wear soft contact lenses as the client's primary refractive correction method if a client has a vision correction of plus or minus 6.0 diopters or greater.

(2) MAA does not cover contact lenses if the client's ocular condition makes it medically inadvisable (contraindicated) for the client to use contact lenses.

(3) MAA covers contact lens replacements:

(a) Once every twelve months for normal replacement; or

(b) When the contact lenses are lost or damaged, with the following limitations:

(i) The prescription must not be over seventeen months old; and

(ii) The date of dispensing for the lost or damaged lenses must not be within the past eleven months.

(4) MAA does not cover contact lenses for a patient who has received MAA-covered eyeglasses within the past two years unless the provider:

(a) Documents the medical necessity to MAA's satisfaction; and

(b) Receives prior authorization from MAA.

(5) MAA covers soft toric contact lenses (daily wear) for clients with astigmatism requiring a correction equal to or greater than one diopter (plus or minus).

(6) MAA covers lenticular, aspheric and myodisc contact lenses when the client has one or more of the following:

(a) Multiple cataract surgeries on the same eye;

(b) Aphakia;

(c) Keratoconus with refractive error of plus or minus ten diopters; or

(d) Corneal softening (e.g., bullous keratopathy).

(7) MAA covers contact lenses when:

(a) The client has high anisometropia (the eyes have refractive errors that differ, left to right, by plus or minus three diopters or greater); and

(b) Eyeglasses cannot reasonably correct the refractive errors.

NEW SECTION

WAC 388-544-0450 Therapeutic contact bandage lenses. The medical assistance administration (MAA) covers therapeutic contact bandage lenses only when needed immediately after:

(1) Eye injury; or

(2) Eye surgery.

NEW SECTION

WAC 388-544-0500 Ocular prosthetics. The medical assistance administration (MAA) covers ocular prosthetics which are medically necessary and provided by any of the following:

(1) An ophthalmologist;

(2) An ocularist; or

(3) An optometrist who specializes in orthotics.

NEW SECTION

WAC 388-544-0550 Cataract surgery. (1) MAA covers cataract surgery when:

(a) It is included in the scope of care for the client's medical program;

(b) It is medically necessary; and

(c) The provider clearly documents the need in the client's record.

(2) MAA considers the surgery medically necessary when the client has:

(a) Correctable visual acuity in the affected eye at 20/50 or worse, as measured on the Snellen test chart; or

(b) One or more of the following conditions:

(i) Dislocated or subluxated lens;

(ii) Intraocular foreign body;

(iii) Ocular trauma;

(iv) Phacogenic glaucoma;

(v) Phacogenic uveitis; or

(vi) Phacoanaphylactic endophthalmitis.

(3) MAA covers cataract surgery as a nonemergent procedure under any of its medical coverage programs, unless the client is diagnosed as being statutorily blind as defined in WAC 388-544-0350 (10)(b). If the client is blind, the need for cataract surgery is emergent and the cataract surgery is covered by MAA, even if the client is eligible only for medically indigent coverage (MIP).

NEW SECTION

WAC 388-544-0600 Payment methodology. (1) The medical assistance administration (MAA) covers one hundred percent of the MAA contract price for eyeglass frames, lenses, and contact lenses when these items are obtained through MAA's approved contract(s).

(2) See WAC 388-531-1850 for professional fee payment methodology.

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 388-87-062

Payment—Eyeglasses and examinations.

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 388-86-030

Vision care.

WSR 01-01-011
PERMANENT RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES

(Medical Assistance Administration)

[Filed December 6, 2000, 3:26 p.m.]

Date of Adoption: December 6, 2000.

Purpose: Avoids duplicative rules by repealing WAC 388-86-115 Medical care provided out-of-state and incorporating language into WAC 388-501-0180. It clarifies department policy on coverage of medical services provided out-of-state to eligible medical assistance clients, and states that MAA requires out-of-state providers meet the same requirements as in-state providers in order to be reimbursed for medical services provided to eligible clients. It also updates program requirements and complies with the Governor's Executive Order 97-02.

Citation of Existing Rules Affected by this Order: Repealing WAC 388-86-115; and amending WAC 388-501-0180.

Statutory Authority for Adoption: RCW 74.08.090 and 74.09.035.

Adopted under notice filed as WSR 00-17-055 on August 9, 2000.

Changes Other than Editing from Proposed to Adopted Version: WAC 388-501-0180:

(1) ~~For medical services coverage and reimbursement purposes, the medical assistance administration (MAA) The department of social and health services (DSHS) considers cities bordering Washington state and listed in WAC 388-501-0175 the same as in-state cities for:~~

(a) Medical care coverage under all medical programs administered by the medical assistance administration (MAA); and

(b) Reimbursement purposes.

~~(2) MAA covers emergent medical services provided out-of-state to an eligible client if the medical services are within the scope of the client's medical care program as specified under chapter 388-529 WAC. The department does not cover out-of-state medical care for clients under the following state-administered (Washington state medical care only) medical programs: (a) General assistance-unemployable (GA-U); (b) Alcoholism and Drug Addiction Treatment and Support Act (ADATSA); or (c) Medically indigent program (MIP). (This is now numbered as (2), and was previously numbered as (4).)~~

(3) Subject to the exceptions and limitations in this section, the department MAA covers out-of-state medical care provided to eligible clients when the services are: nonemergent medical services provided out-of-state to an eligible client only if the medical services: (a) Are not readily available within the state of Washington; (b) (a) Are Within the scope of the client's medical care program as specified under chapter 388-529 WAC; and

(b) Medically necessary as defined in WAC 388-500-0005.

~~(c) Have prior authorization through MAA's process described in WAC 388-501-0165. ((3)(c) is now part of (4).)~~

~~(4) MAA does not cover out-of-state medical services for clients under state administered (Washington state medical care only) medical programs. See WAC 388-556-0500. If the client travels out-of-state expressly to obtain medical care, the medical services must have prior authorization through the department's determination process described in WAC 388-501-0165. (This is numbered as (4), and was previously part of (3)(c).)~~

~~(5) (new)~~

See WAC 388-501-0165 for the department's determination process for requests for:

(a) Any service that is listed in any Washington Administrative Code section as noncovered;

(b) A service that is in a covered category, but has been determined to be experimental or investigational under WAC 388-531-0550; and

(c) A covered service that is subject to the department's limitations or other restrictions and the request for the service exceeds those limitations or restrictions.

~~(5) (6) MAA The department determines out-of-state coverage for transportation... (This is numbered as (6), and was previously numbered as (5).)~~

~~(6) (7) MAA The department reimburses an out-of-state provider for medical care provided to an eligible client if the provider: (a) Meets the licensing requirements of the state in which care is provided; (b) Contracts with MAA the department to be an enrolled provider; and... (This is numbered as (7), and was previously numbered as (6).)~~

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 0, Amended 1, Repealed 1.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 0, Amended 1, Repealed 1.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 1, Repealed 1.

Effective Date of Rule: Thirty-one days after filing.

December 6, 2000

Marie Myerchin-Redifer, Manager
 Rules and Policies Assistance Unit

AMENDATORY SECTION (Amending Order 3732, filed 5/3/94, effective 6/3/94)

WAC 388-501-0180 Out-of-state medical care. (1) ((A Washington state Medicaid client temporarily out of the state may be provided medical care within the scope of the Medicaid program.

(a) Residency requirements in WAC 388-505-0510 must be met.

~~(b) Medical assistance may be provided only in areas of Canada that border on the United States when no other resource is available.~~

~~(2) Persons eligible for the medically needy program may be provided medical care within the scope of that program.~~

~~(3) When an eligible person goes to another state, excluding bordering cities, expressly to obtain medical care that is available within the state of Washington, medical assistance will only be provided on an emergency basis.~~

~~(4) Medicaid will be provided to persons who enter the state and are determined to be financially eligible, provided the residency requirements in WAC 388-505-0510 are met.~~

~~(5) The department shall not provide medical care services out of state except in designated bordering cities under WAC 388-501-0175)) The department of social and health services (DSHS) considers cities bordering Washington state and listed in WAC 388-501-0175 the same as in-state cities for:~~

(a) Medical care coverage under all medical programs administered by the medical assistance administration (MAA); and

(b) Reimbursement purposes.

(2) The department does not cover out-of-state medical care for clients under the following state-administered (Washington state medical care only) medical programs:

(a) General assistance-unemployable (GA-U);

(b) Alcohol and Drug Addiction Treatment and Support Act (ADATSA); or

(c) Medically indigent program (MIP).

(3) Subject to the exceptions and limitations in this section, the department covers out-of-state medical care provided to eligible clients when the services are:

(a) Within the scope of the client's medical care program as specified under chapter 388-529 WAC; and

(b) Medically necessary as defined in WAC 388-500-0005.

(4) If the client travels out-of-state expressly to obtain medical care, the medical services must have prior authorization through the department's determination process described in WAC 388-501-0165.

(5) See WAC 388-501-0165 for the department's determination process for requests for:

(a) Any service that is listed in any Washington Administrative Code section as noncovered;

(b) A service that is in a covered category, but has been determined to be experimental or investigational under WAC 388-531-0550; and

(c) A covered service that is subject to the department's limitations or other restrictions and the request for the service exceeds those limitations or restrictions.

(6) The department determines out-of-state coverage for transportation services, including ambulance services, according to chapter 388-546 WAC.

(7) The department reimburses an out-of-state provider for medical care provided to an eligible client if the provider:

(a) Meets the licensing requirements of the state in which care is provided;

(b) Contracts with the department to be an enrolled provider; and

(c) Meets the same criteria for payment as in-state providers.

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 388-86-115 Medical care provided out-of-state.

**WSR 01-01-012
PERMANENT RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES
(Medical Assistance Administration)
[Filed December 6, 2000, 3:27 p.m.]**

Date of Adoption: December 6, 2000.

Purpose: The department is establishing a new chapter for rules pertaining to physician-related services, and in order to avoid duplication, is repealing existing rules on the same subject. The new rules meet the clear-writing mandates in the Governor's Executive Order 97-02, and ensure that current policy and practice are reflected in rule, new chapter 388-531 WAC.

Citation of Existing Rules Affected by this Order: Repealing WAC 388-86-011, 388-86-055, 388-86-095, 388-86-110, 388-86-0961, 388-87-075, and 388-87-095.

Statutory Authority for Adoption: RCW 74.08.090, 74.09.520.

Adopted under notice filed as WSR 00-12-080 on June 6, 2000.

Changes Other than Editing from Proposed to Adopted Version: (Deleted words shown as ~~strikeout~~ and added words shown as underline.)

WAC 388-531-0050:

"**Allowed charges**" means the maximum amount reimbursed for any procedure that is allowed by MAA.

"**Covered service**" means a service that is within the scope of the eligible client's medical care program, ~~and listed in specific fee-for-service billing instructions~~ subject to the limitations in this chapter and other published WAC.

"**Experimental**" means... (2) Has been approved by the FDA or other requisite government body, if such approval is required.

"**Fee-for-service**" means the general payment method MAA uses to reimburse providers for covered medical services provided to medical assistance clients for whom when those services are not covered under MAA's healthy options program or children's health insurance (CHIP) programs.

"**Investigational**" means a term to describe a procedure, or course of treatment, which lacks sufficient scientific evidence of benefit for a particular condition. A service is not "investigational" if the service:...

(2) Is supported by a preponderance an overall balance of objective scientific evidence, in which the potential risks and potential benefits are examined...

PERMANENT

WAC 388-531-0100:

(2) MAA evaluates a request for any service that is listed as noncovered in WAC 388-531-0150 under the provisions of WAC 388-501-0165 ~~which relate to noncovered services.~~

(5) MAA covers the following physician-related services, subject to the conditions in subsection (1), ~~and (2) (3), and (4)~~ of this section:...

(5)(i) ~~Ophthalmology care~~ Vision-related services per chapter 388-544 WAC;

WAC 388-531-0150:

(1)(i): ~~Orthoptic eye training therapy;~~ Vision-related services listed as non-covered in chapter 388-544 WAC;

WAC 388-531-0250 (1)(k):

(iv) ~~Optometry, for vision-related optometric services;~~
or

(v) ~~Podiatry, for podiatric services.~~

WAC 388-531-0450 (2)(a): The client is critically ill and the physician is engaged in work directly related to the individual clients care, whether that time is spent at the immediate ~~beside~~ bedside, or elsewhere on the floor;

WAC 388-531-0550:

(2) ~~In making~~ The determination of whether a service is experimental and/or investigational and therefore, not a covered service, MAA considers the following: is subject to a case-by-case review under the provisions of WAC 388-501-0165 which relate to medical necessity. MAA also considers the following:

(2)(b) Whether evidence indicates the service or treatment is more likely than not to be as beneficial as existing conventional treatment alternatives for the treatment of the condition in question;

(2)(e) ~~Any relevant, specific aspects of the condition; (the subsections following this, ((d), (e), (f), (g), (h), and (i)) are renumbered, respectively, as (c), (d), (e), (f), (g), and (h).)~~

(2)(d) ~~(c)~~ Whether the service or treatment is generally used or generally accepted for treatment of for the condition in the state of Washington United States.

(3) MAA applies consistently across clients with the same medical condition and health status, the criteria to determine whether a service is experimental. A service that is not experimental for one client with a particular medical condition is not determined to be experimental for another enrollee with the same medical condition and ~~similar~~ health status. A service that is experimental for one client with a particular medical condition is not necessarily experimental for another, and subsequent individual determinations must consider any new or additional evidence not considered in prior determinations.

(4) MAA does not determine a service or treatment to be experimental or investigational solely because it is under clinical investigation, when there is sufficient evidence in peer-reviewed medical literature to draw conclusions, and the evidence indicates the service or treatment will probably be of greater overall benefit to the client in question ~~and to others similarly situated~~, than another generally available service.

WAC 388-531-0750:

Inpatient hospital ~~inpatient~~ physician-related services.

WAC 388-531-0800:

(1) MAA reimburses a providers for laboratory services only when ~~they are:~~

(a) ~~The provider is~~ Are certified according to Title XVII of the Social Security Act (Medicare), if required; and

(a) ~~The provider has~~ Have a clinical laboratory improvement amendment (CLIA) certificate and identification number.

(11) An independent laboratory must bill MAA directly. MAA does not reimburse a medical practitioner for services referred to or performed by an independent laboratory.

WAC 388-531-0950:

(1)(a) Two calls per month for routine medical conditions for a client residing in a nursing facility;

(1)(b) One call per noninstitutionalized client, per day, per for an individual physician....

(5)(b) The injectable drug used is from office stock and purchased by the provider from...

(9)(a) MAA does not pay separately ~~reimburse~~ for the administration of intra-arterial and intravenous therapeutic or diagnostic injections provided in conjunction with intravenous infusion therapy services. MAA does pay ~~reimburse~~ separately for the administration of these injections when they are provided on the same day as an E&M service. MAA does not pay separately an administration fee for injectables when both E&M and infusion therapy services are provided on the same day. MAA reimburses separately for the drug(s).

(9)(b) MAA does not reimburse ~~pay~~ separately for subcutaneous or intramuscular administration of antibiotic injections provided on the same day as an E&M service. If the injection is the only service provided, MAA ~~covers the injection service~~ pays an administration fee. ...

(9)(d) The provider must submit a manufacturer's invoice ~~and~~ to document the name, strength, and dosage on the claim form when billing MAA for the following drugs:

(i) ~~Classified drugs that cost where the billed charge is over one thousand, one hundred dollars; and~~

(i) ~~Unclassified drugs that cost where the billed charge is over one hundred dollars; and~~ This does not apply to unclassified antineoplastic drugs.

(i) ~~Unclassified antineoplastic drugs that cost over five hundred dollars.~~

(10)(b) When a single client is expected to use all the doses in a multiple dose vial, the provider must may bill MAA the total number of doses in a multiple dose vial the vial at the time the first dose from the vial is used. (e) When remaining doses of a the multiple dose vial are injected at subsequent times, MAA reimburses the injection service (administration fee) only.

(c) When a multiple dose vial is used for more than one client, the provider must bill the total number of doses provided to each client out of the multiple dose vial.

(d) MAA covers ~~both the injection and the~~ antigen, the antigen preparation, and an administration fee.

(11) MAA reimburses for chemotherapy drugs;

(11)(a) ~~MAA reimburses for chemotherapy drugs Administered in the physician's office only when:...~~

(11)(b) ~~MAA establishes a~~ At established maximum allowable fees based on ~~its~~ the Medicare pricing of the estimated acquisition cost (EAC) or maximum allowable cost (MAC), when generics are available;

(11)(c) For unclassified antineoplastic drugs, the provider must submit the following information on the claim form:

(i) The name of the drug used;

(i) The dosage and strength used; and

(i) The national drug code (NCD).

(12) Notwithstanding the provisions of this section, MAA reserves the option of determining drug pricing for any particular drug based on the best evidence available to MAA, or other good and sufficient reasons (e.g., fairness/equity, budget), regarding the actual cost, after discounts and promotions, paid to typical providers nationally or in Washington state.

(13) MAA may request an invoice as necessary.

WAC 388-531-1000:

Ophthalmological Ophthalmic and vision-related physician-related services.

~~(1) MAA covers ophthalmological services furnished by a provider as listed in WAC 388-531-0250, and subject to the limitations in this section and other published WAC.~~

~~(1) MAA requires expedited prior authorization for strabismus surgery for elinet eighteen years of age and older.~~

~~(1) MAA does not cover any of the following:~~

~~(a) Orthoptics and visual training therapy;~~

~~(b) Two pairs of eyeglasses;~~

~~(c) E&M services billed in combination with eye exam procedure codes;~~

~~(d) Radial Keratotomy or other surgery for refractive purposes;~~

~~(e) Refractive prescriptions over two years old; or~~

~~(f) Group screening for eyeglasses (except for EPSDT).~~

Refer to chapter 388-544 WAC for ophthalmic and vision-related services.

WAC 388-531-1050:

Osteopathic manipulative therapy treatment.

WAC 388-531-1100:

(1) MAA covers medical services provided to Medicaid eligible clients who are temporarily located outside the state, subject to the provisions of this chapter and WAC 388-501-0180.

WAC 388-531-1400:

(5) MAA reimburses only one psychiatric diagnostic interview examination in a calendar year unless a significant change in the client's circumstances renders ~~such a~~ an additional evaluation medically necessary.

WAC 388-531-1550:

(11) MAA reimburses hysterectomy without prior authorization in either of the following circumstances: (a) the client has been diagnosed with cancer(s) of the female reproductive organs; and/or (b) the client is forty-six years of age or older.

PERMANENT RULES

DEPARTMENT OF AGRICULTURE

[Filed December 6, 2000, 3:34 p.m.]

Date of Adoption: December 6, 2000.

Purpose: To amend the existing rule regarding onion white rot quarantine to update its structure and terminology to meet international standards for quarantines, to incorporate clear and readable format, and to reflect current industry and program conditions.

Citation of Existing Rules Affected by this Order: Amending WAC 16-470-300, 16-470-310, 16-470-320, and 16-470-330.

Statutory Authority for Adoption: Chapter 17.24 RCW.

Adopted under notice filed as WSR 00-20-108 on October 4, 2000.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 1, Amended 4, Repealed 0.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 1, Amended 4, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 1, Amended 4, Repealed 0.

Effective Date of Rule: Thirty-one days after filing.
December 6, 2000
Jim Jesernig
Director

AMENDATORY SECTION (Amending Order 1881, filed 3/12/86)

WAC 16-470-300 Quarantine—Onion white rot disease. ~~((+))~~ Onion white rot is a potentially devastating disease of onions and closely related species, which causes greatly decreased yields and reduced storage quality. It is spread primarily by movement of contaminated water, soil, equipment, tools, machinery, and infested plants and plant parts. Onion white rot disease is caused by *Sclerotium cepivorum*, a fungus. Once a field is infested, the disease remains indefinitely in the soil. The director finds that onion white rot disease is detrimental to the onion industry of Washington state and establishes a quarantine ~~((is established))~~ to prevent ~~((the spread))~~ introduction and ~~((introduction))~~ spread of ~~((onion white rot))~~ the disease ~~((caused by *Sclerotium cepivorum*, a fungus,))~~ within noninfested areas of Washington state.

~~((2))~~ The following definition shall apply to WAC 16-470-300 through 16-470-340: "Onion" means any *Allium* spp. including but not limited to onion, garlic, leek, chive, or shallots.

NEW SECTION

WAC 16-470-305 Onion white rot disease—Definitions. The following definitions apply to WAC 16-470-300 through 16-470-340:

- (1) "Onion" means any plant of the *Allium* genus, including, but not limited to, onion, garlic, leek, chive and shallots.
- (2) "Pest-free area for onion white rot" means Adams, Franklin and Grant counties.

AMENDATORY SECTION (Amending Order 1873, filed 9/25/85)

WAC 16-470-310 Onion white rot disease—Area under order. The area under exterior quarantine for onion white rot disease ~~((includes Adams, Franklin, and Grant counties))~~ is all states of the United States. The area under interior quarantine for onion white rot disease is all counties of Washington state.

AMENDATORY SECTION (Amending Order 1873, filed 9/25/85)

WAC 16-470-320 Onion white rot disease—Restrictions—Control—Prevention—Sanitation. The following restrictions are declared to be the proper methods for the control and prevention of the introduction of onion white rot disease, which shall be used in the ~~((quarantine))~~ pest-free area ~~((described in WAC 16-470-310))~~ for onion white rot:

(1) No person shall import onion bulbs, sets or seedlings into the ~~((quarantine))~~ pest-free area for onion white rot for the purpose of planting or propagation ~~((bulbs, sets, or seedlings of onion, garlic, leek, chive, shallots, or other *Allium* spp.))~~, except those produced in and shipped from any area of this state or other states where onion white rot is not known to occur~~((, and))~~. Each shipment ~~((shall))~~ must be certified to be free from white rot disease by the ~~((origin))~~ pest protection organization of the state ~~((department of agriculture))~~ where the onion planting stock was produced.

(2) Except as provided in this chapter, no person shall in any manner import or move soil, machinery, tools, or equipment into the ~~((quarantine))~~ pest-free area ~~((, which))~~ for onion white rot. If the soil, machinery, tools, or equipment have been previously used in any manner ~~((on))~~ in fields outside the ~~((quarantine))~~ pest-free area ~~((where the host plants named in subsection (1) of this section have been cultivated))~~ for onion white rot. Machinery, tools or equipment may be imported or moved into the ~~((quarantine))~~ pest-free area for onion white rot with prior approval from the department~~((: Provided, That))~~. The soil, machinery, tools or equipment ~~((are))~~ must be cleaned and ~~((sterilized))~~ sanitized to the satisfaction of the department prior to movement into the ~~((quarantine))~~ pest-free area for onion white rot. The cleaning shall include the thorough removal of all ~~((dirt))~~ soil and debris by the use of steam under pressure. ~~((Sterilization shall))~~ Sanitation must be accomplished by the use of steam or other methods approved by the department. For the purposes of this section, "machinery, tools or equipment" includes but is not limited to vehicles, farm trucks, harvesters, and tillage equipment.

(3) The department may stop the movement ~~((of any machinery, tools, or equipment))~~ into or within the ~~((quarantine))~~ pest-free area ~~((, which have))~~ for onion white rot of any machinery, tools or equipment that has not been cleaned and ~~((sterilized))~~ sanitized as provided in this section.

(4) No person shall knowingly import into the ~~((quarantine))~~ pest-free area for onion white rot livestock which have been pastured on irrigated fields known to be infested with white rot or which have been fed white rot infested plant parts~~((; nor shall))~~. Onion white rot infested plant parts may not be imported into the quarantine area for livestock feed~~((; nor shall))~~. Onion white rot infested plant parts found in the ~~((quarantined))~~ pest-free area for onion white rot may not be fed to livestock. No restrictions are imposed by this ~~((quarantine))~~ section on livestock moving to feed lots, sale yards, or exhibition sites (such as fairgrounds, shows, etc.) in the ~~((quarantined))~~ pest-free area for onion white rot.

AMENDATORY SECTION (Amending Order 1873, filed 9/25/85)

WAC 16-470-330 Onion white rot disease—Enforcement. (1) The department may inspect any onions or onion planting areas within the ~~((quarantine))~~ pest-free area for onion white rot during any time of the year to determine whether the disease organism is present. If the department finds ~~((that any onions, whether they are being transported, or any fields are infested with))~~ the disease organism in onions

PERMANENT

at any stage of production or transportation or in land, the department may seize any infested onions which are separated from the land on which they were grown, or by written order direct the control and eradication of an infestation. ~~((The written order shall be mailed or hand delivered to the onion grower or field owner.))~~

(2) Movement of infested onions within the ~~((quarantine))~~ pest-free area for onion white rot or removal of infested onions from the ~~((quarantine))~~ pest-free area ~~((shall))~~ for onion white rot must be carried out only with the department's prior approval and under its supervision.

(3) Control and eradication methods that may be used ~~((shall be only))~~ are limited to those approved by the department ~~((and Washington State University and))~~. They may include:

- (a) The destruction of any infested onions;
- (b) A directive that a specific part or all of any infested area be taken out of onion production;
- (c) A directive that any infested area be fenced, properly diked to prevent off-flow of irrigation or rainwater, and planted to an approved crop which will prevent soil erosion and will not require annual tillage;
- (d) ~~((Prohibit))~~ Prohibiting the pasturing of animals on any infested area;
- (e) A directive that equipment, tools and machinery used on an infested area be cleaned and ~~((sterilized))~~ sanitized as described in WAC 16-470-320 prior to removal from the area.

WSR 01-01-014

PERMANENT RULES

DEPARTMENT OF AGRICULTURE

[Filed December 6, 2000, 3:37 p.m.]

Date of Adoption: December 6, 2000.

Purpose: Amend the existing rule to add fifteen invasive, nonnative wetland or aquatic plant species to the list of species that are prohibited from distribution, transportation, sale, purchase, or offer for sale in this state. Also, the existing rule needs clarification of provisions and updating of text and taxonomy.

Citation of Existing Rules Affected by this Order: Amending WAC 16-752-500, 16-752-505, 16-752-515, and 16-752-520.

Statutory Authority for Adoption: Chapters 17.24, 17.10, and 15.13 RCW.

Adopted under notice filed as WSR 00-21-116 on October 18, 2000.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 0, Amended 4, Repealed 0.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 0, Amended 2, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 4, Repealed 0.

Effective Date of Rule: Thirty-one days after filing.

December 6, 2000

Jim Jesernig

Director

AMENDATORY SECTION (Amending WSR 92-07-024, filed 3/10/92, effective 4/10/92)

WAC 16-752-500 Establishing wetland and aquatic weed quarantine. Washington waters and wetlands are threatened by nonnative, aggressive ~~((perennial))~~ weeds that destroy the commercial, aesthetic, fish and/or wildlife habitat, and recreational value of these areas. ~~((Parrot's Feather (or parrotfeather or waterfeather)))~~ African elodea, Brazilian elodea (or egeria), Eurasian watermilfoil, ~~((and))~~ fanwort, slender-leaved naiad, hydrilla ~~((;))~~ and water chestnut (a different species from the food "water chestnut" commonly sold in grocery stores) are submersed, rooted species that can invade shallow to deep water. Parrotfeather, water primrose, and yellow floating heart are rooted plants that invade shallow water and aquatic margins. European frogbit and swollen bladderwort are freely floating species. These species, when established, form dense mats that will clog irrigation systems and waterways, displace native species, alter fish and wildlife habitat, and seriously impact recreational use of the waterways.

Garden loosestrife, hairy willow herb, grass-leaved arrowhead, mud mat, marsh dew flower and flowering rush are rooted plants which invade wetlands, shallow water and aquatic margins. When established, their dense stands displace native vegetation and harm wildlife habitat.

Salt meadow cordgrass, common cordgrass, and smooth cordgrass are noxious weeds that have invaded ~~((a small part of the))~~ salt water estuarine areas on the Washington coast displacing native species, threatening bird and mammal habitats and the shellfish industry. Dense-flowered cordgrass, a closely related species, has potential to duplicate this invasion.

The director of agriculture, pursuant to the powers provided in chapters 17.10, 15.13 and 17.24 RCW, finds that the regulation and exclusion of these plants and plant parts are necessary to preserve Washington waters and wetlands, both fresh water and estuarine, from new or additional infestation. These requirements and restrictions, contained in WAC 16-752-500 through 16-752-525, are in addition to the requirements contained in WAC 232-12-271, "Criteria for planting aquatic plants and releasing wildlife," administered by the Washington state department of fish and wildlife.

PERMANENT

AMENDATORY SECTION (Amending WSR 92-07-024, filed 3/10/92, effective 4/10/92)

WAC 16-752-505 Wetland and aquatic weed quarantine—Regulated articles. All plants and plant parts of the following are regulated articles under this chapter: (~~Eurasian watermilfoil (*Myriophyllum spicatum*); hydrilla (*Hydrilla verticillata*); salt meadow cordgrass (*Spartina patens*); common cordgrass (*Spartina anglica*); smooth cordgrass (*Spartina alterniflora*); Parrot's Feather, parrotfeather or waterfeather (*Myriophyllum aquaticum* also known as *M. brasiliense* or *M. proserpinacoides*); and Brazilian elodea or egeria (*Egeria densa* or *Elodea densa*);~~)

<u>Scientific Name</u>	<u>Common Name</u>
<u><i>Butomus umbellatus</i></u>	<u>flowering rush</u>
<u><i>Cabomba caroliniana</i></u>	<u>fanwort</u>
<u><i>Egeria densa</i></u>	<u>Brazilian elodea</u>
<u><i>Epilobium hirsutum</i></u>	<u>hairy willow herb</u>
<u><i>Glossostigma diandrum</i></u>	<u>mud mat</u>
<u><i>Hydrilla verticillata</i></u>	<u>hydrilla</u>
<u><i>Hydrocharis morsus-ranae</i></u>	<u>European frog-bit</u>
<u><i>Lagarosiphon major</i></u>	<u>African elodea</u>
<u><i>Ludwigia hexapetala</i></u>	<u>water primrose</u>
<u><i>Lysimachia vulgaris</i></u>	<u>garden loosestrife</u>
<u><i>Murdannia keisak</i></u>	<u>marsh dew flower, Asian spiderwort</u>
<u><i>Myriophyllum aquaticum</i></u>	<u>parrotfeather</u>
<u><i>Myriophyllum spicatum</i></u>	<u>Eurasian watermilfoil</u>
<u><i>Najas minor</i></u>	<u>slender-leaved naiad, brittle naiad</u>
<u><i>Nymphoides peltata</i></u>	<u>yellow floating heart</u>
<u><i>Sagittaria graminea</i></u>	<u>grass-leaved arrowhead</u>
<u><i>Spartina alterniflora</i></u>	<u>smooth cordgrass</u>
<u><i>Spartina anglica</i></u>	<u>common cordgrass</u>
<u><i>Spartina densiflora</i></u>	<u>dense-flowered cordgrass</u>
<u><i>Spartina patens</i></u>	<u>salt meadow cordgrass</u>
<u><i>Trapa natans</i></u>	<u>water chestnut, bull nut</u>
<u><i>Utricularia inflata</i></u>	<u>swollen bladderwort</u>

AMENDATORY SECTION (Amending WSR 92-07-024, filed 3/10/92, effective 4/10/92)

WAC 16-752-515 Wetland and aquatic weed quarantine—Exemptions. The prohibition on transporting plants or plant parts in WAC 16-752-510 shall not apply to plants or plant parts collected for herbariums, research in control methods, creation of pressed specimens for educational or identification purposes and other scientific activities(~~(= Provided)),~~ **except** that all activities requiring live plants, except pressed specimens, are conducted under permit from the director and are conducted in such a way that no infestation is created. No permit is required to transport plants or plant parts, as a part

of a noxious weed control activity, to a sanitary landfill, to be burned, or otherwise for disposition(~~(= Provided, That)),~~ if such activities are conducted under the supervision of an official weed control agency or other public agency with management responsibilities for the control efforts and are conducted in such a manner that seed dispersal or dispersal of propagative materials to uninfested areas (~~(are))~~ **is** prevented. **No permit is required for live plants for educational or training purposes** (~~(shall not require a permit provided that)),~~ if the specimens are disposed of in such a manner as to prevent infestation.

AMENDATORY SECTION (Amending WSR 92-07-024, filed 3/10/92, effective 4/10/92)

WAC 16-752-520 Wetland and aquatic weed quarantine—Disposition of regulated articles. Any plants or plant parts transported, bought, sold, offered for sale, or planted in violation of this order shall be subject to destruction or shipment (~~(back))~~ out-of-state if the (~~(director))~~ **department** determines that such shipment may be done without danger of infestation. Any action (~~(shall))~~ **will** be at the expense of the owner or the owner's agent and without compensation.

WSR 01-01-015
PERMANENT RULES
DEPARTMENT OF AGRICULTURE
 [Filed December 6, 2000, 3:44 p.m.]

Date of Adoption: December 6, 2000.

Purpose: This rule provides general regulations for the seed program at the Department of Agriculture. As required by the governor's executive order on regulatory improvement and agency policy, the proposed rule is updated and rewritten in a clear and usable format. Existing chapters of rules will be repealed and the significant language in those chapters is revised into three new proposed chapters of rules for the seed program (chapters 16-301, 16-302, and 16-303 WAC). (CHAPTER 16-303 WAC WAS NOT FILED WITH WSR 00-24-077 FILED ON DECEMBER 4, 2000.)

Citation of Existing Rules Affected by this Order: Repealing chapters 16-300, 16-304, 16-313, 16-316, 16-317, 16-318, 16-493, 16-494, and 16-495 WAC.

Statutory Authority for Adoption: RCW 15.49.005, 15.49.081, 15.49.310, 15.49.370(3).

Other Authority: Chapter 17.24 RCW.

Adopted under notice filed as WSR 00-20-075 and 00-20-076 on October 3, 2000.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 0, Amended 0, Repealed 0.

PERMANENT

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 3, Amended 0, Repealed 9.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 3, Amended 0, Repealed 9.

Effective Date of Rule: Thirty-one days after filing.

December 6, 2000

Jim Jesernig

Director

Chapter 16-303 WAC

SEED ASSESSMENT, FEES FOR SEED SERVICES AND SEED CERTIFICATION

NEW SECTION

WAC 16-303-005 Purpose—Seed program fees for services and labeling of seed. The department certifies, inspects, samples, tests and analyzes agricultural, vegetable or flower seed sold or offered for sale in Washington state. As provided for in this chapter under the authority of chapter 15.49 RCW, the department hereby establishes labeling requirements, germination standards, and fees for funding of the Washington state seed program.

NEW SECTION

WAC 16-303-010 Definitions. Definitions for terms used in this chapter may be found in chapters 15.49 RCW and 16-301 WAC unless otherwise provided for in this chapter.

NEW SECTION

WAC 16-303-020 Schedule of charges—Billing policies and procedures. (1) Accounts.

(a) All billable services provided for under chapter 15.49 RCW are due and payable upon billing by the department. For the convenience of established accounts and in accord with good business practices, the department provides a monthly billing service. Accounts not paid in full within thirty days of billing are considered delinquent.

(b) On all debts due and payable after July 28, 1991, all delinquent accounts are assessed a late charge equal to one percent per month, or portion of a month, on the unpaid balance.

(c) Except for established accounts where there is a reasonable expectation of additional charges during a calendar month, the minimum billable amount through the monthly billing system is twenty dollars. All billable services of less than twenty dollars are due and payable on the date that service is rendered.

(d) No person with an account ninety days or more in arrears may receive service except on the basis of payment in full at the time service is rendered. Accounts in arrears may be subject to legal action for collection and are not restored to

monthly billing status until all past due amounts are paid-in-full.

(e) Accounts that become ninety or more days in arrears twice within a five-year period may be subject to a permanent requirement for payment in full at the time service is provided.

(2) Unless otherwise provided for in rule, requests for refund fees or assessments must be submitted to the department by June 30 of the year following payment of the fee or assessment.

(3) Fees for services not listed in rule are set on the basis of the actual cost to the department of agriculture, or the most appropriate fee established by rule.

ANNUAL SEED ASSESSMENT

NEW SECTION

WAC 16-303-105 Annual seed inspection charge. (1) Each person required to obtain a seed labeling permit, pursuant to RCW 15.49.400, of the Washington State Seed Act, must also, pursuant to RCW 15.49.310 and 15.49.370, pay a general seed inspection charge annually to the department in the amount of ten cents per one hundred dollars gross annual dollar sales in excess of ten thousand dollars of agricultural and/or vegetable seed distributed in this state during the preceding fiscal year, except that no assessment shall be collected on:

(a) Seed for which the assessment has been previously collected, except when such seed is relabeled;

(b) Agricultural or vegetable seed distributed out-of-state;

(c) Seed distributed in containers of four ounces or less;

(d) Stock seed; and

(e) Seed distributed by governmental agencies, such as, but not limited to, the United States Department of Agriculture national foundation seed project. Agricultural and/or vegetable seeds distributed under bailment contract are valued at the producer-conditioner agreement rate in lieu of sale.

(2) The seed assessment fees for the fiscal period beginning July 1 through June 30 are payable on February 1 of the following calendar year.

(3) The seed assessment may accompany the annual application for the seed labeling permit. A penalty of ten percent of the assessment fee or a minimum of ten dollars, whichever is greater, is added to all assessments not paid by February 1.

(4) The annual seed-labeling permit may not be issued until all seed assessments and penalties are satisfied.

NEW SECTION

WAC 16-303-115 Seed labeling registrant records. Each seed labeling registrant must maintain reasonable and necessary records accurately reflecting the gross annual dollar value of agricultural and/or vegetable seed distributed in this state.

SEED TESTING AND ANALYSIS FEES

NEW SECTION

WAC 16-303-200 Seed program testing fees. Seed testing fees are as follows:

(1) FIELD CROPS:

	MINIMUM SAMPLE SIZE	PURITY	GERMINATION	TZ
alfalfa	4 oz	14.00	12.00	22.00
alkaligrass	4 oz	18.00	11.00	22.00
barley	1.25 lb	14.00	12.00	22.00
beets, sugar	1.25 lb	19.00	21.00	22.00
bentgrass	2 oz	32.00	17.00	22.00
bermudagrass	4 oz	18.00	11.00	22.00
black medic	4 oz	14.00	12.00	22.00
bluegrass	4 oz	22.00	15.00	22.00
brassica sp.	6 oz	34.00	17.00	22.00
brome-mountain	6 oz	23.00	12.00	22.00
brome-smooth, meadow	6 oz	23.00	12.00	22.00
buckwheat	1.25 lb	14.00	12.00	22.00
canarygrass	8 oz	18.00	11.00	22.00
clover	4 oz	14.00	12.00	22.00
fescue	4 oz	22.00	12.00	22.00
flax-lewis	4 oz	14.00	12.00	22.00
foxtail	4 oz	14.00	11.00	22.00
garbanzo bean	1.25 lb	13.00	12.00	N/A
indian ricegrass	6 oz	18.00	11.00	22.00
junegrass	6 oz	18.00	11.00	22.00
lentil	1.25 lb	14.00	12.00	N/A
little bluestem	4 oz	21.00/hr	11.00	22.00
lupine	1.25 lb	14.00	12.00	N/A
milkvetch	1.25 lb	14.00	12.00	22.00
millet	1.25 lb	14.00	12.00	N/A
needle & thread	6 oz	18.00	11.00	22.00
needlegrass, green	6 oz	18.00	11.00	22.00
oatgrass	6 oz	18.00	11.00	N/A
oats	1.25 lb	14.00	12.00	22.00
orchardgrass	4 oz	25.00	13.00	22.00
peas	1.25 lb	13.00	12.00	N/A
prairie sandreed	6 oz	18.00	11.00	22.00
primrose	4 oz	14.00	12.00	N/A
redtop	2 oz	32.00	17.00	22.00
rice	1.25 lb	14.00	12.00	N/A
rye	1.25 lb	14.00	12.00	22.00
ryegrass, peren- nial	4 oz	22.00	11.00	22.00
ryegrass, annual	4 oz	22.00	11.00	22.00
safflower	1.25 lb	14.00	12.00	N/A
sainfoin	1.25 lb	14.00	12.00	N/A
sand dropseed	4 oz	18.00	11.00	22.00
sand lovegrass	4 oz	18.00	11.00	22.00
sideoats grama	4 oz	21.00/hr	11.00	22.00
small burnett	8 oz	14.00	12.00	N/A

	MINIMUM SAMPLE SIZE	PURITY	GERMINATION	TZ
sorghum	1.25 lb	14.00	12.00	N/A
sudangrass	8 oz	14.00	12.00	22.00
sunflower	1.25 lb	14.00	12.00	N/A
swiss chard	1.25 lb	34.00	18.00	N/A
switchgrass	4 oz	18.00	11.00	22.00
timothy	4 oz	18.00	11.00	22.00
trefoil	4 oz	14.00	12.00	N/A
triticale	1.25 lb	14.00	12.00	22.00
vetch	1.25 lb	18.00	12.00	22.00
wheat	1.25 lb	14.00	12.00	22.00
wheatgrass, beardless slender				
thickspike	6 oz	38.00	15.00	22.00
wheatgrass, bluebunch	6 oz	38.00	15.00	22.00
wheatgrass, crested	4 oz	26.00	15.00	22.00
wheatgrass, tall intermediate				
pubescent	6 oz	38.00	15.00	22.00
wheatgrass, western	6 oz	38.00	15.00	22.00
wildrye	6 oz	18.00	11.00	22.00
zoysia	4 oz	18.00	11.00	22.00

(2) VEGETABLES:

	MINIMUM SAMPLE SIZE	PURITY	GERMINATION	TZ
asparagus	1.25 lb	14.00	12.00	N/A
beans	1.25 lb	13.00	12.00	N/A
beets	1.25 lb	19.00	18.00	N/A
cantaloupe	1.25 lb	14.00	12.00	N/A
carrot	4 oz	14.00	12.00	38.00
celery	4 oz	14.00	12.00	N/A
chard	4 oz	14.00	21.00	21.00
corn	1.25 lb	14.00	12.00	N/A
cucumber	1.25 lb	14.00	12.00	N/A
dill	4 oz	14.00	12.00	N/A
eggplant	4 oz	14.00	12.00	N/A
endive	4 oz	14.00	12.00	N/A
leek	8 oz	14.00	12.00	N/A
lettuce	4 oz	14.00	12.00	N/A
okra	4 oz	14.00	12.00	N/A
onion	8 oz	14.00	12.00	N/A
parsley	4 oz	14.00	12.00	N/A
parsnip	4 oz	14.00	12.00	N/A
pepper	8 oz	14.00	12.00	N/A
pumpkin	1.25 lb	14.00	12.00	N/A
radish	1.00 lb	14.00	12.00	N/A

NEW SECTION

WAC 16-303-210 Fees for special seed tests. Fees for special seed tests are as follows: (Standard noxious exam size unless otherwise specified.)

Test	Fee	Other Considerations
(1) All states noxious weed examination	\$10.00	
(2) Analysis of partially cleaned, uncleaned or field run seed with excessive inert, or crop or weed seeds	\$21.00 hourly rate	
(3) Brassica seed chemical identification	\$10.00	
(4) Cold (vigor) test for wheat	\$50.00	
(5) Crop and weed exam (Required for all foundation and registered class grass seeds)	Purity fee minus \$5.00	Hourly rate will be assessed when applicable; hourly rate applies when a larger amount is requested
(6) Fescue seed fluorescence test	\$15.00	Test required on certified samples
(7) Fluorescence test (400 seed test)	\$13.00	
(8) Miscellaneous services	\$21.00 hourly rate	
(9) Pest and disease	\$17.00	
(10) Poa annua check		
Bentgrass (5 grams)	\$17.00	
Bluegrass (5 grams)	\$17.00	
Other grasses (10 grams)	\$17.00	
(11) Rules test—Canadian	PURITY	GERMINATION
Alfalfa, clover	\$21.00	\$12.00
Kentucky bluegrass	\$32.00	\$15.00
Peas, lentils	\$21.00	\$12.00
Bentgrass	\$47.00	\$17.00
(12) Rules test—I.S.T.A.	PURITY	GERMINATION
Alfalfa, clover	\$21.00	\$15.00
Kentucky bluegrass	\$32.00	\$15.00
Peas, lentils	\$21.00	\$15.00
(13) Samples requiring special preparation for germination, for example pelleted seeds	\$21.00	Additional Charge
(14) Seed Count	\$17.00	
(15) Sod analysis check (25 gram exam to evaluate if a lot appears to be sod quality)	\$19.00	Phone report only

PERMANENT

Test	Fee	Other Considerations
(16) Sod seed analysis (A special test of turf grasses for those who need a detailed examination of seed before purchase and/or use)	Bluegrass \$60.00 Fescue \$42.00 Ryegrass \$34.00	Bluegrass test includes purity, 25 gram crop and weed exam, and 10 gram Poa annua check. Ryegrass and Fescue test include purity and 50 gram crop and weed exam.
(17) Sodium Hydroxide test for presence of red and/or white wheat	\$10.00	
(18) Soil exam or similar (A visual examination of a representative sample)	\$17.00	Reported on seed analysis certificate
(19) Undesirable grass species examination (UGS test)	\$12.00	
(20) Variety separation of Kentucky bluegrass	\$19.00	
If separated at time of purity analysis	\$9.00	

NEW SECTION

WAC 16-303-220 Inventory testing for seed germination. Inventory testing for seed germination is as follows:

(1) Inventory testing is a service to provide opportunity to have carry-over seed stocks, except mixtures, tested at the lowest possible charge. This is not an official germination test. Regular service samples have priority and the Seed Branch Laboratory will run samples, as germination space is available.

(2) Samples must be plainly labeled "inventory samples" according to the sender's designation. The laboratory assumes no responsibility for correct identification.

(3) Reports on inventory testing are mailed after all tests are completed. Samples and test reports do not become a part of the seed program's permanent record.

(4) The fee for inventory testing is one-half the regular germination fee.

NEW SECTION

WAC 16-303-230 Official seed sampling or similar service. (1) The fee for official seed sampling or similar service is as follows:

Crop	Fee	Minimum charge
Peas, beans, small grains or seeds of similar size	\$ 0.05 Per cwt.	\$21.00
For all other kinds	\$ 0.15 Per cwt.	\$21.00

(2) If a special trip is required to provide a service, the person requesting the service may be charged at the rate of \$17.00 per hour travel time plus a mileage fee set by the Washington State Office of Financial Management in addition to the specific fee for service. All standby time is charged at the rate of \$21.00 per man-hour.

NEW SECTION

WAC 16-303-240 Fees for blending seed. Fees for blending seed are five cents per one hundred pounds based on the pounds of seed bagged plus cost of a purity and germination test which is required on the official sample of each blend. All fees are payable by persons or firm requesting permission for said blend.

NEW SECTION

WAC 16-303-250 Miscellaneous charges for seed services. (1) Fees for miscellaneous department seed services are as follows:

Service	Fee
Rush samples (including phone or FAX report if requested at time sample is submitted)	\$12.00
Phone reports on test result, per call	\$ 3.50 per call
Preliminary report on germination	\$ 8.00
Phone report only	\$ 1.50
Additional mailing of report	\$ 2.50 each destination
Recopies of reports	\$ 2.50 (minimum fee)
Revised reports	\$ 5.00 (minimum fee - or hourly fee when applicable)
Fee for special handling service, for example Federal Express, Air Parcel or air freight	\$ 3.50
Fee for facsimile transmission of documents	\$ 3.50 per document

PERMANENT

Service	Fee
Travel time - additional or special requested trips	\$17.00
Mileage - additional or special requested trips	As established by the Washington State Office of Financial Management

(2) Test plot examinations or consultant work in seed plots, seed fields, seed conditioning plants, etc., shall be at the rate of \$21.00 per hour plus mileage and travel time.

FEES FOR SEED CERTIFICATION OR OTHER SERVICES

NEW SECTION

WAC 16-303-300 Phyto-sanitary certification of seed—Fees. (1) Fees for phyto-sanitary certification of seed are as follows:

Service	Fee	Other Considerations
Phyto-sanitary certificate	\$21.00 each	
Field inspection—All seed except wheat seed (for each required inspection)	\$5.00 per acre	\$20.00 minimum fee payable with application
Field inspection—Wheat seed only (for each required inspection)	\$2.00 per acre or fraction thereof	Payable with application
Area inspection	\$.05 per cwt.	\$ 20.00 minimum fee per certificate \$150.00 maximum fee per certificate Billed at time certificate is issued
Late fee—		
Application	\$30.00 each	
Sampling (When Required)—		
Beans, peas, lentils, and cereal grains	\$.05 per cwt.	
Other crops	\$.15 per cwt.	
Serology test	Fee as established by the testing laboratory.	
Laboratory analysis of plant material to verify disease	An additional fee of actual cost shall be charged when necessary to examine plant material and/or seed	

NEW SECTION

WAC 16-303-310 Organization for economic cooperation and development scheme for varietal certification (O.E.C.D.) fees. In addition to fees required by applicable Washington certification rules, the following fees shall apply to all seed tagged O.E.C.D and is payable by the person requesting O.E.C.D. certificate. The certifying agency may require fees paid in advance:

Service	Fee	Other Considerations
O.E.C.D. certificate	\$10.00 each	
O.E.C.D. grow out test	\$46.00 each entry	No charge for control entry

NEW SECTION

WAC 16-303-315 Service fee for sod quality seed tags and tagging. Service fee for sod quality seed tags and tagging shall be \$0.10 per cwt. The official sampling fee is charged when resampling is required.

NEW SECTION

WAC 16-303-317 Annual and rough bluegrass quarantine fees. Fees for sampling and analysis for the presence of annual or rough bluegrass are those fees established in this chapter and:

(1) Annual Bluegrass - inspection fee for nursery plantings for the presence of annual bluegrass is \$50.00 per acre or portion thereof. The tagging fee is \$0.50 cwt. with a minimum fee of \$10.00.

(2) Rough Bluegrass - inspection fee for nursery plantings is \$50.00 per acre or portion thereof.

NEW SECTION

WAC 16-303-320 Certification fees for seed certified by the department except grasses. Fees for seed certification services for seed certified by the department other than grasses are as follows. Fees apply to both new and renewal applications:

PERMANENT

Seed	Application Fee 1/	Seedling producing or field inspection Fee 2/	Late Application Penalty Fee	Reinspection Fee (other than isolation)	Production Fee (includes sampling and tagging)	Seed shipped Out-of-State (uncleaned)
Alfalfa, Red clover, White clover and Trefoil	\$15.00 per variety per grower	\$1.75/acre	\$30.00	\$40.00 ea. field	\$0.50/cwt. 5/	\$0.19/cwt.
Bean	\$15.00 per variety per grower	\$1.75/acre 3/ (one inspection) \$3.50/acre 4/ (two inspections)	\$30.00	\$40.00 ea. field	\$0.50/cwt.	\$0.19/cwt.
Corn	\$15.00 for each separate combination/or isolation	\$25.00 first acre \$10.00 ea. additional acre except hybrid corn \$3.50 ea. additional acre	—	—	—	—
Sudangrass	\$15.00 per field	\$1.75/acre	\$30.00 per field	—	\$0.40/cwt.	—
Rapeseed	\$15.00 per variety per grower	\$1.75/acre (one inspection)	\$15.00 per grower	\$20.00 ea. field	\$0.50/cwt.	—

- 1/ Refer to WAC 16-302-050 for seed certification application due dates.
- 2/ Refundable if acreage is withdrawn before inspection. Except for bean seed, required of seedling fields to be harvested for certification the year of planting. Notification of seeding field to be harvested for certification and required fees are due July 31.
- 3/ One inspection is required for Great Northern Red Mexican, pinto, pink, and small white bean.
- 4/ Includes windrow inspection which is required for certification of snap beans, kidney beans, and eligibility for shipment into Idaho.
- 5/ Sampling and production fees are billed at completion of tests. If none of the seed is tagged, ten cents of the fifty cents per cwt. production fee is refundable.

NEW SECTION

WAC 16-303-330 Certification fees for grass seed.

Certification fees for grass seed except Sudangrass are as follows:

(1) Application fees:

(a) Seedling application fee:

Per variety, per field \$15.00

(b) Late seedling penalty fee: (Per kind) \$30.00

(c) Seedling producing application fee:

Per field, per grower \$15.00

Required of seedling fields to be harvested for certification the year of planting. Notification of seedling field to be harvested for certification and required fees shall be due July 31:

(2) Renewal applications:

(a) Renewal application fee:

Per variety, per grower \$15.00

(b) Late renewal penalty fee: (Per variety) \$30.00

This additional fee shall be charged for renewal applications received after May 1.

(c) Inspection fee per field. \$30.00

(3) Annual grasses inspection fee per acre \$ 1.75

Applications are due within sixty days after planting.

(4) Reinspection: Other than isolation—each field \$40.00

(5) Inspection and final certification fees: Inspection and final certification fees are based on pounds sampled and billed upon completion of required tests (Option A). Those dealers requesting sampling and tagging privileges and/or participation in Option B must sign a memorandum of agreement that shall expire on June 30 of each year. The memorandum may be terminated by the director if the conditioner violates certification standards or requirements of memorandum.

(a) Option A: When based on pounds sampled, and billed at completion of required laboratory tests, the fees are:

(i) Final certification fee \$ 0.80 per one hundred pounds. (If no seed is tagged, twenty cents of the final certification fee is refundable upon request.)

(ii) Seed shipped out-of-state for conditioning per one hundred pounds (unclean weight). \$ 0.30

(iii) Service fee for out-of-state origin (per cwt.) \$ 0.30

(iv) Blend fee is as established by blend rule, and in addition to above fees. However, blend fee is not applicable to salvage blends.

PERMANENT

(v) Payment of fees is the responsibility of the person signing the application. However, conditioner may assume this responsibility.

(b) Option B: When based on pounds tagged after required laboratory tests are completed, the fee is:

(i) Final certification fee \$ 1.10 per one hundred pounds. (Minimum fee per tagging) \$10.00

(ii) Service fee for out-of-state origin \$ 0.65 per one hundred pounds.

(iii) Blend fee (in addition to fee established by blend rule) is payable upon completion of blend on total weight of blend, and is as follows:

(A) Washington origin certified seed used in blend \$ 1.00 per one hundred pounds.

(B) Out-of-state origin certified seed used in blend \$ 0.60 per one hundred pounds except that those fees listed in (a) and (b) above are not applicable to certified seed that is tagged and sealed, and on which final fees have been paid.

(C) A refund or credit is issued for the percent of the blend lot not tagged. (For example, if forty percent of the blend is not tagged, forty percent of the fees charged under Option B above are refundable.)

(6) Payment of fees is the responsibility of the conditioner. A conditioner choosing this program must handle all certified grasses in his warehouse under this program for the entire crop year. Upon termination or nonrenewal of Option B memorandum of agreement, conditioner is responsible for Option A fees on all certified seed not tagged at termination date.

(7) Fees for services such as O.E.C.D. and sod quality, etc., are in addition to the fees listed in these standards.

(8) Fees for reissue of tags are ten cents per tag with a minimum fee of ten dollars.

(9) The seed processor is responsible for seed certification fees including sampling, testing, production and final certification fees, and may request the responsibility for additional fees.

(a) Application fee per variety per grower \$18.87

(b) Field inspection fee per acre except millet and hybrid sorghum \$ 2.63

(c) Millet - first acre \$28.06
..... - each additional acre \$ 5.61

(d) Hybrid sorghum - first acre \$28.06
..... - each additional acre \$11.22

(e) Special field inspection fee per acre \$ 2.24

(f) Late application fee \$17.68

(g) Reinspection fee \$35.39
minimum for each field which did not pass field inspection plus \$ 0.40 for each acre over twenty-five. The reinspection fee for isolation requirements only for a field of any size is \$35.39.

(h) Final certification fee \$0.225
per cwt. of clean seed sampled, which is charged to conditioning plant, or production fee \$0.105

per cwt. of production from fields inspected which is utilized for seed, which is charged to the grower or the final seller prior to brokerage, retail sale, sale to plant not approved for conditioning certified seed, or transshipment out-of-state.

(i) Sampling fee \$0.105
per cwt. of clean seed sampled, with minimum charge of ten dollars per sample, which is charged to conditioning plant in lieu of mechanical sampling.

(2) A field may be withdrawn upon notification by the applicant to the certifying agency's office before field inspection. In such case, the field inspection fee is refunded upon request until June 30 of the year following harvest.

(3) Harvest before field inspection causes forfeitures of both the application and field inspection fees, and completion of certification.

NEW SECTION

WAC 16-303-340 Seed certification fees for buckwheat, chickpea, field pea, lentil, millet, soybean, sorghum and small grains. (1) Seed certification fees for buckwheat, chickpea, field pea, lentil, millet, soybean, sorghum and small grains are as follows:

AMENDATORY SECTION (Amending Order 161, filed 9/15/86, effective 1/1/87)

WAC 230-02-130 Net gambling income defined. "Net gambling income" means net gambling receipts, less all other expenses related to the operation of a licensed activity ~~((~~actually~~ and))~~ paid out during the same period of time: Provided, That expenses must be reported on the ~~((~~accrual~~ ~~accrual~~))~~ accrual basis if the records are normally maintained on that basis.

AMENDATORY SECTION (Amending WSR 96-07-075, filed 3/19/96, effective 7/1/96)

WAC 230-04-040 Certification procedure—Charitable and nonprofit organizations—Additional information required. Any organization not currently licensed to conduct gambling activities and requesting to be certified to conduct gambling activities in Group III, IV, or V, or planning to pay premises rent exceeding two thousand dollars per month, including all terms, shall submit a pro forma plan of operations, including a market study. The plan shall be detailed enough to allow commission staff the ability to assess the profitability of the planned gambling activity and potential

for compliance with WAC ~~((230-20-064))~~ 230-20-059 and 230-30-052~~((2))~~. The plan shall include at least the following information, if applicable:

- (1) Research procedures and planning assumptions used;
- (2) Planned number of customers or attendance;
- (3) Days and hours of operations;
- (4) If planned activities include bingo, the following must be provided:
 - (a) Anticipated market area and map of competing organizations that operate similar gambling activities, along with their days of operation;
 - (b) Number of bingo sessions;
 - (c) Bingo card prices and estimated sales per player;
 - (d) Bingo prize payouts and game schedules;
 - (5) Estimated gross gambling receipts from each activity;
 - (6) Estimated expenses and net income;
 - (7) Details of income generating activities planned in conjunction with the gambling activity, such as snack bar operations or other retail sales and the anticipated net income from such activities; and
 - (8) Other information requested by commission staff.

AMENDATORY SECTION (Amending Order 383, filed 4/14/00, effective 5/15/00)

WAC 230-04-022 Certification procedure—Information required from all applicants. In addition to other information required by the commission, each applicant shall provide the following information on or attached to the application:

Articles of incorporation and bylaws.

(1) Copy of corporate applicants' articles of incorporation and bylaws; or, if not a corporation, a copy of any bylaws and other documents which set out the organizational structure and purposes of the organization;

IRS tax exemption letter.

(2) A copy of a nonprofit or charitable applicant's Internal Revenue Service tax exemption letter if one has been obtained;

Lease or rental agreements.

(3) Details and copies of all lease or rental arrangements, whether oral or written, between the applicant and the owner of premises upon which the gambling activity will be conducted, if such premises are leased or rented;

Franchise agreements.

(4) Details and copies of any and all franchise agreements or other agreements, whether written or oral, if any, between the applicant and distributors or manufacturers of equipment or between the applicant and any other person where those agreements relate to gambling activities or gambling equipment;

PERMANENT

Management agreements.

(5) Details and copies of all proposed management agreements or contracts between the applicant and any gambling service supplier involved in providing services defined in WAC 230-02-205. All such agreements or contracts shall be reviewed by commission staff prior to the effective dates of the agreements to assure compliance with this title. No financing or management services shall be provided prior to commission approval of the contracts;

Paid employees or agents.

(6) The name, address, date of birth, and Social Security number of each paid employee or agent who will work in the activity for which the license is sought and a schedule of the proposed number of employees, job descriptions, and a proposed pay schedule;

Substantial interest holders.

(7) ~~((For each person listed below, a completed copy of the commission's form entitled "Personal information form":~~

~~(a) Each person who has a substantial interest in the applicant;~~

~~(b) Each person who is the chief executive officer, the chairman of a board, and the financial records officer of a corporation and/or bona fide nonprofit charitable organization;~~

~~(c) Each person who will serve in a supervisory capacity over those persons in the direct management or direct operation of the activity for which the license is sought))~~ Sufficient personal information to ensure each substantial interest holder as defined by WAC 230-02-300 is qualified to hold a license or participate in a licensed or authorized gambling activity;

Report changes to application.

(8) If any information required on the application, changes or becomes inaccurate in any way, the commission shall be notified prior to issuance of a license. Failure to notify the commission of any changes affecting an application may constitute grounds for suspension or revocation of all licenses.

Exceptions for cities and towns.

(9) ~~((Sections))~~ Subsections (1), (2), and (7) of this section shall not apply to applications by or on behalf of an incorporated city or town in the state of Washington.

AMENDATORY SECTION (Amending Order 244, filed 9/15/93, effective 10/16/93)

WAC 230-04-135 Commercial amusement games—License required. Prior to operating, renting, leasing, or otherwise sharing in the proceeds of amusement games operated at any location, commercial amusement game operators shall first obtain a license from the commission. The following requirements apply to commercial amusement game operators:

(1) Class A commercial amusement game licensees may allow a Class B and above licensee to operate amusement games at their business premises.

(2) Class B and above commercial amusement game licensees may locate and operate amusement game at any location authorized by WAC 230-04-138 or rent, lease, or sell amusement devices or amusement game equipment on a time basis to any licensed amusement game operator.

(3) In addition to the requirements for certification as set out in WAC 230-04-020 and all other sections of this title, applicants must provide the following additional information for each operating locations:

(a) All locations:

(i) A list of all locations and time and dates at which the activity will be operated;

(ii) When operated at a location not owned, rented, or leased by the applicant, written permission from the person, organization, county, city or town, or an authorized agent thereof, to locate and operate amusement games at that location;

~~(iii) ((A personal information form))~~ Sufficient information to determine the identity and personal qualifications for all "adult supervisors," as required by WAC 230-20-680(2);

(iv) A copy of any rental/lease agreement which allows operation of commercial amusement games at any location not owned or otherwise controlled by a licensee. The document must disclose full details of the rental/lease agreement, including any revenue sharing provisions, all costs to be shared, and any restrictions regarding the number of amusement games to be operated; and

(v) Copies of any contract related to rental, lease, or purchase agreement of amusement game equipment.

(b) Permanent locations. In addition to the information required by (a) of this subsection, all applicants requesting to operate amusement games at locations authorized by WAC 230-04-138 (1)(f), (g), (h), (i), (j), (k), or (l) must provide details necessary to determine qualification of the location for operation of the activity and include the following minimum details:

(i) Amusement parks, as authorized by WAC 230-04-138 (1)(f): The number of mechanical or aquatic rides, theatrical productions, motion pictures, and slide show presentations available for the public;

(ii) Regional shopping center, as authorized by WAC 230-04-138 (1)(g): The size of the shopping center, in gross square feet not including parking areas;

(iii) Taverns and restaurant with cocktail lounges, as authorized by WAC 230-04-138 (1)(h): Washington state liquor control board license number and expiration date, and a statement of whether minors are prohibited from all portions of the premises;

(iv) Movie theaters, bowling alleys, miniature golf course facilities, skating facilities, and amusement centers, as authorized by WAC 230-04-138 (1)(i): A complete description of the business activities conducted; and if an amusement center, the number of amusement devices and income derived from such devices and all other business activities conducted by the licensee during the last twelve months;

(v) Family entertainment restaurants, as authorized by WAC 230-04-138 (1)(j): The number of amusement devices,

theatrical productions, mechanical rides, motion pictures, and slide show presentation available for customers on a daily basis; and the amount of gross income generated from the entire business and that portion of gross income generated from food service for on-premises consumption; and

(vi) Grocery stores as authorized by WAC 230-04-138 (1)(k): The type of retail products sold and size of the store premises, in gross square feet not including parking areas.

(c) Limited duration locations. In addition to the information required by (a) of this subsection, all applicants requesting to operate commercial amusement games must receive written permission from the sponsor of any activity authorized by WAC 230-04-138 (1)(a), (d), or (e) and submit an itinerary that includes planned operating dates for all locations at which the applicant plans operations during the year. This itinerary must be updated any time the dates of operation change.

AMENDATORY SECTION (Amending Order 85, filed 5/25/78)

WAC 230-04-170 Applicants—Qualifications. (~~Where a married person is an applicant for, or holder of a license, the spouse of such applicant, if the parties are maintaining a marital community, shall be required to have the same qualifications as the applicant.~~)

~~This rule shall not apply with respect to licenses required for employees of an operator licensed to conduct activities authorized by RCW 9.46.030.) When a married person maintains a marital community and applies for, or holds, a license to operate gambling activities, their spouse must also meet the qualifications to hold a gambling license. This includes, but is not limited to, owners of commercial gambling establishments and officers of charitable/nonprofit organizations. However, the spouse of an employee that works for a gambling operation is not required to meet the licensing qualifications.~~

AMENDATORY SECTION (Amending Order 304, filed 11/21/96, effective 1/1/97)

WAC 230-04-220 Prorating and refunding of fees. (1) Unless otherwise provided by law, there will be no prorating or refunding of any license fee subsequent to issuance of a license or permit for the following actions:

- (a) Discontinuation of business;
- (b) Voluntary surrender of a license or permit; and
- (c) When a license or permit has been suspended, revoked, or otherwise canceled.

(2) Upon denial, voluntary withdrawal or administrative closure of an application for license, adoption or change of trade name, or change of location, the commission shall retain that portion of the fee tendered therewith as is necessary to offset its costs of processing and investigating the application: Provided, That the commission shall retain the entire fee when an individual license applicant performs any or all portions of the duties for which a permanent license is sought.

AMENDATORY SECTION (Amending Order 383, filed 4/14/00, effective 5/15/00)

WAC 230-08-027 House-banked card games—General accounting records to be maintained. Every licensee authorized to offer house-banked card games shall keep and maintain a complete set of records, which have been approved by commission staff. Such records shall include all details of activities related to the conduct of the licensed activity. The following requirements shall apply:

Revenue and expenses.

(1) Each licensee shall maintain legible, accurate and complete records of all transactions relating to the revenues and costs of the gaming operation. These records shall be maintained in a format to ensure consistency, comparability, and effective disclosure of financial information.

General accounting records.

(2) General accounting records shall be maintained on a double entry system of accounting with transactions recorded on an accrual basis, to include detailed, supporting, subsidiary records, sufficient to meet the requirements below.

Recordkeeping.

(3) The detailed, supporting and subsidiary records shall include, but not necessarily be limited to:

(a) Records of all patrons' checks initially accepted, deposited, and returned as "uncollected," and ultimately written off as "uncollectible";

(b) Statistical game records to reflect drop and win amounts for each table, for each game, and for at least each period for which the drop boxes are removed, which shall be at the minimum, the end of each gaming day;

(c) Records of investments in property, including, but not limited to, equipment used directly in connection with the gaming operation;

(d) Records of amounts payable by the gaming operation;

(e) Records which identify the purchase, receipt, and destruction of all cards and gaming chips used in wagering; and

(f) Records of services provided for the operation of gaming activity.

Copies.

(4) Whenever duplicate or triplicate copies are required of a form, record or document:

(a) The original, duplicate, and triplicate copies shall be color-coded;

(b) If under these standards, forms, records, and documents are required to be inserted in a locked dispenser, the last copy shall remain in a continuous unbroken form in the dispenser; and

(c) If under these standards, forms or serial numbers of forms are required to be accounted for or copies of forms are required to be compared for agreement and exceptions noted, such exceptions shall be reported immediately to the commission for investigation.

Storing documents.

(5) All forms, records, documents and stored data required to be prepared, maintained and controlled shall:

(a) Have the title of the form, record, document, or stored data such as "fill slip," "request for fill," "credit slip," "request for credit," "reconciliation," etc., imprinted or pre-printed thereon or therein; and

(b) Be located at the licensed premises for three years: Provided, That the director or the director's designee may waive parts of this section if requested by the licensee.

Employee records.

(6) Licensees shall maintain a records system that ensures all applicable employees have met licensing requirements. The system shall include employee names, license numbers and expiration dates. In addition, photocopies of all current employees' licenses must be maintained on the premises. If an employee license has not yet been issued, the licensee shall maintain a copy of the temporary employment authorization, documentation that the required payment has been made, and whether the employee has adhered to the ~~((twenty-day))~~ ten-day waiting period, if applicable. The licensee shall ensure the commission is notified if an employee license has not been received within sixty days of employment.

AMENDATORY SECTION (Amending Order 53, filed 5/25/76)

WAC 230-08-200 All records subject to commission audit. ~~((Any and all records of any person operating any activity authorized by RCW 9.46.030, or any licensed distributor or manufacturer of gambling devices, paraphernalia or equipment, or any commission permittee, its employees, any of its members that directly participate in the management, operation or promotion of an authorized activity, including but not limited to, those which are required to be kept or which relate in any manner to the conduct of any activity licensed by the commission, or of a rule of the commission, shall be subject to an audit by the commission and any of its authorized representatives, without notice. Provided, That unless otherwise provided elsewhere in these rules, such an audit must be begun between the hours of 8:00 a.m. and 5:00 p.m. on a weekday other than a holiday, or during the hours in which the activity is being actually operated, and performed upon the premises of the licensee where the records are located.~~

~~In the event of an audit by the commission, or any of its authorized representatives, the operator, distributor, manufacturer or permittee, shall immediately provide all such records, provide a place where such audit may be performed and render such reasonable assistance to the commission and its representatives in inspecting such records as may be requested.))~~ (1) Any person involved in a gambling activity is subject to a commission audit. This includes any:

(a) Person, entity or organization licensed by the gambling commission;

(b) Person operating an unlicensed gambling activity authorized by RCW 9.46.0321;

(c) Commission permittee; and

(d) Employee or member that directly participates in the management, operation or promotion of an authorized gambling activity.

(2) Any and all gambling records are subject to an audit by the commission and any of its authorized representatives without notice. This includes, but is not limited to, records which are required to be kept or relate in any manner to the conduct of a gambling activity.

(3) Unless otherwise provided for elsewhere in these rules, a commission audit must begin at the premises of the licensee where the records are located. The audit must begin:

(a) Between the hours of 8:00 a.m. and 5:00 p.m. on a weekday, other than a holiday; or

(b) During the hours in which the gambling activity is actually being operated.

(4) In the event of an audit by the commission or any of its authorized representatives, the person or business under audit shall immediately provide:

(a) All requested records;

(b) A safe place with adequate space where such audit may be performed; and

(c) Reasonable assistance to the commission and its representatives in inspecting such records as may be requested.

AMENDATORY SECTION (Amending WSR 97-24-031, filed 11/25/97, effective 1/1/98)

WAC 230-12-300 Resident agent to be appointed by ~~((foreign manufacturers, distributors, gambling services suppliers, and commercial amusement game operators))~~ out-of-state licensees. (1) All ~~((manufacturers, distributors, gambling services suppliers, or class B or above commercial amusement game operators engaged in the following activities within this state, or for use in this state;))~~ licensees that do not own or otherwise maintain a business office or licensed premises within ~~((this))~~ Washington state shall appoint a resident agent for the purpose of receipt and acceptance of service of process and other communications on their behalf from the commission(~~(:~~

~~(a) Manufacturing, selling or distributing gambling supplies or equipment; and~~

~~(b) Selling or providing gambling related services; and~~

~~(c) Renting or leasing of commercial amusement games and equipment)).~~

(2) The resident agent shall be a natural person who is a resident and living in the state of Washington and who is eighteen years of age or older.

(3) The name and business address where service of process and delivery of mail can be made, and home address of such designated resident agent shall be filed with the commission ~~((and with any other state agency required by law)).~~

AMENDATORY SECTION (Amending Order 113, filed 10/15/81)

WAC 230-20-065 Licensed bingo manager required on premises. ~~((No bona fide charitable or nonprofit organization, except when operating at an authorized agricultural fair,~~

~~or other special event as authorized by the commission, or under RCW 9.46.030(3), as now enacted or hereafter amended, or under a Class A or Class B or Class C license, shall operate a bingo game unless it is under the supervision of a licensed bingo manager who is on the premises at which the bingo game is licensed for operation during all hours of its operation.)~~ All licensed bingo games must be operated under the supervision of a licensed bingo manager. The bingo manager must be on the premises at which the bingo game is licensed for operation, during all hours bingo games are conducted; however, a bingo manager is not required for bingo games operated:

- (1) At an authorized agricultural fair;
- (2) At a special event authorized by the commission;
- (3) Under RCW 9.46.0321; or
- (4) Under a Class A, B, or C bingo license.

AMENDATORY SECTION (Amending Order 378, filed 12/1/99, effective 1/1/00)

WAC 230-20-192 Standards for disposable bingo cards—Requirements and definitions. Disposable bingo cards sold for use in the state of Washington shall be manufactured and controlled using processes and procedures that ensure integrity of the activity and facilitates regulation by the commission.

Requirements for manufacturers of disposable bingo cards.

(1) Manufacturers shall establish quality control procedures necessary to ensure manufacturing processes, including collating of cards into packs or packets, meet the requirements of this section. Quality control procedures shall be documented and provided to commission staff upon request.

Definitions.

(2) For purposes of this title, the following definitions apply:

(a) "Card" or "face" means a unique group and configuration of numbers or symbols imprinted on paper, cardboard, or other materials, and designed to be used to conduct bingo games;

(b) "Card number" means the number assigned by the manufacturer to identify a single card or face. A "card number" may also be referred to as a "face" or "perm" number;

(c) "Collate" means the process of cutting and/or assembling master sheets or precut sheets of cards from one or more sets of cards into packets or books for marketing purposes. "Collate" may also be referred to as "finish" or "finishing";

(d) "Collation" means a group of packets or books of cards assembled from more than one set of cards;

(e) "Consecutively numbered" means a numbering system normally beginning with the number one, increased by one for each individual unit added to the group, and ending with a number identical to the total number of units assigned to that group;

(f) "Cut" means the layout or orientation of cards or sheets of cards subdivided from a master sheet of cards or faces. A "cut" will be either square, horizontal, or vertical;

(g) "Disposable bingo card" means a nonreusable paper bingo card manufactured by a licensed manufacturer;

(h) "Duplicate cards" means two or more cards that are imprinted with the same numbers or symbols, regardless of the configuration or location of such numbers or symbols on the card;

(i) "On" means the number of cards or faces imprinted on a sheet or "cut." The term is normally preceded by the number of cards;

(j) "Pack" or "packet" means a group of cards or sheets of cards collated into a book when each page or sheet in the book is intended for use to play a separate bingo game, including "on-the-way" games, within a session;

(k) "Product line" means a specific type of card, identifiable by features or characteristics that are unique when compared to other types of cards marketed by the manufacturer. A "product line" includes all series and all cards within each series as identified by the manufacturer;

(l) "Serial number" means a number assigned to a set of cards by a manufacturer for identification and tracking purposes when the same number is not used to identify another set of cards from the same product line, color, border pattern, and series in less than 999,999 occurrences or twelve months, whichever occurs first: Provided, That if the product line is used as a determining factor for assignment of a serial number, the difference between various product lines must be readily identifiable by observation;

(m) "Series" of cards means a specific group of cards or faces that have been assigned consecutive card or face numbers by a manufacturer. Series are typically identified by the first and last card number in the group of cards, such as "1 to 9000 series";

(n) "Set" of cards means a specific group of cards from the same product line, which are the same color, border pattern, and imprinted with the same serial number. A "set" of cards may include more than one series of cards or faces;

(o) "Sheet number" means the number assigned by the manufacturer to identify an arrangement of more than one card that results from dividing master sheets of cards to facilitate marketing;

(p) "Skip" means the standard spread or difference between card or sheet numbers at different page levels in packs or packets;

(q) "Subset" means a portion of a set of cards or collation of packets that has been divided by a licensed distributor to facilitate marketing; and

(r) "Up" means the number of pages or sheets collated into each packet or book of cards. The term is normally preceded by the number of pages or sheets.

Duplicate disposable bingo cards.

(3) Each card or face in a particular type or product line must be imprinted with a unique set of numbers or symbols and configuration of numbers or symbols. Duplicate cards within a specific product line are prohibited. Manufacturers of disposable bingo cards are responsible for ensuring that

there are no duplicate cards in a set or collation of cards sold to distributors or operators: Provided, That duplicate cards can be collated into packets if they are located at different page levels in the packets and intended only for use during separate games, including "on-the-way" games, within a session. If a manufacturer discovers a duplicate card error or is notified of such by the commission staff or a licensee, it shall immediately comply with the following steps:

(a) Stop marketing the product line containing duplicate cards in Washington;

(b) Recall all sets of cards and/or collations of packets or books containing duplicate cards at the same page level;

(c) Take steps to correct manufacturing or collating processes necessary to ensure duplicate cards are not sold to operators, and inform the commission in writing regarding steps taken;

(d) Reimburse all operators who submit a claim for prizes paid as a result of selling sets or collations containing duplicate cards when such claim has been validated by commission staff; and

(e) Reimburse the commission for all cost incurred investigating duplicate card complaints that result in findings that the error was caused by manufacturers.

Collating disposable bingo cards.

(4) Packets of cards must be collated so that each page of the packet:

(a) Is from a different set of cards;

(b) Has skips that are consistent throughout the entire collation and contains cards that are different when compared to other cards or faces in the pack or packet; and

(c) Has a different color or border pattern.

Audit system to identify each set of disposable bingo cards.

(5) Each set must include an audit system that allows identification of that specific set and each specific card within that set, allows tracking of the transfer of cards from the point of manufacture to operators, and facilitates sale by the operator to the player: Provided, That audit systems that accomplish regulatory requirements using alternative controls may be approved by the commission staff. The audit system shall meet the following requirements:

(a) Each set of cards manufactured as a specific product line, using the same color and border pattern, will be assigned a unique serial number by the manufacturer. The serial number must be imprinted on each card or face;

(b) Each card or face must be identified by a card number imprinted on the face of the card: Provided, That cards used in "player selection" games, authorized by WAC 230-20-241 and "keno bingo" games, authorized by WAC 230-20-247, are exempted from this requirement; and

(c) Each sheet of cards within a set must be consecutively numbered: Provided, That sheets of cards do not have to be numbered if alternative audit controls are available and disclosed to the operator.

Sale of disposable bingo cards.

(6) Each set of cards or collation of packets of cards shall be sold intact as a single unit: Provided, That for ease of marketing to Class E and below operators and to operators of authorized unlicensed activities, distributors may divide sets or collations as authorized below:

(a) Cartons or packages assembled by manufacturers can not be opened prior to sale to an operator, except that distributors may open cartons or packages as authorized below:

(i) At an operator's request to change the "on," "up," and "cut." When such modification is made, the distributor shall be responsible for resealing the carton and noting all changes on the packing label;

(ii) To provide cards to Class A or B bingo games and for unlicensed activities authorized by RCW 9.46.0321 or ~~(9.46.0355)~~ 9.46.0356;

(iii) To provide cards to individuals for recreational activities; and

(iv) To provide cards to businesses for use in promotional contests of chance as authorized by RCW ~~(9.46.0355)~~ 9.46.0356.

(b) Subsets must contain at least one carton or package: Provided, That cartons or packages may be broken and cards sold in smaller quantities under conditions described in subsection (6)(a)(i) and (ii) of this section; and

(c) Subsets of cards used for "hidden face" bingo games must contain at least one thousand cards or sheets of cards.

"Hidden face" disposable bingo cards.

(7) In addition to the requirements of subsections (1) through (6) of this section, cards sold to operators for use in the operation of "hidden face" bingo games, authorized by WAC 230-20-243, must meet the following requirements:

(a) Each card or sheet of cards must be printed, folded, and sealed in a manner that prohibits determination of numbers or symbols, configurations of such on the card, or the card number prior to opening by the player;

(b) Each card or sheet of cards must have a separate numbering system that is randomly distributed when compared to the card number imprinted in the "free" space. Manufacturers must utilize procedures that mix cards or sheets of cards in a manner that ensures no consistent relationship exists between the "card numbers" and separate numbering system within a set or subset and that there are no patterns or consistent relationships of the location of a specific card number between subsets from different sets;

(c) The serial number and the additional card or sheet number, required by (b) of this subsection, must be imprinted on the outside of the cards or sheets of cards and visible for recording without opening the card or sheet of cards; and

(d) Each set of cards must contain at least six thousand unique faces or patterns of numbers or symbols.

"Player selection" disposable bingo cards.

(8) In addition to the requirements of subsections (1) through (6) of this section, cards sold to operators for use in "player selection" bingo games, authorized by WAC 230-20-241, must be printed on two-part, self-duplicating paper that provides an original and duplicate copy.

Packing slip requirements.

(9) A packing record must be completed for each set of cards or collation of packets and either enclosed inside or in an envelope attached to the carton or package. If the marketing unit contains more than one carton or package, the packing record must be located on carton or package number one. The packing record must include at least the following:

- (a) Name of manufacturer;
- (b) Description of product, including the "series," "on," "cut," and "up";
- (c) Records entry labels that match the identification and inspection services stamp attached to the packing label on the outside of the carton or package;
- (d) Serial number or, if packets, serial number of the top page;
- (e) Color and border pattern or, if packets, colors and border patterns of all sets and the sequence they are collated in the packet; and
- (f) A record of any missing cards, sheets of cards, or packets.

Labeling requirements.

(10) Each separate packing or marketing unit containing a set of cards or collation of packets of cards must be identified in a manner that allows determination of the contents without opening the package. If the marketing unit contains more than one case or carton, each unit shall be labeled and numbered. Minimum information to be disclosed on each carton or package:

- (a) The identification and inspection services stamp number;
- (b) Serial number or, if packets, serial number of the top page;
- (c) Color and border pattern or, if packets, color and border pattern of the top page; and
- (d) Number of the carton and the total number of cartons included in the marketing unit.

Quality control.

(11) Sets of cards, collations of packets, or any other marketing units established by a manufacturer shall be complete and contain the correct number of cards or packets and the specific cards or packets noted on the packing slip: Provided, That up to one percent of the cards in the set may be missing if all missing cards, sheets, or packets are documented on the packing record enclosed in carton or package number one of the marketing unit.

Winning card verification system.

(12) To provide the commission and operators the ability to verify the authenticity of winning cards, each manufacturer shall prepare and make available a master verification system for each type or product line of cards it manufactures. This master verification system shall provide a facsimile of each card within a set of cards by the card number. The master verification system shall display the exact numbers or symbols and the location or configuration of numbers or symbols on the card.

AMENDATORY SECTION (Amending WSR 97-19-079, filed 9/16/97, effective 1/1/98)

WAC 230-20-240 Bingo equipment to be used. ((The conduct of)) Bingo games must ((include)) be conducted using the following ((required)) items:

Mixing devices for bingo balls.

(1) A mechanical device that uses air flow for mixing and randomly withdrawing balls to determine the letters and numbers or symbols to be called must be utilized by all Class D and above operators. This device shall be constructed in the following manner:

- (a) It will allow participants full view of the mixing action of the balls; and
- (b) The operation cannot be interrupted to change the random placement of the balls at the exit receptacle of the device, except when the device is shut off as allowed by WAC 230-20-246(4).

Bingo balls.

(2) A set of seventy-five balls bearing the numbers one through seventy-five and the letters B, I, N, G, or O. Provided, That the letters B, I, N, G, O need not appear if the balls are used for speed or hidden face bingo games. The following additional requirements regarding bingo balls must be met:

- (a) The entire set of balls shall be available for inspection by the players before a bingo session begins to determine that all are present and in operating condition;
- (b) Each numbered ball shall be the same weight as each of the other balls and free from any defects; and
- (c) Each set of balls in play must be distinguishable from all other sets of balls in play(4).

Flashboards.

(3) Flashboards shall be utilized to display numbers called at all Class D and above bingo games. They must be visible to all players and clearly indicate all numbers that have been called: Provided, That malfunctions occurring during a bingo occasion need not be repaired during that occasion, but must be repaired before use on any other occasion(4).

Bingo cards.

(4) Bingo cards must be preprinted, manufactured cards that meet the following standards:

- (a) Have twenty-five spaces, one of which may be a free space, arranged in five even columns headed with the letters B, I, N, G, and O, and except for the free space, imprinted with numbers and symbols: Provided, That bingo cards used for conducting player selection games are exempt from the requirements of this subsection if the requirements of WAC 230-20-241 are followed: Provided further, That bingo cards used for conducting keno bingo games are exempt from the requirements of this subsection if the requirements of WAC 230-20-247 are followed;
- (b) Be manufactured by a licensed manufacturer: Provided, That electronically generated bingo cards authorized

by WAC 230-20-106 may be produced by the operator using a printer interfaced with an electronic data base system: Provided further, That cards used in player selection games and keno bingo games may be manufactured by unlicensed manufacturers if:

- (i) The primary activity of such manufacturer is producing nongambling products;
- (ii) Cards must meet the requirements of WAC 230-20-192 and 230-20-241 or 230-20-247. The licensee that initially purchases such cards from the unlicensed manufacturer shall assume responsibility for compliance with all commission requirements;
- (iii) In addition to the requirements set out in WAC 230-08-024 and 230-08-040, the invoice transferring these cards must include the beginning card number. If an operator purchases such cards directly from an unlicensed manufacturer, the operator shall assume responsibility for compliance with this requirement.
- (c) All disposable bingo cards must meet the requirements of WAC 230-20-192;
- (d) No licensed operator shall have disposable bingo cards with the same serial number, color/border pattern, and card number on the premises. This includes player selection and keno bingo cards; and
- (e) Electronically generated cards and supporting equipment must meet the requirements of WAC 230-20-106(4).

Bingo cards for Class F and above licensees.

(5) ~~(Effective January 1, 1997,)~~ All Class F and above bingo licensees shall conduct bingo games using disposable bingo cards or electronically generated cards. All income must be receipted for by using the audit system required by WAC 230-20-192 in conjunction with appropriate receipting system required by WAC 230-20-106, 230-20-107, or 230-20-108(4).

Duplicate bingo cards.

(6) Duplicate cards, as defined in WAC 230-20-192, are prohibited in the operation of bingo games conducted by Class D or above licensees. Operators are advised that conducting games using cards manufactured by different manufacturers may result in duplicate cards being placed in play and that the majority of cards in the "1 to 9000 series" are duplicate, regardless of the manufacturer. Duplicate card violations that result from use of cards from different manufacturers shall be the responsibility of the operator: Provided, That this section shall not apply to braille cards, authorized by WAC 230-20-246(4), if the operator takes steps to prevent duplicate cards and informs players regarding limitations to prizes when winners have duplicate cards because braille cards are being played(4).

Pay-out and documentation of duplicate bingo cards.

- (7) If duplicate cards are inadvertently sold at bingo games conducted by Class D or above licensees, the following procedures and restrictions apply:
 - (a) If all winners with duplicate cards are paid the entire prize amount that would be due if there were no duplicate

cards, the licensee shall not be deemed to be in violation of this section;

(b) The amount of the prize for games with winners having duplicate cards shall be computed and paid using the following guidelines:

- (i) Games that provide a bonus for a single winner - If all winners have duplicate cards then all winners shall be paid the bonus;
- (ii) Games that result in multiple winners, some of which are players with duplicate cards - The split of the prize pool will be computed by counting all duplicate card winners as one. After the prize pool split is computed using this method, all winners will be paid according to the computed prize split;
- (iii) If the prize pool contains noncash or merchandise prizes, the amount added to the prize pool for computing the split shall be the licensee's cost or retail value, whichever is posted in the game schedule: Provided, That ~~((manufactures {manufacturers}))~~ manufacturers shall not be responsible for increases to the prize pool required by this subsection; and
- (iv) If the prize is greater than one thousand dollars, the operator shall not be required to increase the total prize pool by more than fifty percent or five thousand dollars, whichever is less: Provided, That this limitation shall only be authorized once within a twelve-month period. If this limitation has been used within the last twelve months, the full prize amount shall be paid to all holders of duplicate cards;

(c) Increases to prize pools as a result of duplicate card errors, for which the manufacturer is responsible, may be deducted from prize payouts for computing compliance with WAC ~~((230-20-064))~~ 230-20-062;

(d) Details of circumstances that resulted in duplicate cards being sold shall be documented and maintained as a part of the daily bingo record for the session;

(e) The commission shall be notified within forty-eight hours after discovery of a duplicate card error if:

- (i) Caused by manufacturer printing, packaging, or collation errors; or
- (ii) Any player winning with a duplicate card was not paid the entire prize amount;
- (f) Licensees shall pursue reimbursement of all prizes paid due to errors from the manufacturer responsible for such errors.

AMENDATORY SECTION (Amending Order 250, filed 3/16/94, effective 4/16/94)

WAC 230-20-400 Certain lower volume licensees exempted from certain rules. Persons holding the licenses issued under the classes and circumstances set forth in WAC 230-04-065 or persons operating without a license under RCW 9.46.0315 and 9.46.0321 need not comply with the following rules of the commission, except as noted:

- (1) WAC 230-04-280 requiring notification to local law enforcement of their activity, but nonlicensees must comply with RCW 9.46.0315 and 9.46.0321.
- (2) WAC 230-08-080 requiring certain daily records: Provided, That all such persons in the alternative, must comply with WAC 230-08-015 (1), (2), and (3).

(3) WAC 230-08-010 concerning operator records: Provided, That all such persons must, in the alternative, comply with WAC 230-08-015 (1), (2), and (3).

(4) WAC 230-08-120 requiring quarterly reports: Provided, That holders of such classes of licenses must in the alternative, comply with WAC 230-08-015(4).

(5) With respect to volunteer operators only, i.e., those not compensated for their work by the licensee, WAC 230-20-220 prohibiting certain persons from playing in bingo games.

~~(6) ((WAC 230-20-120 concerning free food and beverages at bingo games.~~

~~(7)))~~ WAC 230-20-190 concerning bingo card prices.

~~((8)))~~ (7) WAC 230-20-230 concerning free games for winners.

AMENDATORY SECTION (Amending WSR 97-11-019, filed 5/13/97, effective 6/13/97)

WAC 230-30-025 Progressive jackpot pull-tab series—Definitions—Restrictions—Operating procedures. For purposes of this title, the following definitions, restrictions, operating procedures, and recordkeeping requirements apply to progressive jackpot pull-tab series ~~((f-1))~~:

Definitions.

(1) The following definitions apply to this section:

(a) ~~((f-1))~~"Progressive jackpot~~((f-1))~~" means a prize awarded to the player who presents a pull-tab designated as the winning progressive jackpot pull-tab. The progressive jackpot is comprised of the starting jackpot prize and the accrued jackpot prize for that specific series, plus any accrued jackpot prize carried over from previous series;

(b) ~~((f-1))~~"Jackpot accrual rate" means the rate at which a progressive jackpot increases for each pull-tab sold. The rate may be expressed as a percentage of gross gambling receipts or as a dollar value based on the price of a single pull-tab;

(c) "Starting jackpot prize" means the base or minimum amount of a progressive jackpot for each series prior to any additions that are based on the jackpot accrual rate;

(d) "Accrued jackpot prize" means the dollar value of all additions to a progressive jackpot that relate to the number of pull-tabs sold prior to the progressive jackpot being won or the series being removed from play;

(e) "Instant winners" means all prizes that are available from a progressive jackpot pull-tab series, excluding the progressive jackpot;

(f) "Bank system" means a group of pull-tab dispensing devices that are connected by an electronic computer network. This computer network determines the total gross gambling receipts received by all the devices in the network and calculates the level of a progressive jackpot associated with a pull-tab series being played in the networked devices.

~~((What are the operating conditions governing dispensing devices used for progressive jackpot pull-tabs?))~~ **Dispensing devices.**

(2) Progressive jackpot pull-tab dispensing devices may be operated under the following conditions:

(a) All machines in a bank system must be located in the same physical proximity on the license premises, so that players can observe all remaining pull-tabs in a series;

(b) Each bank system must be linked to a computer system which records all sales and the accumulation of the progressive jackpot;

(c) A licensee may have more than one bank system operating at one time, but at no time shall a bank system exceed ten machines;

~~((d))~~ ~~From the effective date of this rule, the number of progressive pull-tab dispensing devices per location shall be limited to ten machines for commercial stimulant licensees and twenty machines for charitable or nonprofit licensees. The director may approve an increase in the number of machines upon receipt of a written request by the licensee if the director determines that the licensee is in compliance with all regulations and approval would not be detrimental to the interests of the commission and/or the public.;~~

What are the additional requirements for operating progressive jackpot pull-tab series?)

Operating requirements.

(3) Progressive jackpot pull-tab series shall be conducted in the same manner as other pull-tab series. In addition, the following requirements apply:

(a) An owner or licensed commercial or charitable or non-profit gambling manager shall be on the premises at all times during the operation of progressive jackpot pull-tab series;

(b) Pull-tabs shall be stored in secured locations with access limited to owners and licensed individuals only;

(c) The licensee shall have sufficient funds available to pay all prizes upon redemption of winning tabs. Failure to have sufficient funds available shall be *prima facie* evidence of defrauding the public in violation of RCW 9.46.190;

(d) The current progressive jackpot total must be clearly displayed near the bank of machines at all times during the sale of progressive pull-tabs;

(e) One flare shall be prominently displayed near the bank of machines;

(f) The following are prohibited for use with progressive jackpot pull-tab series:

- (i) Substitute flares;
- (ii) Merchandise prizes;
- (iii) Last sale prizes;

(g) The operator must disclose the operating procedures regarding playing out a series or carrying over accrued prizes, as set forth in (4)(e) below; and

(h) After the retention period, unsold tabs shall be destroyed in such a manner that unopened winning tabs may not be found and used later.

