REPEAL OF POLICY STATEMENT

CI-21-0002 - Incorporating changes from the United States Department of Agriculture (USDA) Final Rule into the Washington State Department of Agriculture (WSDA) Hemp Program

WSDA repeals Policy Statement CI-21-0002. Notification of the policy statement was filed with the office of the code reviser on September 29, 2021 (WSR 21-20-061).

Since the changes from USDA final rule have been incorporated into chapter 16-306 WAC, Hemp program, and the delay in the Drug Enforcement Agency registration for hemp testing laboratories is superseded by Policy Statement CI-23-0001, this policy statement is no longer necessary and should be repealed.

INTERPRETIVE OR POLICY STATEMENT
DEPARTMENT OF AGRICULTURE
[Filed March 23, 2023, 6:38 a.m.]

On March 20, 2023, the Washington state department of agriculture (WSDA) signed a policy statement delaying the requirement that laboratories conducting testing of hemp obtain United States Drug Enforcement Administration (DEA) registration. There is currently insufficient capacity for testing of hemp in the United States. To allow the federal government sufficient time to work with industry to address this issue, the United States Department of Agriculture (USDA) and, therefore, WSDA will continue to delay enforcement until December 31, 2023.

A copy of the policy statement may be obtained by accessing our website or by contacting Gloriann Robinson, Agency Rules Coordinator, 1111 Washington Street S.E., P.O. Box 42560, Olympia, WA 98504-2560, phone 360-902-1802, email wsdarulescomments@agr.wa.gov.

POLICY STATEMENT

Number: CI- 23-0001

Subject: Delay in requirement for DEA laboratory registration for conducting testing of hemp.

Supersedes: CI-21-0002.

Contact: Jessica Allenton, Assistant Director, Commodity Inspection Division, email jallenton@agr.wa.gov, phone 360-902-1828.

Approved By: Derek I. Sandison, Director.

Date Approved: March 22, 2023.

To provide clarity regarding the delay of enforcement of the requirement to use laboratories registered with DEA for testing hemp, WSDA issues this policy statement pursuant to RCW 34.05.230.

Description: Section 10113 of the Agriculture Improvement Act of 2018 (2018 Farm Bill) legalized the commercial production of hemp nationwide after several decades of it being controlled under the Controlled Substances Act. The final rule on the establishment of a domestic hemp production program (86 F.R. 5596), published by USDA on March 22, 2022, requires laboratories conducting hemp testing to be registered with DEA. However, since the passage of the 2018 Farm Bill, DEA has not agreed to register labs that test high-THC cannabis. As Washington is a state with legal adult-use cannabis, there is a conflict, as laboratories with the capacity to test for hemp also test high-THC cannabis and therefore cannot be DEA registered. USDA acknowledges that this conflict presents a challenge for states with legal cannabis programs and has continuously delayed their DEA laboratory registration requirement in response. To allow the federal government sufficient time to work with industry to address this issue, WSDA is also delaying enforcement of the federal requirement for hemp testing laboratories to obtain DEA registration.

Delay in Requirement for DEA Laboratory Registration: The 2018 Farm Bill allows the production of hemp in the United States and no longer includes hemp as a controlled substance. Hemp with a delta-9 tetrahydrocannabinol (THC) level of 0.3 percent or less on a dry weight basis is not a controlled substance in Washington state. We also know that weather and other factors may affect the THC level in hemp and that labs may receive material that is over the 0.3 percent THC level and is, by definition, a controlled substance. USDA's F.R. requires that laboratory testing of hemp for the purpose of determin-

ing compliance under the United States Domestic Hemp Product Program be conducted by laboratories appropriately registered with DEA.

Per WAC 16-306-090, THC level testing of Washington-produced hemp is conducted by laboratories either run or approved by WSDA. In light of the USDA guidance, DEA registration is not currently a requirement for WSDA approval of a hemp testing laboratory.

USDA is permitting WSDA to delay enforcement of the requirement to use laboratories registered with the DEA for testing (7 C.F.R §§ 990.3 (a)(3)(i) and 990.26(e)). Under this guidance, testing can be conducted by labs that are not yet DEA registered until December 31, 2023. This change will allow additional time to increase DEA-registered analytical lab capacity.

All laboratories engaged in the testing of hemp through this interim period will be subject to the compliance requirements of chapter 16-306 WAC. Specifically, labs must adhere to the standards of performance as outlined within chapter 16-306 WAC, including the requirement to test for total THC employing post-decarboxylation or other similarly reliable methods. All labs that wish to continue hemp testing will have to make arrangements to be compliant with DEA registration requirements before this period of delayed enforcement expires.

NOTICE OF PUBLIC MEETINGS
DEPARTMENT OF ECOLOGY
DEPARTMENT OF HEALTH
[Filed March 30, 2023, 12:09 p.m.]

Notice of Public Meeting and Comment Period

The Washington state department of ecology (ecology) and department of health (health) want your input on the draft phthalates action plan.

Ecology and health, with input from a broad group of stakeholders, have developed a draft action plan to address phthalates, a hormone-disrupting chemical group. This draft action plan provides recommendations to reduce the use, release, and exposure of phthalates to people and the environment.

Ecology invites you to review the draft action plan and provide written comments from May 1 to June 14, 2023. Ecology will host two informational public workshops on the draft action plan.

Viewing the draft action plan: Starting on **May 1, 2023**, the draft action plan will be available for review on the following web page <https://ecology.wa.gov/Waste-Toxics/Reducing-toxic-chemicals/Addressing-priority-toxic-chemicals/Phthalates>.

Submitting written comments: Ecology will accept online comments on the draft action plan from **May 1 to June 14, 2023**. Comments must be submitted no later than **11:59 p.m.** on June 14, 2023.

To submit a comment online, fill out the online comment form <https://hwtr.ecology.commentinput.com/?id=haD3V>.

Public workshops: Ecology will host two virtual public workshops on the draft action plan. During the workshops, ecology staff will provide a brief background on phthalates, explain the draft recommendations, and answer questions. We ask that you submit formal comments using the online comment form.

Public workshop #1: Wednesday, May 17, 2023, 6:00 to 8:00 p.m. PDT. Join through the link <https://waecy-wa-gov.zoom.us/j/86093626837>, Meeting ID 860 9362 6837; or join by calling +1 253 215 8782 US (Tacoma).

Public workshop #2: Thursday, May 18, 2023, 9:00 to 11:00 a.m. PDT. Join through the link <https://waecy-wa-gov.zoom.us/j/86939196846>, Meeting ID 869 3919 6846; or join by calling +1 253 215 8782 US (Tacoma).

Project background: Phthalates are a class of chemicals that are used to make many consumer products. They are used to add flexibility to plastics and extend the life of scents in fragrances. They do not form strong bonds with the materials they are in, which means they easily escape from products into our homes and the environment.

We are developing this action plan because phthalates are endocrine disruptors and can impact hormone systems in humans. Endocrine disruptors can affect reproduction and development, especially in children and people of childbearing age. For more background information on phthalates, please visit our web page <https://ecology.wa.gov/Waste-Toxics/Reducing-toxic-chemicals/Addressing-priority-toxic-chemicals/Phthalates>.

Ecology contact: If you have any questions, please contact Chemical Action Team, Washington State Department of Ecology, email ChemActionPlans@ecy.wa.gov.
