EXPEDITED RULES

DEPARTMENT OF TRANSPORTATION

[Filed May 23, 2007, 9:31 a.m.]

Title of Rule and Other Identifying Information: Chapter 468-34 WAC, Utility lines—Franchises and permits, specifically WAC 468-34-210 Pipelines—Encasement.

NOTICE

THIS RULE IS BEING PROPOSED UNDER AN EXPEDITED RULE-MAKING PROCESS THAT WILL ELIMINATE THE NEED FOR THE AGENCY TO HOLD PUBLIC HEARINGS, PREPARE A SMALL BUSINESS ECONOMIC IMPACT STATEMENT, OR PROVIDE RESPONSES TO THE CRITERIA FOR A SIGNIFICANT LEGISLATIVE RULE. IF YOU OBJECT TO THIS USE OF THE EXPEDITED RULE-MAKING PROCESS, YOU MUST EXPRESS YOUR OBJECTIONS IN WRITING AND THEY MUST BE SENT TO Tom Swafford, Utilities, Railroad, and Agreements Manager, Washington State Department of Transportation, 310 Maple Park Avenue S.E., Olympia, WA 98504-7329, AND RECEIVED BY July 24, 2007.

Purpose of the Proposal and Its Anticipated Effects, Including Any Changes in Existing Rules: The proposed rule change will realize a significant and tangible improvement to natural gas pipeline safety. The modification of WAC 468-34-210 will eliminate mandatory casing requirements for natural gas installations within the state highway system. Technological advancements in pipeline materials, pipeline joining and inspection techniques, cathodic protection, as well as improved construction methods have rendered casing requirements obsolete in most applications. Casings may adversely affect pipeline cathodic protection which can create a detrimental safety condition to both the traveling public and the pipeline owners and operators.

Reasons Supporting Proposal: The revision of WAC 468-34-210 is consistent with Minimum Federal Safety Standards 49 C.F.R., part 192 and chapter 480-93 WAC, Gas companies—Safety. The Washington utilities and transportation commission pipeline safety office also supports the proposed rule change.

Statutory Authority for Adoption: Chapter 47.44 RCW.
Statute Being Implemented: None.

Rule is not necessitated by federal law, federal or state court decision.

Name of Proponent: Northwest Gas Association and Washington state department of transportation (WSDOT), private and public.

Name of Agency Personnel Responsible for Drafting and Implementation: Tom Swafford, HQ Design, 705-7237; and Enforcement: Pasco Bakotich, HQ Design, 705-7231.

Agency Comments or Recommendations, if any, as to Statutory Language, Implementation, Enforcement, and Fiscal Matters: Nonencasement of gas pipelines in certain situations are currently required and require an engineered variance justification which are always approved. This new requirement will alleviate the time and expense of the gas

industry to prepare and save WSDOT engineering review and processing time and money.

~~((d))~~ (3) Casings may be required ~~((for the following conditions.~~

~~((a) As an expediency in the insertion, removal, replacement or maintenance of carrier pipe crossings of freeways and other locations where it is necessary in order to avoid open trench construction.~~

(3) Casings may or may not be required for the following conditions:

(a) Pipelines relocated in advance of highway construction, including those conveying natural or other gas which

meet the design, installation and cathodic protection provisions of the Minimum Federal Safety Standards, CFR 49, Part 192 may be constructed without encasement provided the department (and the pipeline officials) agree that the lines are and will remain structurally sound and operationally safe.

(b) ~~Uncased crossings for local service connections of one inch diameter or less carrying natural or other gas which conform to the design, installation, and cathodic protection provisions of the Minimum Federal Safety Standards, CFR 49, Part 192 may be permitted on two lane highways at those locations where the department agrees that the embankment materials and installation methods are adequate and that complete assurance is provided against damage to the protective coating of the pipe or to the roadway structure.~~

(6) Casing pipes shall be designed to support the load of the highway and superimposed loads thereon and, as a minimum, shall equal the structural requirements for highway drainage facilities. Casings shall be composed of materials of sufficient durability to withstand any conditions to which they may be exposed.