~~((What are the))~~ **Operating conditions governing prizes~~((?)~~**,

(4) The following conditions apply to prizes for progressive jackpot pull-tab series:

PERMANENT

(a) The instant winners shall be equal to or greater than forty percent of total gross gambling receipts available from the series;

(b) The starting jackpot must be at least equal to the value of the highest level instant winner;

(c) The minimum jackpot accrual rate shall be set at a level that will generate an accrued jackpot prize which, when added to the starting jackpot prize and instant winners, will equal or exceed sixty percent of the total gross gambling receipts available from the series;

~~((d))~~ (d) The manufacturer shall determine the starting jackpot ~~((needed to meet the sixty percent payout requirement;))~~ prize and corresponding jackpot accrual rate needed to meet the sixty percent payout requirement in (4)(a) and (b) above. This information shall be packaged with each series;

(e) For each progressive individual pull-tab series, the maximum contribution to a progressive jackpot shall be five thousand dollars. This contribution amount shall specifically exclude any portion carried over from a previous series;

(f) Operators shall not remove a progressive jackpot pull-tab series from play prior to the progressive jackpot being won: Provided, That operators may elect to remove a series from play only under the following conditions:

(i) The series is removed only prior to the beginning or at the end of any business day;

(ii) The accrued jackpot prize from the series and any previously carried over accrued jackpot prize shall be carried over to a new series within twenty-four hours;

(iii) The accrued jackpot prize shall be added to the starting jackpot amount from the new series when it is placed out for play; and

(iv) The starting jackpot of the subsequent series must be equal to or greater than the starting jackpot amount of the previous series.

~~((How must winning tabs be redeemed?))~~ **Redeeming winning tabs.**

(5) Winning tabs shall be redeemed in the same manner as required by WAC 230-30-070. The following requirements also apply:

(a) For jackpot prizes six hundred dollars and over, the winner's full name, address, and social security number shall be recorded on a separate form for purposes of compliance with federal tax provisions;

(b) At least the starting jackpot portion of the progressive jackpot shall be paid by check. The licensee shall record the check number in addition to the information required in WAC 230-30-070(5). These checks may not be cashed on the licensed premises; and

(c) All jackpot winning tabs must be defaced immediately upon receipt instead of within twenty-four hours.

~~((What records must I keep, and for how long must they be retained?))~~ **Recordkeeping.**

(6) The following recordkeeping requirements apply to progressive jackpot pull-tab series:

(a) All recordkeeping requirements outlined in WAC 230-08-010 must be followed. Licensees shall record pro-

gressive jackpot series on a separate monthly record, in a format prescribed by the commission. The following additional information must be recorded for each series:

(i) The starting jackpot amount;

(ii) The jackpot accrual rate;

(iii) The number of pull-tabs sold out of each dispensing device;

(iv) If the progressive jackpot was awarded, the progressive jackpot amount;

(v) If the series was removed from play prior to the jackpot being won, the ending progressive jackpot amount;

(vi) All regular prizes awarded, excluding the progressive jackpot; and

(vii) Prizes paid by check;

(b) In addition to the retention requirements in WAC 230-30-072, progressive jackpot winning tabs and winner information, along with the flares, must be retained for one year from the date in which the series was removed from play.

~~((What aspects of a progressive pull-tab system require agency approval and what standards are applicable to this approval process?))~~ **Approval process for progressive pull-tab systems.**

(7) The director shall approve all progressive jackpot pull-tab series, progressive jackpot dispensing devices, and computer software used to link dispensing devices, accrue jackpot prizes, and store data used in preparing records. Procedures for approval are as follows:

(a) Any costs related to this approval shall be billed to the persons requesting approval;

(b) The following progressive jackpot pull-tab series requirements shall be approved prior to sale in Washington:

(i) The process used to manufacture the progressive jackpot series; and

(ii) The secondary win code system; and

(c) Computer software requiring the approval of the director shall be subject to the following standards;

(i) For each game, no person other than the maker of the software shall be able to alter data once it is input into the system; and

(ii) A record of transactions for a game must be retained in memory until the transactions have been totaled, printed, and cleared by the operator regardless of whether the unit's primary power source is interrupted.

AMENDATORY SECTION (Amending WSR 97-14-012, filed 6/20/97, effective 7/21/97)

WAC 230-30-103 Standards for construction of pull-tabs. ~~((+))~~

Determination of winners prohibited.

~~((a))~~ (1) Pull-tabs shall be constructed and glued, sealed, or banded so that it is impossible to determine the covered or concealed numbers, symbol, set of symbols, or game protection on the pull-tab until it has been dispensed to and opened by the player, by any method or device, including

but not limited to, markings, variance in size, variance in paper fiber, color or printing variations or light(;;); and

((b)) (2) All pull-tabs will be constructed to insure that, when offered for sale to the public, the pull-tab is virtually opaque and free of security defects wherein winning pull-tabs cannot be determined prior to being opened through the use of high intensity lights, peeking, or any other method.

Construction of pull-tabs.

((2)) (3) All pull-tabs, except banded and latex covered pull-tabs, will be constructed using a two or three ply paper stock construction. Winning and losing sheets for each game must be manufactured using the same paper stock and must be manufactured at the same time for all progressive pull-tab series, as authorized in WAC 230-30-025.

((3)) (4) The manufacturer shall conspicuously print on the pull-tab the series number and the name of the manufacturer or label or trademark identifying the manufacturer so both are readily visible prior to opening the pull-tab. The label or trademark must be filed with the commission prior to the printing of the pull-tab.

((4)) (5) The cover sheet will contain perforated and/or clean-cut openings centered over the symbols or numbers on the back of the face sheet in such a manner as to allow easy opening by the consumer after purchase of the pull-tabs, while at the same time, not permitting pull-tabs to be opened prematurely in normal handling. Perforation should exist on both horizontal lines of the opening with either perforated or clean-cut on the vertical or elliptical line where the tab must be grasped for opening after bending the edge of ticket down. The tab may contain information to show the consumer how to open the pull-tab or remove the latex to determine the symbols or numbers.

((5)) (6) No series numbers used on a series shall be repeated on that same manufacturer's form number within a three-year period.

Winner protection and verification codes.

((6)) (7) Each manufacturer shall establish methods of winner protection for each punch board and pull-tab series. Such protection shall afford operators, the commission, and other law enforcement personnel the ability to distinguish winning pull-tabs (~~after they have been purchased and opened,~~) after they have been purchased and opened, from those that are nonwinning, altered (~~for~~), forged, or from another series. Such protection shall be completely hidden from view and undetectable by any means prior to a pull-tab being opened.

(a) Each manufacturer shall establish its own primary game protection for each pull-tab series. This game protection shall be a method of identifying winning pull-tabs, after they have been purchased and opened, so as to distinguish them from non-winning pull-tabs. The manufacturer may use special numbers, colors, designs, ink(~~for~~), or any combination thereof to establish the primary game protection. Manufacturers shall provide a written explanation of each protection scheme to the commission. Such notification shall be detailed and include pictures, diagrams, and/or samples necessary to thoroughly explain the scheme. The commission

shall be notified in writing of any changes to protection schemes.

(b) All pull-tabs manufactured for use in the state of Washington after January 1, 1992, shall utilize a secondary verification code to prevent counterfeiting on tabs that award prizes greater than twenty dollars. Such codes shall be approved by the director prior to use within the state. Punch boards are exempt from the secondary verification code requirements.

(c) Spindle-type pull-tab series when played in the manner set out in WAC (~~{230-30-070} {230-30-078}(8))~~ 230-30-070(10) are exempt from this requirement.

AMENDATORY SECTION (Amending Order 294, filed 6/18/96, effective 7/19/96)

WAC 230-50-800 Petitions for rule making, amendments, or repeal. Any person may petition the commission requesting the adoption, amendment, or repeal of any rule.

The petition should contain sufficient information so that the agency and public can understand the proposal.

Information required on a petition.

Every petition for adoption, repeal, or amendment of a rule must include the following information:

- (1) The name of the agency responsible for administering the rule; and
- (2) The rationale for adoption of a new rule or amendment or repeal of an existing rule.
- (3) In addition to any other concerns, you, the petitioner, are encouraged to address whether:
 - (a) The rule is authorized;
 - (b) The rule is needed;
 - (c) The rule conflicts with or duplicates other federal, state, or local laws;
 - (d) Alternatives to the rule exist that will serve the same purpose at less cost;
 - (e) The rule applies differently to public and private entities;
 - (f) The rule serves the purposes for which it was adopted;
 - (g) The rule imposes unreasonable costs;
 - (h) The rule is clearly and simply stated; and
 - (i) The rule differs, without adequate justification, from a federal law which applies to the same activity or subject matter.

Additional information required.

- (4) **When you are:**
 - (a) **Proposing a new rule**, the petition should include the text of the proposed rule or a description of its provisions;
 - (b) **Requesting amendment of an existing rule**, the petition should include the name, title, number of the rule, and the text or description of the amendment; or
 - (c) **Requesting repeal of an existing rule**, the petition should include the name, title, number of the rule, and a description of the effects of repealing the rule.

Locating a petition form.

(5) You, the petitioner, can obtain a standard petition from the office of financial management or any state agency involved in rule making. Agencies must accept petitions submitted using the standard form or in any other format that provides the information described in subsections (1) through (4) of this section.

Submitting a petition.**(6) ((How do I submit a petition?)**

~~(a))~~ Petitions for adoption, amendment, or repeal of a rule must be faxed ~~((to (360) 438-8652,))~~ or mailed to the ~~((following address:))~~ administrative office of the commission in Lacey.

~~((Washington State Gambling Commission
ATTN: Rules Coordinator
PO Box 42400
Olympia, WA 98504-2400~~

~~(b))~~ (7) Submission of a petition is defined as receipt of the petition by the gambling commission.

Agency response to a petition.**((7) What happens after a petition is submitted?**

~~(a))~~ (8) Within a reasonable time, the administering agency will send you, the petitioner, acknowledgment of receipt of the petition, including the name and telephone number of a contact person.

~~((b))~~ (9) No later than sixty days after receipt of a petition, the agency must either:

~~((i))~~ (a) Initiate rule-making proceedings in accordance with chapter 34.05 RCW; or

~~((ii))~~ (b) Deny the petition in writing, stating its reasons for the denial and specifically addressing the concerns stated in the petition. Where appropriate, the agency must indicate alternative means by which the agency will address the concerns raised in the petition.

Appealing the denial of a petition.

~~((8) How can I appeal gambling commission denial of my petition?~~

~~(a))~~ (10) If the gambling commission denies your petition, within thirty days of the denial, you, the petitioner, may:

(a) Appeal the denial to the governor.

~~((b))~~ The governor will process the appeal according to RCW 34.05.330~~((2))~~ (3); or

(b) Petition for a review by the joint administrative rules review committee according to RCW 34.05.330(2), only if your petition alleges that the rule you wish to amend is not within the intent of the legislature or not adopted in accordance with all applicable provisions of the law.

WSR 01-01-028
PERMANENT RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES
(Medical Assistance Administration)
[Filed December 7, 2000, 4:21 p.m.]

Date of Adoption: December 7, 2000.

Purpose: To update and clarify MAA's prescription drug program policy to reflect current department practice. The amended sections reflect clearly written and updated policy that is consistent with federal regulations and agency goals.

Citation of Existing Rules Affected by this Order:
Amending WAC 388-530-1000, 388-530-1050, 388-530-1100, 388-530-1150, 388-530-1200, 388-530-1250, 388-530-1850, 388-530-1900, 388-530-1950, and 388-530-2050.

Statutory Authority for Adoption: RCW 74.08.090, 74.04.050.

Adopted under notice filed as WSR 00-17-080 on August 14, 2000.

Changes Other than Editing from Proposed to Adopted Version: (Text additions are indicated by underlining and deletions are indicated by ~~strikeouts~~.)

WAC 388-530-1050:

~~DESI~~ or "Less than effective drug" or "DESI" means a drug for which: . . . *(changed order of terms being defined and moved to correct alphabetical order)*

"Drug file" means a list of drugs provided to the medical assistance administration's (MAA's) drug data base and maintained by a drug file contractor.

"Drug pricing file contractor," also referred to as "drug pricing file contractor," means the entity which . . .

~~"Drug formulary" means a list of MAA covered outpatient drugs not requiring prior authorization.~~

"Prior authorization program" means a medical assistance administration (MAA) program, subject to the requirements of 42 U.S.C. 1396r-8(d)(5), that may require, as condition of payment, that a drug on MAA's drug file be prior authorized.

"Risk/benefit ratio" means the result of assessing the risk of therapy side effects compared to the benefits positive therapeutic outcome of therapy.

"Therapeutic alternative" means a drug product that contains a different therapeutic agent than the drug in question, but is the same pharmacological or therapeutic class and can be expected to have a similar therapeutic effect when administered to patients in a therapeutically equivalent dosage.

"Therapeutically equivalent" means chemically dissimilar prescription drugs with the same efficacy and safety when administered to an individual, as determined by: (1) Information from the FDA; (2) Published and peer-reviewed scientific data; (3) Randomized controlled clinical trials; and (4) Other scientific evidence.

WAC 388-550-1100:

(1) . . . Covered drugs and supplies include:

(b) Over-the-counter (OTC) drugs when the drug is:

(i) Is a less costly therapeutic alternative; and

(ii) Formulary Does not require prior authorization.

PERMANENT

(c) ~~Nonformulary drugs~~ Drugs requiring prior authorization when: ...

(ii) They meet MAA's published expedited prior authorization criteria and follow the process described defined in WAC 388-530-1250(4) 1050.

(2) MAA determines if certain drugs are medically necessary and covered with or without...

WAC 388-530-1150:

(1)(c) The medical assistance administration (MAA) does not cover: ... (c) OTC drugs/supplies, unless approved for formulary use, described under WAC 388-530-1100 (1)(b), or for family planning as described under chapter 388-532 WAC.

(1)(e) A drug prescribed for an indication that is not medically accepted evidence based as determined by:

(1)(h)(ii) Prescribed for non-FDA approved indications or dosing unless prior authorized; or

WAC 388-530-1200:

Drug formulary- Prior authorization program.

(1) The medical assistance administration (MAA) pharmacy research specialist, medical consultants, and ~~an advisory board evaluate drugs for formulary inclusion, MAA's drug utilization review team evaluate drugs to determine prior authorization status on the drug file,~~ and may consult with the Drug Utilization and Education (DUE) Council, and/or participating MAA providers.

(2) ~~To request consideration to include a drug product in MAA's drug formulary, a drug manufacturer must send the~~ To facilitate the evaluation process for a drug product, a drug manufacturer may send the pharmacy research specialist a written request and the following supporting documentation:

(3) ~~The criteria used to determine whether to include or exclude a drug from MAA's formulary include, but are not limited to, an evaluation of whether:~~ Evaluation of a drug includes, but is not limited to, the following criteria:

(a) There is a federal drug rebate contract agreement signed by the manufacturer;

(b) ~~There are like drugs already on the formulary~~ The drug is a less-than-effective drug;

(c) The drug has a favorable risk/benefit ratio;

(d) ~~The drug is a less-than-effective drug~~ The drug file status of:

(i) Like drugs; and

(ii) Less costly therapeutic alternative drugs;

(a) The drug falls into one of the categories authorized by federal law to be excluded from coverage; and

(f) ~~There are less costly therapeutic alternative drugs already on the formulary; and~~ The drug has a potential for abuse.

(g) ~~The drug has a potential for abuse.~~

(4) ~~MAA does not require prior approval for drug preparations listed in the MAA drug formulary. MAA updates and reviews the formulary list~~ drug file list as necessary, and publishes the list periodically publishes a list of drugs not requiring prior authorization.

(5) Manufacturers may seek review of ~~formulary decisions~~ the drug file status by writing to the MAA medical director.

WAC 388-530-1250:

Prior authorization process.

(1)(a) MAA requires pharmacies to obtain prior authorization for: (a) ~~Nonformulary drugs;~~ Drugs with a prior authorization indicator on the drug file;

(6) ~~MAA provides a response to a request~~ MAA provides a response to a request ~~pays for drugs requiring prior authorization by telephone or other telecommunication device within twenty-four hours if the request is received during normal state business hours. If a provider needs prior authorization to dispense a drug during a weekend or Washington state holiday, the provider may dispense the drug that are dispensed without prior authorization only when:~~

(a) Given in an emergency;

(b) MAA receives justification within seventy-two hours of the fill date, excluding weekends and Washington state holidays; and

(c) MAA agrees with the justification and approves the request.

WAC 388-530-1850:

Drug Utilization and Education (DUE) Council.

MAA establishes a Drug Utilization and Education (DUE) Council (DUEC) and determines membership rotations.

(1) The DUEC DUE Council must:

(2) The DUEC DUE Council meets periodically to:

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 0, Amended 10, Repealed 0.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 0, Amended 10, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 10, Repealed 0.

Effective Date of Rule: Thirty-one days after filing.

Marie Myerchin-Redifer, Manager
Rules and Policies Assistance Unit

Reviser's note: The material contained in this filing exceeded the page-count limitations of WAC 1-21-040 for appearance in this issue of the Register. It will appear in the 01-02 issue of the Register.

WSR 01-01-029
PERMANENT RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES
 (Medical Assistance Administration)

[Filed December 7, 2000, 4:23 p.m.]

Date of Adoption: December 7, 2000.

Purpose: To update and clarify MAA's prescription drug program reimbursement methodology to reflect current department practice. New sections codify current policy for the drug rebate program, for payment methodology for federal upper limit (FUL), for drugs purchased under the Public Health Service (PHS) Act, and for compliance packaging. The amended sections reflect clearly written and updated policy that is consistent with federal regulations and agency goals.

Citation of Existing Rules Affected by this Order: Amending WAC 388-530-1300, 388-530-1350, 388-530-1400, 388-530-1450, 388-530-1500, 388-530-1550, 388-530-1600, 388-530-1650, and 388-530-1700.

Statutory Authority for Adoption: RCW 74.08.090, 74.04.050.

Adopted under notice filed as WSR 00-17-056 on August 9, 2000.

Changes Other than Editing from Proposed to Adopted Version: (Text additions are indicated by underlining and deletions are indicated by ~~strikeouts~~.)

WAC 388-530-1125:

~~(1)~~ (1) ...MAA may make exceptions based on medical necessity and on a case-by-case basis...

~~(2) MAA may negotiate separate, additional discounts with manufacturers to facilitate formulary management.~~

WAC 388-530-1350:

(6) MAA pays EAC for a drug with an established MAC when the EAC for the particular drug is lower than the MAC price. *(This was proposed as part of (5); now numbered as (6). Proposed (6) renumbered as (7)).*

WAC 388-530-1425:

(1) Drugs purchased under section 340B of the Public Health Service (PHS) Act ~~and can be dispensed~~ only by PHS-qualified health facilities to medical assistance clients. These medications must be billed using the actual acquisition cost (AAC) of the drug plus the appropriate dispensing fee.

WAC 388-530-1500:

(2)(a) MAA allows only the lowest cost for each ~~formu-~~ lary ingredient whether EAC, MAC, or amount billed.

(d)(i) Each formulary covered or prior authorized-drug ingredient billed separately; and...

WAC 388-530-1700:

~~(1)~~ (1) The medical assistance administration (MAA) reimburses for covered drugs, ~~and supplies, and devices provided dispensed~~ or administered by nonpharmacy providers under specified conditions. ~~MAA does not reimburse providers for the cost of vaccines obtained from the state department of health; MAA does pay a fee for administering the vaccine.~~ *(First sentence of proposed (1) now used as an introduction; last sentence of this proposed section renumbered as new (3))*

~~(2)~~ (1) MAA reimburses actual acquisition cost (AAC) to a physician or ARNP for a covered drug (oral, topical or injectable) prepared or packaged for individual use and provided or administered to a client during an office visit. When the cost of the drug provided or administered to the ~~patient~~ client exceeds the established fee, the physician or ARNP may submit to MAA a photocopy of the invoice for the actual drug cost. The invoice must show the name of the drug, the manufacturer, drug strength, quantity, and cost.

(3) MAA does not reimburse providers for the cost of vaccines obtained through the state department of health; MAA does pay a fee for administering the vaccine.

~~(3)~~ (4) MAA reimburses family planning clinics; ~~their AAC for birth control pills and contraceptive supplies distributed to clients. MAA may request an invoice for the actual cost of the drug. If an invoice is requested, the invoice must show the name of the drug, manufacturer, drug strength, and cost.~~

(a) For oral contraceptives, the lesser of the family planning clinic's certified full fee or MAA's maximum allowable fee per cycle of birth control pills. The certified full fee is the clinic's acquisition cost for each cycle of birth control pills, as reported annually by the clinic to DOH;

(b) For contraceptive supplies and devices, the clinic's actual acquisition cost or MAA's maximum allowable fee, whichever is specified by MAA; and

(c) For other drugs, supplies, and devices, according to MAA's established fee schedules.

(5) MAA may request family planning clinics and other nonpharmacy providers to submit an invoice for the actual cost of the drug, supply, or device billed. If an invoice is requested, the invoice must show the name of the drug, supply, or device, the drug or product manufacturer, drug strength, and quantity or product description and quantity and cost.

WSR 01-01-035
PERMANENT RULES
HORSE RACING COMMISSION

[Filed December 8, 2000, 3:06 p.m.]

Date of Adoption: October 18, 2000.

Purpose: Amend rule to encompass everyone on horse back to wear safety equipment, with the exception of nonracing events.

Citation of Existing Rules Affected by this Order: Amending WAC 260-12-180 Safety equipment required.

Statutory Authority for Adoption: RCW 67.16.040.

Adopted under notice filed as WSR 00-13-004 on June 8, 2000.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 1, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 0, Amended 1, Repealed 0.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 0, Amended 1, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 1, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 0, Repealed 0.

Effective Date of Rule: Thirty-one days after filing.

by Patty Sorby

AMENDATORY SECTION (Amending Rules of racing, filed 4/21/61)

WAC 260-12-180 Safety ((helmets)) equipment required. ((All owners and trainers, when exercising horses, and all jockeys, apprentice jockeys, exercise boys, outriders, pony boys and pony girls when performing these duties shall wear a safety helmet approved by the commission.)) All persons while on horseback shall wear a safety helmet and safety vest. Safety equipment shall be approved by the commission. This rule does not apply to non-racing related events conducted for entertainment purposes. Safety equipment for such entertainment events shall be at the discretion of the racing association.

WSR 01-01-042
PERMANENT RULES
DEPARTMENT OF ECOLOGY

[Order 00-10—Filed December 8, 2000, 4:29 p.m.]

Date of Adoption: December 8, 2000.

Purpose: To provide consistency and predictability to the management of the centennial clean water fund.

Citation of Existing Rules Affected by this Order: Amending chapter 173-95A WAC.

Statutory Authority for Adoption: Chapter 70.146 RCW.

Adopted under notice filed as WSR 00-19-094 on September 20, 2000.

Changes Other than Editing from Proposed to Adopted Version: Several small changes were made for clarity, and are described in full in the concise explanatory statement (responsiveness summary). None are substantive or change the meaning of the rule.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 6, Amended 5, Repealed 0.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 6, Amended 5, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 0, Repealed 0.

Effective Date of Rule: Thirty-one days after filing.

December 8, 2000

Tom Fitzsimmons

Director

AMENDATORY SECTION (Amending Order 97-31, filed 12/3/97, effective 1/3/98)

WAC 173-95A-010 ((Purpose and scope.)) What is the purpose of this chapter? ((This chapter is intended to address critical or emergent public health needs or environmental problems in jurisdictions that are not in compliance with the Growth Management Act. It implements an exception to the prohibition of counties, cities, and towns that are not in compliance with the Growth Management Act (chapter 36.70A RCW) from receiving grant or loan funds for water pollution control facilities. The exception is provided in limited circumstances, where necessary to address a public health need or substantial environmental degradation.)) The purpose of this chapter is to set forth limitations on the allocation and uses of moneys administered by the department of ecology from a special fund within the state treasury known as the water quality account, as authorized by chapter 70.146 RCW. This fund provides financial assistance, in the form of loans and grants to meet high priority water quality management needs, to public bodies throughout the state of Washington. Funded projects must address water quality problems related to public health and environmental degradation. In order to encourage the timely use of funds provided by the

state legislature, priority will be given to projects shown to be ready to proceed.

AMENDATORY SECTION (Amending Order 97-31, filed 12/3/97, effective 1/3/98)

WAC 173-95A-020 ((Definitions.)) What are the definitions of key terms? (1) ("Compliance with the Growth Management Act" means that:

(a) A county, city, or town that is required or chooses to plan under RCW 36.70A.040 has adopted a comprehensive plan and development regulations in conformance with the requirements of chapter 36.70A RCW, after it is required that the comprehensive plan and development regulations be adopted; and

(b) The county, city, or town has not been found out of compliance by a growth management hearings board; or

(c) A growth management hearings board has found a county, city, or town in compliance with the requirements of chapter 36.70A RCW, after previously finding the county, city, or town was not in compliance.

(2) "Department" means the department of ecology.

(3) "Public health need" means that a situation exists where:

(a) There is a documented potential for:

(i) Contaminating a source of drinking water; or

(ii) Failure of existing wastewater system or systems resulting in contamination being present on the surface of the ground in such quantities and locations as to create a potential for public contact; or

(iii) Contamination of a commercial or recreational shellfish bed as to create a critical public health risk associated with consumption of the shellfish; or

(iv) Contamination of surface water so as to create a critical public health risk associated with recreational use; and

(b) The problem generally involves a serviceable area including, but not limited to, a subdivision, town, city, or county, or an area serviced by on-site sewage disposal systems; and

(c) The problem cannot be corrected through more efficient operation and maintenance of an existing wastewater disposal system or systems.

(4) "Substantial environmental degradation" means that:

(a) There is a situation causing real, documented, critical environmental contamination that:

(i) Contributes to violations of the state's water quality standards; or

(ii) Interferes with beneficial uses of the waters of the state; and

(b) The problem generally involves a serviceable area including, but not limited to, a subdivision, town, city, or county, or an area serviced by on-site sewage disposal systems; and

(c) The problem cannot be corrected through more efficient operation and maintenance of an existing wastewater disposal system or systems.

(5) "Water pollution control facility" or "facilities" means any facilities or systems for the control, collection, storage, treatment, disposal, or recycling of wastewater, including but not limited to sanitary sewage, storm water,

residential, commercial, industrial, and agricultural wastes, which are causing water quality degradation due to concentrations of conventional, nonconventional, or toxic pollutants. Water pollution control facilities include all equipment, utilities, structures, real property, and interests in and improvements on real property necessary for or incidental to such purpose. Water pollution control facilities also include such facilities, equipment, and collection systems as are necessary to protect federally designated sole source aquifers.) "Activities" - see "water pollution control activity."

(2) "Applicant" means a public body that has applied for funding.

(3) "Best management practices" means physical, structural, and/or managerial practices, approved by the department, that, when used singularly or in combination, prevent or reduce pollutant discharges.

(4) "Cash match" means funds to match the state share of a grant that are under the sole control of a public body.

(5) "Centennial" means the centennial clean water fund.

(6) "Ceiling amounts" means the largest amount of financial assistance the department can provide to an individual project. Ceiling amounts vary based on factors including the type of project and whether a loan or a grant is awarded.

(7) "Commercial, industrial, and institutional flows" means the portion of the total flows to a facilities project that originate from commercial establishments, industrial facilities, or institutional sources such as schools, hospitals, and prisons.

(8) "Cost-effective alternative" means the alternative with the lowest present worth or equivalent annual value that achieves the requirements of the facility and that recognizes environmental and other nonmonetary considerations.

(9) "Department" means the department of ecology.

(10) "Easement," for the purposes of this rule, means a written agreement between a public body and an individual landowner, that allows the public body to have access to the property at any time to inspect, maintain, or repair activities or facilities installed with a loan or a grant, or to hold occasional public tours of the site for educational purposes.

(11) "Eligible cost" means the portion of the cost of the facilities or activities project that can be financed under the provisions of this chapter.

(12) "Enforcement order" means an administrative order that is a document issued by the department under the authority of RCW 90.48.120 and that directs a public body to complete a specified course of action within an explicit period of time to achieve compliance with the provisions of chapter 90.48 RCW.

(13) "Engineering report" means a report that evaluates engineering and other alternatives that meet the requirements set forth in chapter 173-240 WAC. Submission of plans and reports for construction of wastewater facilities.

(14) "Environmental emergency" means a problem that a public body and the department agree poses a serious, immediate threat to the environment or to the health or safety of a community, and requires immediate corrective action.

(15) "Estimated construction cost" means the estimated sum of moneys, excluding sales tax, to be paid to construction contractors and suppliers for all labor, materials, equip-

ment, and other related work necessary to construct the proposed project.

(16) "Existing needs" means water pollution control facilities capability for the existing population in order to meet the requirements of the water quality based effluent limitations in the recipient's National Pollution Discharge Elimination System or state waste discharge permit.

(17) "Existing residential need" means water pollution control facilities capability for the existing residential population in order to meet the water quality based effluent limitations in the recipient's National Pollution Discharge Elimination System or state waste discharge permit.

(18) "Excess capacity" means water pollution control facilities capability beyond what is needed for the existing residential population to meet the water quality based effluent limitations in the recipient's National Pollution Discharge Elimination System or state waste discharge permit.

(19) "Extended grant payments" means cash disbursements for eligible project costs made under a multiyear centennial grant agreement according to conditions established in RCW 70.146.075 and funded through legislative appropriations. Extended grant payments do not follow the normal process of reimbursement for actual costs incurred.

(20) "Facilities plan" means an engineering report that includes all the elements required by the National Environmental Policy Act, other federal statutes, and planning requirements under chapter 173-240 WAC, Submission of plans and reports for construction of wastewater facilities.

(21) "Facilities" - see "water pollution control facilities."

(22) "Force account" means loan or grant project work performed using labor, materials, or equipment of a public body.

(23) "Funding cycle" means the annual cycle of activities related to allocating funds for a single fiscal year.

(24) "Funding cut-off line" means the position on a final offer list ranked by priority below which financial assistance will not be offered from that fund, proviso, or funding category.

(25) "Funding list" - see "offer list."

(26) "Grant agreement" means a contractual arrangement between a public body and the department that includes an approved scope of work, total project cost, set grant percentage, eligible costs, budget, and a schedule for project completion (in addition to other requirements).

(27) "Immediate corrective action" means that the director of the department or the director's designee has determined that the project must proceed to correct the problem in a timely manner before funds are available during the next regular funding cycle. This usually would involve a "public health emergency" or an "environmental emergency."

(28) "Indirect cost" means costs that benefit more than one activity of the recipient and that may not be directly assigned to a particular project objective.

(29) "Infiltration and inflow" means water, other than wastewater, that enters a sewer system.

(30) "Infiltration and inflow correction" means the cost-effective alternative or alternatives identified in an approved facilities plan or engineering report for eliminating or reducing the infiltration and inflow from an existing sewer system.

(31) "In-kind contributions" means the value of noncash contributions provided by a public body or any other approved parties.

(32) "Interlocal costs" means the cost of goods or services provided to a project under the terms of an interlocal agreement by a public body eligible to apply for centennial funds. These costs may be considered as part of a cash match if they are eligible for funding under the grant agreement.

(33) "Loan agreement" means a contractual arrangement between a public body and the department that involves a disbursement of funds that must be repaid. The agreement includes an approved scope of work, total project cost, loan terms (including interest rates) and a repayment schedule.

(34) "Loan default" means failure to make a loan repayment within sixty days after the payment was due.

(35) "Local prioritization process" means a process to prioritize projects locally as specifically described in WAC 173-95A-050.

(36) "Match" means the portion of the eligible project costs not covered by a grant, including actual cash outlays, and noncash (in-kind) contributions.

(37) "Maximum eligible costs" means the ceiling on the portion of the costs of a project that are eligible.

(38) "Nonpoint source water pollution" means pollution that enters any waters from widespread water- or land-based activities. Nonpoint source water pollution includes, but is not limited to, atmospheric deposition; surface water runoff from agricultural lands, urban areas, and forest lands; subsurface or underground sources; and discharges from boats or other marine vessels.

(39) "Offer list" means a list of projects prioritized for receiving financial assistance from the centennial program.

(40) "Previously funded objective" means a project or project element intended to address the same need as a project or project element that has been previously funded by a loan or grant from a funding program administered by the department.

(41) "Project" means water pollution control facilities or activities for which a loan or grant is awarded by the department.

(42) "Public body" means the state of Washington or any agency, county, city or town, conservation district, other political subdivision, municipal corporation, quasi-municipal corporation, and those Indian tribes now or hereafter recognized by the federal government.

(43) "Public health emergency" means a situation in which illness or exposure known to cause illness is occurring or is imminent (as determined by the Washington state department of health).

(44) "Recipient" means a public body that applied for funding, has been offered funding, and has signed a funding agreement with the department.

(45) "Scope of work" means a detailed description of a project, including measurable objectives useful for determining successful completion. The scope of work is negotiated between the department and the loan or grant recipient.

(46) "Severe public health hazard" means a situation in which the potential for illness exists, but illness is not occurring or imminent (as determined by the Washington state department of health).

(47) "Sewer" means a pipe and related pump stations located on public property, or on public rights of way and easements, that conveys wastewater from individual buildings or groups of buildings to a treatment plant.

(48) "Side sewer" means a sanitary sewer service extension from the point five feet outside the building foundation to the publicly owned collection sewer.

(49) "Small flows" means flows from commercial, industrial, or institutional sources that enter a sanitary sewer system.

(50) "Step process" means a systematic process that facilities projects must follow to be eligible for loans or grants.

(51) "Total eligible project cost" means the sum of all costs associated with a water quality project that have been determined to be eligible for loan or grant funding.

(52) "Total project cost" means the sum of all eligible and ineligible costs associated with a water quality project.

(53) "Water pollution control activities" or "activities" means actions taken by a public body for the following purposes:

(a) To prevent or mitigate pollution of underground water;

(b) To control nonpoint sources of water pollution;

(c) To restore the water quality of freshwater lakes; and

(d) To maintain or improve water quality through the use of water pollution control facilities or other means.

(54) "Water pollution control facilities" or "facilities" means any facilities or systems for the control, collection, storage, treatment, disposal, or recycling of wastewater, including, but not limited to, sanitary sewage, storm water, residential, commercial, industrial, and agricultural wastes, which are causing water quality degradation due to concentrations of conventional, nonconventional, or toxic pollutants. Water pollution control facilities include all equipment, utilities, structures, real property, and interests in and improvements on real property necessary for or incidental to such purpose. Water pollution control facilities also include such facilities, equipment, and collection systems as are necessary to protect federally designated sole source aquifers.

(55) "Water pollution" means contamination or other alteration of the physical, chemical, or biological properties of any waters of the state, including change in temperature, taste, color, turbidity, or odor of the waters; or any discharge of a liquid, gas, solid, radioactive substance, or other substance into any waters of the state that creates a nuisance or renders such waters harmful, detrimental, or injurious to the public, to beneficial uses, or to livestock, wild animals, birds, fish, or other aquatic life.

(56) "Water resource inventory area" or "WRIA" means one of sixty-two watersheds in the state of Washington, each composed of the drainage areas of a stream or streams, as established in chapter 173-500 WAC as it existed on January 1, 1997.

AMENDATORY SECTION (Amending Order 97-31, filed 12/3/97, effective 1/3/98)

WAC 173-95A-030 (~~Determining a public health need.~~) **How and under what conditions, can money from**

the centennial fund be used? ((For the purposes of this chapter, a determination of a public health need related to a grant or loan must be requested by the public official who signed the grant or loan application. The request needs to be in the form of a letter, with supporting documentation, to the secretary of the Washington state department of health. The secretary or his or her designee reviews the documentation and determines whether a public health need exists. A determination of a public health need must be documented in a letter signed by the secretary or his or her designee and addressed to the same public official.)) (1) **Uses of the money.** The centennial fund may be used for the following purposes:

(a) To make loans and grants to applicants in order to finance the planning, design, or construction of water pollution control facilities; and

(b) To make loans and grants to applicants for the implementation of nonpoint source pollution control management programs subject to the requirements of chapter 70.146 RCW. Nonpoint source pollution control management programs include planning and implementing elements of the nonpoint source pollution assessment and management program.

(2) **Eligibility to apply for funding.** Eligible applicants and funding recipients under the centennial fund are public bodies, including the state of Washington or any agency, county, city or town, conservation district, other political subdivision, municipal corporation, quasi-municipal corporation, and those Indian tribes now or hereafter recognized by the federal government.

(3) **Program integration.** While maintaining the integrity of individual funding programs, the department will combine the management of the centennial program with certain compatible funding programs, including, but not limited to, the Washington state water pollution control revolving fund, and the Clean Water Act, Section 319 nonpoint source fund. The combined management will include combined funding cycles, combined program guidelines, and combined funding offer lists. Applicants will not be asked to apply for funds from a specific funding source, only whether they are applying for loan or grant funding for their projects. After developing a prioritized list of projects proposed for funding (based on review of applications), the department will decide which funding source best meets the needs of each individual project.

(4) Unless demand for funding for activities projects is limited, a maximum of two-thirds of the available funds for competitive projects for any fiscal year will be made available for projects related to water pollution control facilities.

(5) Normally, the department will fund loan projects or the loan portion of loan and grant projects from the Washington state water pollution control revolving fund whenever the project is eligible for state water pollution control revolving loan fund funding and the funding is available.

(6) **Funding for activities projects:**

(a) **Activities grants made under the centennial program must be matched with any combination of cash or in-kind that totals twenty-five percent of the total eligible project cost.**

(b) Grants for activities projects made under the centennial program are subject to ceiling amounts of:

(i) Five hundred thousand dollars if the match for the grant is entirely in the form of cash; or

(ii) Two hundred fifty thousand dollars if any part of the match is in the form of in-kind goods and services.

(c) Loans for activities projects made under the centennial program are subject to ceiling amounts of five hundred thousand dollars and no match is required.

(7) Funding for facilities projects:

(a) Applicants seeking funding for facilities projects may only apply for loans, but may specify on their application that they would like their project to be analyzed for financial hardship consideration. Some grant funding may be available each funding cycle for a limited number of facilities projects that qualify for financial hardship consideration.

(b) Ceiling amounts for loans under the centennial program: Loans for facilities projects are limited to half the total eligible cost of the project, or five million dollars, whichever is less: Provided, That this amount does not exceed one-third of the available funds for competitive projects for a single funding cycle.

(c) No match is required for loans made under the centennial program.

(d) Ceiling amounts for grants for facilities construction projects made to offset hardship under the centennial program: When a hardship analysis by the department shows that an applicant requesting funding for a facilities construction or "step three" project is eligible for grants, facilities construction grants made under the centennial program are subject to ceiling amounts of half the total eligible cost of the project plus an unemployment differential, as described in subsection (8)(c)(ii) of this section, or five million dollars, whichever is less: Provided, That this amount does not exceed one-third of the available funds for competitive projects for that fiscal year. These ceiling amounts are the maximum that can be provided in the form of grant funds for the life of the project as specified in a facilities plan approved by the department, except as provided for in (h) of this subsection.

(e) Ceiling amounts for grants for facilities projects consisting of combined design and construction: When a hardship analysis by the department shows that a recipient initiating a facilities design and construction or "step four" project, as provided for in WAC 173-95A-080 (2)(d), is eligible for grants, facilities construction grants made under the centennial program are subject to ceiling amounts of half the total eligible cost for the construction portion of the project. The total project cost under step four may not exceed one million dollars. If the total project cost for a step four project exceeds one million dollars, no portion of the project may be funded with centennial loan or grant funds.

(f) Facilities grants to meet hardship made under the centennial program must be matched with sufficient cash to meet the total eligible project cost when combined with the grant amount. The applicant is encouraged to negotiate a funding package that provides funding for the total eligible project cost in the form of loans and grants from the department. Towards this goal, the applicant must accept a loan from the department for all or part of the remainder of the total eligible

project cost. At a minimum, this loan must be for the remaining portion of the eligible cost of the project, or for an amount equal to the grant portion, whichever is less.

(g) A facilities construction project that is eligible for grant funding due to hardship consideration and is prioritized exactly at the funding cutoff point for facilities projects on the final offer list may receive only partial grant funding in a single funding cycle due to lack of available funds. In this case, if funds are available for the project and if the project can be shown to have proceeded during the intervening year according to the provisions of WAC 173-95A-100, the project will be offered the remaining amount as eligible under (b) of this subsection in the next funding cycle, subject to sufficient legislative appropriation.

(h) In exceptional cases where extreme levels of financial hardship exist, and the total eligible grant amount of a project has been determined by the department to be greater than five million dollars, applicants may be awarded financial assistance in the form of equal annual extended payment grants over a period of at least ten and no more than twenty years. Extended grant payments must be approved by the legislature and funding must be appropriated in the Washington state biennial capital budget for each biennium in which extended grant payments are made.

(8) Financial hardship assistance for facilities construction:

(a) Financial hardship assistance may be available to loan recipients for the existing residential need portion of a water pollution control facilities construction project if the project will cause a residential sewer user charge in excess of one and one-half percent of the median household income.

(i) Median household income for this purpose is based on the most recent available census data, updated yearly based on inflation rates as measured by the Federal Bureau of Labor Statistics and published as the Consumer Price Index.

(ii) If median household income data are not available for a community or if the community disputes the data used by the department, the department will allow a local government to conduct a scientific survey to determine the median household income.

(iii) In situations where a project is proposed for an area with demographics which may not be representative of the entire census designated place, the department may require the applicant to conduct a scientific survey to determine the median household income.

(iv) In rare cases where financial hardship cannot be established using residential user fees as a percent of median household income, financial hardship determinations will be made on a case-by-case basis.

(b) The need for hardship assistance is calculated on water pollution control facilities construction costs associated with existing residential need at the time an application for funding is received by the department. The analysis does not include costs for growth. For example, if an applicant applies for ten million dollars to finance facilities construction costs, where six million dollars is for existing residential need and the remaining four million dollars is for growth, the hardship analysis would be based on the six million dollars for existing residential need.

(c) If the department determines that financial hardship exists, it may make changes to the offer of financial assistance in an attempt to lower the residential user charges below the financial hardship level for the existing residential need. These changes may include:

(i) Structuring of the loan agreements to lengthen the repayment term to a maximum of twenty years; or

(ii) Lowering the interest rate; or

(iii) A combination of a lower interest rate and an extended term; and

(iv) If this is not sufficient, offering partial grant funding, not to exceed the ceiling amounts set in subsection (7) of this section and not to exceed fifty percent of the eligible costs plus an unemployment differential. The unemployment differential is determined by comparing the unemployment rate of the county in which the proposed project is located with the state-wide unemployment rate. In cases where the three-year average for the county is at least one full percentage point above the three-year average state-wide unemployment rate, the total three-year average unemployment rate for the county, rounded to the nearest whole percentage point, will be used as the unemployment differential. The three-year average will be for the period ending on December 31 of the most recent year for which a complete report is available from the department of employment security at the time the hardship analysis is conducted.

(d) If an applicant is requesting financial hardship assistance, it should submit a completed financial hardship analysis form with its application for financial assistance.

(9) Policies for establishing the terms of financial assistance. Interest rates for recipients will be based on the average market interest rate. The average market interest rate will be based on the daily market rate published in the Bond Buyer's Index for tax exempt municipal bonds for the period from sixty to thirty days before the annual centennial funding application cycle begins, using the daily market interest rate for that period. Loan terms and interest rates are as follows:

Repayment period interest rate.

Up to five years: Thirty percent of the average market rate.

More than five but no more than twenty years: Sixty percent of the average market rate.

The director of the department or the director's designee may approve lower interest rates for annual funding application cycle for the centennial fund and the Washington state pollution control revolving fund: Provided, That this may only be done if a financial analysis of the Washington state pollution control revolving fund demonstrates that lower interest rates for that year are not detrimental to the perpetuity of that fund.

AMENDATORY SECTION (Amending Order 97-31, filed 12/3/97, effective 1/3/98)

WAC 173-95A-040 ((Determining a substantial environmental degradation.)) **Where can I obtain details about the application and review process for centennial funds?** ((For the purposes of this chapter, a determination of a substantial environmental degradation related to a grant or

loan must be requested by the public official who signed the grant or loan application. The request needs to be in the form of a letter, with supporting documentation, to the director of the department. The director or his or her designee reviews the documentation and determines whether a substantial environmental degradation exists. A determination of a substantial environmental degradation must be documented in a letter signed by the director or his or her designee and addressed to the same public official.)) (1) Applicants must apply for financial assistance in order to be considered for funding and for their projects to be included on the funding offer list. Projects must be on the funding offer list in order to receive centennial financial assistance.

(a) A schedule of the annual funding cycle will be published no later than the last business day of November each year.

(b) The period during which applications are accepted each year will last a minimum of sixty days, and application forms and guidelines for that year will be made available at the beginning of that period.

(c) In the first thirty days of the period during which applications are accepted each year, the department will conduct at least one application workshop in each of the department's four regions.

(2) The application for funding will consist of two parts. Part one of the application will request information for identification, description, and other information about the project for tracking purposes, and part two of the application will request information about the water quality problem or problems being addressed by the project and the proposed solutions to the problems. In the application, applicants will be asked to fully describe the environmental and financial need for the project. Applications for centennial financial assistance for facilities projects must address problems such as public health emergencies, severe public health hazards, the need to provide secondary or advanced treatment, the need to improve and protect water quality, reduction of combined sewer overflows, and other environmental needs. Applications for centennial financial assistance for nonpoint projects must address the remedies and prevention of water quality degradation associated with nonpoint source water pollution and must not be inconsistent with needs identified in the department's nonpoint source pollution assessment and management program.

(3) The application form, part two, will include five main question areas, each with subsidiary questions designed to elicit the information needed to evaluate the project. The maximum points awarded for these question areas equal ninety percent of the total possible score with a maximum of ten percent coming from local prioritization. The local prioritization process is described in detail in WAC 173-95A-050. The five main question areas and their associated maximum point percentages are:

(a) "What is the overall water quality problem and how will the problem be solved or addressed by the project?" This question is intended for general background purposes and to give evaluators an overview of the proposed project; no points are assigned.

(b) "What are the specific public health and water quality impairments caused by the problem and what are the pollu-

tion prevention aspects?" This question area is worth a maximum of thirty-four percent of the total score.

(c) "How will your proposed project address the water quality problem, and what are your measures of success?" This question area is worth a maximum of thirty-four percent of the total score.

(d) "What are some of the local initiatives you have taken that will help make your project a success?" This question area is worth a maximum of twelve percent of the total score.

(e) "Are there any state of Washington or federal mandates that this proposed project addresses?" This question area is worth a maximum of ten percent of the total score.

(4) The department will evaluate the proposed projects based on the information contained in the applications.

(a) Projects will be ranked according to potential water quality benefit and protection of public health.

(b) Projects which have the highest environmental and public health need will be given priority for financial assistance under the centennial program.

(c) Because funds must be used in a timely manner, readiness to proceed is also used in establishing the priority of projects.

(d) Other factors, including funding provisions in chapter 70.146 RCW, provisos identified in the department's biennial capital budget, relationship to the department's published plans, and relationship to published plans created by other federal and state agencies will be included in the priority evaluation.

(e) The department will request other agencies, including, but not limited to, the Washington state conservation commission, the Puget Sound action team, and the Washington state department of health, to provide evaluation assistance as needed.

(f) The department will coordinate maximum funding amounts and other issues with other state and federal funding agencies when possible.

(5) The total score that each proposed project receives based on the application form, part two, will be added to the local prioritization score (see WAC 173-95A-050 for more information on the local prioritization process) to develop the final score for the proposed project.

(6) The department will prepare a draft funding offer list each year after evaluating all applications. The draft funding offer list will list projects in rank order starting with the project receiving the most points in its final score. This will also generally be the order that projects may be offered financial assistance. After issuing the draft funding offer list, the department will allow a minimum of thirty days for public review and comment on the draft funding offer list. No later than fifteen days before the end of the public review and comment period the department will conduct at least one workshop to explain the draft funding offer list, answer questions about the draft funding offer list and the evaluation process, and provide details on the public comment process.

(7) The final funding offer list will be issued no later than sixty days after the end of the public review and comment period. The final funding offer list will reflect any changes made as a result of public comments or other information received during the public review and comment period, and

will include a responsiveness summary. The final funding offer list will generally list projects in the order that projects may be offered financial assistance.

(8) Emergency loan funding:

(a) Emergency loan funding may be available on a case-by-case basis to respond to a public health emergency (as designated by the Washington state department of health) or an environmental emergency (as designated by the department) where:

(i) The public body requesting emergency funding immediately communicates directly with the appropriate regional office of the department; and

(ii) There is a demonstrated need for immediate corrective action; and

(iii) The emergency is not based on a preexisting condition.

(b) If the department agrees that an emergency request should be funded, department staff will attempt to identify funding for the project.

(c) No grant funds are available for emergency projects.

(d) If the emergency project is funded, the applicant must follow all other funding guidelines.

(e) Projects funded as emergencies should start immediately and be completed quickly.

AMENDATORY SECTION (Amending Order 97-31, filed 12/3/97, effective 1/3/98)

WAC 173-95A-050 (~~Awarding grant and loan funds.~~) **How can a local area have a role in determining funding priorities?** ((A county, city or town that has been offered a grant or loan for a water pollution control facility project may not receive grant or loan funds while the county, city, or town is not in compliance with the Growth Management Act unless:

(1) A letter of determination showing that a public health need exists has been provided by the Washington state department of health; or a letter of determination showing that a substantial environmental degradation exists has been provided by the department; and

(2) The county, city or town has provided documentation to the department that actions or measures are being implemented to address the public health need or substantial environmental degradation; and

(3) The department has determined that the project is designed to address only the public health need or substantial environmental degradation described in the documentation, and does not address unrelated needs including but not limited to provisions for additional growth.) (1) Applicants may receive rating points based upon locally derived priorities. A maximum number of local prioritization points equal to ten percent of the total evaluation points available to a project may be added to the project evaluation points assigned by the department. These points are awarded to recognize the fact that local agencies and other groups may have water quality priorities that differ from the state-wide water quality priorities. The department does not require that any particular criteria be used in determining local priorities, but recommends that the local group be familiar with the water quality criteria

the department uses as well as any legislative mandates for funding consideration. Local prioritization is elective and applicants do not have to engage in or complete this process to be eligible for funding consideration. However, projects will not be awarded local prioritization points if the process described here is not followed.

(2) The area used for the local prioritization process must be one entire water resource inventory area.

(3) Each local prioritization process must address all applications for water quality funding made to the department for projects located in that water resource inventory area during the annual funding cycle for that fiscal year.

(4) Priorities must be sent to the department in a written document showing a numeric priority ranking for all eligible projects in a water resource inventory area. It must be signed by the representative of the lead agency of a local planning group (if a local planning group is used) or, if an ad hoc group is used, by the representatives of each of the required organizations. Signatures indicate that the represented group does not object to the specific priority ranking.

(5) In each water resource inventory area one group must complete the local prioritization effort. The department will not accept local priorities from more than one source in each water resource inventory area. The group must be one of the two types of groups described here:

(a) A local watershed planning group organized under RCW 90.82.060 (Watershed Planning Act). This group may be used only if it includes at least three of the required groups described in this section, and if this group is used, they must inform each of the other required groups of their priorities; or

(b) An ad hoc group consisting of a representative of all the required groups.

(6) The required groups are:

(a) The incorporated city, town, or municipal corporation with the largest population within the water resource inventory area; and

(b) All counties with jurisdictional responsibility for at least twenty-five percent of the area within the water resource inventory area; and

(c) The Washington state conservation district with the largest service area within the water resource inventory area; and

(d) The special purpose district providing wastewater services with the largest population within the water resource inventory area (districts that might meet this description include, but are not limited to, sewer districts, water and sewer districts, and public utility districts); and

(e) All federally recognized tribes having reservations or fishing rights within the water resource inventory area.

(7) In cases where a required signatory to the ad hoc group process refuses to become involved with the process, does not respond to the request to become involved, or agrees to become involved but does not do so, the ad hoc group may provide the department with proof that the group was asked to participate. This proof must be submitted with the signed list of priorities by the deadline for submitting that list. Where this proof is provided, the lack of the signature will not stop the department from awarding local priority points. Proof should consist of copies of registered mail asking the required group to become involved.

(8) The list of local priorities, with signatures, is due to the department no later than forty-five days after the end of the application period each fiscal year.

NEW SECTION

WAC 173-95A-060 What are the limitations on the use of funds? (1) The centennial fund may be used to provide financial assistance to applicants for the construction of water pollution control facilities and for water pollution control activities.

(2) Loan and grant offers identified on the final offer list will be effective for up to one year from the date of the final offer list. All loan and grant offers that do not result in a signed agreement within the effective offer period are automatically terminated.

(3) Limitations on commercial, industrial, and institutional flows:

(a) Flows from individual commercial, industrial, or institutional sources, are considered small when they are less than five percent of the total existing needs, as identified by the department's engineers. Collectively, flows from all individual commercial, industrial, or institutional sources are considered small when they are less than thirty percent of the total existing needs, as identified by the department's engineers. The portion of a project designed to serve the needs of commercial, industrial, and institutional customers may be funded using loans only, regardless of the level of financial capability in the jurisdiction applying for funding, where the department has determined that the flows from commercial, industrial, and institutional customers are "small."

(b) That portion of a project designed to serve the needs of local public primary and secondary schools may be grant eligible in cases where the residential portion of a project has been determined to be eligible for partial grant funding due to the level of financial capability in the public body applying for funding, under the provisions of WAC 173-95A-030(8).

(4) Projects proposed by Washington state agencies will not be funded; except that activities projects undertaken by state institutions of higher education are eligible to apply for funding when the activities are not part of the school's statutory responsibilities.

(5) Ineligible projects or project elements. Certain projects or project elements, including, but not limited to, the following, are not eligible for centennial assistance:

(a) Projects related to acts of nature that alter the natural environment, thereby causing water quality problems;

(b) Cost-plus-a-percentage-of-cost contracts (also known as multiplier contracts), time and materials contracts, and percent-of-construction contracts in facilities projects;

(c) Fines and penalties due to violations of or failure to comply with federal, state, or local laws;

(d) Projects or project elements intended solely for flood control;

(e) Interest on bonds, interim financing, and associated costs to finance projects;

(f) Landscaping for aesthetic reasons;

(g) Legal expenses other than those associated with development of local ordinances for water quality protection

and improvement, or with use of a bond counsel in developing a loan agreement;

- (h) Lobbying or expenses associated with lobbying;
 - (i) Reclamation of abandoned mines;
 - (j) Monitoring equipment used by an industry for sampling and analysis of industrial discharges from municipal water pollution control facilities;
 - (k) Office equipment;
 - (l) Operating expenses of local government, such as the salaries and expenses of a mayor, city council member, city attorney, etc.;
 - (m) Routine or ongoing operation and maintenance costs;
 - (n) Overtime differential paid to employees of local government to complete administrative or force account work;
 - (o) Permit fees;
 - (p) Personal injury compensation or damages arising out of the project, whether determined by adjudication, arbitration, negotiation, or other means;
 - (q) Preparation of loan or grant applications;
 - (r) Costs associated with commercial, institutional or industrial pretreatment
 - (s) Professional dues;
 - (t) Projects or project elements solely addressing water quantity or other water resource issues;
 - (u) Refinance of existing debt;
 - (v) Replacement parts, other than those for an initial set of spare parts for equipment that is critical for a facility to operate in compliance with discharge permit requirements;
 - (w) Rework costs associated with any project;
 - (x) Projects or project elements solely addressing solid or hazardous waste;
 - (y) Training staff to develop skills not identified in the loan or grant agreement;
 - (z) Vehicle purchase except for vehicles intended for the transportation of liquid or dewatered sludge or septage;
 - (aa) Water pollution control activities or facilities or portions of those facilities that are primarily intended to control, transport, treat, dispose, or otherwise manage commercial, institutional or industrial wastewater or other water pollution control needs from those sites.
- (6) Loan-eligible projects or project elements. Certain projects or project elements, including, but not limited to, the following, are ineligible for centennial grant assistance, but may be eligible for centennial loan assistance:
- (a) Implementation of best management practices on private property, with certain narrow exceptions listed in subsection (8) of this section;
 - (b) Comprehensive sewer planning, including wastewater elements of capital facilities planning under the Growth Management Act;
 - (c) Comprehensive storm water planning;
 - (d) Construction of water pollution control facilities with reserve capacities to meet up to one hundred ten percent of existing residential needs;
 - (e) Land acquisition as an integral part of the treatment process (e.g., land application) or for prevention of water pollution;

(f) Land acquisition for siting of water pollution control facilities, sewer rights of way, and easements, and associated costs;

- (g) Land acquisition for wetland habitat preservation;
 - (h) Local loan fund establishment for water pollution control;
 - (i) New sewer systems to eliminate failing or failed on-site septic systems;
 - (j) Design (plans and specifications) for water pollution control facilities (including storm water facilities);
 - (k) Facilities plans for water pollution control facilities (including storm water facilities);
 - (l) Previously funded objectives;
 - (m) Residential and small commercial on-site septic system rehabilitation and replacement;
 - (n) Sewer laterals or individual pump stations or other appurtenances on private residential property;
 - (o) Value engineering for water pollution control facilities (including storm water facilities).
- (7) Projects or project elements eligible only for loans except in hardship situations. Certain projects or project elements, including, but not limited to, the following, may be eligible or partly eligible for centennial grant assistance when hardship has been determined by the department, and eligible for a centennial loan when hardship has not been demonstrated:
- (a) Construction of combined sewer overflow abatement;
 - (b) Construction of facilities for the control, storage, treatment, disposal, or recycling of domestic wastewater to meet existing need;
 - (c) Sewers and side sewer laterals on public property for infiltration and inflow correction projects;
 - (d) Costs associated with transferring ownership of a small wastewater system to a public body;
 - (e) Storm water quality control, treatment, installation, or rehabilitation necessary to protect surface and ground water;
 - (f) An initial set of spare parts for equipment that is critical for a facility to operate in compliance with discharge permit requirements;
 - (g) Sewer to replace existing water pollution control facilities.
- (8) Loan or grant eligible projects or project elements. Certain projects or project elements, including, but not limited to, the following, may be eligible or partly eligible for centennial loan or grant assistance:
- (a) Aquatic plant control when it has been established that water quality degradation is due to the presence of aquatic plants, and sources of pollution have been addressed sufficiently to assure that pollution being remediated does not recur;
 - (b) Implementation of best management practices on private property, where the practice consists of demonstration of new, innovative or alternative technology not yet demonstrated in the Washington state department of ecology region in which they are proposed, and where a public easement is given by the landowner;
 - (c) Implementation of best management practices in the riparian zone on private property consisting of revegetation

or fence construction and where a public easement is given by the landowner;

(d) Implementation of best management practices on public property;

(e) Computer equipment specific to funded project and identified in a funding agreement;

(f) Annual meeting or conference registration fees where attendee is making a formal presentation related to the project;

(g) Watershed plan development and implementation;

(h) Diagnostic studies to assess current water quality;

(i) Water quality education and stewardship programs;

(j) Environmental checklists, assessments, and impact statements necessary to satisfy requirements for the State Environmental Policy Act (SEPA) and the National Environmental Policy Act (NEPA);

(k) Equipment and/or tools for activities projects as identified in a funding agreement;

(l) Farm planning;

(m) Ground water protection activities and programs;

(n) Riparian and wetlands habitat restoration and enhancement, including revegetation;

(o) Indirect costs at a rate of up to twenty-five percent, or as defined in the most current edition of *Administrative Requirements for Ecology Grants and Loans*;

(p) Lake implementation projects and water quality planning activities on lakes with public access;

(q) Landscaping for erosion control directly related to a project, or site-specific landscaping in order to mitigate site conditions and comply with requirements in the State Environmental Policy Act or the National Environmental Policy Act;

(r) Monitoring effectiveness;

(s) Monitoring equipment used in a funded project for water quality assessment;

(t) Volunteer monitoring programs;

(u) Monitoring water quality;

(v) Costs associated with the establishment of an area-wide program for ongoing maintenance of on-site wastewater systems;

(w) On-site wastewater system surveys;

(x) Development and dissemination of model ordinances to prevent or reduce pollution from nonpoint sources;

(y) Public participation and public awareness directly related to the project;

(z) Light refreshments for advisory group meetings when specified in loan or grant agreement;

(aa) Sales tax;

(bb) Sediment reduction practices and projects;

(cc) Stream restoration projects or other bioengineering for water quality purposes;

(dd) Total maximum daily load study development and implementation;

(ee) Training recipient staff to develop skills specific and necessary to the funded project and where the training is identified in the loan or grant agreement;

(ff) User charge system development; wastewater or storm water utility rate studies;

(gg) Comprehensive basin, watershed, and area-wide water quality planning;

(hh) Implementation of eligible projects identified in watershed plans;

(ii) Wellhead protection.

NEW SECTION

WAC 173-95A-070 How does the Growth Management Act impact the use of funds? (1) A local government not in compliance with the Growth Management Act may not receive loans or grants from the department, except that, in limited circumstances, a local government that is not in compliance with the Growth Management Act may receive loans or grants from the department where necessary to address a public health need or substantial environmental degradation.

(2) For the purposes of this chapter, "compliance with the Growth Management Act" means that:

(a) A county, city, or town that is required to or chooses to plan under RCW 36.70A.040 has adopted a comprehensive plan and development regulations in conformance with the requirements of chapter 36.70A RCW, after it is required that the comprehensive plan and development regulations be adopted; and

(b) The county, city, or town has not been found out of compliance by a growth management hearings board; or

(c) A growth management hearings board has found a county, city, or town in compliance with the requirements of chapter 36.70A RCW, after previously finding the county, city, or town was not in compliance.

(3) For the purposes of this chapter, a public health need related to a loan or grant must be documented by a letter signed by the secretary of the Washington state department of health or his or her designee and addressed to the public official who signed the loan or grant application. "Public health need" means a situation where:

(a) There is a documented potential for:

(i) Contaminating a source of drinking water; or

(ii) Failure of existing wastewater system or systems resulting in contamination being present on the surface of the ground in such quantities and locations as to create a potential for public contact; or

(iii) Contamination of a commercial or recreational shellfish bed as to create a critical public health risk associated with consumption of the shellfish; or

(iv) Contamination of surface water so as to create a critical public health risk associated with recreational use; and

(b) The problem generally involves a serviceable area including, but not limited to, a subdivision, town, city, or county, or an area serviced by on-site sewage disposal systems; and

(c) The problem cannot be corrected through more efficient operation and maintenance of an existing wastewater disposal system or systems.

(4) For the purposes of this chapter, a substantial environmental degradation related to a loan or grant must be documented by a letter signed by the director of the department or his or her designee and addressed to the public official who signed the loan or grant application. "Substantial environmental degradation" means that:

(a) There is a situation causing real, documented, critical environmental contamination that:

(i) Contributes to violations of the state's water quality standards; or

(ii) Interferes with beneficial uses of the waters of the state; and

(b) The problem generally involves a serviceable area including, but not limited to, a subdivision, town, city, or county, or an area serviced by on-site sewage disposal systems; and

(c) The problem cannot be corrected through more efficient operation and maintenance of an existing wastewater disposal system or systems.

(5) A county, city, or town that has been offered a loan or grant for a water pollution control facilities project may not receive loan or grant funds while the county, city, or town is not in compliance with the Growth Management Act unless:

(a) Documentation showing that a public health need has been provided by the Washington state department of health; or documentation showing that a substantial environmental degradation exists has been provided by the department; and

(b) The county, city, or town has provided documentation to the department that actions or measures are being implemented to address the public health need or substantial environmental degradation; and

(c) The department has determined that the project is designed to address only the public health need or substantial environmental degradation described in the documentation, and does not address unrelated needs including, but not limited to, provisions for additional growth.

NEW SECTION

WAC 173-95A-080 What is the "step process" for planning facilities and activities projects? (1) The step process: The "step process" is a systematic method for proceeding with projects. The step process begins with site-specific planning, and continues through design to construction or implementation. It is required for facilities construction projects and, in a modified form, is required for some kinds of activities projects and recommended for all kinds of activities projects.

(2) The step process for facilities: To be eligible for a centennial loan or grant, facilities projects must follow the step process.

(a) Before a public body with a facilities project is eligible to apply for funds, all previous steps must be approved by the department in order to help ensure that funds are spent in a timely matter on projects proceeding towards a successful outcome. Funding for site-specific facilities planning (step one) or design (step two) does not guarantee the awarding of future loans or grants for construction (step three). The department will not sign a loan or grant agreement until all previous steps have been completed and approved by the department.

(b) Planning (step one): Step one involves the preparation of a site-specific facilities plan that identifies and prioritizes the cost-effective alternatives for addressing a water pollution control problem with or without state and federal funding. There is no prerequisite for planning. If there is an

existing engineering report, prepared with or without department funding, it must be upgraded for centennial loan or grant eligibility if it does not meet the definition of a facilities plan.

(c) Design (step two): Step two includes the preparation of plans and specifications for use in construction. These must be based on the preferred cost-effective alternative identified in the facilities plan. Facilities plans must be approved by the department before an application for design can be considered for funding, regardless of whether or not the facilities planning documents were funded by a department grant or loan.

(i) Due to specific loan and grant review criteria, facilities plans approved by the department for purposes other than securing a loan or grant will not be accepted for design purposes.

(ii) Facilities plans approved by the department more than two years prior to the close of the loan and grant application period must contain evidence of recent review by the department to ensure the document reflects current conditions.

(d) Construction (step three): Step three includes the actual building of facilities based on the approved design. Design must be approved by the department before an application for construction can be considered for funding.

(e) Design and construction (step four): In some cases, design and construction may be combined into one loan award, which is called step four. Different ceiling amounts apply to step four projects, as provided for in WAC 173-95A-030. Applications for step four loans will be accepted and considered for funding if it can be demonstrated that step two (design) can be completed and approved by the department within one year of the date the final offer list is made public.

(3) Prerequisite documents for facilities projects: Draft documents must be sent to the department's engineers at least sixty days prior to end of application cycle for approval by end of application cycle.

(4) Step deviations. A deviation from the step process may be allowed only in a situation where the Washington state department of health has declared a public health emergency and the proposed project would remedy this situation.

(a) In this situation, the department will accept applications for funding consideration that do not follow the step process. However, no loan or grant agreement will be signed until all previous steps have been completed and approved by the department. This deviation from the step process will only allow an application to be considered for funding - it does not guarantee that funding will be offered. It does not allow a loan to be awarded until all step requirements have been satisfied.

(b) If a deviation is approved, the applicant may deviate by only one step. For instance, the department could accept an application for design if planning was not completed and approved, or an application for construction if design was not completed and approved. However, the department may not accept an application for construction if planning was not completed and approved, which would be a two step deviation.

(5) The step process for activities.

(a) Two kinds of activities projects must follow the step process:

- (i) Best management practices; and
- (ii) Lake projects.

(b) In other cases, the step process for activities is not required, however the department encourages all applicants to plan activities.

(c) The steps involved in the step process for activities are:

(i) Planning (step one) involves the identification of problems and evaluation of cost-effective alternatives, based on environmental and economic considerations, for correcting and preventing water quality problems. Specific activities may include planning for watershed management, ground water management areas, lake restoration, and water quality assessment and other related activities. If the planning document is one that must be approved by a government agency or public body other than the applicant, it must be signed before the applicant is eligible to apply for step two funding.

(ii) Implementation (step two) includes the actual implementation of the project based on the planning document. Where the project includes any type of construction, a design element may be included in step two.

NEW SECTION

WAC 173-95A-090 What other laws, regulations or requirements must recipients comply with? (1) Recipients shall fully comply with all federal, state, and local laws and regulations related to procurement, discrimination, labor, job safety, and drug-free environments. The recipient shall also comply with the state and federal minority-and-women-owned businesses regulations. Applications must not be inconsistent with pertinent adopted water quality plans.

(2) If a loan or grant is provided for water pollution control facilities, recipients shall submit a declaration of construction of water pollution control facilities to the department within thirty days of project, phase, or segment completion.

(3) Recipients must maintain accounting records in accordance with "generally accepted government accounting standards." These standards are defined as, but not limited to, those contained in the United States General Accounting Office publication *"Standards for Audit of Governmental Organizations, Programs, Activities, and Functions."*

(4) Accounting irregularities may result in an immediate stoppage of payment until irregularities are resolved. The director of the department may require immediate repayment of misused loan or grant funds.

NEW SECTION

WAC 173-95A-100 How are grants and loans managed? (1) Timely use of funds: Projects funded with loans or grants from the centennial fund must be spent in a timely fashion so that funds are put to work for the water quality of the state as soon as possible. To accomplish this, certain time restrictions are placed on the use of funds as follows:

(a) Work on a project must be started within sixteen months of the publication date of the final offer list on which the project was proposed.

(i) Any expenditure of funds which is eligible for reimbursement under the terms of the loan or grant agreement constitutes starting the project.

(ii) No more than one time extension of no more than twelve months may be made when there are valid reasons for the extension and when the extension is included in the signed funding agreement with the department.

(iii) Valid reasons for a time extension allowing a start date more than sixteen months after the publication date of the final offer list are limited to:

(A) Schedules included in water quality permits, consent decrees, or enforcement orders; or

(B) The recipient and the department agree that there is a need to do work during an environmental window in a specific season of the year.

(iv) If the funding recipient has one of these valid reasons to wait longer than sixteen months to start the project, the reasons why it will take longer and the schedule the recipient will follow must both be stated clearly in a signed loan or grant agreement.

(b) Work on a project must be completed within five years of the publication date of the final offer list on which the project was proposed or within a shorter time period if the shorter period is identified in the funding agreement for the project. When all work identified in the funding agreement scope of work is finished, the project is deemed to be completed. After the five-year time limit is reached, no further expenditures may be reimbursed unless an extension is made.

(i) No more than one time extension of no more than twelve months may be made when there are valid reasons for the extension; and

(A) The extension is requested no less than three months before the funding agreement is due to expire; and

(B) The department's water quality program manager agrees that the extension is for a valid reason.

(ii) Valid reasons for a time extension are limited to:

(A) Schedules included in water quality permits, consent decrees, or enforcement orders; or

(B) The recipient and the department agree that there is a need to do work during an environmental window in a specific season of the year.

(iii) If the funding recipient has one of these valid reasons to be allowed a time extension, the reasons why it will take longer and the schedule the recipient will follow must both be stated clearly in a signed amendment to the existing loan or grant agreement.

(c) In-kind goods and services may be used as match for activities grants subject to ceiling amount restrictions covered in WAC 173-95A-030 and subject to the most recent edition of *Administrative Requirements for Ecology Grants and Loans*.

(d) In-kind goods and services may be used as match for facilities grants only in the case of projects undertaken under the small town environmental program, or "STEP."

(2) Prior authorization to incur costs. In cases where a project has been identified on a final offer list, the applicant

may make a written request to the water quality program manager, asking to begin incurring costs related to a loan or grant for which there is not yet a signed loan or grant agreement. If the department concurs with this request, the water quality program manager will send the applicant a letter authorizing the costs. The applicant incurs the costs at their own risk. When an agreement is signed, previously incurred costs that are not eligible under the terms of the agreement are the sole responsibility of the applicant.

(3) Appeals of loan and grant agreement decisions: The only decisions which may be appealed are written decisions by the department made during the effective loan or grant agreement period. Appeals must be filed in writing to the department within forty-five days from the date of the disputed decision. Following the final decision of a dispute, the department and the recipient shall proceed with the project in accordance with the decision rendered. Administrative or legal costs and other expenses incurred as part of an appeal will not be eligible for reimbursement.

(4) The department, or at the department's discretion another authorized auditor, may audit the loan or grant agreement and records.

(5) The administration of all loans and grants will be subject to all terms and conditions in a funding agreement signed by the department and by the recipient.

(6) Ongoing management of most aspects of loan and grant projects is subject to the most recent edition of *Administrative Requirements for Ecology Grants and Loans*, copies of which will be provided to all recipients.

NEW SECTION

WAC 173-95A-110 General provisions. (1) Other state and federal grant funding: Other grant funds provided by the state legislature, federal government, or from other sources will be managed in a manner consistent with the centennial rule.

(2) For all projects, the recipient must acknowledge department financial assistance in all reports, technical documents, publications, brochures, and other materials produced using funding from the loan or grant. All site-specific projects must have a sign of sufficient size to be seen from nearby roadways, acknowledging department financial assistance, and left in place throughout the life of the project. Department logos must be on all signs and documents. Logos will be provided as needed.

WSR 01-01-043

PERMANENT RULES

DEPARTMENT OF ECOLOGY

[Order 00-11—Filed December 8, 2000, 4:33 p.m.]

Date of Adoption: December 8, 2000.

Purpose: To provide consistency and predictability to the management of the Washington state water pollution control revolving fund.

Citation of Existing Rules Affected by this Order: Amending chapter 173-98 WAC.

Statutory Authority for Adoption: Chapter 90.50A RCW.

Adopted under notice filed as WSR 00-19-095 on September 20, 2000.

Changes Other than Editing from Proposed to Adopted Version: Several small changes were made for clarity, and are described in full in the concise explanatory statement (responsiveness summary). None are substantive or change the meaning of the rule.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 1, Amended 8, Repealed 0.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 1, Amended 8, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 0, Repealed 0.

Effective Date of Rule: Thirty-one days after filing.

December 8, 2000

Tom Fitzsimmons

Director

AMENDATORY SECTION (Amending Order 98-10, filed 11/24/98, effective 12/25/98)

WAC 173-98-020 What are the definitions of key terms? Unless the context clearly requires otherwise, the definitions in this section apply throughout this chapter.

(1) "Act" means the Federal Water Pollution Control Act (33 U.S.C. 4661 et seq.).

(2) "Applicant" means a public body (~~requesting financial assistance for water pollution control facilities projects authorized in section 212 of the act. "Applicant" can also mean an entity other than a public body which requests financial assistance authorized by sections 319 and 320 of the act. An entity must be financially stable and clearly have the capacity to repay their loans~~) that has applied for funding.

(3) ("Approvable" means:

- ~~All major department comments on the draft document (i.e., facilities plan or plans and specifications) have been addressed.~~
- ~~Preliminary State Environmental Policy Act (SEPA) review checklists have been prepared for the project or the project is in compliance with SEPA.~~
- ~~The SERP State Environmental Review Process (SERP) review checklists have been prepared for the project or the project is in compliance with SERP. Only the final written department approval remains.~~

~~(4))~~ "Best management practices" means physical, structural, and/or managerial practices approved by the department or by another agency with regulatory oversight that, when used singularly or in combination, prevent or reduce pollutant discharges.

~~(4)~~ "Concentrated animal feeding operation" means an animal livestock feeding operation that discharges animal waste to the waters of Washington state more frequently than the twenty-five year, twenty-four hour storm event; or if the operation is under a department administrative order, notice of violation, a National Pollution Discharge Elimination System permit; or the operation will be required to have a National Pollution Discharge Elimination System permit coverage in the near future; or the department or the U. S. Environmental Protection Agency determines the operation is considered to be polluting the waters of Washington state.

~~(5)~~ "Commercial, industrial, and institutional flows" means the portion of the total flows to a facilities project that originate from commercial establishments, industrial facilities, or institutional sources such as schools, hospitals, and prisons.

~~(6)~~ "Construction" means the erection, installation, expansion, or improvement of water pollution control facilities or activities.

~~((5))~~ ~~(7)~~ "Cost-effective alternative" means that alternative with the lowest present worth or equivalent annual value that achieves the requirements of the project while recognizing the environmental and other nonmonetary considerations.

~~((6)~~ ~~"Coverage requirement" means annual net revenue which, after the payment of senior lien obligations and together with utility local improvement district assessments (if applicable), is at least equal to one hundred twenty percent of annual debt service on the loan and any other obligations on a parity therewith.~~

~~(7))~~ ~~(8)~~ "Defeasance" means the setting aside in escrow or other special fund or account of sufficient investments and money dedicated to pay all principal of and interest on all or a portion of an obligation as it comes due.

~~((8))~~ ~~(9)~~ "Department" means the Washington state department of ecology.

~~((9))~~ ~~(10)~~ "Design" means the plans and specifications for water pollution control facilities or activities.

~~((10))~~ ~~(11)~~ "Director" means the director of the Washington state department of ecology or his or her authorized designee.

~~((11))~~ ~~(12)~~ "Easement," for the purposes of this rule, means a written agreement between a public body and an individual landowner, that allows the public body to have access to the property at any time to inspect, maintain, or repair activities or facilities installed with a loan or a grant, or to hold occasional public tours of the site for educational purposes.

~~(13)~~ "The effective date of the loan agreement" means the date the loan agreement is signed by the department's water quality program manager.

~~((12))~~ ~~(14)~~ "Enforcement order" means an administrative order that is a document issued by the department under the authority of RCW 90.48.120 and that directs a public body to complete a specified course of action within an

explicit period of time to achieve compliance with the provisions of chapter 90.48 RCW.

~~(15)~~ "Engineering report" means a report that evaluates engineering and other alternatives that meet the requirements set forth in Chapter 173-240 WAC, Submission of plans and reports for construction of wastewater facilities.

~~(16)~~ "EPA" means the United States Environmental Protection Agency.

~~((13))~~ ~~(17)~~ "Excess capacity" means water pollution control facilities capability beyond what is needed for the existing residential population to meet the water quality based effluent limitations in the recipient's National Pollution Discharge Elimination System or state waste discharge permit.

~~(18)~~ "Existing residential need" means work required on the water quality based effluent limitations in the recipient's water pollution control facilities for the existing residential population in order to meet the recipient's National Pollution Discharge Elimination System or state waste discharge permit.

~~((14))~~ ~~(19)~~ "Facilities plan" means plans and studies necessary for treatment works to comply with enforceable requirements of the act and with state statutes. Facilities plans must include a systematic evaluation of alternatives that are feasible in light of the unique demographic, environmental or ecological, topographic, hydrologic and institutional characteristics of the area. Facilities plans must also demonstrate that the selected alternative is cost-effective.

~~((15))~~ ~~(20)~~ "Federal capitalization grant" means a federal grant awarded by EPA to the state as seed money to help establish the state water pollution control revolving fund.

~~((16))~~ ~~(21)~~ "Financial assistance" means each of the four types of assistance specified in WAC 173-98-030 (1)(b) through (f) and other assistance authorized by Title VI of the act and chapter 90.50A RCW.

~~((17)~~ ~~"SRF loan agreement" means a legal contract between a recipient and the state, enforceable under state law, and specifying the terms and schedules under which assistance is provided.~~

~~(18))~~ ~~(22)~~ "Funding cycle" means the annual cycle of activities related to allocating funds for a single fiscal year.

~~(23)~~ "Fund" means the state water pollution control revolving fund.

~~((19))~~ ~~(24)~~ "General obligation debt" means an obligation of the recipient secured by annual ad valorem taxes levied by the recipient and by the full faith, credit, and resources of the recipient.

~~((20))~~ ~~(25)~~ "Initiation of operation" means the actual date the water pollution control facilities initiates operation and the entity begins using the facilities for its intended purpose. This date may occur prior to final inspection and will be determined by the department after consultation with the recipient. This date may be the same or earlier than the date of project completion.

~~((21))~~ ~~(26)~~ "Infiltration and inflow" means water, other than wastewater, that enters a sewer system.

~~(27)~~ "Infiltration and inflow correction" means the cost-effective alternative or alternatives identified in an approved facility plan for eliminating or reducing the infiltration and inflow from an existing sewer system.

(28) "Intended use plan (IUP)" means a plan identifying the intended uses by the department of the amount of funds available for financial assistance from the state water pollution control revolving fund (SRF) for that fiscal year as described in section 606(c) of the act. The projects on the ((HUP)) intended use plan will be ranked by environmental and financial need.

((22)) (29) "Loan agreement" means a legal contract between a recipient and the state, enforceable under state law, and specifying the terms and schedules under which assistance is provided.

(30) "Loan default" means failure to make a loan repayment within sixty days after the payment was due.

(31) "Local prioritization process" means a process to prioritize projects locally.

(32) "Nonpoint source water pollution" means pollution that enters any waters of the state from any dispersed water-based or land-use activities, including, but not limited to:

(a) Atmospheric deposition, surface water runoff from agricultural lands, urban areas, forest lands, subsurface or underground sources; and

(b) Discharges from boats or other marine vessels.

((23)) (33) "Plans and specifications" means the construction contract documents and supporting engineering documents prepared in sufficient detail to allow contractors to bid on and construct water pollution control facilities. "Plans and specifications" and "design" may be used interchangeably.

((24)) (34) "Project" means the scope of work for which financial assistance is issued.

((25)) (35) "Project completion" means the date the project is determined by the department as being complete.

((26)) (36) "Public body" means the state of Washington or any agency, county, city or town, other political subdivision, municipal corporation or quasi-municipal corporation, and those Indian tribes recognized as such by the federal government at the time the SRF loan agreement is signed.

((27)) (37) "Public health emergency" means a situation declared by the Washington state department of health in which illness or exposure known to cause illness is occurring or is imminent.

((28)) (38) "Recipient" means an applicant for financial assistance which has signed an SRF loan agreement.

((29)) (39) "Reserve account" means, for a loan that constitutes revenue-secured debt, the account of that name created in the loan fund to secure the payment of the principal ((of)) and interest on the loan.

((30)) (40) "Revenue-secured debt" means an obligation of the recipient secured by a pledge of the revenue of a utility and one not of a general obligation of the recipient.

((31)) (41) "Scope of work" means a detailed description of a project, including measurable objectives useful for determining successful completion. The scope of work is negotiated between the department and the loan or grant recipient.

(42) "Senior lien obligations" means all revenue bonds and other obligations of the recipient outstanding on the date of execution of this agreement (or subsequently issued on a parity therewith, including refunding obligations) or issued after the date of execution of this agreement having a claim or

lien on the gross revenue of the utility prior and superior to the claim or lien of the loan, subject only to maintenance and operation expense.

((32)) (43) "Severe public health hazard" means a situation declared by the state department of health and the department in which the potential for illness exists, even if the illness is not currently occurring or imminent. For the purposes of this chapter there must be contamination of drinking water or contamination must be present on the surface of the ground in such quantities and locations to create a potential for public contact. The problem must generally involve a serviceable area including, but not limited to, a subdivision, town, city, or county. Also, the problem must be one which cannot be corrected through more efficient operation and maintenance of the wastewater disposal system(s).

((33)) (44) "Sewer" means a pipe and related pump stations located on public property, or on public rights of way and easements, that conveys wastewater from individual buildings or groups of buildings to a treatment plant.

(45) "Side sewer" means a sanitary sewer service extension from the point five feet outside the building foundation to the publicly owned collection sewer.

(46) "Small flows" means flows from commercial, industrial, or institutional sources that enter a sanitary sewer system.

(47) "State water pollution control revolving fund (SRF)" means the water pollution control revolving fund established by RCW 90.50A.020.

((34)) (48) "Step process" means a systematic process that facility projects must follow to be eligible for loans or grants.

(49) "Total eligible project cost" means the sum of all costs associated with a water quality project that have been determined to be eligible for loan or grant funding.

(50) "Total project cost" means the sum of all eligible and ineligible costs associated with a water quality project.

(51) "Water pollution" means such contamination, or other alteration of the physical, chemical, or biological properties of any waters of the state, including, but not limited to, change in:

- (a) Temperature;
- (b) Taste;
- (c) Color;
- (d) Turbidity; or
- (e) Odor.

It also means a discharge of any liquid, gaseous, solid, radioactive, or other substance into any waters of the state that will or is likely to create a nuisance or render those waters harmful, detrimental, or injurious to the public health, safety, or welfare, or injurious to domestic, commercial, industrial, agricultural, recreational, or other legitimate beneficial uses, or to livestock, wild animals, birds, fish, or other aquatic life.

((35)) (52) "Water pollution control activities" means actions taken by a public body to achieve the following purposes:

- (a) To control nonpoint sources of water pollution;
- (b) To develop and implement a comprehensive conservation and management plan for estuaries; and

(c) To maintain, improve, or protect water quality through the use of water pollution control facilities, management programs, or other means.

~~((36))~~ (53) "Water pollution control facilities" means any facilities or systems for the control, collection, storage, treatment, disposal, or recycling of wastewater. Wastewater includes, but is not limited to, sanitary sewage, storm water, combined sewer overflows, residential, commercial, industrial, and agricultural wastes, which are causing water quality degradation due to concentrations of conventional, nonconventional, or toxic pollutants. Water pollution control facilities include all equipment, utilities, structures, real property integral to the treatment process, and interests in and improvements on real property necessary for or incidental to such purpose. Water pollution control facilities also include facilities, equipment, and collection systems which are necessary to protect federally designated sole source aquifers.

(54) "Water resource inventory areas," sometimes referred to as "WRIAs," means one of sixty-two watersheds in the state of Washington, each composed of the drainage areas of a stream or streams, as established in chapter 173-500 WAC as it existed on January 1, 1997. All parts of the state of Washington are located in a single water resource inventory area.

AMENDATORY SECTION (Amending Order 00-02, filed 4/7/00, effective 5/8/00)

WAC 173-98-030 How, and under what conditions, can money from the state water pollution control revolving fund be used? (1) Uses of the money. The state water pollution control revolving fund (SRF) may be used for the following purposes:

(a) To accept and retain funds from capitalization grants provided by the federal government, state matching funds appropriated in accordance with chapter 90.50A RCW, payments of principal and interest, and any other funds earned or deposited;

(b) To make loans to applicants in order to finance the planning, design, and/or the construction of water pollution control facilities, make loans to applicants for the implementation of nonpoint source pollution control management programs (which includes planning and implementing elements of the nonpoint source pollution assessment and management program), and make loans to applicants for the development and implementation of a comprehensive estuary conservation and management plan, subject to the requirements of the act;

(c) To provide loans for up to twenty years reserve capacity for water pollution control facilities;

(d) To buy or refinance the debt obligations incurred by applicants after March 7, 1985, for the construction of water pollution control facilities. (March 7, 1985, was the date that the amendments adding Title VI to the act were first considered by Congress. Any refinancing agreements must be for construction initiated after that date according to federal and state law);

(e) To guarantee or purchase insurance for local obligations where such an action would improve credit market access or reduce interest rates;

(f) As a source of revenue or security for the payment of principal and interest on revenue or general obligation bonds issued by the state, if the proceeds of those bonds will be deposited in the fund; and

(g) To finance the reasonable costs incurred by the department in the administration of the account as authorized by the act and chapter 90.50A RCW.

(2) Policies for establishing the terms of financial assistance. Recipients' interest rates will be based on the average market interest rate. The average market interest rate will be based on the daily market rate published in the *Bond Buyer's Index* for tax exempt municipal bonds for the period from sixty to thirty days before the SRF annual funding application cycle begins, using the daily market interest rate for that period.

Loan terms and interest rates are as follows:

Repayment Period	Interest Rate
Up to five years:	Thirty percent of the average market rate.
More than 5 but no more than 20 years:	Sixty percent of the average market rate.

The director of the department of ecology or ~~(her/his)~~ the director's designee may approve lower interest rates for the annual funding application cycle if a financial analysis of the fund demonstrates that lower interest rates for that year are not detrimental to the perpetuity of the fund.

(3) Financial hardship assistance for facilities construction.

(a) Financial hardship assistance may be available to loan recipients for the existing residential need portion of a water pollution control facilities construction project if the project will cause a residential sewer user charge in excess of ~~((4-5))~~ one and one-half percent of the median household income.

(i) Median household income for this purpose is based on the most recent available census data~~((Median household income data is))~~, updated yearly based on inflation rates as measured by the Federal Bureau of Labor Statistics and published as the Consumer Price Index.

(ii) If median household income data ~~((is))~~ are not available for a community or if the community disputes the data used by the department, the department will allow a local government to conduct a scientific survey to determine the median household income.

(iii) In situations where a project is proposed for an area with demographics which may not be representative of the entire census designated place, the department may require a scientific survey to determine the median household income.

(iv) In rare cases where financial hardship cannot be established using residential user fees as a percent of median household income financial hardship determinations will be made on a case-by-case basis.

(b) The need for hardship assistance is calculated on water pollution control facilities construction costs associ-

PERMANENT

ated with existing residential need at the time an application for funding is received by the department. The analysis does not include costs for growth. For example, if an applicant applies for ten million dollars to finance facilities construction costs, where six million dollars is for existing residential need and the remaining four million dollars is for growth, the hardship analysis would be based on the six million dollars for existing residential need.

(c) If the department determines that financial hardship exists, it may ~~((structure loan agreements with terms to help keep))~~ make changes to the offer of financial assistance in an attempt to lower the residential user charges below the financial hardship level for the existing residential need ~~((, if possible. Hardship terms may include lengthening the repayment period to a maximum of twenty years, lowering the interest rate, or a combination of a lower interest rate and an extended term.~~

~~(d) For some facilities projects, financial hardship cannot be established using residential user fees as a percent of median household income. In these situations, financial hardship determinations will be made on a case-by-case basis.~~

~~(e))~~ These changes may include:

(i) Changing the structure of the loan agreements with terms to lengthen the repayment period to a maximum of twenty years, lowering the interest rate, or a combination of a lower interest rate and an extended term; and, if this is not sufficient.

(ii) Offering partial centennial grant funding as allowable under the provisions of chapter 173-95A WAC.

(d) If an applicant is requesting financial hardship assistance, it should submit a completed financial hardship analysis form with its application for financial assistance.

AMENDATORY SECTION (Amending Order 98-10, filed 11/24/98, effective 12/25/98)

WAC 173-98-040 Where can I obtain more detail about the application, review, and issuance processes for funds from the state water pollution control revolving fund? ((The department publishes guidelines which describe in greater detail the financial assistance application, review and issuance processes, the terms of assistance, and other elements of this program)). (1) Applicants must apply for financial assistance in order to be considered for funding and for their projects to be included on the intended use plan. Projects must be on a current or past intended use plan in order to receive SRF loans.

(a) A schedule of the annual funding cycle will be published no later than the last business day of November each year, for the funding corresponding to the next state fiscal year.

(b) The period during which applications are accepted each year will last a minimum of sixty days, and application forms and guidelines for that year will be made available at the beginning of that period.

(c) In the first thirty days of the period during which applications are accepted each year, the department will conduct at least one application workshop in each of the department's four regions.

(d) When there is limited demand for funds from the current funding cycle, projects from any past intended use plan, starting with the most recent, may be funded in priority order, where:

(i) Cost overruns to a funded project are shown to be justifiable; or

(ii) Final cost reconciliation shows that higher costs are reasonable; or

(iii) The applicant received partial funding for the project and the change is shown on a current intended use plan.

(2) The application for funding will consist of two parts. Part one of the application will request information for identification, description, and other information about the project for tracking purposes, and part two of the application will request information about the water quality problem or problems being addressed by the project and the proposed solutions to the problems. In the application, applicants will be asked to fully describe the environmental and financial need for the project. Applications for SRF financial assistance for facilities projects must address problems such as public health emergencies, severe public health hazards, the need to provide secondary or advanced treatment, the need to improve and protect water quality, reduction of combined sewer overflows, and other environmental needs. Applications for SRF financial assistance for nonpoint projects must implement the remedies and prevention of water quality degradation associated with nonpoint source water pollution and must not be inconsistent with needs identified in the department's approved nonpoint source pollution management plan.

(3) The application form, part two, will include five main question areas, each with subsidiary questions designed to elicit the information needed to evaluate the project. The maximum points awarded for these question areas equal ninety percent of the total possible score with a maximum of ten percent coming from the local prioritization. The five main question areas and their associated maximum point percentages are:

(a) "What is the overall water quality problem and how will the problem be solved or addressed by the project?" This question is intended for general background purposes and to give evaluators an overview of the proposed project; no points are assigned.

(b) "What are the specific public health and water quality impairments caused by the problem and what are the pollution prevention aspects?" This question area is worth a maximum of thirty-four percent of the total score.

(c) "How will your proposed project address the water quality problem, and what are your measures of success?" This question area is worth a maximum of thirty-four percent of the total score.

(d) "What are some of the local initiatives you have taken that will help make your project a success?" This question area is worth a maximum of twelve percent of the total score.

(e) "Are there any state of Washington or federal mandates that this proposed project addresses?" This question area is worth a maximum of ten percent of the total score.

(f) "Local prioritization process." This question area is worth a maximum of ten percent of the total score. The local

prioritization process is described in detail in WAC 173-95A-050.

(4) The department will evaluate the proposed projects based on the information contained in the applications.

(a) Projects will be ranked according to potential water quality benefit and protection of public health.

(b) Projects which have the highest environmental and public health need will be given priority for financial assistance under the SRF program.

(c) Because funds must be used in a timely manner, readiness to proceed is also used in establishing the priority of projects.

(d) Other factors, including funding provisions in chapter 90.50A RCW and provisos identified in the department's biennial capital budget, relationship to the department's published plans such as the *Water Quality Management Plan to Control Nonpoint Sources of Pollution* and total maximum daily load studies, and relationship to published plans created by other federal and state agencies will be included in the priority evaluation.

(e) The department will request other agencies to provide evaluation assistance as needed, including but not limited to, the Washington state conservation commission, the Puget Sound action team, and the Washington state department of health.

