**EMERGENCY RULES**  
**DEPARTMENT OF**  
**FISH AND WILDLIFE**

[Order 24-53—Filed April 9, 2024, 11:29 a.m., effective April 9, 2024, 11:29 a.m.]

Effective Date of Rule: Immediately upon filing.

Purpose: This emergency rule is needed to modify spring recreational salmon and steelhead rules in the lower Columbia River and Deep River.

Citation of Rules Affected by this Order: Repealing WAC 220-312-03000L and 220-312-06000G; and amending WAC 220-312-030 and 220-312-060.

Statutory Authority for Adoption: RCW 77.04.012, 77.04.020, 77.12.045, and 77.12.047.

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: Extends the 2024 spring recreational salmon and steelhead season in the mainstem Columbia River from Buoy 10 upstream to Bonneville Dam and maintains the previously adopted season from Bonneville Dam upstream to the Washington/Oregon border. Additionally, this rule aligns the Deep River salmon and steelhead daily bag limit with the mainstem lower Columbia River when the mainstem is open. The Endangered Species Act (ESA) impacts for wild fish are available to recreational fisheries in order to access hatchery fish. The fishery is consistent with the *U.S. v. Oregon* Management Agreement and the associated biological opinion. Conforms Washington state rules with Oregon state rules. This regulation is consistent with compact actions of February 21, April 4, 2024, and joint state action on April 9, 2024. The general public welfare is protected with the immediate and limited duration opening of recreational salmon fishing. This limited harvest allows for public use of the resource as well as the maintenance of a sustainable fish population.

Washington and Oregon jointly regulate Columbia River fisheries under the congressionally ratified Columbia River Compact. Four Indian tribes have treaty fishing rights in the Columbia River. The treaties preempt state regulations that fail to allow the tribes an opportunity to take a fair share of the available fish, and the states must manage other fisheries accordingly. *Sohappy v. Smith*, 302 F. Supp. 899 (D. Or. 1969). A court order sets the current parameters. *United States v. Oregon*, Civil No. 68-513-KI (D. Or.), Order Adopting 2018-2027 *United States v. Oregon* Management Agreement (February 26, 2018) (Doc. No. 2607-1). Some salmon and steelhead stocks in the Columbia River are listed as threatened or endangered under ESA. On February 23, 2018, the National Marine Fisheries Service issued a biological opinion under 16 U.S.C. § 1536 that allows for some incidental take of these species in the fisheries as described in the 2018-2027 *U.S. v. Oregon* Management Agreement.

Some Columbia River Basin salmon and steelhead stocks are listed as threatened or endangered under ESA. The Washington and Oregon fish and wildlife commissions have developed policies to guide the implementation of such biological opinions in the states' regulation of nontreaty fisheries.

Columbia River nontreaty fisheries are monitored very closely to ensure compliance with federal court orders, ESA, and commission guidelines. Because conditions change rapidly, the fisheries are managed almost exclusively by emergency rule. Representatives from the Washington (WDFW) and Oregon (ODFW) departments of fish and wildlife convene public hearings and take public testimony when considering proposals for new emergency rules. WDFW and ODFW then adopt regulations reflecting agreements reached. There is insufficient time to promulgate permanent rules.
