## EMERGENCY RULES

## DEPARTMENT OF HEALTH

[Filed October 29, 2021, 8:41 a.m., effective October 29, 2021, 8:41 a.m.]

Effective Date of Rule: Immediately upon filing.

Purpose: WAC 246-930-010 Sex offender treatment provider, the department of health (department) is continuing the emergency rule amendment to WAC 246-930-010 to remove the words "face-to-face" from the definition of sex offender treatment, enabling sex offenders to continue accessing telehealth treatment and enabling increased social distancing during the coronavirus disease 2019 (COVID-19) declared emergency.

These rules continue the initial emergency rules that were filed on July 9, 2020, as WSR 20-15-057 and subsequently extended under WSR 20-23-011, 21-07-017, and 21-14-058. As part of the department's continuing response to the evolving COVID-19 public health threat, continuing this emergency rule will allow sex offenders to maintain access to care to prevent recidivism, while mitigating the COVID-19 public health threat and the surge caused by the COVID-19 delta variant.

Citation of Rules Affected by this Order: Amending WAC 246-930-010.

Statutory Authority for Adoption: RCW 18.155.040.

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: The immediate continuation of this emergency rule is necessary for the preservation of public health, safety, and general welfare. By extending the emergency rule amendment, the department will continue allowing sex offender treatment to occur through telehealth. By allowing treatment through telehealth rather than face-to-face, the department will support both the health of sex offenders, who require access to treatment, and the welfare of the public, who are at risk if offenders recidivate. Additionally, allowing telehealth treatment will help reduce community transmission of COVID-19 during the surge caused by the delta variant. Telehealth treatment is not an ideal substitute for in-person group or individual therapy sessions; however, it is a tool that will allow sex offenders to maintain access to care and will mitigate public health concerns created by COVID-19 while vaccine distribution and surging case counts are ongoing.
