**NOTICE**

Title or Subject: Medicaid State Plan Amendment (SPA) 14-0023 Renumbered as 15-0017.

Effective Date: July 1, 2015.

Description: The agency previously published notice of intent to submit medicaid SPA 14-0023 regarding early intervention/preventive services prior to the end of 2014. The notice was filed as WSR 14-17-001. The agency now intends to submit this SPA in 2015; therefore the number has been changed to 15-0017. The SPA is being submitted to obtain federal approval to provide early intervention/preventive services for children age twenty-one and younger at risk of abuse and neglect.

Early childhood treatment services include a variety of services that focus on developing trust, building relationships, and promoting prosocial behavior and adaptive functioning. These specialized services support and enhance health[,] social and emotional development early in life by mitigating health and/or behavioral issues.

If approved, this SPA will allow the state to receive federal matching funds for this program. The agency anticipates the annual aggregate expenditures for this program to be approximately \$4.7 million.

The SPA is in the development process; therefore a copy is not yet available. To contact the agency for a copy when it is available or additional information, please contact Stacey Bushaw, Family Health Care Services, 626 8th Avenue S.E., Olympia, WA 98501, phone (360) 725-1829, TDD/TTY 800-848-5429, fax (360) 725-1152, e-mail Stacey.bushaw@hca.wa.gov.

**DEPARTMENT OF ECOLOGY**

[Filed March 2, 2015, 2:56 p.m.]

**NOTICE OF PUBLIC COMMENT PERIOD  
DRAFT FRESH WATER QUALITY ASSESSMENT  
INCLUDING THE SECTION 303(d) LIST, AVAILABLE FOR PUBLIC REVIEW**

The department of ecology (ecology) is seeking public comment on the draft *Washington State Water Quality Assessment* (the assessment). The assessment fulfills Washington state's obligation under the federal Clean Water Act

(CWA) §303(d) and §305(b) to identify polluted waters (known as the 303(d) list) as well as report on the status of water quality statewide where data is available.

Ecology is conducting a public review on the assessment from **March 17 - May 15, 2015**. The public is asked to comment on listing decisions for freshwater bodies in the draft assessment. For information on access to the public review version of the assessment, go to the web site at <http://www.ecy.wa.gov/programs/wq/303d/freshwtrassessmnt/index.html>.

For the draft assessment, ecology gathered and analyzed water quality data received through 2010 for freshwaters (e.g., streams, rivers, and lakes) located throughout the state. Ecology has also started using an improved water-based mapping system to define segments of freshwater bodies in the assessment. This provides a hydrologic water-based approach to describing water body segments.

The draft assessment is presented as an internet-based search tool and a mapping application that allow the user to investigate water quality in an area of interest through a customized search based on features such as county, water body name, and pollutant. Each potential pollutant for a water body segment is assigned to one of five major water quality categories in accordance with: The amount of available data; whether the pollutant is a problem; and the status of clean-up efforts. The map tool also enables a user to compare the extent of water body segments in the previous water quality assessment to the extent of segments in this draft assessment.

Ecology encourages the public to review freshwaters they are familiar with and provide comments on the draft assessment conclusions. If a reviewer disagrees with an assessment result, please provide specific comments and supporting information to us.

The deadline for public comments is **5:00 p.m., Friday, May 15, 2015**. Please submit comments through the online comment form provided on the internet review tool, by e-mail [303d@ecy.wa.gov](mailto:303d@ecy.wa.gov), or in writing to the address below.

**What Happens after the Public Review?** Ecology will review all comments and make changes to the preliminary list of categories as appropriate. After that, the assessment will be submitted to the Environmental Protection Agency (EPA). EPA has the authority to approve or reject the list of waters with a Category 5 designation (i.e. the 303(d) list portion of the assessment). Each approved Category 5 listing will need to have a pollution clean-up plan developed (also known as total maximum daily load (TMDL)). A TMDL quantifies the amount of a given pollutant that a water body segment can receive and still meet water quality standards. A TMDL is used to plan and implement efforts to reduce water pollution.

**How do I Learn More?** Ecology will hold public workshops from 1:30 p.m. to 4:30 p.m. at the following locations:

**April 7, Edmonds**

Edmonds Conference Center  
Chrysanthemum Hall  
201 Fourth Avenue North  
Edmonds, 98020
