

WSR 21-07-109
EMERGENCY RULES
DEPARTMENT OF

SOCIAL AND HEALTH SERVICES

(Aging and Long-Term Support Administration)
[Filed March 23, 2021, 8:22 a.m., effective March 24, 2021]

Effective Date of Rule: March 24, 2021.

Purpose: The department is extending the emergency rules listed below to assure [ensure] long-term care programs are not significantly impeded during the hiring process due to inability to access the tuberculosis (TB) testing required as a part of the hiring process. This will help to increase the number of long-term care workers necessary to provide essential services to some of Washington's most vulnerable adults during the outbreak of COVID-19. The situation continues that currently clinics providing TB testing are short of staff and have limited availability throughout the state. These clinics are unable to provide the TB testing required as a part of the hiring process in many long-term care programs. This circumstance is expected to exacerbate demand for long-term care workers when the pandemic has already significantly reduced the availability of long-term care workers in the state.

The department filed a CR-101 Preproposal statement of inquiry as WSR 20-16-069 on July 29, 2020, to begin the permanent rule-making process. In addition, under the rule development phase of rule making, the department is in discussions about adding language to the regulations to account for the timeline in which COVID[-19] led to the suspension of rules.

Citation of Rules Affected by this Order: Repealing WAC 388-76-10265, 388-76-10285, 388-78A-2484 and 388-107-0490; and amending WAC 388-76-10290(1), 388-78A-2480(1), 388-78A-2485(1), 388-101D-0650(1), 388-101D-0660(3), and 388-107-0460(1).

Statutory Authority for Adoption: RCW 70.128.040, 71A.12.030; chapters 18.20, 70.97 RCW.

Other Authority: Chapters 70.128, 71A.12, 74.34 RCW.

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: The continued threat of COVID-19 to our most vulnerable populations is significant, especially for those receiving long-term care services in their homes and congregate settings, such as long-term care facilities. Although the state has a phased reopening plan, the situation continues that currently clinics providing TB testing are short of staff and have limited availability throughout the state. These clinics are unable to provide the TB testing required as a part of the hiring process in many long-term care programs. This circumstance is expected to exacerbate demand for long-term care workers when the pandemic has already significantly reduced the availability of long-term care workers in the state.

Ongoing communication with stakeholders indicates a continuance of these suspended rules is needed as the COVID[-19] pandemic is still impacting the ability of long-term care facilities to meet these requirements. While vaccinations are beginning to be distributed, the

program is still in its infancy stage and has not yet improved staffing needs in long-term care facilities.
