

WSR 21-19-130  
PROPOSED RULES  
NOXIOUS WEED  
CONTROL BOARD

[Filed September 21, 2021, 9:41 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 20-11-059.

Title of Rule and Other Identifying Information: Chapter 16-750 WAC, State noxious weed list and schedule of monetary penalties. The Washington state noxious weed control board (WSNWCB) is proposing to amend the state noxious weed list for 2022.

Hearing Location(s): On November 3, 2021, at 1:00 p.m., WebEx, phone 1-415-655-0001, Toll Free 1-855-929-3239, Meeting Access Code 2463 999 4243. "Due to the mandated social distancing requirements in place during the current COVID-19 pandemic, the public hearings will be held solely over video and teleconference."

Date of Intended Adoption: December 1, 2022 [2021].

Submit Written Comments to: Mary Fee, WSNWCB, P.O. Box 42560, Olympia, WA 98504-2560, email mfee@agr.wa.gov or noxiousweeds@agr.wa.gov, fax 360-902-2053, by November 2, 2021.

Assistance for Persons with Disabilities: Contact Deanna Painter, phone 360-902-2061, TTY 800-833-6388, email dpainter@agr.wa.gov, by November 5, 2020 [2021].

Purpose of the Proposal and Its Anticipated Effects, Including Any Changes in Existing Rules: The Washington state noxious weed list provides the basis for noxious weed control efforts for county noxious weed control boards and other entities. It also provides guidelines for the WSNWCB. This proposal makes a few amendments to WAC 16-750-011 and 16-750-015. Specifically, the board is proposing:

1. WAC 16-750-011 Proposed Class B additions and designation changes:

- Hanging sedge, *Carex pendula*, *Carex pendula subsp. pendula* and *Carex pendula subsp. agastachys*: Additional as a Class B noxious weed species designated in region 1, 3, 4, 5, 6, and region 2 except for King County.
- Rough chervil, *Chaerophyllum temulum*: Additional as a Class B noxious weed species designated in region 1, 3, 4, 5, 6, and region 2 except for King County.
- Wild basil/basil savory, *Clinopodium vulgare*: Additional as a Class B noxious weed species designated in region 1, 2, 4, 5, 6, and region 3 except for Skamania County.
- Common tansy, *Tanacetum vulgare*: Reclassification and designation change from a Class C to a Class B noxious weed designated in Clallam County of region 1, Kitsap and San Juan counties of region 2, Cowlitz and Lewis counties of region 3, and Adams and Lincoln counties of region 5.

2. WAC 16-750-015:

- Green alkanet: Addition as a Class C noxious weed species.
- Common tansy: Reclassification and designation change from Class C noxious weed species to Class B noxious weed species.
- Wild carrot: clarifying definition by adding the wording, to exclude *Daucus carota subsp. sativus* (garden carrot) grown commercially or for food.

3. Typo correction: Correcting scientific name of common bugloss from *Lycopsis officinalis* back to *Anchusa officinalis* and correcting scientific name of annual bugloss from *Anchusa arvensis*, to *Lycopsis arvensis*.

Reasons Supporting Proposal: Under RCW 17.10.080, WSNWCB is charged with updating the state noxious weed list on an annual basis to ensure it accurately reflects the noxious weed control priorities and noxious weed distribution. Under RCW 17.10.070, WSNWCB is charged with adopting, amending, or repealing rules, pursuant to the Administrative Procedure Act, chapter 34.05 RCW, as may be necessary to carry out the duties and authorities assigned to the board by this chapter.

The proposed addition of hanging sedge, *Carex pendula*, rough chervil, *Chaerophyllum temulum* (*Carex pendula* subsp. *pendula* and *Carex pendula* subsp. *agastachys*), wild basil/basil savory, *Clinopodium vulgare*, as Class B noxious weeds and green alkanet, *Pentaglottis sempervirens* as a Class C noxious weed species is intended to keep them from spreading from their very limited distribution to new locations within Washington state. Noxious weeds are very invasive species that when left uncontrolled outcompete agricultural crops and native species. Noxious weed infestations negatively impact both terrestrial and aquatic habits [habitats] as well as farming and grazing lands.