(f) The department will coordinate maximum funding amounts and other issues with other state and federal funding agencies when possible.

(5) The total score that each proposed project receives based on the application form, part two, will be added to the local prioritization score (see WAC 173-95A-050 for more information on the local priority-setting process) to develop the final score for the proposed project.

(6) The department will prepare a draft intended use plan each year after evaluating all applications. The draft intended use plan will list projects in rank order starting with the project receiving the most points in its final score. This will also generally be the order that projects may be offered financial assistance. After issuing the draft intended use plan the department will allow a minimum of thirty days for public review and comment on the draft intended use plan. No later than fifteen days before the end of the public review and comment period the department will conduct at least one workshop to explain the draft intended use plan, answer questions about the draft intended use plan and the evaluation process, and provide details on the public comment process.

(7) The final intended use plan will be issued no later than sixty days after the end of the public review and comment period. The final intended use plan will reflect any changes made as a result of public comments or other information received during the public review and comment period, and will include a responsiveness summary. The final intended use plan will generally list projects in the order that projects may be offered financial assistance.

AMENDATORY SECTION (Amending Order 98-10, filed 11/24/98, effective 12/25/98)

WAC 173-98-050 What are the limitations on the use of funds and how are the funds categorized? (1) The fund may be used to provide financial assistance to applicants for the construction of water pollution control facilities which are identified in the intended use plan and activities eligible for assistance under sections 319 and 320 of the act.

(2) Unless the demand for funding is limited SRF loan agreements are subject to the following funding category limitations:

(a) Water pollution control facilities category: Not more than eighty percent of the fund will be available for the construction of facilities as established under section 212 of the act and subject to the requirements of that act. Those projects will be under the water pollution control facilities category.

(b) Nonpoint source and comprehensive estuary conservation and management category: Not more than ~~(ten)~~ twenty percent of the fund will be available for the implementation of ~~((a))~~ programs or projects established under the department's approved nonpoint source pollution management plan established under section 319 of the act, and intended for the management of nonpoint sources of pollution, and subject to the requirements of that act, or for programs or projects established under a comprehensive conservation and management plan under section 320 of the act relating to the National Estuary Program, and subject to the requirements of that act. Those projects will be under the nonpoint source and comprehensive estuary conservation and management category.

~~(c) ((Not more than ten percent of the fund will be available for the development and implementation of a comprehensive conservation and management plan under section 320 of the act relating to the National Estuary Program, and subject to the requirements of that act. Those projects will be under the comprehensive estuary conservation and management category (estuary category)).~~

~~((d))~~ Not more than fifty percent of the fund in each category will be available to any one applicant.

(3) In accordance with federal law, loan offers identified on the final ~~((HUP))~~ intended use plan will be effective for up to one year from the date of the offer ~~((or until the issuance of the next year's final HUP))~~. All SRF loan offers that do not result in a signed SRF loan agreement within the effective offer period are automatically terminated. Funds reserved for SRF loan agreements that are not signed within the effective period may be carried over and made available for the next year's funding cycle.

(4) The fund may not be used for activities primarily directed toward water resources or water pollution control activities or facilities or portions of those facilities that are primarily intended to control, transport, treat, dispose, or otherwise manage commercial, institutional, or industrial wastewater or other water pollution control needs from those sites. Costs associated with commercial, institutional, or industrial pretreatment are not eligible for funding. However, commercial, institutional, or industrial wastewater flows attributable to a public body's water pollution control facilities which are determined by the department to be "small" may be allowed.

~~((Small flows are commercial, institutional, or industrial flows that comprise less than five percent individually or thirty percent collectively of the total flow)). Flows from individual commercial, industrial, or institutional sources are considered small when they are less than five percent of the total existing needs, as identified by the department's engineers. Collectively, flows from all individual commercial, industrial, or institutional sources are considered small when they are less than thirty percent of the total existing needs, as identified by the department's engineers.~~

(5) The fund may not be used to make direct loans to applicants to support the nonfederal share of eligible portions of projects receiving assistance under Title II of the act. The fund may be used to finance portions of such projects which were determined to be ineligible for federal assistance but which are eligible under the SRF program.

(6) Noneligible project costs include, but are not limited to, the following:

(a) Acts of nature: Projects related to acts of nature that alter the natural environment, thereby causing water quality problems;

(b) Aquatic plant control for aesthetic reasons, navigational improvements, or other purposes unrelated to water quality;

(c) Concentrated animal feeding operations except those located in the federally designated Puget Sound and lower Columbia River estuaries;

(d) Engineering reports;

~~((d))~~ (e) Facilities that propose to meet or maintain primary treatment of domestic sewage;

~~((e))~~ (f) Flood control: Projects primarily designed to provide flood control;

~~((f))~~ (g) Water pollution control activities or facilities or portions of those facilities that are primarily intended to control, transport, treat, dispose, or otherwise manage commercial, institutional or industrial wastewater or other water pollution control needs from those sites;

(h) Lake implementation projects where there is no public access;

~~((g))~~ (i) Permit fees;

(j) Costs associated with commercial, institutional or industrial pretreatment;

(k) Professional dues;

(l) Reclamation of abandoned mines ((or if used in the mining process));

~~((h))~~ State and federal agency water pollution control programs that are part of the agency's mission, goals, or statutory responsibilities;

~~((i))~~ (m) Projects proposed by Washington state agencies or federal agencies will not be funded; except that activities projects undertaken by state institutions of higher education are eligible to apply for funding when the activities are not part of the school's statutory responsibilities.

(n) Scientific research unrelated to a specific project;

~~((j))~~ (o) Sewers: Side sewer laterals or individual pump stations on private residential property, or other appurtenances where the facilities are not owned and maintained by a public body;

~~((k))~~ (p) Solid and hazardous waste facilities;

~~((h))~~ (q) Storm water activities and facilities associated exclusively with flood control;

(r) Projects or project elements solely addressing water quantity or other water resource issues.

(7) Noneligible project component costs include, but are not limited to, the following:

(a) Bond costs for debt issuance;

(b) Employee training not related to or identified in an SRF loan agreement;

(c) Equipment required for site and building maintenance;

(d) Facilities components:

(i) Abandonment of existing structures;

(ii) Bonus or acceleration payments to contractors to meet contractual completion dates for construction;

(iii) Capacity in excess of twenty years;

(iv) Construction claims and associated costs determined to be nonmeritorious;

(v) Construction claims, meritorious, in excess of the maximum allowable loan amount;

(vi) Corrective action plans for the one-year performance certification program;

(vii) Cost-plus-a-percentage-of-cost contracts (also known as multiplier contracts);

(viii) Demolition of structures that are not interfering with proposed construction~~((;~~

~~((;)))~~, replacement parts, other than those for an initial set of spare parts for equipment that is critical for facilities to operate in compliance with discharge permit requirements;

(e) Fines and penalties due to violations of or failures to comply with federal, state, or local laws;

(f) Interest on bonds, interim financing, and associated costs to finance projects;

(g) Lake implementation projects where there is no public access;

(h) Land acquisition for siting of wastewater treatment plants, sewer rights of way, and easements, and associated costs;

(i) Landscaping for aesthetic reasons;

(j) Legal expenses other than those associated with development of local ordinances for water quality protection and improvement or associated with the use of a bond counsel in developing a loan agreement;

(k) Lobbying or expenses associated with lobbying;

(l) Monitoring equipment used by an industry for sampling and analyzing industrial discharges to municipal water pollution control facilities;

(m) Office equipment;

(n) Operating expenses of local government, such as the salaries and expenses of a mayor, city council member, and/or city attorney;

(o) Overtime differential paid to employees of local government to complete administrative or force account work;

(p) Personal injury compensation or damages arising out of the project, whether determined by adjudication, arbitration, negotiation, or other means;

(q) Preparation of ~~((SRF))~~ loan or grant applications;

(r) Previously funded objectives financed with an SRF loan;

(s) Rework costs;

- (t) Routine or ongoing operation and maintenance costs;
- (u) Seminar and conference fees not identified in an SRF loan agreement;
- (v) Vehicle purchase or lease except those vehicles that are integral to a treatment process e.g., sludge truck.

AMENDATORY SECTION (Amending Order 98-10, filed 11/24/98, effective 12/25/98)

WAC 173-98-060 What is the step process for planning facilities and activities projects? (1) The step process: The "step process" is a systematic method or proceeding with projects. The step process begins with site-specific planning, and continues through design to construction or implementation. It is required for facilities construction projects and, in a modified form, is required for some kinds of activities projects.

(2) The step process for facilities. To be eligible for an SRF loan, facilities projects must proceed according to ~~((a systematic method known as))~~ the "step process."

~~((a))~~ (a) Before a public body with a facilities project is eligible to apply for funds, all previous steps must be approved ~~((or approvable))~~ by the department in order to help ensure that funds are well spent on projects proceeding towards a successful ~~((and viable))~~ outcome. Funding for site-specific facilities planning (step ~~((1))~~ one) or design (step ~~((2))~~ two) does not guarantee the awarding of future loans for construction (step ~~((3))~~ three). The loan agreement will not be signed until all previous steps have been completed and approved by the department.

~~((a))~~ (b) Planning (step ~~((1))~~ one). Step ~~((1))~~ one involves the preparation of a site-specific facilities plan that identifies and prioritizes the cost-effective alternatives for addressing a water pollution control problem with or without state and federal funding. There is no prerequisite for planning. If there is an existing engineering report, prepared with or without department funding, it must be upgraded for SRF eligibility if it does not meet the definition of a facilities plan.

~~((b))~~ (c) Design (step ~~((2))~~ two). Step ~~((2))~~ two includes the preparation of plans and specifications for use in construction. These must be based on the preferred cost-effective alternative identified in the facilities plan.

(i) Facilities plans must be approved ~~((or deemed approvable))~~ by the department before an application for design can be considered for funding. Site-specific facilities planning documents not funded by a department grant or loan must also be approved ~~((or approvable))~~ by the department before an application for design can be considered.

~~((ii))~~ (ii) ~~((Applications for Step 2 loans will be accepted and considered for funding if it can be documented by the applicant that Step 1 planning is approved within ninety days after the close of the application period.~~

~~((iii))~~ (iii) Due to specific loan review criteria, a facilities plan approved by the department for purposes other than securing a loan will not be accepted for design purposes.

~~((iv-A))~~ (iii) Facilities plans approved by the department more than two years prior to the close of the SRF application period must contain evidence of recent department review to ensure the document reflects current conditions.

~~((e))~~ (d) Construction (step ~~((3))~~ three). Step ~~((3))~~ three includes the actual building of facilities based on the approved design.

~~((i))~~ Design must be approved ~~((or deemed approvable))~~ by the department before an application for construction can be considered for funding.

~~((ii))~~ ~~((Applications for Step 3 loans will be accepted and considered for funding if it can be documented by the applicant that Step 2 design is approved within ninety days after the close of the application period.~~

~~((d))~~ (e) Design and construction (step ~~((4))~~ four). In some cases, design and construction may be combined into one loan award. Applications for step ~~((4))~~ four loans will be accepted and considered for funding if it can be demonstrated that step ~~((2))~~ two design can be completed and approved by the department within one year of the date the final ~~((HUP))~~ intended use plan is made public. The SRF loan share of the total eligible project under step ~~((4))~~ four cannot exceed fifty percent of the amount available in the appropriate funding category, or one million dollars, whichever is less.

~~((e))~~ (f) Step compliance and step deviations. There is one situation in which a deviation from the step process can be allowed:

(i) If the Washington state department of health has declared a public health emergency and if the proposed project would remedy this situation.

(ii) In this situation, the department will accept applications for funding consideration that do not follow the step process. However, no loan agreement will be signed until all previous steps have been completed and approved by the department. This deviation from the step process will only allow an application to be considered for funding. It does not allow a loan to be awarded until all step requirements have been satisfied.

(iii) If a deviation is approved, the applicant may deviate by only one step. For instance, the department could accept an application for design if planning was not completed and approved, or an application for construction if design was not completed and approved. However, the department may not accept an application for construction if planning was not completed and approved.

~~((2))~~ (3) Prerequisite documents for facilities projects: Draft documents must be sent to the department's engineers at least sixty days prior to end of application cycle for approval by end of application cycle.

(4) The step process for activities. In most cases, the step process for activities is not required. However, those applications proposing to implement a specific project identified in a completed comprehensive plan are given additional consideration in the evaluation process. Agricultural best management practices that involve improvements on private property, or lake projects, must follow the step process..

(a) Planning (step ~~((1))~~ one) involves the identification of problems and evaluation of cost-effective alternatives, based on environmental and economic considerations, for correcting and preventing water quality problems. Specific activities may include planning for watershed management, ground water management areas, lake restoration, and water quality assessment and other related activities.

(b) Implementation (step ((2)) two) includes the actual implementation of the project based on the approved planning document.

NEW SECTION

WAC 173-98-075 How does the Growth Management Act impact the use of funds? (1) A local government not in compliance with the Growth Management Act may not receive loans or grants from the department, except that, in limited circumstances, a local government that is not in compliance with the Growth Management Act may receive loans or grants from the department where necessary to address a public health need or substantial environmental degradation.

(2) For the purposes of this chapter, "compliance with the Growth Management Act" means that:

(a) A county, city, or town that is required to or chooses to plan under RCW 36.70A.040 has adopted a comprehensive plan and development regulations in conformance with the requirements of chapter 36.70A RCW, after it is required that the comprehensive plan and development regulations be adopted; and

(b) The county, city, or town has not been found out of compliance by a growth management hearings board; or

(c) A growth management hearings board has found a county, city, or town in compliance with the requirements of chapter 36.70A RCW, after previously finding the county, city, or town was not in compliance.

(3) For the purposes of this chapter, a public health need related to a loan or grant must be documented by a letter signed by the secretary of the Washington state department of health or his or her designee and addressed to the public official who signed the loan or grant application. "Public health need" means a situation where:

(a) There is a documented potential for:

(i) Contaminating a source of drinking water; or

(ii) Failure of existing wastewater system or systems resulting in contamination being present on the surface of the ground in such quantities and locations as to create a potential for public contact; or

(iii) Contamination of a commercial or recreational shellfish bed as to create a critical public health risk associated with consumption of the shellfish; or

(iv) Contamination of surface water so as to create a critical public health risk associated with recreational use; and

(b) The problem generally involves a serviceable area including, but not limited to, a subdivision, town, city, or county, or an area serviced by on-site sewage disposal systems; and

(c) The problem cannot be corrected through more efficient operation and maintenance of an existing wastewater disposal system or systems.

(4) For the purposes of this chapter, a substantial environmental degradation related to a loan or grant must be documented by a letter signed by the director of the department or his or her designee and addressed to the public official who signed the loan or grant application.

"Substantial environmental degradation" means that:

(a) There is a situation causing real, documented, critical environmental contamination that:

(i) Contributes to violations of the state's water quality standards; or

(ii) Interferes with beneficial uses of the waters of the state; and

(b) The problem generally involves a serviceable area including, but not limited to, a subdivision, town, city, or county, or an area serviced by on-site sewage disposal systems; and

(c) The problem cannot be corrected through more efficient operation and maintenance of an existing wastewater disposal system or systems.

(5) A county, city, or town that has been offered a loan or grant for a water pollution control facilities project may not receive loan or grant funds while the county, city, or town is not in compliance with the Growth Management Act unless:

(a) Documentation showing that a public health need has been provided by the Washington state department of health; or documentation showing that a substantial environmental degradation exists has been provided by the department of ecology; and

(b) The county, city, or town has provided documentation to the department that actions or measures are being implemented to address the public health need or substantial environmental degradation; and

(c) The department has determined that the project is designed to address only the public health need or substantial environmental degradation described in the documentation, and does not address unrelated needs including, but not limited to, provisions for additional growth.

AMENDATORY SECTION (Amending Order 98-10, filed 11/24/98, effective 12/25/98)

WAC 173-98-090 How ((do I make sure my project is included in the intended use plan)) are loans managed?

(1) ((Applicants must apply for SRF financial assistance in order for their projects to be included on the IUP. Projects must be on the IUP in order to receive SRF financial assistance.

(2) Projects in all three categories will be ranked according to environmental and financial need. Projects in each category which have the highest environmental and financial need will be given priority for assistance under the SRF program. Because funds must be used in a timely manner to ensure that all available federal funding is received by the state, readiness to proceed is also used in establishing the priority of projects.

(3) Applications for financial assistance in the water pollution control facilities category (WAC 173-98-050 (2)(a)) must address problems such as public health emergencies, severe public health hazards, the need to provide secondary or advanced treatment, the need to improve and protect water quality, reduction of combined sewer overflows, and other environmental needs.

(4) Applications for financial assistance in the nonpoint source category (WAC 173-98-050 (2)(b)) must address the remedies and prevention of water quality degradation associated with nonpoint source water pollution and must not be inconsistent with needs identified in the department's nonpoint source pollution assessment and management program.

~~(5) Applications for financial assistance in the comprehensive estuary conservation and management category (estuary category) (WAC 173-98-050 (2)(c)) must meet applicable environmental needs outlined above and must meet needs identified in the Puget Sound water quality management plan or the respective plans for other federally designated estuaries in the state of Washington.~~

~~(6) Financial need would normally focus on the need to maintain user charges and fees at affordable levels. Both the priority process and the terms of the SRF loan will be directed toward this objective. Unless the provisions of water pollution control facilities or activities has caused a financial hardship, refinancing of completed projects or segments would generally be low priority.~~

~~(7) Applicants must fully describe the environmental and the financial need for the project.~~

~~(8) The department will prepare the draft IUP prior to the award of each federal capitalization grant from EPA or in the absence of a federal capitalization grant before principal and interest repayments to the SRF are offered. The IUP will generally list projects in the order that projects may be offered financial assistance.) Timely use of funds: Projects funded with loans must be spent in a timely fashion so that funds are put to work for the water quality of the state as soon as possible. To accomplish this, certain time restrictions are placed on the use of funds as follows:~~

~~(a) Work on a project must be started within sixteen months of the publication date of the final intended use plan on which the project was proposed.~~

~~(i) Any expenditure of funds which is eligible for reimbursement under the terms of the loan agreement constitutes starting the project.~~

~~(ii) No more than one time extension of no more than twelve months may be made when there are valid reasons for the extension and when the extension is included in the signed funding agreement with the department.~~

~~(iii) Valid reasons for a time extension allowing a start date more than sixteen months after the publication date of the final intended use plan are limited to:~~

~~(A) Schedules included in water quality permits, consent decrees, or enforcement orders; or~~

~~(B) The recipient and the department agree that there is a need to do work during an environmental window in a specific season of the year.~~

~~(iv) If the funding recipient has one of these valid reasons to wait longer than sixteen months to start the project, the reasons why it will take longer and the schedule the recipient will follow must both be stated clearly in a signed loan agreement.~~

~~(b) Work on a project must be completed within five years of the publication date of the final intended use plan on which the project was proposed or within a shorter time period if the shorter period is identified in the funding agreement for the project. When all work identified in the funding agreement scope of work is finished, the project is deemed to be completed. After the five-year time limit is reached, no further expenditures may be reimbursed unless an extension is made.~~

(i) No more than one time extension of no more than twelve months may be made when there are valid reasons for the extension; and

(A) The extension is requested no less than three months before the funding agreement is due to expire; and

(B) The department's water quality program manager agrees that the extension is for a valid reason.

(ii) Valid reasons for a time extension are limited to:

(A) Schedules included in water quality permits, consent decrees, or enforcement orders; or

(B) The recipient and the department agree that there is a need to do work during an environmental window in a specific season of the year.

(iii) If the funding recipient has one of these valid reasons to be allowed a time extension, the reasons why it will take longer and the schedule the recipient will follow must both be stated clearly in a signed amendment to the existing loan agreement.

(2) Prior authorization to incur costs. In cases where a project has been identified on a final intended use plan, the applicant may make a written request to the water quality program manager, asking to begin incurring costs related to a loan for which there is not yet a signed loan agreement. If the department concurs with this request, the water quality program manager will send the applicant a letter authorizing the costs. The applicant incurs the costs at their own risk. When an agreement is signed, previously incurred costs that are not eligible under the terms of the agreement are the sole responsibility of the applicant.

(3) The administration of all loans will be subject to all terms and conditions in a funding agreement signed by the department and by the recipient.

(4) Ongoing management of most aspects of loan projects is subject to the most recent edition of *Administrative Requirements for Ecology Grants and Loans*, copies of which will be provided to all recipients.

AMENDATORY SECTION (Amending Order 98-10, filed 11/24/98, effective 12/25/98)

WAC 173-98-110 What are the repayment options and schedules? (1) General provisions.

When the scope of work identified in the SRF loan agreement has been fully completed and/or the initiation of operation date has been determined:

(a) The department and recipient will execute a final SRF loan agreement amendment which details the final loan amount. This amount will include the principal from disbursements made to recipients and accrued interest. Interest will accrue on each disbursement as it is paid to the recipient.

(b) The department will prepare according to the SRF loan agreement, a repayment schedule which fully amortize the final loan amount within twenty years of project completion. The first repayment of principal and interest will be due no later than one year after the initiation of operation date or at project completion date, whichever occurs first. Equal payments will be due every six months after this first payment. Loan balances may be repaid or additional principal payments may be made at any time without penalty.

(c) If any amount of the final loan amount or any other amounts owed to the department remains unpaid after it becomes due and payable, the department may assess a late charge. The late charge shall be additional interest at the rate of one percent per month, or fraction thereof, starting on the date the debt becomes past due and until it is paid in full.

(d) If the due date for any semiannual payment falls on a Saturday, Sunday, or designated holiday for Washington state agencies, the payment shall be due on the next business day for Washington state agencies.

(2) Phased or segmented project. Where a project has been phased or segmented, the general provisions for repayment shall apply to the completion of individual phases or segments.

(3) More than five years to complete project. When a project approved by the department takes longer than five years to complete, loan repayment must begin within five years of the first disbursement for the project, unless the director determines that the fund is fiscally sound without this repayment schedule. Repayments for these loans must follow the general provisions as outlined in subsection (1)(b) of this section.

(4) Security for loan repayment. Loans shall be secured by a general obligation pledge or a revenue pledge of the recipient. The obligation of the recipient to make loan repayments from the sources identified in its SRF loan agreement shall be absolute and unconditional, and shall not be subject to diminution by setoff, counterclaim, or abatement of any kind.

(a) General obligation. When repayment of a loan is secured by a general obligation pledge, the recipient shall pledge for so long as the loan is outstanding, to include in its budget and levy taxes annually within the constitutional and statutory tax limitations provided by law without a vote of its electors, on all of the taxable property within its boundaries in an amount sufficient, together with other money legally available and to be used for loan repayment, to pay when due the principal of and interest on the loan, and the full faith, credit, and resources of the recipient shall be pledged irrevocably for the annual levy and collection of those taxes and the prompt payment of the principal of and interest on the loan.

(b) Revenue obligation. Repayment of a loan may be secured by an irrevocable pledge of the net revenues of the recipient's utility and, in appropriate cases, utility local improvement district assessments. In such cases:

(i) Lien position. Repayment of a loan shall constitute a lien and charge (A) upon the net revenues of the recipient's utility prior and superior to any other charges whatsoever, except that the lien and charge shall be junior and subordinate to the lien and charge of any senior lien obligations and, (B) if applicable, upon utility local improvement district assessments prior and superior to any other charges whatsoever.

(ii) ~~Coverage requirement. For so long as the loan is outstanding, the recipient shall establish, maintain, and collect such rates and charges for utility service which will produce net revenue which, together with utility local improvement district assessments in the utility local improvement district deposited in the loan fund, shall be at least equal to the coverage requirement. "Coverage requirement" means annual net revenue which, after the payment of senior lien~~

~~obligations and together with utility local improvement district assessments (if applicable), is at least equal to one hundred twenty percent of annual debt service on the loan and any other obligations on a parity therewith.~~

~~(iii))~~ Reserve requirement. For loans that are revenue-secured debt with terms greater than five years, the recipient must accumulate a reserve for the loan equivalent to at least the average annual debt service on the loan during the first five years of the repayment period of the loan. This amount shall be deposited in a reserve account in the loan fund in approximately equal annual payments commencing within one year after the initiation of operation or the project completion date, whichever comes first. "Reserve account" means, for a loan that constitutes revenue-secured debt, an account of that name created in the loan fund to secure the payment of the principal of and interest on the loan. The amount on deposit in the reserve account may be applied by the recipient (A) to make, in part or in full, the final repayment to the department of the loan amount or, (B) if not so applied, for any other lawful purpose of the recipient once the loan amount, plus interest and any other amounts owing to the department hereunder, have been paid in full.

(5) Repayment from other than pledged sources. A recipient may repay any portion of its loan from any legally available funds other than those pledged in its SRF loan agreement to ~~((repayment))~~ repay the loan.

(6) No defeasance or advance refunding. So long as the department holds a loan, the recipient shall not be entitled to, and shall not effect, its economic defeasance or advance refunding.

AMENDATORY SECTION (Amending Order 98-10, filed 11/24/98, effective 12/25/98)

WAC 173-98-120 General provisions. (1) Sale of facilities to private enterprises. Recipients may sell facilities for which the SRF loan was provided to private enterprises; however, the SRF loan agreement must be terminated in accordance with the terms of the agreement and the assistance repaid to the SRF immediately upon sale.

(2) Refinancing. The refinancing of existing debt obligations shall be limited to water pollution control facilities where project construction began after March 7, 1985. Applicants requesting refinancing must meet all the requirements contained in the act. They must be on the ~~((HUP))~~ intended use plan before assistance will be offered and must be eligible to receive such assistance. There are two kinds of refinance with different regulations:

(a) Interim refinance: Interim refinance refers to a project which is still in progress and for which the applicant went forward on their own accord and using funding from a source other than the department. For projects in this category, applicants for funding should apply in the same manner as any other project, making certain to clearly state that the project is underway and that they have secured all prerequisite documents.

(b) Standard refinance: Standard refinance refers to a project which has been completed using funding from a source other than the department.

(i) Standard refinance projects will only be funded if there is limited demand for funds for new projects.

(ii) The department will not refinance debt from funding programs administered by the department.

(iii) All project prerequisites must have been met at the time the project was undertaken.

(iv) All standard refinance projects applying for funding in a fiscal year will be ranked by financial capability using the same criteria used for evaluating hardship, and giving the highest ranking to the applicants with the greatest financial need.

(v) For standard refinance projects, applicants for funding may use a shorter, simpler application form. This form will ask basic questions about the project and about the applicant's financial capability to pay for the project with and without the refinance.

(vi) Successful applicants for standard refinance projects must make their first repayment six months after they sign a funding agreement.

(3) Self certification. The department may authorize a recipient to certify compliance with selected program requirements. The recipient must request such certification authority and document that it has the capability and resources, that it is in the best interest of the state, and that the request is consistent with state and federal laws and regulations. Concurrences required in the environmental review process cannot be delegated to recipients.

(4) For all projects, the recipient must acknowledge state and federal financial assistance in all reports, technical documents, publications, brochures, and other materials produced using funding from the loan or grant. All site-specific projects must have a sign of sufficient size to be seen from nearby roadways, acknowledging state and federal financial assistance, and left in place throughout the life of the project. Department and environmental protection agency logos must be on all signs and documents and will be provided as needed.

WSR 01-01-044
PERMANENT RULES
DEPARTMENT OF
FINANCIAL INSTITUTIONS

[Filed December 8, 2000, 4:43 p.m.]

Date of Adoption: November 10, 2000.

Purpose: To amend the WAC to reflect changes made to the statute in 1997 and add additional clarifying language regarding redisclosure of mortgage broker fees, deposits of checks into trust accounts and continuing education provided by Washington Association of Mortgage Brokers.

Citation of Existing Rules Affected by this Order: Amending WAC 208-660-010, 208-660-020, 208-660-025, 208-660-030, 208-660-040, 208-660-042, 208-660-045, 208-660-070, 208-660-080, 208-660-08015, 208-660-08025, 208-660-08030, 208-660-08040, 208-660-130, 208-660-140, 208-660-145, and 208-660-160.

Statutory Authority for Adoption: RCW 43.320.010, 19.146.223.

Adopted under notice filed as WSR 00-17-172 on August 23, 2000.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 1; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 3, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 0, Amended 5, Repealed 1.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 0, Amended 0, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 4, Repealed 0.

Effective Date of Rule: Thirty-one days after filing.

November 16, 2000

John L. Bley

Director

AMENDATORY SECTION (Amending WSR 96-04-028, filed 2/1/96, effective 4/1/96)

WAC 208-660-010 Definitions. As used in this chapter, the following definitions apply, unless the context otherwise requires:

(1) "Advertising material" means any form of sales or promotional materials to be used in connection with the mortgage broker business.

(2) "Affiliate" means any person who controls, is controlled by, or is under common control with, another person.

(3) "Application deposit" means a deposit in immediately available funds consisting of three hundred fifty dollars for each license applied for and one hundred seventy-five dollars for each branch office certificate applied for. For example, an applicant requesting a license and two branch office certificates must submit an application deposit of seven hundred dollars (calculated by adding three hundred fifty dollars to the product of two times one hundred seventy-five dollars).

(4) "Approved examination" means a written examination approved by the director.

(5) "Approved licensing or continuing education course" means a licensing or continuing education course approved by the director.

(6) "Borrower" means any person who consults with or retains a mortgage broker or loan originator in an effort to obtain or seek advice or information on obtaining or applying to obtain a residential mortgage loan for himself, herself, or persons including himself or herself, regardless of whether the person actually obtains such a loan.

(7) "Branch office" means a fixed physical location such as an office, separate from the principal place of business of the licensee, where the licensee holds itself out as a mortgage broker.

(8) "Branch office certificate" means a branch office license issued by the director to engage in the mortgage broker business as the branch office indicated in the certificate, pursuant to RCW 19.146.265.

(9) "Certificate of passing an approved examination" means a certificate signed by the examination administrator verifying that the individual performed with a satisfactory score or higher on an approved licensing examination.

(10) "Certificate of satisfactory completion of an approved continuing education course" means a certificate signed by the course provider verifying that the individual has attended an approved continuing education course.

(11) "Certificate of satisfactory completion of an approved licensing course" means a certificate signed by the course provider verifying that the individual has attended at least forty hours of class of an approved licensing course.

(12) "Consumer Protection Act" means chapter 19.86 RCW.

(13) A person "controls" an entity if the person, directly or indirectly through one or more intermediaries, alone or in concert with others, owns, controls, or holds the power to vote twenty-five percent or more of the outstanding stock or voting power of the controlled entity.

(14) A person is "convicted" of a crime, irrespective of the pronouncement or suspension of sentence, if the person:

- Is convicted of the crime in any jurisdiction;
- Is convicted of a crime which, if committed within this state would constitute such a crime under the laws of this state;
- Has plead guilty or no contest or nolo contendere or stipulated to facts that are sufficient to justify a finding of guilt to such a charge before a court or federal magistrate; or
- Has been found guilty of such a crime by the decision or judgment of a court or federal magistrate or by the verdict of a jury.

(15) "Department" means the department of financial institutions.

(16) "Designated broker" means a natural person designated by the applicant for a license or licensee who meets the experience, education, and examination requirements set forth in RCW 19.146.210(e).

(17) "Director" means the director of financial institutions.

(18) "Employee" means any natural person who:

- Has an employment relationship, acknowledged by both the employee and the mortgage broker; and
- Is treated as an employee by the mortgage broker for purposes of compliance with federal income tax laws.

(19) "Financial institution" means a federally insured bank, savings bank, savings and loan association, or credit union, whether state or federally chartered, authorized to conduct business in this state.

(20) "Financial misconduct" means without limitation:

- Any conduct prohibited by the Mortgage Broker Practices Act;
- Any similar conduct prohibited by statutes governing mortgage brokers in other states; and
- Any similar conduct prohibited by statutes governing other segments of the financial services industry, including but not limited to the Consumer Protection Act, statutes gov-

erning the conduct of securities broker dealers, financial advisers, escrow officers, title insurance companies, limited practice officers, trust companies, and other licensed or chartered financial service providers.

(21) A person "holds oneself out" by advertising or otherwise informing the public that the person engages in any of the activities indicated, including without limit through the use of business cards, stationery, brochures, rate lists or other promotional items.

(22) "Independent contractor" or "person who independently contracts" means any person that:

- Expressly or impliedly contracts to perform mortgage broker activities for a licensee;
- With respect to its manner or means of performing the activities, is not subject to the licensee's right of control; and
- Is not treated as an employee by the licensee for purposes of compliance with federal income tax laws.

(23) "Investigation" means an examination undertaken for the purpose of detection of violations of this chapter or securing information lawfully required under this chapter.

(24) "License" means a license issued by the director to engage in the mortgage broker business.

~~((24))~~ (25) "Licensee" or "licensed mortgage broker" means:

- A mortgage broker licensed by the director; and
- Any person required to be licensed pursuant to RCW 19.146.200 and 19.146.020.

~~((25))~~ (26) "Loan originator" means a natural person:

- Who is a mortgage broker employee who performs any mortgage broker activities; or
- Who is retained as an independent contractor by a mortgage broker, or represents a mortgage broker, in the performance of any mortgage broker activities.

~~((26))~~ (27) "Lock-in agreement" means an agreement with a borrower made by a mortgage broker or loan originator, in which the mortgage broker or loan originator agrees that, for a period of time, a specific interest rate or other financing terms will be the rate or terms upon which it will make a loan available to the borrower.

~~((27))~~ (28) "Material litigation" means any conviction in the prior seven years for a felony, or for a gross misdemeanor involving dishonesty or financial misconduct, and any litigation pending at any time during the prior seven years that would be relevant to the director's ruling on an application for a license, including but not limited to, the following types of litigation:

- Criminal actions involving felony charges.
- Criminal or civil actions involving dishonesty or financial misconduct.

~~((28))~~ (29) "Mortgage broker" means any person that for compensation or gain, or in the expectation of compensation or gain:

- Makes a residential mortgage loan or assists a person in obtaining a residential mortgage loan; or
- Holds himself or herself out as being able to do so.

~~((29))~~ (30) "Mortgage Broker Practices Act" means chapter 19.146 RCW and chapter ~~((50-60))~~ 208-660 WAC.

~~((30))~~ (31) "Out-of-state applicant or licensee" means an applicant for a license or licensee that does not maintain a physical office within this state.

~~((31))~~ (32) "Person" means a natural person, corporation, company, partnership, limited liability company, or association.

~~((32))~~ (33) "Prepaid escrowed costs of ownership," as used in RCW 19.146.030(5), means any amounts prepaid by the borrower for the payment of taxes, property insurance, interim interest, and similar items in regard to the security property.

~~((33))~~ (34) "Principal" means any person who controls, directly or indirectly through one or more intermediaries, alone or in concert with others, a ten percent or greater interest in a partnership, company, association or corporation, and the owner of a sole proprietorship.

~~((34))~~ (35) "RCW" means the *Revised Code of Washington*.

~~((35))~~ (36) "Real Estate Settlement Procedures Act" means the Real Estate Settlement Procedures Act, 12 U.S.C. Sections 2601 et seq., and Regulation X, 24 C.F.R. Sections 3500 et seq.

~~((36))~~ (37) "Registered agent" means a person or persons located within this state that is appointed to accept service of process for an out-of-state licensee.

~~((37))~~ (38) "Residential mortgage loan" means any loan primarily for personal, family, or household use secured by a mortgage or deed of trust on residential real estate upon which is constructed or intended to be constructed a single family dwelling or multiple family dwelling of four or less units.

~~((38))~~ (39) "Subsidiary" means a corporation, company, partnership, or association that is controlled by another.

~~((39))~~ (40) "Third-party provider" means any third party, other than a mortgage broker or lender, that provides goods or services to the mortgage broker in connection with the preparation of a borrower's loan and includes, but is not limited to, credit reporting agencies, title insurance companies, appraisers, structural and pest inspectors, or escrow companies. However, "third-party provider" does include a third-party lender, to the extent it provides lock-in arrangements to the mortgage broker in connection with the preparation of a borrower's loan.

~~((40))~~ (41) "Transfer" means a sale, transfer, assignment, or other disposition, whether by operation of law in a merger or otherwise.

~~((41))~~ (42) "Truth in Lending Act" means the Truth in Lending Act, 15 U.S.C. Sections 1601 et seq., and Regulation Z, 12 C.F.R. Sections 226 et seq.

AMENDATORY SECTION (Amending WSR 96-04-028, filed 2/1/96, effective 4/1/96)

WAC 208-660-020 Statutory exemptions. (1) The following persons are exempt from all provisions of the Mortgage Broker Practices Act:

(a) Any person doing business under the laws of ~~((this))~~ the state of Washington or the United States relating to commercial banks, bank holding companies, savings banks, trust companies, savings and loan associations, credit unions, consumer loan companies, insurance companies, or real estate investment trusts as defined in 26 U.S.C. Sec. 856 and the affiliates, subsidiaries, and service corporations thereof;

(b) An attorney licensed to practice law in this state who is not principally engaged in the business of negotiating residential mortgage loans when such attorney renders services in the course of his or her practice as an attorney;

(c) Any person doing any act under order of any court except for a person subject to an injunction to comply with any provision of this chapter or any order of the director issued under this chapter;

(d) Any person making or acquiring a residential mortgage loan solely with his or her own funds for his or her own investment without intending to resell the residential mortgage loans. For purposes of this section, intent to resell residential mortgage loans is determined by the person's ability and willingness to hold the residential mortgage loans, indicated by, but not limited to, such measures as whether the person has sold loans in the past, whether the loans conform to established secondary market standards for the sale of loans, and whether the person's financial condition would reasonably allow them to hold the residential mortgage loans.

(e) A real estate broker or salesperson licensed by the state who obtains financing for a real estate transaction involving a bona fide sale of real estate in the performance of his or her duties as a real estate broker and who receives only the customary real estate broker's or salesperson's commission in connection with the transaction;

~~((e))~~ (f) Any mortgage broker approved and subject to auditing by the Federal National Mortgage Association or the Federal Home Loan Mortgage Corporation.

(g) The United States of America, the state of Washington, any other state, and any Washington city, county, or other political subdivision, and any agency, division, or corporate instrumentality of any of the entities in this subsection (1)~~((e))~~ (g); and

~~((f))~~ (h) A real estate broker who:

(i) In connection with a ~~((CLO))~~ CLI system, provides only information regarding rates, terms, and lenders;

(ii) Receives a fee for providing such information;

(iii) Conforms to these rules with respect to the providing of such information; and

(iv) Discloses on a form approved by the director that to obtain a loan the borrower must deal directly with a mortgage broker or lender.

However, a real estate broker is not exempt from the Mortgage Broker Practices Act if he or she does any of the following:

(A) Holds himself or herself out as able to obtain a loan from a lender;

(B) Accepts a loan application, or submits a loan application to a lender;

(C) Accepts any deposits for payment to a third-party provider, or accepts any loan fees from a borrower, whether such fees are paid before, upon, or after the closing of the loan;

(D) Negotiates rates or terms with a lender on behalf of a borrower; or

(E) Provides the disclosures required by RCW 19.146.030(1).

(2)(a) The persons described in (b) and (c) of this subsection are exempt from the Mortgage Broker Practices Act except that they:

(i) Must comply with RCW 19.146.0201 through 19.146.090, Part D of chapter ~~((50-60)) 208-660~~ WAC, and WAC ~~((50-60-125, 50-60-130, 50-60-140, 50-60-165, 50-60-190, and 50-60-200)) 208-660-125, 208-660-130, 208-660-140, 208-660-165, 208-660-190, and 208-660-200;~~

(ii) Are subject to the director's authority to take enforcement action for any violation of applicable provisions of the Mortgage Broker Practices Act, pursuant to RCW 19.146.220, 19.146.221, and 19.146.227; and

(iii) Are subject to the director's authority to obtain and review books and records that are relevant to any investigation of such a violation pursuant to the first paragraph of RCW 19.146.235, and WAC ~~((50-60-060)) 208-660-060(4).~~

(b) Any person making or acquiring a residential mortgage loan solely with his or her own funds for his or her own investment without intending to resell the mortgage loan.

(c) Any mortgage broker approved and subject to auditing by the Federal National Mortgage Association, the Government National Mortgage Association, or the Federal Home Loan Mortgage Corporation.

AMENDATORY SECTION (Amending WSR 97-01-003, filed 12/5/96, effective 1/5/97)

WAC 208-660-025 Computer loan (~~(origination)) information services and systems.~~ (1) Definitions. "Computer loan (~~(origination-((CLO))) information (CLI) services~~" means the provision of information to consumers by a mortgage broker, lender, real estate agent or other person regarding interest rates and other loan terms available from different lenders.

"~~((CLO)) CLI system~~" means computer hardware or software which facilitates the provision of ~~((CLO)) CLI services~~ to consumers.

"~~((CLO)) CLI service provider~~" means a party who provides ~~((CLO)) CLI services~~ to consumers. The term does not include any person or entity exempted from chapter 19.146 RCW by RCW 19.146.020 (1)(a) through (g).

"~~((CLO)) CLI system provider~~" means a party who provides a ~~((CLO)) CLI system~~.

(2) ~~((CLO)) CLI service providers may be subject to licensing.~~ Unless otherwise exempt under RCW 19.146.020, any person providing ~~((CLO)) CLI services~~ is subject to licensing as a mortgage broker under chapter 19.146 RCW, if the person or broker:

(a) Holds himself or herself out as able to obtain a residential mortgage loan for a consumer from a lender;

(b) Accepts a loan application from a consumer, assists a consumer in completion of a loan application, or submits a loan application on behalf of a consumer to a mortgage broker or lender;

(c) Accepts deposits from a consumer for payment of third-party services or any fees in connection with a loan, whether the fees are paid before, upon, or after the closing of the loan;

(d) Negotiates the interest rates or terms of a loan with the mortgage broker or lender on behalf of a consumer; or

(e) Provides to the consumer a good faith estimate or other disclosure required of mortgage brokers or other lenders by state or federal law.

(3) **Providers of ~~((CLO)) CLI services must make disclosures.~~** If the consumer of the ~~((CLO)) CLI service~~ pays for the ~~((CLO)) CLI service~~ either directly or indirectly, the ~~((CLO)) CLI service provider~~ shall give a disclosure statement to the consumer. The disclosure statement shall state:

(a) The amount of the ~~((CLO)) CLI fee~~ which the ~~((CLO)) CLI service provider~~ charges the consumer for the ~~((CLO)) CLI service;~~

(b) That the use of the ~~((CLO)) CLI system~~ is not required to obtain a residential mortgage loan; and

(c) That the full range of loans available may not be listed on the ~~((CLO)) CLI system~~, and different terms and conditions, including lower rates, may be available from others not listed on the system.

(4) **Disclosure statement must be provided to consumer and retained by the ~~((CLO)) CLI service provider.~~** Each ~~((CLO)) CLI service provider~~ must give the consumer a copy of the disclosure form when the first ~~((CLO)) CLI service~~ is provided to the consumer. The consumer shall sign and date the disclosure statement as evidence that the consumer received the form. ~~((CLO)) CLI service providers~~ must retain copies of written disclosure statements signed by consumers at an in-state office for two years.

(5) **Mortgage brokers may provide ~~((CLO)) CLI systems—Conditions.~~** A licensed mortgage broker may provide ~~((CLO)) CLI systems.~~ Prior to providing any ~~((CLO)) CLI system~~, a mortgage broker subject to licensing must notify the director in writing of its intent to provide the service. The notification shall include:

(a) Copies of any and all agreements between the licensee and the ~~((CLO)) CLI service provider~~, including any and all business names and addresses where ~~((CLO)) CLI services~~ will be provided;

(b) Copies of any and all ~~((CLO)) CLI disclosure statements~~ which the ~~((CLO)) CLI service provider~~ shall give to consumers in connection with the provision of the ~~((CLO)) CLI services.~~

(6) ~~((CLO)) CLI system providers and ((CLO)) CLI service providers responsible for violations.~~ The department may hold both ~~((CLO)) CLI service providers~~ and ~~((CLO)) CLI system providers~~ responsible for any and all violations of chapter 19.146 RCW or chapter 208-660 WAC, and subject either or both the licensee or the service provider to any and all applicable fines and penalties.

AMENDATORY SECTION (Amending WSR 96-04-028, filed 2/1/96, effective 4/1/96)

WAC 208-660-030 Application procedure for mortgage broker license. (1) Each person required to have a license must apply to the director by filing the following:

(a) An application in the form prescribed by the director, including without limit the information required by RCW 19.146.205 (1)(a) through (d).

(b) A surety bond and related power of attorney, or approved alternative to the bond, in accordance with RCW

19.146.205(3) and WAC ~~((50-60-080 and 50-60-08010))~~
~~208-660-080 and 208-660-08010.~~

(c) The application deposit.

(d) In regard to each principal~~(;)~~ and designated broker~~((, and any branch office manager))~~ of the applicant:

(i) Biographical information including complete and accurate employment history and a description of any material litigation involving the person;

(ii) An independent credit report obtained from a recognized credit reporting agency;

(iii) A signed authorization for a background investigation on a form provided by the department;

(iv) Completed fingerprint cards accepted by the Washington state patrol ~~((this requirement does not apply to branch office managers))~~;

(v) A signed authorization for verification of the existence of a trust account on a form provided by the department;

(vi) A certificate of passing an approved examination (this requirement does not apply to ~~((branch office managers))~~ principals); and

(vii) A certificate of satisfactory completion of an approved licensing course, or satisfactory proof of at least two years of experience in accordance with WAC ~~((50-60-040))~~ 208-660-040 (this requirement does not apply to principals).

(e) A signed certificate of compliance and authorization to examine trust accounts on a form provided by the department;

(f) Information to support any required branch office certificate, as required by WAC ~~((50-60-070))~~ 208-660-070.

(g) Information in regard to each independent contractor retained by the applicant, in accordance with RCW 19.146.200(1).

(h) A copy of any written agreement with a lender or licensee, in accordance with RCW 19.146.040(2).

(i) A copy of any form to be approved by the director in accordance with WAC ~~((50-60-130))~~ 208-660-130(2).

(j) If the applicant's principal office is located out-of-state, information in regard to the applicant's registered agent, in accordance with RCW 19.146.220(3).

(2) Notwithstanding any other provision of these rules, the director may deny an application as incomplete if the applicant fails within ten business days to meet a second request from the director for information, except that the director may grant an extension to the applicant when good cause is shown. An example of good cause may include, but is not limited to, death or incapacitating illness of the preparer, or other catastrophic occurrence. Failure to file requested information under such circumstances will not affect new applications filed after the denial. An applicant may reapply upon submission of a new application and an additional application deposit.

AMENDATORY SECTION (Amending WSR 96-04-028, filed 2/1/96, effective 4/1/96)

WAC 208-660-040 Experience requirements. (1) A designated broker ~~((or branch office manager))~~ may use the following experience to satisfy the experience requirements of RCW 19.146.210 (1)(e) and 19.146.265:

(a) As a mortgage broker, or as a designated broker, or branch office manager, of a mortgage broker business;

(b) As a mortgage banker, or responsible individual or branch manager, of a mortgage banking business;

(c) As a loan officer, with responsibility primarily for loans secured by a lien on real estate;

(d) As a branch manager of a lender, with responsibility primarily for loans secured by a lien on real estate.

(e) As a mortgage broker with a mortgage broker (or similar) license from another state where the licensing standards are substantially similar to those in this state, as determined by the director.

(2) Satisfactory proof of two years of experience may include valid copies of W-2 or 1099 tax forms verifying employment for the two-year period, valid copies of form 1120 corporate tax returns for the two-year period signed by the broker or manager as owner of the business for the two-year period, or signed letters from a lender on the lender's letterhead verifying that the broker or manager has originated mortgage loans for the two-year period.

AMENDATORY SECTION (Amending WSR 96-04-028, filed 2/1/96, effective 4/1/96)

WAC 208-660-042 Continuing education requirement. (1) The principal or designated broker ~~((and each branch office manager))~~ of a licensee must satisfactorily complete an approved continuing education course annually. Each licensee must file annually a certificate of satisfactory completion of an approved continuing education course by the licensee's principal or designated broker ~~((and each branch office manager,))~~ no later than the last business day of the month in which the anniversary date of the issuance of the licensee's license occurs.

(2) This section applies to each licensee beginning on the first anniversary date of the issuance of the licensee's license which occurs after December 31, 1995. (For example, if a licensee's license was issued on January 10, 1994, then the licensee must submit its first certificate of satisfactory completion of an approved continuing education course no later than the last business day of January 1996.)

AMENDATORY SECTION (Amending WSR 96-04-028, filed 2/1/96, effective 4/1/96)

WAC 208-660-045 Approval of courses and examinations. (1) In order to receive approval of a licensing or continuing education course, the course provider must file an application with the director, which includes the following items:

(a) A description of the course provider's experience in teaching this type of course;

(b) A complete listing of all instructors for the course, including their qualifications and experience teaching courses similar to this course;

(c) A valid certification as a vocational instructor issued by the state of Washington or valid certification as a non-profit corporation under United States Tax Code that represents the interests of mortgage brokers and lenders;

(d) In connection with approval of a licensing course, all course materials and lesson plans on a session-by-session basis, which must cover at least the following subjects to be taught:

- (i) The Mortgage Broker Practices Act;
 - (ii) The Consumer Protection Act;
 - (iii) The Escrow Agent Registration Act, chapter 18.44 RCW;
 - (iv) The federal Real Estate Settlement Procedures Act, Truth in Lending Act, Equal Credit Opportunity Act, Fair Credit Reporting Act, Fair Housing Act, Home Mortgage Disclosure Act, and Community Reinvestment Act, and the regulations promulgated pursuant to these acts.
 - (v) Trust account and recordkeeping requirements provided in the Mortgage Broker Practices Act;
 - (vi) Mortgage, deed of trust, and real estate contract statutes set forth in Title 61 RCW;
 - (vii) Washington principal and agent law;
 - (viii) Real estate and appraisal law, including without limitation, the provisions of chapters 18.85 and 18.140 RCW;
 - (ix) Arithmetical computations common to mortgage lending including without limitation, the computation of annual percentage rate, finance charge, amount financed, payment and amortization;
 - (x) Ethics in the mortgage industry; and
- (e) In connection with a continuing education course, all course materials and lesson plans on a session-by-session basis, which cover all relevant changes to the laws and matters described in (d) of this subsection.
- (2) In order to receive approval of an examination, the examination administrator must file an application with the director, including the following items:
- (a) A description of the examination administrator's experience in administering this type of examination; and
 - (b) A copy of any examinations to be used in determining satisfactory comprehension of the contents of the course and the grading scale to be used. Any new or revised examinations or grading scales to be used must be submitted to the director for approval prior to their use.
- (3) The director shall review the applications filed with the department and determine whether to approve or deny the proposed course or examination. If the director approves the course or examination, the director shall issue a certificate of approval that will be effective for two years from the date of its issuance.
- (4) The director shall publish annually a list of approved courses and approved examinations.
- (5) A course provider or examination administrator that desires to renew the certificate of approval must apply to the director and file the items required in subsection (1) of this section no later than forty-five days before the certificate expires.
- (6) The director may audit an approved course or examination at any time. If the course provider or examination administrator has not complied with the requirements of this section, the director may suspend or terminate approval and require the surrender of the certificate of approval.

AMENDATORY SECTION (Amending WSR 96-04-028, filed 2/1/96, effective 4/1/96)

WAC 208-660-070 Branch office application procedure. Each applicant for a license or licensee required to obtain a branch office certificate shall apply to the director by filing the following:

- (1) An application in the form prescribed by the director.
 - (2) The application deposit.
 - ~~((3) In regard to each branch office manager:~~
 - ~~(a) Biographical information including complete and accurate employment history and a description of any material litigation involving the manager;~~
 - ~~(b) A signed authorization for background investigation on a form provided by the director; and~~
 - ~~(c) A certificate of satisfactory completion of an approved licensing course, or satisfactory proof of at least two years' experience in accordance with WAC 50-60-040.~~
- ~~A different natural person must serve as manager for each branch office.))~~ A branch office application may be submitted simultaneously with a license application, however no branch office certificate will be issued prior to the issuance of the license.

AMENDATORY SECTION (Amending WSR 96-04-028, filed 2/1/96, effective 4/1/96)

WAC 208-660-080 Surety bond and approved alternatives—General requirements. (1) Each applicant for a license and licensee must file and maintain on file with the director:

- (a) A surety bond in the required amount and related power of attorney issued by a bonding company or insurance company authorized to do business in this state; or
- (b) An approved alternative to a surety bond in the required amount in accordance with WAC ~~((50-60-08010))~~ 208-660-08010.

The required amount of the surety bond or approved alternative ranges from twenty thousand dollars to sixty thousand dollars and is based on the applicant's or licensee's monthly average number of loan originators calculated in accordance with subsection (2) of this section. The surety bond or approved alternative is subject to claims in accordance with RCW 19.146.205 and 19.146.240. Borrowers shall be given priority over the state and other persons who file claims against the bond or approved alternative. The state and other persons shall not receive distributions from the remainder of the bond or approved alternative pursuant to valid claims prior to one hundred eighty days following the date a claim is made against the bond.

(2) The monthly average number of loan originators is calculated as follows:

- (a) If the applicant or licensee has not been in the mortgage broker business at any time during the preceding twelve months, the monthly average number of loan originators is determined by adding up the projected number of loan originators to be employed or engaged each month for the first twelve months during which the applicant or licensee will do business, and dividing this total by twelve. The projected

number of loan originators must reflect at least the actual number of originators at the inception of business.

(b) If the applicant or licensee has not been in the mortgage broker business at least some portion of each of the preceding twelve months, the monthly average number of loan originators is calculated by adding up the number of loan originators employed or engaged each month (or part thereof) for the number of months the applicant or licensee has been in business during the twelve-month period, and the projected number of loan originators to be employed or engaged each month for any additional months necessary to comprise a total of twelve months (or part thereof), and dividing this total by twelve.

(c) Otherwise, the monthly average number of loan originators as calculated by adding up the number of loan originators employed or engaged each month (or part thereof) for the previous twelve months, and dividing this total by twelve.

(3) Based upon the monthly average number of loan originators, the required surety bond amount is indicated by the following table:

Monthly Average Number of Loan Originators	Minimum Required Bond Amount
up to 3.0	\$20,000
more than 3.0, up to 6.0	\$30,000
more than 6.0, up to 9.0	\$40,000
more than 9.0, up to 15.0	\$50,000
more than 15.0	\$60,000

When calculating the required bond amount, an applicant or licensee shall use the worksheet form approved by the director.

(4) At least forty-five days prior to each anniversary of the issuance of the surety bond or approved alternative, each licensee shall calculate its required bond amount in accordance with subsections (2) and (3) of this section. If the required surety bond amount has changed, then the licensee shall within thirty days of the date of the calculation, file a new surety bond or approved alternative in the required amount or file documentation showing a change in the amount of the existing bond or alternative to the required amount.

(5) Each licensee shall use the bond form, assignment of certificate of deposit form, or irrevocable letter of credit form approved by the director.

AMENDATORY SECTION (Amending WSR 96-04-028, filed 2/1/96, effective 4/1/96)

WAC 208-660-08015 Designation of trust account(s). Each account holding borrower funds to pay third-party providers must be designated as a trust account in the name of the mortgage broker as it appears on its license, or if exempt from licensing, in the name of the exempt broker. All checks must be prenumbered by the supplier (printer), unless the licensee uses an automated check writing system, in which case all checks must be numbered in sequence, and bear upon the front of the check the identifying words, "trust account." Any

interest earned on a borrower's subaccount shall be refunded or credited to the borrower either at closing or upon withdrawal or denial of the borrower's loan application.

AMENDATORY SECTION (Amending WSR 96-04-028, filed 2/1/96, effective 4/1/96)

WAC 208-660-08025 Trust account deposit requirements. (1) All funds received from borrowers or on behalf of borrowers for the payment of third-party providers, whether specifically identified as such or not, and regardless of when they are received, must be deposited in the trust account(s) prior to the end of the ~~((next))~~ third business day following receipt. In order to satisfy this requirement in regard to the deposit of a check or money order, the mortgage broker must within one business day after receipt of the check or money order:

(a) Endorse the check or money order "for deposit only" with the broker's trust account number and mail the check postage prepaid to its financial institution; or

(b) Endorse the check or money order "for deposit only" with the mortgage broker's trust account deposit number and by the end of the next business day mail the check or money order postage prepaid to the main office of the broker. The main office shall, in turn, deposit the check or money order in its financial institution prior to the end of the ~~((next))~~ third business day after receipt of the check or money order in the main office; or

(c) Deposit the check or money order into its trust account by depositing it directly at the branch where its trust account is held or at an ATM of its financial institution.

(2) All deposits to the trust account(s) must be documented by a bank deposit slip which has been validated by bank imprint, or by an attached deposit receipt which bears the signature of an authorized representative of the mortgage broker indicating that the funds were actually deposited into the proper account(s).

(3) Receipt of funds by wire transfer or any means other than cash, check, or money order, must be posted in the same manner as other receipts. Any such transfer of funds must include a traceable identifying name or number supplied by the financial institution or transferring entity. The mortgage broker must also retain a receipt for the deposit of the funds which must contain the traceable identifying name or number supplied by the financial institution or transferring entity.

(4) Deposits to the trust account(s) must be limited to funds delivered to the mortgage broker for payment to third-party providers, except a mortgage broker may deposit its own funds into the trust account(s) to prevent a disbursement in excess of an individual borrower's subaccount, provided that the exact sum of deficiency is deposited and detailed records of the deposit and its purpose are maintained in the trust ledger and the trust account(s) check register. Any deposits of the mortgage broker's own funds into the trust account(s) must be held in trust in the same manner as funds paid by borrowers for the payment of third-party providers and treated accordingly in compliance with the Mortgage Broker Practices Act.

If a mortgage broker has deposited its own funds into its trust account, the mortgage broker may receive reimburse-

PERMANENT

ment for such deposit at closing into its general business bank account provided:

(a) All third-party provider's charges associated with the mortgage broker's deposit have been paid;

(b) The HUD 1 Settlement Statement provided to the borrower clearly reflects the line item, "deposit paid by broker," and the amount deposited;

(c) The HUD 1 Settlement Statement provided to the borrower clearly reflects the line item, "reimbursement to broker for funds advances," and the amount reimbursed; and

(d) Any funds disbursed by escrow at closing to the mortgage broker for payment of unpaid third-party providers' expenses charged or to be charged to the mortgage broker are deposited into the borrower's subaccount of the mortgage broker's trust account.

AMENDATORY SECTION (Amending WSR 96-04-028, filed 2/1/96, effective 4/1/96)

WAC 208-660-08030 Trust account disbursement requirements. (1) Each mortgage broker is responsible for the disbursement of all trust account funds, whether disbursed by personal signature, signature plate, or signature of another person authorized to act on the mortgage broker's behalf.

(2) All disbursements of trust funds must be made by check, drawn on the trust account, and identified on the check as pertaining to a specific third-party provider transaction or borrower refund, except as specified in this section. The number of each check, amount, date, and payee must be shown in the trust account(s) check ledger as written on the check.

(3) Disbursements may be made from the trust account(s) for the payment of bona fide third-party providers' services rendered in the course of the borrower's loan origination, if the borrower has consented in writing to the payment. Such consent may be given at any time during the application process and in any written form, provided that it contains sufficient detail to verify the borrower's consent to the use of trust funds. No disbursement on behalf of the borrower may be made from the trust account until the borrower's or broker's deposit of sufficient funds into the trust account(s) is available for withdrawal.

(4) If a borrower has more than one loan application pending with a mortgage broker, the mortgage broker shall maintain a separate subaccount ledger for each loan application. The borrower must consent to any transfer of trust account funds between the individual subaccounts associated with these pending loan applications. The consent must be maintained in the borrower's loan file and referenced in the borrower's subaccount ledger sheets.

(5) Among other prohibited disbursements, no disbursement may be made from a borrower's subaccount:

(a) In excess of the amount held in the borrower's subaccount (commonly referred to as a disbursement in excess);

(b) In payment of a fee owed to any employee of the mortgage broker or in payment of any business expense of the mortgage broker;

(c) For payment of any service charges related to the management or administration of the trust account(s);

(d) For payment of any fees owed to the mortgage broker by the borrower, or to transfer funds from the subaccount to any other account; and

(e) For the payment of fees owed to the broker under RCW 19.146.070 (2)(a).

(6) A mortgage broker may, in the case of a closed and funded transaction, transfer excess funds remaining in the individual borrower's subaccount into the mortgage broker's general business bank account in full or partial payment of fees owed to the mortgage broker upon determination that all third-party providers' expenses have been accurately reported in the loan closing documents and have been paid in full, and that the borrower has received credit in the loan closing documents for all funds deposited in the trust account.

Each mortgage broker shall maintain a detailed audit trail for any disbursements from the borrower's subaccount(s) into the mortgage broker's general business bank account, including documentation in the form of a final HUD-1 Settlement Statement form showing that credit has been received by the borrower in the closing and funding of the transaction. The disbursements must be made by a check drawn on the trust account and deposited directly into the mortgage broker's general business bank account.

(7) Borrower funds held by the mortgage broker must be remitted to the borrower within five business days of the determination that all payments to third-party providers owed by the borrower have been satisfied.

(8) Any trust funds held by the mortgage broker for a borrower who cannot be located must be remitted in compliance with the Uniform Unclaimed Property Act of 1983, chapter 63.29 RCW.

NEW SECTION

WAC 208-660-08032 Approved methods of disbursement to and from trust accounts. A mortgage broker who receives a check from closing which includes both the mortgage broker's fee and a payment or payments for third party service providers is required to disburse to and from trust accounts in accordance with WAC 208-660-08010 through 208-660-08030. The approved methods for accomplishing this, and avoiding violation of RCW 19.46.050, are:

(1) The mortgage broker at the time of deposit is to split the check at the teller window and route any moneys due to third party service providers to an approved trust account, and moneys due the mortgage broker to its general account; or

(2) The mortgage broker deposits the entire check into the trust account. After paying any and all moneys due to third party service providers and seeing to it that the borrower has received credit for all funds deposited in the trust account, the mortgage broker may transfer excess funds remaining in the individual borrower's subaccount into the mortgage broker's general business bank account. This amount must be equal to the fee disclosed on the final HUD-1 Settlement Statement, less any amounts already received by the mortgage broker, and must be duly recorded in the trust subaccount ledger. The mortgage broker may at no time before the loan is closed transfer moneys from a trust account to their general business bank account.

AMENDATORY SECTION (Amending WSR 96-04-028, filed 2/1/96, effective 4/1/96)

WAC 208-660-08040 Automated check writing systems. If a mortgage broker uses a program which has the ability to write checks:

- (1) The check number must be pre-printed by the supplier (printer) on the check and on the voucher copy if pre-printed checks are used, or assigned sequentially if preprinted checks are not used;
- (2) The program may assign suffixes or subaccount codes before or after the check number for identification purposes;
- (3) The check number must appear in the magnetic coding which also identifies the account number for readability by financial institution computers; and
- (4) All checks written must be included within the computer accounting system.

AMENDATORY SECTION (Amending WSR 96-04-028, filed 2/1/96, effective 4/1/96)

WAC 208-660-130 Disclosure required to borrower.

(1) Any form of disclosure required by RCW 19.146.030 (2)(d), (e), and (f) must be acceptable to the director. A model form for this purpose promulgated by the director is considered acceptable.

(2) Any lock-in agreement form or disclosure form described in RCW 19.146.030 (2)(c) must be approved by the director prior to its use by a mortgage broker or its loan originators. This subsection does not apply to use of a model form promulgated by the director.

(3) A mortgage broker shall not charge any fee that inures to the benefit of the mortgage broker if it exceeds the fee disclosed on the initial written disclosure, unless:

- (a) The need to charge the fee was not reasonably foreseeable at the time the written disclosure was provided; and
- (b) The mortgage broker has provided to the borrower, no less than three business days prior to the signing of the loan closing documents, a clear written explanation of the fee and the reason for charging a fee exceeding that which was previously disclosed.

However, no other disclosures shall be required by this subsection if the borrower's closing costs, excluding prepaid escrowed costs of ownership, does not exceed the total closing costs in the most recent good faith estimate provided to the borrower.

In addition, no other disclosures shall be required by this subsection if any fee or set of fees that inure to the benefit of the mortgage broker, and that are calculated as a percentage of the loan amount, increase as a result of an increase in the loan amount, provided that:

- (i) The increase in loan amount is requested by the borrower;
- (ii) The fee or set of fees that are calculated as a percentage of the loan amount have been disclosed on the initial written disclosure as both a percentage of the loan amount and as a dollar amount based upon the assumed loan amount used in the initial written disclosure; and, the total aggregate increase in the fee or set of fees that inure to the benefit of the

mortgage broker as a result of the increase in loan amount is less than seven hundred fifty dollars.

AMENDATORY SECTION (Amending WSR 96-04-028, filed 2/1/96, effective 4/1/96)

WAC 208-660-140 General recordkeeping requirements. (1) Each mortgage broker shall retain its books and records for a minimum of ~~((four years))~~ twenty-five months after the effective period to which the books and records relate.

However, books and records relating to a specific loan application must be maintained for a minimum of ~~((four years))~~ twenty-five months after a loan application is received. These books and records must be retained in all cases where a loan application has been received, any deposits or fees associated with a mortgage application have been accepted, or any written agreement has been executed.

(2) All books and records must be kept in a location in this state that is readily accessible to the department. However, a mortgage broker may store its books and records outside the state with the prior approval of the director, and after executing a written agreement with the director:

- (a) To provide access to its books and records to investigate complaints against the mortgage broker; and
- (b) To pay the department's travel, lodging and per diem expenses incurred in travel to examine books and records stored out-of-state.

(3) Books and records include without limitation: The original contracts for the broker's compensation, an accounting of all funds received in connection with loans, a copy of the settlement statements as provided to borrowers, a record of any fees refunded to applicants for loans that did not close, copies of the good faith estimates and all other written disclosures, and all other correspondence, papers or records relating to loan applications.

AMENDATORY SECTION (Amending WSR 96-04-028, filed 2/1/96, effective 4/1/96)

WAC 208-660-145 Forwarding appraisal, title report and credit report. Except as otherwise required by the United States Code or the Code of Federal Regulations, now or as amended, if a borrower is unable to obtain a loan for any reason and the borrower has paid the mortgage broker for an appraisal, title report, or credit report, the borrower may request in writing that the mortgage broker mail (or otherwise furnish) a copy of the appraisal, title report or credit report to the borrower and mail (or otherwise furnish) the originals to any other mortgage broker or lender of the borrower's choice. The copies and originals must be furnished by the mortgage broker within five days after the mortgage broker has received the borrower's written request regardless of whether the borrower has obtained a loan. By furnishing the originals to another mortgage broker or lender, the mortgage broker conveys the right to use the documents to the other broker or lender. The mortgage broker must, upon request by the other broker or lender, provide written evidence of the conveyance.

PERMANENT

AMENDATORY SECTION (Amending WSR 96-04-028, filed 2/1/96, effective 4/1/96)

WAC 208-660-160 License application denial or condition; license suspension or revocation. ((+)) The director may deny or condition approval of a license application, or suspend or revoke a license if the applicant or licensee, or any principal or designated broker of the applicant or licensee:

((+)) (1) Has failed to pay a fee due to the state in accordance with the Mortgage Broker Practices Act;

((+)) (2) Has not filed the required surety bond or approved alternative or otherwise complied with RCW 19.146.205;

((+)) (3) Has had any license, or any authorization to do business under any similar statute of this or any other state, suspended, revoked, or restricted within the prior five years;

((+)) (4) Has within the prior seven years been convicted of a felony, or a gross misdemeanor involving dishonesty or financial misconduct;

((+)) (5) Has failed to demonstrate financial responsibility, character, and general fitness such as to command the confidence of the community and to warrant a belief that the business will be operated honestly, fairly, and efficiently within the purposes of the Mortgage Broker Practices Act. The director may find that the person has failed to make the demonstration if, among other things:

((+)) (a) The person is or has been subject to an injunction issued pursuant to the Mortgage Broker Practices Act or the Consumer Protection Act; or

((+)) (b) An independent credit report issued by a recognized credit reporting agency indicates that the person has a substantial history of unpaid debts;

((+)) (6) Has omitted, misrepresented, or concealed material facts in obtaining a license or in obtaining reinstatement thereof;

((+)) (7) Has violated the provisions of the Mortgage Broker Practices Act, or the Consumer Protection Act;

((+)) (8) Has had its surety bond, approved alternative, or equivalent form of business insurance, canceled or revoked for cause;

((+)) (9) Has allowed the licensed mortgage broker business to deteriorate into a condition which would result in denial of a new application for a license;

((+)) (10) Has aided or abetted an unlicensed person to practice in violation of the Mortgage Broker Practices Act;

((+)) (11) Has demonstrated incompetence or negligence that results in injury to a person or that creates an unreasonable risk that a person may be harmed;

((+)) (12) Is insolvent in the sense that the value of the applicant's or licensee's liabilities exceed its assets or in the sense that the applicant or licensee cannot meet its obligations as they mature;

((+)) (13) Has failed to comply with an order, directive, or requirement of the director, or his or her designee, or with an assurance of discontinuance entered into with the director, or his or her designee;

((+)) (14) Has performed an act of misrepresentation or fraud in any aspect of the conduct of the mortgage broker business or profession;

((+)) (15) Has failed to cooperate with the director, or his or her designee, including without limitation by:

((+)) (a) Not furnishing any necessary papers or documents requested by the director for purposes of conducting an investigation for disciplinary actions or denial, suspension, or revocation of a license; or

((+)) (b) Not furnishing any necessary papers or documents requested by the director for purposes of conducting an investigation into a complaint against the licensee filed with the department, or providing a full and complete written explanation of the circumstances of the complaint upon request by the director;

((+)) (16) Has interfered with an investigation or disciplinary proceeding by willful misrepresentation of facts before the director or the director's designee, or by the use of threats or harassment against a client, witness, employee of the licensee, or representative of the director for the purpose of preventing them from discovering evidence for, or providing evidence in, any disciplinary proceeding or other legal action;

((+)) (17) Has failed to provide a required certificate of passing an approved examination;

((+)) (18) Has failed to provide a required certificate of satisfactory completion of an approved licensing course or, in the alternative, satisfactory proof of two years' experience in accordance with WAC ((50-60-040)) 208-660-040; or

((+)) (19) Has failed to provide a required certificate of satisfactory completion of an approved continuing education course.

~~((2) The director may deny or condition approval of a branch office application, or suspend or revoke a branch office certificate, if the branch office manager has failed to provide any required items described in subsection (1)(r) and (s) of this section.)~~

WSR 01-01-050
PERMANENT RULES
HIGHER EDUCATION
COORDINATING BOARD
[Filed December 11, 2000, 1:22 p.m.]

Date of Adoption: December 6, 2000.

Purpose: Makes technical changes, reorders sections, and makes changes to the length of the contract period.

Citation of Existing Rules Affected by this Order: Repealing WAC 250-44-210; and amending WAC 250-44-020, 250-44-040, 250-44-050, 250-44-060, 250-44-070, 250-44-080, 250-44-090, 250-44-110, 250-44-130, 250-44-140, 250-44-150, 250-44-160, and 250-44-190.

Statutory Authority for Adoption: Chapter 28B.04 RCW.

Adopted under notice filed as WSR 00-19-105 on September 20, 2000.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 0, Amended 13, Repealed 1.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 0, Amended 13, Repealed 1.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 13, Repealed 1; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 0, Repealed 0.

Effective Date of Rule: Thirty-one days after filing.

December 8, 2000

Brenda Landers
Program Manager

AMENDATORY SECTION (Amending Order 4-87, Resolution No. 87-57, filed 7/31/87)

WAC 250-44-020 Program administration. Responsibility for all aspects of administration of the displaced homemaker program, subject to these regulations, shall be vested in the executive director of the board. ~~((The executive director shall provide progress reports to the board and to the governor and the appropriate committees of the legislature.))~~

AMENDATORY SECTION (Amending Order 4-87, Resolution No. 87-57, filed 7/31/87)

WAC 250-44-040 Definitions. Unless the context clearly requires otherwise, the definitions in this section apply throughout this chapter.

(1) "Act" means the Displaced Homemaker Act, chapter 28B.04 RCW, as amended.

(2) "Advisory committee" means the advisory committee established pursuant to WAC 250-44-030.

(3) "Appropriate job opportunities" means opportunities to be gainfully employed, as defined in subsection (9) of this section, in jobs which build upon all relevant skills and potential skills of the individual displaced homemaker, including opportunities in jobs which in the past may not generally have been considered traditional for women.

(4) "Center" means a multipurpose service center as defined in subsection (10) of this section.

(5) "Board" means the higher education coordinating board.

(6) "Displaced homemaker" means an individual who:

(a) Has worked in the home for ten or more years providing unsalaried household services for family members on a full-time basis; and

(b) Is not gainfully employed;

(c) Needs assistance in securing employment; and

(d) Meets one of the following criteria;

(i) Has been dependent on the income of another family member but is no longer supported by that income; or

(ii) Has been dependent on federal assistance but is no longer eligible for that assistance; or

(iii) Is supported as the parent of minor children by public assistance or spousal support, but whose youngest child is within two years of reaching majority.

(7) "Executive director" means the executive director of the board.

(8) "Executive officer" of the sponsoring organization means the chief executive or senior officer of the organization.

(9) "Gainfully employed" means employed for salary or wages on a continuing basis and earning at least an amount equal to the standard of need established under RCW 74.04.770.

(10) "Multipurpose service center" means a center contracted for under the act, which either provides directly, or provides information about and referral to, each type of program of service as defined in subsection (14) of this section.

(11) "Objective" means a purpose of a program of service which can be quantified and for which objective measurements of performance can be established.

(12) "Displaced homemaker program" means the program of contracts for multipurpose service centers and programs of service for displaced homemakers authorized by the act.

(13) "Program" means a program of service as defined in subsection (14) of this section.

(14) "Program of service" means one of the specific services listed in subdivisions (a) through (g) of this subsection, and meeting the criteria set forth in the subdivision.

(a) Job counseling services, which shall:

(i) Be specifically designed for displaced homemakers;

(ii) Counsel displaced homemakers with respect to appropriate job opportunities (as defined in subsection (3) of this section); and

(iii) Take into account and build upon the skills and experience of a homemaker and emphasize job readiness as well as skill development.

(b) Job training and job placement services, which shall:

(i) Emphasize short-term training programs and programs which expand upon homemaking skills and volunteer experience and which prepare the displaced homemaker to be gainfully employed as defined in subsection (9) of this section;

(ii) Develop, through cooperation with state and local government agencies and private employers, model training and placement programs for jobs in the public and private sectors;

(iii) Assist displaced homemakers in gaining admission to existing public and private job training programs and opportunities, including vocational education and apprenticeship training programs; and

(iv) Assist in identifying community needs and creating new jobs in the public and private sectors.

(c) Health counseling services, including referral to existing health programs, which shall:

(i) Include general principles of preventative health care;

(ii) Include health care consumer education, particularly in the selection of physicians and health care services, including, but not limited to, health maintenance organizations and health insurance;

(iii) Include family health care and nutrition;

PERMANENT

(iv) Include alcohol and drug abuse; and
 (v) Include other related health care matters as appropriate.

(d) Financial management services, which shall:

(i) Provide information and assistance with respect to insurance, taxes, estate and probate problems, mortgages, loans and other related financial matters; and

(ii) Include referral, wherever feasible and appropriate, to public legal assistance programs staffed by attorneys.

(e) Educational services, which shall:

(i) Include outreach and information about courses offering credit through secondary or postsecondary education programs, and other re-entry programs, including bilingual programming where appropriate; and

(ii) Include information about such other programs (~~as the board may determine~~) determined by the board to be of interest and benefit to displaced homemakers, and for which appropriate informational materials have been provided by the board.

(f) Legal counseling and referral services, which shall:

(i) Be limited to matters directly related to problems of displaced homemakers;

(ii) Be supplemental to financial management services as defined in subdivision (d) of this subsection; and

(iii) Emphasize referral, wherever feasible and appropriate, to public legal assistance programs staffed by attorneys.

(g) General outreach and information services with respect to federal and state employment, education, health, public assistance, and unemployment assistance programs which the board may determine to be of interest and benefit to displaced homemakers, and for which the board distributes appropriate informational materials.

(15) "Reaching majority" means reaching age eighteen.

(16) "Sponsoring organization" means a public institution, agency or governmental entity, or a chartered private nonprofit institution or organization which has legal authority to submit an application, enter into a contract, and provide the programs of service covered by the application, and which agrees to provide supervision and financial management to ensure compliance with the terms and conditions of the contract.

(17) "Training for service providers" means activities which provide training for persons serving the needs of displaced homemakers.

(18) "State-wide outreach and information services" means activities designed to make general outreach and information services for displaced homemakers available throughout Washington including but not limited to areas (~~not~~) directly served by multipurpose service centers or other programs of service under the displaced homemaker program.

(19) "Subsistence" means support provided to, or paid to recipients for support services including all living expenses, child care, and transportation.

(20) "Performance indicators" means expected levels of services and outcomes as established by the executive director and made available in the application guidelines.

(21) "Initial contract" means a contract awarded based on a competitive process and the evaluation of an initial application.

(22) "Renewal contract" means a contract awarded to a current sponsoring organization for the ensuing biennium, based on the evaluation of a renewal application.

AMENDATORY SECTION (Amending Order 95-02, filed 3/16/95, effective 4/16/95)

WAC 250-44-050 Utilization of available contract funds. (1) (~~Each biennium~~) The executive director shall issue contract application guidelines which shall establish criteria for specific utilization of available contract funds. The guidelines shall set forth:

(a) The maximum contract amount (~~for a multipurpose service center to be provided depending on available funds under the act during the upcoming biennium~~) available for funding of a multipurpose service center.

(b) The maximum contract amount (~~for a contract for a program or programs of service depending on available funds under the act during the upcoming biennium~~) available for funding of a program or programs of service.

(c) A reservation of funds for contracts to provide state-wide outreach and information services and/or training for service providers.

(2) At least two multipurpose service centers, each located in a highly populated area, (~~will~~) shall be supported under the displaced homemaker program, provided adequate funds have been appropriated.

(3) Remaining funds (~~will~~) shall be used for contracts selected to provide geographic dispersion of displaced homemaker multipurpose service centers and programs of service.

AMENDATORY SECTION (Amending Order 4-87, Resolution No. 87-57, filed 7/31/87)

WAC 250-44-060 Eligibility to apply for contracts. Either an initial or renewal application for a contract to provide either a multipurpose service center or one or more programs of service for displaced homemakers or training for service providers may be submitted by a sponsoring organization, as defined in WAC 250-44-040(16).

(1) The board (~~will~~) shall require appropriate documentation of the nonprofit status of an applicant (~~which~~) that is nonpublic.

(2) (~~Letters of intent, accompanied by the required documentation of nonprofit status will be required prior to submission of an application, and will be screened by the staff of the board. Sponsoring organizations verified to be eligible will then be invited to submit applications.~~)

(3) (~~Consortiums of appropriate~~) Organizations (~~are encouraged, but~~) that apply as a consortium shall submit a single application (~~by a single~~). The application shall be submitted by the sponsoring organization(~~, which~~) that will serve as fiscal agent for the consortium(~~, is to be submitted for each proposed consortial center, program of service, or multiple programs of service to be operated by a consortium~~).

AMENDATORY SECTION (Amending Order 2/84, Resolution No. 84-76, filed 7/3/84)

WAC 250-44-070 Standards to be met by applicants.

In addition to eligibility as a public or nonprofit organization, each sponsoring organization ~~((with)) shall~~ be required to provide evidence of adequate staff or governing board provisions to provide administrative and financial management oversight services to ensure contract compliance ~~((with contract provisions and conditions))~~.

AMENDATORY SECTION (Amending Order 4-87, Resolution No. 87-57, filed 7/31/87)

WAC 250-44-080 Eligible expenditures and matching requirements. (1) Eligible expenditures ~~((Expenditures eligible to be included in budgets under applications to provide multipurpose centers, programs of service or training for service providers,))~~ include all operating expenses ~~((needed))~~ necessary to carry out the training, counseling, and referral services covered in the proposal, and to provide outreach activities related to the services, subject to the following limitations:

(a) No funds under the contract budgets ~~((may)) shall~~ be utilized to provide subsistence or stipends for recipients of the services provided.

(b) No funds under the contract budgets ~~((may)) shall~~ be utilized to pay for student tuition and fees for enrollment in education programs or courses except under specific prior approval by the executive director.

(c) ~~((Any)) All~~ out-of-state travel or any subcontracts with other agencies or organizations, to be paid for with funds under contract budgets, must be specifically approved in advance by the executive director or the director's designee; and

(d) Formula allocations of overhead or other expenses of the sponsoring organization not directly related to the provision of the services covered by the contract ~~((may)) shall~~ not be included in the contract budget, but charges for direct services in support of the contract such as financial accounting services, printing services, transportation, etc., may be included.

(2) Although the contract budget ~~((may)) shall~~ not support subsistence, stipends, or tuition and fee payments (unless approved in advance) for recipients of services under the contract, sponsoring organizations are encouraged wherever possible and appropriate to obtain and provide funds for such purposes from other sources ~~((JTPA, for example) in cases of financial need))~~.

(3) Matching requirements. At least thirty percent of the funding for each center or program supported by a contract under the act must be provided by the sponsoring ~~((agency))~~ organization, based on the original contract amount.

(a) Validation of the provision of required matching support ~~((with)) shall~~ be provided ~~((by detail in the budget proposed))~~ as required in each application.

(b) Matching may be provided either in the form of supplemental funds, from any source other than the contract under the act, to pay for services separately accounted for in carrying out the activities covered by the contract, or in the

form of contributed services or contributions in-kind also specifically and separately accounted for.

(c) Contributions in-kind may include materials, supplies, chargeable services such as printing services or transportation, salaries and fringe benefit costs for paid employees of the sponsoring organization to the extent such employees work directly in the provision of services under the contract or providing direct support such as secretarial or accounting support, and the equivalent value of contributed volunteer services on the same basis: Provided, That the dollar value of contributed volunteer services shall be calculated by determining the hourly rate for comparable paid positions for which the volunteer is fully qualified, and multiplying the hourly rate times the number of hours of service contributed.

AMENDATORY SECTION (Amending Order 4-87, Resolution No. 87-57, filed 7/31/87)

WAC 250-44-090 Required assurances. No contract ~~((with)) shall~~ be awarded unless the sponsoring organization includes in its application the following assurances:

(1) No person in this state, on the grounds of sex, age, race, color, religion, national origin, or the presence of any sensory, mental, or physical handicap, shall be excluded from participating in, be denied the benefits of, or be subjected to discrimination under, any program or activity funded in whole or in part with funds made available under the act;

(2) The sponsoring organization ~~((with)) shall~~ actively seek to employ for all staff positions supported by funds provided under the act, and for all staff positions supported by matching funds under any contract, including supervisory, technical and administrative positions, persons who qualify as displaced homemakers;

(3) Services provided to displaced homemakers under the contract ~~((with)) shall~~ be provided without payment of any fees for the services: Provided, That the executive director may approve exceptions to this requirement upon determining that such exceptions would be in the best interest of displaced homemaker program objectives;

(4) First priority for all services provided under the contract ~~((with)) shall~~ be given to persons who qualify in all regards as displaced homemakers. Other persons in need of the services due to similar circumstances may be assisted if provision of such assistance ~~((with)) shall~~ not in any way interfere with the provision of services to displaced homemakers as defined in the act. The sponsoring organization ~~((with)) shall~~ include in its reports separate and distinct accountability for services to displaced homemakers and to other persons in need of the services;

(5) The sponsoring organization agrees to comply in full with the accounting and reporting requirements set forth in WAC 250-44-100 and such other accounting and reporting requirements as may ~~((reasonably))~~ be established by the executive director.

(6) The sponsoring organization agrees to participate in evaluation procedures ~~((to be established pursuant to WAC 250-44-210)),~~ including the use of ~~((a)) all~~ specified uniform ~~((intake))~~ client classification forms for persons to whom services are provided, and specified uniform evaluation questionnaires;

(7) The sponsoring organization will actively seek to coordinate activities under the contract with related activities and services provided by other organizations;

(8) The sponsoring organization understands and agrees that payments from the board under the contract will be provided monthly or quarterly upon submission and approval of payment requests in a form and containing information specified by the executive director of the board, and that approval of payments shall be conditioned upon the executive director's determination that the sponsoring organization is in compliance with the terms of the contract and this chapter;

(9) The executive officer of the sponsoring organization has reviewed the application, including all assurances contained therein, and is authorized to submit the application and execute a contract in accordance with the application if it is approved by the board; and

(10) The executive director and staff of the board will be provided access to financial and other records pursuant to the contract.

AMENDATORY SECTION (Amending Order 95-02, filed 3/16/95, effective 4/16/95)

WAC 250-44-110 Length of contract periods. (1) Contract periods for each contract~~((s))~~ awarded under the act shall be in accordance with each application proposal, subject to contract application guidelines issued by the executive director, but shall not begin before the starting date or extend beyond the end date of the upcoming biennium.

(2) An initial contract shall be awarded on a biennial basis.

(3) A contract funded for the 1999-2001 biennium may be renewed for the 2001-2003 biennium provided the sponsoring organization was in full compliance with all of the terms of the 1999-2001 contract, as evidenced by the on-site compliance reviews.

(4) An initial contract funded for the 2001-2003 biennium, and any contract funded thereafter may be renewed for one ensuing biennium provided the sponsoring organization was in full compliance with the contract and performance indicators established by the executive director.

AMENDATORY SECTION (Amending Order 95-02, filed 3/16/95, effective 4/16/95)

WAC 250-44-130 Calendar and closing dates for ~~((letters of intent,))~~ applications and awards. (1) ~~((Organizations wishing to apply for contracts to operate multipurpose service centers, shall submit to the executive director a letter of intent, accompanied by appropriate documentation of public or nonprofit status, as specified in the contract application guidelines.~~

~~(2) The executive director or the director's designee will screen the letters of intent for multipurpose service centers, prepare a list of all eligible organizations which filed letters of intent and distribute the list to all applicants within seven days from the filing date for letters of intent as specified in the contract application guidelines.~~

~~(3) Applications for contracts for multipurpose service centers may be submitted by organizations on the list pursu-~~

~~ant to subsection (2) of this section. Applications must be submitted by the date as specified in the contract application guidelines.~~

~~(4) Organizations wishing to apply for contracts to operate programs of service shall submit to the executive director a letter of intent, accompanied by appropriate documentation of public or nonprofit status by the date specified in the guidelines.~~

~~(5) The executive director or the director's designee will screen the letters of intent for programs of service, prepare a list of all eligible organizations which filed letters of intent, and distribute the list to all organizations on the list, within seven days from the filing date for letters of intent as specified in the contract application guidelines.~~

~~(6)) Applications for both initial and renewal contracts ~~((for programs of service may))~~ to provide services to displaced homemakers shall be submitted by eligible organizations ~~((on the list))~~ pursuant to ~~((subsection (5) of this section))~~ WAC 250-44-040(16) by the date specified in the contract application guidelines.~~

~~((7))~~ (2) The executive director of the board ~~((will))~~ shall approve awards of contracts, provided qualifying applications were received by the closing dates specified in ~~((this section and in))~~ the application guidelines.

~~((8))~~ (3) In the event that available funds for contracts under the act are not fully utilized after approval of contracts, the executive director ~~((may))~~ shall either establish a new calendar for further consideration of applications and award of contracts, or award supplemental funds to existing centers and programs by amendment of contracts in effect, or award supplemental funds for targeted displaced homemaker program initiatives.

AMENDATORY SECTION (Amending Order 4-87, Resolution No. 87-57, filed 7/31/87)

WAC 250-44-140 ~~((Form and))~~ Content of application. ~~((1) General instructions. All forms and narrative material should be typed, narrative material double spaced. Legibility, clarity, and completeness are essential. All sections of the application must be completed. Unnecessarily elaborate brochures or other presentations beyond those sufficient to present a complete and effective application should be avoided. Elaborate art work, expensive paper and bindings are not necessary and will not count in favor of the application.~~

~~(2) Number of copies. The contract application guidelines shall specify the number of copies of each application to be submitted to the executive director. Copies may be reproduced, but at least two copies submitted shall have the original signature of the executive officer of the sponsoring organization.~~

~~(3) Contents of each application. Each))~~ Both initial and renewal applications ~~((is to))~~ shall be submitted using the format and forms prescribed in the contract application guidelines.

AMENDATORY SECTION (Amending Order 4-87, Resolution No. 87-57, filed 7/31/87)

WAC 250-44-150 Criteria for selection of contracts to be awarded. (1) Initial contracts. For each closing date established as specified in WAC 250-44-130, applications will be ranked competitively according to their performance with respect to:

- (a) Size of the potential population to be served;
 - (b) Demonstrated need for the proposed services;
 - (c) Experience and capabilities of the sponsoring organization;
 - (d) Provisions for coordination of services with other organizations providing related services in the geographic area(;
 - ~~(e) Involvement of displaced homemakers in the planning and development of the proposal;~~
 - ~~(f) The quality of the proposed center or program)).~~
- (2) The executive director shall develop a system for evaluating initial applications with respect to the above-stated criteria, and make available in the application guidelines a description of the system (~~(available to sponsoring organizations which submit letters of intent to file applications)~~)).

(3) Final selection of initial applications to be approved will be based upon both relative ranking on factors listed in subsection (1) of this section and appropriate geographic distribution.

(4) Renewal contracts. The sponsoring organization may be eligible to renew its contract for one ensuing biennium provided the sponsoring organization was in full compliance with the 1999-2001 contract. Thereafter, the sponsoring organization may be eligible to renew its contract for one subsequent biennium provided the sponsoring organization was in full compliance with the contract and performance indicators established by the executive director.

(5) The executive director shall develop a system for evaluating renewal applications and make available in the application guidelines a description of the system.

AMENDATORY SECTION (Amending Order 4-87, Resolution No. 87-57, filed 7/31/87)

WAC 250-44-160 Procedure for selection of contracts to be awarded. (1) Initial contracts. The following steps will be employed in screening and selection of applications to be approved for initial contracts:

- ~~((1))~~ (a) Applications will be screened for eligibility and completeness;
- ~~((2))~~ (b) A panel of application readers will be established, to consist of board staff members designated by the executive director, members of the advisory committee who are not members of the legislature or employees of sponsoring organizations, and such other persons as may be deemed appropriate by the executive director;
- ~~((3))~~ (c) Within each category of application as described in WAC 250-44-150(1), the panel of readers will evaluate and rank qualifying applications according to the system published in accordance with WAC 250-44-150(2);

~~((4))~~ (d) The ~~(executive director)~~ advisory committee will consider evaluations prepared by the readers, and will develop a list of recommended approved applications to be awarded contracts;

~~((5))~~ (e) The list of recommended approved applications will be submitted to the executive director of the board for approval. Upon approval the executive director will award the contracts.

(2) Renewal contracts. The following steps will be employed in screening and selection of applications to be approved for renewal contracts:

- (a) Applications will be screened for eligibility and completeness;
- (b) In cooperation with the advisory committee, or a subset thereof, the board will evaluate qualifying applications in accordance with WAC 250-44-140 and develop a list of recommended approved renewal applications according to the system published in WAC 250-44-150(5);
- (c) The list of recommended approved renewal applications shall be submitted to the executive director of the board for approval. Upon approval the executive director will award the renewal contracts.

AMENDATORY SECTION (Amending Order 4-87, Resolution No. 87-57, filed 7/31/87)

WAC 250-44-190 Withholding of contract payments. If the executive director determines that a sponsoring organization is not in compliance with contract provisions of this chapter, the executive director shall suspend payments under the contract and shall file a report with the board and with the sponsoring organization of the reason for suspension of payments. The sponsoring organization may correct the state of noncompliance or may appeal the executive director's determination to the board at its next regular meeting. If the executive director finds that any claimed expenditures under the contract are not eligible under this chapter, the executive director shall deduct such amounts from the next ~~((monthly advance))~~ request for payment. The sponsoring organization may, through the executive director, request a hearing on the executive director's decision before the board at its next regular meeting.

NEW SECTION

The following sections of the Washington Administrative Code are recodified as follows:

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 250-44-210 Evaluation reports.

WSR 01-01-058**PERMANENT RULES****DEPARTMENT OF AGRICULTURE**

[Filed December 12, 2000, 11:45 a.m.]

Date of Adoption: December 11, 2000.

Purpose: To revise chapter 16-228 WAC, rules related to the pesticide penalty matrix. The rule addresses issues and concerns raised since the implementation of the original rule in 1992. More specifically, the rules ensure a fair and uniform method when assessing civil penalties and licensing actions for violations of the laws and rules related to pesticides. The changes also simplify and provide additional clarity to the rules. Changes will also provide an increased level of deterrence.

Citation of Existing Rules Affected by this Order: Chapter 16-228 WAC, repealing WAC 16-228-1140; and amending WAC 16-228-1110, 16-228-1120, 16-228-1130, and 16-228-1150.

Statutory Authority for Adoption: Chapters 17.21 and 15.58 RCW.

Adopted under notice filed as WSR 00-21-097 on October 18, 2000.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 2, Amended 4, Repealed 1.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 2, Amended 4, Repealed 1.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 2, Amended 4, Repealed 1.

Effective Date of Rule: Thirty-one days after filing.

December 11, 2000

Director

AMENDATORY SECTION (Amending WSR 99-22-002, filed 10/20/99, effective 11/20/99)

WAC 16-228-1110 Definitions—Penalty assignment.

