Statutes Authorizing the Agency to Adopt Rules on this Subject: Chapter 70.79 RCW.

Reasons Why Rules on this Subject may be Needed and What They Might Accomplish: The board and department of labor and industries (L&I) are considering amendments to the boiler rules for updates, clarification, and other changes. The changes affect safety codes, installer and clearance requirements, and fees under chapter 296-104 WAC, Board of boiler rules—Substantive. The rule amendments under consideration include:

- Increasing fees by the fiscal growth factor to support operating expenses;
- Making installers responsible for correcting deficiencies found on initial inspection and paying subsequent inspection fees;
- Updates for consistency with safety codes from the current editions of the National Board Inspection Code and American Society of Mechanical Engineers. This includes:
 - o Removing an outdated reference for relief devices; and
 - o Adding new standards for over pressure protection and pressure relief devices.
- Making amendments to the clearance requirements for installations of boilers and pressure vessels.

Other Federal and State Agencies that Regulate this Subject and the Process Coordinating the Rule with These Agencies: None.