The reclassification and designation change of common tansy from a Class C noxious weed to a Class B noxious weed is intended to better help control and contain this species in designated counties. Class B noxious weeds are generally designated where they are absent, limited, or pose a serious threat to health, agriculture, or natural areas so the economic impact is not unreasonable.

The clarification of wild carrot to except subs. *sativus* is intended to allow for the growing of garden carrots for food and commercially.

The correction of common bugloss from *Lycopsis officinalis* back to *Anchusa officinalis* and change *Anchusa arvensis*, annual bugloss to *Lycopsis arvensis* is intended to correct a typo included in the 2021 noxious weed list update.

Statutory Authority for Adoption: RCW 17.10.070, 17.10.080.

Statute Being Implemented: Chapter 17.10 RCW.

Rule is not necessitated by federal law, federal or state court decision.

Name of Proponent: WSNWCB, governmental.

Name of Agency Personnel Responsible for Drafting, Implementation, and Enforcement: Mary Fee, 1111 Washington Street S.E., Olympia, WA 98504, 360-561-4428.

A school district fiscal impact statement is not required under RCW 28A.305.135.

A cost-benefit analysis is not required under RCW 34.05.328. WSNWCB is not one of the agencies listed in this section.

The proposed rule does not impose more-than-minor costs on businesses. Following is a summary of the agency's analysis showing how costs were calculated. Approximately 270 businesses responded to an online survey emailed to licensed nurseries and agricultural industry associations. Seven businesses (2 percent) reported selling Class B proposed addition rough chervil but indicated the listing would have no impact on their business do [due] to loss of sales, revenue, or jobs. Five businesses (1.8 percent) reported selling Class B proposed addition hanging sedge but indicated the listing would have no impact on their business do [due] to loss of sales, revenue, or jobs. Two

businesses (0.7 percent) reported selling Class B proposed addition wild basil but indicated the listing would have no impact on their business do [due] to loss of sales, revenue, or jobs. One business (0.3 percent) reported selling Class C proposed addition green alkanet but indicated the listing would have no impact on their business do [due] to loss of sales, revenue, or jobs. Zero businesses reported selling common tansy and indicated the listing change would have no impact on their business do [due] to loss of sales, revenue, or jobs. Additionally, 91.8 percent of the businesses indicated that they are considered a small business as defined by RCW 19.85.020.

This rule would require the control of Class B noxious weed species infestations designated for control only in specific counties. Currently the only known infestations of hanging sedge are in King, Whatcom, Skamania, and Mason counties. Skamania County has one possible ornamental planting with less than 24 square feet. Whatcom County has six documented sites with a total less than 200 square feet. There is little to no documentation on possible infestations in King and Mason counties. Currently, the only known rough chervil infestations are limited in distribution in Pacific, Mason, Pierce, Kitsap, and King counties. The only know infestations of wild basil are in limited distribution in western Washington. There are very limited to no infestations of wild basil in eastern Washington.

Green alkanet is being proposed as Class C additions. Green alkanet is in limited distribution in western Washington. There are very little infestation [infestations] to none in eastern Washington. Class C noxious weed species are not designated for required control at the state level.

An analysis of the direct economic effects of the proposed rule amendments indicates that costs to businesses would be negligible or none at all. The three new Class B noxious weed additions are being designated for control in counties where they are either absent or limited in distribution, businesses in these counties should not be faced with more-than-minor costs to control those noxious weeds. Limited distribution is typically defined as less than 100 infested acres within a county.

Based upon the above analysis, WSNWCB concludes that direct minor costs - if any - imposed would affect less than 10 percent of businesses and would not exceed \$100 in cost to comply as a direct result of these proposed rule-making changes; nor would any of these amendments to the noxious weed list directly cause the creation of or loss of any jobs. WSNWCB concludes that businesses will not be disproportionately impacted, nor would the proposed rule changes impose more-than-minor cost on businesses in an industry. Therefore, we conclude that a formal small business economic impact statement is not required.

A copy of the detailed cost calculations may be obtained by contacting Mary Fee, P.O. Box 42560, Olympia, WA 98504-2560, phone 360-561-4428, fax 360-902-2094, TTY 800-833-6388, email mfee@agr.wa.gov.