In addition to the definitions set forth in RCW 17.21.020, 15.58.030, and WAC 16-228-1010, the following shall apply to WAC 16-228-1100 through 16-228-1150:

(1) "Adverse effect(s)" means ~~((a)) that the alleged activity actually causes, or creates the possibility of ((pesticide exposure that could cause))~~ damage ~~((or))~~, injury or public health threat, to humans, animals, plants, property or the environment. In those situations involving a wood destroying organism inspection, adverse effects exist when the inspection has been performed in a faulty, careless or negligent manner.

(2) ~~((("Knowingly" means that the alleged violator knew or should have known that conditions existed that would result in adverse effect(s) or knew that a violation would occur.~~

~~((3)))~~ "Level of violation" means that the alleged violation is a first, second, third, fourth, ~~((fifth,))~~ or more violation(s).

(a) First violation. This means the alleged violator has committed no prior incident(s) which resulted in a violation or violations within three years of committing the current alleged violation.

(b) Second violation. This means the alleged violator committed one prior incident which resulted in a violation or violations within three years of committing the current alleged violation.

(c) Third violation. This means the alleged violator committed two prior incidents which resulted in a violation or violations within three years of committing the current alleged violation.

(d) Fourth violation. This means the alleged violator committed three prior incidents which resulted in a violation or violations within three years of committing the current alleged violation.

~~((e)) ((Fifth or more violation. This means the alleged violator committed at least four prior incidents which resulted in a violation or violations within three years of committing the current alleged violation.))~~

((4))) For purposes of calculating the level of violation, prior incidents will be measured from the date that a final order or stipulated order resolved the prior violation(s), and not from the date that the incident(s) occurred.

(3) "Not probable" means that the alleged violator's conduct more likely than not would not have an adverse effect.

~~((5)))~~ (4) "Probable" means that the alleged violator's conduct more likely than not would have an adverse effect.

~~((6)) "Unknowingly" means that the alleged violator did not act knowingly.))~~

~~((7)))~~ (5) "Violation" means commission of an act or acts prohibited by chapter 17.21 RCW, chapter 15.58 RCW, and/or rules adopted thereunder.

(6) "Civil penalty" means a monetary penalty administratively issued by a regulatory agency for noncompliance with state or federal law, or rules. The term does not include any criminal penalty, damage assessment, wages, premiums,

or taxes owed, or interest or late fees on any existing obligation.

(7) "Notice of Correction" means a document issued by the department that describes a condition or conduct that is not in compliance with chapter 15.58 or 17.21 RCW, or the rules adopted under the authority of chapter 15.58 or 17.21 RCW and is not subject to civil penalties as provided for in RCW 43.05.110. A notice of correction is not a formal enforcement action, is not subject to appeal and is a public record.

(8) "Notice of intent" means a document issued by the department that alleges specific violations of chapter 15.58 or 17.21 RCW, or any rules adopted under the authority of those chapters. A notice of intent is a formal enforcement document issued with the intent to assess civil penalties to the alleged violator and/or to suspend, deny or revoke the alleged violator's pesticide license.

Reviser's note: The typographical error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

NEW SECTION

WAC 16-228-1115 Application of RCW 43.05.100 and RCW 43.05.110—Issuance of a civil penalty without first issuing a notice of correction (1) Pursuant to RCW 43.05.100 a notice of correction may be issued by the department when they become aware of conditions and/or conduct that are not in compliance with the applicable laws and rules enforced by the department. The issuance of a notice of correction by the department shall not constitute a previous violation for purposes of WAC 16-228-1110(2), but may, at the discretion of the department, be considered as an aggravating factor for the purposes of WAC 16-228-1120(2).

(2) Prior to issuing a civil penalty for a violation of chapter 15.58 or 17.21 RCW, and the rules adopted under the authority of chapter 15.58 or 17.21 RCW the department shall comply with the requirements of RCW 43.05.110. RCW 43.05.110 provides that the department of agriculture may issue a civil penalty provided for by law without first issuing a notice of correction if: (1) The person has previously been subject to an enforcement action for the same or similar type of violation of the same statute or rule or has been given previous notice of the same or similar type of violation of the same statute or rule; or (2) compliance is not achieved by the date established by the department in a previously issued notice of correction, if the department has responded to any request for review of such date by reaffirming the original date or establishing a new date; (3) the violation has a probability of placing a person in danger of death or bodily harm, has a probability of causing more than minor environmental harm, or has a probability of causing physical damage to the property of another in an amount exceeding one thousand dollars; or (4) the violation was committed by a business that employed fifty or more employees on at least one day in each of the preceding twelve months.

AMENDATORY SECTION (Amending WSR 99-22-002, filed 10/20/99, effective 11/20/99)

WAC 16-228-1120 Calculation of penalty. (1) Median penalty selection. In the disposition of administrative cases, the department shall ~~((determine the penalty by first determining))~~ use the penalty assignment schedule ~~((table))~~ listed in ~~((either))~~ WAC 16-228-1130 ~~((or 16-228-1140 that is applied based on the type of violation alleged))~~ to determine appropriate penalties. The department shall ~~((then determine the))~~ calculate the appropriate penalty ~~((range))~~ based on the level of violation~~(s)~~ and the adverse effect~~(s)~~ or potential adverse effects at the time of the incident~~(s)~~ giving rise to the violation~~((, and the knowledge of the alleged violator))~~. The median penalty ~~((is then selected as the penalty))~~ shall be assessed unless a proportionate adjustment is ~~((required))~~ warranted and/or there are aggravating or mitigating factors ~~((as provided herein))~~ present. The median penalty ~~((under Table A))~~ as listed in WAC 16-228-1130 may be proportionately adjusted and/or aggravated to a level more than the maximum penalty listed for the violation in the penalty assignment schedule table. The median penalty under ~~((Table B listed in WAC 16-228-1140 may be proportionately adjusted and/or aggravated to a level more than the maximum penalty listed for the violation. The median penalty under Table A and B))~~ the penalty assignment schedule may not be proportionately adjusted and/or mitigated to a level less than the minimum penalty listed for the violation.

(2) Proportionate adjustment of median penalty.

(a) The department reserves the right to proportionately increase the civil penalty and proportionately decrease the licensing action ~~((when))~~ under certain circumstances ~~((in the particular case demonstrate the ineffectiveness of the licensing action as a deterrent including but not limited to violations by persons who are not licensed and violations by certified private applicator(s), or proportionately decrease the civil penalty and proportionately increase the licensing action when circumstances in the particular case demonstrate the ineffectiveness of a civil penalty action as a deterrent)).~~ Such circumstances include situations where licensing action~~(s)~~ as a deterrent are ineffective and include, but are not limited to:

(i) Violations by persons who are not licensed; and

(ii) situations where the civil penalty assessed is not substantially equivalent to the violator's economic benefit derived from the violation.

(b) The department also reserves the right to proportionately decrease the civil penalty and increase the licensing action in circumstances that demonstrate the ineffectiveness of a civil penalty as a deterrent. Nothing shall prevent the department from proportionally adjusting a licensing action to a level greater than the maximum licensing action listed in the penalty assignment schedule.

(3) Aggravating factors. The department may consider circumstances enhancing the penalty based on the seriousness of the violation~~((, including))~~. Aggravating factors include, but are not limited to, the following:

(a) ~~((Each separate additional incident of violation(s) alleged within a single notice of intent to have been committed by the alleged violator within the same calendar year.))~~

The number of separate alleged violations contained within a single notice of intent.

(b) The high magnitude of the harm, or potential harm, including quantity and/or degree, to humans, animals, plants, property or the environment caused by the violation(s).

(c) The similarity of the current alleged violation to previous violations (~~that occurred~~) committed within the last three years (~~of the current alleged violation~~).

(d) The extent to which the alleged violation is part of a pattern of the same or substantially similar conduct (~~by others which necessitates a greater deterrent factor~~).

(4) When the department determines that one or more aggravating factors are present, the department may assess the maximum penalty as listed within the level of violation or may, in its discretion, increase the penalty to a level greater than the maximum penalty, including but not limited to revocation of the license.

(5) Mitigating factors. The department may consider circumstances reducing the penalty based upon the seriousness of the violation (~~including, but~~). Mitigating factors include but are not limited to, the following:

(a) (~~A~~) Voluntary disclosure of a violation (~~by the alleged violator~~).

(b) The low magnitude of the harm, or potential harm, including quantity and/or degree, caused by the violation.

(c) Voluntary taking of remedial measures that will result in increased public protection, or that will result in a decreased likelihood that the violation will be repeated.

(6) When the department determines that one or more mitigating factors are present, the department may assess the minimum penalty for the violation from the penalty schedule.

(7) The department considers each violation to be a separate and distinct event. When a person has committed multiple violations, the violations are cumulative for purposes of calculating the appropriate penalty. Penalties are added together.

(8) Violation(s) committed during the period when an individual's license is suspended or revoked shall be subject to the maximum civil penalty of seven thousand five hundred dollars and/or revocation of the license for a period of up to five years. Violation(s) committed by unlicensed individuals are subject to the provisions of this chapter, including the penalty provision.

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

NEW SECTION

WAC 16-228-1125 Revocation and denial of licenses—Actions against licenses only. (1) The department retains the sole discretion to determine when an individual license should be revoked rather than suspended. Revocation of a license shall be an option for the department in those circumstances where:

- (a) The penalty schedule allows for revocation;
- (b) One or more aggravating factors are present; and/or
- (c) The duration of the licensure action exceeds six months.

In circumstances where the department determines revocation to be appropriate, the period of revocation shall be determined at the discretion of the department, but in no instance shall the revocation exceed five years.

(2) The department may deny an applicant a license when the applicant has committed a violation(s) of chapters 15.58 and 17.21 RCW and/or the rules adopted under those chapters. The duration of denial shall be determined based upon the penalty provisions of this chapter. In circumstances where the department determines denial to be appropriate, the period of denial shall not exceed five years.

(3) Nothing shall prevent the department from denying an applicant a license when the applicant has an outstanding civil penalty owed to the department from a previous violation(s).

(4) The department may, at its discretion, suspend a license without also seeking a civil penalty. Such circumstances include, but are not limited to, those incidents where a civil penalty is not available as an appropriate penalty pursuant to RCW 43.05.110. The appropriate period of suspension shall be determined from the penalty schedule.

AMENDATORY SECTION (Amending WSR 99-22-002, filed 10/20/99, effective 11/20/99)

WAC 16-228-1130 Penalty assignment schedule(~~—Table A~~). (~~Pesticide use, application, disposal, licensing, distribution, recommendation, and label violations~~) This assignment schedule shall be used for violations of chapter 17.21 or 15.58 RCW or chapter 16-228 WAC. (See WAC 16-228-1150 for other dispositions of alleged violations, including (~~warning letters~~) Notice of Corrections.

PERMANENT RULES
DEPARTMENT OF
RETIREMENT SYSTEMS
 [Filed December 12, 2000, 1:11 p.m.]

Date of Adoption: December 12, 2000.

Purpose: To promulgate and amend department rules in order to implement the law codified in chapters 41.34 and 41.35 RCW creating TRS Plan 3 and SERS, respectively. TRS Plan 3 became effective July 1, 1996. SERS became effective September 1, 2000.

Citation of Existing Rules Affected by this Order:

School Employees' Retirement System

CHAPTER 415-108 WAC		
AMENDED	415-108-0109	Clarifies the system acronym definitions; amended to include SERS.
AMENDED	415-108-726	Describes when and how a member can participate in PERS if concurrently employed in SERS.
AMENDED	415-108-728	Clarifies when and how a member is reported if employed in PERS and TRS. Amended to delete reference to "concurrent" in table headings. This change will avoid confusion with the PERS/SERS concurrent rule in WAC 415-113-200.
CHAPTER 415-112 WAC		
AMENDED	415-112-0167	Defines the SERS acronym.
AMENDED	415-112-130	Describes when and how a member may reestablish membership in TRS. Amended to include Plan 3.
AMENDED	415-112-135	Describes the TRS rights of an educational staff associate converted from PERS to SERS.
AMENDED	415-112-155	Clarifies when and how a member is reported if employed in PERS and TRS. Amended to delete reference to "concurrent" in table headings. This change will avoid confusion with the PERS/SERS concurrent rule in WAC 415-113-200.
AMENDED	415-112-727	Clarifies a member's retirement benefit options. Amended to include Plan 3.
CHAPTER 415-113 WAC		
AMENDED	415-113-030	Expanded the sections that the chapter covers to include the new section added for SERS concurrent employment.
AMENDED	415-113-0302	Provides a reference for the definition of SERS average final compensation.
AMENDED	415-113-0303	Clarifies the definition of dual member system. Amended to include SERS.
AMENDED	415-113-0310	Clarifies the system acronym definitions. Amended to include SERS.
AMENDED	415-113-041	Clarifies the definition of dual member. Amended to include SERS.

AMENDED	415-113-042	Clarifies when a member can terminate dual member status. Amended to include SERS.
AMENDED	415-113-065	Allows a member to substitute base salary between systems. Amended to include SERS.
AMENDED	415-113-070	Clarifies the process of delaying a dual member benefit. Amended to include SERS.
CHAPTER 415-115 WAC		
AMENDED	415-115-020	Updates the cross references for the definition of standard administrative fee.
AMENDED	415-115-090	Clarifies the systems that the maximum additional administrative fee applies to. Amended to include SERS.
CHAPTER 415-200 WAC		
AMENDED	415-200-030	Clarifies the role of the Plan 3 external administrator.
AMENDED	415-200-040	Clarifies who must pay the expenses caused by the self-directed investment program.
CHAPTER 415-110 WAC (NEW)		
This new chapter copies the rules from chapter 415-108 WAC the rules that apply specifically to the SERS membership. The intent is to copy each in part or in whole as applicable.		
NEW SECTION	415-110-010	Clarifies the location of applicable definitions.
NEW SECTION	415-110-0102	Defines the term "normally" as used in the definition of eligible position.
NEW SECTION	415-110-0103	Defines "project position."
NEW SECTION	415-110-0104	Defines the term "report."
NEW SECTION	415-110-0108	Defines the term "year."
NEW SECTION	415-110-0109	Defines the retirement system acronyms.
NEW SECTION	415-110-0110	Defines the term "reportable compensation."
NEW SECTION	415-110-0111	Defines the term "annual leave."
NEW SECTION	415-110-020	Provides the WAC reference for public record information.
NEW SECTION	415-110-030	Describes the relationship and governance rules pursuant to SERS and the statewide cities retirement system.
NEW SECTION	415-110-040	Describes the disability appeals process. Cross references appeals rules.
NEW SECTION	415-110-315	Clarifies the rules for the designation of beneficiaries upon death of a member.
NEW SECTION	415-110-320	Describes the rules determining a Plan 3 member's defined benefit eligibility.
NEW SECTION	415-110-324	Clarifies the requirements for spousal consent on member benefit selection.
NEW SECTION	415-110-326	Describes the retirement benefit options.
NEW SECTION	415-110-340	Provides the actuarial tables, schedules, and factors for calculating optional retirement allowances.

PERMANENT

NEW SECTION	415-110-400	Describes the rules for a beneficiary receiving a retirement allowance to authorize deductions for insurance premiums.
NEW SECTION	415-110-441	Describes the purpose and scope of compensation earnable rules.
NEW SECTION	415-110-443	Provides a quick reference guide in table format to reportable compensation rules.
NEW SECTION	415-110-445	Clarifies what compensation can be reported.
NEW SECTION	415-110-451	Describes salary or wages that are reportable.
NEW SECTION	415-110-453	Clarifies reportable compensation rules for performance bonuses.
NEW SECTION	415-110-455	Clarifies reportable compensation rules for compensation under a cafeteria plan.
NEW SECTION	415-110-456	Clarifies reportable compensation rules for leave payments earned over time.
NEW SECTION	415-110-457	Clarifies reportable compensation rules for retroactive salary increases.
NEW SECTION	415-110-458	Clarifies reportable compensation rules for severance pay earned over time.
NEW SECTION	415-110-459	Clarifies reportable compensation rules for payroll deductions.
NEW SECTION	415-110-463	Clarifies reportable compensation rules for payments not for services rendered.
NEW SECTION	415-110-464	Clarifies reportable compensation rules for legislative leave.
NEW SECTION	415-110-465	Clarifies reportable compensation rules for paid leave not earned over time.
NEW SECTION	415-110-466	Clarifies reportable compensation rules for union leave.
NEW SECTION	415-110-467	Clarifies reportable compensation rules for reinstatement or payment in lieu of reinstatement.
NEW SECTION	415-110-468	Clarifies reportable compensation rules for compensation authorized by statute for periods of absence due to sickness or injury.
NEW SECTION	415-110-469	Clarifies reportable compensation rules for standby pay.
NEW SECTION	415-110-470	Clarifies reportable compensation rules for nonmoney maintenance payments.
NEW SECTION	415-110-475	Clarifies reportable compensation rules for fringe benefits.
NEW SECTION	415-110-477	Clarifies reportable compensation rules for disability insurance payments.
NEW SECTION	415-110-479	Clarifies reportable compensation rules for workers' compensation payments.
NEW SECTION	415-110-480	Clarifies reportable compensation rules for vehicle use value.
NEW SECTION	415-110-482	Clarifies reportable compensation rules for illegal payments.

NEW SECTION	415-110-483	Clarifies reportable compensation rules for optional payments.
NEW SECTION	415-110-484	Clarifies reportable compensation rules for reimbursements for expenses.
NEW SECTION	415-110-485	Clarifies reportable compensation rules for vehicle allowances.
NEW SECTION	415-110-487	Clarifies reportable compensation rules for retirement bonus or incentive payments.
NEW SECTION	415-110-488	Clarifies reportable compensation rules for severance pay not earned over time.
NEW SECTION	415-110-491	Clarifies reportable compensation rules for salary imputed to periods of unpaid leave.
NEW SECTION	415-110-550	Clarifies the membership eligibility and membership application for elected officials.
NEW SECTION	415-110-560	Clarifies the membership eligibility and membership application for appointed officials.
NEW SECTION	415-110-570	Clarifies the service credit rules for elected and appointed officials.
NEW SECTION	415-110-679	Describes the purpose and scope of membership eligibility rules.
NEW SECTION	415-110-680	Clarifies the rules for determining if a person is eligible for membership.
NEW SECTION	415-110-690	Describes the process for determining eligibility.
NEW SECTION	415-110-700	Clarifies the eligibility rules for members employed in multiple ineligible positions with one employer.
NEW SECTION	415-110-710	Clarifies the rules and effects of a member returning to work after retirement.
NEW SECTION	415-110-720	Clarifies when a person can be excluded from membership when in an eligible position.
NEW SECTION	415-110-725	Clarifies the rules for a retiree from another retirement system participating in SERS.
NEW SECTION	415-110-728	Clarifies the rules for reporting a member working in TRS and SERS position during the same year.
NEW SECTION	415-110-820	Clarifies when and how an interim and final retirement benefit will be computed on an account.
NEW SECTION	415-110-830	Describes the rules for actuarial recomputation of retirement allowance upon retirement following reemployment.
NEW SECTION	415-110-910	Clarifies the rules regarding the conversion of membership from PERS to SERS.
CHAPTER 415-111 WAC (NEW CHAPTER)		
NEW SECTION	415-111-100	Clarifies who the chapter applies to.
NEW SECTION	415-111-110	Clarifies member and employer responsibilities under the defined contribution plan.

NEW SECTION	415-111-111	Clarifies the employer and member responsibility for monitoring deferral limits.
NEW SECTION	415-111-210	Describes when and how a member elects an investment program.
NEW SECTION	415-111-220	Describes when and how a member elects a contribution rate.
NEW SECTION	415-111-230	Describes how a member establishes an allocation under the self-directed program.
NEW SECTION	415-111-310	Clarifies when and how a member may withdraw from their defined contribution account.
CHAPTER 415-112 WAC		
NEW SECTION	415-112-156	Clarifies when and how a member is reported if employed in TRS and SERS.
CHAPTER 415-113 WAC		
NEW SECTION	415-113-200	Provides the definition and rules for participation as a "concurrent" member.
CHAPTER 415-112 WAC		
REPEAL	415-112-950	Same rules being added under new chapter 415-111 WAC. Therefore, these rules are duplicative and should be repealed.
CHAPTER 415-210 WAC		
REPEAL	415-210-020	Plan 3 contribution rate rules and references are added in new chapter 415-111 WAC. Therefore this rule is duplicative and should be repealed.

Statutory Authority for Adoption: Chapters 41.32, 41.34, 41.35, 41.50 RCW.

Adopted under notice filed as WSR 00-22-076 on October 31, 2000.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 69, Amended 20, Repealed 2.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 69, Amended 20, Repealed 2.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 0, Amended 5, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 0, Repealed 0.

Effective Date of Rule: Thirty-one days after filing.

December 12, 2000

John Charles
Director

AMENDATORY SECTION (Amending WSR 95-16-053, filed 7/25/95, effective 8/25/95)

WAC 415-108-0109 System acronyms—Definition.
The acronyms used in this chapter are defined as follows:

- (1) "PERS" means the public employees' retirement system.
- (2) "TRS" means the teachers' retirement system.
- (3) "SERS" means the school employees' retirement system.

AMENDATORY SECTION (Amending WSR 99-22-043, filed 10/29/99, effective 11/29/99)

WAC 415-108-726 If I accrue service credit in PERS and another retirement plan at the same time, may I participate in PERS? (1)(a) Yes. You may earn service credit in PERS and any of the following systems at the same time if:

- (i) You work for a PERS employer and an employer covered by a retirement system of the city of Seattle, Spokane or Tacoma (First Class City Retirement System); and
- (ii) You cannot report service for the First Class City Retirement System in PERS;
- (b) The combined service credit under PERS and the retirement system listed in (a) of this subsection may not exceed one month of service for a calendar month of employment.

(c) To qualify for PERS service credit, it is up to the employee to initiate the process by applying under subsection (2) of this section.

Example: A member works part time for the City of Seattle and part time for the University of Washington (UW). She may receive partial service credit in PERS for the UW service since she cannot report the time she works for Seattle under PERS.

Note: The combined service credit under PERS and the City of Seattle Retirement System may not exceed one month of service for a calendar month of employment. To receive PERS service credit she must apply to the department.

(2) How do I apply?

(a) To apply for membership and service credit under subsection (1) of this section you must send the department an application. The application is a statement that you want membership and/or service credit in PERS. Include:

- (i) Your name;
- (ii) Your SSN;
- (iii) All period(s) of service that you want to receive service credit for;
- (iv) All PERS and non-PERS employer(s) that you worked for during the periods of service referenced in (a)(iii) of this subsection.

(b) After the department receives your application, it will contact your employer(s) to verify how much service credit you have earned. When the department receives the necessary information, it will determine how much service credit you will receive. At that time the department will send you a

PERMANENT

bill for member contributions and interest that must be paid in order to establish the service credit.

(3) When should I submit my payment?

You should pay contributions and interest required under subsection (2)(b) of this section within twenty-four consecutive months from the last day of the calendar year for which you claim service credit. After that date, you must pay the actuarial cost of purchasing the service credit under RCW 41.40.104 and 41.50.165.

(4) What if I worked before this WAC became effective?

If you worked for a PERS employer and for one of the retirement systems listed in subsection (1) of this section, before this WAC became effective, you have until December 31, 2000, to apply in order to purchase service credit by paying member contributions plus interest. After December 31, 2000, you must pay the actuarial cost of purchasing the service credit under RCW 41.40.104 and 41.50.165.

(5) You may participate in PERS if you are concurrently employed, as described in WAC 415-113-200, in a SERS position.

(6) Defined terms used. Definitions for the following terms used in this section may be found in the sections listed.

- (a) "Membership" - RCW 41.40.023.
- (b) "Retirement plan" - WAC 415-108-0105.
- (c) "Service" - RCW 41.40.010.
- (d) "Normally" - WAC 415-108-0102.

AMENDATORY SECTION (Amending WSR 95-16-053, filed 7/25/95, effective 8/25/95)

WAC 415-108-728 If I work in both a PERS position and TRS position during the same school year, which system will I be in? (1) If you work in both a PERS and TRS position during the same year, your membership status and the nature of your positions will determine the system your employer will report you in. You will be reported in either PERS or TRS according to the following table:

Former TRS Plan ((4)) 1 Members 1/

Type of ((Concurrent)) Employment 2/	Type of Employer(s)	System You Will Be Reported In
A substitute or less than full-time teaching position and a PERS-eligible position	Same employer	PERS - for both positions.
	Separate TRS employers	PERS - for PERS position only. Your substitute part-time position is not reported unless you qualify for and elect to establish TRS membership under RCW 41.32.240. If you elect to establish TRS membership, your employers will report you in TRS for both positions. Any previously reported service credit and compensation in PERS will be transferred to TRS.
	A TRS employer and non-TRS employer	PERS - for PERS position only. Your substitute part-time position is not reported unless you qualify for and elect to establish TRS membership under RCW 41.32.240. If you elect to establish TRS membership, you must elect either to: 1. Have your TRS service reported in PERS and receive service credit in PERS for both positions; or 2. Have your TRS service reported in TRS and not receive service credit for the PERS position.
A full-time teaching position and an eligible PERS position	Same employer	TRS - for both positions.
	Separate TRS employers	TRS - for both positions.
	A TRS employer and non-TRS employer	You must elect to: 1. Have your TRS service reported in PERS and receive service credit in PERS for both positions; or 2. Have your TRS service reported in TRS and not receive service credit for the PERS position.

PERMANENT

TRS Plan ((F)) 1 Members

Type of ((Concurrent)) Employment ^{2/}	Type of Employer(s)	System You Will Be Reported In
A full-time or less than full-time TRS position and an eligible PERS position	Same employer	TRS - for both positions.
	Separate TRS employers	TRS - for both positions.
	A TRS employer and non-TRS employer	You must elect either to: 1. Have your TRS service reported in PERS and receive service credit in PERS for both positions; or 2. Have your TRS service reported in TRS and not receive service credit for PERS position.
A full-time or less than full-time TRS position and an ineligible PERS position	Same employer	TRS - for both positions.
	Separate TRS employers	TRS - for both positions.
	A TRS employer and non-TRS employer	TRS - for the TRS position only; your ineligible PERS position is not reportable.

TRS Plan ((H)) 2 Members

Type of ((Concurrent)) Employment ^{2/}	Type of Employer(s)	System You Will Be Reported In
An eligible TRS position and an ineligible PERS position	Same employer	TRS - for both positions.
	Separate TRS employers	TRS - for TRS position only; your ineligible PERS position is not reported.
	A TRS employer and non-TRS employer	TRS - for TRS position only; your ineligible PERS position is not reported.
An eligible TRS position and an eligible PERS position	Same employer	TRS - for both positions.
	Separate TRS employers	TRS - for both positions. ^{3/}
	A TRS employer and non-TRS employer	You must elect either to: 1. Have your TRS service reported in PERS and receive service credit in PERS for both positions; or 2. Have your TRS service reported in TRS and not receive service credit for the PERS position.

PERMANENT

PERS Members

Type of ((Concurrent)) Employment ^{2/}	Type of Employer(s)	System You Will Be Reported In
An eligible PERS position and an ineligible TRS or substitute position	Same employer	PERS - for both positions.
	Separate TRS employers	PERS - for the PERS position only, unless you qualify for and elect to establish membership in TRS at the end of the school year under WAC 415-112-125(1). If you elect to establish TRS membership, your employers will report you in TRS for both positions. Any previously reported service credit and compensation in PERS will be transferred to TRS.
	A TRS employer and non-TRS employer	PERS - for the PERS position only. You will not be reported for the TRS position unless you elect to either: 1. Have your TRS service reported in PERS and receive service credit in PERS for both positions; or 2. Have your TRS service reported in TRS and not receive service credit for the PERS position.

Neither TRS Nor PERS Member

Type of ((Concurrent)) Employment ^{2/}	Type of Employer(s)	System You Will Be Reported In
An ineligible TRS and an ineligible PERS position	Same employer	TRS - for both positions if the positions combined, qualify as an eligible position.
	Separate employers, TRS or non-TRS	Neither position reported.
A substitute teaching position and an ineligible PERS position	Same employer	Neither position reported. However, if you qualify, you may elect to establish membership in TRS at the end of the school year for your substitute teaching position under RCW 41.32.013 and WAC 415-112-140.
	Separate employers, TRS or non-TRS	Neither position reported. However, if you qualify, you may elect to establish membership in TRS at the end of the school year for your substitute teaching position under RCW 41.32.013 and WAC 415-112-140.

PERMANENT

^{1/} "Former TRS ((H)) 1 member", as used here, means you terminate your membership by withdrawing your contributions.

^{2/} ((~~Concurrently~~)) Means during the same school year.

^{3/} EXAMPLE: A TRS ((H)) 2 member teaches in an eligible position and during the summer, she works for a state agency in an eligible position under PERS. Because the member has established membership in TRS ((H)) 2 through employment as a teacher, her state agency employer must report her service and compensation from the PERS position to the Department in TRS ((H)) 2.

EXAMPLE: A TRS ((H)) 2 member is employed concurrently by School District A in an eligible TRS position and by School District B in an eligible PERS position. Because he is a TRS ((H)) 2 member, School District B employer must report his service and compensation from the PERS position to the Department in TRS ((H)) 2. If the member terminates his employment in the TRS position with School District A, School District B will report him in PERS for the PERS position.

(2) **Defined terms used.** Definitions for the following terms used in this section may be found in the sections listed.

- (a) "Eligible position" - RCW 41.40.010.
- (b) "Employer" - RCW 41.40.010 (PERS); RCW 41.32.010 (TRS).
- (c) "Ineligible position" - RCW 41.40.010.

- (d) "Member" - RCW 41.40.010.
- (e) "Membership" - RCW 41.40.023.
- (f) "Report" - WAC 415-108-0104
- (g) "Service" - RCW 41.40.010.

Chapter 415-110 WAC

tently apply this twelve-month period to evaluate the eligibility of this position.

SCHOOL EMPLOYEE'S RETIREMENT SYSTEM

DEFINITIONS

NEW SECTION

WAC 415-110-010 Definitions. All definitions in RCW 41.35.010 apply to terms used in this chapter. Other terms relevant to the administration of chapter 41.35 RCW are defined in this chapter.

NEW SECTION

WAC 415-110-0102 Normally—Definition. "Normally," as used in the definition of eligible position under RCW 41.35.010, means a position is eligible if it is expected to require at least five months of seventy or more hours of compensated service each month during each of two consecutive years. Once a position is determined to be eligible, it will continue to be eligible if it requires at least five months of seventy or more hours of compensated service during at least one year in any two-year period.

NEW SECTION

WAC 415-110-0103 Project position—Definition. "Project position" means a position established by an employer that has a specific goal and end date.

NEW SECTION

WAC 415-110-0104 Report—Definition. "Report" means an employer's reporting of an employee's hours of service, compensation and contributions to the department on the monthly transmittal report.

NEW SECTION

WAC 415-110-0108 Year—Definition. "Year" means any twelve consecutive month period established and applied consistently by an employer to evaluate the eligibility of a specific position. The term generally will be limited to a school year.

Example: An employer has used the twelve consecutive month period from September 1 to August 31 to evaluate the eligibility of positions. When the employer hires a new employee to fill an existing position, the employer must continue to use the September 1 through August 31 period to define a year for the position.

Example: If the same employer in the above example hires a person to work in a project position beginning in November, the employer will use the twelve-month period beginning in November to evaluate the eligibility of the new position. The employer must consis-

NEW SECTION

WAC 415-110-0109 System acronyms—Definition. The acronyms used in this chapter are defined as follows:

- (1) "PERS" means the public employees' retirement system.
- (2) "TRS" means the teachers' retirement system.
- (3) "SERS" means the school employees' retirement system.

NEW SECTION

WAC 415-110-0110 Reportable compensation—Definition. "Reportable compensation" means compensation earnable as that term is defined in RCW 41.35.010.

NEW SECTION

WAC 415-110-0111 Annual leave—Definition. "Annual leave" means leave provided by an employer for the purpose of taking regularly scheduled work time off with pay. Annual leave does not include leave for illness, personal business if in addition to and different than vacation leave, or other paid time off from work: Provided, however, That if an employer authorizes only one type of leave to provide paid leave for vacation and illness as well as any other excused absence from work, such leave will be considered annual leave for purposes of RCW 41.50.150.

ADMINISTRATION

NEW SECTION

WAC 415-110-020 Public records. See chapter 415-06 WAC.

NEW SECTION

WAC 415-110-030 Statewide cities retirement system. Pursuant to RCW 41.35.130, the statutes and rules applying to the school employees' retirement system and the department of retirement systems (as provided in chapters 41.35 and 41.50 RCW and Title 415 WAC) govern the administration and operation of the former statewide cities retirement system.

NEW SECTION

WAC 415-110-040 Appeals—Disability cases: Appeals will be governed by the provisions of chapter 415-08 WAC as now existing or hereafter amended.

Any person aggrieved by any final decision must, before he/she appeals to a superior court, file a notice of appeal with the director personally or by mail, within sixty days from the date such decision was communicated to such person. The notice of appeal must contain the information required by WAC 415-08-020 as now existing or hereafter amended.

PERMANENT

BENEFIT OPTIONS**NEW SECTION**

WAC 415-110-315 Designation of beneficiaries—Death benefit if a member dies before retirement. This section applies to Plan 2 members' defined benefit or Plan 3 members' defined contribution distribution.

(1) As a member, you have the right to designate a beneficiary or beneficiaries to receive a benefit in the event of your death while you are an active member. You may change your beneficiary designation at any time by filing a change of beneficiary form with the department.

(2) You may name:

(a) An organization or person, including your unborn or later adopted children. Unborn or later adopted children will not be included unless you specifically designate them as beneficiaries on the form. You must state the date of birth for any living person you name as a beneficiary;

(b) Your estate;

(c) A trust in existence at the time of death. Before making distribution to any trust the department must receive:

(i) A copy of the trust document;

(ii) The name, address, telephone number of the current trustee; and

(iii) The tax identification number;

(d) A trust to be established under your last will.

(3) You may name contingent beneficiaries in addition to primary beneficiaries.

Examples:**EXAMPLE ONE.****Facts**

John, a member, completes a beneficiary designation form.

In the place on the form reserved for persons, he names his daughter Ann. He checks the box to indicate that Ann is a primary beneficiary.

In the place on the form reserved for trust/organizational beneficiaries, he lists the "Barbara Trust." His daughter Barbara is the trust beneficiary. He checks the box to indicate that the trust is a primary beneficiary.

Result

Subject to applicable statute, at John's death, the department will consider both the Barbara Trust and daughter Ann as primary beneficiaries. The department will require the name of the trustee, the tax identification number, a copy of the trust and other information specified in this rule before distribution to the trust.

EXAMPLE TWO.**Facts**

John, a member, completes a beneficiary designation form.

In the place on the form reserved for persons, he names his daughter Ann. He checks the box to indicate that Ann is a primary beneficiary.

In the place on the form reserved for trust/organizational beneficiaries, he lists his daughter Barbara personally (no trust name is provided). He checks the box labeled "primary beneficiary." John misunderstands the form and rather than provide the names of the trustee or trust administrator, John writes the word "both" in the blank provided.

Result

At John's death, the department learns that John has created no trusts. Subject to existing statute, if the department receives no notice of competing claims to John's death benefit, the department will distribute the death benefit to Ann. If the department receives notice of competing claims, a court resolution may be required.

NEW SECTION

WAC 415-110-320 Determining SERS Plan 3 defined benefit retirement eligibility. This WAC provides eligibility terms for retirement from the defined benefit component of SERS Plan 3.

(1) Definition. Qualified service credit—For purposes of this section, the following types of service credit may be used to qualify for retirement:

(a) SERS Plan 3 service credit;

(b) Service credit earned in a dual member system, but only in combination with SERS Plan 3 service credit (chapter 41.54 RCW); or

(c) Up to forty-five days of sick leave (RCW 41.35.010).

(2) Members must be age 65 to retire with an unreduced defined benefit. SERS Plan 3 members can retire with an unreduced defined benefit at age 65 if they have accumulated the following amounts of qualified service credit:

(a) Ten service credit years;

(b) Five service credit years, including twelve service credit months after attaining age 54; or

(c) Five service credit years by September 1, 2000, under Plan 2.

(3) Members may retire with a reduced benefit after attaining age 55. A SERS Plan 3 member who has attained age 55 may retire with an actuarially reduced defined benefit (RCW 41.35.680) if they have accumulated at least ten years of qualified service credit.

(4) Members may use only qualified service credit to receive a retirement benefit from the SERS Plan 3 defined benefit component.

(5) To be eligible to receive a retirement benefit, SERS Plan 3 members must:

(a) Submit a completed, signed, and notarized SERS Plan 3 retirement application; and

(b) Terminate employment with all retirement system employers from which they are claiming service credit. Termination from non-SERS system employers is required in cases where a member is using dual member rules to qualify for retirement (chapter 41.54 RCW).

NEW SECTION

WAC 415-110-324 Married member's benefit selection—Spousal consent required. (1) The member, if mar-

ried, must provide the spouse's written consent to the option selected under WAC 415-110-326. If a married member does not provide spousal consent, the department will pay the retired member a joint and one-half survivor benefit allowance and record the member's spouse as the survivor in compliance with chapter 41.35 RCW and RCW 41.35.220(2).

(2) Spousal consent is not needed to enforce a marital dissolution order requiring the department to pay an exspouse under RCW 41.50.790.

(3) "Spousal consent" means that the married member's spouse consents to the retirement option selected by the member. The spouse's notarized signature on a completed retirement application constitutes spousal consent.

NEW SECTION

WAC 415-110-326 Retirement benefit options. RCW 41.35.220 enables the department to provide retiring members with four retirement benefit options. The retiring member must choose an option(s) when applying for service or disability retirement:

(1) Option one (standard allowance). The department will pay a monthly retirement allowance based solely on the single life of the member, as provided by RCW 41.35.220, 41.35.440, or 41.35.690. When the retiree dies all benefits cease. Any remaining balance of the retiree's accumulated contributions will be paid to:

- (a) The retiree's designated beneficiary; or if none, to
- (b) The retiree's surviving spouse; or if none, to
- (c) The retiree's legal representative.

The member must designate a beneficiary at the time of retirement by filing a completed and notarized form provided by the department.

(2) Benefit options with a survivor feature. A retiring member is allowed to select from several retirement options which create an actuarially equivalent benefit that includes a survivor feature. The survivor feature entitles the survivor to receive a monthly allowance after the retiree dies. If the member chooses one of the survivor options, the monthly benefit the member will receive is actuarially reduced to offset the cost of the survivor feature. After the retiree dies, the department pays the survivor an allowance for the duration of his or her life. If the retiree and the survivor both die before the retiree's accumulated contributions are exhausted, the remaining balance is retained in the retirement fund.

Once retired with a survivor option, the retiree may only change the survivor option upon returning to eligible employment for two consecutive years.

(a) Option two (joint and whole allowance). When the retiree dies, the department pays the survivor an allowance equal to the gross monthly allowance received by the retiree.

(b) Option three (joint and one-half allowance). When the retiree dies, the department pays the survivor an allowance equal to one-half of the retiree's gross monthly retirement allowance.

(c) Option four (joint and two-thirds allowance).

(i) This subsection applies to members retiring on or after January 1, 1996.

(ii) When the retiree dies, the department pays the survivor an allowance equal to two-thirds (66.667%) of the retiree's gross monthly retirement allowance.

(3) If a member retires on or after June 6, 1996, the department is required to pay an exspouse survivor benefits pursuant to a marital dissolution order that complies with RCW 41.50.790.

(4) **Benefit increases when survivor predeceases retiree (pop-up provision).**

(a) This section applies to members retiring on or after January 1, 1996, who select option two, three, or four.

(b) If the survivor dies before the retiree, the retiree's monthly retirement allowance increases, effective the first day of the following month, to:

(i) The amount that would have been received had the retiree chosen option one; plus

(ii) Any cost-of-living adjustments the retiree received prior to the survivor's death based on the original option selection.

(c) Pop-up recalculation examples.

Plan two:

Agnes retires from SERS Plan 2 in 2006 (Year 0). Agnes would like Beatrice, her daughter, to receive a monthly allowance after Agnes dies. Therefore, Agnes selects a retirement benefit option with a survivor feature. As a result, her monthly allowance is reduced from \$2,000 (standard allowance) to \$1,750. Unfortunately, Beatrice dies in 2011 (Year 5). Under the "pop-up" provision, Agnes' monthly benefit will increase to \$2,191.05, the amount she would have received had she chosen option one (standard allowance) plus her accumulated COLAs:

Year	Option One (Standard Allow.)	Survivor Option (2, 3, 4) plus COLAs	COLA incr. (3% max)	\$ Increase
0 (2006)	2,000.00	1,750.00	(ineligible)	0.00
1 (2007)		1,750.00	.02	35.00
2 (2008)		1,785.00	.03	53.55
3 (2009)		1,838.55	.025	45.96
4 (2010)		1,884.51	.03	56.54
5 (2011)	2,000.00	1,941.05	-	-
			Total COLAs	191.05
Original Option One Benefit Amount \$2000		+ Total COLAs + \$191.05		= New Benefit Amount = \$2,191.05*

PERMANENT

* In the future (i.e. Year 4), COLAs will be based on the increased benefit amount.

(d) If the survivor dies and the retiree's benefit increases under this section, and thereafter the retiree also dies before all contributions are exhausted, the remaining balance is retained by the retirement fund.

(5) Any retiree who retired before January 1, 1996, and who elected to receive a reduced retirement allowance under subsection (2) of this section is entitled to receive a retirement allowance adjustment if the retiree meets the following conditions:

(a) The retiree's designated beneficiary predeceases or has predeceased the retiree; and

(b) The retiree provides to the department proper proof of the designated beneficiary's death. The retiree is not required to apply for the increased benefit provided by this subsection.

The adjusted retirement allowance will be effective on July 1, 1998, or the first of the month following the date of death of the designated beneficiary, whichever comes last. The adjustment is computed as described in RCW 41.35.220 (3)(c) for Plan 2 retirees.

(6) **Survivor.** For the purposes of this provision, "survivor" means a person nominated by the member to receive a monthly benefit allowance after the member dies. A member nominates the survivor at the time of retirement by filing a completed and notarized form provided by the department.

NEW SECTION

WAC 415-110-340 Actuarial tables, schedules, and factors. This chapter contains the tables, schedules, and factors adopted by the director of the department of retirement systems for calculating optional retirement allowances of members of the Washington state school employees' retirement system. These tables, schedules, and factors were adopted by the director upon the recommendation of the state actuary based on the actuary's investigation into the mortality, service, compensation, and other experience of the members and beneficiaries of school employees' retirement system. The tables, schedules, and factors contained in this chapter shall govern the retirement allowances only of members retiring during the period from September 1, 2000, until such time as these tables, schedules, and factors are amended by the director following the next actuarial investigation conducted by the state actuary. Any new tables, schedules, and factors adopted by the director in the future shall govern retirement allowances calculated at the time of retirement only of members retiring after the adoption of such new tables, schedules, and factors.

NEW SECTION

WAC 415-110-400 Retirement allowance deduction for payment of insurance premiums. (1) Definitions. Unless a different meaning is plainly required by the context:

(a) "Group life insurance policy or plan" means a contract of group life insurance issued by an insurance carrier authorized to do business in the state of Washington which meets one of the group requirements set forth in chapter 48.24 RCW;

(b) "Group disability insurance policy or plan" means a group disability insurance contract issued by an insurance carrier authorized to do business in the state of Washington which meets the requirements of chapter 48.21 RCW, and the term shall also include a group health care service contract as issued pursuant to, and regulated by, the provisions of chapter 48.40 RCW.

(2) **Scope.** Any beneficiary of a retirement allowance payable for service or disability under the provisions of chapter 41.35 RCW may authorize the director to deduct from his or her retirement allowance, on a monthly basis only, the premiums on any group life or disability insurance policy or plan

currently covering the beneficiary, issued to the employer by which the retiree was employed prior to retirement. The department and the director are not and will not be liable for any failure to make such deduction payments on time or in the proper amount.

(3) **Procedure.** Any beneficiary, who desires to authorize a retirement allowance deduction as provided by this section, shall notify the department of his or her intention in writing at least thirty days prior to the date that the first deduction is to be made and shall file with the department a formal authorization on such form as may be provided by the department.

(4) **Revocability.** You must submit to the department an express written statement of revocation to revoke an authorization for a retirement allowance deduction for payment of insurance premiums under this section. Such a revocation shall be applicable to the first retirement allowance deduction which would otherwise be made at the end of the calendar month following the month in which the statement of revocation is filed.

REPORTABLE COMPENSATION

NEW SECTION

WAC 415-110-441 Purpose and scope of compensation earnable rules. WAC 415-110-443 through 415-110-488 codify the department's existing interpretation of statutes and existing administrative practice regarding classification of payments as compensation earnable in SERS Plan 2 and SERS Plan 3. The department has applied and will apply these rules to determine the proper characterization of payments occurring prior to the effective dates of these sections.

NEW SECTION

WAC 415-110-443 Reportable compensation table. The following table is provided as a quick reference guide to help you characterize payments under SERS Plan 2 and SERS Plan 3. Be sure to turn to the referenced rule to ensure that you have correctly identified the payment in question. The department determines compensation earnable based upon the nature of the payment, not the name applied.

Type of Payment	SERS Plan 2 and Plan 3 Reportable Compensation
Annual Leave Cash Outs	No - WAC 415-110-456
Assault Pay	No - WAC 415-110-468
Base Rate	Yes - WAC 415-110-451
Car Allowances	No - WAC 415-110-485
Cafeteria Plans	Yes - WAC 415-110-455
Deferred Wages	Yes - WAC 415-110-459
Disability Payments	No - WAC 415-110-477
Disability Retirees	No - RCW 41.35.440/RCW 41.35.690 (until requirements are met)

Disability: Salary lost while on disability leave	Yes - WAC 415-110-468 RCW 41.35.070
Employer Provided Vehicle	No - WAC 415-110-480
Employer Contributions	No - WAC 415-110-459
Fringe Benefits	No - WAC 415-110-475
Illegal Payments	No - WAC 415-110-482
Legislative Leave	Yes - WAC 415-110-464
Longevity/Education Attainment Pay	Yes - WAC 415-110-451
Nonmoney Maintenance	No - WAC 415-110-470
Optional Payments	No - WAC 415-110-483
Payments in Lieu of Excluded Items	No - WAC 415-110-463
Performance Bonuses	Yes - WAC 415-110-453
Retroactive Salary Increase	Yes - WAC 415-110-457
Reimbursements	No - WAC 415-110-484
Reinstatement Payments	Yes - WAC 415-110-467
Retirement or Termination Bonuses	No - WAC 415-110-487
Severance Pay - Earned Over Time	No - WAC 415-110-458
Severance Pay - Not Earned Over Time	No - WAC 415-110-488
Shared Leave - School/ESD Employees	Yes - WAC 415-110-468
Sick Leave Cash Outs - School/ESD Employees	No - WAC 415-110-456
Standby Pay	Yes - WAC 415-110-469
Time Off With Pay	Yes - WAC 415-110-456 WAC 415-110-465
Union Leave	Yes - WAC 415-110-466''
Worker's Compensation	No - WAC 415-110-479

'' Only specific types of union leave are reportable. See WAC 415-110-466.

NEW SECTION

WAC 415-110-445 What compensation can be reported? In order for payments to be subject to retirement system contributions and included in the calculation of a member's retirement benefit, those payments must meet the definition of compensation earnable in RCW 41.35.010.

(1) **Payments for personal services rendered.** To determine whether a payment meets this definition and can be reported, ask the following questions:

(a) Was the payment earned as a salary or wage for personal services rendered during a fiscal year? If the answer is no, the payment is not reportable. If the answer is yes, ask question (b).

(b) Was the payment paid by an employer to an employee? If the answer is no, the payment is not reportable. If the answer is yes, report the payment.

PERMANENT

(2) **Payments included that are not for personal services rendered.** The legislature has included certain specific payments within the definition of compensation earnable even though those payments are not for personal services rendered by the employee to the employer. (See WAC 415-110-464 through 415-110-469.)

(3) **Reportable compensation is earned when the service is rendered, rather than when payment is made.**

Example: If a member works during September but does not receive payment for the work until October, the reportable compensation was earned during September and must be reported to the department as September earnings.

(4) **Salary characterizations are based upon the nature of the payment.** A payment is reportable compensation if it meets the criteria of subsection (1) or (2) of this section. The name given to the payment or the document authorizing it is not controlling in determining whether the payment is reportable compensation. The department determines whether a payment is reportable compensation by considering:

(a) What the payment is for; and

(b) Whether the reason for the payment brings it within the statutory definition of compensation earnable.

Example: A payment conditioned upon retirement is not reportable compensation. Attaching the label "longevity" to the payment does not change the fact that the payment is conditioned on retirement. Such a payment is not for services rendered and will not be counted as reportable compensation despite being identified by the employer as a longevity payment.

(5) **Differences in reportable compensation between plans.** WAC 415-110-445 through 415-110-488 define reportable compensation for each of the two SERS plans. The characterization of payments as reportable compensation or not reportable compensation in WAC 415-110-455 through 415-110-488 is the same for both SERS Plan 2 and SERS Plan 3.

NEW SECTION

WAC 415-110-451 Salary or wages. Most employees receive a base rate of salary or wages expressed as an hourly or monthly rate of pay. This payment is for services rendered and qualifies as reportable compensation. Two possible components of an employee's base rate are salary considerations based on longevity or educational attainment.

(1) A member who receives a salary increase based upon longevity or educational attainment receives a higher salary without working more hours. The higher salary indicates a higher level of performance due to greater experience or more education. The payment is therefore a payment for personal service and is reportable compensation.

(2) Simply attaching the label "longevity" to a payment does not guarantee that it will be reportable compensation. If

a payment described as a longevity payment is actually based upon some other criteria, such as retirement or notification of intent to retire, the payment may not be reportable.

NEW SECTION

WAC 415-110-453 Performance bonuses. Bonuses that are based upon meeting certain performance goals are earned for services rendered and are reportable compensation. If a bonus was earned over a specified period of time, it should be prorated for reporting purposes.

Example: An employer pays each employee in the work group an additional \$100 if the work group had no work related accidents in the preceding year. Remaining accident free is a performance goal. Therefore, the payment is for services rendered and qualifies as reportable compensation. The bonus should be prorated over each of the preceding twelve months during which it was earned.

NEW SECTION

WAC 415-110-455 Cafeteria plans. Compensation received in any form under the provisions of a "cafeteria plan," "flexible benefits plan," or similar arrangement pursuant to section 125 of the United States Internal Revenue Code is reportable compensation if the employee has an absolute right to receive cash or deferred cash payments in lieu of the fringe benefits offered. In such an instance, the fringe benefits are being provided in lieu of cash and are considered reportable compensation, just as the cash would be. If there is no cash option, the value of the fringe benefit is not a salary or wage and is not reportable compensation, see WAC 415-110-475.

NEW SECTION

WAC 415-110-456 Leave payments earned over time. (1) **Sick and annual leave usage.** Sick leave and annual leave is accumulated over time and paid to a person during a period of excused absence. Leave accrues at a prescribed rate, usually a certain number of hours per month. The employee earns a leave day by rendering service during the month the leave accrued. When the employee uses his or her accrued leave by taking a scheduled work day off with pay, the payment is deferred compensation for services previously rendered. The payment is a salary or wage earned for services rendered and is reportable.

(2) **Annual leave cash outs.** Annual leave cash outs are not reportable compensation for SERS Plan 2 and SERS Plan 3 members. Although annual leave cash outs, like payments for leave usage, are deferred compensation earned for services previously rendered, they are excluded from the definition of compensation earnable by statute, see RCW 41.35.010 (6)(a).

(3) **Sick leave cash outs.** Sick leave cash outs are excluded from the definition of compensation earnable for SERS Plan 2 and SERS Plan 3 members by statute.

Sick leave cash outs are excluded from reportable compensation for:

- (i) School district employees by RCW 28A.400.210; and
- (ii) Educational service district employees by RCW 28A.310.490. See RCW 41.35.010 (6)(a).

NEW SECTION

WAC 415-110-457 Retroactive salary increases. A retroactive salary payment to an employee who worked during the covered period is a payment of additional salary for services already rendered.

Note: A retroactive salary increase is not the same as a retroactive payment upon reinstatement or in lieu of reinstatement of a terminated or suspended employee. For treatment of back payments for periods where services were not rendered, see WAC 415-110-467.

(1) To qualify as reportable compensation under this section, the payment must be a bona fide retroactive salary increase. To ensure that is the case, the retroactive payment must be made pursuant to:

(a) An order or conciliation agreement of a court or administrative agency charged with enforcing federal, state, or local statutes, ordinances, or regulations protecting employment rights;

(b) A bona fide settlement of such a claim before a court or administrative agency;

(c) A collective bargaining agreement; or

(d) Action by the personnel resources board which expressly states the payments are retroactive.

(2) The payments will be deemed earned in the period in which the work was done.

NEW SECTION

WAC 415-110-458 Severance pay earned over time. All forms of severance pay are excluded from earnable compensation and are not reportable for Plan 2 or Plan 3 by RCW 41.35.010 (6)(a).

NEW SECTION

WAC 415-110-459 Payroll deductions. Salary or wages for services rendered that are withheld from a member's pay still qualify as reportable compensation.

(1) **Retirement contributions.** Payments deducted from employee compensation for employee retirement contributions are reportable. Employer contributions are a fringe benefit and are not reportable, see WAC 415-110-475.

(2) **Tax withholding.** Payments withheld to satisfy federal tax obligations qualify as reportable compensation.

(3) **Voluntary deductions.** Payments deducted voluntarily, such as I.R.C. section 457 plan contributions or other authorized deductions, are reportable.

NEW SECTION

WAC 415-110-463 Payments not for services rendered. In general, payments cannot be reported to the retirement system unless they are for services rendered. However, the legislature has identified some types of compensation which are reportable even though they are not for services rendered.

(1) WAC 415-110-464 through 415-110-469 discuss all payments that are not for services rendered that nonetheless qualify as reportable compensation.

(2) WAC 415-110-475 through 415-110-488 discuss some payments that are not a salary or wage for services rendered and so do not qualify as reportable compensation. A payment not for services rendered other than those identified in WAC 415-110-464 through 415-110-469 is not reportable compensation even if it is not listed in WAC 415-110-475 through 415-110-488.

(3) A payment made in lieu of a payment that is not for services rendered (such as a payment made in lieu of a car allowance) will be treated in the same way that the original payment was treated. Such a payment is not for services rendered and is not reportable.

NEW SECTION

WAC 415-110-464 Legislative leave. If a SERS member takes a leave without pay from an eligible position to serve in the legislature, the member may elect to participate in SERS as a legislator.

(1) The employee may choose between:

(a) The reportable compensation he or she would have earned had the member not served in the legislature; or

(b) The actual reportable compensation for nonlegislative public employment and the legislative service combined.

(2) If the member selects option (a) of this subsection, he or she is responsible for paying the additional employer and employee contributions to the extent the reportable compensation reported is higher than it would have been under (b) of this subsection.

NEW SECTION

WAC 415-110-465 Paid leave not earned over time. If paid leave is not based upon earned leave accumulated over time, the payment is not a deferred payment for services previously rendered. Further, the member on leave is not currently rendering services in exchange for the payment. However, RCW 41.35.470 and 41.35.650 identify payments received from the employer while on paid leave as reportable for SERS. Contributions are due on these payments to the extent they meet the following conditions:

(1) The payment is equal to the salary for the position that the person is on leave from;

(2) The payment is actually from the employer. Payments from an employer that are conditioned upon reimbursement from a third party are payments from the third party. Because the payments are not from the employer, they are not reportable compensation. The only exception is union leave paid by the employer subject to reimbursement from

the union under the conditions specified in RCW 41.35.470 (Plan 2) and RCW 41.35.650 (Plan 3) and WAC 415-110-466.

NEW SECTION

WAC 415-110-466 Union leave. If a member takes an authorized leave of absence to serve as an elected official of a labor organization and the employer pays the member on leave subject to reimbursement from the union, the person's pay qualifies as reportable compensation provided that all the conditions of RCW 41.35.470 (Plan 2) and RCW 41.35.650 (Plan 3) as appropriate, are met.

NEW SECTION

WAC 415-110-467 Reinstatement or payment in lieu of reinstatement. If an employer makes payments to an employee for periods where the employee was not employed and those payments are made upon reinstatement of the employee or in lieu of reinstatement, the payments are not earned for services rendered. However, RCW 41.35.010(6) specifically designates such payments as reportable compensation. The payments are only reportable to the extent that they are equivalent to the salary the employee would have earned had he or she been working.

NEW SECTION

WAC 415-110-468 Compensation authorized by statute for periods of absence due to sickness or injury. Compensation that a member receives for periods of absence due to sickness or injury are not payments for services rendered unless the payments are authorized pursuant to sick leave earned by the member for services rendered, see WAC 415-110-456. Certain specific types of payments for periods of absence due to sickness or injury have been included within the statutory definition of compensation earnable and therefore qualify as reportable compensation.

(1) **Assault pay** qualifies as reportable compensation only to the extent authorized by RCW 27.04.100, 72.01.045, and 72.09.240.

(2) **Imputed compensation for periods of duty disability** that a member would have received but for a disability occurring in the line of duty qualify as reportable compensation only to the extent authorized by RCW 41.35.070.

(3) **Shared leave.**

(a) Compensation that an employee, as defined in RCW 41.04.655, receives due to participation in a leave sharing program to the extent authorized by RCW 41.04.650 through 41.04.670 qualifies as reportable compensation.

(b) Shared leave payments received by members who are not state employees, do not qualify as reportable compensation. Such payments are not for services rendered, nor are they specifically included within the statutory definition of compensation earnable.

NEW SECTION

WAC 415-110-469 Standby pay. Some employers pay employees for being on "standby." A member is on standby when not being paid for time actually worked and the employer requires the member to be prepared to report immediately for work if the need arises, although the need may not arise. Because the member is not actually working, the member is not rendering service. However, RCW 41.35.010(6) specifically identifies standby pay that meets the above requirements as reportable compensation. Although included in the definition of compensation earnable, time spent on standby is excluded from the definition of "service," see RCW 41.35.010(7).

NEW SECTION

WAC 415-110-470 Nonmoney maintenance. Are payments from my employer in any form other than money considered compensation earnable? If you are a SERS Plan 2 or Plan 3 member, you are not entitled to count the value of any nonmoney maintenance compensation you receive from your employer as compensation earnable.

NEW SECTION

WAC 415-110-475 Fringe benefits. Payments made by an employer to a third party to provide benefits for an employee are not part of the employee's salary or wage. Those payments are not reportable compensation. Examples of these types of payments are insurance premiums (other than those made under bona fide cafeteria plans, see WAC 415-110-455) and matching and nonmatching employer contributions to a benefit plan.

Note: Mandatory salary deferrals are salary, not benefits. Such payments are reportable, see WAC 415-110-459.

Example: An employer makes matching payments to employees who participate in a deferred compensation plan. This is not a mandatory salary deferral for purposes of SERS reportable compensation. Since the employer matching payment (employer match) is made contingent upon employee plan participation, it is not payment for services rendered. Therefore, it is a fringe benefit that is not reportable compensation under SERS.

NEW SECTION

WAC 415-110-477 Disability insurance. Disability insurance payments are paid to persons for periods when they are unable to work. Because no services are rendered in exchange for these payments, they are not reportable compensation. This is true whether the payments come directly from the employer or from an insurance company.

NEW SECTION

WAC 415-110-479 Workers' compensation. Workers' compensation is paid to persons for periods when they are unable to work. Workers' compensation payments, like disability insurance, are not payments for services rendered and are not reportable compensation.

Example: Some employees on unpaid disability leave submit their workers' compensation payments to their employer who then issues the employee a check for the same amount through the payroll system. This exchange of payments does not change the character of the workers' compensation payment. Whether the payments come from the department of labor and industries, a self-insured employer, or have the appearance of coming from the employer, workers' compensation payments are not payments for services rendered and do not qualify as reportable compensation.

Note: A member may elect to make contributions and receive service credit for periods of disability covered by industrial insurance, see RCW 41.35.070.

NEW SECTION

WAC 415-110-480 Vehicles—Does the value of my use of an employer vehicle qualify as compensation earnable? You are not entitled to count any of the value of an employer-provided vehicle as compensation earnable.

NEW SECTION

WAC 415-110-482 Illegal payments. Payments made by an employer in excess of the employer's legal authority are not reportable.

Example: School districts are prohibited from increasing an employee's salary to include a payment in lieu of a fringe benefit per RCW 28A.400.220. If a district increased a person's salary instead of providing a fringe benefit, the payment would be illegal and should not be reported.

NEW SECTION

WAC 415-110-483 Optional payments. If an employee can receive an additional payment only on the condition of taking an action other than providing service to the employer, the payment is not for services rendered and is not reportable compensation.

Example: An employer offers to make a contribution to a deferred compensation plan on behalf of an employee only if the employee agrees to defer a portion of his or her salary. Because the employee does not have a right to receive the contribution based solely on

the rendering of service, the employer payment is not reportable compensation.

NEW SECTION

WAC 415-110-484 Reimbursements for expenses. Reimbursements are not earned for services rendered and thus are not reportable compensation. Typical reimbursement payments include mileage reimbursements for use of a private car on employer business, see WAC 415-110-485, or meal and lodging reimbursements for business trips.

NEW SECTION

WAC 415-110-485 Vehicle allowances—Are vehicle allowances earnable compensation? (1) **If your employer provides you any payment or allowance in lieu of a reimbursement for expenses you incur or expect to incur in performing services for your employer, the payment or allowance is not compensation earnable.** Your vehicle allowance does not qualify as compensation earnable if you receive the allowance in lieu of reimbursement for expenses that you incur or expect to incur in using your own vehicle for business purposes.

(2) **The department presumes that any vehicle allowance provided to you by your employer is a payment in lieu of reimbursement for expenses and is not compensation earnable.** If the contract authorizing your vehicle allowance states that it is provided solely in lieu of reimbursement for expenses that you incur or expect to incur in using your own vehicle for business purposes, the department's presumption is not rebuttable.

(3) **Your vehicle allowance may qualify as compensation earnable to the extent that it exceeds your actual expenses.** If your employer documents that your vehicle allowance exceeds the actual expenses you incur in driving your own vehicle for business purposes, the excess amount is compensation earnable. Your employer must maintain monthly contemporaneous records documenting the following:

- (a) The dates, if any, on which you used a privately owned vehicle in performing services for your employer;
- (b) The miles you drove the vehicle on each of these trips; and
- (c) Your itinerary for each of these trips.

(4) **How to determine what amount of your vehicle allowance, if any, is reportable as compensation earnable.** If your employer documents that your vehicle allowance exceeds the actual expenses you incur in using your own vehicle for business purposes, your employer must report to the department as compensation earnable:

Your Vehicle Allowance LESS (Miles X IRS Rate)

(a) "Miles" above means the number of miles you drove a privately owned vehicle for business purposes during the month.

(b) "IRS rate" above means the Internal Revenue Service mileage rate for use by taxpayers computing the value of the use of a vehicle.

(5) **Your vehicle allowance qualifies as compensation earnable if you also receive a separate reimbursement for each occasion you use your own vehicle for business purposes.** If, in addition to your vehicle allowance, you receive a separate reimbursement for vehicle expenses for each occasion that you use a privately owned vehicle for business purposes, your vehicle allowance is compensation earnable.

(6) **Any part of your vehicle allowance that qualifies as earnable compensation is excess compensation.** If any part of your vehicle allowance is included in the calculation of your retirement allowance, your employer will be billed for excess compensation under RCW 41.50.150. Your employer's bill will equal the total estimated cost of the portion of your retirement allowance payment attributable to your vehicle allowance.

NEW SECTION

WAC 415-110-487 Retirement bonus or incentive. A payment made to an employee as a bonus or incentive when retiring or terminating is not a payment for services rendered. Rather, the payment is made in exchange for an employee's promise or notification of intent to retire or terminate. A retirement or termination bonus or incentive is not reportable compensation.

Example: A collective bargaining agreement authorizes a school district to pay employees a higher salary during the last two years of employment if the employee gives written notice of his or her intent to retire or terminate. Because the payment is in exchange for the agreement to retire or terminate and not for services, the payment is not reportable compensation.

NEW SECTION

WAC 415-110-488 Severance pay not earned over time—Contract buy outs. Severance pay that is not earned over time is not earned for services rendered and is not reportable. An example of severance pay not earned over time is a payment negotiated as part of termination agreement.

Example: At the time of an employee's termination the employer agrees to pay a lump sum payment equal to two months' salary. The employer identifies this payment as "severance pay." Because the payment was not earned for services rendered, it is not reportable compensation and will not be included in the retirement calculation.

For treatment of severance pay earned over time, see WAC 415-110-458.

NEW SECTION

WAC 415-110-491 Salary imputed to periods of unpaid leave. In some circumstances specified in statute, a

member may elect to establish service credit for periods of unpaid leave. The salary imputed to a member for purposes of calculating contributions owing for such periods of leave is not reportable compensation. Depending on the type of leave, the imputed compensation may or may not be included as average final compensation in calculating a member's retirement allowance.

(1) Authorized unpaid leave. RCW 41.35.470 (Plan 2) and RCW 41.35.650 (Plan 3) provides members with an option to establish service credit for periods of unpaid leave. RCW 41.35.070 provides members with an option to establish service credit for periods of disability covered by industrial insurance. Salary imputed to members in order to calculate contributions for such periods is not reportable compensation and can not be included as average final compensation in calculating a member's retirement allowance.

(2) Military leave. Salary imputed to a member for purposes of calculating contributions owing for periods of interrupted military service is not reportable compensation. Federal law requires that if a member elects to purchase credit for such periods of military service, and that period falls in the member's average final compensation period, the member is entitled to have the imputed salary he or she would have earned during the period of absence used in the calculation of his or her average final compensation.

MEMBERSHIP

NEW SECTION

WAC 415-110-550 Elected officials—Eligibility for retirement service membership. (1) For purposes of this section and WAC 415-110-570, and pursuant to RCW 41.35.030 and 41.35.010, "elected" officials means:

(a) Individuals who are elected or appointed to any vacant elective office at a school district or educational service district; or

(b) Active SERS members who become elected or appointed to any state elective position.

(2) An active member of SERS who is elected to a state elective position may elect to continue membership in SERS or apply for membership in PERS pursuant to RCW 41.40.023(3).

(3) An active member of SERS who is elected or appointed to a nonstate elective position for an employer other than a school district or educational service district, does not have the option to continue membership in SERS pursuant to such elected service. However, the member may apply for membership in PERS pursuant to RCW 41.40.023(3).

(4) Pursuant to RCW 41.35.030 (2)(a), elected officials are exempted from retirement system membership but may apply for membership during the official's current term of elected office. To apply for membership, the official shall submit a written application directly to the department. If the department approves the application, the elected official is entitled to establish membership and service credit retroactive to the first day of the official's current term of elected service. To establish such membership, the official shall pay the

required employee contributions for the official's current term of elected service with interest as determined by the department.

(5) Upon establishing membership for the official's current term of elected office, the official is entitled to establish membership and service credit retroactive to the first day of any previous elected term or terms of office. The official will be required to establish membership for all consecutive terms of office. To exercise this option, the official shall apply to the department pursuant to subsection (4) of this section. If the department approves the application, the official shall:

(a) Pay the required employee contributions for such previous term or terms of elected service with interest as determined by the department; and

(b) Pay the required employer contributions for such previous term or terms of elected service with interest as determined by the department. The employer may, at its discretion, pay the required employer contributions plus interest in lieu of the employee making payment of this amount.

(6) If an official is employed in an eligible position at the time of election to office and will hold multiple positions concurrently the official may:

(a) Apply to the department to participate in membership pursuant to the official's elected position as provided in subsection (4) of this section; or

(b) Choose not to participate pursuant to the official's elected position while continuing membership through the non-elected position.

(7) Except as provided under RCW 41.35.030, once an elected official has exercised the option of becoming a member of the retirement system the official shall be a member until the official separates from all eligible public employment. An official does not separate from public employment when that official's term of office ends and the official commences another term of office in the same or a different position for the same employer without a break in service. An official does not separate from service if the official resigns from the official's elected position and is later reappointed to the same position during the same term.

(8) The department will apply this section to service by elected officials which occurred prior to the effective date of this section.

NEW SECTION

WAC 415-110-560 Appointed officials—Eligibility and application for retirement service membership.

(1) For purposes of this section and WAC 415-110-570, and pursuant to RCW 41.35.030 and 41.35.010, "appointed" officials means only those individuals who are active SERS members or were previously active SERS members and are appointed directly by the governor to any position, including but not limited to, agency directorships and memberships on a state committee, board or commission.

(2) An individual must be a gubernatorial appointee or be appointed to serve in a position that meets the requirements of RCW 41.35.010 in order to be eligible for membership and service credit.

(3) Pursuant to RCW 41.35.030, appointed officials are exempted from retirement system membership but may apply

for membership during the official's current appointed term of office. To apply for membership, the official shall submit a written application directly to the department. If the department approves the application, the official is entitled to establish membership and service credit retroactive to the first day of the official's current term of appointed service. To establish such membership, the official shall pay the required employee contributions for the official's current term of appointed service with interest as determined by the department.

(4) Upon establishing membership for the official's current term of appointed service, the official is entitled to establish membership retroactive to the first day of any previous elected term or terms of office. To exercise this option, the official shall apply to the department pursuant to subsection (3) of this section. If the department approves the application, the official shall:

(a) Pay the required employee contributions for such previous term or terms of elected service with interest as determined by the department; and

(b) Pay the required employer contributions for such previous term or terms of elected service with interest as determined by the department. The employer may, at its discretion, pay the required employer contributions plus interest in lieu of the employee making payment of this amount.

(c) "Current term of appointed service" includes an appointed official's entire current term of service. If the official has not been appointed to a position with a set term of office, "current term of appointed service" includes all uninterrupted service in the official's current appointed position.

(5) If an appointed official is employed in an eligible position at the time of appointment to office and will hold the two positions concurrently, the official may:

(a) Apply to the department to participate in membership pursuant to the appointed position as provided in subsection (3) of this section; or

(b) Choose not to participate pursuant to the official's appointed position while continuing membership through the nonappointive position.

(6) Once an appointed official has exercised the option of becoming a member of the retirement system either at the start of the official's initial term or at a successive term, the official shall be a member until the official separates from all eligible public employment. An appointed official does not separate from public employment when that official's term of office ends and the official commences another term of office in the same or a different position for the same employer without a break in service. An appointed official does not separate from service if the official resigns from the appointed position and is later reappointed to the position during the same term.

(7) The department will apply this section to service by appointed officials which occurred prior to the effective date of this section.

NEW SECTION

WAC 415-110-570 Elected and appointed officials—Requirements for service credit. (1) SERS members who were elected to office by statewide election and elect mem-

bership in SERS pursuant to WAC 415-110-550, may receive one month of service credit for each month during which they earn compensation pursuant to their elected positions.

(2) Except for officials covered under subsection (1) of this section, members who were elected to office or appointed by the governor to positions and elect membership in SERS pursuant to WAC 415-110-550 or 415-110-560, may receive service credit only for months during which they are compensated:

(a) In excess of ninety times the state hourly minimum wage in effect at the time they render the service; and

(b) For ninety or more total hours of work.

(3) On or after September 1, 1991, except for officials covered under subsection (1) of this section, members who were elected to office or appointed by the governor to positions and elect membership in SERS pursuant to WAC 415-110-550 or 415-110-560, may earn:

(a) One month of service credit for each month during which they are compensated:

(i) For ninety or more total hours of work; and

(ii) In excess of ninety times the state hourly minimum wage in effect at the time they render the service; or

(b) One-half month of service credit for each month during which they are compensated:

(i) For less than ninety hours but equal to or more than seventy total hours of work; and

(ii) In excess of ninety times the state hourly minimum wage in effect at the time they render the service; or

(c) One-quarter month of service credit for each month during which they are compensated:

(i) For less than seventy total hours of work; and

(ii) In excess of ninety times the state hourly minimum wage in effect at the time they render the service.

NEW SECTION

WAC 415-110-679 Purpose and scope of eligibility rules. WAC 415-110-680 through 415-110-728 codify the department's existing interpretation of statutes and existing administrative practice regarding eligibility for membership in Plan 2 and Plan 3. The department has applied and will apply these rules to determine eligibility for service occurring prior to effective dates of these sections.

NEW SECTION

WAC 415-110-680 Am I eligible for membership? (1) You are eligible for membership if you are employed in an eligible position. Your position is eligible under RCW 41.35.010 if the position, as defined by your employer, normally requires at least five months of seventy or more hours of compensated service per month during each year.

(2) **If you leave an eligible position to serve in a project position, you may retain eligibility.** If you are a member and you leave employment in an eligible position to serve in a project position, the project position is eligible if:

(a) The position, as defined by the employer, normally requires at least five months of seventy or more hours of compensated service each month; or

(b) The position requires at least seventy hours per month and you take the position with the understanding that you are expected to return to your permanent eligible position at the completion of the project.

(3) **Defined terms used.** Definitions for the following terms used in this section may be found in the sections listed.

(a) "Eligible position" - RCW 41.35.010.

(b) "Employer" - RCW 41.35.010.

(c) "Member" - RCW 41.35.010.

(d) "Membership" - RCW 41.35.030.

(e) "Normally" - WAC 415-110-0102.

(f) "Project position" - WAC 415-110-0103.

(g) "Year" - WAC 415-110-0108.

NEW SECTION

WAC 415-110-690 How is my eligibility evaluated?

(1) **Your eligibility is based on your position. In evaluating whether your position is eligible, your employer will determine only whether the position meets the criteria of an eligible position under RCW 41.35.010.** Your employer will not consider your membership status or individual circumstances unless you:

(a) Leave employment in an eligible position to serve in a project position (see WAC 415-110-680); or

(b) Work in both a SERS and TRS position during the same school year (see WAC 415-110-728).

(2) **Your employer will evaluate your position's eligibility for a particular year at the beginning of the year.**

(3) **Your employer or the department may reclassify your position's eligibility based upon your actual work history.** If your employer declares your position to be ineligible at the beginning of a year and by the end of the year, you have actually worked five or more months of seventy or more hours, your employer will, at that time, review your position's eligibility. If at the end of the first year:

(a) Your employer believes your position meets the requirements for an eligible position and declares the position as eligible, you will enter membership and your employer will report you to the department effective from the date your employer declares the position as eligible; or

(b) Your employer believes that the position will not meet the criteria for an eligible position during the next year, your employer may continue to define your position as ineligible. However, if during the next year the position actually requires you to again work seventy or more hours each month for at least five months, the department will declare your position as eligible. You will enter membership in the retirement system.

(i) Except as provided in (b)(ii) of this subsection, your employer will report you to the department effective from the first month of the first year in which your position required you to work for seventy or more hours.

(ii) If:

(A) Your employer has monitored the work history of your position for eligibility;

(B) Has notified you in writing when you entered the position that the position was not considered eligible; and
You will enter membership prospectively.

(4) **The department will not reclassify your position's eligibility until history of the position shows that it meets the criteria for an eligible position.** If your employer has declared your position ineligible, the department will not reclassify your position as eligible until history of the position shows a period of two consecutive years of at least five months of seventy or more hours of compensated employment each month.

(5) **Defined terms used.** Definitions for the following terms used in this section may be found in the sections listed.

- (a) "Eligible position" - RCW 41.35.010.
- (b) "Employer" - RCW 41.35.010.
- (c) "Ineligible position" - RCW 41.35.010.
- (d) "Membership" - RCW 41.35.030.
- (e) "Project position" - WAC 415-110-0103.
- (f) "Report" - WAC 415-110-0104.
- (g) "Year" - WAC 415-110-0108.

NEW SECTION

WAC 415-110-700 Can I qualify for membership if I work in more than one ineligible position with the same employer? (1) All of your monthly work for an employer counts as one position. If you are employed with the same employer in two ineligible positions during a year which, when combined, equate to an eligible position and your employer expects you to continue in this employment for a second consecutive year, your employer will report the total hours you work in both positions to the department as an eligible position.

Example: A person normally works for one employer as a cook for forty hours each month and as a bus driver for forty hours each month. The person is eligible for membership because he works a total of eighty hours each month for at least five months each year and this is the normal pattern of his employment.

Example: A person normally works for one employer for forty hours each month as a cook. For one year only, she takes on extra duties by also working forty hours per month as a bus driver. Although she worked eighty hours each month for five or more months during one year, she is not eligible for membership because these hours are not the normal pattern of her employment.

Example: A person works for one employer for forty hours each month as a cook and also works for another employer for forty hours each month as a bus driver. The person is not eligible for membership because he cannot combine the hours of employment with these separate employers to establish membership.

(2) **You may be reported in TRS if you work in two positions and one position is covered under TRS.** See WAC 415-110-728.

(3) **Defined terms used.** Definitions for the following terms used in this section may be found in the sections listed.

- (a) "Eligible position" - RCW 41.35.010.
- (b) "Employer" - RCW 41.35.010.
- (c) "Ineligible position" - RCW 41.35.010.
- (d) "Membership" - RCW 41.35.030.
- (e) "Normally" - WAC 415-110-0102.
- (f) "Report" - WAC 415-110-0104.
- (g) "Year" - WAC 415-110-0108.

NEW SECTION

WAC 415-110-710 If I work for an employer after I retire, will my retirement benefit be affected? (1) If you reenter membership after retiring, the department will suspend payment of your benefit.

(2) **You may work for an employer in some circumstances without reentering membership.** You may enter employment with an employer after retirement without having to reenter membership if:

- (a) You are employed in an ineligible position; or
- (b) You are employed in an eligible position on a temporary basis for five months or less in a calendar year.

(i) If you enter compensated employment in an eligible position during a month, that month is counted as a month of employment in the calendar year regardless of the number of hours you worked in the month.

(ii) If you are employed in an eligible position for any five months during a calendar year, the department will count your employment as five months of employment, regardless of whether or not the months are consecutive or your employment is with one or more employers.

(3) **You are required to reenter membership if you become reemployed in an eligible position on a temporary basis for more than five months in a calendar year.** If you become reemployed in an eligible position on a temporary basis for more than five months in a calendar year, you will reenter membership in the retirement system beginning with the sixth month of your employment. Effective at the beginning of the sixth month of your employment:

- (a) Your employer will report you to the department; and
- (b) The department will suspend your retirement allowance.

(4) **You are required to reenter membership if you become permanently reemployed in an eligible position.** If you become reemployed in an eligible position on a permanent basis, you will immediately become a member. Effective from the date of your reemployment in a permanent eligible position:

- (a) Your employer will report you to the department; and
- (b) The department will suspend your retirement allowance.

(5) **Meaning of employment on a temporary or permanent basis.**

(a) "Employed on a temporary basis" under subsection (2) of this section means your employer expects your employment to last for five months or less and not be on a recurring basis.

(b) "Employed on a permanent basis" under subsection (3) of this section means either:

- (i) Your employer expects you to continue in your position for more than five months in any calendar year; or
- (ii) Your employer expects you to continue in the same position for more than one year on a recurring basis and your employment is for five months or less during each year.

(6) **Defined terms used.** Definitions for the following terms used in this section may be found in the sections listed.

- (a) "Eligible position" - RCW 41.35.010.
- (b) "Employer" - RCW 41.35.010.
- (c) "Ineligible position" - RCW 41.35.010.
- (d) "Membership" - RCW 41.35.030.
- (e) "Report" - WAC 415-110-0104.

NEW SECTION

WAC 415-110-720 Participation—Can I be excluded from participating in membership even if I am employed in an eligible position? (1) You may be exempt from participating in membership even if you meet eligibility criteria. Even if you are employed in an eligible position you are exempt from participating in SERS if your individual circumstances qualify you for one of the exceptions to membership under RCW 41.35.030.

(2) **If you work for a SERS employer after you retire, you are subject to postretirement employment restrictions, even if you are excluded from participating in membership.** If you become employed in an eligible position after you retire, you are subject to the postretirement employment restrictions under RCW 41.35.230 even if you are excluded from membership.

(3) **Defined terms used.** Definitions for the following terms used in this section may be found in the sections listed.

- (a) "Eligible position" - RCW 41.35.010.
- (b) "Employer" - RCW 41.35.010.
- (c) "Ineligible position" - RCW 41.35.010.
- (d) "Membership" - RCW 41.35.030.

NEW SECTION

WAC 415-110-725 If I have retired from another retirement plan or am eligible to retire, am I excluded from participating in SERS? (1) If you have retired or are eligible to retire from another retirement system authorized by the laws of this state, you cannot participate in SERS membership unless you accrued less than fifteen years of service credit in the other retirement plan.

(2) If you are receiving a disability allowance from any retirement system administered by the department, you cannot participate in SERS.

(3) **Defined terms used.** Definitions for the following terms used in this section may be found in the sections listed.

- (a) "Membership" - RCW 41.35.030.
- (b) "Retirement plan" - WAC 415-110-0105.
- (c) "Service" - RCW 41.35.010.

NEW SECTION

WAC 415-110-728 If I work in both a SERS position and TRS position during the same school year, which system will I be in? (1) If you work in both a SERS and TRS position during the same year, your membership status and the nature of your positions will determine the system your employer will report you in. You will be reported in either SERS or TRS according to the following table:

Former TRS Plan 1 Members 1/

Type of Employment 2/	Type of Employer(s)	System You Will Be Reported In
A substitute or less than full-time teaching position and a SERS-eligible position	Same SERS employer	SERS - for both positions.
	Separate SERS employers	SERS - for SERS position only. Your substitute part-time position is not reported unless you qualify for and elect to establish TRS membership under RCW 41.32.240. If you elect to establish TRS membership, your employers will report you in TRS for both positions. Any previously reported service credit and compensation in SERS will be transferred to TRS.
A full-time teaching position and an eligible SERS position	Same employer	TRS - for both positions.
	Separate SERS employers	TRS - for both positions.

PERMANENT

TRS Plan 1 Members

Type of Employment ^{2/}	Type of Employer(s)	System You Will Be Reported In
A full-time or less than full-time TRS position and an eligible SERS position	Same employer	TRS - for both positions.
	Separate SERS employers	TRS - for both positions.
A full-time or less than full-time TRS position and an ineligible SERS position	Same employer	TRS - for both positions.
	Separate SERS employers	TRS - for both positions.

TRS Plan 2 or 3 Members

Type of Employment ^{2/}	Type of Employer(s)	System You Will Be Reported In
An eligible TRS position and an ineligible PERS position	Same employer	TRS - for both positions.
	Separate SERS employers	TRS - for TRS position only; your ineligible SERS position is not reported.
An eligible TRS position and an eligible SERS position	Same employer	TRS - for both positions.
	Separate SERS employers	TRS - for both positions. ^{3/}

SERS Members

Type of Employment ^{2/}	Type of Employer(s)	System You Will Be Reported In
An eligible SERS position and an ineligible TRS or substitute position	Same employer	SERS - for both positions.
	Separate SERS employers	SERS - for the SERS position only, unless you qualify for and elect to establish membership in TRS at the end of the school year under WAC 415-112-125(1). If you elect to establish TRS membership, your employers will report you in TRS for both positions. Any previously reported service credit and compensation in SERS will be transferred to TRS.

Neither TRS Nor SERS Member

Type of Employment ^{2/}	Type of Employer(s)	System You Will Be Reported In
An ineligible TRS and an ineligible SERS position	Same employer	TRS - for both positions if the positions combined, qualify as an eligible position.
	Separate SERS employers	Neither position reported.
A substitute teaching position and an ineligible SERS position	Same employer	Neither position reported. However, if you qualify, you may elect to establish membership in TRS at the end of the school year for your substitute teaching position under RCW 41.32.013 and WAC 415-112-140.
	Separate SERS employers	Neither position reported. However, if you qualify, you may elect to establish membership in TRS at the end of the school year for your substitute teaching position under RCW 41.32.013 and WAC 415-112-140.

^{1/} "Former TRS 1 member," as used here, means you terminate your membership by withdrawing your contributions.

^{2/} Means during the same school year.

^{3/} EXAMPLE: A TRS 2 member is employed concurrently by School District A in an eligible TRS position and by School District B in an eligible SERS position. Because he is a TRS 2 member, School District B employer must report his service and compensation from the SERS position to the department in TRS 2. If the member terminates his employment in the TRS position with School District A, School District B will report him in SERS for the SERS position.

PERMANENT

(2) **Defined terms used.** Definitions for the following terms used in this section may be found in the sections listed.

(a) "Eligible position" - RCW 41.35.010 (SERS); RCW 41.32.010 (TRS).

(b) "Employer" - RCW 41.35.010 (SERS); RCW 41.32.010 (TRS).

(c) "Ineligible position" - RCW 41.35.010 (SERS); RCW 41.32.010 (TRS).

(d) "Member" - RCW 41.35.010 (SERS); RCW 41.32.010 (TRS).

(e) "Membership" - RCW 41.35.030 (SERS).

(f) "Report" - WAC 415-110-0104.

(g) "Service" - RCW 41.35.010 (SERS); RCW 41.32.010 (TRS).

SERVICE RETIREMENT

NEW SECTION

WAC 415-110-820 Interim retirement allowance—Final computation of retirement allowance—Adjustment of retirement allowance for errors. (1) At the time of a member's application for retirement, the department does not have all information necessary to make a final computation of the member's retirement allowance. Based upon estimates of the retiree's compensation and earned service credit through the date of retirement, the department shall compute an interim retirement allowance made payable to the member in the interim between the member's date of retirement and the department's final computation of the member's retirement allowance. The interim retirement allowance is an initial, estimated computation of the retiree's retirement allowance subject to adjustment by the department based upon subsequent review of information provided by the member's employer.

(2) In computing the interim retirement allowance, the department shall, subject to later correction, consider only the amount of the member's salary actually reported by the employer up to the date of the interim computation, but shall impute the member's earned service credit for the same period.

(3) Following the department's computation of the interim benefit and receipt earnings history, the department shall complete a final computation of the member's retirement allowance. The department's final computation may either increase or decrease the amount of the interim retirement allowance computed pursuant to subsection (1) of this section.

(4) Pursuant to RCW 41.50.130, following the department's final computation of the member's retirement allowance as provided in subsection (3) of this section, the department may subsequently adjust a member's retirement allowance to correct any error in retirement system records. For purposes of this subsection, errors in retirement system records include, but are not limited to, the following:

(a) Applying an incorrect retirement allowance formula in computing the retirement allowance;

(b) Including service that is not creditable to the member;

(c) Including payments that do not constitute earnable compensation to a member in the member's retirement allowance computation, or excluding earnable compensation not reported by an employer;

(d) Benefit overpayments and underpayments;

(e) Including an individual in the membership of the retirement system who is not entitled to such membership.

NEW SECTION

WAC 415-110-830 Actuarial recomputation of retirement allowance upon retirement following reemployment. (1) The purpose of this rule is to establish a method to actuarially recompute the retirement allowance of a Plan 2 member or the defined benefit retirement allowance of a Plan 3 member who retires, reenters employment causing his or her retirement allowance to be suspended, and then retires again. The actuarially recomputed retirement allowance shall:

(a) Include service credit the member earned following reestablishment of membership if any; and

(b) Account for the actuarial reduction applied to the member's initial retirement if the member initially retired prior to age sixty-five.

(2) If a Plan 2 or Plan 3 retiree reenters membership, upon the individual's next retirement, the department shall reinstate and actuarially recompute the individual's retirement allowance pursuant to RCW 41.35.230 (Plan 2) or RCW 41.35.640 (Plan 3) as follows:

(a) If the member first retired before age sixty-five, the department shall:

(i) Calculate the retirement allowance pursuant to RCW 41.35.400 (Plan 2) or RCW 41.35.620 (Plan 3) using the retiree's total years of career service, including service earned prior to initial retirement and service earned after reentering membership;

(ii) Actuarially reduce the member's retirement allowance based on the present value of the retirement allowance payments the individual received during the initial retirement; and

(iii) Calculate any survivor option selected by the retiree based upon the monthly retirement allowance calculated pursuant to (a)(i) and (ii) of this subsection.

(b) If the member initially retired at or after age sixty-five, the department shall recompute the member's retirement allowance pursuant to RCW 41.35.400 (Plan 2) or RCW 41.35.620 (Plan 3) and include any additional service credit earned and any applicable increase in the member's average final compensation resulting from the member's reentry into membership. Under no circumstances shall a retiree receive a retirement allowance creditable to a month during which that individual earned service credit.

(3) If a retiree's retirement allowance is suspended under RCW 41.35.450 or 41.35.640 due to reemployment but the retiree does not reenter membership, upon the retiree's separation from such employment, the retiree shall receive an actuarially recomputed retirement allowance equal to the sum of:

(a) The amount of the monthly suspended retirement allowance; plus

(b) An actuarially computed increase based upon the retirement allowance payments the member did not receive due to reemployment. The retiree may elect to receive the actuarially computed increase in either:

(i) An amount amortized over the expected term of the recomputed retirement allowance; or

(ii) A lump sum payment equal to the suspended retirement allowance plus interest.

MEMBERSHIP CONVERSION

NEW SECTION

WAC 415-110-910 Conversion of service. (1) **You will be converted from PERS to SERS if:**

(a) You were employed with a school district or educational service district in an eligible position as of September 1, 2000;

(b) You participated and then separated in PERS prior to September 1, 2000, and became reemployed in an eligible position at a school district or educational service district after September 1, 2000;

(c) You retired out of PERS Plan 2 and:

(i) Returned to PERS covered employment and became an active PERS membership; and

(ii) Were a member as of September 1, 2000, at a school district or educational service district; or

(d) You retired out of PERS Plan 2 and:

(i) Returned to PERS covered employment and became an active PERS membership;

(ii) Separated from your PERS position; and

(iii) Become employed in an eligible SERS position prior to applying for retirement in PERS.

(2) **What happens to my existing PERS service and account history when I am converted from PERS to SERS membership?** All of your PERS service and account history with any PERS employer will be moved to SERS.

(3) **How many times will my PERS service be moved to SERS?** Your PERS service shall be moved to SERS only once pursuant to subsection (1) of this section. After you have been converted from PERS to SERS, subsequent reenrollment(s) into SERS shall not cause any additional conversions of any PERS service. Any future eligible employment in PERS shall be reported into PERS and any future eligible employment in SERS shall be reported into SERS.

Example:

Employed in PERS prior to conversion. Joe has 15 years of service in PERS. He has been employed by a school district for the last 5 years. Joe previously was employed by a county for 10 years.

Conversion from PERS to SERS. Since Joe is employed with the school district on September 1, 2000, his PERS service is moved to SERS service. Both his 5 years of service with the school district and his 10 years of service with the county are moved to SERS. Joe's PERS account now

has zero service credit and contributions; Joe's SERS account now has 15 years of service credit and contributions.

Return to PERS service. After another year of service with the school district, Joe separates employment with 16 years of credit in SERS and returns to employment with the county. Joe's 16 years of service remains in SERS and he begins to accrue service in PERS, starting from zero, for his new employment with the county.

Return to SERS employment. Joe works for the county for 5 years. He now has 5 years of service credit in PERS and he still has 16 years of service credit in SERS. Joe separates employment from the county and goes back to work in a SERS covered position with an educational service district. Joe's PERS employer will stop reporting him and the educational service district will begin reporting Joe into SERS. He will begin accumulating service in SERS starting at 16 years. The 5 years of service that Joe rendered at the county stays in PERS.

(4) **If I am a PERS Plan 2 retiree and become employed in an eligible SERS position, will my service be converted from PERS to SERS?** Except as allowed in subsection (1)(c) and (d) of this section, a PERS Plan 2 retiree will not have any of their service, account or retirement history converted to SERS.

Chapter 415-111 WAC

PLAN 3 - DEFINED CONTRIBUTION PLANS

ADMINISTRATION

NEW SECTION

WAC 415-111-100 Application of chapter. This chapter applies only to members of Plan 3 retirement systems created under chapters 41.32 (TRS) and 41.35 (SERS) RCW.

NEW SECTION

WAC 415-111-110 Member and employer responsibility. (1) **What am I responsible for as a Plan 3 member?** As a Plan 3 member your responsibilities include, but are not limited to:

(a) Adhering to published time frames;

(b) Making investment decisions for your defined contribution account;

(c) Reviewing account information provided on statements, such as quarterly statements, and notifying the correct organization of any errors;

(d) Filling out the correct form for a requested action;

(e) Correctly completing the appropriate form for a requested action and submitting the form to the correct organization as directed on each form; and

(f) Monitoring to ensure contributions do not exceed Internal Revenue Code limits (see WAC 415-111-111).

(2) **What can happen if I do not fulfill my responsibilities?** If you do not fulfill your responsibilities, the consequences may include, but are not limited to:

(a) You may not qualify for certain benefits, such as the transfer payment;

(b) You may have a delay in the correction of errors on your account;

(c) You may have a delay in the processing of your request for a defined contribution withdrawal; or

(d) You may have a delay in the investment of your account as directed.

(3) **What responsibilities do employers have?** Employers' responsibilities include, but are not limited to:

(a) Adhering to Plan 3 administrative requirements, including the respective roles of employers and employees, communicated to employers by the department in written materials and formal training.

