Purpose of the Proposal and Its Anticipated Effects, Including Any Changes in Existing Rules: The purpose of this proposal is to equitably assess the costs of commercial geoduck PSP testing. Geoduck PSP testing generate[s] \$58,000 in testing fees annually. The fees are calculated by determining the cost per sample and multiplying this value by how many samples each harvester had tested in the previous year. The PSP testing, which is based on the department's risk assessment of the growing areas, is essential to public health as it is the only way to determine if dangerous levels of PSP exist in commercial geoduck clams and ensure toxic shellfish do not reach the public.

Reasons Supporting Proposal: The proposed geoduck PSP fee redistribution is based on the 2021 total cost of service for the harvesters that submitted geoduck samples (\$58,000) and is based on the cost per sample multiplied by the number of tests done for each harvester.

Statutory Authority for Adoption: RCW 43.70.250, 43.20B.020.
