

**WSR 22-19-051  
EMERGENCY RULES  
DEPARTMENT OF  
FISH AND WILDLIFE**

[Order 22-204—Filed September 15, 2022, 4:56 p.m., effective September 16, 2022]

Effective Date of Rule: September 16, 2022.

Purpose: The purpose of this emergency rule is to place a maximum length of 15 inches for salmon retention.

Citation of Rules Affected by this Order: Amending WAC 220-312-030.

Statutory Authority for Adoption: RCW 77.04.012, 77.04.020, 77.12.045, and 77.12.047.

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: This rule is needed to set a maximum size limit on salmon in Yale Reservoir. As part of the upper Lewis River anadromous reintroduction effort, adult coho will be released into Yale reservoir for habitat preparation and nutrient enhancement. Upstream transport for reintroduction into areas above Swift Dam is ongoing with hatchery coho in excess of weekly Lewis basin hatchery broodstock collection targets. Transport of additional coho adults to Yale Reservoir will occur for habitat preparation and nutrient enhancement purposes.

This fishing rule change will enable continued landlocked salmon fishing while restricting retention of adult coho transported for habitat preparation needs.

There is insufficient time to adopt permanent rules.