(b) Maintaining a supply of Plan 3 forms;

(c) Submitting contributions to the department as soon as possible and at least in accordance with chapter 41.50 RCW;

(d) Reporting an employee's Plan 3 transfer election as soon as possible after receipt of the appropriate form from the employee;

(e) Submitting to DRS the form on which the member made their Plan 3 transfer election as soon as possible after receipt of the appropriate form;

(f) Reporting an employee's contribution rate election as soon as possible after receipt of the appropriate form from the employee;

(g) Reporting an employee's investment program election as soon as possible after receipt of the appropriate form from the employee; and

(h) Monitoring to ensure that a member's contributions do not exceed Internal Revenue Code limits (see WAC 415-111-111).

(4) **What can happen if my employer does not fulfill their responsibilities?** If your employer does not fulfill their responsibilities, the consequences may include, but are not limited to:

(a) Your employer may have to make your member account whole;

(b) Your employer may be subject to penalties assessed by the department; or

(c) Your employer may be subject to penalties assessed by the Internal Revenue Service.

If the department determines that an employer has erred in its administrative role, such that an employee incurs an investment loss, the department will determine the amount of loss and bill the employer.

NEW SECTION

WAC 415-111-111 Monitoring deferral limits. (1) **Can contributions in Plan 3 affect my deferral limits in other tax-deferred plans?** Yes. Contributions to Plan 3 reduce your taxable income; this may affect your deferral limits if you participate in another tax deferred program that

has a maximum contribution based on a percentage of your taxable income. You should consult with the Internal Revenue Service, a tax advisor, or a financial advisor regarding all questions of federal or state tax implications arising from participation in Plan 3.

(2) **Who is responsible for ensuring that I do not exceed my tax deferral limits?** Both your employer and you are responsible for ensuring that you do not exceed your tax deferral limits:

(a) Employers are responsible for monitoring to ensure that the contributions you make to your employer-sponsored tax deferred plan(s) do not exceed the limits under the Internal Revenue Code.

(b) You are responsible for monitoring to ensure that the total contributions you make to all of your tax deferred plan(s) do not exceed the limits under the Internal Revenue Code if you participate in a tax deferred program(s) outside of your employer sponsored plan(s).

INVESTMENT OPTIONS

NEW SECTION

WAC 415-111-210 Investment program election. You must choose between two investment programs: The total allocation portfolio, managed by the Washington state investment board, and a self-directed investment program. You may contribute to only one of these programs at a time. However, you may maintain accounts in both investment programs and transfer money between investment programs.

Pursuant to WAC 415-111-110, you bear the responsibility for completing the correct form for making an investment program election and submitting it to your employer as directed on the form.

(1) **Where do I get the form to make my election?** Your employer must provide the appropriate form to elect an investment program if you are enrolling into Plan 3, transferring from Plan 2 to Plan 3, or changing your investment program.

(2) **When do I have to choose an investment program?** If you are a new member or are reenrolling, you must select one of the investment programs (the total allocation portfolio or the self-directed investment program) within ninety calendar days from your date of hire in an eligible position. However, if you are transferring from Plan 2 to Plan 3, you must select an investment program when you transfer. The ninety-day period does not apply to a member transferring from Plan 2 to Plan 3.

If it is determined you should be reported into Plan 3 membership retroactively, the ninety-day period starts from the date it is discovered, as determined by the department, that you should have been reported.

(3) **What happens if I do not make an investment program election?** You will be assigned to the default investment program described in subsection (4) of this section, if:

(a) You are a new employee or changing your employer and do not make an investment program election within the ninety-day election period described in subsection (2) of this section; or

(b) You are transferring from Plan 2 to Plan 3 and do not make an investment program election at the time of transfer.

(4) **What is the default investment program?** The default investment program is the total allocation portfolio of the Washington state investment board.

(5) **Can I change my investment program?** Once you have made an initial investment election or been directed into the default program, you may change your investment program at any time by submitting the appropriate form to your employer.

NEW SECTION

WAC 415-111-220 Defined contribution rate election. A Plan 3 member shall contribute from his or her compensation according to one of the rate structures described in RCW 41.34.040.

Pursuant to WAC 415-111-110, you bear the responsibility for completing the correct form for making a contribution rate election and submitting it in a timely manner to your employer as directed on the form.

(1) **Where do I get the form to make my election?** Your employer must provide the appropriate form to elect a contribution rate if you are enrolling into Plan 3 or transferring from Plan 2 to Plan 3.

(2) **When do I have to elect a contribution rate?** You must irrevocably elect a contribution rate within ninety calendar days from your date of hire in an eligible position. However, if you are transferring from Plan 2 to Plan 3, you must elect a contribution rate when you transfer. The ninety-day period does not apply to a member transferring from Plan 2 to Plan 3.

(a) Once a member elects a contribution rate, contributions will begin the first day of the pay cycle in which the member makes the election.

(b) If it is determined that a member should be reported into Plan 3 membership retroactively, the ninety-day period starts from the date it is discovered, as determined by the department, that the member should have been reported.

(c) A Plan 3 member working in eligible positions for more than one employer may select a different contribution rate with each employer.

(3) **What happens if I do not make a contribution rate election?** Pursuant to RCW 41.34.040, you will be irrevocably assigned to Option A if:

(a) You are a new employee or changing your employer and do not make a contribution rate election within the ninety-day election period described in subsection (2) of this section; or

(b) You are transferring from Plan 2 to Plan 3 and do not make a contribution rate election at the time of transfer. Contributions required under subsection (a) or (b) shall begin effective the first day of the pay cycle in which you are assigned to Option A.

(4) **Can I change my contribution rate?** Once you elect a contribution rate or are defaulted into Option A, you cannot change your contribution rate unless you change employers. Each time you change employers, you will be allowed the ninety-day period described in subsection (2) of

this section to elect a new contribution rate. For the purposes of this section, employer is defined as each school district and each educational service district.

NEW SECTION

WAC 415-111-230 Self-directed investment program allocation. This section applies only to members who elect the self-directed investment program pursuant to WAC 415-111-210.

(1) **What is an allocation?** An allocation is a set of instructions defining which self-directed investment program funds you wish your money to be invested in. The amount you allocate to each fund must be designated as a whole percentage. The sum of the percentages that you allocate must equal one-hundred percent.

Example: Martha has elected the self-directed program as her investment manager and is contributing \$150 per month. Martha decides to invest into three different funds with the following amounts: \$30 invested in fund #1, \$45 invested in fund #2 and \$75 invested in fund #3. To accomplish this she must establish the following allocation:

Allocation to fund #1	20%
Allocation to fund #2	30%
Allocation to fund #3	50%
Total Allocation	100%

(2) **How do I establish an allocation?** You must establish your allocation by contacting the department's designated recordkeeper. Once established, you may change your allocation at any time by contacting the department's designated recordkeeper.

(3) **What happens if I do not designate an allocation?** If you do not provide an allocation prior to any of your investment money being received by the department's designated recordkeeper, or if you provide an allocation where the sum of the allocated portions does not equal one-hundred percent, your investment money will be directed into the default fund such that:

(a) If your total allocations do not equal one-hundred percent, (i) the department will determine the percentage that is unallocated, and (ii) direct the unallocated percentage into the default fund.

Example: Ralph designates the following allocation: 33% fund #1, 33% fund #2, and 33% fund #3. Since the total allocation equals 99%, the unallocated 1% will be directed into the default fund.

(b) If the total allocations exceed one-hundred percent, the entire allocation will be directed into the default fund.

Example: Chris designates the following allocations: 38% into fund #1, 40% into fund #2, and 10% into fund #3 and 15% into fund #4. Since the total allocation equals 103%, all of Chris' investment money will be directed into the default fund.

PERMANENT

(c) If no allocation is provided, the entire allocation will be directed into the default fund: Provided, That if the member previously participated in the self-directed investment program, the member's most recent allocation will be used. If that allocation includes a fund or funds that are no longer available, the portion of your investment money allocated to the unavailable fund(s) will be directed into the default fund.

Example: Lew is a new member and elects the self-directed investment program, but does not establish an allocation. All of Lew's investment money will be directed into the default fund.

Example: Linda becomes reemployed in an eligible position and elects to participate in the self-directed investment program again, but does not provide an allocation. Linda previously participated in the self-directed investment program and had the following allocation:

- 10% in Fund #1
- 10% in Fund #2
- 30% in Fund #3
- 25% in Fund #4
- 25% in Fund #5

Since she did not establish a new allocation, her previous allocation will be used. However, fund #2 is no longer available so that part of her allocation will be directed into the default fund. A new allocation will be established for Linda as follows:

- 10% in Fund #1
- 10% in Default Fund
- 30% in Fund #3
- 25% in Fund #4
- 25% in Fund #5

(4) **What is the default fund?** The default fund for the self-directed investment program is the Money Market Fund.

(5) **Can I change my allocation?** Once you have established an allocation or been directed into the default fund, you may change your allocation at any time by contacting the department's designated recordkeeper.

NEW SECTION

WAC 415-111-310 Defined contribution withdrawal.

(1) **How do I withdraw from my defined contribution account?** Except as otherwise allowed by RCW 41.34.070, you must meet the following criteria to withdraw from your defined contribution account:

- (a) You must separate from all eligible employment;
- (b) Notice of separation must be received by the department from your employer(s) through the retirement transmittal system; and
- (c) You must submit the appropriate form for requesting a defined contribution withdrawal. Pursuant to WAC 415-

111-110, you bear the responsibility for completing and submitting the form to the department's designated recordkeeper as directed on the form.

(2) **Can I still receive my defined contribution withdrawal if I return to work before receiving my withdrawal?** If you have made a request for payment and meet all of the criteria in subsection (1) of this section, you may return to work in an eligible position and still take payment of the requested defined contribution withdrawal.

Chapter 415-112 WAC

TEACHERS' RETIREMENT (~~BOARD OF TRUSTEES~~) SYSTEM

AMENDATORY SECTION (Amending WSR 95-16-053, filed 7/25/95, effective 8/25/95)

WAC 415-112-0167 System acronyms—Definition. The acronyms used in this chapter mean:

- (1) "PERS" means the Public Employees' Retirement System.
- (2) "TRS" means the Teachers' Retirement System.
- (3) "SERS" means the School Employees' Retirement System.

AMENDATORY SECTION (Amending WSR 95-16-053, filed 7/25/95, effective 8/25/95)

WAC 415-112-130 If I separate from, and then reenter employment, can I continue to participate in TRS? (1) **If you are a TRS Plan ((F)) 1 member, you will participate in TRS Plan ((F)) 1 if you become reemployed with a TRS employer.** If you are a Plan ((F)) 1 member and have separated from service without withdrawing contributions, you will participate in the system again if you become reemployed with a TRS employer, even if you are not working as a teacher.

(2) **If you terminate TRS Plan ((F)) 1 membership, you will not reenter TRS Plan ((F)) 1 unless you requalify for membership or repay withdrawn contributions as a dual member.** If you were a Plan ((F)) 1 member and have terminated your membership, you can reestablish your membership and be eligible to participate in the system again only if you:

- (a) Become reemployed as a teacher in a position or positions meeting the membership eligibility criteria under RCW 41.32.240 and WAC 415-112-125(1); or
- (b) Repaid withdrawn contributions as a dual member under portability. See RCW 41.54.020(2).

(3) **If you have service credit in TRS Plan ((H)) 2, you will only reestablish membership if you work as a teacher in an eligible position.** If you were a Plan ((H)) 2 member who separated from service, you will reestablish membership and be eligible to participate in the system again only if you:

- (a) Become reemployed as a teacher; and

PERMANENT

(b) Render service in a position or positions meeting the membership eligibility criteria under WAC 415-112-125(1) or 415-112-140(1).

(4) If you have service credit in TRS Plan 3, you will only reestablish membership if you work as a teacher in an eligible position. If you were a Plan 3 member who separated from service, you will reestablish membership and be eligible to participate in the system again only if you:

(a) Become reemployed as a teacher; and

(b) Render service in a position or positions meeting the membership eligibility criteria under WAC 415-112-125(1) or 415-112-140(1).

(5) Defined terms used. Definitions for the following terms used in this section may be found in the sections listed.

(a) "Dual member" - RCW 41.54.010 and WAC 415-113-041.

(b) "Eligible position" - RCW 41.32.010.

(c) "Employer" - RCW 41.32.010.

(d) "Member" - RCW 41.32.010.

(e) "Service" - RCW 41.32.010.

(f) "Service in an administrative or supervisory capacity" - WAC 415-112-0162.

(g) "Service in an instructional capacity" - WAC 415-112-0163.

(h) "Teacher" - RCW 41.32.010.

AMENDATORY SECTION (Amending WSR 95-16-053, filed 7/25/95, effective 8/25/95)

WAC 415-112-135 Can I be a member if I work as an educational staff associate? (1) **You are eligible for membership if you are certificated and employed as an educational staff associate.** You are a teacher for purposes of TRS membership if you:

(a) Possess a valid educational staff associate certificate issued by the office of the superintendent of public instruction under WAC 180-75-055(3); and

(b) Serve in an educational staff associate position.

(2) Positions which qualify as an educational staff associate. "Educational staff associate," includes but is not limited to a person employed by a public school in any of the following positions: Communications disorder specialist, occupational therapist, physical therapist, reading resource technician, school counselor, school nurse, school psychologist, school social worker and school librarian.

(3) If you were enrolled in PERS before June 7, 1984, based on your employment as an educational staff associate, you may remain in PERS. If you were enrolled in the PERS prior to June 7, 1984, based on employment as an educational staff associate, you will remain in PERS unless you choose either to:

(a) Transfer your membership to TRS within the time limits established in RCW 41.32.032; or

(b) Terminate your membership in PERS by withdrawing your accumulated contributions.

(4) If you were enrolled in PERS prior to June 7, 1984, based on employment as an educational staff associate and converted to SERS you may maintain your SERS

membership. If you were enrolled in the PERS prior to June 7, 1984, based on employment as an educational staff associate, and were converted to SERS membership under RCW 41.40.750, you will remain in SERS unless you choose either to:

(a) Transfer your membership to TRS within the time limits established in RCW 41.32.032; or

(b) Terminate your membership in SERS Plan 2 by withdrawing your accumulated contributions.

(5) Defined terms used. Definitions for the following terms used in this section may be found in the sections listed.

(a) "Member" - RCW 41.32.010.

(b) "Employer" - RCW 41.32.010.

(c) "Public school" - RCW 41.32.010 and WAC 415-112-0158.

(d) "Service" - RCW 41.32.010.

(e) "Teacher" - RCW 41.32.010.

AMENDATORY SECTION (Amending WSR 00-10-015, filed 4/21/00, effective 5/22/00)

WAC 415-112-155 If I work in both a TRS position and PERS position during the same school year, which system will I be in? (1) If you work in both a TRS and PERS position during the same school year, your membership status and the nature of your positions will determine the system your employer will report you in. You will be reported in either TRS or PERS according to the following tables:

PERMANENT

Former TRS Plan ((F) 1) Members ^{2/}

Type of ((Concurrent)) Employment ^{2/}	Type of Employer(s)	System You Will Be Reported In
A substitute or less than full-time teaching position and a PERS-eligible position	Same employer	PERS - for both positions.
	Separate TRS employers	PERS - for PERS position only. Your substitute part-time position is not reported unless you qualify for and elect to establish TRS membership under RCW 41.32.240. If you elect to establish TRS membership, your employers will report you in TRS for both positions. Any previously reported service credit and compensation in PERS will be transferred to TRS.
	A TRS employer and non-TRS employer	PERS - for PERS position only. Your substitute part-time position is not reported unless you qualify for and elect to establish TRS membership under RCW 41.32.240. If you elect to establish TRS membership, you must elect either to: 1. Have your TRS service reported in PERS and receive service credit in PERS for both positions; or 2. Have your TRS service reported in TRS and not receive service credit for the PERS position.
A full-time teaching position and an eligible PERS position	Same employer	TRS - for both positions.
	Separate TRS employers	TRS - for both positions.
	A TRS employer and non-TRS employer	You must elect to: 1. Have your TRS service reported in PERS and receive service credit in PERS for both positions; or 2. Have your TRS service reported in TRS and not receive service credit for the PERS position.

TRS Plan ((F) 1) Members

Type of ((Concurrent)) Employment ^{2/}	Type of Employer(s)	System You Will Be Reported In
A full-time or less than full-time TRS position and an eligible PERS position	Same employer	TRS - for both positions.
	Separate TRS employers	TRS - for both positions.
	A TRS employer and non-TRS employer	You must elect either to: 1. Have your TRS service reported in PERS and receive service credit in PERS for both positions; or 2. Have your TRS service reported in TRS and not receive service credit for the PERS position.
A full-time or less than full-time TRS position and an ineligible PERS position	Same employer	TRS - for both positions.
	Separate TRS employers	TRS - for both positions.
	A TRS employer and non-TRS employer	TRS - for the TRS position only; your ineligible PERS position is not reportable.

PERMANENT

TRS Plan ((H)) 2 Members

Type of ((Concurrent)) Employment 2/	Type of Employer(s)	System You Will Be Reported In
An eligible TRS position and an ineligible PERS position	Same employer	TRS - for both positions.
	Separate TRS employers	TRS - for TRS position only; your ineligible PERS position is not reported.
	A TRS employer and non-TRS employer	TRS - for TRS position only; your ineligible PERS position is not reported.
An eligible TRS position and an eligible PERS position	Same employer	TRS - for both positions.
	Separate TRS employers	TRS - for both positions. 3/
	A TRS employer and non-TRS employer	You must elect either to: 1. Have your TRS service reported in PERS and receive service credit in PERS for both positions; or 2. Have your TRS service reported in TRS and not receive service credit for the PERS position.

PERS Members

Type of ((Concurrent)) Employment 2/	Type of Employer(s)	System You Will Be Reported In
An eligible PERS position and an ineligible TRS or substitute position	Same employer	PERS - for both positions.
	Separate TRS employers	PERS - for the PERS position only, unless you qualify for and elect to establish membership in TRS at the end of the school year under WAC 415-112-125 (1). If you elect to establish TRS membership, your employers will report you in TRS for both positions. Any previously reported service credit and compensation in PERS will be transferred to TRS.
	A TRS employer and non-TRS employer	PERS - for the PERS position only. You will not be reported for the TRS position unless you elect to either: 1. Have your TRS service reported in PERS and receive service credit in PERS for both positions; or 2. Have your TRS service reported in TRS and not receive service credit for the PERS position.

Neither TRS Nor PERS Member

Type of ((Concurrent)) Employment 2/	Type of Employer(s)	System You Will Be Reported In
An ineligible TRS and an ineligible PERS position	Same employer	TRS - for both positions if the positions combined, qualify as an eligible position. 7
	Separate employers, TRS or non-TRS	Neither position reported.

PERMANENT

Neither TRS Nor PERS Member

Type of Employment ^{2L} ((Concurrent))	Type of Employer(s)	System You Will Be Reported In
A substitute teaching position and an ineligible PERS position	Same employer	Neither position reported. However, if you qualify, you may elect to establish membership in TRS at the end of the school year for your substitute teaching position under RCW 41.32.013 and WAC 415-112-140.
	Separate employers, TRS or non-TRS	Neither position reported. However, if you qualify, you may elect to establish membership in TRS at the end of the school year for your substitute teaching position under RCW 41.32.013 and WAC 415-112-140.

^{1L} "Former TRS 1 member", as used here, means you terminate your membership by withdrawing your contributions.

^{2L} Means during the same school year.

^{3L} EXAMPLE: A TRS 2 member teaches in an eligible position and during the summer, she works for a state agency in an eligible position under PERS. Because the member has established membership in TRS 2 through employment as a teacher, her state agency employer must report her service and compensation from the PERS position to the Department in TRS 2.

EXAMPLE: A TRS 2 member is employed concurrently by School District A in an eligible TRS position and by School District B in an eligible PERS position. Because he is a TRS 2 member, School District B employer must report his service and compensation from the PERS position to the Department in TRS 2. If the member terminates his employment in the TRS position with School District A, School District B will report him in PERS for the PERS position.

(2) **Defined terms used.** Definitions for the following terms used in this section may be found in the sections listed.

- (a) "Eligible position" - RCW 41.32.010 (TRS); RCW 41.40.010 (PERS).
- (b) "Employer" - RCW 41.40.010 (PERS); RCW 41.32.010 (TRS).
- (c) "Full time" - RCW 41.32.240.
- (d) "Ineligible position" - WAC 415-112-0154 (TRS); RCW 41.40.010 (PERS).
- (e) "Member" - RCW 41.40.010.
- (f) "Membership" - RCW 41.40.023.
- (g) "Report" - WAC 415-108-0104.
- (h) "Service" - RCW 41.40.010.

NEW SECTION

WAC 415-112-156 If I work in both a TRS position and SERS position during the same school year, which system will I be in? (1) If you work in both a TRS and SERS position during the same year, your membership status and the nature of your positions will determine the system your employer will report you in. You will be reported in either TRS and SERS according to the following table:

Former TRS Plan 1 Members ^{4L}

Type of Employment ^{2L}	Type of Employer(s)	System You Will Be Reported In
A substitute or less than full-time teaching position and a SERS-eligible position	Same SERS employer	SERS - for both positions.
	Separate SERS employers	SERS - for SERS position only. Your substitute part-time position is not reported unless you qualify for and elect to establish TRS membership under RCW 41.32.240. If you elect to establish TRS membership, your employers will report you in TRS for both positions. Any previously reported service credit and compensation in SERS will be transferred to TRS.
A full-time teaching position and an eligible SERS position	Same employer	TRS - for both positions.
	Separate SERS employers	TRS - for both positions.

PERMANENT

TRS Plan 1 Members

Type of Employment ^{1/}	Type of Employer(s)	System You Will Be Reported In
A full-time or less than full-time TRS position and an eligible SERS position	Same employer	TRS - for both positions.
	Separate SERS employers	TRS - for both positions.
A full-time or less than full-time TRS position and an ineligible SERS position	Same employer	TRS - for both positions.
	Separate SERS employers	TRS - for both positions.

TRS Plan 2 or 3 Members

Type of Employment ^{1/}	Type of Employer(s)	System You Will Be Reported In
An eligible TRS position and an ineligible SERS position	Same employer	TRS - for both positions.
	Separate SERS employers	TRS - for TRS position only; your ineligible SERS position is not reported.
An eligible TRS position and an eligible SERS position	Same employer	TRS - for both positions.
	Separate SERS employers	TRS - for both positions. ^{3/}

SERS Members

Type of Employment ^{1/}	Type of Employer(s)	System You Will Be Reported In
An eligible SERS position and an ineligible TRS or substitute position	Same employer	SERS - for both positions.
	Separate SERS employers	SERS - for the SERS position only, unless you qualify for and elect to establish membership in TRS at the end of the school year under WAC 415-112-125 (1). If you elect to establish TRS membership, your employers will report you in TRS for both positions. Any previously reported service credit and compensation in SERS will be transferred to TRS.

Neither TRS Nor SERS Member

Type of Employment ^{1/}	Type of Employer(s)	System You Will Be Reported In
An ineligible TRS and an ineligible SERS position	Same employer	TRS - for both positions if the positions combined, qualify as an eligible position.
	Separate SERS employers	Neither position reported.
A substitute teaching position and an ineligible SERS position	Same employer	Neither position reported. However, if you qualify, you may elect to establish membership in TRS at the end of the school year for your substitute teaching position under RCW 41.32.013 and WAC 415-112-140.
	Separate SERS employers	Neither position reported. However, if you qualify, you may elect to establish membership in TRS at the end of the school year for your substitute teaching position under RCW 41.32.013 and WAC 415-112-140.

^{1/} "Former TRS 1 member," as used here, means you terminate your membership by withdrawing your contributions.

^{2/} Means during the same school year.

^{3/} EXAMPLE: A TRS 2 member is employed concurrently by School District A in an eligible TRS position and by School

District B in an eligible SERS position. Because he is a TRS 2 member, School District B employer must report his service and compensation from the SERS position to the department in TRS 2. If the member terminates his employment in

PERMANENT

the TRS position with School District A, School District B will report him in SERS for the SERS position.

(2) **Defined terms used.** Definitions for the following terms used in this section may be found in the sections listed.

(a) "Eligible position" - RCW 41.35.010(SERS); RCW 41.32.010 (TRS).

(b) "Employer" - RCW 41.35.010 (SERS); RCW 41.32.010 (TRS).

(c) "Ineligible position" - RCW 41.35.010 (SERS); RCW 41.32.010 (TRS).

(d) "Member" - RCW 41.35.010 (SERS); RCW 41.32.010 (TRS).

(e) "Membership" - RCW 41.35.030 (SERS).

(f) "Report" - WAC 415-110-0104.

(g) "Service" - RCW 41.35.010 (SERS); RCW 41.32.010 (TRS).

AMENDATORY SECTION (Amending WSR 99-14-008, filed 6/24/99, effective 7/25/99)

WAC 415-112-727 Retirement benefit options. RCW 41.32.530 (Plan 1) (~~and~~), RCW 41.32.785 (Plan 2) and RCW 41.32.851 (Plan 3) enable the department to provide retiring members with four retirement benefit options. In addition, retiring Plan 1 members may select the COLA (cost-of-living adjustment) option. The retiring member must choose an option(s) when applying for service or disability retirement.

(1) **Benefit options without survivor feature.**

(a) Maximum benefit allowance. Plan 1 retirees may elect to receive the maximum benefit possible which is based on a single life annuity. The maximum benefit allowance does not include a survivor allowance or beneficiary payment. When the retiree dies, all benefits cease. Any remaining balance in employee contributions is retained by the retirement system.

(b) Option One (standard allowance). The department pays a monthly retirement allowance based on a reduced single life annuity of the member, as provided in RCW 41.32.480 (Plan 1 - Service), RCW 41.32.550 (Plan 1 - Disability), RCW 41.32.765 (Plan 2 - Service), (~~or~~) RCW 41.32.790 (Plan 2 - Disability)(~~or~~), RCW 41.32.875 (Plan 3 - Service), or RCW 41.32.880 (Plan 3 - Disability). Except for Plan 3, when the retiree dies, all benefits cease. Any remaining balance of the member's accumulated contributions will be paid to:

(i) The retiree's designated beneficiary; or if none, to

(ii) The retiree's surviving spouse; or if none, to

(iii) The retiree's legal representative.

A member selecting Option One must designate a beneficiary at the time of retirement by filing a completed and notarized form provided by the department.

(2) **Benefit options with a survivor feature.** A retiring member is allowed to select from several retirement options which create an actuarially equivalent benefit that includes a survivor feature. The survivor feature entitles the survivor to receive a monthly allowance after the retiree dies. If the member chooses one of the survivor options, the monthly benefit the member will receive is actuarially reduced to off-

set the cost of the survivor feature. After the retiree dies, the department pays the survivor an allowance for the duration of his or her life. If the retiree and the survivor both die before the retiree's accumulated contributions are exhausted, the remaining balance is retained in the retirement fund.

(a) Option Two (joint and whole allowance). When the retiree dies, the department pays the survivor a retirement allowance equal to the gross monthly allowance received by the retiree.

(b) Option Three (joint and one-half allowance). When the retiree dies, the department pays the survivor an allowance equal to one-half of the retiree's gross monthly retirement allowance.

(c) Option Four (joint and two-thirds allowance).

(i) This subsection applies to members retiring on or after January 1, 1996.

(ii) When the retiree dies, the department pays the survivor an allowance equal to two-thirds (66.667%) of the retiree's gross monthly retirement benefit allowance.

(3) If a member retires on or after June 6, 1996, the department is required to pay an ex-spouse survivor benefits pursuant to a marital dissolution order that complies with RCW 41.50.790.

(4) **Supplemental COLA option for Plan 1 members.** Retiring Plan 1 members may select an annual cost-of-living adjustment (COLA) option in addition to their choice of retirement benefit options listed above in subsections (1) and (2) of this section. Retiring members who choose this supplemental option will have their monthly retirement allowance actuarially reduced to offset the cost of annual adjustment.

(5) **Benefit increases when survivor predeceases retiree (pop-up provision).**

(a) This section applies to members retiring on or after January 1, 1996, who select Option Two, Three, or Four.

(b) Plan 1 members. If the survivor dies before the retiree, the retiree's monthly retirement allowance increases, effective the first day of the following month, to:

(i) The amount that would have been received had the retiree chosen the maximum benefit, minus;

(ii) Any reduction in the maximum allowance resulting from a withdrawal of contributions, plus;

(iii) Any cost-of-living adjustments the retiree received prior to the survivor's death based on the original option selection.

(c) Plan 2 and Plan 3 members. If the survivor dies before the retiree, the retiree's monthly retirement allowance increases, effective the first day of the following month, to:

(i) The amount that would have been received had the retiree chosen the standard allowance; plus

(ii) Any cost-of-living adjustments the retiree received prior to the survivor's death based on the original option selection.

(d) Pop-up recalculation example.

Plan One:

Lucinda retires from TRS Plan 1 in 1996 (Year 0) with \$55,000 in accumulated contributions. As a TRS 1 member she is allowed to withdraw some or all of her contributions when she retires. She decides to withdraw \$5,000 so she and Garth, her husband, can take a cruise. This will actuarially reduce Lucinda's maximum benefit from \$2,000 per month to \$1,963.86. Lucinda would also like Garth to receive a monthly allowance after she dies. Therefore, Lucinda chooses one of the benefit options with a survivor feature. As a result, her monthly allowance is further actuarially reduced from \$1,963.86 to \$1,846.03. Unfortunately, Garth dies in January 2001 (Year 5). Under the "pop-up" provision, Lucinda's monthly benefit will increase to \$1,963.86, the amount she would have received had she chosen the maximum benefit (after reduction for her withdrawals). If Lucinda selected the COLA option or if she has otherwise become eligible for a COLA, the accumulated COLAs (based on the prior benefit allowance) will be added to the \$1,963.86*.

Plan Two:

Agnes retires from TRS Plan 2 in 1996 (Year 0). She would like Beatrice, her daughter, to receive a monthly allowance after Agnes dies. Therefore, Agnes selects a retirement benefit option with a survivor feature. As a result her monthly allowance is reduced from \$2,000 (standard allowance) to \$1,750. Unfortunately, Beatrice dies in January 2001 (Year 5). Under the "pop-up" provision, Agnes' monthly benefit will increase to the amount she would have received had she chosen Option One (standard allowance) plus her accumulated COLA's:

Year	Option One (Standard Allowance)	Survivor Option (2,3,4) plus COLAs	COLA incr. (3% max)	\$ Increase
0 (1996)	2,000.00	1,750.00	(inelig.)	0.00
1 (1997)		1,750.00	.02	35.00
2 (1998)		1,785.00	.03	53.55
3 (1999)		1,838.55	.025	45.96
4 (2000)		1,884.51	.03	56.54
5 (2001)	2,000.00	1,941.05	—	—
			Total COLA's	191.05
Original Option One Benefit Amount		+ Total COLA's	= New Benefit Amount	
\$2000		+ \$191.05	= \$2,191.05*	

*In the future (i.e., 2001 or Year 5), COLAs will be based on the increased benefit amount.

(e) If the survivor dies and the retiree's benefit increases under this section, and thereafter the retiree also dies before all contributions are exhausted, the remaining balance is retained by the retirement fund.

(6) Any retiree who retired before January 1, 1996, and who elected to receive a reduced retirement allowance under subsection (2) of this section is entitled to receive a retirement allowance adjustment if the retiree meets the following conditions:

(a) The retiree's designated beneficiary predeceases or has predeceased the retiree; and

(b) The retiree provides the department proper proof of the designated beneficiary's death. The retiree is not required to apply for the increased benefit provided in this subsection.

The adjusted retirement allowance will be effective on July 1, 1998, or the first day of the month following the date of death of the designated beneficiary, whichever comes last. The adjustment is computed as described in RCW 41.32.530 (3)(c) for Plan 1 retirees or RCW 41.32.785 (3)(c) for Plan 2 retirees.

(7) **Survivor.** For the purposes of this provision, "survivor" means a person nominated by the member to receive a monthly benefit allowance after the member dies. A member nominates the survivor at the time of retirement by filing a completed and notarized form provided by the department.

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 415-112-950 Mandatory selection of investment program.

AMENDATORY SECTION (Amending WSR 95-03-001, filed 1/4/95, effective 2/4/95)

WAC 415-113-030 Definitions for purposes of WAC 415-113-035 through ((415-113-100)) 415-113-200. All definitions in RCW 41.54.010 apply to terms used in this chapter. Other terms relevant to the administration of chapter 41.54 RCW are defined in this chapter at WAC 415-113-0301 through 415-113-0310.

AMENDATORY SECTION (Amending WSR 99-22-043, filed 10/29/99, effective 11/29/99)

WAC 415-113-0302 Average compensation—Definition. "Average compensation" means the compensation used by a particular retirement system to calculate a dual member's service retirement allowance. The actual meaning of the term

PERMANENT

varies depending upon the retirement system. With respect to each dual member system, "average compensation" means:

(1) **First class city retirement systems:** Final compensation as defined in RCW 41.28.010;

(2) **Statewide cities retirement systems:** Final compensation as defined in 41.44.030(14);

(3) **TRS:**

(a) Plan 1: Average earnable compensation as defined in RCW 41.32.497 and 41.32.498;

(b) Plans 2 and 3: Average final compensation as defined in RCW 41.32.010(30);

(4) **PERS:** Average final compensation as defined in RCW 41.40.010(17);

(5) **LEOFF Plan 2:** Final average salary as defined in RCW 41.26.030 (12)(b); ~~((and))~~

(6) **WSPRS:** Average final salary as defined in RCW 43.43.120; and

(7) **SERS:** Average final compensation as defined in RCW 41.35.010(14).

AMENDATORY SECTION (Amending WSR 99-22-043, filed 10/29/99, effective 11/29/99)

WAC 415-113-0303 Dual member system—Definition. "Dual member system" means the state and city retirement systems admitted to participate under chapter 41.54 RCW. These systems are:

(1) PERS Plans 1 and 2;

(2) TRS Plans 1, 2 and 3;

(3) LEOFF Plan 2;

(4) WSPRS;

(5) Statewide city employees' retirement system; ~~((and))~~

(6) The first class city retirement systems; and

(7) SERS Plans 2 and 3.

AMENDATORY SECTION (Amending WSR 99-22-043, filed 10/29/99, effective 11/29/99)

WAC 415-113-0310 System acronyms—Definition. The acronyms used in this chapter mean:

(1) "LEOFF Plan 2" means Law Enforcement Officers' and Fire Fighters' Retirement System Plan 2.

(2) "PERS Plan 1" means Public Employees' Retirement System Plan 1.

(3) "PERS Plan 2" means Public Employees' Retirement System Plan 2.

(4) "TRS Plan 1" means Teachers' Retirement System Plan 1.

(5) "TRS Plan 2" means Teachers' Retirement System Plan 2.

(6) "TRS Plan 3" means Teachers' Retirement System Plan 3.

(7) "WSPRS" means Washington State Patrol Retirement System.

(8) "SERS Plan 2" means School Employees' Retirement System Plan 2.

(9) "SERS Plan 3" means School Employees' Retirement System Plan 3.

AMENDATORY SECTION (Amending WSR 99-22-043, filed 10/29/99, effective 11/29/99)

WAC 415-113-041 Am I a dual member? You must meet all of the following criteria to be a dual member:

(1) **You must be a member of a dual member system.** You must be a current member participant in at least one dual member system to be a dual member. You may have established dual member status if you are or were a member participant of a dual member system on or after:

(a) July 1, 1988, for current or former members of PERS, SERS, TRS, SCERS or WSPRS;

(b) July 25, 1993, for current or former members of LEOFF Plan ((H)) 2; or

(c) January 1, 1994, for current or former members of a first class city retirement system;

(2) **You must be a former or current member of another dual member system.**

(3) **You must not have been retired for service from a retirement system.** You are not a dual member if you have ever been retired for service from any retirement system administered by the department of retirement systems or a first class city retirement system.

(4) **You must not be in receipt of a disability benefit from a dual member system.** If you are receiving a disability retirement allowance or disability leave benefits from a dual member system or LEOFF Plan 1, you cannot be a dual member.

(a) If you have received a lump sum disability benefit from PERS Plan 2, SERS Plan 2 or 3, TRS Plan 2 or 3 or LEOFF Plan 2 you are in receipt of a disability benefit unless the department has found that you are no longer disabled.

(b) You are not receiving a disability retirement allowance or disability leave benefits if you:

(i) Previously received disability benefits and the department has subsequently found that you are no longer disabled, and has terminated your disability benefit; or

(ii) Retired for disability from service from WSPRS...

Example 1: A former PERS Plan 1 member who has never been retired and becomes a member participant in TRS Plan 2 through employment with a TRS employer becomes a dual member.

(5) **Defined terms used.** Definitions for the following terms used in this section may be found in the sections listed.

(a) "Dual member" - RCW 41.54.010(4).

(b) "Dual member system" - WAC 415-113-0303.

(c) "Member participant" - WAC 415-113-0305.

AMENDATORY SECTION (Amending WSR 99-22-043, filed 10/29/99, effective 11/29/99)

WAC 415-113-042 Can I terminate my status as a dual member? Termination of dual member status—Reestablishing dual member status. (1) **If you are not a member, you are not a dual member.** If you are no longer a member participant in any dual member system, you are no

longer a dual member. If you later become a member of a dual member system, you again become a dual member.

Example 2: Upon separation from TRS Plan 2 eligible employment, the person in Example 1 in WAC 415-113-041 is no longer a member of TRS Plan 2 nor a dual member.

(2) **If you retire, you are no longer a dual member.** Upon retirement from any or all dual member systems, a person is no longer a dual member except for the purpose of receiving a deferred retirement allowance under RCW 41.54.030(3) and WAC 415-113-070.

(3) **If you are not a dual member, you may still be eligible for a multiple system benefit.** If you are no longer a dual member you may still be able to receive a multiple system benefit if otherwise eligible. The accrual date of your retirement allowance will vary depending upon the provisions of the particular system. You can find the accrual dates of different dual member systems in the following provisions:

- (a) **PERS 1:** RCW 41.40.193;
- (b) **PERS 2:** RCW 41.40.680;
- (c) **TRS 1:** WAC 415-112-520;
- (d) **TRS 2:** RCW 41.32.795;
- (e) **TRS 3:** RCW 41.32.855;
- (f) **LEOFF 2:** RCW 41.26.490;
- (g) **SERS 2:** RCW 41.35.450;
- (h) **SERS 3:** RCW 41.35.640.

(4) **Defined terms used.** Definitions for the following terms used in this section may be found in the sections listed.

- (a) "Dual member" - RCW 41.54.010(4), WAC 415-113-041.
- (b) "Dual member system" - WAC 415-113-0303.
- (c) "Member participant" - WAC 415-113-0305.
- (d) "Multiple system benefit" - WAC 415-113-0306.

AMENDATORY SECTION (Amending WSR 99-22-043, filed 10/29/99, effective 11/29/99)

WAC 415-113-065 Can I substitute salary from one system to another? (1) You can substitute base salary between systems.

(a) If you elect to retire with a multiple system benefit, you may substitute your base salary under one dual member system for your includable compensation in a second dual member system for purposes of computing a retirement allowance from the second system. Using the substituted salary, the department will compute your average compensation under each system's own requirements.

Example 6: At retirement, a person is a member participant in PERS Plan 2 and has prior creditable service in TRS Plan 1. Assume the multiple system retiree earned her highest compensation during her PERS Plan 2 service. The retiree's PERS Plan 2 retirement allowance will be based on her PERS Plan 2 average compensation. For purposes of computing her TRS average compensation

and retirement allowance, she may substitute her PERS Plan 2 base salary earned over two consecutive fiscal years for her earnable compensation in TRS.

Example 7: At retirement, a person is a member participant in TRS Plan 1 and has prior creditable service in PERS Plan 1. Assume the multiple system retiree earned his highest compensation during his membership in TRS Plan 1. The retiree may substitute his base salary earned while a member in TRS Plan 1 for his PERS Plan 1 compensation earnable. However, because he may substitute only his base salary from TRS Plan 1 for his compensation earnable in PERS, his PERS average compensation will not include any cashout payments from his TRS employer.

(b) If you do not have sufficient service credit months in one dual member system to complete an average compensation period under that system, the department will substitute the appropriate number of months of base salary from another system to complete the average compensation period.

Example 8: A person who has creditable service in TRS Plan 1 and PERS Plan 2 retires at age sixty-five having accrued twenty-four months of service in PERS Plan 2. Under PERS Plan 2, a member's average compensation period is the member's highest consecutive sixty-month period of compensation. To compute the multiple system retiree's PERS Plan 2 retirement allowance, the department will substitute her highest consecutive thirty-six service credit months of TRS base salary to complete the PERS sixty-month average compensation period.

(2) **Adjusted full-time salary is not base salary.** A multiple system retiree's adjusted full-time salary under RCW 41.32.345 shall not constitute base salary for purposes of computing the retiree's multiple system benefit.

(3) **Includable compensation defined.** For purposes of this chapter, "includable compensation" means:

- (a) Earnable compensation under TRS Plan 1, 2 or 3 as defined in RCW 41.32.010(10);
- (b) Compensation earnable under PERS Plan 1 or 2 as defined in RCW 41.40.010(8);
- (c) Basic salary under LEOFF Plan 2 as defined in RCW 41.26.030 (13)(b); ~~(and)~~
- (d) Monthly salary under WSPRS as used in RCW 43.43.120(15); and
- (e) Compensation earnable under SERS Plan 2 or 3 as defined in RCW 41.35.010(6).

(4) **Defined terms used.** Definitions for the following terms used in this section may be found in the sections listed.

- (a) "Average compensation" - WAC 415-113-0302.
- (b) "Base salary" - RCW 41.54.010(1).
- (c) "Dual member system" - WAC 415-113-0303.

- (d) "Member participant" - WAC 415-113-0305.
- (e) "Multiple system benefit" - WAC 415-113-0306.
- (f) "Multiple system retiree" - WAC 415-113-0308.

AMENDATORY SECTION (Amending WSR 99-22-043, filed 10/29/99, effective 11/29/99)

WAC 415-113-070 Can I defer my retirement allowance from a system if I retire with a multiple system benefit? (1) You may defer receipt of your retirement allowance. If, by combining creditable service, you qualify to retire in one system but not in a second system, you must either:

(a) Receive an actuarially reduced retirement allowance from the second system; or

(b) Defer retirement in the second system until a later date of your choice. If you choose to begin receiving a retirement allowance from your second system before you are fully eligible, the benefit will be actuarially reduced.

(i) If you elect to defer retirement in the second system, you retain dual member status for the sole purpose of receiving a deferred multiple system benefit;

(ii) If you retire from all systems but elect to defer retirement in one dual member system under RCW 41.54.030(3), you may not subsequently withdraw accumulated contributions from that system.

(c) An actuarial reduction under (a) or (b) of this subsection, if applicable, will account for the difference between your age at the time you begin receiving the retirement allowance and the earliest age where you would be fully eligible based upon your combined service. "Fully eligible" means a person who has enough combined service to qualify for a retirement allowance from a dual member system without receiving a reduction for:

(i) Early retirement from a Plan 2 or Plan 3 system under RCW 41.40.630(2), 41.35.420(2), 41.35.680(2), 41.32.765(2), 41.32.875(2), 41.26.430(2); or

(ii) Early retirement from a Plan 3 system under RCW 41.32.875(2); or

(iii) Retirement as a nonmember participant from WSPRS under RCW 43.43.280(2).

(2) If you defer your retirement allowance and later reenter membership, you are no longer a dual member. If, after deferring retirement, you enter membership in a dual member system, your dual member status terminates. Once your dual member status terminates:

(a) You may only retire under the deferred system if eligible based solely upon that system's retirement eligibility criteria; and

(b) Your retirement allowance under the deferred system will be based solely upon service actually established in that system.

Example 9: A sixty-two year old dual member of PERS Plan 1 and TRS Plan 2 retires. He elects to receive PERS Plan 1 benefits but defer receipt of a TRS Plan 2 retirement allowance. If he becomes reemployed in a TRS Plan 2 eligible position, he will reenter TRS Plan 2 membership if otherwise eligi-

ble and terminate his dual member status, but he will continue to receive his PERS Plan 1 retirement allowance until he works more than the work-limit in a calendar year under WAC 415-108-710. The member's eligibility to retire from TRS Plan 2 will be based solely on his accrued service credit in TRS Plan 2 and his TRS Plan 2 retirement allowance will be based solely on his compensation while he was a member participant in TRS Plan 2.

Example 10:

Assume the retiree in Example 9 above became reemployed in a PERS position rather than a TRS Plan 2 position. He could work in this position up to the work-limit in a calendar year under WAC 415-108-710 without having his PERS retirement allowance suspended. If the retiree works over the work-limit:

- The department would suspend his retirement allowance until the next calendar year. He would remain a dual member. He would be able to retire in TRS 2 if otherwise eligible;

- The retiree could elect to reenter PERS Plan 1 membership at any time, if otherwise eligible, and terminate his dual member status. His election for membership is not retroactive. The effect on the person's right to a TRS Plan 2 benefit is the same as in Example 9. See WAC 415-108-710.

(3) If you defer your retirement allowance and die before you begin receiving the allowance, your survivor may receive a continuing benefit. If you defer receipt of your retirement allowance from a system and die before you elect to begin receiving the allowance:

(a) Your surviving spouse, if any, must elect to receive either:

(i) A joint and one hundred percent survivor option from the deferred system. If your surviving spouse selects this option, your base salary under one system may be substituted for your includable compensation in the deferred system to compute the survivor retirement allowance from the deferred system; or

(ii) A refund of your accumulated contributions from the deferred system.

(b) If you do not have a surviving spouse, the department will pay your accumulated contributions from the deferred system to:

- (i) Your designated beneficiary or beneficiaries; or
- (ii) Your estate, if there are no living beneficiaries.

(4) Defined terms used. Definitions for the following terms used in this section may be found in the sections listed.

(a) "Dual member system" - RCW 41.32.010(4), WAC 415-113-041.

(b) "Member participant" - WAC 415-113-0305.

(c) "Includable compensation" - WAC 415-113-065(3)

(d) "Multiple system participant" - WAC 415-113-0307.

(e) "Nonmember participant" - WAC 415-113-0309.

(f) "System" - RCW 41.54.010(6).

NEW SECTION

WAC 415-113-200 SERS and PERS concurrent employment. For the purposes of this section and pursuant to RCW 41.35.005, 41.35.010, 41.40.010, and 41.54.100, "concurrent employment" refers to an individual who is employed simultaneously in an eligible SERS Plan 2 or Plan 3 position and an eligible PERS Plan 2 position.

If a member has been concurrently employed at any time, this section governs the calculation of service credit, average final compensation, and retirement benefits attributable to all periods of PERS employment, SERS employment, and concurrent employment.

(1) Can I participate in SERS and PERS at the same time? Yes, you may participate in SERS and PERS at the same time when employed concurrently in a PERS eligible position and a SERS eligible position. Your SERS employer will report your SERS eligible service in SERS. Your PERS employer will report your PERS eligible service in PERS.

(2) Will the factors used to calculate my defined benefit be different because of concurrent employment in SERS and PERS? No, the department will calculate your service credit and average final compensation as if all of your employment was reported in one system. These two factors are used to calculate your defined benefit.

(3) Will the amount of my benefit be different because of concurrent employment?

(a) If you are concurrently employed in SERS Plan 2 and PERS Plan 2, the amount of your benefit from SERS and PERS combined will be the same as if all of your service had been reported and you received a benefit in one system, because:

(i) SERS Plan 2 and PERS Plan 2 both use identical two-percent benefit formulas; and

(ii) Your total service credit and average final compensation will not be different than if all of your service had been reported in one system pursuant to subsection (2) of this section.

(b) If you are concurrently employed in SERS Plan 3 and PERS Plan 2, the amount of your benefit may be greater or less than if all of your service had been reported in one system:

(i) SERS Plan 3 uses a one-percent defined benefit formula and has a defined contribution component. You are responsible for the investment of your defined contribution component, which is subject to investment gains or losses; therefore, the dollar value of your total benefit may be greater or less than what you would have received if all of your service had been reported in one defined benefit system.

(ii) The allocation of your service credit while concurrently employed, as described in subsection (4) of this section, may also affect the dollar value of your benefit.

(4) How is my service credit granted while concurrently employed? As a concurrently employed member, you are entitled to exactly the same amount of service credit for your SERS and PERS service combined that you would have received had all of your service been reported in one system.

To calculate your service credit the department will:

(a) Combine your SERS and PERS service to determine the amount of service credit you would have earned had all of your service been reported in one system.

(b) Calculate and grant service credit in SERS based only on your reported SERS service.

(c) Calculate and grant service credit in PERS by subtracting the amount of service credit granted for SERS in (b) of this subsection from the amount of service credit calculated in (a) of this subsection that you would have earned had all of your service been reported in one system (see example 1):

(i) For any month that you receive one month of service credit in SERS for a calendar month of employment, you will not receive any PERS service credit in that month.

(ii) The combined service credit in SERS and PERS may not exceed one month of service for a calendar month of employment.

(d) Adjust the SERS service credit at the conclusion of each school year in accordance with the provisions of RCW 41.35.180. This adjustment may cause changes in the combined SERS/PERS service credit and/or changes in the PERS service credit. (See example 2).

Example 1: Monthly computation of concurrent employment service credit.

Part-time SERS and part-time PERS.

(a) During a month, a member works 80 hours at a school district and 100 hours at a county. If all of the service had been reported in one system, the maximum the member could have earned is one service credit for that month. The member will be granted .5 service credit in SERS based on the 80 hours of service reported in SERS and will receive .5 service credit in PERS based on subtracting the .50 service credit in SERS from the maximum of 1.00 service credit.

(b) During a month, a member works 65 hours at a school district and 30 hours at a county. If all of the service had been reported in one system, the maximum the member could have earned is one service credit for that month. The member will be granted .25 service credit in SERS based on the 65 hours of service reported in SERS and will receive .75 service credit in PERS based on subtracting the .25 service credit in SERS from the maximum of 1.00 service credit.

Full-time SERS and part-time PERS.

During a month, a member works 172 hours for an educational service district and works 30 hours for a state agency. If all of the service had been reported in one system, the maximum the member could have earned is one service credit for that month. The member will be granted one month of service credit in SERS based on the 172 hours of service reported in SERS and will

receive 0.0 service credit in PERS (even though they worked 30 hours) based on subtracting the 1.00 service credit in SERS from the maximum of 1.00 service credit.

Part-time SERS and full-time PERS.

During a month, a member works 40 hours for a school district and 180 hours for a city. If all of the service had been reported in one system, the maximum the member could have earned is one service credit for that month. The member will be granted .25 service credit in SERS based on the 40 hours of service reported in SERS and will receive .75 service credit in PERS based on subtracting the .25 service credit in SERS from the maximum of 1.00 service credit.

Example 2:

Application of the educational service credit rules and the effects on concurrent employment service credit computation.

During September, October, and November a member works 60 hours, 30 hours, and 70 hours in SERS and works 90 hours, 30 hours, and 60 hours in PERS, respectively. Based on these hours, the member would have been granted .25, .25, and .50 service credits in SERS and .75, 0.0, and .50 in PERS. The member's service credit calculated on a monthly basis through November is shown in Table 1 below.

At the end of the school year, the educational service credit rules (RCW 41.35.-180) are applied. The application of these rules may cause one or more months of SERS service credit to change. A change in the SERS service credit for any given month may cause the combined SERS/PERS service credit to change. See Table 2, second line. The PERS service credit would then need to be recalculated for any month that the SERS service credit changed.

The members service for the entire school year is shown in Table 2 below. Applying the educational service credit rules, the member is now entitled to six service credit months in SERS for the school year (.50 in each month of September through August) based on working a total of 750 hours for the year. Thus, the service credit in September would be changed to .50 service credit in SERS and .50 credit in PERS. The service credit in October would be changed to .50 service credit in SERS and would remain at 0.0 service credit in PERS. November's service credit calculation is not affected by the application of the educational service credit rules.

Table 1: Month by Month Determination

	HOURS			SERVICE CREDIT		
	Combined PERS/SERS	SERS	PERS	Combined PERS/SERS	SERS	PERS
Sept	150	60	90	1	0.25	0.75
Oct	60	30	30	.25	.25	0.00
Nov	130	70	60	1	0.50	0.50

(5) **How is my average final compensation calculated if I have been concurrently employed?** Your average final compensation will be calculated by combining all compensation earnable and service credit from all periods of SERS employment, PERS employment, and concurrent employment and then determining your highest consecutive sixty service credit months prior to your retirement, termination, or death. If an authorized leave occurs during the highest consecutive sixty service credit months, amounts earned during the period of leave will not be used in the calculation of average final compensation, except under RCW 41.40.710(2), 41.35.470(2) or 41.35.650(2).

(6) **How is my defined benefit in each system calculated?** A retirement allowance will be calculated using the appropriate formula for each system and plan as described in chapters 41.40 and 41.35 RCW, except that:

(a) The PERS service credit granted under subsection (4) of this section will be used in the PERS calculation and the SERS service credit granted under subsection (4) of this section will be used in the SERS calculation; and

(b) The average final compensation calculated under subsection (5) of this section will be used as the average final compensation for both PERS and SERS.

AMENDATORY SECTION (Amending WSR 91-13-030, filed 6/12/91, effective 7/13/91)

WAC 415-115-020 Definitions. As used in this chapter, unless a different meaning is plainly required by the context:

(1) "Department" refers to the department of retirement systems established pursuant to chapter 41.50 RCW as now existing or hereafter amended.

(2) "Employers" refers to all employers within the retirement systems administered by the department, as defined in RCW 41.50.030.

(3) "Reports" refers to the department of retirement systems transmittal report sent each month by employers to the department.

(4) "Close of business" refers to 5:00 p.m. of a business day.

(5) "Standard administrative fee" for employers in the public employees', school employees', teachers', and law enforcement officers' and fire fighters' retirement systems refers to the administrative fee provided for under RCW 41.50.110(~~(, 41.40.080, 41.32.401, and 41.26.070)~~); for employers in the judges, judicial, and Washington state patrol retirement systems refers to the biennial appropriation that the department receives for administering each system.

(6) "Additional administrative fee" refers to the fee provided for under RCW 41.50.110(3) which is related to increased costs incurred by the department in processing deficient reports.

AMENDATORY SECTION (Amending WSR 91-13-030, filed 6/12/91, effective 7/13/91)

WAC 415-115-090 Maximum additional administrative fee allowable for the public employees', teachers', and law enforcement officers' and fire fighters' retirement systems. The maximum additional administrative fee that may be charged to employers in the public employees' retirement system, the school employees' retirement system, the teachers' retirement system, and the law enforcement officers' and fire fighters' retirement system for any six-month period shall not exceed fifty percent of the standard administrative fee due for that six-month period. In instances where the standard administrative fee rate changes during the six-month period, the new standard administrative fee rate will be applied beginning with the month in which the new rate becomes effective. The maximum additional administrative fee that may be assessed is determined as follows:

(1) If the additional administrative fee as determined in accordance with WAC 415-115-080 is less than fifty percent of the standard administrative fee, the additional administrative fee is the maximum fee allowable.

(2) If the additional administrative fee as determined in accordance with WAC 415-115-080 is greater than or equal to fifty percent of the standard administrative fee, fifty percent of the standard administrative fee is the maximum fee allowable. (~~The standard administrative fee will be calculated in accordance with Chapter 415-116 WAC.~~)

AMENDATORY SECTION (Amending WSR 97-16-039, filed 7/30/97, effective 7/30/97)

WAC 415-200-030 (~~Teachers' retirement system~~) Plan ((H)) 3 external administrators. The employee retirement benefits board may obtain external investment management services to assist with the provision of self-direct investment options. External administrator and investment management services will be obtained through competitive procurement processes to ensure teachers' retirement system plan ~~((H)) 3~~ and school employees' retirement system plan 3 members receive quality services and competitive pricing. The department of retirement systems may select external administrators to assist with the administration of the defined contribution portion of the teachers' retirement system plan III established under chapter 41.34 RCW and the school employees' retirement system plan 3 established under chapter 41.35 RCW.

AMENDATORY SECTION (Amending WSR 97-16-039, filed 7/30/97, effective 7/30/97)

WAC 415-200-040 Self-directed investment—Expenses paid by members. RCW 41.34.060 allows members of the teachers' retirement system plan ~~((H)) 3~~ and

PERMANENT

school employees' retirement system plan 3 to elect to self-direct their investments (~~(using options approved by the employee retirement benefits board)~~). Members electing to self-direct their investments must pay the expenses caused by the self-directed investment program.

(1) **Assessment of member expenses for self-directed investment.** Each month, the third-party administrator will allocate self-directed investment expenses to each participating member. The expenses allocated to members shall include:

- (a) External third party administrator costs;
- (b) External investment manager and consultant costs; and
- (c) State investment board investment management operating expenses, in the case of investment options provided through the state investment board.

Each category of expense shall be expressed in terms of basis points. A basis point is equal to one-hundredth of one percent. The administrator will determine the participating member's monthly fee by multiplying the average monthly value of each participating member's self-directed account assets by the basis points for each expense category.

(2) **Adoption of expense charge.** The expense charges used to calculate self-directed investment fees for participating members shall be established in a memorandum of understanding, interagency agreement, and/or contract. Each expense charge shall be reviewed and approved at a regularly scheduled meeting of the employee retirement benefits board, with opportunity for public testimony. No expense charge may be included in a memorandum of understanding, interagency agreement, and/or contract until such charge has been approved by the employee retirement benefits board. No expense charge which has been approved may be changed unless such change has been approved by the board.

REPEALER

The following chapter of the Washington Administrative Code is repealed:

WAC 415-210-020 Contribution rate options for TRS Plan III members.

WSR 01-01-070
PERMANENT RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES
(Economic Services Administration)

[Filed December 12, 2000, 3:44 p.m., effective February 1, 2001]

Date of Adoption: December 12, 2000.

Purpose: The revision was done to expand eligibility for ongoing additional requirements to include those individuals who are receiving state family assistance (SFA) and tribal TANF.

Citation of Existing Rules Affected by this Order: Amending WAC 388-473-0010.

Statutory Authority for Adoption: RCW 74.04.050, 74.04.055, 74.04.057, 74.08.090.

Adopted under notice filed as WSR 00-22-062 on October 27, 2000.

Changes Other than Editing from Proposed to Adopted Version: Added descriptions of "aged," "blind," and "disabled."

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 0, Amended 1, Repealed 0.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 0, Amended 0, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 1, Repealed 0.

Effective Date of Rule: February 1, 2001.

December 12, 2000

Marie Myerchin-Redifer, Manager
Rules and Policies Assistance Unit

AMENDATORY SECTION (Amending WSR 00-15-053, filed 7/17/00, effective 9/1/00)

WAC 388-473-0010 General provisions for ongoing additional requirements. For the purposes of this chapter, "we" and "us" refers to the department of social and health services. "You" refers to the applicant or recipient. An "ongoing additional requirement" is a continuing need that you have for which you require additional financial benefits in order to continue living independently.

(1) We may authorize ongoing additional requirement benefits if you are:

(a) Eligible for temporary assistance for needy families (TANF), Tribal TANF, state family assistance (SFA), refugee or general assistance cash, or SSI payments; and

(b) Aged(;;): You are age sixty-five or older;

(c) Blind(;;): You have central visual acuity of 20/200 or less in the better eye with the use of a correcting lens or limited fields of vision so the widest diameter of the visual field subtends an angle of no greater than twenty degrees; or

(d) Disabled: You are unable to engage in any substantial gainful activity due to a medically determinable physical or mental impairment that:

(i) Can be expected to result in death; or

(ii) Has lasted or can be expected to last for a continuous period of not less than twelve months.

(2) You may apply for ongoing additional requirement benefits by asking for it from staff that maintain your cash or medical assistance.

(3) We authorize ongoing additional requirement benefits only when we determine the item is essential to you. In

deciding if you are eligible for ongoing additional requirement benefits, we consider and verify:

- (a) The circumstances that created the need; and
 - (b) Your health, safety and ability to continue to live independently.
- (4) When we determine ongoing additional requirement benefits are needed, we:
- (a) Increase your cash assistance benefit to provide the additional benefits by monthly payment;
 - (b) Periodically review whether you continue to need the additional benefits. We conduct this review at least:
 - (i) Twice a year for TANF and refugee cash assistance recipients;
 - (ii) Yearly for general assistance or SSI recipients when we decide the need is not likely to change; or
 - (iii) More frequently if we expect your circumstances to change.
 - (5) Monthly payment standards for ongoing additional requirements are described under WAC 388-478-0050.

Reviser's note: The typographical error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

WSR 01-01-078
PERMANENT RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES
 (Medical Assistance Administration)
 [Filed December 13, 2000, 4:10 p.m.]

Date of Adoption: December 13, 2000.

Purpose: The department is establishing a new chapter for durable medical equipment, chapter 388-543 WAC, so that all the rules relating to this subject will be contained in one WAC chapter. The new chapter codifies current policy and payment methodology, in compliance with *Failor's Pharmacy v. DSHS* lawsuit. The proposed rules have been written to comply with the Governor's Executive Order 97-02.

Statutory Authority for Adoption: RCW 74.08.090, 74.09.530.

Adopted under notice filed as WSR 00-13-008 on June 9, 2000.

Changes Other than Editing from Proposed to Adopted Version: **WAC 388-543-1000:**

"Expedited prior authorization" means the process for obtaining authorization ~~that must be used~~ for selected durable medical equipment....

"Limitation extension" means an authorization process to exceed coverage limitations (quantity, frequency, or duration) set in WAC, billing instructions, or numbered memoranda. Limitation extensions require prior authorization.

"Medical supplies" means supplies that are:

- (1) Primarily and customarily used to service a medical purpose; and
- (2) Generally not useful to a person in the absence of illness or injury.

"Personal or comfort item" means an item or service, which primarily serves the comfort or convenience of the client. ~~These items or services do not contribute meaningfully to the treatment of an illness or injury or the functioning of a malformed body member.~~

"Prior authorization" means a process by which clients or providers must request and receive MAA approval for certain medical equipment and related supplies, prosthetics, orthotics, medical supplies and related services, based on medical necessity, before the services are provided to clients, as a precondition for provider reimbursement. Expedited prior authorization and limitation extension are ~~forms~~ types of prior authorization.

"Three- or four-wheeled scooter" (5) ~~Pneumatic rear tires.~~ Tires designed for indoor/outdoor use.

"Wheelchair - manual" means a federally-approved, nonmotorized wheelchair that ~~can be~~ is capable of being independently propelled ~~by a client using his or her upper extremities~~ and fits one of the following categories:....

WAC 388-543-1100:

(1) ~~MAA covers only those DME and related supplies, prosthetics, orthotics, medical supplies and related services, repairs and labor charges, listed in MAA's published issuances (This proposed (1) renumbered as (6) as shown below.)~~

(2) ~~((2))~~ The Medical Assistance Administration (MAA) covers DME and related supplies, prosthetics, orthotics, medical supplies, related services, repairs and labor charges when all of the following apply. They must be:

(f) ~~Justified as Medically necessary as determined by MAA defined in WAC 388-500-0005.~~ The provider or client must submit sufficient objective evidence to establish medical necessity. Information used to establish medical necessity includes, but is not limited to, the following:.... *(Proposed WAC 388-543-1100(2) renumbered as (1).)*

(2) MAA evaluates a request for any equipment or devices that are listed as noncovered in WAC 388-543-1300 under the provisions of WAC 388-501-0165.

(3) MAA evaluates a request for a service that is in a covered category but has been determined to be experimental or investigational under WAC 388-531-0050, under the provisions of WAC 388-501-0165 which relate to medical necessity.

(4) MAA evaluates requests for covered services that are subject to limitations or other restrictions and approves such services beyond those limitations or restrictions when medically necessary, under the standards for covered services in WAC 388-501-0165.

(5) ~~(3)~~ MAA does not reimburse for DME and related supplies, prosthetics, orthotics, medical supplies, related services, and related repairs and labor charges under fee-for-service (FFS) when the client is any of the following:.... *(Proposed WAC 388-531-1100(3) renumbered as (5).)*

(6) ~~(4)~~ MAA covers only those DME medical equipment and related supplies, prosthetics, medical supplies and related services, repairs and labor charges, listed in MAA's published issuances, including Washington Administrative Code (WAC), billing instructions, and numbered memoranda. *(Proposed WAC 388-531-1100(1) renumbered as (6).)*

~~(7) (4) MAA considers new technologies available through manufacturers to be nonecovered unless MAA establishes coverage by assigning the technology a new procedure code or a reimbursement rate, or by assigning an existing procedure code. A manufacturer An interested party may request MAA to include new equipment/supplies in the billing instructions by sending a written request plus [plus] all of the following:~~

~~(d) Any additional information the manufacturer requestor feels is important. (Proposed WAC 388-531-1100(4) renumbered as (7).)~~

~~(8) (5) MAA bases the decision to purchase or rent DME for a client, or to pay for repairs to client-owned equipment on the least costly and/or equally effective alternative medical necessity. (Proposed WAC 388-531-1100(5) renumbered as (8).)~~

~~(9) (6) MAA covers replacement batteries for purchased medically necessary DME equipment covered within this chapter. (Proposed WAC 388-531-1100(6) renumbered as (9).)~~

~~(10) (7) MAA covers the following categories of medical equipment and supplies only when they are... (Proposed WAC 388-531-1100(7) renumbered as (10).)~~

~~(11) (8) MAA evaluates a BR item, procedure, or service for its medical appropriateness and reimbursement value on a case-by-case basis. (Proposed WAC 388-531-1100(8) renumbered as (11).)~~

~~(12) (9) For a client in a nursing facility, MAA covers only the following when medically necessary. All other DME and supplies identified in MAA billing instructions are the responsibility of the nursing facility, in accordance with chapters 388-96 and 388-97 WAC. See also WAC 388-543-2900 (3) and (4). MAA covers:~~

~~(a) The purchase and repair of an augmentative communication device (ACD), a wheelchair for the exclusive full-time use of a permanently disabled nursing facility resident when the wheelchair is not included in the nursing facility's per diem rate, or specialty bed; and~~

~~(b) The rental of a specialty bed. (Proposed WAC 388-531-1100(9) renumbered as (12).)~~

~~(13) Vendors must provide instructions for use of equipment; therefore instructional materials such as pamphlets and video tapes are not covered.~~

~~(14) Bilirubin lights are limited to rentals for at-home newborns with jaundice.~~

WAC 388-543-1200:

~~(1)(c) ...billed to the department. Out-of-state prosthetic and orthotics providers must meet their state regulatory requirements.~~

~~(2)(d) ...relative value scale (RBRVS); and~~

~~(e) Out-of-state orthotics and prosthetics providers who meet their state regulations.~~

WAC 388-543-1300 Nonecovered Equipment, related supplies and services or other nonmedical equipment supplies, and devices that are not covered.

MAA pays only for medical equipment DME and related supplies, and services that are medically necessary, listed as covered, and meet MAA's the definition of DME and medical supplies as defined in WAC 388-542-1000 and prescribed per WAC 388-543-1100 and 1200. MAA pays only for prosthetics and orthotics that are listed as such by HCFA, meet the definitions of prosthetic and orthotic as defined in WAC 388-542-1000, and prescribed per WAC 388-542-1100 and 1200. -DME means equipment that can withstand repeated use, is primarily and customarily used to serve a medical purpose, generally is not useful to a person in the absence of illness or injury, and is appropriate for use in the client's place of residence. MAA considers all requests for covered DME, related supplies and services, medical supplies, prosthetics, orthotics, and related services, and noncovered equipment and-related supplies, prosthetics, orthotics, medical supplies and related services, will be reviewed based on under the provisions of WAC 388-501-0165(8) which relate to medical necessity. When MAA considers that a request does not meet the requirements for medical necessity, the definition(s) of covered item(s), or is not covered, the client may appeal that decision under the provisions of WAC 388-501-0165. Case-by-case exceptions will only be considered based on WAC 388-501-0160. MAA specifically excludes services and equipment in this chapter from fee-for-service (FFS) scope of coverage when the services and equipment do not meet the definition for a covered item, or the services are not typically medically necessary. This exclusion...

~~(3) More costly services or equipment when MAA determines that less costly, equally effective services or equipment are available;~~

~~(4) (3) A client's utility bills, even if operation or maintenance of medical equipment purchased or rented by MAA for the client contributes to an increased utility bill (refer to the Aging and Adult Services Administration's (AASA) COPES program for potential coverage);~~

~~(5) Bilirubin lights, except as rentals, for at-home newborns with jaundice; (subsequent listing renumbered appropriately).~~

~~(8) Procedures, prosthetics, or supplies related to gender dysphoria surgery; (subsequent listing renumbered appropriately).~~

~~(10) (7) Outpatient office visit supplies and equipment used during a physician office visit, such as tongue depressors and surgical gloves;~~

~~(11) (8) Temporary prostheses or Prosthetic devices dispensed solely for cosmetic reasons (refer to WAC 388-531-0150 (1)(d));~~

~~(12) (9) Home improvements and structural modifications, including but not limited to the following:~~

~~(f) Structural modifications of any kind to a client's house, including but not limited to, the following:~~

~~(i) (f) Electrical wiring...~~

~~(ii) (g) Elevator systems and elevators, ceiling lifts and ceiling tracks, stair lifts; and~~

~~(iii) (h) Wheelchair Lifts or ramps...~~

~~(iv) (i) Installation of...~~

~~(13)~~ **(10)** Nonmedical equipment, supplies, and related services, including but not limited to, the following:

(a) Backpacks, pouches, bags, baskets, or other carrying containers ~~for use with aids to mobility~~:

~~(b) Bed wetting (Enuresis) prevention training equipment;~~ ~~(c) Beds other than hospital. Bedboards/conversion kits...~~ *(subsequent listing renumbered appropriately).*

~~(e)~~ **(f)** Electronic communication equipment, installation services, or service rates, including but not limited to, the following:...

(ii) Interactive communications computer programs used between patients and healthcare providers (e.g., hospitals, physicians), for self care home monitoring, or emergency response systems and services (refer to AASA COPEs or outpatient hospital programs for emergency response systems and services);

~~(m)~~ **(k)** ...other than specified in WAC 388-543-2300 2200;

~~(l) Instructional materials, such as pamphlets and video-tapes; (subsequent listing renumbered appropriately).~~

~~(n)~~ **(l)** Racing strollers/wheelchairs and purely recreational equipment;

~~(p)~~ **(n)** Sitz bath; Bidet or...

~~(q)~~ **(o)** Timers or electronic devices to turn things on or off; which are not an integral part of the equipment;

~~(14)~~ **(11)** Personal and comfort items that do not meet the DME definition, including but not limited to the following:... *(subsequent listing renumbered appropriately).*

(a) Bathroom items, such as antiperspirant, astringent, bath gel, conditioner, deodorant, moisturizer, mouthwash, powder, ~~sanitary napkins (e.g., Kotex)~~, shampoo, shaving cream, shower cap, shower curtains, soap (including antibacterial soap), toothpaste, towels, and weight scales.

(e) Clothing protectors and other protective cloth furniture coverings ~~as protection against incontinence~~;

(f) Cosmetics, including corrective formulations, hair depilatories, and products for skin bleaching, commercial sun screens, and tanning;

(i) Emesis basins, enema bags, ~~peri-wash~~, and diaper wipes;

(l) Hot water bottles and cold/hot packs or pads not otherwise covered by specialized therapy programs;

~~(15)~~ **(12)(g)** Tie-down restraints, except where medically necessary for client owned vehicles.

WAC 388-543-1400:

(2) MAA sets maximum allowable fees for DME medical equipment...

(4) MAA updates the maximum allowable fees for DME medical equipment...

(9) MAA does not cover medical equipment and/or services provided to a client who is enrolled in a MAA-contracted managed care plan, but did not use one of the plan's participating providers.

WAC 388-543-1600:

(1) MAA bases its determination about which DME and related supplies, prosthetics, orthotics, medical supplies and related services require prior authorization (PA) or expedited

prior authorization (EPA) on utilization criteria. (See WAC 388-543-1000 for PA and WAC 388-543-1800 for EPA). MAA considers all of the following when establishing utilization criteria:

(a) High cost;

(b) Potential for utilization abuse;

(c) Narrow therapeutic indication; and

(d) Safety.

(2) MAA requires providers to obtain prior authorization for certain items and services... (Items proposed as (1) through (16) renumbered as (2)(a) through (q).)

(p) ...procedure code; and

(q) Limitation extensions.

WAC 388-543-1700:

~~(6)~~ If a client becomes ineligible before the end of the month, MAA stops paying for any rented equipment effective the date the client becomes ineligible. (subsequent listing renumbered appropriately).

WAC 388-543-1800:

~~(8)~~ MAA denies a request for an item when a less costly, equally effective alternative is available that will meet the client's medical needs. MAA informs the provider and/or the client of a less costly alternative from MAA's manufacturer's literature on file when an MAA denial of a request is based on a less costly, equally effective alternative being available.

WAC 388-543-2000:

~~(1)~~ MAA purchases a wheelchair for a client when MAA determines that a wheelchair is medically necessary for more than six months. MAA bases its decisions regarding requests for wheelchairs on medical necessity and on a case-by-case basis.

~~(3)~~ MAA considers rental or purchase of a manual wheelchair if the for a home client who is nonambulatory or...

~~(b)(ii)~~ Requires custom modifications that cannot be provided on a standard weight wheelchair, and.

~~(4)~~ MAA considers a power-drive wheelchair only if when the client's medical needs cannot be met by a less costly means of mobility.

~~(a)~~ The client has severe abnormal upper extremity weakness and the extent of the impairment is documented. (subsequent listing renumbered appropriately).

~~(d)~~ All other circumstances will be considered based on medical necessity and on a case-by-case basis.

~~(6)~~ In order to consider purchasing a wheelchair, MAA requires the provider to submit the following information from the prescribing physician, physical therapist, or occupational therapist.

~~(10)(c)(iii)~~ All other circumstances will be considered on a case-by-case basis, based on medical necessity.

WAC 388-543-2200:

~~(1)~~ MAA considers all requests on a case-by-case basis for augmentative communication devices (ACDs) for the purpose of appropriately relaying medical information.

PERMANENT

(2)(d) Documented trials of each ACD that the client has tried. This includes less costly types/models, and the effectiveness of each device in promoting the client's ability to communicate with health care providers, and caregivers, and others.

(3)(c)(ii) ...personal care needs; and

~~(iv) Improve excessive communication skills, vocabulary, and understanding; and~~

~~(v) Attain specific speech therapy goals and objectives in the speech treatment or training plan.~~

(4) MAA covers ACDs only once every two years for a client who meets the criteria in subsection (3) of this section. MAA does not approve a new or updated component, modification, or replacement model for a client whose ACD is less than two years old. MAA may make exceptions to the criteria in this subsection (3) of this section based strictly on a finding of unforeseeable and significant changes to the client's medical condition.

WAC 388-543-2300:

(3) All other circumstances will be considered on a case-by-case basis, based on medical necessity.

WAC 388-543-2400:

(1) Beds covered by MAA are limited to hospital beds for rental or purchase. MAA bases the decision to rent or purchase a manual, semi-electric, or full electric hospital bed on the length of time the client needs the bed, as follows:...

WAC 388-543-2400:

(1)(a) MAA initially authorizes a maximum of two months rental for a short-term need. Upon request, MAA may allow limitation extensions as medically necessary.

WAC 388-543-2400:

(4) All other circumstances will be considered on a case-by-case basis, based on medical necessity.

WAC 388-543-2600:

(1) MAA reimburses for prosthetics and orthotics to licensed prosthetic and orthotic providers only. This does not apply to: ~~selected prosthetics and orthotics that do not require special skills to provide.~~

(a) Selected prosthetics and orthotics that do not require special skills to provide; and

(b) Out-of-state providers who meet the licensure requirements of that state.

WAC 388-543-2700 Prosthetics and orthotics – reimbursement methodology.

(4) MAA evaluates and updates the maximum allowable fees for prosthetics and orthotics at least once per year, independent of legislatively authorized vendor rate increases. Rates remain effective until the next rate change.

~~(5) MAA implements fee schedule changes for prosthetics and orthotics July 1 of each year. Rates remain effective until the next rate change.~~ Reimbursement for prosthetics and orthotics is limited to HCPC/National Codes with the same level of coverage as Medicare.

(6) Reimbursement for gender dysphoria surgery includes payment for all related prosthetics and supplies.

WAC 388-543-2800:

(2) MAA bases its determination about which DME and related supplies, prosthetics, orthotics, medical supplies and related services require prior authorization (PA) or expedited prior authorization (EPA) on utilization criteria (see WAC 388-543-1000 for PA and WAC 388-543-1800 for EPA). MAA considers all of the following when establishing utilization criteria:

(a) High cost;

(b) The potential for utilization abuse;

(c) A narrow therapeutic indication; and

(d) Safety.

(3) MAA requires a provider to obtain a limitation extension in order to exceed the stated limits for nondurable medical equipment and medical supplies. See WAC 388-501-0165.

~~(2)~~ (4) MAA categorizes medical supplies and non-DME (MSE) as follows (see MAA's billing instructions for specific limitations):...

(k) Urological supplies (e.g., diapers, urinary retention catheters, pant liners and doublers); and

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

PERMANENT RULES

DEPARTMENT OF LICENSING

(Cosmetology)

[Filed December 14, 2000, 9:07 a.m.]

Date of Adoption: December 14, 2000.

Purpose: Repeal WAC 308-20-001 Authority and purpose, 308-20-005 Applicable statutes, 308-20-630 Worker right to know, 308-20-640 Educational, medical, first-aid,

and accident prevention programs, 308-20-670 Pets on the premises, 308-20-680 Compliance with state federal and local building codes, 308-20-690 Inspection of premises, and 308-20-700 Penalty for failure to obtain operator or location licenses or comply with statutes for regulatory authorities.

Citation of Existing Rules Affected by this Order: Repealing WAC 308-20-001, 308-20-005, 308-20-630, 308-20-640, 308-20-670, 308-20-680, 308-20-690, and 308-20-700.

Statutory Authority for Adoption: RCW 18.16.030(2).

Adopted under notice filed as WSR 00-22-101 on November 1, 2000.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 0, Amended 0, Repealed 0.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 0, Amended 0, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 0, Repealed 0.

Effective Date of Rule: Thirty-one days after filing.

December 14, 2000

Alan E. Rathbun
Assistant Director

WSR 01-01-097
PERMANENT RULES
DEPARTMENT OF
LABOR AND INDUSTRIES

[Filed December 15, 2000, 1:39 p.m., effective January 18, 2001]

Date of Adoption: December 15, 2000.

Purpose: Electrical rules. The purpose of this rule is to:

- Establish a new regulatory framework for telecommunications as a result of legislation that passed the legislature this session and was signed into law (2SSB 5802);
- Adopt either by reference or without material change national consensus codes;
- Permanently adopt the HVAC/refrigeration emergency amendments of March 1, 2000, and June 21, 2000;
- Apply clear rule-writing principles to the rules;
- Make clarifying and housekeeping changes;
- Address current policies relating to low voltage exemptions, automatic door openers, traffic signal and roadway illumination systems, and additional scope of work interpretations of electrical specialties - incorporate and/or eliminate these policies as directed by the Governor's Executive Order 97-02 on regulatory improvement; and

- Make several other amendments, including changes to the carnival rules.

This rule making will repeal chapters 296-46 and 296-401A WAC and replace them with new chapters 296-46A and 296-401B WAC, respectively.

Citation of Existing Rules Affected by this Order: Repealing chapters 296-46 and 296-401A WAC.

Statutory Authority for Adoption: RCW 19.28.031, 19.28.551, 19.28.010, 19.28.101, 19.28.171, 19.28.191, 19.28.251, 19.28.470, 19.28.490, 67.42.050, and 2SSB 5802 (chapter 238, Laws of 2000).

Other Authority: Chapter 19.28 RCW.

Adopted under notice filed as WSR 00-21-099 on October 18, 2000.

Changes Other than Editing from Proposed to Adopted Version: **WAC 296-46A-090 Foreword**, corrected the reference titles in the proposed rules for ANSI/TIA/EIA 570 to Residential Telecommunications Wiring Standard based on public comment. Also, replaced "latest edition," as it is used to reference the codes adopted under this section, with the specific year and amendments of the codes that are being adopted.

WAC 296-46A-092 Definitions, the following changes to the definition of "low voltage" were made to address public comment:

(12) "Low voltage" means:

(a) NEC, Class 1 power limited circuits at 30 volts maximum.

(b) NEC, Class 2 circuits ~~at 30 volts maximum powered by a Class 2 power supply as defined in Article 625-41(a) NEC.~~

(c) NEC, Class 3 circuits ~~at 100 volts maximum powered by a Class 3 power supply as defined in Article 625-41(a) NEC.~~

WAC 296-46A-100 Traffic management systems, the following change was made to address public comment:

"The department ~~may~~ will recognize the state department of transportation as the inspection authority for telecommunication systems installation within the rights of way of state highways provided the department of transportation maintains and enforces an equal, higher or better standard of construction and of materials, devices, appliances and equipment than is required for telecommunications systems installations by chapter 19.28 RCW and these rules."

WAC 296-46A-220 Branch circuit and feeder calculations, corrected a reference from "220(3) NEC" to "220-3 NEC."

WAC 296-46A-300 Wiring methods, created a new section to clarify that the requirements for cables and raceways for telecommunications, NEC Class 2 and Class 3 conductors must be installed in compliance with Chapter 3 NEC unless other methods are specifically allowed elsewhere in the NEC, chapter 19.28 RCW, or chapter 296-46A WAC.

WAC 296-46A-30011 Support of raceways and cables:

(1) Made clarification changes, renumbered the section to WAC 296-46A-30011, and changed the title based on public comment.

(2) A reference to Class 2 and Class 3 cables was added to WAC 296-46A-30001 (4)(b) based on public comment.

(3) Removed the requirement that raceways for NEC Class 2 and Class 3 conductors must be installed in compliance with Chapter 3 NEC as these requirements were moved to the new WAC 296-46A-300.

WAC 296-46A-550 Mobile/manufactured homes, clarified that electrical wiring in structures that are attached to the mobile/manufactured home and the source of power is from the mobile/manufactured home is inspected by the factory assembled structures section of the department to be consistent with current practice.

WAC 296-46A-600 Electrical signs, added a comma to subsection (1) of this section for ease of understanding and use. **WAC 296-46A-930 Electrical/telecommunications contractor license and administrator certificate designation:**

(1) Added the language "This specialty may perform the work defined in (ii) of this subsection" to subsection (2)(b)(i) of this section to clarify the work that may be done by this specialty.

(2) Added the language "This specialty may perform the work defined in (ii) of this subsection" to subsection (2)(e)(i) of this section to clarify the work that may be done by this specialty.

(3) Added the language "This specialty may perform the work defined in (ii) and (iii) of this subsection" to subsection (2)(f)(i) of this section to clarify the work that may be done by this specialty.

(4) Added the following language to subsection (2)(e)(i) of this section: "for purposes of accumulating training experience toward qualification for the residential electrician (02) specialty examination" in order to clarify the confusion identified with this section and based on public comment.

WAC 296-46A-934 Electrical contractor exemptions, clarified that low voltage thermocouple derived circuits and low voltage circuits must be powered from a listed Class 2 power supply in order to be exempt from the licensing requirements in chapter 19.28 RCW.

WAC 296-46A-950 Administrator certificate, added "Nonresidential maintenance (07)" to Table 950-1 to clarify that this specialty is also included in the temporary specialty administrator application/enforcement procedures. Also, changed the application and compliance dates for the HVAC/R specialty to allow more time for administrators to apply and pass the examination.

WAC 296-401B-340 Trainees working without supervision, made changes to subsections (3) and (5) to reconcile the changes made to WAC 296-46A-950.

WAC 296-401B-455 Opportunity for gaining credit for previous work experience in certain specialties, made changes to subsection (3) to reconcile the changes made to WAC 296-46A-950.

WAC 296-401B-920 Special enforcement procedures, made changes to Figure 1 (flow chart) to reconcile the changes made to WAC 296-46A-950.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal

Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 15, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 102, Amended 0, Repealed 86.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 102, Amended 0, Repealed 86.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 102, Amended 0, Repealed 86.

Effective Date of Rule: January 18, 2001.

December 15, 2000

Gary Moore
Director

REPEALER

The following chapter of the Washington Administrative Code is repealed:

WAC 296-46-090	Foreword.
WAC 296-46-100	Approval for conductors and equipment.
WAC 296-46-110	Marking of disconnecting means.
WAC 296-46-130	Classification or definition of occupancies.
WAC 296-46-140	Plan review for educational, institutional or health care facilities and other buildings.
WAC 296-46-155	Wiring methods for designated building occupancies.
WAC 296-46-180	Meter installation.
WAC 296-46-21008	Branch circuits.
WAC 296-46-21052	Receptacles.
WAC 296-46-220	Branch circuit and feeder calculations.
WAC 296-46-225	Outside branch circuits and feeders.
WAC 296-46-23001	Service requirements.
WAC 296-46-23028	Service or other masts.
WAC 296-46-23040	Service conductors.
WAC 296-46-23062	Service equipment.
WAC 296-46-30001	Support of raceways and cables in suspended ceilings.
WAC 296-46-316	Duct bank conductor ampacities.

PERMANENT

WAC 296-401A-420	Qualifying for reciprocal electrician certificate.
WAC 296-401A-430	Ineligibility for reciprocal electrician certificate.
WAC 296-401A-500	Renewal of training certificates.
WAC 296-401A-510	Computation of training hours.
WAC 296-401A-520	Training certificate levels.
WAC 296-401A-524	Credit for electrical work experience exempt from certification requirements.
WAC 296-401A-530	Trainees working without supervision.
WAC 296-401A-540	Who will not be issued training certificates?
WAC 296-401A-545	Audit of trainee hours.
WAC 296-401A-550	Penalties for false statements or material misrepresentations.
WAC 296-401A-600	Training course approval.
WAC 296-401A-610	Offering continuing education courses.
WAC 296-401A-620	Application for continuing education course approval.
WAC 296-401A-630	Documentation of training course completion.
WAC 296-401A-700	Fees for certificates of competency, examination and reciprocity.
WAC 296-401A-800	Enforcement.
WAC 296-401A-810	Failure to comply with electrician certification law.
WAC 296-401A-900	Appeal rights.
WAC 296-401A-910	Types of appeal hearings.
WAC 296-401A-920	Requesting an informal hearing.
WAC 296-401A-930	Requesting a formal hearing.
WAC 296-401A-935	Hearing deposits.

Chapter 296-46A WAC

SAFETY STANDARDS—INSTALLING ELECTRIC WIRES AND EQUIPMENT—ADMINISTRATIVE RULES

NEW SECTION

WAC 296-46A-090 Foreword. (1) The 1999 edition of the National Electrical Code (NFPA 70 - 1999) including Appendixes A, B, and C, the 1996 edition of Centrifugal Fire Pumps (NFPA 20 - 1996), the 1996 edition of Emergency and Standby Power Systems (NFPA 110 - 1996), Commercial Building Telecommunications Cabling Standard (ANSI/TIA/EIA 568-A-1995 including amendments 1 through 5), Commercial Building Standard for Telecommunications Pathway and Spaces (ANSI/TIA/EIA 569-A-1998 including amendments 1 through 4), Commercial Building Grounding and Bonding Requirements for Telecommunications (ANSI/TIA/EIA 607-1994), Residential Telecommunications Cable Standard (ANSI/TIA/EIA 570-A-1999), and the National Electrical Safety Code (NESC C2-1997 excluding Appendixes A and B) are hereby adopted by reference as part of this chapter. Other codes, manuals, and reference works referred to in this chapter are available for inspection and review in the Olympia office of the electrical section of the department during business hours. The requirements of this chapter will be observed where there is any conflict between this chapter and the National Electrical Code (NFPA 70), Centrifugal Fire Pumps (NFPA 20), the Emergency and Standby Power Systems (NFPA 110), ANSI/TIA/EIA 568-A, ANSI/TIA/EIA 569-A, ANSI/TIA/EIA 607, ANSI/TIA/EIA 570, or the National Electrical Safety Code. The National Electrical Code will be followed where there is any conflict between Centrifugal Fire Pumps (NFPA 20), Emergency and Standby Power Systems (NFPA 110), ANSI/TIA/EIA 568-A, ANSI/TIA/EIA 569-A, ANSI/TIA/EIA 607, ANSI/TIA/EIA 570, or the National Electrical Safety Code and the National Electrical Code (NFPA 70).

(2) Electrical inspectors will give information as to the meaning or application of the standards in subsection (1) of this section and this chapter, but will not lay out work or act as consultants for contractors, owners, or users.

(3) The department may enforce city electrical ordinances where those governmental agencies do not make electrical inspections under an established program.

NEW SECTION

WAC 296-46A-092 General definitions. (1) All definitions listed in the National Electrical Code and chapter 19.28 RCW are recognized in this chapter unless specific definitions are given in this chapter.

(2) "Electrical equipment" includes electrical conductors, conduit, raceway, apparatus, materials, components, and other electrical equipment.

(3) "Fished Wiring" is when cable or conduit is installed within the finished surfaces of an existing building or building structure (e.g., wall, floor or ceiling cavity).

(4) HVAC/refrigeration specific definitions:

(a) **"HVAC/refrigeration"** means heating, ventilation, air conditioning, and refrigeration.

(b) **"HVAC/refrigeration component"** means electrical power and limited energy components within the "HVAC/refrigeration system," including, but not limited to: Pumps, compressors, motors, heating coils, controls, switches, thermostats, humidistats, low voltage damper controls, outdoor sensing controls, outside air dampers, stand-alone duct smoke detectors, air monitoring devices, zone control valves and equipment for monitoring of HVAC/refrigeration control panels and low voltage connections. This definition excludes equipment and components of "non-HVAC/refrigeration control systems."

(c) **"HVAC/refrigeration control panel"** means an enclosed, manufactured assembly of electrical components designed specifically for the control of a HVAC/refrigeration system. Line voltage equipment that has low voltage, NEC class 2 control or monitoring components incidental to the designed purpose of the equipment is not an HVAC/refrigeration control panel (e.g., combination starters).

(d) **"HVAC/refrigeration control system"** means a network system regulating and/or monitoring a HVAC/refrigeration system. Equipment of a HVAC/refrigeration control system includes, but is not limited to: Control panels, data centers, relays, contactors, sensors, and cables related to the monitoring and control of a HVAC/refrigeration system(s).

(e) **"HVAC/refrigeration equipment"** means the central unit primary to the function of the "HVAC/refrigeration system." HVAC/refrigeration includes, but is not limited to: Heat pumps, swamp coolers, furnaces, compressor packages, and boilers.

(f) **"HVAC/refrigeration system"** means a system of HVAC/refrigeration equipment and HVAC/refrigeration components integrated to generate, deliver, or control heated, cooled, filtered, refrigerated, or conditioned air. This definition excludes equipment and components integral with non-HVAC/refrigeration control systems and line voltage branch circuits, feeders, services, panelboards, and disconnect switches supplying the HVAC/refrigeration system.

(5) **"Field evaluated"** means equipment has been evaluated and identified by a laboratory approved by the state of Washington for the appropriate equipment standard per chapter 296-402A WAC.

(6) **"Final judgment"** means any money that is owed to the department under this chapter or any money that is owed the department as a result of an individual's or a contractor's unsuccessful appeal of an infraction. Final judgment also includes any penalties owed the department as a result of an infraction not appealed or any outstanding fees due under this chapter.

(7) An **"installation"** includes the act of installing, connecting, repairing, modifying, or otherwise performing work on an electrical system, component, equipment, or wire except as allowed by WAC 296-46A-940.

(8) An **"identification plate"** is a phenolic or metallic plate or other similar material engraved in block letters at

least 1/4" (6mm) high unless specifically required to be larger by this chapter, suitable for the environment and application. The letters and the background must be in contrasting colors. Screws, rivets, or methods specifically described in chapter 296-46A WAC must be used to affix an identification plate to the equipment or enclosure.

(9) **"License"** means a license required under chapter 19.28 RCW.

(10) **"Like-in-kind"** means having similar characteristics such as voltage requirement, current draw, and function within the system.

(11) **"Listed"** means equipment has been listed and identified by a laboratory approved by the state of Washington for the appropriate equipment standard per chapter 296-402A WAC.

(12) **"Low voltage"** means:

(a) NEC, Class 1 power limited circuits at 30 volts maximum.

(b) NEC, Class 2 circuits powered by a Class 2 power supply as defined in Article 625-41(a) NEC.

(c) NEC, Class 3 circuits powered by a Class 3 power supply as defined in Article 625-41(a) NEC.

(d) Telecommunications circuits as defined in chapter 19.28 RCW.

(13) **"NEC"** means National Electrical Code.

(14) **"Point of contact,"** for utility work, means the point at which a customer's electrical system connects to the serving utility system.

(15) A **"stand-alone amplified sound or public address system"** is a system that has distinct wiring and equipment for audio signal generation, recording, processing, amplification, and reproduction. This definition does not apply to telecommunications installations.

(16) **"Under the control of a utility"** for the purposes of RCW 19.28.091 is when electrical equipment is owned by the utility or when electrical equipment is not owned by a utility and:

(a) Is located in a vault, room, closet, or similar enclosure that is secured by a lock or seal so that access is restricted to the utility's personnel; or

(b) The utility is obligated by contract to maintain the equipment and the contract provides that access to the equipment is restricted to the utility's personnel or other qualified personnel.

(17) **"Utility"** means an electrical utility.

(18) **"Utility system"** means electrical equipment owned by or under the control of a serving utility that is used for the transmission or distribution of electricity from the source of supply to the point of contact.

