PERMANENT RULES

DEPARTMENT OF AGRICULTURE

[Filed February 20, 2026, 12:40 p.m., effective March 23, 2026]

Effective Date of Rule: Thirty-one days after filing.

Purpose: This rule-making order amends chapter 16-470 WAC, Quarantine—Agricultural pests, by expanding the apple maggot quarantine area in Okanogan County. Recent apple maggot surveys provide evidence that the state's apple maggot population has expanded its range into pest-free areas of the county. Changes to the existing rule may better protect the environment and agricultural crops of the state by slowing possible movements of apple maggot from infested areas into the pest-free area, and by securing access to international and interstate markets.

The apple maggot is an invasive insect pest native to Eastern North America. Its hosts include apple, crabapple, and native and ornamental hawthorn. During the larval stage, apple maggot can cause extensive damage to fruit. It is also economically significant to Washington's apple industry because fruit from the pest-free areas has greater access to international markets.

Citation of Rules Affected by this Order: Amending WAC 16-470-105.

Statutory Authority for Adoption: RCW 17.24.011 and 17.24.041.

Other Authority: Chapter 17.24 RCW.

Adopted under notice filed as WSR 26-01-180 on December 23, 2025.