(19) **"Utilization voltage"** means the voltage level employed by the utility's customer for connection to lighting fixtures, motors, heaters, or other electrically operated equipment other than power transformers.

NEW SECTION

WAC 296-46A-095 Inspection. (1) Electrical wiring or equipment subject to this chapter must be sufficiently accessible, at the time of inspection, to permit the inspector to visu-

ally inspect the installation to verify conformance with the NEC, chapter 19.28 RCW and any other electrical requirements of chapter 296-46A WAC.

(2) Cables or raceways fished according to the NEC do not require visual inspection.

(3) Wires pulled into conduit systems are not considered concealed; except, all required equipment grounding conductors installed in concealed raceway, cable, or flexible conduit systems must be completely installed and made up at the time of the rough-in cover inspection.

NEW SECTION

WAC 296-46A-100 Approval for conductors and equipment. (1) In order to meet the minimum electrical safety standards for installations, all materials, devices, appliances, and equipment, not exempted in chapter 19.28 RCW, must conform to applicable standards recognized by the department, be listed, or field evaluated.

(2) Department electrical inspectors may inspect and approve industrial control panels and utilization equipment for compliance with codes, rules, and standards recognized by the department, on a case-by-case basis consistent with chapter 296-46A WAC.

(3) The department will recognize the state department of transportation as the inspection authority for telecommunication systems installation within the rights of way of state highways provided the department of transportation maintains and enforces an equal, higher or better standard of construction and of materials, devices, appliances and equipment than is required for telecommunications systems installations by chapter 19.28 RCW and these rules.

NEW SECTION

WAC 296-46A-102 Industrial control panel inspection. (1) Specific definitions:

(a) "**Food processing plants**" do not include:

- (i) Restaurants.
- (ii) Farming, ranching, or dairy farming operations.

(b) In chapter 19.28 RCW "**industrial control panel**" means a factory or user wired assembly of industrial control equipment such as motor controllers, switches, relays, power supplies, computers, cathode ray tubes, transducers, and auxiliary devices. The panel may include disconnect means and motor branch circuit protective devices. Industrial control panels include only those used in food processing, industrial, and manufacturing plants.

(c) "**Industrial plants**" do not include:

- (i) Municipal or other government facilities.
- (ii) Educational facilities or portions thereof.
- (iii) Institutional facilities or portions thereof.
- (iv) Other installations not used for direct production purposes.

(d) "**Manufacturing plants**" do not include:

- (i) Municipal or other government facilities.
- (ii) Educational facilities or portions thereof.
- (iii) Institutional facilities or portions thereof.

(iv) Other installations not used for direct production purposes.

(v) Home workshops.

(e) "**Normal department inspection**" is a part of the department electrical inspection process included with the general wiring inspection of a building, structure, or other electrical installation.

(f) "**Special department inspection**" is an electrical inspection, made by the department, when an industrial control or utilization equipment is not constructed entirely of listed components.

(g) "**Utilization equipment**" is the machine(s) and its integral components controlled by the "industrial control panel(s)" defined in this section.

(2) Industrial control panels will be determined to meet the minimum electrical safety standards for installations by:

(a) Listing, or field evaluation;

(b) Normal department inspection for compliance with codes and rules adopted under this chapter;

(c) Special department inspection requested by the industrial/control panel owner or agent.

(3) Utilization equipment will be determined to meet the minimum electrical safety standards for equipment by:

(a) Listing, or field evaluation;

(b) Normal department inspection by department electrical inspectors for compliance with codes and rules adopted under this chapter.

(4) Fees for special department inspections required under this chapter; including: Portal to portal inspection time, the time to prepare reports, and state rate per diem travel costs (if applicable); will be calculated under WAC 296-46A-910.

(5) Fees for the normal department inspections required under this chapter are included in the electrical work permit fee calculated for the installation and are not a separate inspection fee.

(6) Requests for special department inspections under this chapter must be on department furnished forms identifying the request as an "industrial control panel" inspection.

(7) Requirements and procedures for a special department inspection:

(a) The department may require that electrical power to the industrial control panel be deenergized and locked out or disconnected while performing the inspection.

(b) The department may authorize use of the industrial control panel before its inspection.

(c) All components of the industrial control panel must be marked in compliance with Article 110-21 NEC. The special inspection requestor must supply a statement from the manufacturer stating the industrial control panel and its components are safe for the intended use and conform to the requirements of the NEC, chapter 296-46A WAC, and other standards currently adopted by the department. This statement must be furnished to the department before a special inspection is performed and will become a part of the permanent special inspection file kept by the department. The department will not approve any component that is not listed, recognized, field evaluated, or manufactured to nationally

recognized testing laboratory standards unless the component is protected in a manner approved by the department.

(d) Deficiencies:

(i) Will be referenced by the department citing the appropriate code or rule by publication and section.

(ii) Will be required to be corrected prior to approval by the department.

(iii) Will be required to be corrected and the department notified of such corrections, within fifteen days of the date the deficiency was formally identified by the department.

(iv) A longer time to correct a deficiency(ies) may be requested. The department will determine an appropriate time frame consistent with the reason for the request.

(v) The department may authorize the industrial control panel to be or remain energized and in service while the deficiencies are being corrected.

(vi) A copy of all deficiencies will be given to the requestor when identified by the department.

(e) A copy of the special department inspection report and approval will be given to the owner or operator of the facility and to the special inspection requestor upon final approval and will include:

(i) Pertinent test evaluation data and identification of tests or inspections including anomalies.

(ii) Name of inspection requestor.

(iii) Designation of standards used to certify or test the product including edition and latest revision (e.g., UL 508, 16th Edition, Feb. 1993, Revision Oct. 9, 1997).

(iv) Description and identification of the nonlisted component(s) requiring evaluation or replacement.

(v) Description of the overall product evaluated to include full nameplate data and equipment type.

(vi) Signature of person(s) having responsibility for the report.

(vii) Any condition of acceptability or restrictions on use/relocation.

(viii) Serial number(s) of the special department inspection label(s) applied will be included with the equipment identification.

(ix) The department file identification number.

NEW SECTION

WAC 296-46A-104 Traffic management systems. (1)

A traffic management system includes:

(a) Traffic illumination systems.

(b) Traffic signal systems.

(c) Traffic monitoring systems.

(d) The electrical service cabinet and all related components and equipment installed on the load side of the service cabinet supplying electrical power to the traffic management system.

The department will perform the electrical inspection and acceptance of traffic management systems within its jurisdiction.

(2) The department recognizes that traffic signal conductors, pole and bracket cables, signal displays, and traffic signal controllers/cabinets and associated components used in traffic management systems are acceptable for the purpose of meeting the requirements of chapter 19.28 RCW provided

they conform with the following applicable standards or are listed on the Washington state department of transportation (WSDOT) qualified products list.

(a) WSDOT/APWA Standard Specifications and Plans.

(b) WSDOT Design Manual.

(c) International Municipal Signal Association (IMSA).

(d) National Electrical Manufacturers Association (NEMA).

(e) Federal Standards 170/Controller Cabinets.

(f) Manual for Uniform Road, Bridge, and Municipal Construction.

(g) Institute of Transportation Engineers (ITE).

(h) Manual of Uniform Traffic Control Devices (MUTCD).

(3) Associated induction detection loop or similar circuits will be accepted by the department without inspection.

(4) For the licensing requirements of chapter 19.28 RCW, jurisdictions will be considered owners of traffic management systems when doing electrical work for other jurisdiction(s) under a valid interlocal agreement, as permitted by chapter 39.34 RCW. Interlocal agreements for traffic management systems must be filed with the department prior to work being performed for this provision to apply.

(5) Jurisdictions, with an established electrical inspection authority, and WSDOT may perform electrical inspection on their rights-of-way for each other by interlocal agreement. They may not perform electrical inspection on other rights-of-way except as allowed in chapter 19.28 or 39.34 RCW.

(6) Underground installations.

(a) In other than open trenching, raceways will be considered "fished" according to the NEC and do not require visual inspection.

(b) Inspections in open trenching will be conducted by the department within its jurisdiction. The electrical work permit purchaser must coordinate the electrical inspection. A written request (e.g., letter, e-mail, fax, etc.) for inspection, made to the department office having the responsibility to perform the inspection, must be made a minimum of two working days prior to the inspection need (e.g., two working days - 10:00 a.m. Tuesday request for a 10:00 a.m. Thursday inspection, excluding holidays and weekends).

If, after proper written request, the department fails to make an electrical inspection at the time requested, underground conduit may be covered after inspection by the local government jurisdiction's project inspector/designee. Written documentation of a local government jurisdiction inspection must be provided to the department when requested. Written documentation will include:

(i) Date of inspection.

(ii) Location.

(iii) Installing firm.

(iv) Owner.

(v) Type of conduit.

(vi) Size of conduit.

(vii) Depth of conduit.

(viii) Project inspector/designee name.

(7) Identification of traffic management system components. Local government jurisdictions or WSDOT may act as

the certifying authority for the safety evaluation of components.

(a) An electrical service cabinet must contain only listed components. The electrical service cabinet enclosure is not required to be listed but will conform to subsection (2) of this section.

(b) The local government jurisdiction must identify, as acceptable, the controller cabinet with an identification plate. The identification plate must be located inside the cabinet and may be attached with adhesive.

(8) Conductors of different circuits in same cable, enclosure, or raceway.

All traffic management system circuits will be permitted to occupy the same cable, enclosure, or raceway without regard to voltage characteristics, provided all conductors are insulated for the maximum voltage of any conductor in the cable, enclosure, or raceway.

NEW SECTION

WAC 296-46A-110 Identification methods. (1) Each cable operating at over 600v and installed on customer owned systems must be legibly marked in a permanent manner at each termination point and at each point the cable is accessible. The required marking must use phase designation, operating voltage, and circuit number if applicable.

(2) Where electrical equipment is installed to obtain a series combination rating, the identification as required by Article 110-22 NEC, must be in the form of an identification plate that is substantially yellow in color. The words "CAUTION - SERIES RATED SYSTEM" must be on the label in letters at least 1/2" (13mm) high.

NEW SECTION

WAC 296-46A-130 Classification or definition of occupancies. Occupancies are classified and defined by the agency that registers or licenses or defines their operation or occupancy, as follows:

(1) Educational facility refers to a building or portion of a building used primarily for educational purposes by six or more persons at one time for twelve hours per week or four hours in any one day. Educational occupancy includes: Schools (preschool through grade 12), colleges, academies, universities, and trade schools.

(2) Institutional facility refers to a building or portion of a building used primarily for detention and correctional occupancies where some degree of restraint or security is required. Such occupancies include, but are not restricted to: Penal institutions, reformatories, jails, detention centers, correctional centers, and residential-restrained care.

(3) Health or personal care facility. Health or personal care facility refers to buildings or parts of buildings that contain, but are not limited to, facilities that are required to be licensed by the department of social and health services (e.g., hospitals, nursing homes, private alcoholism hospitals, private psychiatric hospitals, boarding homes, alcoholism treatment facilities, maternity homes, birth centers or childbirth centers, residential treatment facilities for psychiatrically impaired children and youths, and renal hemodialysis clinics)

and medical, dental or chiropractic offices or clinics, outpatient or ambulatory surgical clinics, and such other health care occupancies where patients who may be unable to provide for their own needs and safety without the assistance of another person are treated.

(a) "Hospital" means any institution, place, building, or agency providing accommodations, facilities and services over a continuous period of twenty-four hours or more, for observation, diagnosis, or care of two or more individuals not related to the operator who are suffering from illness, injury, deformity, or abnormality, or from any other condition for which obstetrical, medical, or surgical services would be appropriate for care or diagnosis.

(b) "Nursing home unit" or "long-term care unit" means a group of beds for the accommodation of patients who, because of chronic illness or physical infirmities require skilled nursing care and related medical services but are not acutely ill and not in need of the highly technical or specialized services ordinarily a part of hospital care.

(c) "Boarding home" means any home or other institution, however named, which is advertised, announced, or maintained for the express or implied purpose of providing board and domiciliary care to three or more aged persons not related by blood or marriage to the operator. It must not include any home, institution, or section thereof which is otherwise licensed and regulated under the provisions of state law providing specifically for the licensing and regulation of such home, institution, or section thereof.

(d) "Private alcoholism hospital" means an institution, facility, building, or equivalent designed, organized, maintained, and operated to provide diagnosis, treatment, and care of individuals demonstrating signs or symptoms of alcoholism, including the complications of associated substance use and other medical diseases that can be appropriately treated and cared for in the facility and providing accommodations, medical services, and other necessary services over a continuous period of twenty-four hours or more for two or more individuals unrelated to the operator, provided that this chapter will not apply to any facility, agency, or other entity which is owned and operated by a public or governmental body.

(e) "Alcoholism treatment facility" means a private place or establishment, other than a licensed hospital, operated primarily for the treatment of alcoholism.

(f) "Private psychiatric hospital" means a privately owned and operated establishment or institution which: Provides accommodations and services over a continuous period of twenty-four hours or more: And is expressly and exclusively for observing, diagnosing, or caring for two or more individuals with signs or symptoms of mental illness, who are not related to the licensee.

(g) "Maternity home" means any home, place, hospital, or institution in which facilities are maintained for the care of four or more women, not related by blood or marriage to the operator, during pregnancy or during or within ten days after delivery: Provided, however, That this definition will not apply to any hospital approved by the American College of Surgeons, American Osteopathic Association or its successor.

(h) "Birth center" or "childbirth center" means a type of maternity home which is a house, building, or equivalent

organized to provide facilities and staff to support a birth service, provided that the birth service is limited to low-risk maternal clients during the intrapartum period.

(i) "Ambulatory surgical facility" means a facility, not a part of a hospital, providing surgical treatment to patients not requiring inpatient care in a hospital. This term does not include a facility in the offices of private physicians or dentists, whether for individual or group practice, if the privilege of using such facility is not extended to physicians or dentists outside the individual or group practice. (NEC; Ambulatory Health Care Center.)

(j) "Hospice care center" means any building, facility, place, or equivalent, organized, maintained, and operated specifically to provide beds, accommodations, facilities, and services over a continuous period of twenty-four hours or more for palliative care of two or more individuals, not related to the operator, who are diagnosed as being in the latter stages of an advanced disease which is expected to lead to death.

(k) "Renal hemodialysis clinic" is a facility in a building or part of a building which is approved to furnish the full spectrum of diagnostic, therapeutic, and rehabilitative services required for the care of renal dialysis patients (including inpatient dialysis furnished directly or under arrangement). (NEC; Ambulatory Health Care Center.)

(l) "Medical, dental, and chiropractic clinic" means any clinic or physicians' office where patients are not regularly kept as bed patients for twenty-four hours or more. Electrical plan review not required.

(m) "Residential treatment facility for psychiatrically impaired children and youth" means a residence, place, or facility designed and organized to provide twenty-four hour residential care and long-term individualized, active treatment for clients who have been diagnosed or evaluated as psychiatrically impaired.

(n) "Adult residential rehabilitation center" means a residence, place, or facility designed and organized primarily to provide twenty-four hour residential care, crisis and short-term care and/or long-term individualized active treatment and rehabilitation for clients diagnosed or evaluated as psychiatrically impaired or chronically mentally ill as defined herein or in chapter 71.24 RCW.

(o) "Group care facility" means a facility other than a foster-family home maintained and operated for the care of a group of children on a twenty-four-hour basis.

(4) Licensed day care centers.

(a) "Child day care center" means a facility providing regularly scheduled care for a group of children one month of age through twelve years of age for periods less than twenty-four hours; except, a program meeting the definition of a family child care home will not be licensed as a day care center without meeting the requirements of WAC 388-150-020 (5)(a).

(b) "School-age child care center" means a program operating in a facility other than a private residence accountable for school-age children when school is not in session. It must meet department licensing requirements, provide adult supervised care, and a variety of developmentally appropriate activities.

(c) "Family child day care home" means the same as "family child care home" and "a child day care facility" licensed by the state, located in the family abode of the person or persons under whose direct care and supervision the child is placed, for the care of twelve or fewer children, including children who reside at the home. Electrical plan review not required.

NEW SECTION

WAC 296-46A-140 Plan review for educational, institutional or health care facilities and other buildings.

(1) Plan review is a part of the electrical inspection process; its primary purpose is to determine that loads are calculated per the proper NEC or WAC article or section and that conductors and equipment are adequately sized and rated to the calculated load.

(2) All electrical plans for new or altered electrical installations in educational, institutional, and health or personal care occupancies classified or defined in this chapter must be reviewed and approved before the electrical installation or alteration is begun.

(3) All electrical plans for educational, hospital and nursing home occupancies must be prepared by, or under the direction of, a consulting electrical engineer registered under chapter 18.43 RCW, and chapters 246A-320, 180-29, and 388-97 WAC and stamped with the engineer's mark and signature.

(4) Plans for these electrical installations within cities that perform electrical inspections within their jurisdiction, and provide an electrical plan review program that equals or exceeds the department's program in plans examiner minimum qualifications per chapter 19.28 RCW, must be submitted to that city for review rather than to the department, unless the agency licensing or regulating the installation specifically requires review by the department.

(5) Refer plans for department review to the Electrical Inspection Section, Department of Labor and Industries, P.O. Box 44460, Olympia, Washington 98504-4460.

(6) Approved plans must be available on the job site for use during the electrical installation or alteration and for use by the electrical inspector.

(7) Plans to be reviewed by the department must be legible, identify the name and classification of the facility, clearly indicate the scope and nature of the installation and the person or firm responsible for the electrical plans. The plans must clearly show the electrical installation or alteration in floor plan view, include switchboard and/or panelboard schedules and when a service or feeder is to be installed or altered, must include a riser diagram, load calculation, fault current calculation and interrupting rating of equipment. Where existing electrical systems are to supply additional loads, the plans must include documentation that proves adequate capacity and ratings. The plans must be submitted with a plan review submittal form available from the department. All required fees will be paid after the review is completed. Approved plans will be returned when all fees are paid.

(8) Plan review for new or altered electrical installations of other types of construction may be voluntarily requested by the owner or electrical contractor.

(9) For existing structures where additions or alterations to feeders and services are proposed, Article 220-35(1) NEC may be used. If Article 220-35(1) NEC is used, the following is required:

- (a) The date of the measurements.
- (b) A statement attesting to the validity of the demand data, signed by a professional electrical engineer or the electrical administrator of the electrical contractor performing the work.

(c) A diagram of the electrical system identifying the point(s) of measurement.

(d) Building demand measured continuously on the highest-loaded phase of the feeder or service over a thirty-day period, with demand peak clearly identified. (Demand peak is defined as the maximum average demand over a fifteen-minute interval.)

(10) Due to their minimal load requirements, plan review of the following limited energy systems will not be required: Fire alarm, nurse call, intrusion or security alarm, intercom, public address, music, energy management, programmed clock, or telecommunications.

(11) When the service or feeder load calculation is affected five percent or less by the addition or alteration of five or less branch circuits, plan review for the branch circuits may be requested from the department's local inspection office. Permission for such small project plan review may be granted at the discretion of the electrical inspection field supervisor, the plans examiner supervisor, or the chief electrical inspector.

NEW SECTION

WAC 296-46A-155 Wiring methods for designated building occupancies. Wiring methods, equipment and devices for health or personal care, educational and institutional facilities as defined or classified in this chapter and for places of assembly for one hundred or more persons must comply with Tables 1 and 2 and the notes thereto. For determining the occupant load of places of assembly, the methods of the currently adopted edition of the Uniform Building Code must be used.

Table 1
Health or Personal Care Facilities
Electrical System - Wiring Methods

Health or Personal Care Facility Type	Power and Lighting	Emergency Power and Lighting	Limited Energy Systems	Patient Care Areas	Plan Review
Hospital	1	1	1	1	YES
Nursing home unit or long-term care unit	1	1	1	1	YES
Boarding home or assisted living facility	1	1	1		YES

Health or Personal Care Facility Type	Power and Lighting	Emergency Power and Lighting	Limited Energy Systems	Patient Care Areas	Plan Review
Private alcoholism hospital	1	1	1	1	YES
Alcoholism treatment facility	1	1	1		YES
Private psychiatric hospital	1	1	1	1	YES
Maternity home	1	1	1	1	YES
Birth center or childbirth center	1	1	1	1	NO
Ambulatory surgery facility	1	1	1	1	YES
Hospice care center	1		1		NO
Renal hemodialysis clinic	1	1	1	1	YES
Medical, dental, and chiropractic clinic	1	1	1	1	NO
Residential treatment facility for psychiatrically impaired children and youth	1	1	1	1	YES
Adultresidential rehabilitation center	1	1	1		YES
Group care facility	1	1	1		NO

Table 2
Educational and Institutional Facilities,
Places of Assembly or Other Facilities
Electrical System - Wiring Methods

Educational, Institutional or Other Facility Type	Power and Lighting	Emergency Power and Lighting	Limited Energy Systems	Plan Review Required
Educational	2	2	1	YES
Institutional	2	2	1	YES
Places of assembly for 100 or more persons	1	1	1	NO
Child day care center	1	1	1	NO
School-age child care center	1	1	1	NO
Family child day care home, family child care home, or child day care facility	1	1	1	NO

Notes to Tables 1 and 2

1. Wiring methods in accordance with the NEC.
2. Metallic or nonmetallic raceways, MI, MC, or AC cable.

PERMANENT

NEW SECTION**WAC 296-46A-21052 Tamper resistant receptacles.**

Listed tamper resistant receptacles or listed tamper resistant cover plates are required in licensed day care facilities, pediatric, or psychiatric patient care areas for 15 or 20 ampere, 125 volt receptacles.

NEW SECTION

WAC 296-46A-215 Feeders—Ground fault protection testing. Equipment ground fault protection systems required by the NEC must be tested prior to being placed into service to verify proper installation and operation of the system as determined by the manufacturer's published instructions. This test or a subsequent test must include all system feeders. The test must be performed by a firm that has qualified personnel and proper equipment to perform the tests required. A copy of the manufacturer's performance testing instructions and a written performance acceptance test record signed by the person performing the test must be provided for the inspector's records at the time of inspection. The performance acceptance test record must include test details including, but not limited to: All trip settings and measurements taken during the test.

NEW SECTION

WAC 296-46A-220 Branch circuit and feeder calculations. (1) Circuits must be taken to all unfinished spaces adaptable to future dwelling unit living areas which are not readily accessible to the service or branch circuit panelboard. The circuits must terminate in a suitable box(es). The box must contain an identification of the intended purpose of the circuit(s). The branch circuit panelboard must have adequate space and capacity for the intended load(s).

(2) Occupancy lighting loads. In determining feeder and service entrance conductor sizes and equipment ratings, the currently adopted Washington state energy code unit lighting power allowance table and footnotes may be used in lieu of 220-3 NEC.

NEW SECTION

WAC 296-46A-22530 More than one building or other structure. The building disconnecting means required by Article 225-32 NEC (except for Exceptions 1, 2, 3, or 4), must be provided to disconnect all ungrounded conductors that supply or pass through a building or structure per the requirements of NEC 225-32 (except for Exceptions 1, 2, 3, or 4) in accordance with subsection (1) or (2) of this section.

(1) Outside feeder: Where the feeder disconnecting means is installed outside a building or structure it must be on the building or structure or within sight and within fifteen feet of the building or structure supplied. The building disconnecting means may supply only one building/structure unless the secondary building(s)/structure(s) has a separate building disconnecting means meeting the requirements of the NEC and this subsection. The disconnecting means must have an identification plate with 1/2" high letters identifying:

- (a) The building/structure served;
 - (b) Its function as the building/structure main disconnect(s).
- (2) Inside: The feeder disconnecting means may be installed anywhere inside a building or structure when there is a feeder disconnecting means, located elsewhere on the premises, with overcurrent protection sized for the feeder conductors.

NEW SECTION

WAC 296-46A-23001 Service requirements. (1) The serving utility must be consulted by the owner, the owner's agent, or the contractor making the installation regarding the service entrance location and meter equipment requirements before installing the service and equipment. Provisions for a meter and related equipment, an attachment of a service drop, or an underground service lateral must be made at a location acceptable to the serving utility. The point of contact for a service drop must permit the clearances required by the NEC.

(2) A fire wall must have a minimum two-hour rating as defined by the Uniform Building Code to be considered a building separation in accordance with Article 100 NEC. Buildings of more than one-hour fire-rated construction must have a fire wall separation in compliance with the Uniform Building Code.

(3) The height of the center of the service meter must be as required by the serving utility. Secondary instrument transformer metering conductor(s) are not permitted in the service raceway.

NEW SECTION

WAC 296-46A-23028 Service or other masts. Conduit extended through the roof to provide means of attaching:

(1) All overhead drops for service, feeder, or branch circuits exceeding #1 aluminum or #3 copper must be rigid steel galvanized conduit no smaller than 2-inch.

(2) All overhead drops for service, feeder or branch circuits not exceeding #1 aluminum or #3 copper must be rigid steel galvanized conduit no smaller than 1 1/4-inch.

The installation must comply with drawings E-101 and/or E-102, or must provide equivalent strength by other approved means. Masts for altered or relocated installations will be permitted to comply with drawing E-103.

Notes to drawings E-101, E-102, and E-103.

1. An approved roof flashing must be installed on each mast where it passes through a roof. Plastic, nonhardening mastic must be placed between lead-type flashings and the conduit. Neoprene type flashings will also be permitted to be used.
2. Masts must be braced, secured, and supported in such a manner that no pressure from the attached conductors will be exerted on a roof flashing, meter base, or other enclosures.
3. Utilization of couplings for a mast are permitted only below the point the mast is braced, secured, or supported.
4. Except as otherwise required by the serving utility, service mast support guys must be installed if the service drop attaches to the mast more than 24 inches above the roof line or if the service drop is greater than 100 feet in length from the pole or support. Masts for support of other than service drops must comply with this requirement as well.
5. Intermediate support masts must be installed in an approved manner with methods identical or equal to those required for service masts.

6. For altered services, where it is impractical to install U bolt supports due to interior walls remaining closed, it will be permissible to use other alternate mast support methods such as heavy gauge, galva-

nized, electrical channel material that is secured to two or more wooden studs with 5/16-inch diameter or larger galvanized lag bolts.

NEW SECTION

WAC 296-46A-23040 Service conductors. (1) Service entrance conductors must extend at least eighteen inches from the service head to permit connection to the service drop.

(2) Installation of service conductors.

(a) The installation of service conductors not exceeding 600 volts, nominal, within a building or structure is limited to the following methods: Galvanized or aluminum rigid metal conduit; galvanized intermediate metal conduit; wireways; busways; auxiliary gutters; rigid nonmetallic conduit; cablebus; or mineral-insulated, metal-sheathed cable (type MI).

(b) The installation of service conductors exceeding 600 volts, nominal, within a building or structure must be limited to the following methods: Galvanized rigid metal conduit; galvanized intermediate metal conduit; metal-clad cable that is exposed for its entire length; cablebus; or busways.

(c) In addition to methods allowed in the NEC, the grounded service conductor is permitted to be identified with a yellow jacket or with one or more yellow stripes.

(3) Service conductors under the control of the utility, where installed within a building or structure, must be installed in rigid steel galvanized conduit or Schedule 80 nonmetallic conduit.

(4) Multiple-occupancy buildings. A second or additional service drop or lateral to a building having more than one occupancy will be permitted to be installed at a location separate from other service drops or laterals to the building provided that all the following conditions are complied with:

(a) Each service drop or lateral is sized in accordance with the NEC for the calculated load to be served by the conductors;

(b) Each service drop or lateral terminates in listed metering/service equipment that is located in or on a unit served by the service equipment. Each occupant must have access to the occupant's service disconnecting means;

(c) The service drops or laterals originate at the same transformer or power supply;

(d) The service equipment is separated at least fifteen feet from other service equipment in or on the building; and

(e) A permanent label is placed at each service equipment location that identifies all other service equipment locations in or on the building and the area or units served by each.

EXCEPTION: Service drops and laterals for two-family dwellings may terminate in meter enclosures located less than fifteen feet apart.

(5) The service disconnecting means must be installed at a readily accessible location in accordance with (a) or (b) of this subsection.

(a) Outside: Service disconnecting means will be permitted on the building or structure or within sight and within fifteen feet of the building or structure served. The building disconnecting means may supply only one building/structure. The service disconnecting means must have an identification plate with 1/2" high letters identifying:

(i) The building/structure served;

(ii) Its function as the building/structure main service disconnect(s).

(b) Inside: When the service disconnecting means is installed inside the building or structure, it must be located so that the service raceway extends no more than fifteen feet inside the building/structure.

(6) If the service conductors have a lesser ampacity than the overcurrent protection or the equipment rating that they terminate in or on, an identification plate with the ampacity of the conductors must be installed on the equipment.

NEW SECTION

WAC 296-46A-23062 Service equipment. (1) Service equipment, subpanels, and similar electrical equipment must be installed so that they are readily accessible and may not be installed in bathrooms, clothes closets, or shower rooms. All indoor service equipment and subpanel equipment must have adequate working space and be adequately illuminated.

(2) Temporary construction service equipment may only be used for construction purposes and must be disconnected when the permanent service is connected unless an extension for a definite period of time is granted by the department.

(3) Equipment ground fault protection systems required by the NEC must be tested prior to being placed into service to verify proper installation and operation of the system as determined by the manufacturer's published instructions. This test or a subsequent test must include all service voltage feeders. The test must be performed by a firm that has qualified personnel and proper equipment to perform the tests required. A copy of the manufacturer's performance testing instructions and a written performance acceptance test record signed by the person performing the test must be provided for the inspector's records at the time of inspection. The performance acceptance test record must include test details including, but not limited to: All trip settings and measurements taken during the test.

NEW SECTION

WAC 296-46A-250 Grounding and bonding. (1) Metallic stubs or valves used in nonmetallic plumbing systems are not required to be grounded or bonded to the electrical system unless required by an electrical equipment manufacturer's instructions.

(2) Hot and cold water plumbing lines are not required to be bonded together if, at the time of inspection, the inspector can determine the lines are mechanically and electrically joined by one or more metallic mixing valves.

(3) A temporary construction service is permitted to have only one made electrode.

(4) If a ground resistance test is not performed to ensure a resistance to ground of 25 ohms or less, two or more electrodes as specified in Article 250-52 NEC must be installed a minimum of six feet apart.

NEW SECTION

WAC 296-46A-300 Wiring methods. Cables and raceways for telecommunications, NEC Class 2 and Class 3 conductors must be installed in compliance with Chapter 3 NEC

PERMANENT

unless other methods are specifically allowed elsewhere in the NEC, chapter 19.28 RCW, or this chapter.

NEW SECTION

WAC 296-46A-30011 Support of raceways, cables, or boxes in suspended ceilings. (1) NEC Class 2, and Class 3 cables must be secured in compliance with Article 336-18 NEC and must be secured to boxes in compliance with Article 370-17 NEC.

(2) Telecommunications cables must be secured in a manner that will not cause damage to the cables and at intervals not exceeding five feet. Cables are considered adequately supported when run through holes in building structural elements or other supporting elements. Telecommunications cables may be fished into inaccessible hollow spaces of finished buildings. Clamps or fittings are not required where telecommunications cables enter boxes.

(3) Optical fiber cables must be secured in a manner that will not cause damage to the cables and at intervals not exceeding five feet. Cables are considered adequately supported when run through holes in building structural elements or other supporting elements. Optical fiber cables may be fished into inaccessible hollow spaces of finished buildings. Supports must allow a bending radius that will not cause damage to the cables.

(4) The wires required in Article 300-11(a) NEC may support raceways, cables, or boxes under the following conditions:

(a) Raceways and/or cables are not larger than 3/4-inch trade size.

(b) No more than two raceways or cables are supported by a support wire. The two-cable limitation does not apply to telecommunications cables, Class 2 cables, or Class 3 cables on support wires installed exclusively for telecommunications cables, Class 2 cables, or Class 3 cables and secured with fittings adequate to carry the cable weight.

(c) Raceways and cables are secured to the support wires by fittings designed and manufactured for the purpose.

(d) The support wires are minimum Number 12 gauge and are securely fastened to the structural ceiling and to the ceiling grid system.

(e) The raceways or cables serve equipment that is located within the ceiling cavity or is mounted on or supported by the ceiling grid system. Telecommunications cables, Class 2 cables, or Class 3 cables supported as required by this section, may pass through ceiling cavities without serving equipment mounted on or supported by the ceiling grid system.

(f) Where not restricted by the building code official or Article 300 NEC.

NEW SECTION

WAC 296-46A-324 Knob-and-tube wiring. Article 324 NEC does not prohibit the installation of loose or rolled thermal insulating material in spaces containing existing knob-and-tube wiring provided that all the following conditions are met:

(1) The wiring must be surveyed by an appropriately licensed electrical contractor who must certify that the wiring is in good condition with no evidence of improper overcurrent protection, conductor insulation failure or deterioration, and with no improper connections or splices. All repairs, alterations, or extensions to the electrical system must be inspected by an electrical inspector as defined in chapter 19.28 RCW.

(2) The insulation must meet Class I specifications as identified in the Uniform Building Code, with a flame spread factor of twenty-five or less as tested using ASTM E84-81a. Foam insulation may not be used with knob-and-tube wiring.

(3) All knob-and-tube circuits must have overcurrent protection in compliance with the 60 degree C column of Table 310-16 of the NEC. Overcurrent protection must be either circuit breakers or Type S fuses.

NEW SECTION

WAC 296-46A-348 Electrical metallic tubing. (1) In addition to complying with the provisions of Article 348 NEC, electrical metallic tubing may not be installed in direct contact with the earth or in concrete on or below grade. See also Article 300-6 NEC.

(2) Electrical metallic tubing must not be installed as the wiring method for service entrance conductors inside a building. Existing electrical metallic tubing, installed prior to October 1984, which is properly grounded and used for service entrance conductors may be permitted to remain if the conduit is installed in a nonaccessible location and of the proper size for the installed conductors.

NEW SECTION

WAC 296-46A-365 Concerts, motion picture productions, stage shows, and similar shows. (1) Service equipment, separately derived systems, feeders and circuits for concerts, motion picture productions, stage shows, and similar shows, must comply with the NEC and this chapter.

(2) The ampacity of cords and cables must be determined from the appropriate Article 400 NEC cord and cable ampacity tables including all notes.

NEW SECTION

WAC 296-46A-370 Boxes and fittings. Single conductors, cables, taps, or splices installed in an open bottom junction box or handhole must be suitable for direct burial. However, an open bottom box manufactured specifically for electrical use will be permitted to be used as an electrical junction box to enclose single conductors, cables, taps, or splices rated for wet locations, only under the following conditions:

(1) In vehicular traffic areas the box must be rated for not less than H-20 loading and be provided with a bolted, hinged, or slide-on lid embossed with the identification "ELECTRIC" or "ELECTRICAL."

(2) In incidental vehicular traffic areas (e.g., parks, sports fields, sidewalks, grass lawns, etc.) the box must be rated for not less than H-10 loading and be provided with a

bolted, hinged, or slide-on lid embossed with the identification "ELECTRIC" or "ELECTRICAL."

(3) In nonvehicular traffic areas (e.g., flower beds, patio decks, etc.) the box must be designed for the purpose and be provided with a lid embossed with the identification "ELECTRIC" or "ELECTRICAL."

(4) All conductors must be installed in approved electrical raceways that enter vertically from the open bottom of the enclosure. These raceways must be fitted with a bushing, terminal fitting, or seal incorporating the physical protection characteristics of a bushing, and project not less than two inches (5 cm) above the bottom surface material. The bottom surface material must be pea gravel or sand a minimum of two inches (5 cm) thick or more if required by the box manufacturer.

NEW SECTION

WAC 296-46A-41004 Lighting fixtures. All lighting fixtures within an enclosed shower area or within five feet of the waterline of a bathtub must be totally enclosed.

NEW SECTION

WAC 296-46A-41030 Flexible cord connection pendant boxes and electric discharge fixtures. (1) The flexible cord connection must comply with Article 410-30 NEC.

(2) Connection to a suspended pendant box must utilize an integral threaded hub.

(3) The length of the cord for a suspended pendant drop from a permanently installed junction box to a suitable tension take-up device must not exceed six feet.

(4) Flexible cord used to connect electric discharge fixtures must comply with Article 410-30 NEC.

(5) The flexible cord must be supported at each end with an approved cord grip or strain relief connector fitting/device that will eliminate all stress on the conductor connections.

(6) The flexible cord must be a minimum number 14 AWG.

(7) The flexible cord ampacity must be determined in Table 400-5(A) column A NEC.

(8) The flexible cord must be hard or extra hard usage.

(9) A vertical flexible cord supplying electric discharge fixtures must be secured to the fixture support as per Article 336-18 NEC.

NEW SECTION

WAC 296-46A-422 Water heater circuit. Water heaters which have a rated circuit load in excess of 3,500 watts at 240 volts must be provided with branch circuit conductors not smaller than No. 10 AWG copper or equal.

NEW SECTION

WAC 296-46A-450 Transformers. (1) Transformers not under the control of a utility, with a primary voltage greater than 600 volts must be provided with a disconnecting means meeting the requirements of Article 230-205 NEC.

(2) Flammable-liquid or oil filled transformers installed outdoors must meet the following requirements:

(a) A transformer installed adjacent to a combustible building/structure with any combustible surface may be located only in the shaded "Approved Transformer Area" shown in Figure 450-1;

(b) A transformer installed adjacent to a building/structure with no combustible surface(s) may be located only in the shaded "Approved Transformer Area" shown in Figure 450-2;

(c) In an urban residential area that has an improved alleyway, and in which a transformer is to be installed next to a noninhabited structure, the transformer may be no closer than two feet to the building/structure and must be outside a line extended vertically from the ends of the eaves or roof lines;

(d) A building/structure may have no doors, windows, stairways, or other openings closer than eight feet to the transformer;

(e) The finished grade at the location of the transformer must be such that any oil leaking from the transformer will flow away from the building/structure and will not pool; and

(f) If transformers are installed in areas subject to traffic other than pedestrian traffic, they must be provided with adequate guarding.

(3) Enclosures for total underground flammable-liquid or oil filled transformers must not be located within eight feet of a doorway, operable window, stairways or fire escape. Adequate space must be maintained above the enclosure so that a boom may be used to lift the transformer from the enclosure.

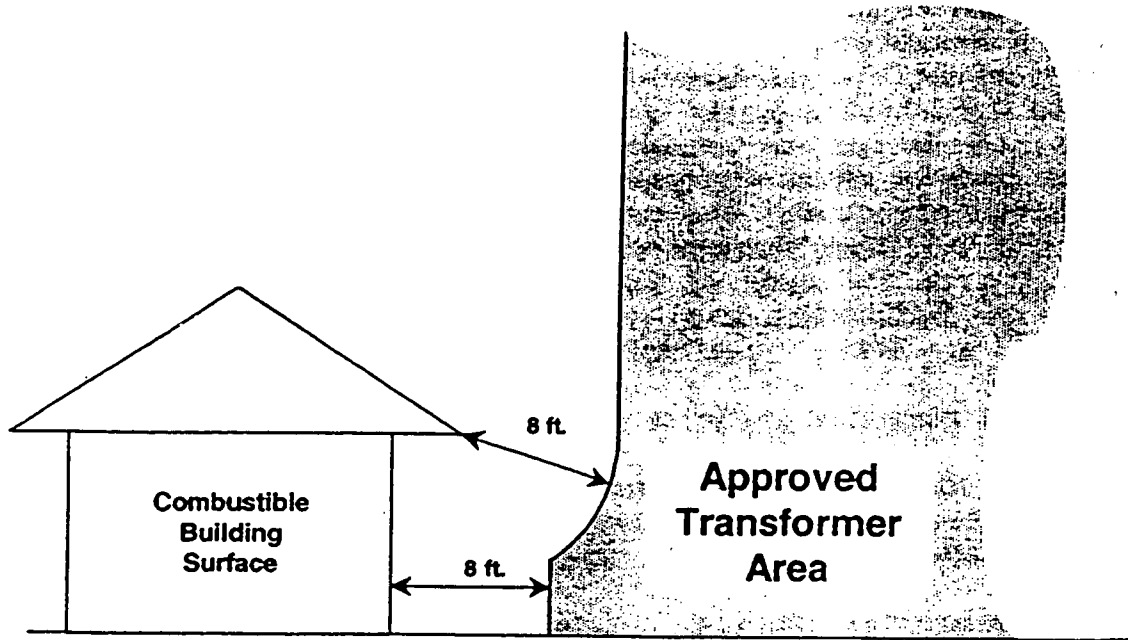

Figure 450-1

Figure 450-2

NEW SECTION

WAC 296-46A-500 Sewage disposal systems. (1) Pumping chambers for sewage, effluent, or grinder pumps in on-site and septic tank effluent pump (S.T.E.P.) disposal systems will be considered unclassified when not more than five residential units are connected to the system, residential units are connected to a utility sewage system, or when nonresidential systems have residential loading characteristics and all of the following general installations requirements are complied with.

(a) The pumping chamber must be adequately vented. Venting may be accomplished through the building or structure plumbing vents where the system venting has been approved by the local jurisdiction authority or by a direct two-inch minimum vent to the atmosphere.

(b) Equipment that in normal operation may cause an arc or spark must not be installed in any pumping chamber.

(c) Float switches installed in a pumping chamber must be hermetically sealed to prevent the entrance of gases or vapors.

PERMANENT

(d) Junction boxes, conduits and fittings installed in the septic atmosphere must be of a noncorrosive type, installed to prevent the entrance of gases or vapors.

(e) Where a conduit system is installed between the pumping chamber and the control panel, motor disconnect, or power source, an approved sealing method must be installed to prevent the migration of gases or vapors from the pumping chamber, and must remain accessible.

(f) Wire splices in junction boxes installed in pumping chambers, must be suitable for wet locations.

(2) Nonresidential loading characteristics must be certified by a Washington state registered professional engineer, engaged in the business of wastewater management systems design. Documentation that is signed and stamped by the engineer must be provided to the electrical inspector prior to the inspection.

(3) Any residential or nonresidential system that has building or structure floor drains being discharged into the system is classified as Class I Division I. Drains from any commercially made tub, shower, basin, sink, or toilet are not considered floor drains.

(4) Pumping chamber access covers are permitted to be covered by gravel, light aggregate, or noncohesive granulated soil, and must be accessible for excavation. Access covers that are buried, must have their exact location identified at the electrical panel or other prominent location approved by the authority having jurisdiction.

(5) Indoor grinder pumps installed in chambers with less than fifty gallons capacity are not required to meet the requirements of this section, except for the venting requirements in subsection (1)(a) of this section. Indoor grinder pumps installed in chambers with less than fifty gallons capacity are not classified systems as described in Article 500 NEC.

(6) Secondary treatment effluent pumping chambers such as sand filters are unclassified, and require no special wiring methods.

(7) Inspection approval is required prior to covering or concealing any portion of the septic electrical system, including the pump. New septic and effluent tanks containing electrical wires and equipment must be inspected and approved by the department prior to being loaded with sewage.

NEW SECTION

WAC 296-46A-514 Dispensing and service stations.

(1) An emergency disconnecting means or operator must be provided to disconnect the pump or dispensing equipment serving gasoline, volatile flammable liquids, or liquefied flammable gases. The emergency disconnecting means or operator must disconnect all conductors of the circuit supplying all station dispensers and/or pumps (including the grounded conductor) simultaneously from the source(s) of supply.

(2) For installations with only one dispensing device, the emergency disconnecting means/operator may be used to satisfy subsection (1) of this section.

(3) For multicircuit installations an electrically held normally open contactor operated by a push-button is permitted

to be used as the disconnecting means to satisfy subsection (1) of this section.

(4) The disconnecting means satisfying subsection (1) of this section must be labeled with an identification plate, with letters at least one inch high, as the emergency disconnecting means. The disconnecting means or operator must be:

(a) Substantially red in color; and

(b) Readily accessible and must be located outdoors and within sight of the pump or dispensing equipment it controls.

NEW SECTION

WAC 296-46A-517 Health care facilities. In health care facilities, the following methods must be used to determine adequate capacity and ratings of equipment providing electrical power for the essential electrical systems defined in Article 517 NEC:

(1) Systems in new facilities:

(a) Emergency system: The emergency branch must consist of two branches known as:

(i) Life safety system: The feeder conductors and equipment used to supply electrical power to the life safety branch must be determined by summation of the connected loads as determined by Article 220 NEC and may not be subjected to any reduction due to the diversity of the loads. Feeder and equipment will be subject to a 125% multiplier for continuous loads in accordance with Article 220 NEC.

(ii) Critical branch system: The feeder conductors and equipment must be calculated in accordance with Article 220 NEC, including a level of diversity as determined by Article 220 NEC.

(b) Equipment branch: The feeder conductors and equipment used to supply electrical power to the equipment branch of the essential electrical system must be calculated in accordance with Article 220 NEC, including a level of diversity as determined by Article 220 NEC.

(c) Generator sizing: The rating of the generator(s) supplying electrical power to the essential system of a health care facility must be the summation of the loads determined in (a) and (b) of this subsection with no additional demand factors applied. Momentary X-ray loads may be ignored if the generator is rated at least 300% of the largest momentary X-ray load connected.

(2) Existing essential systems in facilities to which additional load is to be added:

(a) Existing loads: The existing loads of the separate branches of the essential electrical system may be determined by WAC 296-46A-140.

(b) Added loads: Added loads to the separate branches of the essential electrical system must be determined by subsection (1) of this section.

(c) Generators: Generators supplying electrical power to the essential electrical system must be determined by the summation of the loads determined by (a) and (b) of this subsection with no additional demand factors applied.

NEW SECTION

WAC 296-46A-550 Mobile/manufactured homes. (1) An electrical service installed on the mobile/manufactured home:

(a) Must be installed only by the manufacturer, at the manufacturing plant. The manufacturer must complete the service except for service connections, meter, and grounding electrode conductor.

(b) The completion of the service, at the site, must be made by the owner or electrical contractor.

(2) All alterations to the mobile/manufactured home electrical system must be permitted and inspected by the factory assembled structures section of the department. Electrical wiring in structures that are attached to the mobile/manufactured home and the source of power is from the mobile/manufactured home is inspected by the factory assembled structures section of the department.

NEW SECTION

WAC 296-46A-553 Boat moorages, floating buildings, and similar installations. (1) Docks, wharves, boat moorages, floating buildings, and similar facilities in addition to complying with the appropriate sections of Article 553 or 555 NEC must have a readily accessible service rated disconnect located on the shoreline within sight of the dock, wharf, boat moorage, floating building, or similar facility.

(2) Extra-hard usage portable power cable may only be used when extending a feeder between the structures indicated above where flexibility is required and must be connected to an approved wiring method within the first fifteen feet of the point where flexibility is required.

(3) Where shore power is provided, each floating building or boat moorage berth must have a disconnecting means located within sight of each floating building or berth. The disconnecting means must be installed adjacent to but not in or on the floating building.

(4) Conductors operating in excess of 600 volts, nominal, may not be installed on floating portions of marinas, docks, or wharves. Refer to the Fire Protection Standard for Marinas and Boatyards, NFPA 303 for additional information.

NEW SECTION

WAC 296-46A-600 Electrical signs. (1) **General**—All electrical signs within the scope of U.L. Standard 48, the electrical sign standard, must be listed. All electrical signs outside the scope of U.L. Standard 48 will be inspected for compliance with the NEC.

(2) Portable outdoor signs.

(a) A weatherproof receptacle outlet that is weatherproof with the supply cord connected must be installed within six feet of each electrical sign.

(b) Extension cords are not permitted to supply portable outdoor signs.

(c) All portable outdoor electrical signs must be listed or field evaluated by an electrical testing laboratory accredited by the department.

(3) Outdoor awnings.

(a) Lighting fixtures in outdoor awnings must be suitable for wet locations and be connected by a wiring method suitable for wet locations. Fluorescent lighting fixtures must be located at least six inches from the awning fabric. Incandescent lamps or fixtures must be located at least eighteen inches from the awning fabric. A disconnecting means must be installed per Article 600 NEC.

(b) Listed awning signs must be installed in compliance with the manufacturer's instructions and the NEC.

NEW SECTION

WAC 296-46A-680 Electrical equipment associated with spas, hot tubs, swimming pools or hydromassage bathtubs. (1) Package spa or hot tubs. Electrical heating, pumping, filtering, and/or control equipment installed within five feet of a spa or hot tub must be listed or field evaluated as a package with the spa or hot tub.

(2) A factory assembled skid pack of electrical heating, pumping, filtering, and/or control equipment (skid pack) must be installed more than five feet from a spa or hot tub and shall be listed as a package unit.

(3) Field installed, listed electrical equipment for a hot tub, spa, or swim spa must be located at least five feet from the hot tub, spa or swim spa, provided that:

(a) The heater is listed as a "spa heater or swimming pool heater";

(b) The pump is listed as a "spa pump" or "swimming pool/spa pump" (the pump may be combined with a filter assembly); and

(c) Other listed equipment such as panelboards, conduit, and wire are suitable for the environment and comply with the applicable codes.

(4) Field installed, listed electrical equipment for a swimming pool must be located at least five feet from the swimming pool provided that:

(a) The heater is listed as a "swimming pool heater or a spa heater";

(b) The pump is listed as a "swimming pool pump" or "spa pump" or "swimming pool/spa pump"; and

(c) Other equipment such as panelboards, conduit, and wire are suitable for the environment and comply with the applicable codes.

(d) The five-foot separation may be reduced by the installation of a permanent barrier, such as a solid wall, fixed glass windows or doors, etc. The five-foot separation will be determined by the shortest path or route that a cord can travel from the spa, hot tub, swim spa, or swimming pool to an object.

(5) The field assembly or installation of "recognized components" will not be permitted.

(6) Hydromassage bathtubs must be listed as a unit and bear a listing mark which reads "hydromassage bathtub."

(7) Manufacturers instructions must be followed as part of the listing requirements.

(8) Electrical components which have failed and require replacement must be replaced with identical products unless the replacement part is no longer available; in which case, a

like-in-kind product may be substituted provided the mechanical and grounding integrity of the equipment is maintained.

(9) Cut-away type display models may not be sold for other than display purposes and are not expected to bear a listing mark.

NEW SECTION

WAC 296-46A-700 Emergency systems. (1) Exit and emergency lights must be installed in accordance with the Article 700 NEC and the currently adopted edition of the Uniform Building Code in all health or personal care facilities defined in this chapter, educational facilities, institutional facilities, hotels, motels, and places of assembly for one hundred or more persons.

(2) Device and junction boxes for fire alarm systems other than the surface raceway type, must be substantially red in color, both inside and outside. Power-limited fire protective signaling circuit conductors must be durably and plainly marked in or on junction boxes or other enclosures to indicate that it is a power-limited fire protective signaling circuit.

(3) All boxes and enclosures, including transfer switches, generators, and power panels for emergency systems and circuits must be permanently identified with an identification plate that is substantially red in color.

NEW SECTION

WAC 296-46A-702 Optional standby systems. Optional standby systems derived from portable generators must meet all of the requirements of Article 702 NEC.

NEW SECTION

WAC 296-46A-900 Electrical work permits and fees. (1) When an electrical work permit is required by chapter 19.28 RCW or this chapter, inspections may not be made, equipment must not be energized, or services connected unless:

- (a) A valid electrical work permit is completely and legibly filled out and readily available;
- (b) The classification or type of facility to be inspected and the exact scope and location of the electrical work to be performed are clearly shown on the electrical work permit;
- (c) The address where the inspection is to be made is clearly identifiable from the street, road or highway that serves the premises; and
- (d) Driving directions and/or a legible map must be provided for the inspectors' use.

(2) Final inspection approval will not be made until all inspection fees are paid in full.

(3) An electrical work permit is valid for only one specific site address.

(4) A valid electrical work permit must be posted on the job site at a readily accessible and conspicuous location prior to beginning electrical work and at all times until the electrical inspection process is completed.

(5) Except for emergency repairs to existing electrical systems, electrical work permits must be obtained and posted

at the job site prior to beginning the installation or alteration. An electrical work permit for emergency repairs to existing electrical systems must be obtained and posted at the job site no later than the next business day after the work is begun.

(6) Electrical work permits will expire one year after the date of purchase unless electrical work is actively and consistently in progress and inspections requested. Refunds are not available for expired electrical work permits or for electrical work permits where the electrical installation has begun, or an electrical inspection or electrical inspection request has been made.

(7) Fees must be paid in accordance with the inspection fee schedule, WAC 296-46A-910.

(8) Each person, firm, partnership, corporation, or other entity must furnish a valid electrical work permit for the installation, alteration, or other electrical work performed or to be performed by that entity. Each electrical work permit application must be signed by the electrical contractor's administrator (or designee) or the person, or authorized representative of the firm, partnership, corporation, or other entity that is performing the electrical installation or alteration. Permits purchased electronically do not require a handwritten signature. An entity designated to sign electrical permits must provide written authorization of the purchaser's designation when requested by the department.

(9) When allowed by the chief electrical inspector, annual permits for the inspection of telecommunications installations may be purchased by a building owner or licensed electrical/telecommunications contractor. Telecommunications work may be done under this annual permit by the building owner, the owner's regular employees, or a licensed electrical/telecommunications contractor. The permit holder is responsible for correcting all installation deficiencies. The permit holder must make available to the electrical inspector records of all the telecommunications work performed and the valid electrical or telecommunications contractor license numbers for all contractors working under the permit.

(10) Permits to be obtained by customers. Whenever a serving electrical utility performs work for a customer under one of the exemptions in WAC 296-46A-935 and the work is subject to inspection, the customer is responsible for obtaining all required permits.

(11) As required by chapter 19.28 RCW or this chapter, an electrical work permit is required for the installation, alteration, or maintenance of electrical systems except for: Plug-in appliances, travel trailers, or like-in-kind replacement of a: Circuit breaker, fuse, lamp, snap switch, receptacle outlet, heating element, lighting fixture ballast with an exact same ballast, contactor, relay, timer, starter, similar control component, or motor.

(12) An electrical work permit is required for all installations of telecommunications systems on the customer side of the network demarcation point for projects greater than ten telecommunications outlets. All backbone installations regardless of size and all telecommunications cable or equipment installations involving penetrations of fire barriers or passing through hazardous locations require permits and inspections. For the purposes of determining the inspection

threshold for telecommunications projects greater than ten outlets, the following will apply:

(a) An outlet is the combination of jacks and mounting hardware for those jacks, along with the associated cable and telecommunications closet terminations, that serves one workstation. In counting outlets to determine the inspection threshold, one outlet must not be associated with more than six standard four-pair cables or more than one twenty-five-pair cable. Therefore, installations of greater than sixty four-pair cables or ten twenty-five-pair cables require permits and inspections. (It is not the intent of the statute to allow large masses of cables to be run to workstations or spaces serving telecommunications equipment without inspection. Proper cable support and proper loading of building structural elements are safety concerns. When considering total associated cables, the telecommunications availability at one workstation may count as more than one outlet.)

(b) The installation of greater than ten outlets and the associated cables along any horizontal pathway from a telecommunications closet to work areas during any continuous ninety-day period requires a permit and inspection.

(c) All telecommunications installations within the residential dwelling units of single-family, duplex, and multifamily dwellings do not require permits or inspections. In residential multifamily dwellings, permits and inspections are required for all backbone installations, all fire barrier penetrations, and installations of greater than ten outlets in common areas.

(d) No permits or inspections are required for installation or replacement of cord and plug connected telecommunications equipment or for patch cord and jumper cross-connected equipment.

(e) Definitions of telecommunications technical terms will come from chapter 19.28 RCW or the currently adopted rules, EIA/TIA standards, and NEC.

(13) Requests for inspections must be made no later than three business days after completion of the electrical/telecommunications installation or one business day after any part of the installation has been energized, whichever occurs first. Inspections for annual electrical maintenance permits and annual telecommunications permits may be done on a regular schedule arranged by the permit holder with the department.

NEW SECTION

WAC 296-46A-910 Inspection fees. To calculate inspection fees, the amperage is based on the conductor ampacity or the overcurrent device rating. The total fee must not be less than the number of progress inspection (one-half hour) units times the progress inspection fee rate from subsection (8) PROGRESS INSPECTIONS below.

(1) RESIDENTIAL.

(a) Single and two-family residential (new construction).

Notes: • Square footage is the area included within the surrounding exterior walls of a building exclusive of any interior courts. (This includes any floor area in an attached garage, basement, or unfinished living space.)

• "Inspected with the service" means that a separate service inspection fee is included on the same electrical work permit and "inspected at the same time" means all wiring is to be ready for inspection during the initial inspection trip.

• An "outbuilding" is a structure that serves a direct accessory function to the residence, such as a pump house or storage building. Outbuilding does not include buildings used for commercial type occupancies or additional dwelling occupancies.

(i)	First 1300 sq. ft.		\$ 67.00
	Each additional 500 sq. ft. or portion of		\$ 21.50
(ii)	Each outbuilding or detached garage inspected at the same time as a dwelling unit on the property		\$ 28.00
(iii)	Each outbuilding or detached garage inspected separately		\$ 44.25
(iv)	Each swimming pool - inspected with the service		\$ 44.25
(v)	Each swimming pool - inspected separately		\$ 67.00
(vi)	Each hot tub, spa, or sauna - inspected with the service		\$ 28.00
(vii)	Each hot tub, spa, or sauna - inspected separately		\$ 44.25
(viii)	Each septic pumping system - inspected with the service		\$ 28.00
(ix)	Each septic pumping system - inspected separately		\$ 44.25
(b)	Multifamily residential and miscellaneous residential structures, services and feeders (new construction).		
(i)	Each service and/or feeder		
	Ampacity	Service/Feeder	Additional Feeder
	0 to 200	\$ 72.25	\$ 21.50
	201 to 400	\$ 89.75	\$ 44.25
	401 to 600	\$ 123.25	\$ 61.50
	601 to 800	\$ 158.00	\$ 84.25
	801 and over	\$ 225.25	\$ 169.00
(c)	Single-family or multi-family altered services including circuits.		
(i)	Each altered service and/or altered feeder		
	Ampacity	Service or Feeder	
	0 to 200	\$ 61.50	
	201 to 600	\$ 89.75	
	601 and over	\$ 135.25	
(ii)	Maintenance or repair of meter or mast (no alterations to service or feeder)		\$ 33.50
(d)	Single or multi-family residential circuits only (no service inspection).		
Note:	Altered or added circuit fees are calculated per panelboard. Total cost of the alterations in an individual panel should not exceed the cost of a complete altered service or feeder of the same rating, as shown in subsection (1) RESIDENTIAL (c) (table) above.		
(i)	1 to 4 circuits (see note)		\$ 44.25
• Except:	Water heater load control devices installed in residences as part of an energy conservation program		\$ 27.00
Note:	The \$27.00 permit fee for water heater load control devices will expire on December 31, 2001.		
(ii)	Each additional circuit (see note)		\$ 5.00
(e)	Mobile homes, modular homes, mobile home parks, and RV parks.		
(i)	Mobile home or modular home service or feeder only		\$ 44.25
(ii)	Mobile home service and feeder		\$ 72.25
(f)	Mobile home park sites and RV park sites.		

PERMANENT

- Note: For master service installations, see subsection (2).
- (i) First site service or site feeder \$ 44.25
 - (ii) Each additional site service; or additional site feeder inspected at the same time as the first service or feeder \$ 28.00

(2) COMMERCIAL/INDUSTRIAL.

- (a) New service or feeder and additional new feeders inspected at the same time (includes circuits).

Note: For large COMMERCIAL/INDUSTRIAL projects that include multiple feeders, "inspected at the same time" can be interpreted to include additional inspection trips for a single project. The additional inspections must be for electrical work specified on the permit at the time of purchase. The permit fee for such projects must be calculated from (2) (a) (i) (table) above. However, the total fee must not be less than the number of progress inspection (one-half hour) units times the progress inspection fee rate from subsection (8) PROGRESS INSPECTIONS below.

Ampacity	Service/Feeder	Additional Feeder
0 to 100	\$ 72.25	\$ 44.25
101 to 200	\$ 89.75	\$ 56.25
201 to 400	\$ 169.00	\$ 67.00
401 to 600	\$ 197.00	\$ 78.75
601 to 800	\$ 254.50	\$ 107.25
801 to 1000	\$ 310.75	\$ 129.75
1000 and over	\$ 339.00	\$ 181.00

- (b) Altered services or feeders (no circuits).

(i) Service/feeders

Ampacity	Service or Feeder
0 to 200	\$ 72.25
201 to 600	\$ 169.00
601 to 1000	\$ 254.50
1000 and over	\$ 282.75

- (ii) Maintenance or repair of meter or mast (no alteration to the service or feeder) \$ 61.50

(c) Circuits only.

Note: Altered/added circuit fees are calculated per panelboard. Total cost of the alterations in a panel (or panels) should not exceed the cost of a new feeder (or feeders) of the same rating, as shown in subsection (2) COMMERCIAL/INDUSTRIAL (a)(i)(table) above.

- (i) First five circuits per branch circuit panel \$ 56.25
- (ii) Each additional circuit per branch circuit panel \$ 5.00
- (d) Over 600 volts surcharge per permit. \$ 56.25

(3) TEMPORARY SERVICE(S).

Notes: • Temporary electrical power and lighting installations must be used during the period of construction, remodeling, maintenance, repair, or demolition of buildings, structures, equipment, or similar activities.

• Temporary electrical power and lighting installations are allowed during emergencies and for tests, experiments, and developmental work. Temporary electrical power and lighting installations are allowed for a period not to exceed 90 days for Christmas decorative lighting and similar purposes. Temporary wiring shall be removed immediately upon completion of construction or purpose for which the wiring was installed.

• Temporary stage or concert inspections requested outside of normal business hours will be subject to the portal-to-portal hourly fees in subsection (11) OTHER INSPECTIONS. The fee for such after hours inspections shall be the greater of the fee from (3) TEMPORARY SERVICES (a) or the portal-to-portal fee.

(a) Temporary services, temporary stage or concert productions.

Ampacity	Service/Feeder	Additional Feeder
0 to 60	\$ 38.75	\$ 20.00
0 to 100	\$ 44.25	\$ 21.50
101 to 200	\$ 56.25	\$ 28.00
201 to 400	\$ 67.00	\$ 33.50
401 to 600	\$ 89.75	\$ 44.25
601 and over	\$ 101.75	\$ 50.75

(4) IRRIGATION MACHINES, PUMPS AND EQUIPMENT.

(a) Irrigation machines.

- (i) Each tower when inspected at the same time as a service and feeder from (2) COMMERCIAL/INDUSTRIAL \$ 5.00
- (ii) Towers - when not inspected at the same time as a service and feeders - one to six towers \$ 67.00
- (iii) Each additional tower \$ 5.00

(5) MISCELLANEOUS - commercial/industrial and residential.

(a) Low-voltage thermostats.

- (i) First thermostat \$ 33.50
- (ii) Each additional thermostat inspected at the same time as the first \$ 10.50

(b) Low-voltage systems and telecommunications systems. Includes all telecommunications installations, fire alarm and burglar alarm nurse call, intercom, security systems, energy management control systems, HVAC/refrigeration control systems (other than thermostats above), industrial and automation control systems, lighting control systems, stand-alone sound systems, public address, and similar low-energy circuits and equipment.

- (i) First 2500 sq. ft. or less \$ 38.75
- (ii) Each additional 2500 sq. ft. or portion of \$ 10.50
- (c) Signs and outline lighting.
 - (i) First sign (no service included) \$ 33.50
 - (ii) Each additional sign inspected at the same time on the same building or structure \$ 16.00

(d) Berth at a marina or dock.

Note: Five berths or more shall be permitted to have the inspection fees based on appropriate service and feeder fees from section (2) COMMERCIAL/INDUSTRIAL (a)(i) above.

- (i) Berth at a marina or dock \$ 44.25
- (ii) Each additional berth inspected at the same time \$ 28.00
- (e) Yard pole, pedestal, or other meter loops only.

- (i) Yard pole, pedestal, or other meter loops only \$ 44.25
- (ii) Meters installed remote from service equipment: Inspected at same time as service, temporary service or other installations \$ 10.50

- (f) Emergency inspections requested outside normal work hours. Regular fee plus surcharge of: \$ 84.25

(g) Generators.

- (i) Portable generators: Permanently installed transfer equipment for portable generators \$ 61.50

(ii) Permanently installed generators: Refer to appropriate residential or commercial new service or feeder section

- (h) Annual permit fee for plant location employing regular electrical maintenance staff - each inspection two-hour maximum.

Inspections	Fee
1 to 3 plant electricians	\$ 1,618.00
4 to 6 plant electricians	\$ 3,237.50
7 to 12 plant electricians	\$ 4,856.00
13 to 25 plant electricians	\$ 6,475.50

PERMANENT

more than 25 plant electricians	52	\$ 8,095.00
(i) Telecommunications annual permit fee.		
(i) For commercial/industrial location employing full-time telecommunications maintenance staff or having a yearly maintenance contract with a licensed electrical/telecommunications contractor.		
Annual inspection time required may be estimated by the purchaser at the rate for "Other inspections" in this section, charged portal-to-portal per hour - two-hour minimum.		\$ 134.00
Each additional hour, or portion thereof, of portal-to-portal inspection time		\$ 67.00
(6) CARNIVAL INSPECTIONS.		
(a) First carnival field inspection each year.		
(i) Each ride and generator truck		\$ 16.00
(ii) Each remote distribution equipment, concession or gaming show		\$ 5.00
(iii) If the calculated fee for first field inspection of (a) and (b) above is less, the minimum inspection fee shall be:		\$ 84.25
(b) Subsequent carnival inspections.		
(i) First 10 rides, concessions, generators, remote distribution equipment or gaming show		\$ 84.25
(ii) Each additional ride, concession, generator, remote distribution equipment or gaming show		\$ 5.00
(c) Concession(s) or ride(s) not part of a carnival.		
(i) First field inspection each year of a single concession or ride, not part of a carnival		\$ 67.00
(ii) Subsequent inspection of a single concession or ride, not part of a carnival		\$ 44.25
(7) TRIP FEES.		
(a) Requests by property owners to inspect existing installations.		\$ 67.00
(b) Submitter notifies the department that work is ready for inspection when it is not ready.		\$ 33.50
(c) Additional inspection required because submitter has provided the wrong address.		\$ 33.50
(d) More than one additional inspection required to inspect corrections; or for repeated neglect, carelessness, or improperly installed electrical work.		\$ 33.50
(e) Each trip necessary to remove a noncompliance notice.		\$ 33.50
(f) Corrections have not been made in the prescribed time, unless an exception has been requested and granted.		\$ 33.50
(g) Installations that are covered or concealed before inspection.		\$ 33.50
(8) PROGRESS INSPECTIONS.		
Note: The fees calculated in subsections (1) through (6) must apply to all electrical work. This section must be applied to a permit where the permit holder has requested additional inspections beyond the number supported by the permit fee calculated at the rate in (1) through (6).		
(a) On partial or progress inspections, each one-half hour.		\$ 33.50
(9) PLAN REVIEW FEE.		
(a) Fee is thirty-five percent of the electrical work permit fee as determined by WAC 296-46A-910, plus a plan review submission fee of:		\$ 56.25
(b) Supplemental submissions of plans per hour or fraction of an hour.		\$ 67.00
(c) Plan review shipping and handling fee.		\$ 16.00
(10) OUT-OF-STATE INSPECTIONS.		

(a) Permit fees will be charged according to the fees listed in this section.	
(b) Travel expenses:	
(i) All travel expenses and per diem for out-of-state inspections are billed following completion of each inspection(s). These expenses can include, but are not limited to: Inspector's travel time, travel cost and per diem at the state rate. Travel time is hourly based on the rate in subsection (11) of this section	
(11) OTHER INSPECTIONS.	
(a) Inspections not covered by above inspection fees must be charged portal-to-portal per hour:	\$ 67.00
(12) REFUND PROCESSING FEE.	
(a) All requests for permit fee refunds will be assessed a processing fee.	\$ 10.50
(13) VARIANCE REQUEST PROCESSING FEE.	
(a) Variance request processing fee. This fee is nonrefundable once the transaction has been made.	\$ 67.00

NEW SECTION

WAC 296-46A-915 Electrical/telecommunications contractor license, administrator certificate and examination, and copy fees.

(1) GENERAL OR SPECIALTY CONTRACTOR LICENSE (per twenty-four month period)	\$ 216.25
(a) Reinstatement of a general or specialty contractor's license after a suspension	\$ 43.50
(2) ADMINISTRATOR CERTIFICATE	
Note: Failure to appear for an examination results in forfeiture of the examination fee.	
(a) Administrator certificate examination application (nonrefundable)	\$ 27.00
(b) Administrator first-time examination fee	\$ 64.75
(c) Administrator retest examination fee	\$ 75.75
(d) Administrator original certificate (request for certificate submitted with application)	\$ 64.50
(e) Administrator certificate renewal (per twenty-four month period)	\$ 81.00
(f) Late renewal of administrator certificate (per twenty-four month period)	\$ 162.25
(g) Transfer of administrator designation	\$ 32.25
(h) Certified copy of each document (maximum per file):	
First document:	\$ 20.75
Each additional document:	\$ 2.00
(i) Reinstatement of an administrator's certificate after a suspension	\$ 43.50
(3) REFUND PROCESSING FEE	\$ 10.50

NEW SECTION

WAC 296-46A-920 Civil penalty.

Notes: (A) Each day that a violation occurs will be a separate offense.
 (B) Once a violation of chapter 19.28 RCW, or chapter 296-46A or 296-401B WAC becomes a final judgment, any additional violation within three years becomes a "second" or "additional" offense subject to an increased penalty as set forth in the following tables.

PERMANENT

(C) In case of continued, repeated or gross violation of the provisions of chapter 19.28 RCW, or chapter 296-46A or 296-401B WAC or if property damage or bodily injury occurs as a result of the failure of a person, firm, partnership, corporation, or other entity to comply with chapter 19.28 RCW, the department may double the penalty amounts shown in subsections (1) through (13) of this section.

(D) A person, firm, partnership, corporation or other entity who violates a provision of chapter 19.28 RCW, chapter 296-46A or 296-401B WAC is liable for a civil penalty based upon the following schedule.

(1) Offering to perform, submitting a bid for, advertising, installing or maintaining cables, conductors or equipment:

(a) That convey or utilize electrical current without having a valid electrical contractor license.

(b) Used for information generation, processing, or transporting of signals optically or electronically in telecommunications systems without having a valid telecommunications contractor license.

First offense: \$ 500
 Second offense: \$ 1,000
 Third offense: \$ 3,000
 Each offense thereafter: \$ 5,000

(2) Employing an individual for the purposes of chapter 19.28 RCW who does not possess a valid certificate of competency or training certificate to do electrical work.

First offense: \$ 100
 Second offense: \$ 350
 Each offense thereafter: \$ 500

(3) Performing electrical work without having a valid certificate of competency or electrical training certificate.

First offense: \$ 100
 Second offense: \$ 250
 Each offense thereafter: \$ 500

(4) Employing electricians and electrical trainees for the purposes of chapter 19.28 RCW in an improper ratio.

First offense: \$ 250
 Second offense: \$ 350
 Each offense thereafter: \$ 500

(5) Failing to provide proper supervision to an electrical trainee as required by chapter 19.28 RCW.

First offense: \$ 250
 Second offense: \$ 350
 Each offense thereafter: \$ 500

(6) Working as an electrical trainee without proper supervision as required by chapter 19.28 RCW.

First offense: \$ 50
 Second offense: \$ 100
 Each offense thereafter: \$ 250

(7) Offering, bidding, advertising, or performing electrical or telecommunications installations, alterations or maintenance outside the scope of the firm's specialty electrical or telecommunications contractors license.

First offense: \$ 250
 Second offense: \$ 500
 Each offense thereafter: \$ 1,000

(8) Selling or exchanging electrical equipment associated with spas, hot tubs, swimming pools or hydromassage bathtubs which is not listed by an approved electrical testing laboratory.

First offense: \$ 500
 Second offense: \$ 1,000
 Each offense thereafter: \$ 2,000

Definition: The sale or exchange of electrical equipment associated with hot tubs, spas, swimming pools or hydromassage bathtubs means: "Sell, offer for sale, advertise, display for sale, dispose of by way of gift, loan, rental, lease, premium, barter or exchange."

(9) Covering or concealing installations prior to inspection.

First offense: \$ 500
 Second offense: \$ 1,000
 Each offense thereafter: \$ 2,000

(10) Failing to make corrections within fifteen days of notification by the department. Exception: Where an extension has been requested and granted, this penalty applies to corrections not completed within the extended time period.

First offense: \$ 250
 Second offense: \$ 500
 Each offense thereafter: \$ 1,000

PERMANENT

(11) Failing to obtain or post an electrical/telecommunications work permit prior to beginning the electrical/telecommunication installation or alteration. Exception: In cases of emergency repairs to existing electrical/telecommunications systems, this penalty will not be charged if the permit is obtained and posted no later than the business day following completion of the emergency repair.

First offense:	\$	250
Homeowner - First offense:	\$	50
Second offense:	\$	500
Each offense thereafter:	\$	1,000

(12) Violating chapter 19.28 RCW duties of the electrical/telecommunications administrator.

First offense:	\$	100
Second offense:	\$	500
Each offense thereafter:	\$	1,000

(13) Violating any of the provisions of chapter 19.28 RCW or chapter 296-46A or 296-401B WAC which are not identified in subsections (1) through (12) of this section.

First offense:	\$	250
Second offense:	\$	500
Each offense thereafter:	\$	1,000

NEW SECTION

WAC 296-46A-930 Electrical/telecommunications contractor license and administrator certificate designation. (1) **General electrical (01):** A general electrical license and/or administrator's certificate encompasses all phases and all types of electrical and telecommunications installations.

(2) Specialty (limited) electrical licenses and/or administrator's certificates are as follows:

(a) **Residential (02):** Limited to the wiring of one and two family dwellings, or multifamily dwellings not exceeding three floors above grade. All wiring is limited to nonmetallic sheathed cable, except for services and/or feeders, exposed installations where physical protection is required, and for wiring buried below grade.

This specialty also includes the wiring for ancillary structures such as, but not limited to: Swimming pools, septic pumping systems, domestic water systems, limited energy systems (e.g., doorbells, intercoms, fire alarm, burglar alarm, energy control, HVAC/refrigeration, etc.), apartment complex offices/garages, site lighting when supplied from the residence or ancillary structure, and other structures directly associated with the functionality of the residential units.

This specialty does not include wiring occupancies defined in WAC 296-46A-130, commercial occupancies such as: Motels, hotels, offices, assisted living facilities, or stores.

This specialty cannot perform the work of other specialties in other than the residential occupancies defined in this subsection.

(b) Pumps, irrigation, and wells.

(i) **Pump and irrigation (03):** Limited to the electrical connection of domestic and irrigation water pumps, circular irrigating systems and related pumps and pump houses. This specialty includes circuits, feeders, controls, and services to supply said pumps. This specialty may perform the work defined in (ii) of this subsection.

(ii) **Domestic well (03A):** Limited to the extension of a branch circuit, which is supplied and installed by others, to pump controllers; pressure switches; alarm sensors; and water pumps which do not exceed 7 1/2 horsepower at 230 volts AC single phase.

(c) **Signs (04):** Limited to placement and connection of signs and outline lighting, the electrical supply, related controls and associated circuit extensions thereto; and the installation of a maximum 60 ampere, 120/240 volt single phase service to supply power to a remote sign only. This specialty may service, maintain, or repair exterior lighting fixtures that are mounted on a pole or other structure with like-in-kind components.

(d) **Domestic appliances (05):** Limited to the electrical connection of household appliances and the wiring thereto; such as hot water heaters, ranges, dishwashers, clothes dryers, oil and gas furnaces, and similar appliances. This specialty includes circuits to the appliances; however, it does not include the installation of service and/or feeders or circuits to electric furnaces and heat pump equipment.

(e) Limited energy.

(i) **Limited energy system (06):** Limited to the installation of signaling and power limited circuits and related equipment. This specialty is restricted to low-voltage circuits. This specialty includes the installation of fire protection signaling systems, intrusion alarms, energy management and control systems, industrial and automation control systems, lighting control systems, commercial and residential amplified sound, public address systems, and such similar low-energy circuits and equipment. Limited energy electrical contractors may perform all telecommunications work under their specialty (06) electrical license and administrator's certificate. This specialty may perform the work defined in (ii) of this subsection.

(ii) **HVAC/refrigeration limited energy system (06A):** Limited to the installation of low-voltage, Class 2 HVAC/refrigeration control circuit cables for control of furnaces, heat pumps, and similar HVAC or refrigeration equipment when such conductors do not connect to other than HVAC or refrigeration equipment and when such buildings do not exceed three floors above grade, except for residential occupancies. Associated limited energy control components that are integral with, and control the operation of, the heating and cooling equipment or refrigeration equipment are included in the scope of this specialty. These limited energy

PERMANENT

components include, but are not limited to, the following: Thermostats, humidistats, low-voltage damper controls, outdoor sensing controls, outside air dampers, air monitoring devices, stand-alone duct smoke detectors exclusively controlled by or directly related to the HVAC/refrigeration system, zone control valves, and the mounting of HVAC/refrigeration control panels and low-voltage connections. Installation of integrated building control systems, other than HVAC/refrigeration systems as defined herein, are not included in this specialty.

This specialty may install, service, maintain, repair, or replace HVAC/refrigeration electrical systems as long as the work is on the HVAC/refrigeration system itself. This specialty may replace line voltage components within the equipment, only if the components are like-in-kind with similar voltage and current ratings. Reconnection of replaced line voltage HVAC/refrigeration components and equipment, including line supply whips not over 6 feet in length, is permitted provided there are no modifications to the characteristics of the branch circuit/feeder. This specialty may not install branch circuit (line voltage) conductors, services, feeders, panelboards, or disconnect switches to HVAC/refrigeration equipment. Short sections of raceway may be installed for access to or physical protection of cables; however, wiring in conduit systems and wiring in classified locations are excluded from this specialty.

(f) Maintenance.

(i) Nonresidential maintenance (07): Limited to maintenance, repair and replacement of like-in-kind existing electrical equipment and conductors on industrial or commercial premises. This specialty does not include maintenance activities in residential dwellings defined in (a) of this subsection for the purposes of accumulating training experience toward qualification for the residential electrician (02) specialty examination. This specialty may perform the work defined in (ii) and (iii) of this subsection.

(ii) Nonresidential lighting maintenance and lighting retrofit (07A): Limited to working within the housing of existing nonresidential lighting fixtures for work related to repair, service, maintenance of lighting fixtures and installation of energy efficiency lighting retrofit upgrades. This specialty includes replacement of lamps, ballasts, sockets and the installation of listed lighting retrofit reflectors and kits. All work is limited to the fixture body, except remote located ballasts may be replaced or retrofitted with approved products. This specialty does not include installing new fixtures or branch circuits; moving or relocating existing fixtures; or altering existing branch circuits.

(iii) Residential maintenance (07B): This specialty is limited to residential dwellings as defined in WAC 296-46A-930 (2)(a), multistory dwelling structures with no commercial facilities, and the interior of dwelling units in multistory structures with commercial facilities. This specialty may maintain, repair, or replace (like-in-kind) existing lighting fixtures, hot water heaters, ranges, electric heaters, similar domestic appliances, and all permit exempted work as defined in WAC 296-46A-900(11).

This specialty is limited to equipment and circuits of 240 volts, 60 amperes, single phase maximum.

This specialty may disconnect and reconnect low voltage control and line voltage supply whips not over 6 feet in length provided there are no modifications to the characteristics of the branch circuit.

For the purpose of this specialty, "electrical equipment" does not include electrical conductors.

(g) Telecommunications (09): Limited to the installation, maintenance, and testing of telecommunications systems, equipment, and associated hardware, pathway systems, and cable management systems. The scope of work includes:

(i) Installation of open wiring systems of telecommunications cables.

(ii) Surface nonmetallic raceways designated and used exclusively for telecommunications.

(iii) Optical fiber innerduct raceway.

(iv) Underground raceways designated and used exclusively for telecommunications and installed for additions or extensions to existing telecommunications systems not to exceed fifty feet inside the building.

(v) Incidental short sections of circular or surface metal raceway, not to exceed ten feet, for access or protection of telecommunications cabling and installation of cable trays and ladder racks in telecommunications service entrance rooms, spaces, or closets.

(vi) Audio or paging systems where the amplification is integrated into the telephone system equipment.

(vii) Audio or paging systems where the amplification is provided by equipment listed as an accessory to the telephone system equipment and requires the telephone system for the audio or paging system to function.

(viii) Closed circuit video monitoring systems if there is no integration of line or low-voltage controls for cameras and equipment. Remote controlled cameras and equipment are considered (intrusion) security systems and must be installed by licensed electrical contractors and certified electricians.

Telecommunications systems do not include horizontal cabling used for fire protection signaling systems, intrusion alarms, access control systems, patient monitoring systems, energy management control systems, industrial and automation control systems, HVAC/refrigeration control systems, lighting control systems, and stand-alone amplified sound or public address systems. Telecommunications systems may interface with other building signal systems including security, alarms, and energy management at cross-connection junctions within telecommunications closets or at extended points of demarcation. Telecommunications systems do not include the installation or termination of premises line voltage service, feeder, or branch circuit conductors or equipment. Horizontal cabling for a telecommunications outlet, necessary to interface with any of these systems outside of a telecommunications closet, is the work of the telecommunications contractor.

(h) Door, gate, and similar systems (10): Limited to the installation of:

(i) This specialty may install, service, maintain, repair, or replace door/gate/similar systems electrical operator systems including:

(A) Low-voltage, NEC Class 2, door/gate/similar systems electrical operator systems where the door/gate/similar

systems electrical operator system is not connected to other systems.

(B) Branch circuits originating in a listed door/gate/similar systems electric operator control panel that supplies only door/gate/similar systems system components providing: The branch circuit does not exceed 20 amperes or 600 volts and the component is within sight of the listed door/gate/similar systems electric operator control panel.

(ii) Door/gate/similar systems electrical operator systems include electric gates, doors, windows, awnings, movable partitions, curtains and similar systems. These systems include, but are not limited to: Electric gate/door/similar systems operators, control push buttons, key switches, key pads, pull cords, air and electric treadle, air and electric sensing edges, coil cords, take-up reels, clocks, photo electric cells, loop detectors, motion detectors, remote radio and receivers, antenna, timers, lock-out switches, stand-alone release device with smoke detection, strobe light, annunciator, control panels, wiring and termination of conductors.

(iii) Reconnection of line voltage power to a listed door/gate/similar systems electric operator control panel is permitted provided:

(A) There are no modifications to the characteristics of the branch circuit/feeder;

(B) The circuit/feeder does not exceed 20 amperes or 600 volts; and

(C) The conductor or conduit extending from the branch circuit/feeder disconnecting means or junction box does not exceed six feet in length.

(iv) Wiring in classified locations as described in Chapter 5 NEC is excluded from this specialty. This specialty may not install, repair, or replace branch circuit (line voltage) conductors, services, feeders, panelboards, or disconnect switches supplying the door/gate/similar systems electric operator control panel.

(3) Combination specialty contractor license. The department may issue a combination specialty contractor license to a firm that qualifies for more than one specialty contractor license. The assigned administrator must be certified in all specialties applicable to the combination specialty contractor license. The license will plainly indicate the specialty licenses included in the combination license. An administrator assigned to a telecommunications contractor must be certified as a telecommunications administrator.

(4) Combination specialty administrator certificate. The department may issue a combination specialty administrator certificate to an individual who qualifies for more than one specialty administrators' certificate. The combination specialty administrators' certificate will plainly indicate the specialty administrators' certificate(s) the holder has qualified for.

(5) A specialty electrical contractor, other than the (06) limited energy specialty electrical contractor, may only perform telecommunications work within the equipment or occupancy limitations of their specialty electrical contractor license and administrator certification. Any other telecommunications work requires a telecommunications contractor license and telecommunications administrator certification.

NEW SECTION

WAC 296-46A-931 Electrical/telecommunications contractor license. (1) The department will issue an electrical/telecommunications contractor license that will expire twenty-four months following the date of issue to a person, firm, partnership, corporation or other entity that complies with chapter 19.28 RCW. An electrical/telecommunications contractor license will not be issued to or renewed for a person, firm, or partnership unless the Social Security number, date of birth, and legal address of the individual legal owner(s) are submitted with the application. The department may issue an electrical/telecommunications contractor license for a period greater or less than twenty-four months for the purpose of equalizing the number of electrical contractor licenses that expire each month. The department will prorate the electrical/telecommunications contractor license fee according to the number of months in the license period.

(2) The department may deny application or renewal of an electrical/telecommunications contractor's license if an owner, partner, or corporate officer owes outstanding final judgments to the department.

NEW SECTION

WAC 296-46A-932 Electrical/telecommunications contractor cash or securities deposit. Cash or securities deposit release. A cash or security deposit which has been filed with the department in lieu of a surety bond, will not be released until one year after the date the electrical/telecommunications contractor notifies the department in writing, that the person, firm, partnership, corporation, or other entity who (which) has been issued the electrical/telecommunications contractor's license, has ceased to do business in the state of Washington.

NEW SECTION

WAC 296-46A-933 Telecommunications contractor insurance. (1) To obtain a telecommunications contractor's license the applicant must provide to the department an original certificate of insurance naming the department of labor and industries, electrical section as certificate holder. Insurance coverage must be no less than twenty thousand dollars for injury or damages to property, fifty thousand dollars for injury or damage including death to any one person, and one hundred thousand dollars for injury or damage including death to more than one person. The certificate of insurance must be issued as continuous until canceled. The insurance will be considered a continuing obligation unless canceled by the insurance company. The insurance company must notify the department in writing ten days prior to the effective date of said cancellation or failure to renew.

(2) The telecommunications contractor may furnish to the department an assigned account to meet the insurance requirements in lieu of a certificate of insurance. An account assigned to the department for insurance requirements will be held in place for three years after the contractor's license is expired, revoked, or the owner notifies the department in writing that the company is no longer doing business in the

state of Washington as a telecommunications contractor. The account will be released by the department providing there is no pending legal action against the contractor.

NEW SECTION

WAC 296-46A-934 Electrical contractor exemptions.

(1) Low voltage thermocouple derived circuits and low voltage circuits, powered from a listed Class 2 power supply(ies), for low voltage built-in residential vacuum systems, low voltage circuits for underground landscape sprinkler systems, low voltage circuits for underground landscape lighting, or low voltage circuits for residential garage doors are not included in the requirements for licensing in chapter 19.28 RCW, provided:

(a) Installation and termination of line voltage equipment and conductors supplying these systems is performed by appropriately licensed and certified electrical contractors and electricians.

(b) Conductors of these systems do not pass through fire-rated walls, fire-rated ceilings or fire-rated floors in other than residential units.

Electrical failure of these systems does not inherently or functionally compromise safety to life or property.

(2) Firms who clean and/or replace lamps in lighting fixtures are not included in the requirements for licensing in chapter 19.28 RCW.

(3) Firms who install listed factory assembled cord and plug connected equipment are not included in the requirements for licensing in chapter 19.28 RCW.

NEW SECTION

WAC 296-46A-935 Electrical utility exemptions. (1)

Utility system exemption. Neither a serving electrical utility nor a contractor employed by the serving electrical utility is required to have a license for work on the "utility system" or on service connections or on meters and other apparatus or appliances used to measure the consumption of electricity.

(2) Street lighting exemption. A serving electrical utility is not required to have a license to work on electrical equipment used in the lighting of streets, alleys, ways, or public areas or squares.

(3) Customer-owned equipment exemption. A serving electrical utility is not required to have a license to work on electrical equipment owned by a commercial, industrial, or public institution customer if:

(a) The utility has not solicited such work; and

(b) Such equipment:

(i) Is located outside a building or structure; and

(ii) The work performed is on the primary side of the customer's transformer(s) which supplies power at the customer's utilization voltage.

(4) Independent power production equipment exemption. A serving electrical utility is not required to have a license to work on electrical equipment owned by a customer that is an independent power producer if:

(a) The customer has entered into an agreement to sell electricity to a utility or to a third party; and

(b) The electrical equipment is used to transmit electricity from the terminals of an electrical generating unit located on premises used by the customer to the point of interconnection with the utility system.

(5) Exempted equipment and installations. No person, firm, partnership, corporation, or other entity is required to have a license for work on electrical equipment and installations thereof that are exempted by RCW 19.28.091 or 19.28.151.

(6) Exemption from inspection.

(a) The work of a serving electrical utility and its contractors on the utility system is not subject to inspection. The utility is responsible for inspection and approval for the installation.

(b) Work exempted by Article 90-2 (B)(5) NEC, 1981 edition, is not subject to inspection.

NEW SECTION

WAC 296-46A-940 Manufacturers of electrical/telecommunications products exemptions. (1)

Manufacturers of electrical/telecommunications systems products will be allowed to utilize their factory-trained personnel to perform initial calibration, testing, adjustment, modification incidental to the startup and checkout of the equipment, or replacement of components within the confines of the specific product, without permit or required licensing, provided:

(a) The product has not been previously energized or is within the manufacturer's warranty.

(b) Modifications, as designated above, must not include changes to the original intended configuration nor changes or contact with external field-connected components.

(c) The manufacturer will be responsible for obtaining any required reapproval/recertification from the original listing or field evaluation laboratory.

(d) The manufacturer must notify the department if reapproval/recertification is required.

(2) No license under the provision of this chapter will be required from any manufacturer or any person, firm, partnership, or other entity employed by or authorized by a manufacturer of power generation equipment assemblies for the following work on premanufactured electric power generation equipment assemblies and control gear:

(a) Testing, repair, modification, maintenance, and installation of components internal to the transfer switch, or replacement of components within the confines of the specific product incidental to the startup and checkout of the equipment: Provided, the product has not been previously energized and/or is within the manufacturer's warranty. Modifications of the transfer switch must not include changes to the original intended configuration nor changes or contact with externally field-connected components. The manufacturer will be responsible for obtaining any required reapproval or recertification from the original listing agent;

(b) Testing, repair, modification, maintenance, or installation of components internal to the control gear;

(c) Testing, repair, modification, maintenance, or installation of components internal to the premanufactured power generation unit.

Premanufactured electric power generation equipment assemblies are made up of reciprocating internal combustion engines and the associated control gear equipment. Control gear equipment includes control logic, metering, and annunciation for the operation and the quality of power being generated by the reciprocating internal combustion engine and does not have the function of distribution of power.

(d) For the purposes of this subsection, the following work on premanufactured electric power generation equipment assemblies is not exempt from the requirements of chapter 19.28 RCW.

(i) Installation or connection of conduit or wiring between the power generation unit, transfer switch, control gear;

(ii) Installation of the transfer switch;

(iii) Connections between the power generation unit, transfer switch, control gear, and utility's transmission or distribution systems;

(iv) Connections between the power generation unit, transfer switch, control gear, and any building or structure;

(v) Test connections with any part of:

(A) The utility's transmission or distribution system;

(B) The building or structure.

(3) Nothing in this section will alter or amend any other exemptions from or requirement for licensure under this chapter.

receives a regular salary or wage similar to other employees; has supervisory responsibility for work performed by the electrical/telecommunications contractor and carries out the duties shown in chapter 19.28 RCW.

(4) A firm may designate certain temporary specialty administrator(s) or telecommunications initial specialty administrator(s) to satisfy the requirements of chapter 19.28 RCW under the guidelines described in Table 950-1 Temporary Specialty Administrator Application/Enforcement Procedure.

(5) The department may deny an application for an administrator's certificate for up to two years if the applicant's previous administrator's certificate has been revoked or suspended for serious noncompliance, as defined in WAC 296-46A-960.

NEW SECTION

WAC 296-46A-950 Administrator certificate. (1) The department must issue an administrator certificate to a person who qualifies for a certificate in accordance with chapter 19.28 RCW and makes proper application that includes the person's Social Security number, date of birth, and mailing address. The first certificate issued will expire on the person's birthdate at least one year and not more than three years from the date of issue. If a person was born in an even numbered year, the certificate will expire on the holder's even numbered birthdate. If the person was born in an odd numbered year, the certificate will expire on the holder's odd numbered birthdate. The department will prorate the administrator's certificate fee according to the number of months or major portions of months in a certificate period. All subsequent certificates will be issued for a twenty-four month period.

(2) The department may deny application or renewal of an administrator's certificate if the individual owes outstanding final judgments to the department.

(3) Effective July 1, 1987, an administrator designated on the electrical/telecommunications contractor's license must be a member of the firm who fulfills the duties of a full-time supervisory employee, or be a full-time supervisory employee. In determining whether the person is a member of the firm, the department will require that the person is named as the sole proprietor, a partner or an officer in a corporation as shown on the electrical contractor's license application on file with the department and the secretary of state. In determining whether a person is a full-time supervisory employee, the department will consider whether the person is on the electrical/telecommunications contractor's full-time payroll;

Must pass specialty administrator examination no later than:	12 Months After Submitting Temporary Specialty Administrator Application ³	12 Months After Submitting Temporary Specialty Administrator Application ³	STATUS A — N/A ¹ STATUS B — 12 Months After Submitting Temporary Specialty Administrator Application ³

Notes:

1. The initial telecommunications designated administrator(s) allowed in RCW 19.28.420(6) is not required to pass an examination.
2. If previous experience is required, it must be full-time in the appropriate specialty.
3. No extension of the temporary specialty administrator's status will be permitted unless the examination is successfully completed and a permanent specialty administrator's certificate is obtained within three months of the examination date. A temporary specialty administrator certificate cannot be renewed or extended.
4. See Figure 1. If a citation is issued for failure to comply with the requirements of chapter 19.28 RCW or WAC 296-46A, the individual/firm will lose the ability to assign a temporary administrator prior to examination.
5. To qualify for a temporary specialty administrator certificate or telecommunications initial designated specialty administrator certificate, the following must be submitted to the department: complete contractor's application package, complete administrator's application and examination package, complete Transfer of Administrator form, and all appropriate fees.
6. No requirement for the owner of a telecommunications firm described in RCW 19.28.420(6)(a).

PERMANENT

Figure 1

Interim Licensing/Certification Requirements

PERMANENT

NEW SECTION

WAC 296-46A-960 Revocation or suspension of an electrical/telecommunications contractor's license or administrator's certificate. The department has the ability, in the case of one or more acts of serious noncompliance with the provisions of this chapter, to revoke or suspend for such a period as it determines, any electrical/telecommunications contractor's license or electrical/telecommunications administrator's certificate issued under chapter 19.28 RCW.

Serious noncompliance: Serious noncompliance with the provisions of chapter 19.28 RCW, includes, but is not limited to, the following:

(1) Failure to correct a serious violation. A serious violation is a violation of chapter 19.28 RCW, chapter 296-46A or 296-401B WAC that creates a hazard of fire or a danger to life safety. A serious violation is also a violation that presents imminent danger to the public. Imminent danger to the public is present when installations of wire and equipment that convey electric current have been installed in such a condition that a fire-hazard or a life-safety hazard is present. Imminent danger to the public is also present when unqualified, uncertified, or fraudulently certified electricians or administrators; or unlicensed or fraudulently licensed contractors are continuously or repeatedly performing or supervising the performance of electrical work covered under chapter 19.28 RCW. For the purposes of this section, a certified electrician is considered qualified, provided the electrician is working within his or her certification; or

(2) Submitting a fraudulent document to the department; or

(3) Continuous noncompliance with the provisions of chapter 19.28 RCW, chapter 296-46A or 296-401B WAC. For the purposes of this section, continuous noncompliance will be defined as three or more citations demonstrating a reckless disregard of the electrical law, rules, or regulations within a period of one year; or where it can be otherwise demonstrated that the contractor or administrator has continuously failed to comply with the applicable electrical standards; or

(4) Failure to make any books or records, or certified copies thereof, available to the department for an audit to verify the hours of experience submitted by an electrical trainee; or

(5) A person who knowingly makes a false statement or material misrepresentation on an application, statement of hours, or signed statement required by the department may be referred to the county prosecutor for criminal prosecution under chapter 9A.72 RCW. The department may also file a civil action under chapter 19.28 RCW.

Chapter 296-401B WAC**CERTIFICATION OF COMPETENCY FOR JOURNEYMAN ELECTRICIANS****JOURNEYMAN AND SPECIALTY ELECTRICIANS CERTIFICATES**NEW SECTION

WAC 296-401B-092 General definitions. "Final judgment" means any money that is owed to the department under this chapter or any money that is owed the department as a result of an individual's or contractor's unsuccessful appeal of an infraction. Final judgment also includes any penalties owed the department as a result of an infraction not appealed or any outstanding fees due under this chapter.

NEW SECTION

WAC 296-401B-100 Certificate of competency required. To work in the electrical construction trade, an individual must:

- (1) Possess a current journeyman electrician certificate of competency issued by the department;
- (2) Possess a current specialty electrician certificate of competency issued by the department;
- (3) Possess a valid electrician temporary permit; or
- (4) Possess a current electrical training certificate, learning the trade under the supervision of a certified journeyman electrician or certified specialty electrician working in their specialty in the proper ratio.

NEW SECTION

WAC 296-401B-110 Original journeyman and specialty electrician certificates of competency. (1) The department of labor and industries will issue an original electrician certificate of competency to journeyman or specialty electricians that:

- (a) Meet the eligibility requirements listed in RCW 19.28.191, (Certificate of competency—Eligibility for examination—Rules); and
 - (b) Successfully pass a certification examination required by RCW 19.28.201, (Examination—Contents—Times—Fees—Certification of results); and
 - (c) Pay the original certificate fee listed in WAC 296-401B-700; and
 - (d) Submit a complete application including: Date of birth, mailing address, Social Security number.
- (2) An individual's initial electrician certificate of competency will expire on their birth date at least two years, and not more than three years, from the date of original issue.
- (3) The scope of work for general journeyman electricians and all electrical specialty electricians is described in WAC 296-46A-930.
- (4) The department issues certificates of competency in the following areas of electrical work:
- (a) General journeyman electrician certificate (01).

PERMANENT

- (b) Specialty electricians:
- (i) Residential certificate (02).
 - (ii) Pump and irrigation certificate (03).
 - (iii) Domestic well specialty electrical technician certificate (03A).
 - (iv) Signs and outline lighting certificate (04).
 - (v) Domestic appliance certificate (05).
 - (vi) Limited energy system certificate (06).
 - (vii) HVAC/refrigeration limited energy technician (06A). HVAC/refrigeration thermostat installation (see WAC 296-401B-340(2)):

(A) HVAC/refrigeration first- and second-year trainees may work unsupervised when installing HVAC thermostat cable when the system consists of a single thermostat in one- and two-family dwelling units and where line voltage power is not connected to the system.

(B) HVAC/refrigeration second-year trainees may work unsupervised when installing thermostats or making thermostat cable connections in one- and two-family dwelling units.

- (viii) Nonresidential maintenance certificate (07).
- (ix) Nonresidential lighting maintenance and lighting retrofit technician (07A).
- (x) Residential maintenance certificate (07B).
- (xi) Door, window, gate, and similar systems certificate (10).

NEW SECTION

WAC 296-401B-120 Linemen exemptions. (1) Electrical linemen employed by a serving electrical utility or employed by a licensed electrical contractor while performing work found in WAC 296-46A-935, do not need certificates of competency.

(2) An individual is eligible for the above lineman's exemption if the individual carries evidence on their person that they:

(a) Have graduated from a department of labor and industries approved lineman's apprenticeship course; or

(b) Are currently registered in a department of labor and industries approved lineman's apprenticeship course and are working under the direct supervision of a journeyman electrician or a graduate of a lineman's apprenticeship course approved by the department. The training received in the lineman's apprenticeship program must include training in applicable articles of the currently adopted National Electrical Code (see WAC 296-46A-090).

RENEWAL OF JOURNEYMAN AND SPECIALTY ELECTRICIANS CERTIFICATES

NEW SECTION

WAC 296-401B-130 Renewal of journeyman and specialty electrician certificates of competency. (1) An individual must apply for renewal of their journeyman or specialty electrician certificate of competency before the expiration date of the certificate. Renewed certificates are valid for three years.

(2) Beginning April 30, 1997, an individual must:

(a) Pay the renewal fee listed in WAC 296-401B-700; and

(b) Provide accurate evidence on the renewal form that the individual has completed at least eight hours of approved continuing education required for each year of the prior certification period (see WAC 296-401B-630 and 296-401B-640 for other continuing education documentation requirements). Any portion of a year is equal to one year for continuing education requirements.

(3) An individual will not be given credit for the same approved continuing education course taken more than once in the three years prior to the renewal date.

(4) If an individual is applying to renew a certificate that covered a period of two years or more, the individual must complete an approved continuing education class, of at least eight hours duration, on the latest National Electrical Code changes.

(5) An individual must pay all outstanding final judgments owed to the department before renewal of a certificate of competency.

(6) A certificate of competency that has been suspended by the department may be:

(a) Renewed by the holder obtaining and submitting the required hours of continuing education and will remain in suspended status for the duration of the suspension; or

(b) Renewed by the holder without the required hours of continuing education and will remain in suspended status for the duration of the suspension. Following the suspension, the certificate will be placed in inactive status as described in WAC 296-401B-180 until the required continuing education requirements are met and documented to the department of labor and industries.

NEW SECTION

WAC 296-401B-140 Late renewal of journeyman and specialty electrician certificates of competency. (1) An individual may renew their certificate of competency within ninety days after the expiration date without reexamination if the individual:

(a) Pays the late renewal fee listed in WAC 296-401B-700; and

(b) Provides evidence to the department that the individual completed at least eight hours of continuing education each year during the prior certification period.

(2) All applications for renewal received more than ninety days after the expiration date of the certificate require that you pass the appropriate competency examination before being recertified.

CONTINUING EDUCATION REQUIREMENTS

NEW SECTION

WAC 296-401B-180 Inactive status. (1) If an individual has not completed the required hours of continuing education (see WAC 296-401B-130), a certificate cannot be renewed. If the individual has not completed the required continuing education, applies for renewal before the certificate expires, and pays the appropriate renewal fee listed in

WAC 296-401B-700, the certificate will be placed in an inactive status. When the certificate of competency is placed in an inactive status, the individual cannot work as a journeyman or specialty electrician in the electrical construction trade until evidence is provided that the individual has completed the required hours of continuing education.

(2) An individual may obtain an electrical training certificate and work under the supervision of a certified journeyman or certified specialty electrician working in their specialty until the individual attains and documents the required hours of continuing education.

ELECTRICIAN TEMPORARY PERMITS

NEW SECTION

WAC 296-401B-200 Qualifying for an electrician temporary permit to work in Washington when certified in another state. (1) If an individual coming into the state of Washington to work in the electrical construction trade is certified in another jurisdiction, the department can issue the individual one initial electrician temporary permit in lieu of a certificate of competency. The initial electrician temporary permit allows the individual to work as an electrician between the date of filing a completed application for the next certification examination and notification of the results of the examination. This initial permit will be issued for no longer than one one hundred twenty-day period. (During this period, the department expects the individual to take and pass the next available certification examination.)

(a) To qualify for an initial electrician temporary permit an individual must:

(i) Meet the eligibility requirements of RCW 19.28.191 (Certificate of competency—Eligibility for examination—Rules); and

(ii) Be currently certified by a governing authority from another state, city, town or other certifying authority; and

(iii) File a complete application to take the next certification examination.

(b) An individual will not be issued an initial electrician temporary permit if they:

(i) Have previously been issued an initial electrician temporary permit; or

(ii) Have an expired or inactive Washington state journeyman electrician certificate or specialty certificate in the category requested on the exam.

(c) An initial electrician temporary permit will become invalid:

(i) On the expiration date listed on the electrician temporary permit or the date the individual is notified they have failed the examination, whichever is earlier;

(ii) If the individual does not take the next competency examination; or

(iii) Fails to file all necessary or corrected paperwork required to verify eligibility by the department's published application cut-off date and therefore cannot take the next examination.

(d) If the individual fails the certification examination and provides verification of enrollment in an approved jour-

neyman refresher course or approved appropriate specialty electrician refresher course, as prescribed in RCW 19.28.231, application may be made for a second electrician temporary permit.

(i) The second electrician temporary permit will be issued for one ninety-day period after the date of the failed examination and will become invalid:

(A) If the individual does not take the next competency examination after completion of the journeyman refresher course;

(B) If the individual fails to file all the necessary or corrected paperwork to verify eligibility by the department's published application cut-off date and therefore cannot take the next examination; or

(C) On the expiration date listed on the second electrician temporary permit or the date the individual is notified of having failed the examination, whichever is earlier.

(ii) If the second electrician temporary permit becomes invalid, it will not be extended or renewed. To continue to work in the electrical trade, the individual must apply for and receive a training certificate and work under the direct supervision of either a certified journeyman or a specialty electrician working in the appropriate specialty in the proper ratio.

(iii) A second electrician temporary permit may not be extended or renewed.

(e) Except as described in (d) of this subsection, if an electrician temporary permit becomes invalid it will not be extended or renewed. To continue to work in the electrical trade, an individual must:

(i) Apply for and receive a training certificate; and

(ii) Work under the direct supervision of either a certified journeyman or a specialty electrician working in their specialty; and

(iii) Work in the proper ratio.

RECIPROCAL AGREEMENTS

NEW SECTION

WAC 296-401B-250 Reciprocal agreements between Washington and other states. The department of labor and industries negotiates agreements with states that have equivalent requirements for certification and licensing of journeymen or specialty electricians. These agreements allow electricians from those states to become certified in the state of Washington without examination and allow Washington certified electricians to become certified in the other states without taking competency examinations. To find out if a state has a reciprocal agreement with the department, contact the electrical section at a department of labor and industries office.

NEW SECTION

WAC 296-401B-260 Qualifying for a reciprocal electrician certificate. An individual coming into the state of Washington from another state will be issued a reciprocal electrician certificate of competency if the following conditions are met:

(1) The department has a valid reciprocal agreement with the other state in the journeyman or specialty category requested;

(2) The individual makes a complete application for the reciprocity certificate on the form provided by the department;

(3) The individual provides evidence that they meet the eligibility requirements listed in RCW 19.28.191, (Certificate of competency—Eligibility for examination—Rules) by presenting a valid journeyman or specialty electrician certificate or certified letter from the issuing state;

(4) The individual obtained this certificate of competency as a journeyman or specialty electrician in the other state by examination;

(5) The individual was not a resident of the state of Washington at the time the examination in the other state was taken; and

(6) The individual pays the reciprocity fee listed in WAC 296-401B-700.

NEW SECTION

WAC 296-401B-270 Ineligibility for reciprocal electrician certificate. An individual is not eligible for a reciprocal electrician certificate if the individual has:

(1) Failed to renew a certificate of competency as required in RCW 19.28.211, (Certificate of competency—Issuance—Renewal—Continuing education—Fees—Effect); or

(2) A Washington certificate of competency in suspended, revoked, or inactive status under this chapter.

TRAINING CERTIFICATES

NEW SECTION

WAC 296-401B-300 Training certificate required. A training certificate is required to work in the electrical construction trade if an individual does not:

(1) Possess a current journeyman electrician certificate of competency issued by the department; or

(2) Possess a current specialty electrician certificate of competency issued by the department; or

(3) Possess a valid electrician temporary permit.

NEW SECTION

WAC 296-401B-310 Ineligibility for electrical training certificates. Trainees who have had their training certificates revoked or suspended (for the duration of the revocation or suspension) and trainees owing a final judgment to the department may not be issued another training certificate.

NEW SECTION

WAC 296-401B-320 Training certificate levels.

Training Certificate	Total Hours Worked
1st year	0 through 1,999

Training Certificate

- 2nd year
- 3rd year
- 4th year

Total Hours Worked

- 2,000 through 3,999
- 4,000 through 5,999
- 6,000 or more

An individual may apply for the next year's certificate whenever sufficient hours have been worked. Two thousand (2,000) hours is equal to one year of employment.

Note: The department may verify the hours submitted with any training certificate application.

NEW SECTION

WAC 296-401B-330 Renewal of training certificates.

(1) When renewing an electrical training certificate, the individual must give the department a completed, signed, and notarized affidavit of experience accurately attesting to:

(a) The electrical installation work performed for each employer the individual worked for in the electrical trade during the previous year;

(b) The correct electrical category the individual worked in; and

(c) The actual number of hours worked in each category under the proper supervision of a Washington certified, journeyman electrician or appropriate specialty electrician.

(2) If an individual is enrolled in an approved apprenticeship program under chapter 49.04 RCW when the individual renews an electrical training certificate, the individual and their apprenticeship training director must give the department a completed, signed, and notarized affidavit of experience accurately attesting to:

(a) The electrical installation work the individual performed in the electrical trade during the previous year;

(b) The correct electrical category the individual worked in; and

(c) The actual number of hours worked in each category under the proper supervision of a Washington certified journeyman electrician or appropriate specialty electrician for each employer. For apprentices enrolled in a registered apprenticeship program, the applicant and the training director are the only authorized signatures the department will accept on affidavits of experience.

(3) The individual should ask each employer or apprenticeship training director for an accurately completed, signed, and notarized affidavit of experience for the previous year. The employers or apprenticeship training directors must provide the previous year's affidavit of experience to the individual within twenty days of the request.

(4) The individual and their employer or apprenticeship training director must sign and notarize the affidavit of experience attesting to the accuracy of all information contained in the document.

NEW SECTION

WAC 296-401B-335 Credit for electrical work experience exempt from certification requirements. (1) To receive credit for electrical work experience which is exempted in RCW 19.28.261, an individual must provide the

PERMANENT

department with verification from the employer or owner according to WAC 296-401B-330.

(2) Beginning January 1, 1998, all exempt individuals learning the electrical trade must obtain an electrical certificate from the department and renew it annually in order to receive credit for hours worked in the trade according to WAC 296-401B-330.

(3) The department may require verification of supervision in the proper ratio from the certified supervising electrician.

(4) Telecommunication work experience:

(a) Credit may be authorized only by exempt employers (per RCW 19.28.261), general electrical (O1) contractors, and limited energy system (O6) electrical contractors for limited energy experience for telecommunications work done:

(i) Under the supervision of a certified journeyman or limited energy electrician; and

(ii) In compliance with RCW 19.28.191.

(b) Individuals who want to obtain credit for hours of experience towards electrician certification for work experience doing telecommunications installations must:

(i) Obtain an electrical training certificate;

(ii) Renew the training certificate annually in order to receive credit for hours worked in the trade according to WAC 296-401B-330.

(c) Telecommunications contractors may not verify telecommunications work experience towards electrician certification.

NEW SECTION

WAC 296-401B-340 Trainees working without supervision. (1) After review by the department, a trainee may be issued a six-month, nonrenewable unsupervised electrical training certificate that will allow the individual to work without supervision if the trainee:

(a) Has submitted a complete application for an unsupervised electrical training certificate;

(b) Has worked over 7,000 hours properly supervised;

(c) Has successfully completed or is currently enrolled in an approved apprenticeship program or an electrical construction trade program in a school approved by the board of community and technical colleges;

(d) Has paid all appropriate training certificate fees listed in WAC 296-401B-700; and

(e) Is currently working for and continues to work for a licensed electrical contractor that employs at least one certified journeyman or specialty electrician in the appropriate specialty.

(2) HVAC/refrigeration limited energy technician trainees may work unsupervised when doing HVAC/refrigeration thermostat installation as follows:

(a) HVAC/refrigeration first- and second-year trainees may work unsupervised when installing HVAC thermostat cable when the system consists of a single thermostat in one- and two-family dwelling units where line voltage power is not connected to the system.

(b) HVAC/refrigeration second year trainees may work unsupervised when installing thermostats or making thermostat cable connections in one- and two-family dwelling units.

(3) Individuals credited with a minimum of two years previous work experience training credit per WAC 296-401B-455(2) will qualify for a third-year training certificate in the specialty listed in WAC 296-401B-455 (1)(c) and will be considered temporarily, until June 30, 2002, to be a specialty electrician/technician for the purpose of working within the scope of the appropriate specialty without supervision and for the purpose of supervising first and second year trainees in proper ratio.

(4) Individuals credited with a minimum of two years previous work experience training credit per WAC 296-401B-455(2) will qualify for a third-year training certificate in the appropriate specialty, listed in WAC 296-401B-455 (1)(a), (b), (d), (e), (f), or (g) and will be considered temporarily, until June 30, 2002, to be a specialty electrician/technician for the purpose of working within the scope of the appropriate specialty without supervision and for the purpose of supervising first and second year trainees in proper ratio.

(5) A third-year training certificate issued per subsection (3) or (4) of this section will be revoked if the individual does not successfully complete the appropriate specialty examination before June 30, 2002, for the appropriate specialty, listed in WAC 296-401B-455 (1)(a), (b), (c), (d), (e), (f), or (g). The individual may then apply for a second-year trainee certificate and must:

(a) Work under the direct supervision of a certified specialty electrician or journeyman electrician;

(b) Not supervise trainees; and

(c) Be supervised in the correct ratio.

NEW SECTION

WAC 296-401B-350 Audit of trainee hours. (1) The department, based upon RCW 19.28.171 (Electrical trainee hours—Audit—Rules—Confidentiality), may audit the employment records of the electrical contractor or employer who verified the electrical trainee hours. The time period covered by an audit may be less than one year but will not exceed five years from the date each affidavit verifying trainee hours is submitted.

(2) Every employer or contractor must keep a record of trainee employment so the department may obtain the information it needs to verify electrical trainee work experience. Upon the request of the department's auditors or agents, these records must be made available to the department for inspection within seven business days.

(3) An employer or contractor must maintain time cards or similar records to verify:

(a) The number of hours the trainee worked as a supervised trainee; and

(b) The type of electrical work the trainee performed.

(4) Any information obtained from the trainee's contractor or employer during the audit under the provisions of RCW 19.28.171 is confidential and is not open to public inspection under chapter 42.17 RCW.

(5) The department's audit may include, but will not be limited to, the following:

(a) An audit to determine whether the trainee was employed by the contractor or employer during the period for

which the hours were submitted, the actual number of hours the trainee worked, and the category of electrical work performed; and

(b) An audit covering a specific time period and examining a contractor's or employer's books and records which may include their reporting of the trainee's payroll hours required for industrial insurance, employment security or prevailing wage purposes.

JOURNEYMAN ELECTRICIAN EXAMS

NEW SECTION

WAC 296-401B-410 Qualifying for the journeyman electrician competency examination. (1) An individual may take the journeyman electrician's competency examination if the individual held a current electrical training certificate and has worked for an employer who employs at least one certified journeyman or specialty electrician on staff while the individual:

(a) Has been employed, in the electrical construction trade, under the direct supervision of a journeyman electrician in the proper ratio for four years (8,000 hours) of which two years must be in industrial and/or commercial electrical installation (excluding work described for specialty electricians or technicians) and not more than a total of two years in all specialties; or

(b) Has completed a four-year apprenticeship program in the electrical construction trade that is registered with the state apprenticeship council while working under the direct supervision of a journeyman electrician in the proper ratio; or

(c) Has completed a two-year electrical construction program as described in RCW 19.28.191, (Certificate of competency—Eligibility for examination—Rules), and two years of work experience in industrial or commercial electrical installations (excluding work described for specialty electricians or electrical technicians) under the direct supervision of a journeyman electrician in the proper ratio.

(2) The applicant and their employer or apprenticeship training director must attest to the accuracy of all information contained on the affidavits of experience used to verify eligibility for the journeyman examination. All the requirements of WAC 296-401B-330 must be met when submitting affidavits of experience.

NEW SECTION

WAC 296-401B-420 Qualifying for the journeyman electrician competency examination when work was performed in another state when certified. An individual may take the journeyman electrician's competency examination when the appropriate authority having state certifies to the department that:

(1) The work was legally performed under their licensing and certification requirements;

(2) The work consisted of at least four years (8,000 hours) of electrical installation training of which two years must be in industrial or commercial electrical installations

(excluding work described for specialty electricians or electrical technicians);

(3) The work consisted of not more than a total of two years in all specialties; and

(4) The other state's certificate was obtained by examination.

NEW SECTION

WAC 296-401B-430 Qualifying for the journeyman electrician competency examination when work was performed in another jurisdiction when not certified. (1) An individual may take the journeyman electrician's competency examination when an appropriately licensed electrical contractor files a notarized affidavit of experience with the department accompanied by payroll documentation and certifying:

(a) The individual's training consisted of at least four years (8,000 hours) of electrical installation training of which two years must be in industrial or commercial electrical installations (excluding work described for specialty electricians or technicians); and

(b) The work consisted of not more than a total of two years in all specialties.

(2) The individual and their employer must attest to the accuracy of all information contained on the affidavits of experience used to verify eligibility for the journeyman examination.

NEW SECTION

WAC 296-401B-440 Experience in another country.

(1) If an individual has a journeyman electrician certificate from a country outside of the United States that requires at least four years of electrical construction training, the individual will be eligible for two years credit toward a journeyman certificate. No more than two years of the required training may be for work described for specialty electricians or technicians. Credit is not allowed towards a specialty electrician certificate.

(2) The individual must also obtain an electrical training certificate and take two additional years training in the United States under the direct supervision of a journeyman electrician in the proper ratio in industrial or commercial electrical installations (excluding work described for specialty electricians or electrical technicians) to qualify for the journeyman's competency examination.

NEW SECTION

WAC 296-401B-445 Military experience. An individual who has worked a minimum of four or more years in the electrical construction trade performing work described in WAC 296-401B-410 while serving in the Armed Forces of the United States may be eligible to take the examination for the certificate of competency as a journeyman electrician. Nuclear, marine, radar, weapons, electronics, or aeronautical experience is not acceptable.

SPECIALTY ELECTRICIAN EXAMS**NEW SECTION**

WAC 296-401B-450 Qualifying for the specialty electrician competency examination. (1) An individual may take the specialty electrician's competency examination if the individual held a current electrical training certificate and has worked for an employer who employs at least one certified journeyman or specialty electrician on staff while the individual:

(a) Has been employed, in the electrical construction trade, under the direct supervision of a journeyman electrician for two years (4,000 hours) in the appropriate specialty; or

(b) Has completed an appropriate two-year apprenticeship program in the electrical construction trade that is registered with the state apprenticeship council while working under the direct supervision of a journeyman electrician or an appropriate specialty electrician in the proper ratio; or

(2) The applicant and their employer or apprenticeship training director must attest to the accuracy of all information contained on affidavits of experience used to verify eligibility for the journeyman examination. All the requirements of WAC 296-401B-330 must be met when submitting affidavits of experience.

NEW SECTION

WAC 296-401B-455 Opportunity for gaining credit for previous work experience in certain specialties. (1) The following specialties have an opportunity under the following provisions, to apply previous experience towards electrical training credit:

(a) Domestic well specialty electrical technician (03A).

(b) Limited energy (06) - Stand alone amplified sound (RESIDENTIAL ONLY).

(c) HVAC/refrigeration limited energy technician (06A).

(d) Nonresidential maintenance (07).

(e) Nonresidential lighting maintenance and lighting retrofit (07A).

(f) Residential maintenance (07B).

(g) Door, window, gate, and similar systems (10).

(2) To qualify previous work experience training credit toward eligibility for any of the specialty certificate examination(s) in subsection (1) of this section, an individual must:

(a) Make application on or before December 31, 2001, for an electrical training certificate and pay the proper fees to the department; and

(b) Provide proof on or before December 31, 2001, to the department with a notarized verification letter from the individual's employer(s) documenting: That the individual performed electrical installation in the appropriate specialty and was employed full time in the business of electrical installation by a firm in the appropriate specialty; and

(3) Previous work experience training credit will be allowed only for work experience gained:

Prior to June 30, 2001, in specialties listed in subsection (1)(a), (b), (c), (d), (e), (f), or (g) of this section; or

(4) Work experience gained on or after June 30, 2001, in specialties listed in subsection (1)(a), (b), (d), (e), (f), or (g) of this section or on or after September 30, 2000, in the specialty listed in subsection (1)(c) of this section, will be credited only if the applicant possessed a valid training certificate during the time worked and met all requirements of chapter 19.28 RCW and this chapter.

(5) Coincidental previous work experience credit gained using subsection (2), (3), or (4) of this section will not be allowed for the same time periods for multiple specialties.

(6) Individuals credited with less than two years previous work experience training credit may use approved previous work experience credit when applying for the appropriate electrical training certificate.

(7) Previous work experience obtained through subsection (2), (3), or (4) of this section will not be applicable towards journeyman certification until the trainee successfully completes the specialty certification examination that the previous work experience allowed.

NEW SECTION

WAC 296-401B-460 Qualifying for the specialty electrician competency examination when work was performed in another state when certified. An individual may take the specialty electrician's competency examination when the appropriate authority having state certifies to the department that:

(1) The work was legally performed under their licensing and certification requirements;

(2) The work consisted of at least two years (4,000 hours) of electrical installation in the appropriate specialty; and

(3) The other state's certificate was obtained by examination.

NEW SECTION

WAC 296-401B-470 Qualifying for the specialty electrician competency examination when work was performed in another jurisdiction when not certified. (1) An individual may take the specialty electrician's competency examination when an appropriately licensed electrical contractor files a notarized affidavit of experience with the department accompanied by payroll documentation and certifying:

(a) The individual's training consisted of at least two years (4,000 hours) of electrical installation; and

(b) The work was performed in the appropriate specialty.

(2) The individual and their employer must attest to the accuracy of all information contained on the affidavits of experience used to verify eligibility for the specialty examination.

NEW SECTION

WAC 296-401B-475 Experience in another country. Experience gained in another country is not allowed towards a specialty electrician certificate.

NEW SECTION

WAC 296-401B-476 Military experience. (1) If an individual has two or more years training or experience in a specialized electrical field in the Armed Forces of the United States that is similar to a specialty electrician category listed in WAC 296-401B-110(4), one year credit may be allowed toward an appropriate specialty certificate. Nuclear, marine, radar, weapons, electronics, or aeronautical experience is not acceptable.

(2) The individual must also work one additional non-military year in the appropriate specialty under the direct supervision of a journeyman or specialty electrician to qualify for the specialty electrician's competency examination.

ELECTRICIAN COMPETENCY EXAMSNEW SECTION

WAC 296-401B-500 Failing a competency examination. (1) Anyone failing a competency examination may retake the examination by making arrangements with the testing agency and paying the retesting fee listed in WAC 296-401B-700.

(2) Anyone failing a competency examination may continue to work in the electrical trade if they have a valid electrical training certificate and work under the direct supervision of a certified journeyman or specialty electrician in the proper ratio.

JOURNEYMAN AND SPECIALTY ELECTRICIAN EXAM CONTENTSNEW SECTION

WAC 296-401B-510 Subjects included in the journeyman electrician competency examinations. The following subjects are among those that may be included in the examination for a certificate of competency. The list is not exclusive. The examination may also contain subjects not on the list.

For journeyman electricians:

AC - Generator; three-phase; meters; characteristics of; power in AC circuits (power factor); mathematics of AC circuits.

Air conditioning - Basic.

Blueprints - Surveys and plot plans; floor plans; service and feeders; electrical symbols; elevation views; plan views.

Building wire - Sizes.

Cable trays.

Calculations.

Capacitive reactance.

Capacitor - Types; in series and parallel.

Circuits - Series; parallel; combination; basic; branch; outside branch circuits; calculations.

Conductor - Voltage drop (line loss); grounded.

Conduit - Wiring methods.

DC - Generator; motors; construction of motors; meters.

Definitions.

Electrical units.

Electron theory.
Fastening devices.
Fire alarms - Introduction to; initiating circuits.
Fuses.
Generation - Principles of.
Grounding.
Incandescent lights.
Inductance - Introduction to; reactance.
Insulation - Of wire.
Mathematics - Square root; vectors; figuring percentages.
Motors - Motors vs. generators/CEMF; single phase; capacitor; repulsion; shaded pole; basic principles of AC motors.
Ohm's Law.
Power.
Power factor - AC circuits; correction of; problems.
Rectifiers.
Resistance - Of wire.
Rigging.
Safety - Electrical shock.
Services.
Three-wire system.
Tools.
Transformers - Principles of; types; single phase; three-phase connections.
Voltage polarity across a load.
Wiring methods - Conduit; general.
Wiring systems - Less than 600 volts; 480/277 volts; three-phase delta or wye; distribution systems over 600 volts.
Note: Journeyman electrician examinations may also include the subjects listed below for specialty electrician examinations.

NEW SECTION

WAC 296-401B-520 Subjects included in the specialty electrician competency examinations. The following subjects are among those that may be included in the examination for a certificate of competency. Examination subjects are restricted to those subjects related to the scope of work of the specialty described in WAC 296-46A-930. The list is not exclusive. The examination may also contain subjects not on the list.

For specialty electricians:

AC - Meters.

Appliance circuits or controls.

Blueprints - Floor plans; service and feeders.

Cables - Wiring methods.

Calculations.

Circuits - Series; parallel; combination; basic; outside branch.

Conductor - Voltage drop (line loss); grounded; aluminum or copper.

Conduit - Wiring methods.

Electrical signs, circuits, controls, or services.

Electrical units.

First aid.

Fuses.

General lighting.

Grounding of conductors.

Insulation of wire.
 Ladder safety.
 Limited energy circuits or systems.
 Maintenance of electrical systems.
 Mathematics - Figuring percentage.
 Motor circuits, controls, feeders, or services.
 Ohm's Law.
 Overcurrent protection.
 Resistance of wire.
 Services.
 Sizes of building wire.
 Three-wire system.
 Tools.
 Transformer - Ratios; single-phase.

CONTINUING EDUCATION COURSES

NEW SECTION

WAC 296-401B-600 Continuing education course approval. (1) Each continuing education course for renewal of an electrician's certificate of competency must be approved by a three-member subcommittee of the electrical board. The chief electrical inspector will be an ex officio member of this subcommittee.

(2) To be considered for approval, continuing education courses must consist of not less than four hours of instruction, and be open to monitoring by a representative of the department and/or the electrical board at no charge. If the department determines that the continuing education course does not meet or exceed the minimum requirements for approval, the approval for the course may be revoked or the number of credited hours reduced.

(3) Approved courses must be based on:

- (a) The currently adopted edition of the National Electrical Code; and/or
- (b) Currently adopted administrative rules (chapters 296-46A and 296-401B WAC); or
- (c) Materials and methods as they pertain to electrical construction, building management systems, electrical maintenance and workplace health and safety.

(4) The entity seeking approval of a continuing education course will be notified of the subcommittee's decision within five days of the completed review of the application.

NEW SECTION

WAC 296-401B-610 Offering continuing education courses. (1) If the continuing education course is approved, the course may be offered for up to three years without additional approval. If a new edition of the National Electrical Code is adopted within the three-year period, a new application must be submitted for continued approval of any code-related course.

(2) If the application is not approved, the notice will include an explanation of the reasons for rejection. If the applicant disagrees with the subcommittee's decision, a reconsideration hearing by the electrical board may be requested. The request must be received by the board

forty-five days before a regularly scheduled board meeting (see RCW 19.28.311). All additional information to be considered must be submitted not less than thirty days before the board hearing.

(3) Continuing education course hours presented and/or completed before approval by the subcommittee cannot be used to meet the electrician certificate renewal requirements.

NEW SECTION

WAC 296-401B-620 Application for continuing education course approval. (1) All applications for approval must be on forms provided by the department, and will be reviewed without testimony. The board will only consider information you submit with the application for approval of the continuing education training.

(2) The department of labor and industries will provide continuing education approval forms to sponsors upon request. The original completed application for training approval, plus three copies, must be received by the department at least forty-five days before the proposed first course is offered.

(3) Information on the application must include:

- (a) Course title, number of classroom instruction hours, and whether the training is open to the public.
- (b) Sponsor's name, address, contact's name and phone number.
- (c) Course outline (general description of the training, including specific National Electrical Code articles referenced).
- (d) Lists of resources (texts, references, visual aids).
- (e) Names and qualifications of instructors.
- (f) Any additional documentation you want considered.
- (g) A typed copy of the course completion roster that will be used to document:
 - (i) Each participant's name, an electrician certificate number or Social Security number;
 - (ii) The course number, location, and date(s) of training; and
 - (iii) The instructor's name and signature or signature of the course sponsors' authorized representative.
- (h) A sample copy of the completion certificate issued to the course participants.

NEW SECTION

WAC 296-401B-630 Electrician documentation of Washington approved training course completion. (1) The department will not be responsible for researching continuing education history for electricians.

(2) If the department determines that course sponsors have issued inaccurate or false course rosters or certified electricians have filed inaccurate or false continuing education units on the electrician renewal form, the department will initiate penalty action under this chapter.

(3) Sponsors must forward an accurate and typed course completion roster for each course given within thirty days of course completion.

(4) The course completion roster must show each participant's name, and electrician certificate number or Social

Security number; the course number, location, date of completion, and the instructor's name and signature or signature of the course sponsors' authorized representative.

(5) If the course sponsor fails to submit a typed completion roster within thirty days of the course date, the department may revoke or suspend the course approval.

(6) Course sponsors must award a certificate to each participant completing the course from which the participant will be able to obtain:

- (a) Name of course sponsor.
- (b) Name of course.
- (c) Date of course.
- (d) Course approval number.
- (e) The number of continuing education units.

(7) The department will only use a copy of the sponsor's completion roster as final evidence that the participant completed the training course (see WAC 296-401B-130 for renewal requirements).

(8) The department will keep submitted rosters of the continuing education courses on file for audit purposes. The department is not responsible for the original of any completion certificate issued.

NEW SECTION

WAC 296-401B-640 Electrician documentation of out-of-state approved training course completion. To apply continuing education units earned from out-of-state course sponsors who do not have state of Washington approved courses, the following must be met:

- (1) The department must determine that the course is equivalent to the continuing education requirements; or
- (2) The department must have entered into a reciprocal agreement with the issuing jurisdiction;
- (3) The participants must forward an accurate and completed award or certificate from the course sponsor identifying the course location, and date of completion, participant's name, and Washington electrician certificate number or Social Security number. The department will only accept a copy of the sponsor's certificate or form as evidence that the participant completed the training course.

FEES

NEW SECTION

WAC 296-401B-700 Fees for certificates of competency, examination and reciprocity. When an individual applies to take a competency examination or to obtain a certificate of competency, the individual must pay the appropriate fee(s) listed below.

	Type of Certificate	Fee
(1)	Journeyman or specialty electrician certificate renewal (per 36-month period)	\$64.50
(2)	Late renewal of journeyman or specialty electrician certificate (per 36-month period)	\$130.00

	Type of Certificate	Fee
(3)	Journeyman or specialty electrician examination application (nonrefundable)	\$27.00
(4)	Journeyman or specialty electrician original certificate	\$42.50
(5)	Training certificate (expires one year after purchase)	\$20.75
(6)	Training certificate renewal or update of hours	\$20.75
(7)	Unsupervised electrical training certificate	\$20.75
(8)	Journeyman or specialty electrician test or retest	\$48.75
(9)	Reciprocal journeyman or specialty certificate	\$69.50
(10)	Reinstatement of journeyman or specialty certificate	\$20.75
(11)	Continuing education course submittal and approval, per course	\$41.50
(12)	Continuing education course renewal, per course	\$20.75
(13)	Refund processing fee. All requests for refunds will be assessed a processing fee	\$10.50

Note: Failure to appear for an examination results in forfeiture of the examination fee.

FALSE STATEMENTS OR MATERIAL MISREPRESENTATION

NEW SECTION

WAC 296-401B-800 Penalties for false statements or material misrepresentations. (1) A person who knowingly makes a false statement or material misrepresentation on an application, statement of hours, or signed statement required by the department may be referred to the county prosecutor for criminal prosecution under RCW 9A.72.020, 9A.72.030, and 9A.72.040. The department may also file a civil action under RCW 19.28.271 and may revoke or suspend a certificate of competency under RCW 19.28.271.

(2) The department may file a civil action under RCW 19.28.271 and may revoke or suspend a certificate of competency under RCW 19.28.341 or 19.28.241 for inaccurate reporting of continuing education units on the journeyman or specialty electrician renewal form.

(3) The department may file a civil action under RCW 19.28.271 and may subtract up to 2,000 hours of employment from a trainee's total hours, if the department determines the trainee has made a false statement or material misrepresentation in an affidavit of experience.

PERMANENT

REVOCATION, SUSPENSION, AND CONFISCATION OF CERTIFICATES, TEMPORARY PERMITS, AND TRAINING CERTIFICATES

NEW SECTION

WAC 296-401B-850 Revocation or suspension of a certificate of competency or training certificate. (1) The department may revoke or suspend a certificate of competency or training certificate if:

- (a) The certificate was obtained through error or fraud;
- (b) The certificate holder is judged to be incompetent to work in the electrical construction trade as a journeyman electrician, specialty electrician, electrical technician, or electrical trainee;
- (c) The certificate holder has violated any of the provisions of chapter 19.28 RCW or any rule adopted under chapter 19.28 RCW; or
- (d) The certificate holder falsely or inaccurately reported continuing education units on an application for renewal.

(2) Before a certificate of competency or training certificate is revoked or suspended, the certificate holder will be given written notice of the department's intention to do so. Notification will be sent by registered mail to the certificate holder's last known address.

The notification will list the allegations against the certificate holder and give the certificate holder the opportunity to request a hearing before the electrical board. The board will conduct the hearing in accordance with chapter 34.05 RCW, the Administrative Procedure Act. At the hearing the certificate holder may produce witnesses and give testimony. The hearing judge will render a decision based upon the testimony and evidence presented in the hearing and will notify the certificate holder immediately upon reaching its decision.

NEW SECTION

WAC 296-401B-860 Revocation of an electrician temporary permit. The department may revoke any electrician temporary permit if:

- (1) The electrician temporary permit was obtained through error or fraud;
- (2) The electrician temporary permit holder is judged to be incompetent to work in the electrical construction trade as a journeyman electrician, specialty electrician, or electrical technician; or
- (3) The electrician temporary permit holder has violated any of the provisions of chapter 19.28 RCW or any rule adopted under chapter 19.28 RCW.

NEW SECTION

WAC 296-401B-870 Confiscation of a certificate of competency, an electrician temporary permit, or training certificate. The department may confiscate a certificate or permit that is counterfeit, revoked, expired, suspended, or altered. The individual may be referred to the county prosecutor for criminal prosecution under chapter 9A.72 RCW.

The department may also file a civil action under RCW 19.28.271.

ENFORCEMENT

NEW SECTION

WAC 296-401B-900 Enforcement. (1) The department of labor and industries ensures that employers and employees comply with the requirements of chapter 19.28 RCW, Electricians and electrical installations, and chapter 296-401B WAC, Certification of competency for journeyman electricians, by inspecting electrical job sites. To do this, inspections are made by the department's compliance officers or electrical inspectors.

(2) Compliance officers or electrical inspectors determine whether:

- (a) Each person doing electrical work on the job site has a proper journeyman, specialty, or training certificate or permit;
- (b) The ratio of certified journeyman/specialty electricians to the certified trainees on the job site is correct; and
- (c) Each certified trainee is directly supervised by an individual with a journeyman or appropriate specialty certificate of competency or permit for the type of electrical work being performed.

NEW SECTION

WAC 296-401B-910 Failure to comply with electrician certification law. (1) If the compliance officer or electrical inspector determines that an individual, employer, or employee has violated chapter 19.28 RCW, Electricians and electrical installations, or chapter 296-401B WAC, Certification of competency for journeyman electricians, the department will issue a citation that describes the reason for the violation. A cease and desist order may be issued by the compliance officer or electrical inspector if the individual, employer, or employee continues to violate the law.

(2) Individuals, employers, and employees may appeal the citation or cease and desist order by requesting a hearing pursuant to RCW 19.28.131, 19.28.271, 19.28.341, 19.28.381, and/or 19.28.490.

(3) A request for hearing does not stay the effect of the citation or cease and desist order.

(4) If the individual, employer, or employee disobeys the cease and desist order, the department will apply to superior court for a court order enforcing the cease and desist order. If the individual, employer, or employee disobeys the court order, the department may request the attorney general to apply to the superior court for an order holding the individual, employer, or employee in contempt of court.

NEW SECTION

WAC 296-401B-920 Special enforcement procedures. Noncompliance enforcement procedures for the following specialties are outlined in Figure 1 (below). If a citation is issued for failure to comply with the certification requirements and enforcement procedures, the individual will

lose the ability to apply any previous specialty work experience training credit (see WAC 296-401B-455(2)) toward examination qualification.

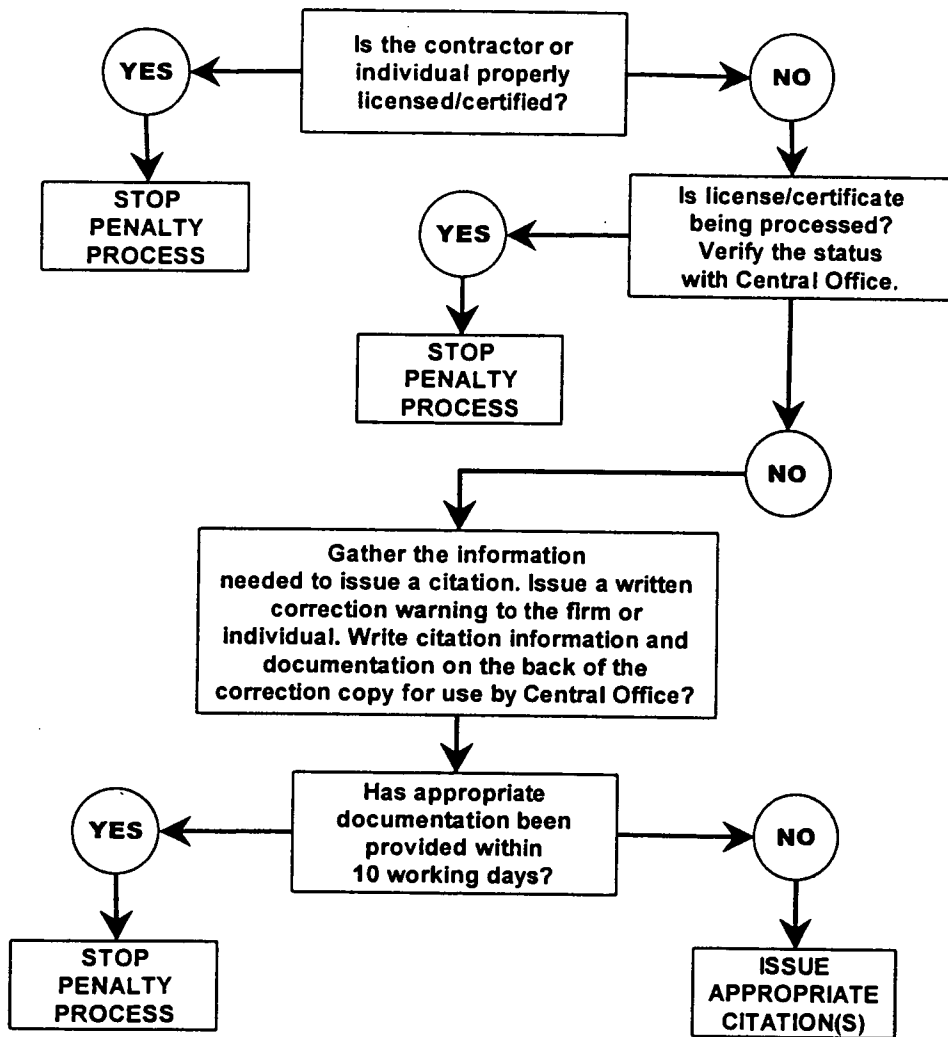

- (1) Domestic well specialty electrical technician (03A).
- (2) Limited energy (06) - Stand alone amplified sound (RESIDENTIAL ONLY).

- (3) HVAC/refrigeration limited energy technician (06A).
- (4) Nonresidential maintenance (07).
- (5) Nonresidential lighting maintenance and lighting retrofit (07A).
- (6) Residential maintenance (07B).

PERMANENT

APPEAL RIGHTS AND HEARINGS

NEW SECTION

WAC 296-401B-950 Appeal rights. If a firm or individual disagrees with a decision of the department, an appeal hearing to the board may be requested within twenty days of receipt of the department decision.

NEW SECTION

WAC 296-401B-960 Types of appeals. There are formal and informal appeals. See chapter 296-13 WAC, Electrical board, for descriptions of informal and formal appeals. "Contested cases" as defined by chapter 296-13 WAC require a formal appeal. A formal appeal will be held in conformance with the requirements of the Administrative Procedure Act, chapter 34.05 RCW and will be assigned by the board to an administrative law judge.

NEW SECTION

WAC 296-401B-970 Appeal procedures. (1) An appeal must be made in writing to the department chief electrical inspector, as secretary to the board, within twenty calendar days of service of notice of the disputed decision. The written appeal must state the decision of the department that is being appealed and the relief that is desired.

(2) A written request for an appeal must be made per the requirements of RCW 19.28.111, Disputes; RCW 19.28.121, Board—Request for ruling; RCW 19.28.131, Appeal; RCW 19.28.241, Revocation of certificate of competency; RCW 19.28.271, Appeal; RCW 19.28.341, Revocation or suspension of license; or RCW 19.28.381, Denial of renewal of certificate or license for outstanding penalties.

NEW SECTION

WAC 296-401B-980 Department conferences. Within twenty calendar days of receipt of notice of intent, the affected firm or individual may request a conference before the department. Should the firm or individual disagree with the decision of the department, an appeal may be made to the electrical board under the procedures in WAC 296-401B-970.

NEW SECTION

WAC 296-401B-990 General. See chapter 296-13 WAC for additional information on appeals before the electrical board.

NEW SECTION

WAC 296-403-160 Amusement rides or structures, carnivals, circuses, and similar traveling shows. (1) Electrical installations. Service equipment, separately derived systems, feeders and circuits for each amusement ride, structure or concession and the interconnection of each ride, struc-

ture or concession, shall comply with Article 525 of the National Electrical Code and this chapter.

(2) Flexible multiconductor cords shall be connected to equipment by approved connectors designed for the purpose or by listed cord caps. Individual conductors of multiconductor cords in sizes #2 AWG and larger shall be permitted to be connected by listed and labeled connection systems in accordance with Article 520-53(K) of the National Electrical Code. Where conductors are connected individually by such connection systems, the outer jacket of multiconductor cord shall be secured to the electrical equipment independent from the receptacles and plugs by approved cable grips that are installed in a manner to prevent pressure from being applied to the receptacles and plugs.

(3) Individual, single conductor, insulated, portable power cable, in addition to complying with Section 525-13 of the National Electrical Code, shall comply with the following:

(a) All conductors of the feeder or circuit including the equipment grounding conductor originate in the same electrical equipment and terminate in the same equipment.

(b) All conductors of the feeder or circuit including the ungrounded, grounded, and equipment grounding conductors are run together, except for portions installed within approved cable protection systems.

(c) The cables are secured to the electrical equipment independent from the cable receptacles and plugs by approved cable grips that prevent pressure from being applied to the connectors.

(d) The cables are connected to electrical equipment by approved listed and labeled connection systems in compliance with Section 520-53(K) of the National Electrical Code.

(4) Disconnecting means. A separate, enclosed, externally operable fused switch or circuit breaker shall be installed on each amusement ride, structure or concession to disconnect all electrical equipment. The disconnecting means shall be readily accessible and identified as the disconnecting means. Where more than one power supply is employed, the disconnecting means shall be grouped.

(5) Rotating equipment. Components of amusement rides or structures that rotate more than three hundred sixty degrees and which have electrically operated equipment, shall be supplied by approved collector rings that shall be totally enclosed or located so they are accessible to authorized personnel only. The collector rings shall be factory produced with an equipment grounding segment having a voltage and current rating that equals or exceeds the rating of the current carrying segments. Collector rings shall have an ampacity not less than one hundred twenty-five percent of the full-load current of the largest device served plus the full-load current of all other devices served. Collector rings for control and signal purposes shall have an ampacity not less than one hundred twenty-five percent of the full-load current of the largest device served plus the full-load current of all other devices served.

(6) Equipment grounding. All noncurrent carrying metal parts of amusement rides and structures shall be grounded by an equipment grounding conductor routed with the feeder or circuit conductors in accordance with the National Electrical

Code and these rules. The metallic structure shall not be used as a current carrying conductor.

EXCEPTION: The metallic structure shall be permitted to be used as the return path for low voltage systems that do not exceed thirty volts, provided that the ungrounded conductors are protected by an overcurrent device in accordance with the National Electrical Code and the system is factory built for such use.

(7) Existing amusement rides, concessions or games electrical systems shall comply with the National Electrical Code and shall be maintained in full compliance. Where new amusement rides, concessions or games are purchased, manufactured or constructed, or where existing rides, concessions or games have major modification, the electrical system shall comply with this chapter and the edition of the National Electrical Code in effect at that time. All rides, concessions, and games shall be identified in or on the disconnecting means as well as by make, model and serial number in records furnished to the department with the edition of the National Electrical Code the electrical system is intended to comply with.

WSR 01-01-100

PERMANENT RULES

DEPARTMENT OF AGRICULTURE

[Filed December 15, 2000, 2:54 p.m.]

Date of Adoption: December 15, 2000.

Purpose: The purpose of the amendments to chapter 16-164 WAC is to clarify and strengthen the rules for the handling of organic food products, improve the integrity of organic food products, and provide harmonization with national and international organic food standards.

Citation of Existing Rules Affected by this Order: Chapter 16-164 WAC, repealing WAC 16-164-030; and amending WAC 16-164-010 through 16-164-100.

Statutory Authority for Adoption: Chapter 15.86 RCW.

Adopted under notice filed as WSR 00-22-100 on November 1, 2000.

Changes Other than Editing from Proposed to Adopted Version: **WAC 16-164-020 Definitions.**

We made editorial changes to the definition of new applicant and renewal applicant to improve the clarity of the rule.

WAC 16-164-035 Application for certification.

We edited the language of the adopted rule to specify that only retailers that do not process are exempted from certification. This editorial change is consistent with the statutory language in RCW 15.86.090.

WAC 16-164-037 Confidentiality.

We corrected the statutory reference to the Public Disclosure Act.

WAC 16-164-040 Organic handler standards.

We deleted the proposed requirement to require separate storage for thiabendazole treated food.

We deleted the proposed requirement to require separate regular storage for diphenylamine treated food.

We added a provision to allow used containers to be lined with food grade plastic liners to protect the integrity of the organic food products.

WAC 16-164-050 Post harvest materials and practices.

We deleted the proposed requirement to require separate storage for thiabendazole treated food.

The adopted rule clarifies that quaternary ammonium compounds are prohibited as sanitizers prior to handling organic food products but they are not prohibited from use on these packing lines at other times.

WAC 16-164-055 Labels, labeling and market information.

We eliminated the requirement that organic food products had to be individually labeled.

WAC 16-164-085 Certification.

We deleted a redundant sentence that stated that new applicants needed to be inspected prior to receiving their certification.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 4, Amended 9, Repealed 1.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 1, Amended 4, Repealed 1.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 0, Repealed 0.

Effective Date of Rule: Thirty-one days after filing.

December 14, 2000

Jim Jesernig

Director

AMENDATORY SECTION (Amending Order 5070, filed 6/20/95, effective 7/21/95)

WAC 16-164-010 Purpose. This chapter is promulgated pursuant to RCW 15.86.060 wherein the director is authorized to adopt rules for the proper administration of the Organic Food Products Act and pursuant to RCW 15.86.070 wherein the director is authorized to establish a certification program for processors and vendors of organic food products. This chapter provides standards for the certification of handlers of organic food products, including (~~packers and vendors~~) produce distributors, grocery distributors, fruit packers, marketing companies, brokers, warehouses, and retailers.

AMENDATORY SECTION (Amending Order 5070, filed 6/20/95, effective 7/21/95)

WAC 16-164-020 Definitions. As used in this chapter:

(1) "Approved" means any material or practice which meets the required criteria or standards for use in the handling of organic agricultural products.

(2) "Commingling" means the physical contact between unpackaged organic food products and nonorganic food products during production, processing, transportation, storage or handling.

(3) "Container" means a box, bin, carton, package or other wrapping that encloses or holds organic food products.

(4) "Department" means the department of agriculture of the state of Washington.

~~((3))~~ (5) "Director" means the director of the department of agriculture or his or her duly authorized representative.

~~((4))~~ (6) "EPA's list 4" means the United States Environmental Protection Agency's list 4 of other (inert) pesticide ingredients that are generally regarded as safe or that have sufficient data to substantiate they can be used safely in pesticide products. This list is available at EPA's website www.epa.gov/opprd001/inerts/lists.html.

(7) "Facility" includes, but is not limited to, any premises, plant, establishment, facilities and the appurtenances thereto, in whole or in part, where organic food products are prepared, handled, packaged, or repackaged in any manner for eventual sale or distribution for eventual sale to the ultimate consumer.

~~((5))~~ (8) "Handle" means to sell, arrange the sale of, represent, process, distribute or package organic food products.

(9) "Handler" means any person who sells, arranges the sale of, represents, processes, distributes, or packs organic food products.

~~((6))~~ (10) "Label" means all written, printed, or graphic material on the immediate container of an organic food product or accompanying or representing the product.

(11) "Material" means any substance or mixture of substances that is used in the handling of organic agricultural products.

~~((7))~~ (12) "New applicant" means any person that applies for organic certification for the first time, or any person that applies whose organic certification has expired for at least one year.

(13) "Organic food product" means any food product, including fruit, vegetable, meat, dairy, beverage and grocery, that is marketed using the term organic or any derivative of the term organic in its labeling or advertising. This includes using the term organic on the principal display panel, the ingredients list or other locations on the label.

~~((8))~~ "Packer" means any person who receives any organic food product, either through gaining possession or through providing a service, from a producer or other party and packages or repackages that food product.

~~((9))~~ (14) "Packing" means to wrap, box, or put together raw or processed organic food in a container, box, or package in preparation for sale.

~~((10))~~ (15) "Person" means any natural person, firm, partnership, exchange, association, trustee, receiver, corporation, and any other member, officer, or employee thereof or assignee for the benefit of creditors.

~~((11))~~ (16) "Processed organic food" means food that in whole or in part is organically grown and which in its processing has not been treated with synthetically or artificially derived preservatives, colorings, flavorings, or any other artificial or synthetic additive, except as otherwise approved for use under chapter 16-158 WAC.

~~((12))~~ (17) "Prohibited" means any material or practice which ~~((is disallowed in))~~ does not meet the required criteria or standards for use in the handling of organic agricultural products.

~~((13))~~ (18) "Recognized organic certification agency" means any third-party organization that is accepted by the director as being one which verifies compliance with standards consistent with chapter 15.86 RCW or rules adopted thereunder.

~~((14))~~ (19) "Renewal applicant" means any person that has received organic certification in the previous year.

(20) "Retail facility" means any facility, in whole or in part, that sells organic food products directly to consumers.

(21) "Sale" means selling, offering for sale, holding for sale, preparing for sale, trading, bartering, offering a gift as an inducement for sale of, and advertising for sale in any media.

AMENDATORY SECTION (Amending Order 5070, filed 6/20/95, effective 7/21/95)

WAC 16-164-035 Application for certification~~((— Expiration date))~~. ~~((Organic food handlers, except for final retailers, must apply to the department for organic food certification on an annual basis. The application deadline is March 1. The application, accompanied by the appropriate fee shall be submitted to the department on forms furnished by the department. Organic food handler certificates shall expire on March 31st of the year following their issuance.~~

~~Applications made after the set deadline may be processed as the department can schedule the initial inspections; provided that the handler pay a late fee of fifty dollars.~~

~~Except for final retailers of organic food products, it shall be unlawful for any handler to represent, label, or sell organic food products without having obtained an annual organic food handler certificate.)~~ (1) All facilities that handle organic food products must be certified by the department or through a recognized organic certification agency, except for retail facilities that do not process organic food products.

(2) Retail facilities of organic food products may be certified under this chapter.

(3) Certified organic producers who handle only their own product are not required to obtain additional certification under this chapter.

(4) Processors of organic food must obtain certification under chapter 16-158 WAC, Standards for the certification of processors of organic food.

(5) Applications to the department for organic food certification must be made on an annual basis at least thirty days prior to the handling of organic food products. The application, accompanied by the appropriate fee, must be submitted to the department on forms furnished by the department.

(6) The application must include an organic handling plan that includes, as applicable:

- (a) A description of the handling operation;
- (b) A schematic flow chart of the organic handling process;
- (c) A list of the postharvest materials used in the handling of organic food products;
- (d) A description of the recordkeeping system used at the facility to trace organic food products;
- (e) A copy of organic food product labels used at the facility;
- (f) A description of the pest management program used at the facility including a list of all pesticides used in the facility.

NEW SECTION

WAC 16-164-037 Confidentiality. Except for applications and laboratory analyses submitted for certification under this chapter, the department keeps confidential any business-related information obtained under this chapter. All business-related information submitted to the department under this chapter is exempt from public inspection and copying consistent with RCW 15.86.110 and 42.17.310.

AMENDATORY SECTION (Amending Order 5070, filed 6/20/95, effective 7/21/95)

WAC 16-164-040 ((Standards for handlers.))
Organic handler standards. (1) Identification: All organic food products must be clearly identified at all times with appropriate labeling on all boxes, bins, bags, or other containers that contain organic food products.

(2) Storage:

(a) All organic food products ((in a facility)) must be stored so that there is no cross contamination from or confusion with nonorganic food products.

~~(Insect and rodent control programs must be in place for organic product storage areas. Any materials used in organic product storage areas must be approved for use in organic food production under chapter 16-154 WAC or this chapter.~~

~~In areas where entire facilities are periodically fumigated, the handler must demonstrate that any fumigants used will not contaminate organic products.~~

~~Compounds for cleaning storage areas must be used in a manner that does not contaminate organic food products.~~

~~Organic and nonorganic food products may be stored in the same storage room as long as there is adequate separation of products and product identification assures no mixing of products.~~

~~Storage techniques may be used to alter the nitrogen, oxygen, and carbon dioxide levels in the storage room atmosphere. Organic food products shall not be stored in controlled atmosphere storage with diphenylamine treated food products.~~

(3) Handling of organic food products:

All packaging and products must be free of fungicides, preservatives, fumigants, and any other materials which are prohibited for use on organic food products under chapter 16-154 WAC or this chapter.

All water used in handling must be potable and comply with all local, state, and federal guidelines for potable water.

~~Cleaning and sanitizing must be done with appropriate cleansers and sanitizers that will ensure clean and sanitary facilities and do not leave any residues of cleansers or sanitizers on the organic food products.))~~ (b) Organic and nonorganic food products may be stored in the same storage room as long as there is adequate separation of products and product identification assures no commingling of products. Organic food products shall not be stored in controlled atmosphere storage with diphenylamine treated food products.

(c) Storage techniques may be used to alter the nitrogen, oxygen, and carbon dioxide levels in the storage room atmosphere.

(3) Wet nonorganic food products must not be stacked on top of any organic food products at any time.

(4) Water: All water used in handling must be potable and comply with all state, local, and federal guidelines for potable water except as provided under WAC 16-164-050.

(5) Containers: All containers must be free of fungicides, preservatives, fumigants, and any other materials that are prohibited for use on organic food products under chapter 16-154 WAC or this chapter. The containers must be either:

(a) New;

(b) Designated for organic products only;

(c) If they have previously contained nonorganic food products, they must be completely emptied and cleaned; or

(d) Lined with a food grade plastic liner.

(6) Pest control.

(a) Insect and rodent control programs must be in place in areas where organic food products are stored or displayed. Any materials used must be approved for use in organic food production under chapter 16-154 WAC or this chapter.

(b) Prohibited pest control materials must not be applied in areas where organic food products are present.

(c) Organic food products must be removed from areas where prohibited pest control materials are applied.

(d) Records must be maintained for all pesticides applied within the facility, including the pesticide used, where used, quantity applied, and the date of application.

(7) Preparation of organic food products for retail sale.

(a) Organic food products must be prepared in water not previously used for nonorganic food products and with equipment that has been thoroughly cleaned.

(b) If preparation surface area is used for processing both nonorganic and organic food products, the organic food products must be prepared first with clean equipment.

(8) Display of organic food products in retail facilities.

(a) Organic and nonorganic food products must not be placed side by side without a sufficient barrier to prevent commingling.

(b) If an organic food product is going to be placed in a container that previously contained nonorganic food products, the container must be completely emptied, cleaned, and labeled appropriately.

(c) If a nonorganic food product is going to be placed in a container that previously contained organic food products, the organic label must be removed.

AMENDATORY SECTION (Amending WSR 92-17-018, filed 8/7/92, effective 9/7/92)

WAC 16-164-050 Postharvest materials and practices. (1) Approved materials and practices. The following list of materials and practices are approved for postharvest use for organic food. Some materials have certain restrictions regarding their use. These restrictions are noted in the list. All materials must be used with awareness and care for the environment and in compliance with state and federal laws.

(a) Acetic acid.

(b) Ascorbic acid.

(c) Beneficial insects.

~~((b))~~ (d) Biological control organisms.

(e) Carbon dioxide gas.

~~((e))~~ Chlorine dioxide.

~~((d))~~ (f) Chlorine compounds include calcium hypochlorite, sodium hypochlorite and chlorine dioxide. Chlorine compounds are allowed to sanitize food contact surfaces. Dump tank water, flume water and water used to wash organic food products may contain chlorine compounds up to 50 ppm free chlorine. Must be followed by a potable water rinse.

(g) Citric acid, naturally derived.

~~((e))~~ (h) Cleansers. Must be biodegradable and on EPA's list 4. Must be followed by a potable water rinse.

(i) Controlled atmosphere storage: Storage with diphenylamine treated food products is prohibited.

~~((f))~~ (j) Ethylene gas: Ethylene gas may be used on bananas only.

~~((g))~~ (k) Fruit waxes: Natural waxes are permitted as long as they do not contain synthetic additives.

~~((h))~~ (l) Hydrogen peroxide.

~~((i))~~ (m) Lignosulfonates for floating tree fruits.

~~((j))~~ (n) Microorganisms and microbial products. Genetically engineered organisms and their products are prohibited.

(o) Ozone.

(p) Periacetic acid (peracetic or peroxyacetic acid).

(q) Soap, biodegradable. Must be followed by a potable water rinse.

~~((k))~~ Soda ash for floating tree fruits.

~~((l))~~ (r) Sodium silicate for floating tree fruits.

(2) Prohibited materials and practices. The postharvest materials and practices that are prohibited for use in the handling of organic ((packing)) food products includes but is not limited to the following:

(a) Antibiotics.

(b) Artificial preservatives.

(c) Fumigants.

(d) Fungicides.

(e) Ionizing radiation (irradiation).

(f) ~~((Other pesticides not specifically approved for use in subsection (1) of this section.))~~ Quaternary ammonium compounds are prohibited as sanitizers on food bearing surfaces prior to handling organic food products.

NEW SECTION

WAC 16-164-055 Labels, labeling and market information. (1) The term "organic" may be used only on labels and in labeling on products that have been produced and handled in accordance with this chapter and rules adopted under chapter 15.86 RCW.

(2) All food products displayed under an organic banner or label must be organic food products.

AMENDATORY SECTION (Amending Order 5070, filed 6/20/95, effective 7/21/95)

WAC 16-164-060 Recordkeeping requirements. ~~((All organic food must be completely followed by an audit control system.~~

~~(1) Handlers must keep records of products bought and sold that will enable the department to trace food products from receiving through sale. Such records must include but are not limited to, invoices, bills of lading, and grower affidavits of incoming raw product; repack data and production run reports; and invoices and bills of lading of products shipped out.~~

~~(2) All handlers of organic food products shall have available to the department the following documents and information:~~

~~(a) For organic food products obtained directly from producers a copy of their organic food producer certificate. All organic food producer certificates shall be from recognized organic certification agencies.~~

~~(b) For organic food products obtained from another handler, a copy of that handler's organic food handler certificate, or, for handlers which are not certified, a copy of the certificate for each organic food product obtained from that handler. All organic food certificates shall be from recognized organic certification agencies.~~

~~(c) For processed organic food products a copy of the organic food processor certificate or, if the processor is not certified, a copy of a certification verification form must be on file. Certification verification forms shall include the percentage of organic ingredients contained in each product, a list of all organic ingredients, and the certification organization(s) of those ingredients. All organic food certificates shall be from recognized organic certification agencies.~~

~~(d) Recordkeeping that allows for the tracking of product from receiving through sale. Records must be kept for a minimum of two years except for final retailers which must keep records for a minimum of six months.~~

~~(e) All paperwork and labels associated with organic food products must clearly indicate that the product is an organic product.~~

~~(3) Except for applications for organic handler certification or lab analysis pertaining to that certification, the department shall keep confidential any business related information obtained under this chapter concerning an entity certified under this chapter or an applicant for such certification and such information shall be exempt from public inspection and copying consistent with RCW 15.86.110 and 42.17.310~~ ~~((d))~~ (1) Handlers must maintain records that track organic food products from receiving through distribution,

shipping or sale. Such records may include the following: Invoices, bills of lading, date and quantity of product handled, repack data, and production run reports. Handlers must maintain these records for a minimum of five years.

(2) All handlers must have available at all times copies of organic food certificates for all organic food products. Organic food certificates must be current and correspond to the organic food products handled by the facility. All organic food certificates must be issued by the department or a recognized organic certification agency.

(3) All records associated with organic food products must clearly indicate that the product is an organic food product.

AMENDATORY SECTION (Amending Order 5070, filed 6/20/95, effective 7/21/95)

WAC 16-164-080 Sampling. A representative sample of the product (~~(packed, sold or distributed by the handler)~~) handled may be tested for pesticide residues (~~(of prohibited materials)~~) or other contaminants whenever the director deems it necessary for certification or maintenance of certification.

It shall be the handler's responsibility to arrange for and bear the costs for any testing which is deemed necessary by the director.

NEW SECTION

WAC 16-164-085 Certification. (1) The conditions of organic food handler certification are the following:

(a) Inspection of the handler by the department of agriculture showed no use of prohibited materials or practices as defined in chapter 15.86 RCW or rules adopted thereunder; and

(b) Recordkeeping practices meet the requirements specified in WAC 16-164-060 or rules adopted under chapter 15.86 RCW; and

(c) Analysis of samples taken by the department of agriculture showed no prohibited substance usage or contamination.

(2) The director must review the application, inspection report and results of any samples collected to determine that the handler has complied with the conditions for organic food handler certification. An organic food handler certificate will be issued when the director determines that the handler has complied with the conditions for organic food handler certification.

(3) In no event shall organic food products be handled by a facility prior to the issuing of an organic food handler certificate by the department of agriculture for that year. New applicants must be inspected by the department before an organic food handler certificate is issued.

(4) All organic food handler certificates expire on March 31st of the year following their issuance.

(5) Handlers certified under this chapter may use the logo adopted in WAC 16-164-110 to identify organic food products handled by the facility.

AMENDATORY SECTION (Amending Order 5070, filed 6/20/95, effective 7/21/95)

WAC 16-164-090 Decertification. Whenever the director finds that a handler who has been certified under this program has:

(1) Violated the standards for certification which are set forth in RCW 15.86.030 or any rules adopted under chapter 15.86 RCW;

(2) Filed an application for certification which is false or misleading in any particular;

(3) Violated any of the provisions of this chapter; ~~((or))~~

(4) Failed to provide records as required by WAC 16-164-050 or rules adopted under chapter 15.86 RCW; or

(5) Failed to allow inspection to take place;

The director may issue an order denying, suspending, or revoking that handler's certification under this program (~~((or he may))~~). The director may also issue an order directing the handler to take other appropriate action to correct the violation. If appropriate action is taken, the handler may be returned to its previous status under the program.

Any handler who has received notice that its certification may be denied, suspended, or revoked under this section may apply for a hearing under the Washington Administrative Procedure Act, chapter 34.05 RCW.

AMENDATORY SECTION (Amending Order 5070, filed 6/20/95, effective 7/21/95)

WAC 16-164-100 Fee schedule. (1)(a) Renewal applicants. Application fees must be based on the previous calendar year's gross sales of organic and transition to organic food. In the event that the current calendar year's gross sales exceed the previous year's gross sales, the department may bill the handler for the additional fee. In the event that the current calendar year's gross sales are less than the previous year's gross sales, the producer may request a refund for the reduced fee. In addition, renewal applications postmarked after March 1 must pay a late fee of fifty dollars.

(b) New applicants. Application fees must be based on an estimate of the current year's gross sales of organic and transition to organic food. In the event that the current calendar year's gross sales exceed the estimate, the department may bill the handler for the additional fee. In the event that the current calendar year's gross sales are less than the estimate, the handler may request a refund for the reduced fee. In addition, new applicants must pay a seventy-five dollar new applicant fee.

(c) The cost per ~~((application shall))~~ facility must be based on the following fee schedule. ~~((Gross value shall be based on the previous calendar year's sales of organic food products. First year applicants shall base gross value on an estimate of the value of organic food products which will be handled at the facility. In the event that first year sales of organic food products exceed the estimate, WSDA may bill the handler for the additional application fee.))~~ The appropriate fee ~~((shall))~~ must accompany the application.

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 16-164-030 Organic certification of handlers, including packers and vendors.

WSR 01-01-101
PERMANENT RULES
DEPARTMENT OF HEALTH

[Filed December 15, 2000, 4:05 p.m.]

Date of Adoption: December 15, 2000.

Purpose: The rule will create a discount prescription drug program which will allow individuals fifty-five years or

older, without prescription drug coverage to access discounted prescription drugs.

Statutory Authority for Adoption: RCW 43.70.040 (1) and (5), 43.70.020(5).

Other Authority: RCW 43.70.130, 43.70.060.

Adopted under notice filed as WSR 00-22-121 on November 1, 2000.

Chapter 246-30 WAC

THE AWARDS PROGRAM

NEW SECTION

WAC 246-30-010 What is the AWARDS program?

(1) **Purpose.** The AWARDS program is a statewide public health initiative. The AWARDS program makes prescription drugs more affordable for Washington residents who are age fifty-five or older and have no prescription drug coverage. The program is a state-sponsored purchasing alliance for AWARDS members to buy prescription drugs at a reduced cost.

(2) **Goals.** The program's goals are:

(a) To promote public health by making prescription drugs more affordable for AWARDS members; and

(b) To assess the program's effectiveness in making prescription drugs more affordable for AWARDS members.

(3) **Definitions.**

(a) "AWARDS (A Washington Alliance to Reduce Prescription Drug Spending)" is a purchasing alliance sponsored by the state of Washington. AWARDS members are charged a discounted rate for prescription drugs.

(b) An "individual membership" is available for a Washington resident fifty-five years of age or older who has no prescription drug coverage and pays an annual individual membership fee to participate in the AWARDS program.

(c) A "family membership" is available for two or more Washington residents fifty-five years of age or older who have no prescription drug coverage, who are living in the

same household, and who, on behalf of the family, pay an annual family membership fee to participate in the AWARDS program.

(d) "Pharmacy benefits manager" means the entity responsible for pharmacy benefits management services, member enrollment, the AWARDS pharmacy network, provision of assessment data, and administrative duties through a contract with the state of Washington.

(e) "Participating pharmacy" means a pharmacy that agrees to serve AWARDS members as part of a pharmacy network on terms set by the pharmacy benefits manager.

(f) "AWARDS discount price" means the reduced cost for prescription drugs set by contract between the state and the pharmacy benefits manager. Participating pharmacies accept the AWARDS discount price as full payment when AWARDS members buy prescription drugs.

NEW SECTION

WAC 246-30-020 How does the AWARDS program work? The AWARDS program will only operate if the state can enter into a contract with a pharmacy benefits manager providing that:

(1) The AWARDS program operates at no cost to the state. AWARDS members pay the AWARDS discount price when buying prescription drugs from a participating pharmacy and show a valid membership card. AWARDS members can also buy prescriptions by mail through the pharmacy benefits manager.

(2) AWARDS is administered in cooperation with the Washington state health care authority through a contract with a pharmacy benefits manager.

(3) Any Washington resident who is fifty-five years of age or older and has no prescription drug coverage is eligible to apply for an individual or family membership in the AWARDS program.

(4) Applicants for AWARDS membership must send an AWARDS membership application to the pharmacy benefits manager. Applicants must certify that they are fifty-five years of age or older and have no prescription drug coverage. Applicants must also pay for an individual or family membership. The pharmacy benefits manager will send a membership card to approved applicants. When presenting a membership card at any participating pharmacy, AWARDS members will be charged the AWARDS discount price for prescription drugs. AWARDS members can also order prescription drugs by mail through the pharmacy benefits manager.

(5) An AWARDS membership may be canceled when a member:

(a) Is not eligible;

(b) Fails to pay the membership fee when due;

(c) Violates the terms and conditions of membership;

(d) Misuses or permits unauthorized use of the membership card; or

(e) Engages in misconduct in connection with the AWARDS program.

If a membership is canceled due to (c) through (e) of this subsection, the membership fee may be forfeited and the member may be subject to other penalties under applicable

laws. The AWARDS pharmacy benefits manager is responsible for enrollment decisions, for maintaining records, and for administering all member services. Any disputes arising between an applicant for AWARDS membership or an AWARDS member and the pharmacy benefits manager is a private contractual dispute. Disputes are resolved according to the terms and conditions of AWARDS enrollment. The state of Washington, its agencies and employees, are not parties to any such dispute.

NEW SECTION

WAC 246-30-030 Are there any limits on the AWARDS program? (1) The AWARDS program is not insurance coverage. The pharmacy benefits manager is solely responsible to AWARDS members for the services it provides. By establishing the AWARDS program, the state of Washington does not assume financial responsibility for the services provided to AWARDS members by the pharmacy benefits manager. AWARDS membership is subject to the additional terms and conditions contained in the AWARDS application and any subsequent changes in those terms and conditions or in benefits announced by the pharmacy benefits manager.

(2) On thirty days' notice, program enrollment may be limited or suspended, or the AWARDS program may be canceled in its entirety, for any reason at the discretion of the department of health.

WSR 01-01-124

PERMANENT RULES

MARINE EMPLOYEE'S COMMISSION

[Filed December 19, 2000, 11:11 a.m.]

Date of Adoption: December 19, 2000.

Purpose: To make housekeeping changes and to include previously nonreferenced portions of chapter 34.05 RCW and chapter 10-08 WAC.

Citation of Existing Rules Affected by this Order: Amending WAC 316-02-150, 316-02-810, 316-02-820, 316-65-515, and 316-85-020.

Statutory Authority for Adoption: RCW 34.05.230.

Adopted under notice filed as WSR 00-21-045 on October 13, 2000.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 0, Amended 5, Repealed 0.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 0, Amended 5, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Mak-

ing: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 0, Repealed 0.

Effective Date of Rule: Thirty-one days after filing.

December 19, 2000

Kathy J. Marshall

Administrator

AMENDATORY SECTION (Amending WSR 90-01-115, filed 12/20/89, effective 1/20/90)

WAC 316-02-150 Service of process—Filing with commission. (1) Papers intended to be filed with the commission shall be deemed filed upon actual receipt by the commission during its regular office hours at its Olympia office(~~:(Provided, however, That such service shall be deemed to be incomplete if the party making the filing should subsequently fail, when requested to do so by the commission, to provide proof of service upon other parties required to be served).~~)).

~~((Filing a copy of the paper(s), together with one of the following shall constitute proof of service:~~

~~(1) An acknowledgement of service; or~~

~~(2) A certificate that the person signing the certificate did on the date of the certificate serve the paper(s) upon all parties of record in the proceeding by:~~

~~(a) Mailing a copy thereof, by restricted certified mail, return receipt requested, to each party to the proceeding or to his or her attorney or authorized agent; or~~

~~(b) Delivery of a copy thereof in person.)) (2) The following conditions apply for filing papers by fax:~~

~~(a) As used in this chapter, "fax" means electronic telefacsimile transmission.~~

~~(b) Papers may be filed by fax with the commission office. Filing by fax is perfected when a complete legible copy of the papers is reproduced on the commission office's fax machine during normal working hours, excluding weekends and holidays. If a transmission of papers commences after these office hours, the papers shall be deemed filed on the next succeeding business day.~~

~~(c) Any papers filed by fax with the commission office should be accompanied by a cover page or other form identifying the party making the transmission, listing the address, telephone, and fax number of the party, identifying the adjudicative proceeding to which the papers relate, and indicating the date of and the total number of pages included in the transmission.~~

~~(d) Papers filed by fax should not exceed fifteen pages in length, exclusive of any cover page.~~

~~(e) The party attempting to file the papers by fax bears the risk that the papers will not be timely received or legibly printed, regardless of the cause. If the fax is not received in legible form, it will be considered as if it had never been sent.~~

~~(f) The original of any papers filed by fax must be mailed to the commission office within twenty-four hours of the time that the fax was sent.~~

~~(3) Service of such shall be deemed to be incomplete if the party making the filing should subsequently fail, when requested to do so by the commission, to provide proof of service upon other parties required to be served.~~

PERMANENT

(4) Filing a copy of the paper(s), together with one of the following shall constitute proof of service upon other parties:

(a) An acknowledgment of service; or

(b) A certificate that the person signing the certificate did serve the paper(s) upon all parties of record in the proceeding by:

(i) Mailing a copy thereof, by restricted certified mail, return receipt requested, to each party to the proceeding or to his or her attorney or authorized agent; or

(ii) Delivery of a copy thereof in person.

AMENDATORY SECTION (Amending WSR 90-01-115, filed 12/20/89, effective 1/20/90)

WAC 316-02-810 Commission records—Confidentiality. The commission, in order to protect the privacy of individual employees and in order to respect the confidential nature of the mediation process and other labor-management relations processes, shall not permit the disclosure to any person of (1) any evidence filed as a showing of interest in support of a representation petition or motion for intervention, or (2) any notes and memoranda made by any member of the commission or its staff as a recording of communication made or received while acting in the capacity of a mediator between the parties to a labor dispute, or (3) any other documents or materials related to mediation other than scheduling information.

AMENDATORY SECTION (Amending WSR 92-22-044, filed 10/27/92, effective 11/27/92)

WAC 316-02-820 Commission offices. The commission maintains its office at Evergreen Plaza Building, 711 Capitol Way South, PO Box 40902, Olympia, Washington 98504-0902. The telephone number is (360) 586-6354, the fax number is (360) 586-0820, the e-mail address is mec@olywa.net, and the internet address is <http://www.marineempcom.org>.

AMENDATORY SECTION (Amending WSR 90-01-119, filed 12/20/89, effective 1/20/90)

WAC 316-65-515 Conduct of grievance arbitration proceedings. (1) Prehearing conferences and hearings may be conducted by the commission or by a member of the commission assigned as arbitrator. At any time, an arbitrator may be substituted for the arbitrator previously presiding.

(2) The arbitrator shall conduct the arbitration proceedings in the manner provided in the collective bargaining agreement under which the dispute arises. All such arbitrators shall maintain compliance with the current "Code of Professional Responsibility for Arbitrators of Labor-Management Disputes" adopted by the National Academy of Arbitrators, the American Arbitration Association, and the Federal Mediation and Conciliation Service (~~(in effect on December 1, 1977)~~): Provided, however, That arbitration matters processed under this chapter shall be filed in the public files of the commission and shall not be accorded the privacy required by such code: And provided further, That if any

statute or commission rule conflicts with aforesaid "code," the statute or rule shall prevail.

(3) The arbitrator shall have the authority:

(a) To administer oaths and affirmations;

(b) To issue subpoenas;

(c) To rule on objections to evidence and offers of proof, receive relevant evidence and exclude irrelevant, immaterial or unduly repetitious evidence;

(d) To question witnesses;

(e) To regulate the time, place and course of the hearing;

(f) To dispose of procedural requests or other similar matters;

(g) To hold conferences for the settlement, simplification or adjustment of issues in accordance with WAC 316-02-210 and 316-02-220;

(h) To make and issue an arbitration award on the matters in dispute, subject to the right of any party to petition for review of such award by the commission in accordance with WAC 316-65-550; and

(j) To take any other action authorized by these rules.

(4) Any party who proceeds with arbitration after knowledge that any provision or requirement of these rules has not been complied with and who fails to state its objection thereto in writing, shall be deemed to have waived its right to object.

AMENDATORY SECTION (Amending WSR 90-06-046, filed 3/2/90, effective 4/2/90)

WAC 316-85-020 Fact-finding surveys—Content—Coverage. In conducting its prebargaining survey, and publishing the findings, the commission shall make comparisons of wages, hours, employee benefits, and conditions of employment of Washington state ferry employees with those of public and private sector employees doing directly comparable but not necessarily identical work. In making its comparisons between and among employers, the commission shall recognize the principle that the greater the degree of comparability between work requirements and conditions of employment, the greater will be the validity of comparisons of wages and employee benefits. The commission shall give consideration to factors peculiar to the area and the classifications involved.

In determining the scope of the survey and in selecting the ferry systems or other employers to be included in the survey, the commission shall consider the size, tonnage, and horsepower of the vessels operated by the Washington state ferry system and by the employers to be included in the survey. The commission shall not include those classifications of employees exempted pursuant to RCW 41.06.079.

Except as provided in the following subsection of this section, salary and employee benefit information collected from private employers that identifies a specific employer with the salary and employee benefit rates which that employer pays to its employees is not subject to public disclosure under chapter 42.17 RCW.

A person or entity, having reason to believe that the salary survey results are inaccurate, may submit a petition to the state auditor requesting an audit of the data upon which the salary survey results are based. The state auditor shall review and analyze all data collected for the salary survey, including

proprietary information, but is prohibited from disclosing the salary survey data to any other person or entity, except by court order.

WSR 01-01-126
PERMANENT RULES
HEALTH CARE AUTHORITY

[Order 00-02—Filed December 19, 2000, 11:25 a.m.]

Date of Adoption: December 19, 2000.

Purpose: Amend WAC 182-12-119, defining eligible dependents to include same-sex domestic partners, and to simplify extended dependent eligibility; and amend WAC 182-12-132 to modify administration of the retiree program all in accordance with the May 23, 2000, vote of the Public Employees Benefits Board.

Citation of Existing Rules Affected by this Order: Amending WAC 182-12-119 and 182-12-132.

Statutory Authority for Adoption: RCW 41.05.160.

Adopted under notice filed as WSR 00-21-074 on October 17, 2000.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 0, Amended 2, Repealed 0.

AMENDATORY SECTION (Amending Order 99-04, filed 9/8/99, effective 10/9/99)

WAC 182-12-119 Eligible dependents. "Eligible dependents." The following are eligible as dependents under the PEBB eligibility rules:

(1) Lawful spouse or "qualified domestic partner" (same sex domestic partner qualified through the declaration certificate issued by the health care authority).

(2) Dependent children through age nineteen. The term "children" includes the subscriber's natural children, stepchildren, legally adopted children, children for whom the subscriber has assumed a legal obligation for total or partial support of a child in anticipation of adoption of the child, children of the subscriber's qualified domestic partner, or children specified in a court order or divorce decree. Married

children who qualify as dependents of the subscriber under the Internal Revenue Code, and extended dependents approved by the HCA are included. To qualify for HCA approval, the subscriber must demonstrate legal custody for the child with a court order, and:

(a) Be living with the subscriber in a parent-child relationship;

(b) Be dependent upon the subscriber for financial support; and

(c) (~~Not be eligible for coverage under Medicare, Medicaid, or similar government entitlement programs; and~~

~~(d))~~ Not be a foster child for whom support payments are made to the subscriber through the state department of social and health services (DSHS) foster care program.

(3) Dependent children age twenty through age twenty-three who are dependent upon the employee/retiree for maintenance and support, and who are registered students in full-time attendance at an accredited secondary school, college, university, vocational school, or school of nursing. Dependent student eligibility continues year-round for those who attend three of the four school quarters or two semesters and for the quarter following graduation provided the employee/retiree is covered at the same time; the dependent limiting age has not been exceeded; and the dependent meets all other eligibility requirements.

(4) Dependent children of any age who are incapable of self-support due to developmental or physical disability, provided such condition occurs prior to age twenty or during the time the dependent was covered under a PEBB plan as a full-time student. Proof of such disability and dependency must be furnished prior to the dependent's attainment of age twenty or loss of eligibility for student coverage, and as periodically requested thereafter.

(5) Dependent parents. Dependent parents covered under a PEBB medical plan before July 1, 1990, may continue enrollment on a self-pay basis as long as:

(a) The parent maintains continuous coverage in a PEBB-sponsored medical plan;

(b) The parent continues to qualify under the Internal Revenue Code as a dependent of an eligible subscriber;

(c) The subscriber who claimed the parent as a dependent continues enrollment in a PEBB program; and

(d) The parent is not covered by any other group medical insurance. Dependent parents may be enrolled in a different PEBB plan than that selected by the eligible subscriber; however, dependent parents may not add additional family members to their coverage.

(6) Surviving dependents.

(a) The following surviving dependents may continue their medical and dental coverages on a self-pay basis:

(i) If a dependent loses eligibility under a PEBB plan due to the death of the employee, the dependent(s) may continue coverage under a retiree plan provided the dependent(s) will immediately begin receiving a monthly benefit from any state of Washington-sponsored retirement system (the Federal Civil Service Retirement System shall be considered a Washington sponsored retirement system for Washington State University cooperative extension service employees who held a federal civil service appointment and who were covered under the PEBB program at the time of death).

PERMANENT

(ii) If a surviving dependent of a PEBB employee is not eligible for a monthly retirement income benefit, or lump-sum payment because the monthly pension payment would be less than \$50, the dependent may be eligible for continued coverage under COBRA.

(iii) Dependents of retirees (~~covered under a PEBB plan~~) enrolled in the retiree's PEBB plan or waiving coverage under a PEBB plan while eligible for an employer sponsored medical plan at the time of the retiree's death are eligible to continue PEBB retiree coverage.

(iv) Surviving spouses and/or eligible dependent children of a deceased school district or educational service district employee who were not enrolled in a PEBB plan at the time of death may continue coverage provided the employee died on or after October 1, 1993 and the dependent(s) immediately began receiving a retirement benefit allowance under chapter 41.32 or 41.40 RCW.

(b) Application for surviving dependent(s) coverage must be made in writing on the enrollment form approved by the health care authority within sixty days from the date of death of the employee or retiree. Coverage is retroactive to the date the employee or retiree coverage terminated subject to the payment of the premium. In order to avoid duplication of group medical coverage, surviving dependents may defer or waive their enrollment in the PEBB coverage each full calendar month in which they maintain coverage under an employer sponsored medical plan. Notice of intent to waive PEBB coverage must be sent in writing to the Washington state health care authority. When an employer sponsored medical plan ends, surviving dependent(s) must submit an application to enroll in a PEBB plan within sixty days of the last day of coverage under the employer sponsored medical plan. Satisfactory evidence of continuous enrollment in an employer sponsored medical plan will be required by the Washington state health care authority prior to enrollment in a PEBB plan. The employee's or retiree's spouse or qualified domestic partner may continue coverage indefinitely; other dependents may continue coverage until they lose eligibility under PEBB rules.

AMENDATORY SECTION (Amending WSR 97-21-127, filed 10/21/97, effective 11/21/97)

WAC 182-12-132 (~~Retirees returning to state employment~~) Waiving or deferring coverage. (~~If a retiree returns to work and is again eligible for employer contributions towards their PEBB or Washington state school district sponsored benefits the retiree may cancel their retirement deduction for health coverage as soon as eligibility is established and the retiree is enrolled as an active employee. The retiree must maintain~~) Retirees may waive PEBB medical and dental coverage for themselves and all dependents if they are covered under another comprehensive employer sponsored medical plan. (Other coverage may be attained through the retiree's reemployment or the spouse's employment.) In order to continue retiree term life coverage (during active employment in order to retain it at retirement), coverage must be selected upon retirement and premiums must continue to be paid during reemployment status. When the retiree again ceases active employment, the retiree (must

~~reenroll~~) may enroll in (a) PEBB (retiree plan) medical and dental coverage with evidence of continuous coverage within (60) sixty days of the loss of coverage. Coverage will become effective the first of the month following the date other coverage ended.

WSR 01-01-134
PERMANENT RULES
HEALTH CARE AUTHORITY
(Basic Health Plan)

[Order 00-04—Filed December 20, 2000, 9:26 a.m.]

Date of Adoption: December 20, 2000.

Purpose: Updates basic health definitions and eligibility requirements for subsidized enrollees to reflect recent legislative changes.

Citation of Existing Rules Affected by this Order: Amending WAC 182-25-010 and 182-25-030.

Statutory Authority for Adoption: RCW 70.47.050.

Other Authority: RCW 70.47.020 as revised by E2SSB 6067.

Adopted under notice filed as WSR 00-22-099 on November 1, 2000.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

AMENDATORY SECTION (Amending Order 99-06, filed 11/18/99, effective 12/19/99)

WAC 182-25-010 Definitions. The following definitions apply throughout these rules.

(1) "Administrator" means the administrator of the Washington state health care authority (HCA) or designee.

(2) "Appeal procedure" means a formal written procedure for resolution of problems or concerns raised by enrollees which cannot be resolved in an informal manner to the enrollee's satisfaction.

(3) "Basic health plan" (or BHP) means the system of enrollment and payment (~~on a prepaid capitated basis~~) for

basic health care services administered by the administrator through managed health care systems.

(4) "BHP plus" means the program of expanded benefits available to children through coordination between the department of social and health services (DSHS) and basic health plan. Eligibility for BHP Plus is determined by the department of social and health services, based on Medicaid eligibility criteria. To be eligible for the program children must be under age nineteen, with a family income at or below two hundred percent of federal poverty level, as defined by the United States Department of Health and Human Services. They must be Washington state residents, not eligible for Medicare, and may be required to meet additional DSHS eligibility requirements.

(5) "Co-payment" means a payment indicated in the schedule of benefits which is made by an enrollee to a health care provider or to the MHCS.

(6) "Covered services" means those services and benefits in the BHP schedule of benefits (as outlined in the member handbook issued to the enrollee, or to a subscriber on behalf of the enrollee), which an enrollee shall be entitled to receive from a managed health care system in exchange for payment of premium and applicable co-payments.

(7) "Disenrollment" means the termination of covered services in BHP for a subscriber and dependents, if any.

(8) "Effective date of enrollment" means the first date, as established by BHP, on which an enrollee is entitled to receive covered services from the enrollee's respective managed health care system.

(9) "Dependent" means:

(a) The subscriber's lawful spouse, not legally separated, who resides with the subscriber; or

(b) The unmarried child of the subscriber or the subscriber's dependent spouse, whether by birth, adoption, legal guardianship, or placement pending adoption, who is:

(i) Younger than age nineteen, and who has not been relinquished for adoption by the subscriber or the subscriber's dependent spouse; or

(ii) Younger than age twenty-three, and a registered student at an accredited secondary school, college, university, technical college, or school of nursing, attending full time, other than during holidays, summer and scheduled breaks; or

(c) A person of any age who is under legal guardianship of the subscriber or the subscriber's dependent spouse, and who is incapable of self-support due to disability.

(10) "Eligible full-time employee" means an employee who meets all eligibility requirements in WAC 182-25-030 and who is regularly scheduled to work thirty or more hours per week for an employer. The term includes a self-employed individual (including a sole proprietor or a partner of a partnership, and may include an independent contractor) if the individual:

(a) Is regularly scheduled to work thirty hours or more per week; and

(b) Derives at least seventy-five percent of his or her income from a trade or business that is licensed to do business in Washington.

Persons covered under a health benefit plan pursuant to the Consolidated Omnibus Budget Reconciliation Act of

1986 shall not be considered eligible employees for purposes of minimum participation requirements.

(11) "Eligible part-time employee" means an employee who meets all the criteria in subsection (10) of this section, but who is regularly scheduled to work fewer than thirty hours per week for an employer.

(12) "Employee" means one who is in the employment of an employer, as defined by RCW 50.04.080.

(13) "Employer" means an enterprise licensed to do business in Washington state, as defined by RCW 50.04.080, with employees in addition to the employer, whose wages or salaries are paid by the employer.

(14) "Enrollee" means a person who meets all eligibility requirements, who is enrolled in BHP, and for whom applicable premium payments have been made.

(15) "Family" means an individual or an individual and spouse, if not legally separated, and dependents. For purposes of eligibility determination and enrollment in the plan, an individual cannot be a member of more than one family.

(16) "Financial sponsor" means a person, organization or other entity, approved by the administrator, that is responsible for payment of all or a designated portion of the monthly premiums on behalf of a subscriber and any dependents.

(17) "Gross family income" means total cash receipts, as defined in (a) of this subsection, before taxes, from all sources, for subscriber and dependents whether or not they are enrolled in BHP, with the exceptions noted in (b) of this subsection.

(a) Income includes:

(i) Money wages, tips and salaries before any deductions;

(ii) Net receipts from nonfarm self-employment (receipts from a person's own unincorporated business, professional enterprise, or partnership, after deductions for business expenses);

(iii) Net receipts from farm self-employment (receipts from a farm which one operates as an owner, renter, or sharecropper, after deductions for farm operating expenses);

(iv) Regular payments from Social Security, railroad retirement, unemployment compensation, strike benefits from union funds, workers' compensation, veterans' payments, public assistance, alimony, child support, military family allotments, private pensions, government employee pensions (including military retirement pay), and regular insurance or annuity payments;

(v) Work study or training stipends;

(vi) Dividends and interest accessible to the enrollee without a penalty;

(vii) Net rental income, net royalties, periodic receipts from estates or trusts, and net gambling or lottery winnings.

(b) Income does not include the following types of money received:

(i) Capital gains;

(ii) Any assets drawn down as withdrawals from a bank, the sale of property, a house or a car;

(iii) Tax refunds, gifts, loans, lump-sum inheritances, one-time insurance payments, or compensation for injury (except workers' compensation);

(iv) Noncash benefits, such as the employer-paid or union-paid portion of health insurance or other employee

fringe benefits, food or housing received in lieu of wages, the value of food and fuel produced and consumed on farms, the imputed value of rent from owner-occupied nonfarm or farm housing, and such noncash benefit programs as Medicare, Medicaid, food stamps, school lunches, and housing assistance;

- (v) Income earned by dependent children;
- (vi) Income of a family member who resides in another household when such income is not available to the subscriber or dependents seeking enrollment in BHP;
- (vii) College or university scholarships, grants, fellowships and assistantships;
- (viii) Payments from the department of social and health services adoption support program authorized under RCW 26.33.320 and 74.13.100 through 74.13.145;
- (ix) Documented child care expenses for the care of a dependent child of a subscriber may be deducted (at a rate set by the administrator and consistent with Internal Revenue Service requirements) when calculating gross family income. To qualify for this deduction, the subscriber must be employed during the time the child care expenses were paid, and payment may not be paid to a parent or step parent of the child or to a dependent child of the subscriber or his/her spouse.

(18) "Home care agency" means a private or public agency or organization that administers or provides home care services directly or through a contract arrangement to ill, disabled, or infirm persons in places of temporary or permanent residence, and is licensed by the department of social and health services (DSHS) as a home care agency. In order to qualify, the agency must be under contract with one of the following DSHS programs: Chore, Medicaid Personal Care, Community Options Program Entry System (COPES) or Respite Care (up to level three).

(19) "Institution" means a federal, state, county, city or other government correctional or detention facility or government-funded facility where health care historically has been provided and funded through the budget of the operating agency, and includes, but is not limited to: Washington state department of corrections institutions; federal, county and municipal government jail and detention institutions; Washington state department of veterans affairs soldiers' and veterans' homes; department of social and health services state hospitals and facilities and juvenile rehabilitation institutions and group homes. An institution does not include: Educational institutions; government-funded acute health care or mental health facilities except as provided above; chemical dependency facilities; and nursing homes.

(20) "Institutionalized" means to be confined, voluntarily or involuntarily, by court order or health status, in an institution, as defined in subsection (19) of this section. This does not include persons on work release or who are residents of higher education institutions, acute health care facilities, alcohol and chemical dependency facilities, or nursing homes.

(21) "Insurance broker" or "agent" means a person who is currently licensed as a disability insurance broker or agent, according to the laws administered by the office of the insurance commissioner under chapter 48.17 RCW.

(22) "Managed health care system" (or "MHCS") means;

(a) Any health care organization (including health care providers, insurers, health care service contractors, health maintenance organizations, or any combination thereof) which has entered into a contract with the HCA to provide basic health care services; or

(b) A self-funded or self-insured method of providing insurance coverage to subsidized enrollees provided under RCW 41.05.140 and subject to the limitations under RCW 70.47.100(7).

(23) "Maternity benefits through medical assistance," also known as S-Medical, means the coordinated program between BHP and DSHS for eligible pregnant women. This program includes all Medicaid benefits, including maternity coverage. Eligible members must be at or below one hundred eighty-five percent of the federal poverty level. Eligibility for this program is determined by DSHS, based on Medicaid eligibility criteria.

(24) "Medicaid" means the Title XIX Medicaid program administered by the department of social and health services, and includes the medical care programs provided to the "categorically needy" and the "medically needy" as defined in chapter 388-503 WAC.

(25) "Medicare" means programs established by Title XVIII of Public Law 89-97, as amended, "Health Insurance for the Aged and Disabled."

(26) "Nonsubsidized enrollee" or "full premium enrollee" means an individual who enrolls in BHP, as the subscriber or dependent, and who pays or on whose behalf is paid the full costs for participation in BHP, without subsidy from the HCA.

(27) "Open enrollment" means a time period designated by the administrator during which enrollees may enroll additional dependents or apply to transfer their enrollment from one managed health care system to another.

(28) "Participating employee" means an employee of a participating employer or home care agency who has met all the eligibility requirements and has been enrolled for coverage under BHP.

(29) "Participating employer" means an employer who has been approved for enrollment in BHP as an employer group.

(30) "Preexisting condition" means any illness, injury or condition for which, in the three months immediately preceding an enrollee's effective date of enrollment in BHP:

(a) Treatment, consultation or a diagnostic test was recommended for or received by the enrollee; or

(b) The enrollee was prescribed or recommended medication; or

(c) Symptoms existed which would ordinarily cause a reasonably prudent individual to seek medical diagnosis, care or treatment.

(31) "Premium" means a periodic payment, based upon gross family income and determined under RCW 70.47.060(2), which an individual, their employer or a financial sponsor makes to BHP for subsidized or nonsubsidized enrollment in BHP.

(32) "Program" means subsidized BHP, nonsubsidized BHP, BHP Plus, or maternity benefits through medical assistance.

(33) "Provider" or "health care provider" means a health care professional or institution duly licensed and accredited to provide covered services in the state of Washington.

(34) "Rate" means the ((per-capita)) amount, including administrative charges and any applicable premium and prepayment tax imposed under RCW 48.14.020, negotiated by the administrator with and paid to a managed health care system, to provide BHP health care benefits to enrollees.

(35) "Schedule of benefits" means the basic health care services adopted and from time to time amended by the administrator, which an enrollee shall be entitled to receive from a managed health care system in exchange for payment of premium and applicable co-payments, as described in the member handbook.

(36) "Service area" means the geographic area served by a managed health care system as defined in its contract with HCA.

(37) "Subscriber" is a person who applies to BHP on his/her own behalf and/or on behalf of his/her dependents, if any, who meets all applicable eligibility requirements, is enrolled in BHP, and for whom the monthly premium has been paid. Notices to a subscriber and, if applicable, a financial sponsor or employer shall be considered notice to the subscriber and his/her enrolled dependents.

(38) "Subsidized enrollee" or "reduced premium enrollee" means an individual who enrolls in BHP, either as the subscriber or an eligible dependent, whose current gross family income does not exceed twice the federal poverty level as adjusted for family size and determined annually by the federal Department of Health and Human Services, and who receives a premium subsidy from the HCA. To the extent that state funds are specifically appropriated for this purpose, with a corresponding federal match, "subsidized enrollee" also means an individual who enrolls in BHP, either as the subscriber or an eligible dependent, whose current gross family income is more than two hundred percent, but less than two hundred fifty-one percent, of the federal poverty level as adjusted for family size and determined annually by the federal Department of Health and Human Services, and who receives a premium subsidy from the HCA.

(39) "Subsidy" means the difference between the amount of periodic payment the HCA makes to a managed health care system on behalf of a subsidized enrollee, and the amount determined to be the subsidized enrollee's responsibility under RCW 70.47.060(2).

AMENDATORY SECTION (Amending Order 99-06, filed 11/18/99, effective 12/19/99)

WAC 182-25-030 Eligibility. (1) To be eligible for enrollment in BHP, an individual must be a Washington state resident who is not:

(a) Eligible for free Medicare coverage or eligible to buy Medicare coverage; or

(b) Institutionalized at the time of enrollment.

(2) Persons not meeting these criteria, as evidenced by information submitted on the application for enrollment or otherwise obtained by BHP, will not be enrolled. An enrollee who is no longer a Washington resident, who becomes eligible for free or purchased Medicare, or who is later deter-

mined to have failed to meet BHP's eligibility criteria at the time of enrollment, will be disenrolled from the plan as provided in WAC 182-25-090. An enrollee who was not confined to an institution at the time of enrollment, who is subsequently confined to an institution, will not be disenrolled, provided he or she remains otherwise eligible and continues to make all premium payments when due.

(3) Eligibility for BHP Plus and maternity benefits through medical assistance is determined by DSHS, based on Medicaid eligibility criteria.

(4) For subsidized enrollment in BHP, an individual must meet the eligibility criteria in subsection (1) of this section (~~(, have a gross family income that does not exceed two hundred percent of federal poverty level as adjusted for family size and determined annually by the U.S. Department of Health and Human Services)) and the definition of "subsidized enrollee" in WAC 182-25-010(38), and must pay, or have paid on his or her behalf, the monthly BHP premium.~~

(5) To be eligible for nonsubsidized enrollment in BHP, an individual may have any income level, must meet the eligibility criteria in subsection (1) of this section, and must pay, or have paid on their behalf, the full costs for participation in BHP, including the cost of administration, without subsidy from the HCA.

(6)(a) An individual otherwise eligible for enrollment in BHP may be denied enrollment if the administrator has determined that acceptance of additional enrollment would exceed limits established by the legislature, would jeopardize the orderly development of BHP, or would result in an overexpenditure of BHP funds. An individual otherwise eligible for enrollment in either the subsidized or nonsubsidized program may also be denied enrollment if no MHCS is accepting new enrollment in that program or from the geographic area where the applicant lives.

(b) If the administrator closes or limits subsidized enrollment, to the extent funding is available, BHP will continue to accept and process applications for enrollment from:

(i) Applicants who will pay the full premium, provided at least one MHCS is accepting new nonsubsidized enrollment from the geographic area where the applicant lives;

(ii) Children eligible for BHP Plus;

(iii) Children eligible for subsidized BHP, who were referred to DSHS for BHP Plus coverage, but were found ineligible for BHP Plus for reasons other than noncompliance;

(iv) Employees of a home care agency group enrolled or applying for coverage under WAC 182-25-060;

(v) Eligible individual home care providers;

(vi) Licensed foster care workers;

(vii) Limited enrollment of new employer groups; and

(viii) Subject to availability of funding, additional space for enrollment may be reserved for other applicants as determined by the administrator, in order to ensure continuous coverage and service for current individual and group accounts. (For example: Within established guidelines, processing routine income changes that may affect subsidy eligibility for current enrollees; adding new family members to an existing account; transferring enrollees between group and individual accounts; restoring coverage for enrollees who are otherwise eligible for continued enrollment under WAC 182-

25-090 after a limited suspension of coverage due to late payment or other health care coverage; adding newly hired employees to an existing employer group; or adding new or returning members of federally recognized native American tribes to that tribe's currently approved financial sponsor group.)

(c) If the administrator has closed or limited subsidized enrollment, applicants for subsidized BHP who are not in any of the categories in (b) of this subsection may reserve space on a reservation list to be processed according to the date the reservation or application is received by BHP. When enrollment is reopened by the administrator, applicants whose names appear on the reservation list will be notified by BHP of the opportunity to enroll. BHP may require new application forms and documentation from applicants on the reservation list, or may contact applicants to verify continued interest in applying, prior to determining their eligibility.

WSR 01-01-137

PERMANENT RULES

WESTERN WASHINGTON UNIVERSITY

[Filed December 20, 2000, 9:31 a.m., effective February 1, 2001]

Date of Adoption: December 15, 2000.

Purpose: Simplify explanation for accessing university registration and admission procedures.

Citation of Existing Rules Affected by this Order: Amending chapter 516-60 WAC, Admission and registration procedures.

Statutory Authority for Adoption: RCW 28B.35.120(12).

Adopted under notice filed as WSR 00-19-046 on September 14, 2000.

Changes Other than Editing from Proposed to Adopted Version: The first two sections of the chapter were not repealed, the remainder of the chapter was repealed.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 0, Amended 1, Repealed 0.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 0, Amended 1, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 1, Repealed 0.

Effective Date of Rule: February 1, 2001.

December 15, 2000
Gloria A. McDonald
Rules Coordinator

REPEALER

The following sections of the Washington Administrative Code are repealed:

WAC 516-60-003	Finances.
WAC 516-60-004	Refund of tuition and fees.
WAC 516-60-005	Residency classification.
WAC 516-60-006	Sanctions.
WAC 516-60-007	Health history.
WAC 516-60-015	Registration.
WAC 516-60-016	Deadlines.
WAC 516-60-017	Changes in registration and withdrawal.
WAC 516-60-020	Admission general.
WAC 516-60-030	Admission of nonmatriculated students.

WSR 01-01-138

PERMANENT RULES

WESTERN WASHINGTON UNIVERSITY

[Filed December 20, 2000, 9:35 a.m., effective February 1, 2001]

Date of Adoption: December 15, 2000.

Purpose: Clarify procedures for leasing university property for business purposes.

Citation of Existing Rules Affected by this Order: Amending chapter 516-34 WAC, Leasing of university property for business purposes.

Statutory Authority for Adoption: RCW 28B.35.120(12).

Adopted under notice filed as WSR 00-19-047 on September 14, 2000.

Changes Other than Editing from Proposed to Adopted Version: A sentence was added to WAC 516-24-010 to make it clear that internal procedures exist in those areas which pertain to selling goods at approved locations, apart from the WAC rules.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 0, Amended 1, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 1, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 0, Repealed 0.

Effective Date of Rule: February 1, 2001.

December 15, 2000
Gloria A. McDonald
Rules Coordinator

AMENDATORY SECTION (Amending Order 12-03-86, filed 12/24/86)

WAC 516-34-010 Request to lease university property. Any individual desiring to provide a particular service or sell particular goods to the Western Washington University community from a leased location on the campus of Western Washington University shall submit to the vice-president for business and financial affairs of the university an initial written proposal for the provision of that service and a request to lease university property. These rules do not cover short-term space rentals, which are covered by internal procedures through the Viking Union under its sale of goods and services policy, and other internal short-term space rental procedures.

AMENDATORY SECTION (Amending Order 12-03-86, filed 12/24/86)

WAC 516-34-020 Consideration of request and initial proposal. (1) The vice-president for business and financial affairs or his/her designee shall ~~((in consultation with the appropriate administrative office(s) and/or councils make a determination of need based on the following))~~ make a recommendation to the president whether the university should accept proposals to lease space for the purpose of selling the particular goods or offering the proposed services. The vice-president shall consult with appropriate members of the university and shall consider the following nonexclusive list of factors:

(a) Whether there is a need for the proposed goods or services on the campus of Western Washington University;

(b) Whether the proposed ~~((service-is))~~ sales or services are compatible with the goals and objectives of the university;

(c) Whether the proposed service or sales can be provided within the context of existing campus resources, vendors, or programs, thus rendering a new lease unnecessary;

(d) Whether the requested lease is acceptable within the framework of the university land use plan;

(e) Whether the requested lease should be ~~((granted))~~ considered;

(f) Which, if any, of the university property should be leased in connection with the proposed service.

(2) Upon completion of the above evaluation and ~~((determination, the office))~~ recommendation of the vice-president for business and financial affairs shall submit a written statement of findings with regard to the above factors to the university president. ~~((A determination shall thereupon be made as to))~~ The president shall determine whether the initial proposal and/or request for lease should be denied or ~~((should be presented))~~ recommended for approval to the board of trustees for consideration.

(a) If the ~~((determination is made))~~ president determines that a particular initial proposal and/or request for lease should ~~((not))~~ be ~~((granted, the office of))~~ denied, the vice-president for business and financial affairs shall give written notice of denial to the individual presenting the proposal and request for lease, and shall include within this notice the reasons for such denial.

(b) If the president determines the proposal and/or community request should be considered for approval by the board of trustees, the proposal and/or lease should be considered by the board of trustees at its next regularly scheduled meeting.

AMENDATORY SECTION (Amending Order 73-13, filed 8/8/73)

WAC 516-34-030 Preliminary evaluation by board of trustees. The board of trustees shall consider and evaluate each initial proposal ~~((for services))~~ and/or request for lease referred to the board by the president. The board of trustees may either deny or give preliminary approval in whole or in part to each such initial proposal ~~((for services))~~ and/or request for lease.

AMENDATORY SECTION (Amending Order 12-03-86, filed 12/24/86)

WAC 516-34-040 Public notice of intention to lease. Whenever the board of trustees gives preliminary approval to an initial proposal for services and request for lease, the ~~((university))~~ vice-president for business and financial affairs shall forthwith give reasonable and timely notice to members of the public and to interested parties indicating that the university will consider leasing a particular area of university property in connection with the provision of a particular service to the university community. Said notice shall specify a time limit for submission of proposals by members of the public relating to said provision of services or sales of goods and/or lease.

AMENDATORY SECTION (Amending Order 12-03-86, filed 12/24/86)

WAC 516-34-050 Submission of final proposals. Within the time limit specified in the public notice given by the university, any individual interested in leasing the particular area of university property specified in the notice for the purpose of providing the particular service or other goods as specified in the notice shall submit a proposal to the university setting forth in detail the means and methods by which that individual would utilize the leased property and provide the desired service or offering of goods for sale to the university community. Proposals must meet all specifications and/or requirements set forth in the notice.

AMENDATORY SECTION (Amending Order 12-03-86, filed 12/24/86)

WAC 516-34-060 Consideration and evaluation of final proposal(s). (1) The ~~((university))~~ vice-president for

business and financial affairs shall carefully examine and evaluate all proposals for lease of university property and provision of services or selling of goods. The factors considered by the university in evaluating such proposals shall include but not be limited to the following:

(a) The capabilities, qualifications, and experience of each person, firm, corporation, or organization who would be involved in the execution of the proposal;

(b) The financial stability of each person, firm, corporation, or organization owning and/or operating the proposed service facility;

(c) The educational, academic and financial value of each proposal to the university;

~~((d) Whether the proposal indicates that there will be full compliance at all times with the applicable requirements of the university's affirmative action program;~~

~~(e) The overall projected ability of each proposal to provide the desired service.))~~

(2) Upon completion of the evaluation, the ~~((university))~~ vice-president for business and financial affairs shall ~~((determine))~~ evaluate which, if any, of the submitted proposals is in the best interests of the university. The ~~((university))~~ vice-president for business and financial affairs shall have authority to reject all proposals as being unsatisfactory. The vice-president for business and financial affairs shall forward his/her recommendation as to the best proposal and the reasons therefor to the president in writing.

(3) The president shall make a final determination of which proposal is in the best interest of the university and shall award the lease to that applicant. The president's decision is final and not subject to further appeal with the university.

AMENDATORY SECTION (Amending Order 12-03-86, filed 12/24/86)

WAC 516-34-070 Notice of rejection. The university shall give ~~((prompt))~~ notice in writing to all individuals submitting final proposals as to final disposition of award and clearly specify the reasons.

NEW SECTION

WAC 516-34-080 Delegation of authority. Any of the university administrators referenced herein may delegate their responsibilities under this regulation to a subordinate.

Effective Date of Rule: Thirty-one days after filing.

December 19, 2000

Ellen O'Brien Saunders

Executive Director

AMENDATORY SECTION (Amending WSR 98-22-033, filed 10/29/98, effective 11/29/98)

WAC 490-105-080 How are contributions to the tuition recovery trust fund calculated? (See RCW 28C.10.082 and 28C.10.084.)

(1) Establishment of fund liability limits. The amount of liability that can be satisfied by this fund on behalf of each individual school licensed under this chapter is identified in the table in subsection (4) of this section.

(a) If the school is located within the state of Washington, its liability limit will be based on the total annual tuition income received from or on behalf of all students, as reported in the financial statement required by WAC 490-105-040 (2)(a);

(b) If the school is located outside the state of Washington, its liability limit is based on the total annual tuition income received from or on behalf of Washington state residents, as reported in the financial statement required by WAC 490-105-040 (2)(a);

(c) If the school was not in operation prior to the date of initial licensing, its liability limit is based on the total annual tuition estimate supplied under the provisions of WAC 490-105-040 (2)(c);

(d) The minimum liability established in any circumstance is five thousand dollars.

(2) Matrices for calculating initial deposits and any assessments necessary under subsection (7) of this section:

Level of Liability:	Prorated Share:
\$5,000	0.15%
\$7,500	0.23%
\$10,000	0.30%

PERMANENT

Level of Liability:	Prorated Share:
\$15,000	0.46%
\$20,000	0.61%
\$25,000	0.76%
\$35,000	1.07%
\$50,000	1.52%
\$75,000	2.28%
\$100,000	3.05%
\$125,000	3.81%
\$150,000	4.57%
\$175,000	5.33%
\$200,000	6.10%
\$225,000	6.86%
\$250,000	7.62%

Level of Liability:	Prorated Share:
\$275,000	8.38%

(3) Initial deposit. When the school submits its initial license application, it must include for deposit into the tuition recovery trust fund, the amount identified in the third column of the table below.

(4) Contribution schedule. In order to remain licensed under this chapter, the school must remit to the agency semi-annual payments for deposit into the tuition recovery trust fund. The amount of the deposits for the first five years is calculated by applying the percentages displayed under subsection (2) of this section, to an amount totaling one million dollars as required by RCW 28C.10.084. In the second five years, contributions for amounts between zero and ~~((two))~~ one hundred fifty thousand dollars will be reduced by fifty percent.

If the school's total annual tuition income is:	Its liability limit under the Tuition Recovery Trust Fund is:	Based on its liability limit, the school will make an initial deposit to the fund of:	The school will make the following semiannual payments for the first five years it is licensed:	The school will make the following semiannual payments for the second five years it is licensed:
\$0 - \$50,000	\$5,000	\$305	\$122	\$61
\$50,001 - \$75,000	\$7,500	\$457	\$183	\$92
\$75,001 - \$100,000	\$10,000	\$609	\$244	\$122
\$100,001 - \$150,000	\$15,000	\$914	\$366	\$183
\$150,001 - \$200,000	\$20,000	\$1,219	\$487	\$487
\$200,001 - \$250,000	\$25,000	\$1,523	\$609	\$609
\$250,001 - \$350,000	\$35,000	\$2,133	\$853	\$853
\$350,001 - \$500,000	\$50,000	\$3,046	\$1,219	\$1,219
\$500,001 - \$750,000	\$75,000	\$4,570	\$1,828	\$1,828
\$750,001 - \$1,000,000	\$100,000	\$6,093	\$2,437	\$2,437
\$1,000,001 - \$1,250,000	\$125,000	\$7,616	\$3,046	\$3,046
\$1,250,001 - \$1,500,000	\$150,000	\$9,139	\$3,656	\$3,656
\$1,500,001 - \$1,750,000	\$175,000	\$10,663	\$4,265	\$4,265
\$1,750,001 - \$2,000,000	\$200,000	\$12,186	\$4,874	\$4,874
\$2,000,001 - \$2,250,000	\$225,000	\$13,710	\$5,483	\$5,483
\$2,250,001 - \$2,500,000	\$250,000	\$15,233	\$6,092	\$6,092
>\$2,500,000	\$275,000	\$16,757	\$6,702	\$6,702

(5) The agency will send semiannual notices of the due dates and amounts of deposits required under subsection (4) of this section. The fee for late filings under WAC 490-105-070(2) of this chapter applies to late payments of deposits into the fund for a period cumulating to thirty calendar days. Failure to make a deposit within thirty calendar days is a violation of RCW 28C.10.050 (1)(f).

(6) Each semiannual notice will include:

- (a) The school's aggregated prior deposits into the fund;
- (b) The school's balance of remaining payments, based on the most recent deposit received and adjusted to the current contribution level;

(c) The cumulated balance existing in the fund at the most recent half-year accounting; and

(d) A summary showing any disbursements made from the fund to satisfy claims in the period since the last summary was disseminated.

(7) If disbursements made to settle claims reduce the operating balance below one million dollars and recovery of such funds has not been ensured under the provisions of RCW 28C.10.084 (10)(d), the agency will assess each school a pro rata share of the amount required to restore the deficiency. The assessment will be made within thirty calendar days of the date deficiency is created. Each school's share of

PERMANENT

the assessment will be calculated using the percentages established under subsection (2) of this section. If the school's assessment equals or is less than the semiannual amount of deposit established for the school under subsection (4) of this section, the assessment must be paid within thirty calendar days of notice. If the assessment exceeds the amount of the school's semiannual deposit, it may apply to the agency for a schedule of deferred payments. The agency will grant deferrals on application, but in no case will the extension exceed one year beyond the date of the assessment.

(8) Funds disbursed to settle claims against a currently licensed school will be recovered by the agency under a schedule to be negotiated with the affected school on a case-by-case basis. To secure deferral of payment more than thirty calendar days after demand for recovery is made, the burden to prove manifest hardship rests on the school but in no case will the time extended exceed one year beyond the date of the initial demand notice.

(9) Claimant, as referenced under RCW 28C.10.084 (10)(a), is further defined to mean an enrolled student in regular attendance or on an authorized leave of absence at the time of closure.

PERMANENT

WSR 01-01-018
EMERGENCY RULES
DEPARTMENT OF
FISH AND WILDLIFE

[Order 00-249—Filed December 6, 2000, 4:55 p.m.]

Date of Adoption: December 6, 2000.

Purpose: Amend hunting rules.

Citation of Existing Rules Affected by this Order:
 Amending WAC 232-12-001, 232-12-071, and 232-12-141.

Statutory Authority for Adoption: RCW 77.12.047.

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: Initiative 713 was passed by the voters and takes effect December 7, 2000. Rules concerning current trapping methods and sale of raw furs need to be amended to reflect the Initiative. These emergency rules will implement the Initiative until permanent rules can take effect.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 3, Amended 0, Repealed 0.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 0, Amended 0, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 0, Repealed 0.

Effective Date of Rule: December 7, 2000, 12:01 a.m.

December 6, 2000

J. P. Koenings

Director

NEW SECTION

WAC 232-12-00100C Definitions. Notwithstanding the provisions of WAC 232-12-001, effective December 7, 2000, until further notice, the following definitions apply:

(1) "Body-gripping trap" means a trap that grips an animal's body or body part. Body-gripping trap includes, but is not limited to, steel-jawed leghold traps, padded-jaw leghold traps, Conibear traps, neck snares, and nonstrangling foot snares. Cage and box traps, suitcase-type live beaver traps, and common rat and mouse traps are not considered body-gripping traps.

(2) "Raw fur" means a pelt that has not been processed for purposes of retail sale.

NEW SECTION

WAC 232-12-07100A Buying or selling of game unlawful. Notwithstanding the provisions of WAC 232-12-071, effective December 7, 2000, until further notice, it is unlawful to knowingly do any of the following, or knowingly offer to do any of the following: buy, sell, barter or otherwise exchange the raw fur of a mammal, or the mammal itself, if the mammal itself has been trapped in this state with a body gripping trap.

NEW SECTION

WAC 232-12-14100A Trapping rules—Body gripping traps prohibited. Notwithstanding the provisions of WAC 232-12-124, 232-12-141, and 232-28-515, effective December 7, 2000, until further notice:

(1) It is unlawful to trap animals using body gripping traps except as provided for in subsection (2).

(2) Conibear-type traps in water, non-strangling foot snares, and padded leghold traps may be used for the following purposes with a permit issued by the Director:

(a) To protect public health and safety, in consultation with the Department of Social and Health Services or the United States Department of Health.

(b) To abate a threat of or damages caused to private property, domestic animals, livestock or timber, that cannot be reasonably abated by nonlethal control tools, if such tools can be reasonably applied. Any person requesting a damage control permit must apply in writing, stating the threat or damages, the nonlethal control methods attempted or why they cannot be applied, and agree to use the above traps for no more than thirty days under the permit granted.

(c) To protect threatened or endangered species, if such traps are used by Department employees or agents.

(d) To conduct wildlife research, except that Conibear-type traps are prohibited for this purpose.

WSR 01-01-019

EMERGENCY RULES

DEPARTMENT OF

FISH AND WILDLIFE

[Order 00-248—Filed December 7, 2000, 10:38 a.m.]

Date of Adoption: December 6, 2000.

Purpose: Amend commercial fishing rules.

Citation of Existing Rules Affected by this Order:
 Repealing WAC 220-52-04600F and 220-52-04600G; and amending WAC 220-52-046.

Statutory Authority for Adoption: RCW 77.12.047.

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: Test fishing results indicate that crab would not have met hardening criteria for an open-

ing and considerable wastage would occur by having opened the season December 1, 2000. There is insufficient time to promulgate permanent rules.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 1, Amended 0, Repealed 2.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 0, Amended 0, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 0, Repealed 0.

Effective Date of Rule: Immediately.

December 6, 2000

J. P. Koenings

Director

NEW SECTION

WAC 220-52-04600G Crab fishery—Seasons and areas. Notwithstanding the provisions of WAC 220-52-046:

(1) It shall be unlawful to fish for, land, or possess Dungeness crab taken from coastal areas of Grays Harbor, Willapa Bay, the Columbia River and the Pacific Ocean north of Cape Lookout, Oregon prior to December 15, 2000 except that it is lawful to set crab gear in these areas beginning 8:00 a.m. December 12, 2000.

(2) Crab fishing vessels which participated in the Dungeness crab fishery between December 1 2000 and December 14, 2000 in the area between Cape Lookout, Oregon and Point Arena, California may not fish for Dungeness crab in the Pacific Ocean north of Cape Falcon, Grays Harbor, Willapa Bay, or the Columbia River until January 14, 2001.

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 220-52-04600F Crab fishery—Seasons and areas. (00-246)

The following section of the Washington Administrative Code is repealed effective 12:01 a.m. January 14, 2001:

WAC 220-52-04600G Crab fishery—Seasons and areas.

EMERGENCY RULES
DEPARTMENT OF
FISH AND WILDLIFE**

[Order 00-250—Filed December 7, 2000, 4:18 p.m., effective December 9, 2000, 8:00 a.m.]

Date of Adoption: December 7, 2000.

Purpose: Amend personal use rules.

Citation of Existing Rules Affected by this Order: Repealing WAC 220-56-33000I; and amending WAC 220-56-330.

Statutory Authority for Adoption: RCW 77.12.047.

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: State/tribal allocation balances have been reached for Dungeness crab harvest in Marine Areas 8-1 and 8-2 and these areas reopen to recreational harvest through 4:00 p.m. December 31, 2000. There is insufficient time to promulgate permanent rules.

DEPARTMENT OF
FISH AND WILDLIFE**

[Order 00-251—Filed December 7, 2000, 4:19 p.m., effective January 1, 2001, 12:01 a.m.]

Date of Adoption: December 7, 2000.

Purpose: Amend commercial fishing rules.

Citation of Existing Rules Affected by this Order: Repealing WAC 220-52-04600H; and amending WAC 220-52-046.

Statutory Authority for Adoption: RCW 77.12.047.

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: The state may not authorize commercial shellfish harvest absent agreed planning or compliance with a process. The provisions of this rule are in conformity with agreed plans with applicable tribes which have been entered as required by the court order. There is insufficient time to promulgate permanent rules.

NEW SECTION

WAC 220-52-04600H Coastal crab fishery—Special management areas. Not withstanding the provisions of

WAC 220-52-046, effective immediately until further notice, it is unlawful for non-Indian commercial fishers to fish for or take crab for commercial purposes, or place gear, in the following areas during the periods indicated:

1) The following areas are closed from January 1, 2001 through February 28, 2001:

(a) Coastal waters between 47° 40.50 N and 48° 07.50 N, and east of a line described by the following points:

Southern point:	47°40.50'N	124°40.50'W
La Push (west entrance)	47°54.00'N	124°47.00'N
La Push (east entrance)	47°54.50'N	124°45.80'W
Central point	48°00.00'N	124°49.50'W
Northern point	48°07.50'N	124°51.50'N

2) The following area is closed from January 12, 2001 through March 31, 2001:

(a) Coastal waters between 48° 07.50 N and 48° 20.00 N, and east of a line described by the following points:

Southern point:	47°40.50'N	124°51.50'W
Northern point:	48°20.00'N	124°50.00'W
Cape Flattery:	48°22.86'N	124°43.83'W

REPEALER

The following section of the Washington Administrative Code is repealed effective 12:01 a.m. April 1, 2001:

WAC 220-52-04600H Coastal crab fishery—Special management areas.

**WSR 01-01-040
EMERGENCY RULES

NEW SECTION

WAC 220-52-07300Z Sea urchins. Notwithstanding the provisions of WAC 220-52-073, effective immediately until further notice it is unlawful to take or possess sea urchins taken for commercial purposes except as provided for in this section:

(1) Green sea urchins: Sea Urchin Districts 1 and 2 are open only on December 11, 2000. Sea Urchin Districts 3, 4, and Marine Fish/Shellfish Management and Catch Reporting Areas 24A, 24B, 24C, and 24D, 26B, 26C, 26D, and 28A are open only on Mondays, Tuesdays, and Wednesdays of each week. The minimum size for green sea urchins is 2.25 inches in diameter exclusive of the spines.

(2) Red sea urchins: Sea Urchin Districts 1 and 2 are open only on December 11, 12, 13, 14, 18, 19, 20, and 21, 2000. Sea Urchin Districts 3 and 4 are open only on December 11, 12, 13, 14, 18, 19, 20, and 21. It is unlawful to harvest red sea urchins larger or smaller than the following size (size in diameter exclusive of the spines):

(a) Districts 1 and 2 - 4.0 minimum to 5.5 maximum inches.

(b) Districts 3 and 4 - 3.25 minimum to 5.0 maximum inches.

(3) It is unlawful to dive for any purpose from a commercially-licensed fishing vessel, except vessels actively fishing geoducks under contract with the Washington Department of Natural Resources on Saturdays and Sundays of each week.

(4) Sea Urchin Districts:

(a) Sea Urchin District 1 (Northern San Juan Islands) is defined as Marine Fish-Shellfish Management and Catch Reporting Areas 20A, 20B, and those waters of Area 22A north of a line projected east-west one-quarter mile north of

EMERGENCY

Lime Kiln Light on San Juan Island and west of a line projected true north from Limestone Point on San Juan Island.

(b) Sea Urchin District 2 (Southern San Juans and Port Townsend) is defined as those waters of Marine Fish/Shellfish Management and Catch Reporting Area 22A south of a line projected east-west one-quarter mile north of Lime Kiln Light on San Juan Island and east of a line projected true north from Limestone Point on San Juan Island, and Areas 21A, 21B, 22B, 23A, 23B, 25A, and 25B. The following areas within Sea Urchin District 2 are closed to the harvest of sea urchins at all times.

(i) Those waters of Haro Strait north of a line projected east-west one-half mile south of Eagle Point on San Juan Island and south of a line projected east-west one-quarter mile north of Lime Kiln Light on San Juan Island.

(ii) Those waters of San Juan Channel and Upright Channel within the following lines: south of a line from Steep Point on Orcas Island to Limestone Point on San Juan Island, west of a line from Neck Point on Shaw Island to Steep Point on Orcas Island, south of a line projected from Flat Point on Lopez Island true west to Shaw Island, and north of a line projected from Flat Point on Lopez Island to the northernmost point of Turn Island and thence projected true west to San Juan Island.

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 220-52-07300Y Sea urchins. (00-230)

**WSR 01-01-075
EMERGENCY RULES
DEPARTMENT OF
FISH AND WILDLIFE**

[Order 00-257—Filed December 13, 2000, 1:44 p.m.]

Date of Adoption: December 13, 2000.

Purpose: Amend hunting rules.

Citation of Existing Rules Affected by this Order: Repealing WAC 232-28-28100B; and amending WAC 232-28-281.

Statutory Authority for Adoption: RCW 77.12.047.

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: The population of elk in these game management units remains above the level that will cause crop depredation, in part because of the Hanford Reach fire, which caused foraging elk to move south. Harvest of antlerless elk in these units will not cause unacceptable loss of reproductive potential, and will afford additional hunting opportunity. There is insufficient time to adopt permanent rules.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Purpose: Amend commercial fishing rules.

Citation of Existing Rules Affected by this Order: Amending WAC 220-49-020.

Statutory Authority for Adoption: RCW 77.12.047.

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: At its December 9, 2000, meeting, the Fish and Wildlife Commission voted to close the purse seine fishery for herring and anchovy in Puget Sound except in seasons set by emergency rules. It is the policy intent of the commission to have the closure effective prior to December 31, 2000. This rule is interim until permanent rules take effect in January 2001.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

EMERGENCY

NEW SECTION

WAC 220-49-02000L Herring and anchovy—Seasons—Lawful gear. Notwithstanding the provisions of WAC 220-49-020, effective 11:59 p.m. December 31, 2000 until further notice, it is unlawful to take, fish for or possess herring or anchovy for commercial purposes with purse seine gear in all Puget Sound Marine Fish/Shellfish Management and Catch Reporting Areas.

WSR 01-01-112**EMERGENCY RULES****DEPARTMENT OF
FISH AND WILDLIFE**

[Order 00-258—Filed December 18, 2000, 2:44 p.m.]

Date of Adoption: December 18, 2000.

Purpose: Amend commercial fishing rules.

Citation of Existing Rules Affected by this Order:
Amending WAC 220-52-046.

Statutory Authority for Adoption: RCW 77.12.047.

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: The provisions of this rule reflect industry agreements on fishing plans and are made in conformity with the intent of permanent rules regarding the use of nondesignated vessels sixty-four hours prior to season openings, and forty-eight hours afterward. There is insufficient time to promulgate permanent rules.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 1, Amended 0, Repealed 0.

NEW SECTION

WAC 220-52-04600J Barging of crab pots by undesignated vessels extended Notwithstanding the provisions of WAC 220-52-046, effective immediately until further notice:

(1) It is lawful for a vessel not designated on a Dungeness crab-coastal fishery license to be used to deploy shellfish pot gear beginning 12:01 a.m. December 19, 2000 until 4:00 p.m. on December 24, 2000 provided that:

(a) Such a vessel may not carry aboard more than 150 shellfish pots at any one time.

(b) The lawful owner of the shellfish pot gear must be aboard the vessel when the gear is being deployed.

WSR 01-01-114**EMERGENCY RULES****DEPARTMENT OF
SOCIAL AND HEALTH SERVICES**

(Medical Assistance Administration)

[Filed December 18, 2000, 4:30 p.m., effective January 1, 2001]

Date of Adoption: December 18, 2000.

Purpose: To adopt new one-person standard for the medically needy program and new SSI categorically needy standards effective January 1, 2001.

Citation of Existing Rules Affected by this Order:
Amending WAC 388-478-0070 and 388-478-0080.

Statutory Authority for Adoption: RCW 74.04.050, 74.04.057, 74.08.090, and 74.09.500.

Other Authority: Section 1924 (42 U.S.C. 1396R-5).

Under RCW 34.05.350 the agency for good cause finds that state or federal law or federal rule or a federal deadline for state receipt of federal funds requires immediate adoption of a rule.

Reasons for this Finding: Implementation of federal increase in standards is required to be effective January 1, 2001, in order to continue receiving federal funds.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 2, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 0, Amended 0, Repealed 0.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 0, Amended 0, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 2, Repealed 0.

Effective Date of Rule: January 1, 2001.

Marie Myerchin-Redifer, Manager
Rules and Policies Assistance Unit

EMERGENCY

AMENDATORY SECTION (Amending WSR 00-10-095, filed 5/2/00, effective 5/2/00)

WAC 388-478-0070 Monthly income and countable resource standards for medically needy (MN) and medically indigent (MI) programs. (1) Beginning January 1, ((2000)) 2001, the medically needy income level (MNIL) and MI monthly income standards are as follows:

- (a) One person \$ ((~~539~~)) 556.00
- (b) Two persons \$592
- (c) Three persons \$667
- (d) Four persons \$742
- (e) Five persons \$858
- (f) Six persons \$975
- (g) Seven persons \$1,125
- (h) Eight persons \$1,242
- (i) Nine persons \$1,358
- (j) Ten persons and more \$1,483

(2) The MNIL standard for a person who meets institutional status requirements is in WAC 388-513-1305(3).

(3) Countable resource standards for the MN and MI programs are:

- (a) One person \$2,000
- (b) Two persons \$3,000
- (c) For each additional family member add \$50

AMENDATORY SECTION (Amending WSR 00-10-095, filed 5/2/00, effective 5/2/00)

WAC 388-478-0080 SSI-related categorically needy income level (CNIL) and countable resource standards.

(1) The SSI-related CNIL standard is the same as the SSI monthly payment standard based upon the area of the state where the person lives. Area 1 is defined as the following counties: King, Pierce, Snohomish, Thurston, and Kitsap. Area 2 is all other counties. Beginning January 1, ((2000)) 2001, the CNIL monthly income standards are as follows:

	Area 1	Area 2
(a) Single person	\$((539.00)) <u>555.90</u>	\$((518.55)) <u>535.45</u>
(b) A legally married couple who are both eligible	\$((790.00)) <u>815.90</u>	\$((769.00)) <u>796.00</u>
(c) <u>Supplied shelter</u>	<u>\$357.05</u>	<u>\$357.05</u>

(2) The countable resource standards for the SSI-related CN medical program are:

- (a) One person \$2,000
- (b) A legally married couple \$3,000

**WSR 01-01-146
EMERGENCY RULES
DEPARTMENT OF
FISH AND WILDLIFE**

[Order 00-261—Filed December 20, 2000, 11:23 a.m.]

Date of Adoption: December 19, 2000.

Purpose: Amend commercial fishing rules.

Citation of Existing Rules Affected by this Order: Repealing WAC 220-52-07300Z; and amending WAC 220-52-073.

Statutory Authority for Adoption: RCW 77.12.047.

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: This rule allows one extra day of green urchin fishing. Harvestable amounts of sea urchins exist in the areas described. Prohibition of all diving within two days of scheduled sea urchin openings discourages the practice of fishing on closed days and hiding the unlawful catch underwater until the legal opening. There is insufficient time to promulgate permanent rules.

Number of Sections Adopted in Order to Comply with Federal Statute: New 0, Amended 0, Repealed 0; Federal Rules or Standards: New 0, Amended 0, Repealed 0; or Recently Enacted State Statutes: New 0, Amended 0, Repealed 0.

Number of Sections Adopted at Request of a Nongovernmental Entity: New 0, Amended 0, Repealed 0.

Number of Sections Adopted on the Agency's Own Initiative: New 1, Amended 0, Repealed 1.

Number of Sections Adopted in Order to Clarify, Streamline, or Reform Agency Procedures: New 0, Amended 0, Repealed 0.

Number of Sections Adopted Using Negotiated Rule Making: New 0, Amended 0, Repealed 0; Pilot Rule Making: New 0, Amended 0, Repealed 0; or Other Alternative Rule Making: New 0, Amended 0, Repealed 0.

Effective Date of Rule: Immediately.

December 19, 2000

J. P. Koenings

Director

by Larry Peck

NEW SECTION

WAC 220-52-07300A Sea urchins. Notwithstanding the provisions of WAC 220-52-073, effective immediately until further notice it is unlawful to take or possess sea urchins taken for commercial purposes except as provided for in this section:

(1) Green sea urchins: Sea Urchin Districts 1 and 2 are closed. Sea Urchin Districts 3, 4, and Marine Fish/Shellfish Management and Catch Reporting Areas 24A, 24B, 24C, and 24D, 26B, 26C, 26D, and 28A are open only on December 19, 20, and 21, 2000. The minimum size for green sea urchins is 2.25 inches in diameter exclusive of the spines.

EMERGENCY

(2) Red sea urchins: Sea Urchin Districts 1 and 2 are open only on December 19, 20, and 21, 2000. Sea Urchin Districts 3 and 4 are open only on December 19, 20, and 21. It is unlawful to harvest red sea urchins larger or smaller than the following size (size in diameter exclusive of the spines):

(a) Districts 1 and 2 - 4.0 minimum to 5.5 maximum inches.

(b) Districts 3 and 4 - 3.25 minimum to 5.0 maximum inches.

(3) It is unlawful to dive for any purpose from a commercially-licensed fishing vessel, except vessels actively fishing geoducks under contract with the Washington Department of Natural Resources on Saturdays and Sundays of each week.

(4) Sea Urchin Districts:

(a) Sea Urchin District 1 (Northern San Juan Islands) is defined as Marine Fish-Shellfish Management and Catch Reporting Areas 20A, 20B, and those waters of Area 22A north of a line projected east-west one-quarter mile north of Lime Kiln Light on San Juan Island and west of a line projected true north from Limestone Point on San Juan Island.

(b) Sea Urchin District 2 (Southern San Juans and Port Townsend) is defined as those waters of Marine Fish/Shellfish Management and Catch Reporting Area 22A south of a line projected east-west one-quarter mile north of Lime Kiln Light on San Juan Island and east of a line projected true north from Limestone Point on San Juan Island, and Areas 21A, 21B, 22B, 23A, 23B, 25A, and 25B. The following areas within Sea Urchin District 2 are closed to the harvest of sea urchins at all times.

(i) Those waters of Haro Strait north of a line projected east-west one-half mile south of Eagle Point on San Juan Island and south of a line projected east-west one-quarter mile north of Lime Kiln Light on San Juan Island.

(ii) Those waters of San Juan Channel and Upright Channel within the following lines: south of a line from Steep Point on Orcas Island to Limestone Point on San Juan Island, west of a line from Neck Point on Shaw Island to Steep Point on Orcas Island, south of a line projected from Flat Point on Lopez Island true west to Shaw Island, and north of a line projected from Flat Point on Lopez Island to the northernmost point of Turn Island and thence projected true west to San Juan Island.

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 220-52-07300Z Sea urchins. (00-252)

INTERPRETIVE OR POLICY STATEMENT
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES
 [Filed December 6, 2000, 3:12 p.m.]

DESCRIPTION OF INTERPRETIVE OR POLICY STATEMENT

Document Title: 00-56 MAA Numbered Memorandum.
 Subject: Enhanced reimbursement for major trauma clients.

Effective Date: July 19, 2000.

Document Description: This memo informs DME providers and pharmacists that due to a delay in the timely notification of policy changes in the new Nondurable Medical Equipment and Supplies Billing Instructions, the Medical Assistance Administration is postponing the effective date for the policy changes until August 15, 2000.

To receive a copy of the interpretive or policy statement, contact Ann Myers, Regulatory Improvement Coordinator, DSHS, Medical Assistance Administration, Division of Program Support, P.O. Box 45530, Olympia, WA 98504, phone (360) 725-1345 or go to website at <http://maa.dshs.wa.gov>, TDD 1-800-848-5429, fax (360) 753-7315, e-mail <mailto:MYERSEA@dshs.wa.gov>.

 [Filed December 6, 2000, 3:13 p.m.]

DESCRIPTION OF INTERPRETIVE OR POLICY STATEMENT

Document Title: Numbered Memorandum 00-62 MAA.
 Subject: How to complete the HCFA-1500 claim form.
 Effective Date: January 1, 2001, dates of service and after.

Document Description: This follow-up memorandum informs MAA's HCFA-1500 billers how to properly com-

plete the HCFA-1500 claim form in an effort to reduce the claims inventory backlog.

To receive a copy of the interpretive or policy statement, contact Ann Myers, Regulatory Improvement Coordinator, DSHS, Medical Assistance Administration, Division of Program Support, P.O. Box 45530, Olympia, WA 98504, phone (360) 586-2337 or download from Internet at <http://wws2.wa.gov/dshs/maa/Download/dmn/memos00.html>, phone 725-1345, TDD 1-800-848-5429, fax (360) 753-7315, e-mail <mailto:MYERSEA@dshs.wa.gov>.

RULES OF COURT
STATE SUPREME COURT

[December 11, 2000]

IN THE MATTER OF THE ADOPTION) ORDER
 OF PROPOSED NEW ARLJ 11) NO. 25700-A-692

The District and Municipal Court Judges' Association having recommended the adoption of proposed New ARLJ 11, as amended, and the Court having approved the proposed new rule for publication;

Now, therefore, it is hereby

ORDERED:

(a) That pursuant to the provisions of GR 9(f), the proposed new rule as attached hereto is to be published for comment in the Washington Reports, the Washington Register, Washington State Bar Association and Office of the Administrator for the Court's websites in January 2001.

(b) The purpose statement as required by GR 9(d), is published solely for the information of the Bench, Bar and other interested parties.

(c) Comments are to be submitted to the Clerk of the Supreme Court by either U.S. Mail or Internet E-Mail by no later than April 30, 2001. Comments may be sent to the following addresses: P.O. Box 40929, Olympia, Washington 98504-0929, or Lisa.Bausch@courts.wa.gov. Comments submitted by e-mail message must be limited to 1500 words.

DATED at Olympia, Washington this 7th day of December 2000.

Richard P. Guy

CHIEF JUSTICE

GR 9 COVER SHEET

Proposed Rule 11

Administrative Rules for Courts of Limited Jurisdiction
 (ARLJ)

Misdemeanant Probation Department

(1) **Background.** This proposed rule is initiated by the Office of the Administrator for the Courts pursuant to Legislative mandate. RCW 10.64.120 states that the Office of the Administrator for the Courts (OAC) "shall define a probation department and adopt rules for the qualifications of probation officers based on occupational and educational requirements developed by an oversight committee." The oversight committee consisted of a representative of the District and Municipal Court Judges' Association, the Misdemeanant Corrections Association, the OAC, and the associations of cities and counties. In addition, the proposed rule resolves an issue discussed in the Washington State: Courts of Limited Jurisdiction Assessment Survey Report 1995-1997 (also known as the Wilson Report) regarding what entities are authorized to collect statutory probation services fees. This issue has increased in importance due to the Supreme Court's

ruling in Hertog v. City of Seattle, 138 Washington 2d 265, 979 P.2d 265 (1999).

(2) **Purpose.** The 1996 Washington State Legislature mandated that the OAC adopt rules relating to the operation of local misdemeanor probation departments. Specifically, RCW 10.64.120, Chapter 298, Laws of 1996, requires that:

the Office of the Administrator for the Courts shall define a probation department and adopt rules for the qualifications of probation officers based on occupational and educational requirements developed by an oversight committee... The oversight committee shall consider qualifications that provide the training and education necessary to (a) conduct presentencing and post-sentencing background investigations, including sentencing recommendations to the court regarding jail terms, alternatives to incarceration, and conditions of release; and (b) provide ongoing supervision and assessment of offenders' needs and the risk they pose to the community.

Pursuant to this statute, the OAC established the Misdemeanant Probation Oversight Committee in October 1996. The oversight committee met five times during 1996 and 1997. The statute requires the oversight committee to define a misdemeanor probation department and recommend a detailed list of qualifications for the position of probation officer.

The rule is proposed as an administrative rule for limited jurisdiction courts, because the definition and qualifications relate only to the internal structures and operations of the courts. Judges, court staff, and attorneys have historically relied on the administrative rules to contain a comprehensive list of procedures for a given area. As a result, the proposed rule contains more details than typically found in a general rule or a criminal rule.

The rule defines a misdemeanor probation department based on the type of services offered. Misdemeanant probation departments vary tremendously in the types of services offered and the method of delivering those services. In recognition of this fact, the presiding judge of the local court is granted authority under the rule to determine what services will be offered and how they will be delivered. Nevertheless, a department is still required to structure its services so that it will assist the court in the management of criminal justice with the intent of aiding in the preservation of public order and safety.

The oversight committee acknowledged that staff with higher levels of training and education should perform certain types of services. To ensure that appropriately qualified staff performs probation services, the oversight committee has divided typical probation services into two categories: (1) professional, and (2) clerical. Under the rule, staff may only perform core services that they are qualified to perform. Although, the rule does not require misdemeanor probation departments to employ professional staff (i.e. a probation officer), probation departments organized without a probation officer would be limited under the rule to performing only clerical type services.

The Legislature specifically required the OAC to adopt rules, which set the training and education qualifications for probation officers. Once again, the detail in the rule is some-

what extensive; however, the detail is mandated. In setting the qualifications for probation officers, the Legislature required the oversight committee to consider certain tasks that are likely to be performed by probation officers, such as pre-sentence background investigations and offender risk assessments. Following this mandate, the oversight committee has set forth specific educational and training requirements for probation officers based on this criteria, the qualifications utilized by county and city probation departments, and the Washington State Department of Corrections for its community corrections officers. The qualifications under this rule are waived for individuals previously employed as probation officers for two years prior to the effective date of the rule.

To emphasize the differences between probation officers and other probation staff, the oversight committee has also set forth a list of core services and qualifications for probation clerical staff.

In summary, the rule defines what constitutes a misdemeanor probation department under the statute. In addition, the rule establishes the types of services that may only be performed by professional probation officers, as opposed to clerical staff, and it establishes the education and training requirements for both probation officers and probation clerks.

(3) Washington State Bar Association Action. None.

(4) Supporting Material. Attached is a letter from the oversight committee in support of the proposed rule, a copy of the proposed rule, and a copy of RCW 10.64.120.

(5) Spokesperson. Mary McQueen, Office of the Administrator for the Courts, 1206 S. Quince St., P.O. Box 41170, Olympia Washington 98504-1170, (360) 357-2120; and The Honorable Janis Whitener-Moberg, President of the District and Municipal Court Judges' Association, 35 C St. N.W., P.O. Box 37, Ephrata, Washington 98823-0037, (509) 754-2011, ext. 379.

(6) Hearing. A hearing is not recommended.

Proposed Rule 11

Administrative Rules for Courts of Limited Jurisdiction (ARLJ)

Misdemeanant Probation Department

RULE 11 PROBATION DEPARTMENT

RULE 11.1 DEFINITION

A misdemeanor probation department, if a court elects to establish one, is an entity that provides services designed to assist the court in the management of criminal justice and thereby aid in the preservation of public order and safety. This entity may consist of probation officers and probation clerks. The method of providing these services shall be established by the presiding judge of the local court to meet the specific needs of the court.

RULE 11.2 QUALIFICATIONS AND CORE SERVICES OF PROBATION DEPARTMENT PERSONNEL

(a) Probation Officer Qualifications.

(1) A minimum of a bachelor of arts or bachelor of science degree that provides the necessary education and skills in dealing with complex legal and human issues, as well as competence in making decisions and using discretionary judgment. A course of study in sociology, psychology, or criminal justice is preferred.

(2) Counseling skills necessary to evaluate and act on offender crisis, assess offender needs, motivate offenders, and make recommendations to the court.

(3) Education and training necessary to communicate effectively, both orally and in writing, to interview and counsel offenders with a wide variety of offender problems, including but not limited to alcoholism, domestic violence, mental illness, sexual deviancy; to testify in court, to communicate with referral resources, and to prepare legal documents and reports.

(4) Anyone not meeting the above qualifications and having competently held the position of probation officer for the past two years shall be deemed to have met the qualifications.

(b) Probation Officer – Core Services.

(1) Conduct pre/post-sentence investigations with face to face interviews and extensive research that includes but is not limited to criminal history, contact with victims, personal history, social and economic needs, community resource needs, counseling/treatment needs, work history, family and employer support, and complete written pre/post-sentence reports, which includes sentencing recommendations to the court.

(2) For offenders referred to the misdemeanor probation department, determine their risk to the community using a standardized classification system with a minimum of monthly face to face interviews for offenders classified at the highest level.

(3) Evaluate offenders' social problems, amenability to different types of treatment programs, and determine appropriate referral.

(4) Supervise offenders with face to face interviews depending on risk classification system.

(5) Oversee community agencies providing services required of offenders with input to the judicial officer (e.g. alcohol/drug, domestic violence, sexual deviancy, and mental illness).

(6) Other Duties. The core services listed under both probation officer and probation clerk are not meant to exclude other duties that may be performed by either classification of employee or other court clerical staff, such as record checks, calendaring court proceedings, and accounting of fees.

(c) Probation Clerk Qualifications.

(1) High school or equivalent diploma.

(2) Efficient in all facets of basic clerical skills including but not limited to keyboarding, computer familiarity and competence, filing, and positive public interaction.

(3) Above average ability in dealing with stress and difficult clients.

(4) Ability to complete and perform multi-task assignments.

(d) Probation Clerk – Core Services.

(1) Monitor compliance of treatment obligations with professional treatment providers.

(2) Report offender non-compliance with conditions of sentence to the court.

(3) Coordinate treatment referral information, and monitor community agencies for statutory reporting compliance.

(4) Anyone not meeting the above qualifications and having held the position of probation clerk for the past two years shall be deemed to have met the qualifications.

(5) Other Duties. The core services listed under both probation officer and probation clerk are not meant to exclude other duties that may be performed by either classification of employee or other court clerical staff, such as record checks, calendaring court proceedings, and accounting of fees.

RULE 11.3 STATUTORY PROBATION SERVICE FEES TO BE USED FOR PROBATION SERVICES

All positions, which are funded by statutory probation service fees, shall be limited to working with individuals or cases who are on probation. Any additional funds raised from statutory probation services fees beyond what is necessary to fund the positions in the probation department shall be used to provide additional levels of probation services.

Reviser's note: The typographical error in the above material occurred in the copy filed by the State Supreme Court and appears in the Register pursuant to the requirements of RCW 34.08.040.

MISC.

GR 9 COVER SHEET

Suggested Amendment

[New Section.]

CrR 3.3 (j)

TIME FOR TRIAL

(A) Name of Proponent: Superior Court Judges' Association.

(B) Spokesperson: Judge Salvatore "Sam" F. Cozza, Chair, SCJA Criminal Law and Rules Committee.

(C) Purpose: The rules governing criminal procedure in the superior courts do not contain a specific provision for a waiver by the defendant of the right to a speedy trial, even though this is a common feature of criminal practice. This suggested new section provides for such a waiver and requires that the waiver be to a date certain or for a specified period of days.

There is some evidence that this provision was inadvertently omitted during a general revision of the rules in 1995. (See 4A Orland and Tegland, Wash. Prac.: CrR 3.3, Author's Comments, pp. 170-172.)

The companion rule for the courts of limited jurisdiction includes such a waiver, although not in identical language. The rule for the courts of limited jurisdiction, CrRLJ 3.3(j), allows both the defendant and his or her attorney, acting with express authority, to waive the defendant's right to a speedy trial.

The suggested rule for the superior court allows only the defendant to waive his or her right to a speedy trial. This makes it less likely that a question will arise later in the proceedings about whether the defendant actually agreed to the waiver of his or her right to a speedy trial.

(D) Hearing: None recommended.

(E) Expedited Consideration: Not requested.

SUGGESTED AMENDMENT

[NEW SECTION]

CrR 3.3 (j)

TIME FOR TRIAL

(a) - (i) [Unchanged.]

(j) Waiver. A defendant may waive his or her time for trial rights. A waiver shall be in writing and shall be signed by the defendant. The waiver shall be to a date certain beyond the current expiration date as calculated pursuant to this rule or for a period of days beyond the current expiration date.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

CHIEF JUSTICE

GR 9 COVER SHEET

Suggested Amendment RULES FOR LAWYER DISCIPLINE (RLD)

New Title 14 to Implement a Program of Diversion And supporting amendments to RLD 2.6, RLD 2.9 & RLD 11.1

(hearing not recommended)

Submitted by the Board of Governors of the Washington
State Bar Association

A. Name of Proponent: The Washington State Bar Association.

B. Spokespersons:

- Jan Eric Peterson, President, Washington State Bar Association, 1501 Fourth Avenue, Suite 2600, Seattle, WA 98101-1664 (telephone 206-624-6800) (e-mail janeric@pypfz.com).
- Randy Beitel, Senior Disciplinary Counsel, Washington State Bar Association, 2101 Fourth Avenue, 4th Floor, Seattle, WA 98121-2330 (telephone 206-727-8257) (e-mail randyb@wsba.org).

C. Purpose: A new Title 14 is suggested to implement a Program of Diversion whereby instances of less serious misconduct by a lawyer may be diverted from a traditional disciplinary prosecution to appropriate corrective, ameliorative, and rehabilitative alternatives to disciplinary action. These alternatives may include fee arbitration, arbitration, mediation, law office management assistance, lawyer assistance programs, psychological and behavioral counseling, monitoring, restitution, continuing legal education programs, or any other

program or corrective course of action agreed upon by disciplinary counsel and respondent to address respondent's misconduct.

In 1997 at the recommendation of the Joint Task Force on Lawyer Discipline (1994) and the Washington State Bar Association Board of Governors, the rule authorizing the Bar Association to administer the system of lawyer discipline was amended to include authorization for "diverting less serious misconduct to alternatives outside the formal discipline system." GR 12(b)(6). Based on that authorization, the Board of Governors' Discipline Committee examined the diversion provisions in the American Bar Association's Model Rules for Lawyer Disciplinary Enforcement (3rd ed., 1996) as well as the diversion systems currently in place in a number of other jurisdictions including Arizona, Colorado, Illinois, Michigan, New York, Missouri and Florida. Many of these jurisdictions operate diversion programs based on the ABA Model Rules, and after considering the various options, the Board of Governors seeks to implement a program closely modeled after the ABA Model Rules.

Diversion is a strictly voluntary program. Under the suggested rules, a disciplinary grievance may be diverted only when it involves "less serious misconduct" as defined by suggested RLD 14.2, and only after the grievant is given a reasonable opportunity to comment. Under the suggested rules, diversion is accomplished by the respondent lawyer and disciplinary counsel negotiating a written diversion contract setting forth the terms of the diversion. The terms will vary depending on the circumstances of the misconduct. If the diversion terms are breached, the matter is returned to the traditional discipline process. If the terms of the contract are fulfilled, the grievance is dismissed. A disciplinary grievance, not otherwise made public, remains confidential when diverted.

In addition to a new RLD Title 14, amendments are suggested to RLD 2.6 regarding Disciplinary Counsel's role in administering diversion, RLD 2.9 regarding notification to the grievant of a proposal to divert the grievance, and RLD 11.1 regarding the confidentiality of the diversion contract and supporting documents.

D. Hearing: A hearing is not recommended.

E. Expedited Consideration: Circumstances do not require expedited consideration of these proposed rule amendments.

Supporting Information

Attached as supporting information are:

- Section by section rule comments approved by the Washington State Bar Association Board of Governors upon recommendation of the suggested rule amendments to the Supreme Court.
- A Sample Diversion Contract as anticipated under the suggested rule amendment.
- A Sample Diversion Affidavit as anticipated under the suggested rule amendment.
- A Sample Information Sheet to inform grievants about diversion.

- Relevant excerpts from ABA Model Rules for Disciplinary Enforcement (3rd Ed., 1996).

SUGGESTED AMENDMENT

RULES FOR LAWYER DISCIPLINE (RLD)

NEW TITLE 14 TO IMPLEMENT A PROGRAM OF DIVERSION

[NEW TITLE]

TITLE 14 DIVERSION

[NEW SECTION]

RULE 14.1 REFERRAL TO DIVERSION. In a matter involving less serious misconduct as defined in rule 14.2, prior to the filing of a formal complaint, disciplinary counsel may refer a respondent lawyer to diversion. Diversion may include fee arbitration, arbitration, mediation, law office management assistance, lawyer assistance programs, psychological and behavioral counseling, monitoring, restitution, continuing legal education programs, or any other program or corrective course of action agreed upon by disciplinary counsel and respondent to address respondent's misconduct.

[NEW SECTION]

RULE 14.2 LESS SERIOUS MISCONDUCT. Less serious misconduct is conduct that does not warrant a sanction restricting the respondent's license to practice law. Conduct shall not ordinarily be considered less serious misconduct if any of the following considerations apply:

- the misconduct involves the misappropriation of funds;
- the misconduct results in or is likely to result in substantial prejudice to a client or other person, absent adequate provisions for restitution being made;
- the respondent has been publicly disciplined in the last three years;
- the misconduct is of the same nature as misconduct for which the respondent has been publicly disciplined in the last five years;
- the misconduct involves dishonesty, deceit, fraud or misrepresentation by the respondent;
- the misconduct constitutes a "serious crime" as defined in rule 3.1(i);
- the misconduct is part of a pattern of similar misconduct.

[NEW SECTION]

RULE 14.3 NOTICE TO GRIEVANT. Pursuant to rule 2.9(a)(8), the grievant, if any, shall be notified of disciplinary counsel's proposed decision to refer the respondent to diversion, and shall have a reasonable opportunity to submit to disciplinary counsel a written comment thereon. The grievant shall be notified when the grievance is diverted and when the

grievance is dismissed upon completion of diversion. Such decisions to divert or dismiss are not appealable.

[NEW SECTION]

RULE 14.4 FACTORS FOR DIVERSION. The following factors shall be considered by disciplinary counsel in determining whether to refer a respondent to diversion:

- whether the presumptive sanction under the ABA Standards for Imposing Lawyer Sanctions for the violations raised by the grievance or grievances is likely to be no more severe than reprimand, censure or admonition;
- whether participation in diversion is likely to improve the future professional conduct of the respondent and accomplish the goals of lawyer discipline;
- whether aggravating or mitigating factors exist; and
- whether diversion was already tried.

[NEW SECTION]

RULE 14.5 DIVERSION CONTRACT. Disciplinary counsel and the respondent shall negotiate a contract, the terms of which shall be tailored to the individual circumstances. In each case, the contract shall be signed by the respondent and disciplinary counsel. The contract shall set forth the terms and conditions of the plan for the respondent and, if appropriate, shall identify the use of a practice monitor and/or a recovery monitor and the responsibilities of any monitor. The contract shall provide for oversight of fulfillment of the contract terms. Oversight includes reporting of any alleged breach of the contract to disciplinary counsel. The contract shall also provide that the respondent will pay all costs incurred in connection with the contract. The contract may also provide that the respondent will pay the costs associated with the disciplinary grievances to be deferred. The contract shall include a specific acknowledgment that a material violation of a term of the contract renders the respondent's participation in diversion as to the allegations of misconduct in the grievance voidable by disciplinary counsel. The contract may be amended upon agreement of the respondent and disciplinary counsel. If a recovery monitor is assigned, the contract shall include respondent's limited waiver of confidentiality permitting the recovery monitor to make appropriate disclosures in order to fulfill the monitor's duties under the contract.

[NEW SECTION]

RULE 14.6 AFFIDAVIT SUPPORTING DIVERSION. A diversion contract must be supported by the respondent's affidavit or declaration as approved by disciplinary counsel setting forth the respondent's misconduct related to the grievance or grievances to be held in abeyance under this rule, which affidavit or declaration, in the event of termination of the diversion contract due to a material breach of the diversion contract will be admissible into evidence in any ensuing disciplinary proceeding and may be made available to the review committee or the Board considering the grievance. Unless admitted into evidence at a disciplinary hearing, the affidavit or declaration will remain confidential and will not be provided to the grievant or any other individual outside the Office of Disciplinary Counsel.

[NEW SECTION]

RULE 14.7 EFFECT OF NON-PARTICIPATION IN DIVERSION. The respondent has the right to decline disciplinary counsel's offer to participate in diversion. If the respondent chooses not to participate, the matter will proceed as though no referral to diversion had been made.

[NEW SECTION]

RULE 14.8 STATUS OF GRIEVANCE. After a diversion contract is executed by the respondent and disciplinary counsel, the disciplinary grievance shall be held in abeyance pending successful completion of the terms of the contract.

[NEW SECTION]

RULE 14.9 TERMINATION OF DIVERSION.

(a) Fulfillment of the Contract. The contract is terminated when respondent has fulfilled the terms of the contract and submits to disciplinary counsel an affidavit or declaration demonstrating the same. Upon receipt of such affidavit or declaration, disciplinary will acknowledge receipt and either dismiss any grievances held in abeyance pending successful completion of the contract, or give notice to respondent that fulfillment of the contract is disputed. Such a dismissal is not appealable by the grievant. Successful completion of the contract constitutes a bar to any further disciplinary proceedings based upon the same allegations.

(b) Material Breach. A material breach of the contract shall be cause for termination of respondent's diversion. After a material breach, disciplinary counsel will give respondent notice of termination from diversion and disciplinary proceedings may be instituted, resumed or reinstated.

(c) Review by the Chairperson. Disputes regarding fulfillment of the terms of the contract and/or material breach of the contract may be reviewed by the chairperson of the Board upon the request of the respondent or disciplinary counsel. Such request must be filed with the Board within 15 days of notice to respondent of the determination for which review is sought. Determinations by the chairperson under this section shall be final and the matters determined shall not be reviewable in any proceeding.

Supporting Amendments to Rules for Lawyer Discipline 2.6, 2.9 & 11.1

RULE 2.6 DISCIPLINARY COUNSEL

(a) No Change.

(b) No Change.

(c) No Change.

(d) No Change.

(e) Diversion. Disciplinary counsel shall have the authority to determine pursuant to rule 14.1 those grievances appropriate for diversion, after giving notice to any grievants pursuant to rule 2.9(a)(8). Disciplinary counsel shall have the authority to negotiate and execute diversion contracts, to monitor and determine compliance with the terms of diversion contracts and to determine fulfillment of or any material breach of diversion contracts, subject to the review authorized by rule 14.9.

RULE 2.9 GRIEVANT

(a) Rights. Any person filing a grievance with the Association alleging an act of misconduct by a lawyer shall have the right to:

(1) Be advised promptly of the receipt of the grievance, and of the name, address and office phone number of the person assigned to its investigation if such an assignment is made;

(2) Request reconsideration by a review committee of a dismissal of the grievance by disciplinary counsel by serving upon the Association a request for review within 45 days of mailing of the notice of dismissal, or reconsideration, when the chairperson of the Board so directs, by the Board of a dismissal of the grievance by a review committee by serving upon the Association a request for review within 45 days of mailing of the notice of dismissal by a review committee;

(3) Have a reasonable opportunity to speak with the investigator assigned to the grievance, by telephone or in person, concerning the substance of the grievance or its status;

(4) Receive a copy of any response submitted by the lawyer against whom a grievance is filed, except when that response makes reference to confidences or secrets of a client of the lawyer to which the grievant is not privy, or contains information of a personal and private nature regarding the lawyer, or when a review committee determines that the interests of justice would better be served if the response is not released;

(5) Submit additional supplemental written information or documentation at any time;

(6) Attend any hearing conducted into the grievance, subject to the applicable rules of evidence and any protective order issued pursuant to rule 11.1 (g);

(7) Testify as a witness at any hearing conducted into the grievance, subject to the applicable rules of evidence and any protective order issued pursuant to rule 11.1 (g);

(8) Be notified of any proposed decision to refer the respondent to diversion and be given a reasonable opportunity to submit to disciplinary counsel a written comment thereon;

~~(8)~~ **(9) Be advised of the disposition of the grievance.**

WSR 01-01-056
RULES OF COURT
STATE SUPREME COURT
[December 7, 2000]

(p) No Change.

(q) No Change.

(r) Diversion Contracts. Diversion contracts and supporting affidavits and declarations under rules 14.5 & 14.6 are confidential, not withstanding the provisions of subsection (c), unless admitted into evidence in a disciplinary proceeding following a termination of the diversion contract based on a material breach of the diversion contract. When a matter that has previously become public under rule 11.1(c) is diverted by execution of a diversion contract, that contract and the supporting documents will remain confidential but the fact that the matter has been diverted from discipline will be public information.

(s) Regulations. Public access to file materials and proceedings as permitted by this rule may be subject to reasonable regulation as to time, place and circumstances. Certified copies of public bar file documents shall be made available at the same rate as certified copies of superior court records. Uncertified copies of public bar file documents shall be made available at a rate to be set by the Executive Director of the Association.

(t) Release to Lawyers' Fund for Client Protection. Nothing in these rules shall prohibit the release of information obtained during the course of an investigation to the Lawyers' Fund for Client Protection concerning applications which are pending before it. The Fund shall treat such information as confidential unless release is authorized by this rule or the Executive Director.

(u) Wrongful Disclosure. Disclosure, except as permitted by these rules, by any person involved with an investigation or proceeding, either as an officer or agent of the Association (including, but not limited to, its staff, members of the Board of Governors, the Disciplinary Board, a review committee, hearing panels, hearing officers, disciplinary counsel, special district counsel, a lawyer appointed pursuant to rule 8.6, or any other individual acting under authority of these rules) of any information concerning a pending or completed investigation or proceeding, except as permitted by these rules, may subject that person to an action for contempt of the Supreme Court. When the person is also a lawyer, such wrongful disclosure may also be grounds for discipline.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The typographical errors in the above material occurred in the copy filed by the State Supreme Court and appear in the Register pursuant to the requirements of RCW 34.08.040.

IN THE MATTER OF THE ADOPTION) ORDER
OF THE AMENDMENTS TO CrR 6.4(c)) NO. 25700-A-697
AND (e), CrR 6.11(a), CrR 6.12(b) AND)
(d), CrR 6.13(a), CrR 6.14, CrR 6.16(c),)
CrR 7.5 AND CrR 7.6(a))

The Superior Court Judges' Association having recommended the adoption of the proposed amendments to CrR 6.4(c) and (e), CrR 6.11(a), CrR 6.12(b) and (d), CrR 6.13(a), CrR 6.14, CrR 6.16(c), CrR 7.5 and CrR 7.6(a), and the Court having determined that the proposed amendments will aid in the prompt and orderly administration of justice and further determined that an emergency exists which necessitates an early adoption;

Now, therefore, it is hereby

ORDERED:

(a) That the amendments as attached hereto are adopted.

(b) That pursuant to the emergency provisions of GR 9(i), the amendments will be published expeditiously and become effective upon publication.

DATED at Olympia, Washington this 7th day of December 2000.

SUGGESTED AMENDMENTS

CrR 6.4 (c) and (e)

CHALLENGES

(a) - (b) [Unchanged.]

(c) Challenges for Cause.

(1) If the judge after examination of any juror is of the opinion that grounds for challenge are present, he or she shall excuse that juror from the trial of the case. If the judge does not excuse the juror, any party may challenge the juror for cause.

(2) RCW 4.44.150 through 4.44.200 shall govern challenges for cause.

(d) [Unchanged.]

(e) Peremptory Challenges.

(1) Peremptory Challenges Defined. A peremptory challenge is an objection to a juror for which there is no reason given, but upon which the court shall exclude him the juror. In prosecutions for capital offenses the defense and the state

MISC.

may challenge peremptorily 12 jurors each; in prosecution for offenses punishable by imprisonment in a ~~penitentiary~~ the state Department of Corrections 6 jurors each; in all other prosecutions, 3 jurors each. When several defendants are on trial together, each defendant shall be entitled to one challenge in addition to the number of challenges provided above, with discretion in the trial judge to afford the prosecution such additional challenges as circumstances warrant.

(2) *Peremptory Challenges-How Taken.* After prospective jurors have been passed for cause, peremptory challenges shall be exercised alternately first by the prosecution then by each defendant until the peremptory challenges are exhausted or the jury accepted. Acceptance of the jury as presently constituted shall not waive any remaining peremptory challenges to jurors subsequently called.

SUGGESTED AMENDMENT

CrR 6.11 (a)

JUDGE-DISABILITY

(a) **Disability of Judge During Jury Trial.** If, before the judge submits the case to the jury, he or she is unable to continue with the trial, any other judge assigned to or regularly sitting in the court, upon ~~familiarizing himself~~ becoming familiar with the record of the trial, may proceed with the trial. Upon defendant's objection to the replacement, a mistrial shall be granted. If, after the judge submits the case to the jury, he or she is unable to continue, the case shall proceed before another judge.

(b) [Unchanged.]

SUGGESTED AMENDMENTS

CrR 6.12 (b) and (d)

WITNESSES

(a) [Unchanged.]

(b) **When Excused.** A witness subpoenaed to attend in a criminal case is dismissed and excused from further attendance as soon as he or she has given his or her testimony-in-chief and has been cross-examined thereon, unless either party makes requests in open court that the witness remain in attendance; and witness fees will not be allowed any witness after the day on which his or her testimony is given, except when the witness has in open court been required to remain in further attendance, and when so required the clerk shall note that fact in his or her journal.

(c) [Unchanged.]

(d) **Not Excluded on Grounds of Interest.** No person offered as a witness shall be excluded from giving evidence by reason of his or her interest in the result of the action, as a party thereto or otherwise, but such interest may be shown to affect his or her credibility.

SUGGESTED AMENDMENT

CrR 6.13 (a)

TESTIMONY IN LIEU OF WITNESSES

(a) **Deposition.** Upon a determination that the testimony of a witness is material, and that it appears probable that the witness will not voluntarily appear at the trial, the court may order the taking of his or her deposition. Pending the taking of the deposition the provisions of CrR 3.2 shall apply.

(b) [Unchanged.]

SUGGESTED AMENDMENT

CrR 6.14

IMMUNITY

In any case the court on motion of the prosecuting attorney may order that a witness shall not be excused from giving testimony or producing any papers, documents or things, on the ground that ~~his~~ such testimony may tend to incriminate or subject ~~him~~ the witness to a penalty or forfeiture; but ~~he~~ the witness shall not be prosecuted or subjected to criminal penalty or forfeiture for or on account of any transaction, matter, or fact concerning which ~~he~~ the witness has been ordered to testify pursuant to this rule. ~~He~~ The witness may nevertheless be prosecuted for failing to comply with the order to answer, or for perjury or the giving of false evidence.

SUGGESTED AMENDMENT

CrR 6.16 (c)

VERDICTS AND FINDINGS

(a) and (b) [Unchanged.]

(c) **Forms.**

(1) *Verdict.* The verdict of the jury may be in substantially the following form:

We, the jury, find the defendant guilty [or not guilty] of the crime of _____ as charged in count number _____.

Signature of ~~Foreman~~ Presiding Juror

(2) *Special Findings.* Special findings may be substantially in the following form:

Was the defendant (name) armed with a deadly weapon at the time of the commission of the crime charged in count number _____?

Yes () No ()

SUGGESTED AMENDMENT

CrR 7.5 6

PROBATION

(a) [Unchanged.]

(b) [Unchanged.]

SUGGESTED AMENDMENT

CrR 7.6 5

NEW TRIAL

(a) Grounds for New Trial. The court on motion of a defendant may grant a new trial for any one of the following causes when it affirmatively appears that a substantial right of the defendant was materially affected:

- (1) Receipt by the jury of any evidence, paper, document or book not allowed by the court;
(2) Misconduct of the prosecution or jury;
(3) Newly discovered evidence material for the defendant, which he the defendant could not have discovered with reasonable diligence and produced at the trial;
(4) Accident or surprise;
(5) Irregularity in the proceedings of the court, jury or prosecution, or any order of court, or abuse of discretion, by which the defendant was prevented from having a fair trial;
(6) Error of law occurring at the trial and objected to at the time by the defendant;
(7) That the verdict or decision is contrary to law and the evidence;
(8) That substantial justice has not been done.

When the motion is based on matters outside the record, the facts shall be shown by affidavit.

Reviser's note: The typographical errors in the above material occurred in the copy filed by the State Supreme Court and appear in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

WSR 01-01-076
OFFICE OF
INSURANCE COMMISSIONER

[Filed December 13, 2000, 3:34 p.m.]

TECHNICAL ASSISTANCE ADVISORY
 TAA 2000-07

TO: Health Care Service Contractors, Health Maintenance Organizations, and Active A&H and Group Disability Insurers.

SUBJECT: Individual and Small Group Filings.

DATE: December 13, 2000.

This technical assistance advisory (TAA) replaces TAA 96-01, issued on September 20, 1996. It replies to questions that may arise in preparing future form and rate filings.

1. Question: Historically, insurance carriers have been able to charge a different premium for spouses of subscribers than for subscribers. Can carriers do that now?

Answer: For health care service contractors (HCSCs), RCW 48.44.022 (1)(a) and 48.44.023 (3)(a) state that premium rates for individual and small group health benefit plans are based on an adjusted community rate which may be adjusted only for geographic area, family size, age, and wellness activities.

For health maintenance organizations (HMOs), RCW 48.46.064 (1)(a) and 48.46.066 (3)(a) set the same standards.

For disability insurers, the applicable statutes are RCW 48.20.028 (1)(a) and 48.21.045 (3)(a).

These statutes do not allow any variation from community rating for any reason other than those listed. In the group market, the spouse's insurance coverage is via the family contract of the employee/subscriber. Therefore, the subscriber/spouse rates are considered to be a family-size issue. However, the rates for the subscriber/spouse must be based on sound factors and must not be in violation of the community rating (pooling) requirements of the statutes cited above.

2. Question: Are "wellness activities" and "wellness factors" the same thing? If they are, what are they?

Answer: Wellness activities and wellness factors are the same thing. For the purposes of this discussion, they are defined at RCW 48.43.005(25) as "...an explicit program of an activity consistent with department of health guidelines, such as, smoking cessation, injury and accident prevention, reduction of alcohol misuse, appropriate weight reduction, exercise, automobile and motorcycle safety, blood cholesterol reduction, and nutrition education for the purpose of improving enrollee health status and reducing health service costs." This definition applies to HCSCs, HMOs, and disability insurers equally. The Department of Health has written *Washington State Wellness Guidelines*, which expands upon the statute.

RCW 48.44.022 (1)(e), 48.44.023 (3)(e), 48.46.064 (1)(e), 48.46.066 (3)(e), 48.20.028 (1)(e), and 48.21.045 (3)(e) permit a discount for wellness activities to reflect actuarially justified differences in utilization or cost attributed to such programs. This discount is not to exceed 20%.

The wellness factors in Washington statutes allow carriers to ask questions of individuals and small groups in order to qualify them for discounts. However, these questions must not be framed in such a way as to amount to the application of underwriting penalties. Additionally, while much of the *Washington State Wellness Guidelines* is directed to company-sponsored programs, such as employee assistance programs (EAPs), the guidelines state that they are applicable to individual policyholders as well. For groups, the discount must apply to the entire group and may not be applied on an employee-by-employee basis. As an example, a carrier may use a "Drug Free Workplace" to provide discounting for wellness factors for a small group, but may not give a per-employee nonsmoker discount. An individual policyholder, on the other hand, could receive a discount for being a nonsmoker.

3. Question: What is the policy on frequency of individual and small group rate filings?

Answer: "The rate charged for a health benefit plan offered under this section may not be adjusted more frequently than annually," according to RCW 48.44.022 (1)(f), 48.44.023 (3)(f), 48.46.064 (1)(f), 48.46.066 (3)(f), 48.20.028 (1)(f), and 48.21.045 (3)(f). These statutes allow the commissioner to accept only one rate filing for individual and small group plans annually. *Annually* is defined as a period of twelve months from the effective date of the last rate filing; filed rates for any policy must be guaranteed for at least one full policy year.

The annual filing may include rates for renewal and new business that account for the effect of trend on a shorter-than-annual basis. Rates for these filings may be varied on an annual, semi-annual, quarterly, or monthly basis. If the carrier prefers to vary rates based on effective dates, rather than annually, the carrier should prefile the monthly, quarterly, or semiannual effective date factors in the annual filing for specific group renewal and new business during the designated twelve month period. To illustrate, if a carrier needed to charge an average of \$100 per month for all contracts renewing throughout the year, it would be permissible to file effective

rates of \$99.04 for policies renewing in the first quarter, \$99.68 for policies renewing in the second quarter, \$100.32 for policies renewing in the third quarter, and \$100.97 for policies renewing in the fourth quarter. It would also be permissible to vary rates for policies renewing (or being issued) in a similar manner for the month or half-year during which the issue or renewal takes place.

A carrier may not make monthly or quarterly filings to adjust the annual rate except under extraordinary circumstances in which the commissioner expressly grants this authority.

If the carrier fails to make an annual filing, the renewal rates will be identical to rates last charged to the group being renewed. New business rates would be those last charged to any group plan. To illustrate, suppose a carrier has quarterly premiums of \$100, \$110, \$120, and \$130 and has not submitted a new filing. The new business rate would be \$130, and the renewal rate would be identical to the previous premium charged to a specific group or individual plan.

4. Question: What adjustments for geographic factors are allowed?

Answer: RCW 48.44.022(2), 48.44.023 (3)(i), 48.46.064(2), 48.46.066 (3)(i), 48.20.028(2), and 48.21.045 (3)(i) state that adjusted community rates shall pool the medical experience of all individuals or groups purchasing coverage. The geographic factors must be based on credible data or a large study. A carrier must not base its geographic factors on its own experience by geographic area; that would violate the pooling requirements of community rating.

5. Question: Is it possible to make relativity adjustments between plans?

Answer: A carrier may adjust the benefit relativities based on the deductible leverage or other reasonable causes. A carrier must not adjust the benefit relativity of a health benefit plan based on that individual plan's experience; that would violate the pooling requirements of community rating.

6. Question: What children's rates are allowed?

Answer: RCW 48.44.022 (1)(b), 48.46.064 (1)(b), and 48.20.028 (1)(b) state that individuals under age twenty shall be treated as those age twenty. Therefore, all dependent children under age twenty enrolled in the same individual benefit plan must be charged the same rate. RCW 48.44.023 (3)(b), 48.46.066 (3)(b), and 48.21.045 (3)(b) state that employees under age twenty shall be treated as those age twenty. Although the statutes cited with respect to small group plans address only employee rates for under age twenty and do not specifically address individual/child rates, the Office of Insurance Commissioner takes the position that the small group community rate statutes mirror the individual community rate statutes. Therefore, all dependent children under age twenty enrolled in the same small group benefit plan must be charged the same rate.

7. Question: Must all small group products be offered to all small groups?

Answer: Yes, carriers must not develop small group products that are not offered to all groups under fifty.

Finally, as a reminder: As of January 1, 2000, in accordance with RCW 48.20.028 (1)(d), 48.21.045 (3)(d),

48.44.022 (1)(d), 48.44.023 (3)(d), 48.46.064 (1)(d), and 48.46.066 (3)(d), the highest permitted rates for any group shall be no more than 375% of the lowest rates.

WSR 01-01-090

DEPARTMENT OF AGRICULTURE

[Filed December 15, 2000, 9:46 a.m.]

**BEFORE THE DIRECTOR OF AGRICULTURE
STATE OF WASHINGTON**

In the matter of the request) Chapter 16-580 WAC
to terminate The Washing-)
ton Farmed Salmon Com-) FINDINGS OF FACT, CONCLUSION
mission) OF LAW, AND FINAL DECISION
)

This matter came before the Director of the Washington State Department of Agriculture (WSDA) pursuant to a request filed by affected farmed salmon producers to terminate the Washington Farmed Salmon Commission effective December 31, 2000 under the authority set forth in RCW 15.65.190

I. FINDINGS OF FACT

Based on the facts, the Director makes the following findings:

1. The Washington Farmed Salmon Commission was established in December 1992 under Chapter 16-580 WAC to:

MISC.

1. Establish plans and conduct programs for advertising, labeling, sales, promotion and consumer education programs, and/or create new or larger markets for farmed salmon products;
 2. Provide for research in the production, processing and/or marketing of farmed salmon products;
 3. Provide for marketing information and services to affected producers; and
 4. Investigate and take necessary action to prevent unfair trade practices that hinder marketing of Washington farmed salmon products.
2. Only two companies currently operate and qualify as "producers" under the Commission's marketing order.
3. Because the activities of the Commission no longer effectuates the policies of Chapter 15.65 RCW the producers of the Washington Farmed Salmon Commission submitted a request to the Director that the Director exercise his powers under RCW 15.65.190 to terminate the Washington Farmed Salmon Commission effective December 31, 2000.

II. CONCLUSIONS OF LAW

1. RCW 15.65.050 provides that "*The director shall administer and enforce this chapter and it shall be his duty to carry out its provisions and put them into force in accordance with its terms, but issuance, amendment, modification, suspension and/or termination of marketing agreements and orders and of any terms or provisions thereof shall be accomplished according to the procedures set forth in this chapter and not otherwise...*"
2. RCW 15.65.190 provides that "*Any marketing agreement or order shall be terminated if the director finds that fifty-one percent by numbers and fifty-one percent by volume of production of the affected producers within the affected area favor or assent to such termination. The director may ascertain without compliance with the provisions of RCW 15.65.050 through 15.65.130 whether such termination is so assented to or favored whenever twenty percent by numbers or twenty percent by volume of production of said producers file written application with him for such termination. No such termination shall become effective until the expiration of the marketing season then current.*"
3. The Director concludes that the Washington Farmed Salmon Commission no longer effectuates the policies of Chapter 15.65 RCW and is no longer needed.

III. FINAL DECISION

In consideration of the findings of fact and conclusion of law, the Director enters the following final decision:

The request to terminate the Washington Farmed Salmon Commission effective December 31, 2000 is hereby granted.

DATED this 13th day of December, 2000.

James M. Jesernig
Director of Agriculture

WSR 01-01-094
NOTICE OF PUBLIC MEETINGS
ECONOMIC DEVELOPMENT
FINANCE AUTHORITY
[Memorandum—December 14, 2000]

The Washington Economic Development Finance Authority (WEDFA) is an independent agency (#106) within the executive branch of the state government. The authority has four regular board meetings each year, one per quarter. The authority's meetings are open to the public, and access for persons with disabilities is provided at all meetings of the authority. We would like to have the board meeting schedule for 2001 published in the next issue of the State Register.

All meetings will be held in the Cascadia World Trade Club on the mezzanine level of the main terminal building, SeaTac International Airport, SeaTac, Washington. All meetings will begin at 10 a.m. The meeting dates are: Wednesday, March 7th, Wednesday, June 6th, Wednesday, September 19th, and Wednesday, December 12th.

Please call (206) 587-5634 if you have any questions.

Table of WAC Sections Affected

KEY TO TABLE

This table covers the current calendar year through this issue of the Register and should be used to locate rules amended, adopted, or repealed subsequent to the publication date of the latest WAC or Supplement.

Symbols:

- AMD = Amendment of existing section
- A/R = Amending and recodifying a section
- DECOD = Decodification of an existing section
- NEW = New section not previously codified
- OBJECT = Notice of objection by Joint Administrative Rules Review Committee
- PREP = Preproposal comments
- RE-AD = Readoption of existing section
- RECOD = Recodification of previously codified section
- REP = Repeal of existing section
- RESCIND = Rescind of existing section
- REVIEW = Review of previously adopted rule
- SUSP = Suspending an existing section

Suffixes:

- C = Continuance of previous proposal
- E = Emergency action
- P = Proposed action
- S = Supplemental notice
- W = Withdrawal of proposed action
- XA = Expedited adoption
- XR = Expedited repeal
- No suffix means permanent action

WAC # Shows the section number under which an agency rule is or will be codified in the Washington Administrative Code.

WSR # Shows the issue of the Washington State Register where the document may be found; the last three digits identify the document within the issue.

WASHINGTON STATE REGISTER Subscriptions

To: Subscription Clerk
WASHINGTON STATE REGISTER
Code Reviser's Office
PO Box 40552
Olympia, WA 98504-0552
(360) 786-6369

I would like to order _____ subscription(s) to the WASHINGTON STATE REGISTER, at an annual rate of \$210.60, sales tax included (\$195 for state agencies). Enclosed is my check or money order for \$_____. All subscriptions run from January through December. Please start my subscription with the January issue of 2001.

NAME _____

ADDRESS _____

THE WASHINGTON STATE REGISTER, published under RCW 34.08.020, is distributed on the first and third Wednesdays of each month. The Register contains the full text of proposed, emergency, and permanently adopted rules of state agencies, executive orders of the governor, notices of public meetings of state agencies, rules of the state supreme court, summaries of attorney general opinions, and juvenile disposition standards that have been filed in the code reviser's office before the closing date for that issue of the Register. A cumulative table of existing sections of the Washington Administrative Code (WAC) affected by a particular agency action guides the user to the proper issue of the Register.

The code reviser's office has established an annual subscription price of \$195 for a Register subscription, and single copies cost \$8.00. Sales tax of 8.0% applies to all sales other than to state agencies. State law requires payment in advance. To subscribe to the Register, please complete the order form above and forward it to the address indicated, accompanied by your check or money order in the amount of \$210.60 (\$195 for state agencies) payable to the code reviser's office.
